——*Veidhrity* (वैधृति - vaidhriti, San.). From (vi, san. suffix of separation + dhrita, san. held), stop; opposition. Yogam star of 27th hindoo lunar mansion of Raivaty [q.v.]. η or ζ, 5 Piscium [hoot, meenam]. It is the last point of Raivaty [q.v.] and the first point of Ashwiny [q.v.] in the lunar constellation scheme, and marks the beginning of the fixed hindoo ecliptic [ayanaumsham, craunty pautagaty, maunam, mausam, rishy], at any rate approximately. See Madhyama sowra maunam, for full account of the last-named matter.——*Vishaukham* (विशाखा - vishákhá, San.; விசாகம் - viságam, Tam.). From (vi, san. spreading + shákhá, san. branches). 16th hindoo lunar mansion. Figured by a decorated gateway or arch, and containing four or originally two stars placed under the regency of a dual divinity, Indran and Agny. The four are α, ν, ι Libræ [meezaun, toolaum] and λ Scorpii [akrab]. For α Libræ, 46 see Siddhy and Zubenesch. Compare arabian mansion Zoobaunah.——*Vishcambham* (विष्कम्भ - vishkambha, San.). From (vishkambh, san. to fix firmly). Yogam star of first hindoo lunar mansion. α Arietis, 10 [hamel]. 2nd magnitude.——*Vriddhy* (वृद्धि - vriddhi, San.). Means increase. Otherwise Zoobra, 36 [q.v.]. Yogam star of 11th hindoo lunar mansion. δ Leonis [asad, simham], 36. 2nd magnitude.——*Vrishabham* (वृषभ - vrishabha, San.). Means bull. Second sign [raushy] of the zodiac [raushy chuckram]. Taurus, ♉ [sowr].——*Vrishchicam* (वृश्चिक - vrishchika, San.). Means scorpion. Eighth sign [raushy] of the zodiac [raushy chuckram]. Scorpio, ♏ [akrab].——*Vyateepautam* (व्यतीपात - vyatípáta, San.). From (vyatí, san. to pass away + páta, san. falling). Yogam star of 17th hindoo lunar mansion. δ Scorpii [akrab], 50. 2nd magnitude. See also Yikleel.——*Vyaughautam* (व्याघात - vyágháta, San.). Means impediment. Yogam star of 13th hindoo lunar mansion. δ Corvi [ghooraub], 39. 3rd magnitude. See also Hastam.——*Wazn* (وزن - wazn, Ar.). From (wazana, ar. to weigh exactly). Also (alwazn). β centauri [cantooras]. Cf. Hazaur for α. The pair are Moohlifaun [q.v.].——*Wonam* (ഓണം - ónam, Mal.; ஓணம் - ónam, Tam.). By corruption from Shravanam [q.v.], the 22nd hindoo lunar mansion. For feast so called see sep. title.——*Yadd ool jowzah* (يدالجوزا - yadduljauzá, Hind.). From (yadd, ar. arm + jauzá, ar. orion). Same as Betelgeux.——*Yikleel* (اكليل - iklíl, Ar.). Means a crown. Four stars in Scorpio [akrab]; β, δ, υ, π Scorpii. 17th arabian lunar mansion. For δ Scorpii, 50 see Vyateepautam. Compare hindoo mansion Anooraudhay.——*Yikleel i joonooby* (اكليل جنوبي - iklíljunúbí, Ar.). From (iklíl, ar. crown + junúbí, ar. southern). Constellation. Thirteen stars. Corona australis, Southern crown. For Northern crown see Yikleel i shoomauly.——*Yikleel i shoomauly* (اكليل شمالي - iklílishumálí, Ar.). From (iklíl, ar. crown + shumálí, ar. northern). Otherwise (fakkah), meaning gap; cf. alphacca, 48; from its semi-circular position; also Casat ool masaukeen [q.v.], meaning pauper's bowl; also Causa i darvishaun [q.v.], meaning beggar's bowl, from its similarity. Constellation. Corona borealis, the Northern crown. N. hemisphere. Is east of Boötes [awwah], stars disposed in small semi-circle; at same distance from last star of tail of Great bear [doobhe acbar, maharicsham], η Ursæ majoris, 42 [benetnasch], that this star is from Doobhe, 35 [q.v.], the northernmost of the Pointers [alanak, doobhe], and on the same line. Or, it lies to the northward of a line drawn from Vega, 58 [abhijit, nasr ool wauky] to Arcturus, 44 [haurs ool samah, vajram], one-third the distance from the latter. The principal star is Gemma, or Alphacca, 48 [q.v.]. For Southern crown see Yiklee li joonooby.——*Zanab ool dajjajah* (ذنب الدجاجه - zanabuddajjájah, Hind.). From (zanab, ar. tail + dajjájah, ar. cygnus). Same as Deneb.——*Zaubih* (ذابح - zábih, Ar.). From (zabah, ar. to slaughter); two stars close together one bright and the other obscure so that one of them is represented as slaughtering the other; cf. Boola. Also (saduzzábih). Two stars α β Capricorni [jaddy, macaram]. 22nd arabian lunar mansion. Compare hindoo mansion Abhijit.——*Zaut ool coorsy* (ذات الكرسي - zátulkursí, Ar.). From (zát, ar. lady + kursí, ar. chair). Constellation. N. hemisphere. Thirteen stars. Cassiopea [caushyapy], wife of Cepheus. Several stars of third and fourth magnitudes, grouped like chair; otherwise Cassiopea's chair, or the chair only, or lady's chair. For the chained lady or Andromeda see Mirat i moosalsila. The five principal stars resemble a distorted M or W. A line drawn from any one of the three stars of tail of Great bear, ε, ζ, or η, 42 Ursæ majoris [doobhe acbar, maharicsham], through Polaris, 6 [alrooccabah, dhroovam], will lead to this; Great bear [doobhe acbar] and Cassiopea are opposite sides of pole [dhroovam]. A line drawn from δ Ursæ majoris through Polaris, 6 [al rooccabah, dhroovam], leads to β Cassiopeæ [cuff ool khazeeb]; the two stars are nearly equidistant from Polaris, 6. When above the pole, β Cassiopeæ [cuff ool khazeeb] is westernmost star of group. When above the pole, α is a few degrees S.E. of β Cassiopeæ; when below the pole, a few degrees S.W. of it. α Cassiopeæ or schedir is a variable star, generally fainter than β but sometimes brighter. Cepheus, husband of Cassiopea, is not separately noticed as a constellation in Arabian system; between Draco [tinneen] and Cassiopea, on opposite side of pole to Ursa major [doobhe acbar]; the principal star, α Cephei [alderamin] is only of magnitude 3, and is nearly midway between α Cassiopeæ and β Draconis [tinneen] or alweida [q.v.]; β Cephei [alfirk] also of magnitude 3 is 8° north of α Cephei [alderamin], on a line leading towards Polaris, 6 [alrooccabah, dhroovam]. For κ Cephei see Kalb ool royee. For γ cephei see Alroyee.——*Zauviyat ool awwah* (زاوية العوا - záviyatulawwá, Ar.). From (záviyah, ar. angle + awwá, ar. the lunar mansion). γ Virginis [soomboola], from being so disposed in awwah [q.v.], the 13th arabian mansion.——*Zaw auyib ool jowzah* (ذوائب الجوزا - zawáibuljauzá, Hind.). From (zawáib, ar. hanging cluster + jauzá, ar. orion). Same as Tauj ool jowzah.——*Zeebaun* (ذئبان - zíbán, Ar.). Means two wolves; cf. saboo, a wolf. Two white stars, ξ, η Draconis [tinneen] between awoyiz [q.v.] and farkdaun [q.v.]. Compare Azfaur oolzeib.——*Zirah* (ذراع - zirá, Ar.). Means a forearm; cf. alzirah. Short for zirah oolasad or forearm of Leo [asad].——*Zirah ool mabsoot* (ذراع المبسوط - ziráulmabsút, Ar.). From (zirá, ar. foreleg + mabsút, ar. stretched); foreleg extended. Two stars α, β Geminorum [jowzah, mitoonam], forming the heads of the twins. Seventh arabian lunar mansion. β Geminorum, 28 is Pollux or Alzirah [q.v.] or Soocarmam [q.v.]. Compare hindoo mansion Poonarvas.——*Zirah ool makbooz* (ذراع المقبوض - ziráulmakbúz, Hind.). From (zirá, ar. foreleg + makbúz, ar. contracted); the retracted foreleg of leo; the ancient arabs had projected leo [asad] far beyond the limits now assigned to it. Two stars, α, β Canis minoris [kalb i asghar]. For α Canis minoris, 27 Procyon see Ghoomeisah. See also Mirzam and Mirzamaun.——*Ziraun* (ذراعان - ziráán, Ar.). Dual of zirah. Applied to both zirah ool mabsoot and zirah ool makbooz.——*Zoobaunah* (زبانا - zubáná, Ar.). Means claw. Short for zoobaunah ool akrab, meaning claw of scorpio, which the arabs projected into Libra. Two stars in the claws of Scorpio [akrab]; by some, α, β, by some α, γ, of Libra [meezaun, toolaum] according to the auroral rising or setting. 16th arabian lunar mansion. For α Libræ, 46 see Siddhy and Zubenesch. For β Libræ see Zubenelg. Compare hindoo mansion Vishaukham.——*Zoobra* (زبره - zubrah, Ar.). Means the part where the neck is joined to the back-bone. Also (zubratulasad); (kharátán). Two stars δ θ Leonis [asad, simham], two whips length apart. 11th arabian lunar mansion. For δ Leonis, 36 see Vriddhy. Zoobra is also applied to single star δ Leonis. Compare hindoo mansion Poobbam.——*Zubenelg* (زبانيا العقرب - zubániyalakrab, Ar.). From (zubániya, ar. claw + akrab, ar. scorpio); according to some this is in Scorpio [akrab] which the arabs had considerably enlarged to include a portion of Libra [meezaun, toolaum]. Otherwise Zubenel chamauly or northern claw. Star of second magnitude. β Libræ.——*Zubenesch* (زبانيا السنبله - zubániyassumbulah, Ar.). From (zubániya, ar. claw + sumbulah, ar. virgo). Otherwise Zubenel joonooby or southern claw. Star of second magnitude. α Libræ [meezaun, toolaum], 46 [siddhy]. See also Soomboola.——**(9)** The following are the regents of the Hindoo lunar mansions.——*Adity* (अदिति - aditi, San.). Death. Of 7th.——*Agny* (अग्नि - agni, San.). Fire. Of 3rd.——*Ahirboodnay* (अहिर्बुध्न्य - ahirbudhnya, San.). Serpent of the deep. Of 26th.——*Ajeicapaud* (अजैकपात् - ajaikapát, San.). Single-legged driver. Of 25th.——*Aryamay* (अर्यमा - aryamá, San.). Playfellow. Of 12th.——*Aupas* (आपस् - ápas, San.). Water. Of 20th.——*Bhagam* (भग - bhaga, San.). Bestower of wealth, Of 11th.——*Bramha* (ब्रह्म - brahma, San.). Creator. Of 21a.——*Brihaspaty* (बृहस्पति - brihaspati, San.). Priest of gods, Of 8th.——*Indran* (इन्द्र - indra, San.). Lord of gods. Of 18th.——*Indran and agny* (इन्द्राग्नी - indrágní, San.). Of 16th.——*Mitran* (मित्र - mitra, San.). A friend. Of 17th.——*Pitries* (पितृ - pitri, San.). Spirits of the departed. Of 10th.——*Pooshan* (पूषन् - púshan, San.). Nourisher, Sun. Of 27th.——*Prajaupaty* (प्रजापति - prajápati, San.). Creator. Of 4th and 19th.——*Roodran* (रुद्र - rudra, San.). Destroyer. Of 6th.——*Sarpam* (सर्प - sarpa, San.). Serpent. Of 16th.——*Savitry* (सवितृ - savitri, San.). Generator, sun. Of 13th.——*Soman* (सोम - sóma, San.). Moon. Of 5th.——*Twashtay* (त्वष्टा - twashtá, San.). Architect of gods. Of 14th.——*Twin-gods* (अश्विनौ - ashvinau, San.). Of 1st.——*Varoonan* (वरुण - varuna, San.). God of waters. Of 24th.——*Vasoo* (वसु - vasu, San.). Wealth. Of 23rd.——*Vayoo* (वायु - váyu, San.). Wind. Of 15th.——*Vishnoo* (विष्णु - vishnu, San.). The preserver. Of 22nd.——*Vishwedevah* (विश्वेदेवाः - vishvédéváh, San.). All gods. Of 21st.——*Yaman* (यम - yama, San.). Lord of the nether world. Of 2nd.——**(10)** Nacshatram is also used for meteors. These are considered appearances of those who, having enjoyed in the higher worlds the effects of their Poonyacarmam [carmam, samsauram] or good deeds, fall down to the earth. These meteors are of five sorts known technically as Ashany, Vidyoot, Dhishnyam, Taurah, and Oolcay. Varauha mihiran says of them:—"Ashany is a meteoric substance, "circular in shape; it strikes with a loud report men, elephants, "horses, deer, rocks, houses, trees and sheep and passes into the "earth. Vidyoot is a large bent fiery substance and strikes, "with a loud and fearful sound, living creatures and collection

"of wood. Dhishnyam is a blazing fiery meteoric appearance, "thin and with a small tail, and visible beyond a distance of 40 "cubits; its length is two cubits. Taurah is a meteoric sub- "stance, a cubit in length, and of white or copper color, or of the "color of the stem of the lotus [nelumbo]; it will appear to move "either horizontally or vertically downwards or upwards as if "by some invisible force. Oolcay is an appearance with a large "head, a very small tail and of the length of a man's body; as it "falls it increases in length; this appearance is of several "kinds." A common term for the ordinary comet is Vaul nacshatram or tailed-star [dhoom kait].

NAD (नद् - nad, *San.*). To sound.——*Nadaupooram* (നാദാപുരം - nádápuram, Mal.). From (náda, san. noise + pura, san. town). Town, District moonsif's head-quarters; Malabar dist., Cooroombranaud tal.; lat. 11° 41′; long. 75° 42′; from Badagara N.E. 7¾ miles; from Calicut N.N.W. 30 miles; from the sea E. 8 miles. Rising Moplah [q.v.] town.——*Nadee* (नदी - nadí, San.). From (nad, san. to sound). Common termination for Sanscrit names of rivers, especially principal rivers forming what are called in English river-basins. Properly speaking Nadam, a male river, is a river flowing to the north or west, as meeting aryan immigrants; and Nadee, a female river, is a river flowing to the east or south [aur], as running away from the same. Generally appears in anglo-indian terminations as Nuddy.——*Nadee mautricam* (नदीमातृक - nadímátrika, San.). From (nadí, san. river + mátrika, san. having for mother); river-nourished. Land irrigated by a river as opposed to devamautricam or land nourished by the skies, i.e., dependent on rains [mazhay].

NADEEM (نديم - nadím, *Ar.*). From (nudama, ar. to be in confidence). Companion. Part of lacab; as Nadeem ood dowla, companion of the empire [ism].

NADIR (نظير - nazír, *Ar.*). From (nazara, ar. to see). Otherwise (nazírussamt), meaning opposite to zenith. Point in the heavens [bhagolam] directly opposite to the zenith [q.v.].

NADOO (നടു - natu, *Mal.*; நடு - nadu, *Tam.*). Middle. Equity. Prefix in place names; as Nadoovuttam, meaning middle circle.——*Nadoojaumam* (நடுச்சாமம் - naduççámam, Tam.). From (above + yáma, san. watch of three hours). Midnight [jaumam].——*Nadoovan* (നടുവൻ - natuvan, Mal.). From (above + an, mal. personal suffix). An arbitrator [madhyastan]. The impartial one; Yaman [q.v.], god of death.——*Nediwuttam* (നടുവട്ടം - natuvattam, Mal.). From (nadu, tam. middle + vattam, tam. valley); place being midway between the wynaud and the neilgherries. Village; Neilgherry dist., Todanaud div.; pop. 1,713; acres 26,030; lat. 11° 29′; long. 76° 36′; from Ootacamund W.N.W. 12 miles. At the head of the Goodalore pass. Public bungalow [q.v.]. Good carriage road to Ootacamund. Cinchona [koinah] estate close to the village on the north; 683 acres.——*Needamungalam* (நீடாமங்கலம் - nídámangalam,* Tam.). From (nadu, tam. middle + áru, tam. river + mangala, san. prosperity). Sanscrit name (yamunámbápura), meaning yamoonay, the queen + town.—"*a*" Deputy tahsildarry, Tanjore district. Pay Rs. 70.—"*b*" Inam village, Head-quarters of Deputy tahsildar, Railway station; Tanjore dist., Munnargoody tal.; pop. 2,806; acres 723; lat. 10° 46′; long. 79° 28′; height 78 feet; from Combaconam S.S.E. 13 miles; from Madras S.S.W. 167 miles; from Mayavaram S.S.W. 27 miles; from Munnargoody N.N.W. 8 miles; from Negapatam W. 28 miles; from Tanjore E. 19 miles. Two old Shiva [q.v.] temples, with inscriptions [shausanam]. Old Vishnoo [q.v.] temple [coil, pagoda]. Largely endowed chuttram [q.v.] built in 1761 by rajah Prataup sing in honor of his Ranee, Yamoonah bye sahiba. Lies between the Vennaur and the Coraiyaur.

NAFAR (نفر - nafar, *Hind.*). From persian. An individual. Nafargaty feisal is an individual settlement [ryotwarry]. Nafar jaumeen is personal security as opposed to money security [nagad jaumeen, rokka jaumeen].

NAFEEL (نفل - nafil, *Ar.*). From (nafala, ar. to present). Prayers not enjoined. Voluntary devotion [namauz, salaut].

NAGAD (نقد - nakd, *Hind.*). Money, cash. Nagad jaumeen is money security [rokka jaumeen]. Nagady chittah is a cash receipt. Nagady goomasta is a treasury clerk. Nagady jummacurts is an account of cash receipts and disbursements. Nagady is bullion or uncoined gold [pon] and silver [velly] in the mass.

NAGAY (நகை - nagai, *Tam.*). From (nagu, tam. to shine) [nangay]. Ornament. See vol. I (98). See Zewar for Mahomedan ornaments.

NAH (நா - ná, *Tam.*). Tongue.——*Naugaswaram* (நாகசுரம் - nágasuram, Tam.). From (nákku, tam. tongue or mouth-piece of a musical instrument + shuram, tam. tube), corrupted. Tam. also (náyagasuram), meaning chief clarion; also (náyagasinnam), meaning chief clarion; the latter corrupted into (náyanam), the form by which familiarly known. Native clarionet [mookhaveenay] used in temples [coil, pagoda] in daily worship [poojah] and indispensable on festive occasions in houses. Also gives name to a reed used in making it; see Large naunal.——*Naumagal* (மநாகள் - námagal, Tam.). From (above + magal, tam. daughter). Saraswaty [q.v.]. Naumagal ilambam is title of a chapter in Jeevaca Chintaumany [q.v.].

NAHAH (ناها - nahá, *Mahl.*). Master; captain [nacodah].

NAIB (نائب - náib, *Hind.*). From (naub, ar. to be near) [nawaub]. A deputy. The word is prefixed, like the English 'sub-,' to the titles of officers; as naib rissaldar, a lower grade of rissaldar; naib diwaun, a sub-treasurer.——*Nawaub* (نواب - navváb, Hind.). From (naub, ar. to be near). Portuguese nababo. The plural of (náib, ar.), but used honorifically in the singular [naib]. Originally a viceroy or governor of a province under Moghul [q.v.]; these often became independent, whence title for a Mahomedan ruler. The title also conferred upon a person of high rank without office being attached to it.——*Nawaubpett* (నవాబుపేట - navábupéta, Tel.). From (naváb, hind. mahomedan ruler + péta, tel. suburb). Village; lat. 14° 28′; long. 80° 03′; from Nellore E.N.E. 1¾ miles; from the sea W. 12 miles. Suburb of Nellore.

NAICHA (نيچه - nechah, *Hind.*). Hookah [q.v.] tube.

NAIL DYE (झिण्टी - jhintí, *San.*; గోరంట - góranta, *Tel.*; കുറിഞ്ഞി - kuriññi, *Mal.*; කරඬු - karandu, *Singh.*; முள்ளி - mulli, *Tam.*). Title from use of leaves. Tel. from (góru, tel. nail + antu, tel. paste); leaves made into paste and used to dye nails and extremities. Tam. from (mul, tam. prickle). Botanically the Barleria genus, acanthaceæ [vricsham, 101]. Spiny under-shrubs; leaves entire and opposite; fugaceous flowers of various hues and showy; fruit a capsule bursting elastically with two valves; seeds roundish. The species best known to the natives are shown below. Other species are:—bispinosa, buxifolia, courtallica, cuspidata, gibsoni, involucrata, longiflora, montana, mysorensis, noctiflora, pilosa, tomentosa. Compare in other genera, where transl. is of first term:—Amarantus spinosus (erramulugóranta), red thorn; Crotalaria verrucosa (giligóranta), rattle; Erythroxylon monogynum (adavigóranta), forest; Gomphrena globosa (peddagóranta), large; Peganum harmala (símagóranta), foreign. See gloss. paragraphs.——*Blue nail dye* (नीलझिण्टी - nílajhintí, San.; నీలాంబరము - nílámbaramu, Tel.; നീലക്കുറിഞ്ഞി - nílakkuriññi, Mal.; நீலாம்பரம் - nílámbaram, Tam.). Title from flowers. San. from (níla, san. blue + jhintí, san. barleria cristata, linn.), from blue flowers. Tel. from (níla, san. blue + ambara, san. sky). Mal. from (níla, san. blue + kuriññi, mal. barleria). Tam. from (níla, san. blue + ambara, san. sky). San. also (dásí), meaning wounding plant, from prickles; (vana), meaning wounding plant. Tam. also (mañjalsemmulli), meaning yellow + red + thorny shrub. Title otherwise Neelaumbram [q.v.], Sky-blue barleria. Botanically Barleria [nail dye] strigosa, willd., acanthaceæ [vricsham, 101]. Alias Barleria cærulea. Undershrub; stem strigose; leaves elliptic-oblong, decurrent into the petiole, lineolate above, glabrous; spikes axillary, subsessile, short, dense; bracts elliptic, somewhat attenuated at the apex, mucronulate-ciliated; upper segment of the calyx emarginate; tube of the corolla elongated; flowers pale-blue; flowering in the cold season. There is a variety terminalis.——*Common nail dye* (कुरुण्टक - kuruntaka, San.; कोरांटी - kóránti, Mahr.; गोरटि - górati, Conc.; كٹسريا - katsariyá, Hind.; لال پهول كے كولسے كا پتا - lálphúlkekolsekápattá, Dec.; ಮುಳ್ಳುಗೋರಂಟೆ - mullugórante, Can.; ಗೋರಂಟೆದ್ದು - górantedai, Too.; ముళ్లుగోరంట - mulugóranta, Tel.; ചെമ്മുള്ളി - chemmulli, Mal.; කටුකරඬු - katukarandu, Singh.; செம்முள்ளி - shemmulli, Tam.). San. from (ku, san. earth + ram, san. to delight). Mahr. from sanscrit. Dec. from (lál, hind. red + phúl, hind. flower + kolsá, hind. charcoal + pattá, hind. leaf). Can. from (mullu, can. thorn + górante, can. the plant). Tel. like canarese. Mal. from (chem, mal. red + mulli, mal. thorny plant). Singh. from (katu, singh. thorn + karanda, singh. the plant). Tam. from (shem, tam. red + mulli, tam. thorny shrub) [andaman indian oak]. San. also (sairéyaka), meaning turned up by the plough; (anantá), meaning endless [hurrially, indian sarsaparilla]; (kóranta). Mahr. also (vajradantí), meaning diamond + tooth. Hind. also (kántajanti), meaning thorn + barleria cristata, linn. Can. also (mullumadarangi), meaning thorn + henna plant, lawsonia alba, lamk.; (kurantakagida), meaning yellow amaranth. Tel. also (pattsamulugóranta), meaning yellow + the plant; (kondagobbi), meaning hill + plant, hygrophila spinosa, t. & andr. Mal. also (kollattuvettila), meaning betel of collam; (vettilakkodi), meaning betel creeper, piper betel, linn. [betel pepper]. Tam. also (varalmulli), meaning to dry + thorny shrub; (kodippasalai), creeper + the plant, basella. Title otherwise Collam betel leaf, Thorny nail dye. Botanically Barleria [nail dye] prionitis, linn., acanthaceæ [vricsham, 101]. Alias Barleria hystrix; Justicia appressa. Shrubby weed, 2 feet; stem herbaceous; deep green leaves opposite, entire, lanceolate-ovate; between the branch and the leaf there is a spine with four sharp rays from the same centre; flowers sessile, axillary, orange colored; flowering nearly all the year; root woody, perennial, with numerous lateral rigid rootlets. Hindoo poets compare its yellow flowers to a flash of lightning. Juice of leaves, which is rather bitter, mixed with sugar and water, given to children in fevers and catarrh, diaphoretic and expectorant; also applied to soles of feet to prevent cracking; the ashes of

burnt plant, mixed with water and rice conjee [q.v.], employed in dropsy, anasarca and coughs; a paste is made of the root which is applied to disperse boils and glandular swellings, and a medicated oil, made by boiling the leaves and stems with sweet oil [zeitoon] until all the water has been driven off, is used as a cleansing application to wounds. Plant grown as hedge.——*Large nail dye* (झिण्टी - jhintí, San.; పెద్దగోరంట - peddagóranta, Tel.; କୋଇଲେକ - kóiléka, Oor.; உடாமுள்ளி - úthámulli, Tam.). Tel. from (pedda, tel. large + góranta, tel. nail-dye plant, barleria). Tam. from (údá, hind. brown + mulli, tam. thorny shrub). San. also (kuruvaka), meaning sounding; applied to purple or yellow barleria; (sairéyaka), meaning produced in saira or turned up by plough. Tel. also (errapúlapeddagóranta), meaning red flower + large + nail-dye plant; (tellanílámbari), meaning white + plant, barleria strigosa, willd.; (nallapeddagóranta), meaning black + large + nail-dye plant. Tam. also (nílasemmulli), meaning black + red thorny shrub, barleria prionitis, linn.; (vellainílámbaram), meaning white + barleria strigosa, willd. Title otherwise Crested barleria, Purple barleria. Botanically Barleria [nail dye] cristata, linn., acanthaceæ [vricsham, 101]. Alias Barleria ciliata, dichotoma. Herbaceous, strigose with adpressed hairs; leaves elliptic, attenuated at both ends, petioled; peduncles axillary, very short, few-flowered; bracts linear-subulate, ciliated; larger calycine segments unequal, elliptic-oblong, ciliated and serrated; flowers blue. Ornamental bushy shrub, 3 feet high, blossoms in cold season with numerous, rather large bright flowers. Seed an antidote for snake-bite; roots and leaves used to reduce swellings, an infusion given in coughs.

NAIR (നേർ - nér, *Mal.*). Correct, just.——*Nairpalisha* (നേർപ്പലിശ - nérppalisha, Mal.). From (above + palisha, mal. interest). Ten per cent. per annum.——*Nery* (நேரி - néri, Tam.). From (nér, tam. straight). Ancient mountain in the chola [q.v.] country. See vol. I (125). Neriyan or Nery verpan is chola king as lord of that mountain.

NAJEEB (نجيب - najíb, *Ar.*). From (najaba, ar. to be generous). Noble. In composition makes an alam; as Najeeb ood dowlah, supporter of the empire [ism]. Now used for militia or police.——*Najeeb oollah khan* (نجيب الله خان - najíbulláhkhán, Hind.). Alam + honorific title. Brother of Nawaub wallajah [q.v.] and governor of Nellore. See vol. II, 112.

NAJM (نجم - najm, *Ar.*). From (najama, ar. to rise). Also called (kowkab); (saiyárah), meaning wandering star [noojoom]. A planet [graham]. The following are the names, &c., of the planets.——*Cumr* (قمر - kamr, Ar.; ماه - máh, Pers.; سوم - som, Hind.). Called also (kásidifalak), meaning celestial messenger. Moon [chundran]. In the first heavens, propitious.——*Mirreek* (مريخ - mirríkh, Ar.; بهرام - bahrám, Pers.; منگل - mangal, Hind.). Also called (jalládifalak), meaning celestial executioner. Mars [coojan, mungalan]. In the fifth heaven. Inauspicious.——*Mooshtary* (مشترى - mushtarí, Ar.; برجيس - birjís, Pers.; برسپت - biraspat, Hind.). Also called (káziifalak), meaning celestial judge. Jupiter [brihaspaty]. In the sixth heaven. Auspicious.——*Ootaurid* (عطارد - utárid, Ar.; تير - tír, Pers.; بدھ - budh, Hind.). Also (dabírifalak), meaning celestial teacher. Mercury [boodhan]. In the second heaven. Propitious.——*Shums* (شمس - shams, Ar.; خورشيد - khurshíd, Pers.; ادت - ádit, Hind.). Also (mutbikhifalak) or celestial cook. Sun [sooryan]. In the fourth heaven. Indifferent.——*Zohra* (زهره - zuhara, Ar.; ناهيد فلك - náhídifalak, Pers.; سکر - sukr, Hind.). Also (mutribifalak) or celestial prostitute. Venus [shoocran]. In the third heaven. Propitious.——*Zoohal* (زحل - zuhal, Ar.; کيوان - kaiwán, Pers.; سنيچر - saníchar, Hind.). Ar. from (zuhala, ar. to retire); being remote in seventh heaven. Also (mukhannasifalak), meaning celestial eunuch. Saturn [shany]. In the seventh heaven. Unpropitious.

NAKAL (نقل - nakl, *Hind.*). From (nakala, ar. to transcribe). A copy.

NAKCHIKNEE (चिक्कणी - chikkaní, *San.*; नाकशिंकणी - nákashinkaní, *Mahr.*; نك چھكنى - nakchhikní, *Hind.*; نك چهينكنى - nakchhínkní, *Dec.*). Title from hindostany. San. means sneezing. Mahr. from hindostany. Hind. and dec. from (nák, hind. nose + chhikní, hind. sneezing) [nakchiknee silk cotton]. Hind. also (nágdauna) [indian absinth]. Title otherwise Small-seeded absinth, Sneeze-wort. Botanically Centipeda orbicularis, lour., compositæ [vricsham, 74]. Alias Artemisia minima, sternutatoria; Centipeda minuta; Cotula minuta, minuta et cuneifolia; Dichrocephala schmidii; Grangea cuneifolia, decumbens, minuta; Myriogyne minuta. Herb; decumbent ascending; slightly glabrous or somewhat velvety at the apex; leaves oblong, cuneate at the base, serrated at the apex, somewhat obtuse or sub-acute; flowering in february and march; flowers small, yellow; in moist places. Minute seeds are sternutatory, also the powdered herb. No other species here.

NAKEE (نقى - nakí, *Ar.*). Pure, excellent. Lacab of the tenth Imaum [q.v.]. Common alam; as Nakee ally, double alam [ism].

NAKKAURA (نقاره - nakkárah, *Hind.*; ನಗಾರಿ - nagáru, *Can.*). A large kettle drum [paray, sangeetam]. Nakkaurkhanah is a chamber where state drums are sounded; usually an open alcove over the gateway [darwauja, dwauram].

NAKSHA (نقشه - nakshah, *Hind.*). From (naksh, ar. impression). A map.

NAL (नल - nal, *San.*). To shine.——*Nalam* (नल - nala, San.; براجوارى - barájawárí, Hind.; ಕಾಡುಗುಂಡುಹುಲ್ಲು - kádugunduhullu, Can.; కుశతుంగ - kushatunga, Tel.). San. from (nal, san. to shine). Hind. from (bará, hind. large + jawárí, hind. sorghum vulgare, pers.). Can. from (kádu, can. forest + gundu, can. round + hullu, can. grass). Tel. from (kusha, san. sacred grass, eragrostis cynosuroides, retz. + tunga, tel. cyperus rotundus, linn.). Can. also (bettadausumánihullu), meaning hill + the sedge grass, cyperus compressus, linn.; (gaddegunduhullu), meaning field + round + grass. Tel. also (murukashabi). Tam. also (kórai) [common sedge, straight sedge]. Botanically Fimbristylis genus, cyperaceæ [vricsham, 155]. Grasses, mostly natives of warm countries, having the inflorescence in spikes, solitary, in pairs, or in crowded heads, many-flowered; style compressed and fringed. The s. indian species indigenous or naturalized are:—Æstivalis, culms leafy at the base; Albicans, compressed culm; Argentea, glaucous, culms leafy at the base; Bispicata, culms leafy at the base; Capillacea, culms erect; Chætorhiza, culm compressed and three-cornered, straight; Communis, cæspitose, glaucous; Complanata, culms compressed, leafy at the base; Dichotoma, glaucous, culms leafy at the base; Glabra, culms erect; Latifolia, culm furrowed and angular, slender; Miliacea, culms leafy at the base; Monticola, culms erect; Polytrichoides, culms one-leaved at the base; Quinquangularis, culms leafy at the base, sometimes leafless; Scaberrima, culms compressed; Schænoides, culms leafy at the base; Tenera, culm angular; Torta, rhizome creeping; Uliginosa, root fibrous, culms leafy at the base.——*Nalan* (नल - nala, San.). From (nal, san. to shine). Means king. Generally with the addition of chuckravurty [q.v.] or rajah [q.v.]. A king, whose adventures form an episode in the Mahabbaurat [q.v.] and are specially the subject of the Neishadam [q.v.]. Small poems and poetical allusions in other works are also numerous.——*Nalavenbah* (நளவெண்பா - nalavenbá, Tam.). From (nala, san. the king + venbá, tam. the verse). Considered the most refined Tamul poem, written by Poogazhendy [q.v.] about the eleventh century. The following extracts will furnish an idea of the style of the poem:—வெஞ்சிலையே கோடுவன மென்குழலே சோருவன அஞ்சிலம்பே வாய்விட் டரற்றுவன—கஞ்சம் கலங்குவன மாளிகைமேற் காரிகையார் கண்ணே விலங்குவன மெய்ந்நெறியை விட்டு—"The only curved things in this city are the cruel bows; the "only thing which gets loose is the soft hair of females; the "only things which open their mouths and lament are the ankle "ornaments; the only thing which trembles is water; the only "things which go astray from the right path are the eyes of the "maidens who sit on the terraces of houses."—கானுந் தடங் காவுங் காமன் படைவீடு வானுந்தேர் வீதி மறிகடலும்-மீனக் கொடியாடை வையமெல்லாம் கோதண்டசாலை, பொடியாடி கொன்றதெல்லாம் பொய்—"The forest and "the extensive groves constitute the arsenal of the god of "love, the heavens are the highways upon which his chariot "rolls, the wave-bounded ocean is his banner marked with the "insignia of a fish, the whole earth is a depository for his "arrows; therefore it is false to assert that he has been "destroyed by Shiva [q.v.]."—சேலுற்ற வாவித் திருநாடு பின்னொழியக் காலிற்போய்த் தேவியொடுங் கண்ணுற் றான்—ஞாலஞ்சேர், கள்ளிவே கத்தரவின் கண்மணி கடாம் பொடியாய்த், துள்ளிவேகின்ற சுரம்—"Leaving "behind him his beautiful country, in which the shell-fish glide "in the tanks, Nalan, walking with his wife, saw the desert in "which the gems on the heads of snakes were burnt to ashes by "intense heat of the Cully [q.v.] plants, and the reptiles "themselves writhed in agony."—காரிகைதன் வெந்துயரங் காணமனித்தந்தக், கூரிருளிற் போவான் குறித்தெ ழுந்து—நேரே, இருவர்க்குமோருயிர்போலெய்தியதோ ராடை, அரிதற கவனினைந்தா னங்கு—"Wishing to "desert Damayanty [q.v.] in her great sorrow and separate "from her in that dense darkness, he rose, and contemplated "dividing into halves the garment which was to them as their "common life."—எண்ணிய வெண்ண முடிப்ப விகல்வேந் தன், கண்ணி யதையறிந்து காய்கலியும்—பண்ணினுக் கருக், கேளான தேமொழியை நீக்கக் கிளரொளிசேர், வாளாய் மருங் கிருந்தான் வந்து—"Knowing the thoughts "of the valiant king, the angry Caly [q.v.] came and attached "himself to the waist of Nalan, in the form of a bright knife, to "enable him to fulfil his design of deserting the maiden whose "speech was as pleasant as the flow of music."—ஒற்றைத் துகிலுடு முயிரு மிரண்டாக முற்றுந்தன் னன்பை முதலோடும்—பற்றி அரிந்தா னரிந்திட்டவனிலைமை நெஞ்சில் தெரிந்தா னிருந்தான் றிகைத்து—"Nalan then

"divided the garment, as if he were separating the two lives and "rooting up his affections. And having done this he brooded "over Damayanty's state, and swooned."—அழல்வெஞ் சிலை வேட னம்புருவ வாற்றா தழலுங் களி யில்போ லோடிக்—குழல்வண் டெழுந்தோட வீழ்ந்தாளிருகுழை? மற் கண்ணீர்க்கொழுந்தோட வீமன்கொடி—"As the joyous "peacock [mayil], which, when it is pierced by the arrow of the "huntsman, who bends a bow as destructive as fire, unable "to endure the agony, rushes about from place to place, so "Damayanty ran from one place to another, falling down at "times, so that the bees flew away from her plaited tresses, and "the tear-drops moistened her ear."—செய்தபிழை யேதென்னுந் தேர்வேந்தே யென்றழைக்கும், எய்த்துதய ரக்கரை காணே னென்னும்—பையவே, என்னென்று தென்னென்று மிக்கானின் விட்டேகு, மன்னென்றுவாடு மயர்ந்து—"Then Damayanty would ask, What fault have I "done? she would call out O king that possessest great chariots! "And exclaim, I cannot see the shore terminating the sea of "sorrow to which I have now attained and fainting, would ask, "why do you not reply to my cries? O king, who deserted me "in that forest! Thus exclaiming she would continue sorrowing "and swoon away."——*Nargeel* (نارجیل - nárjíl, Hind.). From (náríkéla, san. cocoanut). Cocoanut.——*Naudy* (नाडी - nádí, San.). Means tubular stalk of any plant, reed, lotus, &c. Tube inserted in hole at bottom of clepsydra. Indian hour. Measure of solar time. 60 vinaudies or indian minutes = 1 naudy; 60 naudies = 1 dinam or day [caulam]. Approximate actual value, 1 naudy = 24 English minutes. Same as San. ghaticam [caulam, 3b], dandam [caulam, 6], Hind. ghurry [caulam], Tel. ghadiya [caulam, 4, 5], Tam. nauzhigay [caulam, 1]. See vol. I, 609. Naudy mundalam is celestial equator, for which see under Mundalam.——*Naurail* (نارِیل - nárel, Dec.). From (náríkéla, san. cocoanut tree). Same as Cocoanut.——*Naurikelam* (नारिकेल - náríkéla, San.). From (nádí, san. tube + ka, san. water + ír, san. to raise). Persian Nargeel. Greek *ἀργέλλιον*. Properly the cocoanut; thence the hubble-bubble [q.v.], or hookah [q.v.], in its simplest form.——*Nauzhigay* (നാഴിക - názhika, Mal.; நாழிகை - názhigai, Tam.). Indian hour [nauzhy].——*Nauzhigay vattil* (நாழிகைவட்டில் - názhigaivattil, Tam.). From (názhigai, tam. hour + vattil, tam. a brass tray). A small vessel for determining time, which having holes in the bottom and floating on water, sinks at the end of twenty-four minutes.——*Nauzhy* (നാഴി - názhi, Mal.; நாழி - názhi, Tam.). From (nála, san. tube). Measure. See vol. I, 609; II, 516.—"*a*" A measure of capacity. 2 oories = 1 nauzhy; 4 nauzhies = 1 yidangazhy, whether naudan or McLeod's [alavay, 3d]. Approximate actual value, 1 nauzhy = 28 cubic inches. W. coast. Used chiefly in measuring rice. In Tanjore ⅛th of a mercaul, about 30 cubic inches. Compare oyak of Madras.—"*b*" Superficial measure. 8 nauzhies = 1 cooroony [alavay, 2a]. Approximate actual value, 1 nauzhy = 420¼ square feet. Tinnevelly. Equal to 1 square rod of 7½ tutcha coles or 20½ feet to the side. Compare goonta, coozhy.—"*c*" Indian hour, as being the time for the vessel of clepsydra to sink. Measure of solar time. 60 vinaudies or indian minutes = 1 nauzhy; 60 nauzhies = 1 dinam or day [caulam, 1]. Approximate actual value, 1 nauzhy = 24 English minutes. Same as Sanscrit ghaticam [caulam, 3b], dandam [caulam, 6], naudy [caulam], Hind. ghurry [caulam], Tel. ghadiya [caulam, 4, 5].—"*d*" Otherwise Nauzhivazhy in Tamul. Distance that can be walked in one Indian hour. Linear measure. 7½ nauzhivazhies = 1 cautham [alavay, 1a]. Approximate actual value, 1 nauzhivazhy = 1¼ miles.——*Nelumbo* (නෙළුම් - nelum, Singh.). See sep. title.

NAM (नम् - nam, *San.*). To bow, bend.——*Namas* (नमस् - namas, San.). From (nam, san. to bow down). Salutation.——*Namascauram* (नमस्कार - namaskára, San.). From (namas, san. salutation + kri, san. to make). Uttering the exclamation namas and bowing with two hands raised to the forehead. Appropriate to a deity, and proper between equals. An inferior should make Pranaumam [q.v.], which a superior will acknowledge by Ausheervaudam or pronouncing benediction.——*Namashivauya* (नमश्शिवाय - namashshiváya, San.). From (namas, san. salutation + shiva, san. the god). Salutation to Shiva! the five-lettered muntram [q.v.] or mystic prayer of the Sheiva sect [moola muntram, punchaucsharam]. If the syllable om [q.v.] be prefixed to Namashivauya, then it is called shadacshary or six-syllabled. Namashivauyam is a Hindoo 2nd or pers. name; common among non-bramins [peyar].——*Natam* (नत - nata, San.). Means bent. Descent. The arc [chaupam] of distance of any planet [graham] from the zenith [oordhwam, ootcham]. Nata naudicay is Hour-angle. Nataumsham is Zenith distance [jyotisham].

NAMAK (نمك - namak, *Hind.*). Salt [ooppoo].——**(1)** Namak chasy, from (chashí, pers. tasting), is the ceremony of feeding a child for first time when six months old. Namak halaul, from (halál, ar. lawful), is true to his salt. Namak haraum, from (harám, ar. untrue), is ungrateful. Namak angoor, from (angúr, pers. grape), is cream of tartar [draucsha ooppoo]. Namak i frang, from (farang, pers. english), is glauber's salt or sulphate of soda. Namak i mooshil, from (mushil, ar. purgative), is epsom salt [bhaidy ooppoo]. Namak i sang, from (sang, pers. stone), is rock salt [sondah namak]. Namak i sheeshah, from (shíshah, pers. glass), is glass-gall. Namak i siyah, from (siyáh, pers. black), is bitloban [q.v.]. Namak khaur, from (khuár, pers. eater), is a dependent. Namak mahaul, from (mahál, ar. department), is the salt department. Namak naujoyiz, from (nájáiz, pers. not permissible), is contraband salt.——**(2)** *Chowd ka namak* (چوڑ کا نمك - chaurkánamak, Hind.). Impure carbonate of soda [sowdoo].——*Rauk ka namak* (راك كا نمك - rákkánamak, Hind.). From (rák, hind. ashes + namak, pers. salt). Impure carbonate of potash [jhar ka namak].

NAMAUZ (نماز - namáz, *Hind.*). From persian. Daily prayers. The Mussalmans have five principal devotional acts. They are:—"*a*" prayer or namauz five times a day, reduced by shiahs [q.v.] to three times, morning midday, and evening;—"*b*" almsgiving or zakaut [q.v.];—"*c*" fasting, especially keeping the great fast [roza] during the ninth month [maheena], Ramzaun [q.v.] once a year;—"*d*" the haj [q.v.] or pilgrimage to Mecca once in a lifetime;—"*e*" confession of faith or shahaudat [q.v.], repeating the towheed [q.v.] or declaration of faith in the unity of God, there is no god but God [allah], and Mahomet is the apostle of God. The five namauz are:—at sunrise; between one and four; between four and sunset; just after sunset; and when the night has closed in. Besides the above, there are also three voluntary prayers, and prayers at a funeral [janauza, nafeel].

NAMCULL (நாமக்கல் - námakkal, *Tam.* námakal *). From (náma, san. mark + kal, tam. rock) [naumam]. Rock of the vishnoo mark. Sanscrit name (námádripura), meaning sacred mark + hill + town; also (námagiri), meaning sacred mark + hill.——**(1)** Talook, Salem district. Tahsildar's pay Rs. 225. Area 715 square miles. Population 300,047. Language Tamul. Between 11° 01′ and 11° 25′ N. lat. and 77° 54′ and 78° 32′ E. long. Extreme length from north to south 22 miles, breadth from east to west 39 miles. Most southerly talook of the district. Bounded north by Trichengode, Salem and Ahtoor talooks; west by Erode talook in Coimbatore and Trichengode talook; east by Perambalore talook in Trichinopoly; and south by Caroor and Moosiry talooks in Coimbatore and Trichinopoly districts respectively. The north-eastern portions are mountainous and its south-western area is flat. Beyond Namcull to the south-east are the Talamullays. South and south-east is the Cauvery. The soil, owing to the alluvial deposits of the Cauvery and the detritus of the Collimullays, is exceedingly rich on the west, south, and eastern borders. Black loam prevails towards the east. Other soils are red soil mixed with sand, red soil mixed with gravel, soil composed almost entirely of sand and gravel, and light and sandy soils [munn]. The formation is gneissic with red soil on the surface. Alluvial deposits skirt the Cauvery and granite [caroomcull] is plentiful, especially towards the south-east corner. The usual trap [padicutt cull] dykes and magnetic iron [cauntamunn] beds appear. Magnesite is found at Powtram south of the Collimullays, and chlorite schists to the south-east of Tautayyengarpett. Blown sand hills [tairy] have been formed on a small scale on the north bank of the Cauvery a few miles west of Moganore. The great sigmoid curve of the strata at Mahadevy hill is illustrative of the bedding. The speciality of the talook is its cotton [q.v.] crop classed as Ookkam parootty [ookkam] or annual, and Naudam parootty [naudam] or the crop which lasts three years. Both are indigenous, the Ookkam parootty [ookkam] being the staple article. The staple crop under the Cauvery channels [q.v.] is rice [q.v.], which is produced far in excess of local demand, half of the crop being exported. As a rule two crops, and sometimes three, are produced within the year, under favorable circumstances five crops being gathered in two years. Principal dry crops are cumboo [bajrah], cholum [q.v.], horse-gram [q.v.], black-gram [q.v.], green-gram [q.v.], bengal-gram [q.v.], varagoo [q.v.], raggy [q.v.], gingelly-oil [gingelly] seed, tovray [common dholl], shaumay [q.v.], tinay [q.v.], tobacco [pogauk], cotton [q.v.], turmeric [country saffron], chillies [q.v.], &c. Wheat [geung], is confined to the Collimullays. Iron [anhan], chiefly in the form of black sand, is found in the Neinamullays and is smelted at Shendamungalam. Domestic and agricultural implements for local use are manufactured from the ore. Coarse cloth is woven in most villages. Trade in hides [chamrah] is carried on at the Neinamullay fair. Cotton is a considerable item of commerce. Jaggery [q.v.] is manufactured at Cannoorputty, Cathiranullore, Moganore, Nunjay yideiyaur, Vengaray and Yeddayaur. Saltpetre [shorah] is made at Coomaripolliem, Manapully, Moganore, Nunjay yideiyaur, Oravandore, Pettapolliem and Yeddayaur. The whole crop of wheat and three-quarters of the other produce of the Collimullays, including some coffee [q.v.], are exported to Trichinopoly. Hides find their way to the coast through Vaniyambaudy or Salem. Cotton [q.v.] and saltpetre [shorah] are exported to Madras. A brisk trade is carried in cotton cloths with Mysore, Salem, and Trichinopoly. Plantains [q.v.] are exported in large quantities to Bangalore, Madras, Salem, Tripatore, and Vellore. The principal imports are raw silks [puttoo], areca nut [q.v.]

pepper [q.v.] and salt [ooppoo]. Chief rivers are the Carvauttaur, Eiyaur, and Tirmany moottaur. The Cauvery is, to the centre of its bed, considered as belonging to the district. Tanks [q.v.] are few; the chief are Mahadevy, Powtram, Tautayyengarpett, Toosore and Idoomban coolam tanks. Anicuts [q.v.] are mostly of earth, and are thrown across jungle streams and hill torrents from the Collimullays and other hill ranges. During heavy rains the bed of the Cauvery is impassable for traffic, and ferries are established at Coonnatore, Moganore, Pandamungalam, Sholasiraumany, Veloor and Vengaray. There are also minor ferries at Jedarpolliem, Manapully and Vadacarayauttore. Camping grounds:—Moganore, Namcull, Valayaputty. Zemindarries:—Agrahaura valavendy, Circarvalavendy mittah, Condisettiputty, Conoor, Coodacherry, Coopericapolliem, Dindamungalam, Dommancoorchy, Keerambore, Laddivaudy, Maroorputty, Mettooputty, Moottakkaputty, Moottanchetty mittah, Mothalaputty, Namcull, Palayapolliem, Periyapullambauray, Perooncoorchy, Pilloor, Ponnairy, Poodoocottah, Pottanam, Powtram, Shailore, Shendamungalam, Sholasiraumany, Taulambaudy, Tidoomal, Tippara mahadevy, Tolore, Toosore, Tottamoodeiyamputty, Vailcoorchy, Yermayputty. Places of archæological interest:—Capilamullay, Carvauttaur, Caurcoody, Coonnamullay, Moganore, Namcull, Neinamullay, Nunjay Yideiyaur, Pandamungalam, Paramatty, Pilloor, Shendamungalam, Tautayyengarpett, Valappore, Vassalore, Yermayputty. The leading places, &c., in the talook are the following.——*Agrahaura valavendy* (அக்கிராகாரவாளவந்தி - akkiragáraválavandi, Tam.). From (agrahára, san. bramin quarter + válavandi, tam. village, so called). Zemindarry, Village; pop. 1,089; square miles $18\frac{1}{8}$; lat. of village 11° 05′; long. 78° 18′; from Namcull S.S.E. 12 miles; from Salem S.S.E. 41 miles. Peshcush Rs. 2,629.——*Arautchy* (ஆராச்சி - áráççi, Tam.). From (ár, tam. cassia tree, cassia fistula, linn. + ádchi, tam. possession). Village; pop. 1,051; acres 2,145; lat. 11° 06′; long. 78° 31′; from Namcull E.S.E. 22 miles; from Salem S.S.E. 44 miles.——*Capilamullay* (கபிலமலை - kappilamalai, Tam.). From (kapila, san. brown + malai, tam. mountain). Tam. also (kavalaikkuriççi), meaning picottah + village. Sanscrit name (kapilagiri), meaning the sage, so called + mountain. Village; pop. 1,188; lat. 11° 09′; long. 78° 00′; from Namcull S.W. 15 miles; from Salem S.S.W. 38 miles. Old and well-sculptured Shiva temple with inscriptions, and surrounded by several fine mantapams [q.v.] erected by the Madura Naicks [q.v.]. Local centre of trade. Festival in Tye [mausam] or january.——*Carvauttaur* (கருவாட்டாறு - karuváttáru, Tam.). From (karai, tam. embankment + váttam, tam. slope + áru, tam. river). Otherwise Caraypottanaur in Trichinopoly. River. There is said to have been an embankment here marking the boundary between the Paundyan [q.v.], Chola [q.v.], and Congoo [q.v.] kingdoms. Rises in the Collimullays and empties in the Cauvery. Running only in the rainy season.——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.——*Circarvalavendy mittah* (சர்க்கார்வாளவேந்திமிட்டா - sharkkárválavéndimittá, Tam. sarkárvalavendimittá *). From (sarkár, hind. government + válavandi, tam. village so called + mittah, hind. estate). Zemindarry, Village; pop. 646; square miles $13\frac{3}{8}$; lat. of village 11° 07′; long. 78° 08′; from Namcull S.W. 9 miles; from Salem S.S.W. 38 miles. Peshcush Rs. 6,260.——*Collimullay* (கொல்லிமலை - kollimalai, Tam.). See sep. title.——*Condisettiputty* (கொண்டிசெட்டிப்பட்டி - kondisettippatti, Tam.). From (kondisetti, tam. proper name + patti, tam. cattle-fold). Zemindarry, Village; pop. 619; square miles 6; lat. of village 11° 12′; long. 78° 12′; from Namcull S. $1\frac{3}{4}$ miles; from Salem S. 32 miles. Peshcush Rs. 1,843.——*Conoor* (கோனூர் - kónúr, Tam.). From (kón, tam. shepherd + úr, tam. village). Zemindarry, Village; pop. 1,223; square miles 8; lat. of village 11° 10′; long. 78° 07′; from Namcull W.S.W. 7 miles; from Salem S.S.W. 34 miles. Peshcush Rs. 3,247.——*Coodacherry* (கூடச்சேரி - kúdaççéri, Tam.). From (kúdal, tam. meeting + shéri, tam. village). Zemindarry, Village; pop. 831; square miles $8\frac{7}{16}$; lat. of village 11° 13′; long. 78° 04′; from Namcull W. 10 miles; from Salem S.S.W. 32 miles. Peshcush Rs. 3,546.——*Coopericapolliem* (குப்பெரிக்காப்பாளையம் - kupperikkáppálaiyam, Tam.). From (kopparikkáy, tam. dried kernel of the cocoanut + pálaiyam, tam. fortified village). Zemindarry, Village; pop. 190; square miles $3\frac{1}{4}$; lat. of village 11° 16′; long. 77° 56′; from Namcull W.N.W. 19 miles; from Salem S.W. 32 miles. Peshcush Rs. 2,026.——*Dindamungalam* (திண்டமங்கலம் - tindamangalam, Tam.). From (dindu, can. strength + mangala, san. prosperity). Zemindarry, Village; pop. 419; square miles $16\frac{1}{8}$; lat. of village 11° 13′; long. 78° 05′; from Namcull W. 9 miles; from Salem S.S.W. 31 miles. Peshcush Rs. 7,283.——*Dommancoorchy* (தொம்மங்குறிச்சி - tommanguriççi, Tam. dommankurchi *). From (domba, can. pole-dancer + kuriççi, tam. village). Zemindarry, Village; pop. 385; square miles $9\frac{3}{8}$; lat. of village 11° 14′; long. 78° 09′; from Namcull W. 4 miles; from Salem S.S.W. 30 miles. Peshcush Rs. 5,438.——*Eiyaur* (ஐய்யாறு - aiyyáru, Tam.). See sep. title.——*Idoomban coolam* (இடும்பங்குளம் - idumbangulam, Tam.). From (idumban, tam. from hidimba, san. a rákshasa, so called + kulam, tam. tank). Village; pop. 210; acres 1,648; lat. 11° 08′; long. 78° 06′; from Namcull S.W. 10 miles; from Salem S.S.W. 37 miles.

Tank.——*Keerambore* (கீரம்பூர் - kírambúr, Tam.). From (kír, can. little + ambúr, tam. place so called). Zemindarry, Village; pop. 1,315; square miles $8\frac{7}{16}$; lat. of village 11° 12′; long. 78° 08′; from Namcull W.S.W. 6 miles; from Salem S. 33 miles. Peshcush Rs. 3,632.——*Laddivaudy* (இலத்திவாடி - ilattivádi, Tam.). From (ilatti, tam. dung of horse + vádi, tam. enclosure). Zemindarry, Village; pop. 1,104; square miles $8\frac{7}{16}$; lat. of village 11° 10′; long. 78° 13′; from Namcull S. 4 miles; from Salem S. 34 miles. Good cumblies [q.v.] are made here. Peshcush Rs. 3,179.——*Maroorputty* (மரூர்ப்பட்டி - marúrppatti, Tam.). From (maru, tam. the plant, origanum majorana, linn. + úr, tam. village + patti, tam. cattle-fold). Zemindarry, Village; pop. 688; square miles $4\frac{5}{8}$; lat. of village 11° 16′; long. 78° 14′; from Namcull N.N.E. 3 miles; from Salem S. 27 miles. Peshcush Rs. 1,784.——*Mettooputty* (மேட்டுப்பட்டி - méttuppatti, Tam.). From (médu, tam. high ground + patti, tam. cattle-fold). Zemindarry, Village; pop. 612; square miles $5\frac{1}{2}$; lat. of village 11° 06′; long. 78° 17′; from Namcull S.S.E. 10 miles; from Salem S. 39 miles. Peshcush Rs. 1,667.——*Moganore* (முகவனூர் - mugavanúr, Tam.). From (mugavan, tam. proper name + úr, tam. village). Sanscrit name (bilvádripura), meaning bael tree, ægle marmelos, corr. + mountain + town. Village; pop. 3,247; acres 1,513; lat. 11° 03′; long. 78° 17′; from Namcull S. 12 miles; from Salem S. 42 miles. On the Cauvery. Old Shiva temple. Paddy [q.v.] and plantains [q.v.] exported to Neinamullay bazaar and Salem.——*Moottakkaputty* (முத்தக்காப்பட்டி - muttakkáppatti, Tam.). From (muttakká, tam. proper name + patti, tam. village). Zemindarry, Village; pop. 2,533; square miles $11\frac{3}{16}$; lat. of village 11° 15′; long. 78° 17′; from Namcull E.N.E. 5 miles; from Salem S. 29 miles. Peshcush Rs. 4,929.——*Moottanchetty mittah* (முட்டாஞ்செட்டிமிட்டா - muttánjettimittá, Tam. mutanchettimitta *). Means moottanchetty's mittah [q.v.]. Zemindarry, Village; pop. 1,179; square miles $13\frac{7}{16}$; lat. of village 11° 08′; long. 78° 21′; from Namcull S.E. 11 miles; from Salem S.S.E. 38 miles. Peshcush Rs. 7,507.——*Morputty* (மோருப்பட்டி - móruppatti, Tam.). From (mór, tam. butter milk + patti, tam. cattle-fold). Village; pop. 5,746; acres 2,181; lat. 11° 10′; long. 78° 30′; from Namcull S.E. 19 miles; from Salem S.S.E. 39 miles. Paddy [q.v.] exported to Salem and Trichinopoly.——*Mothalaputty* (மொதலைப்பட்டி - mothalaippatti, Tam. modalaipati *). From (muthalai, tam. crocodile + patti, tam. cattle-fold). Zemindarry, Village; pop. 2,307; square miles $9\frac{3}{8}$; lat. of village 11° 15′; long. 78° 12′; from Namcull N.N.W. 2 miles; from Salem S. 28 miles. Peshcush Rs. 5,431.——*Namcull* (நாமக்கல் - námakkal, Tam.). See below.—*Palayapolliem* (பழயப்பாளையம் - pazhayappálaiyam, Tam.). From (pazhaiya, tam. old + pálaiyam, tam. fortified village). Zemindarry, Village; pop. 1,665; square miles $5\frac{7}{16}$; lat. of village 11° 13′; long. 78° 17′; from Namcull E. 5 miles; from Salem S.S.E. 31 miles. Peshcush Rs. 3,150.——*Pandamungalam* (பாண்டமங்கலம் - pándamangalam, Tam.). From (pandai, tam. antiquity + mangala, san. prosperity). Village; pop. 1,756; acres 757; lat. 11° 06′; long. 78° 01′; from Namcull S.W. 16 miles; from Salem S.S.W. 41 miles. Shiva and Vishnoo temples with inscriptions.——*Paramatty* (பரமதி - paramathi, Tam.). See sep. title.——*Periyapullambauray* (பெரியப்பள்ளம்பாறை - periyappallambárai, Tam.). From (periya, tam. large + pallam, tam. low land + párai, tam. rock). Zemindarry, Village; pop. 85; square miles $12\frac{3}{16}$; lat. of village 11° 17′; long. 78° 20′; from Namcull E.N.E. 9 miles; from Salem S.S.E. 28 miles. Peshcush Rs. 3,465.——*Perooncoorchy* (பெருங்குறிச்சி - perunguriççi, Tam.). From (perum, tam. large + kuriççi, tam. village). Zemindarry, Village; pop. 164; square miles $5\frac{13}{16}$; lat. of village 11° 17′; long. 77° 57′; from Namcull W.N.W. 18 miles; from Salem S.S.W. 32 miles. Peshcush Rs. 3,340.——*Pilloor* (பில்லூர் - pillúr, * Tam.). From (pul, tam. grass + úr, tam. village). Zemindarry, Village; pop. 1,339; square miles $11\frac{3}{16}$; lat. of village 11° 12′; long. 78° 04′; from Namcull W. 10 miles; from Salem S.S.W. 33 miles. Peshcush Rs. 4,514.——*Ponnairy* (பொன்னேரி - ponnéri, Tam.). From (pon, tam. beauty + éri, tam. tank). Zemindarry, Village; pop. 1,216; square miles $3\frac{1}{16}$; lat. of village 11° 09′; long. 78° 19′; from Namcull S.E. 8 miles; from Salem S.S.E. 36 miles. Peshcush Rs. 2,135.——*Poodoocottah* (புதுக்கோட்டை - puthukkóttai, Tam.). From (puthu, tam. new + kóttai, tam. fort). Zemindarry, Village; pop. 964; square miles $7\frac{1}{4}$; lat. of village 11° 10′; long. 78° 18′; from Namcull S.E. 7 miles; from Salem S.S.E. 35 miles. Peshcush Rs. 4,943.——*Pottanam* (பொட்டணம் - pottanam, Tam. potanam *). From (pottal, tam. arid tract + nattam, tam. village). Zemindarry, Village; pop. 2,025; square miles $3\frac{3}{8}$; lat. of village 11° 17′; long. 78° 15′; from Namcull N.N.E. 5 miles; from Salem S. 26 miles. Peshcush Rs. 1,989.——*Powtram* (பவித்திரம் - pavittiram, Tam.). Means sacred; called after a person of that name. Zemindarry, Village; pop. 1,563; square miles $13\frac{5}{16}$; lat. of village 11° 08′; long. 78° 24′; from Namcull E.S.E. 14 miles; from Salem S.S.E. 38 miles. Peshcush Rs. 4,034.——*Shailore* (சேலூர் - shélúr, Tam.). From (shél, tam. carp fish + úr, tam. village). Zemindarry, Village; pop. 336; square miles $8\frac{1}{4}$; lat. of village 11° 07′; long. 77° 57′; from Namcull W. 19 miles; from Salem S. 41 miles. Peshcush Rs.

4,340.——*Shendamungalam* (சேந்தமங்கலம் - shéndamangalam, Tam.). From (shéndan, tam. the god skanda + mangala, san. prosperity). Zemindarry; pop. 13,354; square miles $6\frac{15}{16}$. Peshcush Rs. 4,306. Also town; pop. 13,354; lat. 11° 17'; long. 78° 17'; from Namcull N.E. 6 miles; from Salem S.S.E. 26 miles. On the right bank of the Carvauttaur, from which and the Yetticoolam its water-supply is derived. Two old Shiva and Vishnoo temples. Iron [auhan] ore is smelted.——*Sholasiraumany* (சோளசிராமணி - shólasirámani, Tam. sólasirámani, *). From (chóla, san. chóla king + shirómani, san. crest jewel). Zemindarry, Village; pop. 685; square miles $11\frac{3}{16}$; lat. of village 11° 14'; long. 77° 55'; from Namcull W. 21 miles; from Salem S.W. 36 miles. Peshcush Rs. 5,347.——*Talamullay* (தலமலை - talamalai, Tam.). From (talai, tam. head + malai, tam. mountain). Hill; lat. 11° 05'; long. 78° 22'; from Namcull S.E. 15 miles; from Salem S.S.E. 42 miles.——*Taulambaudy* (தாளம்பாடி - tálambádi, Tam.). From (tázhai, tam. fragrant screw-pine, pandanus odoratissimus, linn. + pádi, tam. village). Zemindarry, Village; pop. 854; square miles $5\frac{3}{4}$; lat. of village 11° 18'; long. 78° 12'; from Namcull N.N.W. 5 miles; from Salem S. 25 miles. Peshcush Rs. 1,486.——*Tautayyengarpett* (தாத்தையங்கார்ப்பேட்டை - táttaiyyangárppéttai, Tam.). Means tauttayyangar's village. Village; pop. 2,081; acres 953; lat. 11° 07'; long. 78° 29'; from Namcull E. 20 miles; from Salem S. 20 miles. About 2 miles from the right bank of the Eiyaur. Includes the hamlet of Pillatoray. Old Shiva temple. White cloths, similar to those manufactured at Namcull, are produced and exported to Salem, Trichinopoly and Bangalore. ——*Tidoomal* (திடுமல் - tidumal, Tam.). From (tidal, tam. high land + mal, tam. fertility). Zemindarry, Village; pop. 484; square miles 11; lat. of village 11° 12'; long. 77° 58'; from Namcull W. 17 miles; from Salem S.S.W. 36 miles. Peshcush Rs. 5,237. ——*Tippara mahadevy* (திப்பரமகாதேவி - tipparamagáthévi, Tam.). From (tripura, san. the three cities destroyed by shiva + mahá, san. great + déví, san. deity). Zemindarry, Village; pop. 952; square miles $3\frac{11}{16}$; lat. of village 11° 08'; long. 78° 17'; from Namcull S.E. 7 miles; from Salem S.S.E. 37 miles. Peshcush Rs. 2,356.——*Tirmany moottaur* (திருமணிமுத்தாறு - tirumanimuttáru, Tam.). See sep. title.——*Tolore* (தோளூர் - tólúr, Tam.). From (tózham, tam. cattle-fold + úr, tam. village). Zemindarry, Village; pop. 1,462; square miles $9\frac{7}{16}$; lat. of village 11° 08'; long. 78° 10'; from Namcull S.S.W. 6 miles; from Salem S.S.W. 36 miles. Peshcush Rs. 3,556.——*Toosore* (தூசூர் - túsúr, Tam.). From (túsi, tam. dust + úr, tam. village). Zemindarry, Village; pop. 1,239; square miles $10\frac{5}{16}$; lat. of village 11° 12'; long. 78° 16'; from Namcull E.S.E. 4 miles; from Salem S.S.E. 32 miles. Peshcush Rs. 6,191.——*Vailcoorchy* (வேளுக்குறிச்சி - vélukkuriççi, Tam. velukurchi *). From (vélu, tam. proper name + kuriççi, tam. village). Zemindarry, Village; pop. 2,191; square miles $21\frac{1}{8}$; lat. of village 11° 23'; long. 78° 18'; from Namcull N.N.E. 13 miles; from Salem S.S.E. 20 miles. Peshcush Rs. 7,894.——*Valappore* (வலப்பூர் - valappúr, Tam.). From (valapu, tel. fragrance + úr, tam. village). Village, Hill; pop. 2,797; lat. 11° 16'; long. 78° 27'; from Namcull E. 17 miles; from Salem S.S.E. 31 miles. On the Collimullays. In the neighbourhood is the Arapulleshwara sawmy temple at the head of a ravine opening from the central plateau basin towards the Toraiyore valley. It is called the fish temple, a large number of tame fish being preserved in a pool made by damming the river. They are fed daily to the sound of a bell. The temple is covered with inscriptions [shausanam], according to one of which it dates from A.D. 1350.——*Valayaputty* (வலயப்பட்டி - valayappatti, Tam.). From (valaya, san. boundary + patti, tam. cattle-fold). Sanscrit name (dévarájapura), meaning devarajan + town. Village; pop. 2,222; acres 2,665; lat. 11° 08'; long. 78° 16'; from Namcull S.E. 8 miles; from Salem S. 37 miles. Formed the southern extremity of the ancient Mysore kingdom.——*Veloor* (வேலூர் - vélúr, Tam.). From (vél, tam. acacia tree, acacia arabica, willd. + úr, tam. village). Village; pop. 1,579; acres 967; lat. 11° 06'; long. 78° 03'; from Namcull S.W. 13 miles; from Salem S.S.W. 40 miles. On the Cauvery. Paddy [q.v.] and plantains [q.v.] are exported.——*Vengaray* (வெங்கரை - vengarai, Tam.). From (ven, tam. white + karai, tam. bank). Village; pop. 4,499; acres 2,883; lat. 11° 05'; long. 78° 00'; from Namcull S.W. 16 miles; from Salem S.S.W. 42 miles.——*Yermayputty* (எருமைப்பட்டி - erumaippatti, Tam. erumaipati *). From (erumai, tam. buffalo + patti, tam. cattle-fold). Zemindarry; square miles $7\frac{5}{8}$. Peshcush Rs. 4,296. Also Village; pop. 3,591; lat. 11° 09'; long. 78° 20'; from Namcull S.E. 10 miles; from Salem S.S.E. 36 miles. Inscription of Madura naicks [q.v.], dated A.D. 1652.——**(2)** Town, Head-quarters of Deputy collector, District moonsif and Tahsildar, Zemindarry; Salem dist., Namcull tal.; pop. 6,341; acres 11,924; lat. 11° 13'; long. 78° 13'; from Madras S.W. 191 miles; from Ossoor S.S.E. 106 miles; from Salem S. 30 miles; from Tripatore S.S.W. 91 miles; from Yercaud S. 39 miles. At the foot of a rounded mass of gneiss on the summit of which is a hill fort. Divided into two portions, the Cottay and Pettah. Place held in honor by Hindoos, local tradition marking it as the present abode of Vishnoo [q.v.]. The rock itself is some 200 feet in height and nearly half a mile in circumference. Its sides contain many cup-like hollows, generally in pairs, one above the other. From the supposed virtues of these cavities, the natives scale the steep scarps of the hill to bathe and wash their cloths in them. On the south-east side of the rock is the Camalaulayam tank, sacred to Naumagiry ammaul. The teertams [q.v.] are known as Camalaulayam, Chuckra teertam, Lutchmana teertam, Narsimha teertam and the Rama teertam. The visit of Hanooman [q.v.] is commemorated by a colossal statue in the Cottay, representing him as worshipping towards the Naumagiry ammaul coil. On the eastern slope is a temple of Runganautsawmy. A serpentine marking in the rock enters the temple, and is reputed to be the great snake Caurcotacan. On the north side, at the base of the rock, is a temple of Narsimhasawmy. The fort, on the summit of the rock, is accessible most easily on the south-west by a flight of narrow steps. On the north is a Trittoo vausal or secret gate designed for flight or as a sally-port. On the lower slope of the hill, to the south and south-west, are the remains of a first line of fortifications, but the revetment has given way in many places and the earthwork is rapidly following it. The outer walls of the true fort above are in almost perfect preservation. These are made of well-cut blocks of the same stone as the rock itself and secured to the rock by mortar [caunay]. No mortar has been used in the higher courses. The whole is surmounted by a parapet of strong brick-work, some $2\frac{1}{2}$ or 3 feet thick, serrated by machicolations and pierced in every direction for musketry. Round the interior of the ramparts runs a masonry structure about one yard broad and sufficiently high to enable the marksmen to reach the loop-holes. These are so skilfully made that there is no ground all round the fort which could not be raked by musketry. In one or more places the brickwork has the appearance of having been removed to make embrasures for cannon. The ramparts are irregular in shape, following the outlines of the natural rock, with here and there projecting bastions and salient angles. They enclose an area of about an acre and a half, and contain a roofless brick building said to have been used as a treasury, but more probably as the granary of the garrison. There is also a ruined bomb-proof chamber and a small Vishnoo temple with an inscription. The fort is one of great natural strength. It was captured by the English in 1768, but retaken by Hyder a few months afterwards. It is said to have been built by Ramchendra naick, Poligar of Shendamungalam and Namcull. Old inhabitants however state that it was built by Lutchmy narsimha ayyar a harcarra [q.v.] under the Mysore rajah, at a period variously stated to be from 200 to 500 years ago. In the time of Hyder and Tippoo a killadar [q.v.] held the fort for the Mysore government, whose possessions then extended as far south as Valayaputty. In the Company's time, it was held by a guard of sepoys [q.v.]. Public bungalow [q.v.] here. White cloths of superior description are manufactured, part being exported to Bangalore, Mysore, Salem and Trichinopoly. Some brass and coppersmiths supply the local demand. The chief source of water-supply is the Camalaulayam.

NAMOOD (نمود - namúd, *Hind.*). From (namúdan, pers. to show). Particularized.——*Namoona* (نمونه - namúnah, Hind.). From (namúdan, pers. to show). A specimen.

NANGAY (நங்கை - nangai, *Tam.*). From (nagu, tam. to shine) [nagay]. Milk-wort, Rattle-snake root. Botanically the Polygala genus, polygaleæ [vricsham, 16]. Herbaceous plants or shrubs, with entire leaves, and very irregular flowers; capsule flat, two-celled, with a seed in each compartment; seeds downy; all increase the lacteal secretion of animals that feed on them; all the species have handsome, showy flowers, chiefly pink, scarlet, red or white. The species best known to the natives are shown below. Other s. indian species indigenous or naturalized are:— arillata, crotalarioides, elongata, erioptera, javana, rosmarinifolia.——*Common nangay* (மிளகுநங்கை - milagunangai, Tam.). Tam. from (milagu, tam. pepper, piper nigrum, linn. + nangai, tam. polygala, sp.). Title otherwise Pepper nangay. Botanically Polygala [nangay] chinensis, linn., polygaleæ [vricsham, 16]. Alias Polygala arvensis, brachystachya, procumbens, tranquebarica. Stems herbaceous, procumbent, branched from the base, pubescent, angled; leaves glabrous, pubescent along the margin, upper ones oblong-linear, narrow, lower ones oblong, or narrow-obovate; racemes three to five-flowered, about half as long as the leaves; wings with a membranaceous margin, ovate, glabrous, ciliated below the length of the capsule; keel crested; capsule roundish, oblique, glabrous, ciliated, not margined; flowers yellow; flowering in july and august.——*Large nangay* (பெரியாணங்கை - periyánangai, Tam.). Tam. from (periya, tam. big + nangai, tam. the plant, polygala sp.). Botanically polygala [nangay] telephioides, willd., polygaleæ [vricsham, 16]. Alias Polygala serphyllifolia. Stems herbaceous, diffuse, pubescent; leaves succulent, glabrous, oval-oblong, narrow at the base; racemes four to five-flowered, scarcely half as long as the leaves; wings leafy, oval, very sharp, a little longer than the capsule; keel crested; capsule nearly orbicular; flowers very small, greenish; flowering in the rainy season. Used medicinally in catarrhal affections; in pharm. non-officinal.——*Senegal nangay* (செனகநங்கை - shenaganangai, Tam.). Title otherwise Seneca. Botanically polygala [nangay] senega, linn., polygaleæ [vricsham, 16]. Ornamental, deciduous, perennial,

and herbaceous plant; stem erect, herbaceous, quite simple; spike terminal, filiform; leaves oblong, lanceolate; flowers beardless; flowering in july. Gives to pharm. the dried root, senegæ radix; acrid principle, polygalic acid; stimulant, expectorant, diuretic, and emmenagogue, in large doses emetic and cathartic; officinal.

NANGOONAIRY (நாங்குநேரி - nánguněri, *Tam.* nanguněri*). From (nángu, tam. four + kún, tam. bending + éri, tam. tank) [naul]. Tam. also (nágálañjéri), meaning four + poison-nut tree, strychnos nux-vomica, linn. + village; also (vánamámalai), meaning sky + great + mountain. Sanscrit name (tótádri), meaning praise + hill.——(1) Talook, Tinnevelly district. Tahsildar's pay Rs. 200. Aea 730 square miles. Population 174,418. Language Tamul. South of district. Bounded east by Tencaray talook and south by the sea, west by ghauts and Travancore, and north by Tencaray, Tinnevelly and Ambasamoodram talooks. Where the talook adjoins Ambasamoodram the ghauts, known in this portion as the Coolacaul hills, rise to 5,000 feet and are densely forested to the top. Near the mountains the country rises and falls in long easy slopes, following the drainage lines chiefly north-east and south-west. There are numerous tamarind [q.v.] and mango [q.v.] topes [q.v.] as well as good avenues [shaulay] along the main roads in this portion. East and south palmyra [q.v.] and babool [q.v.] abound, and occasionally in avenues are single specimens of banyan [q.v.]. Soil is mostly red clay, loams and sands, excepting for a strip parallel with the sea and extending some three to ten miles inland, where white sands and soil having an excess of sand as well as portions of the blown sand tracts called Tairy [q.v.] prevail. In the latter the palmyra [q.v.] prevails, being there almost the sole produce of the soil and subsistence of the inhabitants. Towards the centre of the talook are found numerous tanks [q.v.] both rain-fed and supplied by channels [q.v.] from mountain streams, innumerable wells under which small patches are cultivated, and dry cultivation, poor and interrupted by fallows sometimes for two years out of three. The well lands produce chillies [q.v.], brinjauls [q.v.] and other vegetables, raggy [q.v.] and cholum [q.v.]; dry lands, shaumay [q.v.] and horse-gram [q.v.]; tank land, rice [q.v.] and occasional gardens of plantains [q.v.] and betel-nuts [q.v.]. The salt pans [ooppalam] at Cootangooly and Vijayapathy supply the villages of this talook and of Ambasamoodram. There are no large sea-ports along the coast. Cauyalputnam and Coolashekharaputnam afford an outlet for jaggery [q.v.] manufactured in the talook, and supply the talook with paddy [q.v.], rice [q.v.], cocoanuts [q.v.] and betel [q.v.]. Calacaud, Panagoody, and Tircooroongoody are well supplied during both monsoons [q.v.] with water from the mountains, and much of the irrigation of the talook is direct from the channels which divert the waters of those streams almost as soon as they reach the plains. The tanks at Nangoonairy, Vijianarayanam and Vulliyore are the finest in the whole district. Places of archæological interest:—Calacaud, Chittoor, Cottaycaroongoolam, Dalapatysamoodram, Nangoonairy, Panagoody, Pauppaungoolam, Ponnacoody, Pudmanairy, Puttay, Rajakkal mungalam, Raudhaupooram, Shenbagaramanullore, Tircooroongoody, Vijayapathy, Vijianarayanam, Vulliyoor, Yervaudy. Principal trig. stations:—Codangoolam observatory, Cunnimaurpottay, Maunpottay, Parameshwarapooram, Punnay observatory, Raudhaupooram, Shanganairy, Vijayapathy. The leading places, &c., in the talook are the following.——*Calacaud* (களக்காடு - kalakkádu, Tam. kalakád*). From (kalam, tam. threshing ground + kádu, tam. closeness); from the many threshing floors. Town; pop. 3,346; acres 2,406; lat. 8° 31′; long. 77° 35′; from Nangoonairy W.N.W. 8 miles; from Tinnevelly S.W. 18 miles; from the sea N. 26 miles. Large Shiva temple with inscriptions. Festival in Veiyaushy [mausam], May-June. Ruins of fort. Weekly fair Thursday.——*Codangoolam* (கோடங்குளம் - kódangulam, Tam.). From (kódu, tam. hill + kulam, tam. tank). Trig. station; lat. 8° 10′ 24·19″; long. 77° 43′ 54·51″; height 159 feet; from Nangoonairy S. 22 miles; from Vijayapathy W.S.W. 4 miles; from the sea N. ¾ mile.——*Coolacaul hills* (குளக்கால்மலை - kulakkálmalai, Tam.). See sep. title.——*Cunnimaurpottay* (கன்னிமார்ப்பொத்தை - kannimárppottai, Tam.). From (kannimár, tam. virgin deities + pottai, tam. hillock). Trig. station; lat. 8° 30′ 22·00″; long. 77° 39′ 53·38″; height 678 feet; from Nangoonairy W.N.W. 3 miles; from the sea W. 34 miles.——*Hanoomanuddy* (அநுமாநதி - anumánathi, Tam.). From (hanumán, san. the monkey god + nadí, san. river). River. Drains the south portion of the southern ghauts.——*Mahendragherry* (மகேந்திரகிரி - magéndiragiri, Tam.). See sep. title.——*Maunpottay* (மான்பொத்தை - mánbottai, Tam.). From (mán, tam. deer + pottai, tam. hillock). Trig. station; lat. 6° 15′ 55·94″; long. 77° 37′ 06·22″; height 507 feet; from Nangoonairy S.S.W. 17 miles; from Vijayapathy W.N.W. 13 miles; from the sea N. 9 miles.——*Nangoonairy* (நாங்குநேரி - nánguněri, Tam.). See below.——*Numbiyaur* (நம்பியாறு - nambiyáru, Tam.). From (nambi, tam. vaishnava devotee + áru, tam. river). River. Drains southern portion of southern ghauts [q.v.].——*Panagoody* (பணக்குடி - panakkudi, Tam.). From (panai, tam. palmyra, borassus flabelliformis, linn. + kudi, tam. village). Village; pop. 4,244; acres 4,001; lat. 8° 19′; long. 77° 37′; from Nangoonairy S.S.W. 13 miles; from Tinnevelly S.S.W. 29 miles; from the sea N. 12 miles. On road to Cape comorin. Large Shiva temple. Festival in Pungoony [mausam], March-April.——*Parameshwarapooram* (பாமேசுவரபுரம் - paramésuvarappuram, Tam.). From (paraméshvara, san. shiva, the supreme lord + pura, san. town). Trig. station; east end of base; lat. 8° 14′ 31·02″; long. 77° 44′ 20·40″; from Nangoonairy S. 17 miles; from Vijayapathy N.W. 5 miles; from the sea N. 5 miles.——*Peroongoody* (பெருங்குடி - perungudi, Tam.). From (perum, tam. great + kudi, tam. village). Town; pop. 6,651; acres 9,072; lat. 8° 17′; long. 77° 39′; from Nangoonairy S.S.W. 15 miles; from Tinnevelly S. 31 miles; from the sea N. 9 miles.——*Punnay* (பன்னை - pannai, Tam.). Means field. Trig. station; lat. 8° 09′ 30·42″; long. 77° 40′ 03·59″; height 40 feet; from Nangoonairy S. 23 miles; from Vijayapathy W.S.W. 9 miles; from the sea N. ½ mile.——*Putchayaur* (பச்சையாறு - paççaiyáru, Tam.). From (paççai, tam. green + áru, tam. river). River. Affluent of the Tamrapurny.——*Puttay* (பத்தை - pattai, Tam.). From (pattai, tam. low shrubbery). Village; pop. 1,301; acres 853; lat. 8° 32′; long. 77° 37′; from Nangoonairy W.N.W. 8 miles; from Tinnevelly S.W. 17 miles; from the sea W. 20 miles.——*Raudhaupooram* (இராதாபுரம் - iráthápuram, Tam.). See sep. title.——*Shanganairy* (சங்கனேரி - shanganěri, Tam.). From (shangu, tam. plant, azima tetracantha, lamk. + éri, tam. tank). Trig. station; lat. 8° 13′ 03·06″; long. 77° 44′ 11·18″; from Nangoonairy S.S.E. 19 miles; from Vijayapathy W.N.W. 4 miles; from the sea N. 4 miles.——*Soovishaishapooram* (சுவிசேடபுரம் - shuvisédappuram, Tam.). From (suvishésha, san. gospel + pura, san. town). Village; pop. 293; acres 558; lat. 8° 23′; long. 77° 54′; from Nangoonairy E.S.E. 15 miles; from Tinnevelly S.S.E. 27 miles; from the sea N. 8 miles. Mission station.——*Terkk vulliyore* (தெற்குவள்ளியூர் - terguvalliyúr, Tam.). From (tergu, tam. south + valli, tam. the village deity + úr, tam. village). Village; pop. 2,970; acres 6,403; lat. 8° 21′; long. 77° 39′; from Nangoonairy S.S.W. 10 miles; from Tinnevelly S.S.W. 26 miles; from the sea N. 15 miles.——*Tircooroongoody* (திருக்குறுங்குடி - tirukkurungudi, Tam.). From (tiru, tam. holy + kurumai, tam. littleness + kudi, tam. village). Sanscrit name (kuranganagara), meaning antelope + town. Village; pop. 1,816; acres 1,987; lat. 8° 26′; long. 77° 36′; from Nangoonairy W.S.W. 7 miles; from Tinnevelly S.S.W. 22 miles; from the sea N. 22 miles. Large and important Vishnoo temple. Chuttram [q.v.] at which 60,000 travellers are annually fed. Car festival in Pungoony [mausam], March-April. Place of pilgrimage. Jeermutt [jiyyar] or Hindoo monastery.——*Vijayapathy* (விசயாப்பதி - visayáppathi, Tam.). From (vijaya, san. victory + pathi, tam. village); called after vijaya a paundy king. Town; pop. 4,833; acres 17,438; lat. 8° 12′; long. 77° 47′; from Comorin E.N.E. 16 miles; from Madras S.S.W. 374 miles; from Nangoonairy S.S.E. 21 miles; from Ootangoody S.W. 3 miles; from Tinnevelly S. 37 miles. On Gulf of Manaar, at mouth of a small creek. Ancient Shiva temple. Trig. station in lat. 8° 12′ 10·99″; long. 77° 49′ 03·83″; height 84 feet; from Nangoonairy S.S.E. 22 miles; from Vijayapathy W. 1½ miles; from the sea N. ¾ mile.——*Vijianarayanam* (விசயநாராயணம் - visayanáráyanam, Tam.). From (vijaya, san. victory + náráyana, san. vishnu, the mover on the waters). Town; pop. 4,068; acres 13,542; lat. 8° 25′; long. 77° 50′; from Nangoonairy E.S.E. 10 miles; from Tinnevelly S.S.E 22 miles; from the sea N. 13 miles. Three very ancient temples with inscriptions in old Tamul. South are traces of a mud fort.——*Vulliyore* (வள்ளியூர் - valliyúr, Tam.). From (valli, tam. the village deity, consort of subrahmanya + úr, tam. village). Tam. also (vadakkuvalliyúr), meaning north + place, so called. Village; pop. 4,907; acres 11,236; lat. 8° 23′; long. 77° 39′; from Nangoonairy S.S.W. 8 miles; from Tinnevelly S.S.W. 24 miles; from the sea N. 16 miles. Large Shiva temple, built by Coolashekhara paundyan. Old fort built by a Paundyan [q.v.] king. Rock-cut temple. Large tank, the stones in the revetment of which were procured from a Jeina [q.v.] temple in the village then completely destroyed.——*Yidayangoody* (இடையங்குடி - idaiyangudi, Tam.). See sep. title.——*Yidindacaray* (இடிந்தகரை - idindagarai, Tam.). From (idinda, tam. broken + karai, tam. bank). Village; pop. 1,345; acres 867; lat. 8° 11′; long. 77° 47′; from Nangoonairy S.S.E. 22 miles; from Tinnevelly S. 38 miles. On seashore.——(2) Town, Talook head-quarters; Tinnevelly dist., Nangoonairy tal.; pop. 3,548; acres 11,135; lat. 8° 29′; long. 77° 42′; height 397 feet; from Madras S.S.W. 360 miles; from Palamcottah S.S.W. 17 miles; from Shermadevy S.S.E. 15 miles; from Shreevillipoottore S. 69 miles; from Tinnevelly S. 16 miles; from Tuticorin W.S.W. 40 miles; from the sea N. 23 miles. Large and richly endowed ancient temple with inscriptions. Weekly fair on Monday. Jeermutt [jiyyar] in which are valuable jewels. Car [rath] festival in Chittray [mausam], April-May.

NAN MUH (نن موه - nanmuh, *Hind.*). Botanically Persea nanmuh, oliv., lauraceæ [vricsham, 111]. Tree. Wood soft to moderately hard, with pleasant aromatic scent when fresh cut; even-grained, of an olive-brown color, shining; the wood used

in china by persons of wealth for coffins. For gratissima see Alligator pear.

NARACAL (ഞാറക്കൽ - ñárakkal, *Mal.*). From (nára, mal. a crane, tantalus ibis + kal, mal. stone). Town, Port; Cochin state, Cochin tal.; pop. 4,254; lat. 10° 2′ N.; long. 76° 16′ E.; from Bombay S.S.E. 659 miles; from Chittoor S.S.W. 59 miles; from Cochin N.W. 5 miles; from Ernacolum N.W. 4 miles; from Maulipooram N. 3 miles; from Paliport S. 8 miles; from Madras S.W. 340 miles; from Trichore S. 33 miles; from Tripoontora N.W. 11 miles. Chief port of the state. Church, small palace and pagoda [q.v.]. The seat of a considerable Christian population. During the south-west monsoons [q.v.] a curious mud bank [q.v.], stretching about 2½ miles seaward and about 4 miles in length, is formed within a couple of miles of the shore. On it and between it and the shore there is smooth water during the heaviest weather, in which vessels can anchor safely and discharge cargo throughout the monsoon whilst Cochin is unapproachable. The most probable theory is that the superabundant fresh water caused by the heavy rains forces its way under a sort of crust which forms the shore, and rising at some distance to sea mixed with exceedingly fine mud particles forms a greasy substance on which waves cannot break. Coasting steamers call here regularly. Light on the beach at mouth of creek, 5 miles to the northward of Cochin; lat. 10° 03′ 0″; long. 76° 12′ 0″; white; fixed; 10 miles' range; visible from all directions seaward; flagstaff; is exhibited only during the south-west monsoon [caur], viz., from 15th May to 30th September, when Cochin port is avoided by shipping.

NARALAY (गोधापदी - gódhápadí, *San.*; घोरपडवेल - ghórapadavéla, *Mahr.*; ఏడాకులమండులమారి - édákulamandulamári, *Tel.*; വെളുത്തചൊറിവള്ളി - veluttachorivalli, *Mal.*; நறளை - naralai, *Tam.*). Title from tamul [naroo]. San. from (gódhá, san. iguana + pada, san. foot); from a fancied resemblance of leaves to the foot of that reptile. Mahr. from (ghórapada, mahr. iguana + véla, mahr. creeper). Tel. from (édu, tel. seven + áku, tel. leaf + mandulamári, tel. vitis carnosa, wall.). Mal. from (velutta, mal. white + chorivalli, mal. vitis carnosa, wall.). Tam. from (narumai, tam. fragrance). San. also (suvahá), meaning enduring. Tel. also (kániápatíga), meaning yoke + bearing + creeper, cf. acid naralay; (pulimáda); (kánnem). Title otherwise Ghorapadey creeper, Iguana's foot. Botanically Vitis [draucshay] pedata, vahl., ampelidæ [vricsham, 42]. Alias Cissus heptaphylla, pedatus. Young parts softly pubescent; stipules cordate, acute; leaves petioled, pedate; leaflets six to eleven, three to five placed pedately on each of the lateral, secondary petioles, and one on the terminal, stalked, oblong-lanceolate, acuminated, serrated; peduncles with bract about the middle, axillary or leaf-opposed, half as long as the petioles, with two divaricating branches, each bearing a compound cyme; petals distinct; fruit flattened at the top, usually four-lobed, and four-seeded; flowers small, green; flowering in the rainy season. ——*Acid naralay* (अंबटवेल - ambatavéla, Mahr.; گیدردراکھ - gídardrákh, Hind.; املبیل - amalbel, Dec.; మండులమారితీగ - mandulamáritíga, Tel.; ചൊറിവള്ളി - chorivalli, Mal.; புளிநறளை - pulinaralai, Tam.). Title from taste of roots. Mahr. from (ambata, mahr. acid + véla, mahr. creeper). Hind. from (gídar, hind. jackal + drákh, hind. grape, vitis vinifera, linn.). Dec. from (amlí, hind. tamarind, tamarindus indica, linn. + bel, hind. creeper); from acidity. Tel. from (mandu, tel. medicine + mári, tel. personal suffix + tíga, tel. creeper). Mal. from (chori, mal. itch + valli, mal. creeper). Tam. from (puli, tam. acid + naralai, tam. vitis lanata, roxb.). Hind. also (kasar). Tel. also (mékamettanichettu), meaning goat + not trodden + plant; (kádépatíga), meaning yoke + bearing + creeper, from being applied to sores on the necks of bullocks caused by the yoke; (kanapatíga); (kániáputíga), meaning yoke + bearing + creeper; (kurudinne); (édakulamandulamáritíga), meaning seven + leaf + the plant; (pulimáda). Title otherwise Fleshy vine, Fox grape, Itching creeper, Medicinal creeper, Sour creeper. Botanically Vitis [draucshay] carnosa, wall., ampelideæ [vricsham, 42]. Alias Cissus carnosa, cinerea, crenata, obtusifolia. Young parts densely pubescent; older, glabrous; stem striated; stipules oblong; leaves trifoliolate, long-petioled; leaflets ovate, crenate-serrated; cymes peduncled, compound; petals distinct; berries black, two to four-seeded; flowers small, green; flowering in the rainy season; common in hedges; acrid roots used in medicine. ——*Large acid naralay* (తెల్లగుముడు - tellagumudu, Tel.; വലിയചൊറിവള്ളി - valiyachorivalli, Mal.). Tel. from (tella, tel. white + gumudu, tel. gmelina asiatica, linn.). Mal. from (valiya, mal. large + chorivalli, mal. + vitis carnosa, wall.). Botanically Vitis [draucshay] lanceolaria, roxb., ampelideæ [vricsham, 42]. Alias Cissus muricata; Vitis muricata. Unisexual; glabrous, except the inflorescence which is densely pubescent; stem woody; branches with muricated bark; leaves petioled, trifoliolate; leaflets stalked, somewhat coriaceous, serrated, oblong-acuminate, lateral ones unequal-sided; umbels axillary, with bracts at the base, not so long as the petiole twice compound; petals distinct; style very short and thick; stigma large, somewhat lobed; fruit globose, size of a large cherry [q.v.], white when ripe, two to four-seeded; flowers greenish; flowering in the hot season.——*Large naralay* (பெருநறளை - perunaralai, Tam.). Tam. from (perum, tam. large + naralai, tam. the plant). Tam. also (naralai), meaning fragrant creeper. Title otherwise Heart-leaved vine. Botanically Vitis [draucshay] lanata, roxb., ampelideæ [vricsham, 42]. Alias Cissus vitiginea; Vitis cordifolia, heyneana, pallida. Stems, petioles and peduncles woolly; leaves cordate-ovate, serrated, underside tomentose with rusty-colored wool; racemes elongated; flower-bearing peduncles often tendrilled; flowers bisexual; petals united at the apex; stamens much longer than the ovary; fruit globose, one-seeded, size of large pea [calauyam]; flowers small, green; flowering in april and may.——*Small acid naralay* (చిన్నమండులమారి - chinnamandulamári, Tel.). Tel. from (chinna, tel. small + mandulamári, tel. vitis carnosa, wall.). Tel. also (bankabaddu), meaning gum + male organ; (tígagummudu), meaning creeper + gmelina asiatica, linn. Botanically Vitis [draucshay] linnæ, wall., ampelideæ [vricsham, 42]. Alias Cissus angulata. Stems and leaves sub-fleshy; branches cylindric or very obtusely angled; cymes slender, about as long as the leaves; flowers small; fruit oblong, bluish, pruinose; pedicels recurved.

NARD (نرد - nard, *Pers.*). From persian. Greek νάρδος. Name among ancients for any Indian essence. Cf. Jatamansy.

NAROO (நறு - naru, *Tam.*). Fragrant.——*Naralay* (நறளை - naralai, Tam.). See sep. title.——*Naroovily* (நறுவிலி - naruvili, Tam.). Means fragrant tree. Same as Sebesten.——*Naugalaupooram* (நாகலாப்புரம் - nágaláppuram, Tam.). From (nával, tam. jamboo tree, eugenia jambolana, lamk., var. caryophyllifolia + pura, san. town). Village, Hills; Chingleput dist., Trivellore tal.; pop. 3,992; acres 7,917; lat. 13° 23′; long. 79° 52′; from Sydapett N.W. 37 miles; from Trivellore N.N.W. 18¼ miles. Old Vishnoo temple in village. Krishna devan repaired the temple. Three days in the year the rays of the sun, passing through the gopooram [q.v.] entrance, fall on the idol in the vimaunam [q.v.], and this is considered an act of adoration by the sun. The hills lie between 13° 24′ and 13° 28′ N. lat. and between 79° 49′ and 79° 52′ E. long. and are connected with the Suttivaid hills on north and the Nagary group on west. Average height 1,800 feet. Highest peak Cambaukum droog. The character of these hills is bluff ridge and beetling crag, here and there starting up into sharp tapering peaks. The tops are generally bare, and the sloping sides clothed with coarse grass and jungle. There are three principal ghauts [q.v.].——*Nawval* (நாவல் - nával, Tam.). From (náru, tam. to smell); from fruit. Same as Jaumoon.

NARSAPORE (నరసాపురము - narasápuramu, *Tel.* narsápur*). From (narasanna, tel. proper name + pura, san. town) [nee].——(1) Talook, Godavery district. Tahsildar's pay Rs. 225. Area 437 square miles. Language Teloogoo. S. coast of district. Bounded:—North by Tanookoo and Bheemavaram talooks; east by the Veinateyam branch of the Godavery and Amalaupooram talook; west by Bheemavaram talook; and south by the sea. The river Vasishta divides the talook into two blocks Narsapore proper and Nagaram island. The latter is very fertile and abounds in cocoanut [q.v.] and areca [q.v.] gardens. Sulpherous earth [gandhac] has been found in some places. Soil sandy towards the sea, and regar [q.v.], loamy and clayey in the interior. Special industry is the manufacture of toys at Narsapore. Palcole is noted for its orchards. The trade is chiefly in paddy [q.v.], pulses [dholl], jaggery [q.v.], oil seeds [yennay], cloths and cotton [q.v.] twist, which are largely exported. Cotton twist is also imported from England for sale to the weavers, who form a large proportion of the population. The Vasishta branch of the Godavery fertilises the islands in its course. Well supplied with the means of irrigation by three main canals, also used for navigation, namely, the Narsapore canal, the Gunnavaram canal, and the Mooccaumala canal. There are also numerous minor irrigation channels branching off from the above. The Narsapore canal is connected with the Godavery by a lock. This affords excellent facilities for the carriage of goods from the interior of the district for exportation. Zemindarries:—Chinchinauda, Chinnamaumidipully, Neredoomilly, Varidhanam, Yellamanchily. Places of archæological interest:—Antarvedhy, Atsanta, Cadalay, Cadamy, Codamanchily, Lutcheshwaram, Madapollem, Maumidycoodoor, Nadoopoody, Nagaram, Narsapore, Palcole, Rameshwaram, Roostoombada, Tautipauca. Principal trig. stations:—Antarvedhy, Beinapollem, Chintamoola, Goganamett, Gondy, Keshanapully, Mogultoor, Shuncaragooptam. The leading places, &c., in the talook are the following.——*Antarvedhy* (అంతర్వేది - antarvédi, Tel.). See sep. title.——*Atsanta* (అచంట - átsanta, Tel.). From (tsannu, tel. female breast); from tradition that shiva appeared to a worshipper here from the breast of a woman. Town; pop. 7,047; acres 5,180; lat. 16° 36′; long. 81° 50′; from Cocanada S.W. 37 miles; from Narsapore N.N.E. 14 miles; from the sea N. 16 miles. Formerly belonged to Pittapore estate. Temples and inscriptions.——*Beinapollem* (బయ్యన్నపాలెము - bayyannapálemu, Tel.). From (bayyanna, tel. proper name + pálemu, tel. fortified village). Trig. station; lat. 16° 23′ 22·04″; long. 81° 42′ 50·59″; from Linganaboyanacherla S.E. 1 mile.——*Boorgapully* (బూరుగపల్లి - búrugapalli, Tel.). From (búraga, tel. silk-cotton tree, bombax malabaricum, dec. + palli, tel. village). Village; pop. 1,074; acres 535; lat. 16° 32′; long. 81° 53′; from

Cocanada S.W. 38 miles; from Narsapore N.E. 12 miles; from the sea N. 10 miles.——*Chinchinauda* (చించినాడ - chinchináda, Tel.). From (chincha, tel. tamarindus indica, linn. + nádu, tel. country). Zemindarry, Village; lat. of village 16° 28′; long. 81° 49′; from Cocanada S.W. 44 miles; from Narsapore N.E. 6 miles; from the sea N. 8 miles. Peshcush Rs. 1,627.——*Chinnamaumidipully* (చిన్నమామిడిపల్లి - chinnamámidipalli, Tel.). From (chinna, tel. small + mámidi, tel mango, mangifera indica, linn. + palli, tel. village). Zemindarry, Village; square miles 2½; lat. of village 16° 27′; long. 81° 44′; from Cocanada S.W. 50 miles; trom Narsapore N. 1¼ miles; from the sea N. 10 miles. Peshcush Rs. 235.——*Chintamoola* (చింతమూల - chintamúla, Tel.). From (chinta, tel. tamarind, tamarindus indica, linn. + múla, tel. corner). Trig. station; lat. 16° 22′ 42·38″; long. 81° 51′ 59·38″; from Antarvedhy N.E. 7 miles.——*Godavery* (గోదావరి - gódávari, Tel.). See sep. title.——*Goganamett* (గోగనమట్టం - góganamattam, Tel.). From (gógu, tel. plant, hibiscus cannabinus, linn. + metta, tel. mound). Trig. station; lat. 16° 24′ 50·26″; long. 81° 58′ 28·48″; from Cautrenipaud E. 2 miles.——*Gondy* (గొంది - gondi, Tel.). Means an alley. Trig. station; lat. 16° 21′ 47·21″; long. 81° 46′ 14·28″; from Rameshwaram S. 2½ miles.——*Gunnavaram* (గన్నవరము - gannavaramu, Tel.). See. sep title.——*Keshanapully* (కేశనపల్లి - késhanapalli, Tel.). From (késhana, tel. proper name + palli, tel. village). Trig. station; lat. 16° 24′ 19·59″; long. 81° 56′ 58·95″; from Goodapully S.E. 3 miles.——*Madapollem* (మాధవాయపాలెము - mádhaváyapálemu, Tel.). See sep. title.——*Mogultoor* (మొగలితుర్రు - mogaliturru, Tel.). See sep. title.——*Narsapore* (నరసాపురము - narasápuramu, Tel.). See below.——*Neredoomilly* (నేరేడుమిల్లి - nérédumilli, Tel.). From (nérédu, tel. eugenia jambolana, lamk. + palli, tel. village). Zemindarry, Village; square mile 1; lat. of village 16° 31′; long. 81° 49′; from Cocanada S.W. 42 miles; from Narsapore N.E. 9 miles; from the sea N. 12 miles. Peshcush Rs. 445.——*Palcole* (పాలకొల్లు - pálakollu, Tel.). See sep. title.——*Paserlapoody* (పాశర్లపూడి - pásharlapúdi, Tel.). From (pasaramu, tel. cattle + púdi, tel. village). Village; pop. 2,929; acres 1,881; lat. 16° 31′; long. 18° 58′; from Cocanada S.W. 36 miles; from Narsapore E.N.E. 17 miles; from the sea N. 6 miles.——*Penoomadam* (పెనుమడం - penumadam, Tel.). From (penu, tel. great + médha, san. sacrifice). Village; pop. 3,414; acres 4,613; lat. 16° 33′; long. 81° 48′; from Cocanada S.W. 42 miles; from Narsapore N.N.E. 9 miles; from the sea 14 miles. Janamejayan grandson of Arjoonan [q.v.] is said to have performed here Ashwamedham [q.v.] or horse sacrifice [yanyam].——*Peroopollem* (పెరుపాలెము - perupálemu, Tel.). From (peru, tel. great + pálemu, tel. fortified village). Village, Port; acres 6,589; lat. 16° 22′; long. 81° 36′; from Cocanada S.W. 59 miles; from Madras N.N.E. 240 miles; from Narsapore S.W. 9 miles.——*Rameshwaram* (రామేశ్వరము - ráméshvaramu, Tel.). From (ráma, san. the god + íshvara, san. lord). Village; pop. 1,878; acres 3,861; lat. 16° 24′; long. 81° 46′; from Cocanada S.W. 50 miles; from Narsapore S.E. 3 miles; from the sea N. 5 miles. Ancient temple of Ramaligeshwaran with inscriptions.——*Shivacode* (శివకోడు - shivakódu, Tel.). See sep. title.——*Shuncaragooptam* (శంకరగుప్తము - shankaraguptamu, Tel.). From (shankara, san. shiva, the pleasure giver + gupta, san. protected). Trig. station; lat. 16° 23′ 25·76″; long. 81° 53′ 32·47″; from Keshanapully W.S.W. 3 miles.——*Vasishta godavery* (వశిష్ఠగోదావరి - vashisht'hagódávari, Tel.). See sep. title.——*Veinateyam* (వైనతేయము - vainatéyamu, Tel.). See sep. title.——*Yellamanchily* (ఎలమంచిలి - yelamanchili, Tel.). From (ella, tel. boundary + manchi, tel. good). Zemindarry, Village; square miles 7; lat. of village 16° 29′; long. 81° 49′; from Cocanada S.W. 44 miles; from Narsapore N.E. 7 miles; from the sea N. 9 miles. Peshcush Rs. 8,804.——**(2)** Town, Port, Head-quarters of Tahsildar; Godavery dist., Narasapore tal.; pop. 7,464; acres 659; lat. 16° 26′; long. 81° 44′; from Antarvedhy N.N.W. 7 miles; from Cocanada S.W. 50 miles; from Coonavaram S.S.E. 82 miles; from Ellore E.S.E. 43 miles; from Madras N.N.E. 248 miles; from Peroopollem N. E. 9 miles; from Rajahmundry S. 39 miles. Near the mouth of Vasishta branch of the Godavery on the Golcondah coast [q.v.]. Former head-quarters of Sub-collector, but since his removal to Rajahmundry, the station of a Deputy collector. The Dutch had an iron foundry in 1665. The English occupied the northern suburb Madapollem in 1677 and maintained their factory for 150 years. French had a factory in 1758. Fine market place. On the west near the canal, which communicates with Rajahmundry, is a well-laid suburb named after a former Sub-collector, Taylorpett. Many native crafts are built and repaired. Noted for the manufacture of toys and for cloth dyeing. A handsome and conspicuous obelisk [laut], 75 feet high, stands near Narsapore point to the east of the bar. There is a basin in the river opposite the town, inaccessible on account of the sandy bar at the mouth of the river.

NARSAROWPETT (నరసారావుపేట - narasárávupéta, *Tel.* narsaraopet *). From (narasárávu, tel. proper name + péta, tel. suburb) [nee]. Tel. also (atlúru), meaning cake + village.——**(1)** Talook, Kistna district. Tahsildar's pay Rs. 200. Area 712 square miles. Population 156,377. Language Teloogoo. S. inland part of district. Lies to the west of Guntoor, and forms part of the division of the Deputy collector of Vinoocondah. Bounded on the north by Suttenapully talook, on the east by Guntoor and Baupatla talooks, on the south by Ongole talook, of Nellore district, on the west by the Vinoocondah talook. The water-shed runs from the Condaveed hills along the north of the talook near its boundary with Suttenapully, and from this ridge the country slopes down towards the sea. Generally dry crops and an occasional patch of irrigation under a rain-fed tank [q.v.]. There are several bold hills, such as Cotappa condah, and the country is intersected by water courses, dry for the greatest part of the year, and torrents during the rains. The first object that meets the eye on entering this talook is the conspicuous hill fortress of Condaveed. Soil rocky, partly red, partly black cotton [regar] mixed with limestone [choonamcull]. Industries are indigo [q.v.] manufacture, country paper-making at Condaveed, but on the decline. Oil-press in Narsarowpett. Commerce chiefly in agricultural produce. Rain-fed tanks Cooncalgoonta, Copparam, Goontoopully, Santa mauglore, Vipparla, Yelchore, being the most important. Camping grounds:—Copperapaud, Nekaricull, Rompicherla, Yelchore. Places of archæological interest:—Annavaram, Appaupooram, Babbeypulley, Bookkapooram, Boppoody, Canooparroo, Caucauny, Caumepully, Caurbole, Challagoondla, Chaugal, Cheemalmurry, Chejerla, Chennoopulley, Chirmaumilla, Commalpaud, Condacauvore, Condaveed, Conidena, Cooncalgoonta, Copparam, Cotappa condah, Daigaramoody, Dronaudoola, Ganapavaram, Gunnavaram, Goontey garlapaud, Gogoolapaud, Gorizavole, Govindapooram, Ikkoor, Irlapaud, Jaggaupooram, Keshanapully, Lingamgoonta, Maurtore, Moolacalore, Moorkipoody, Mullayyapollem, Mydavole, Nadendla, Narsarowpett, Naugarauzpulley, Nekaricull, Ooppalapaud, Ooppoo mauglore, Pamidipaud, Paumarroo, Polore, Poorshottapatam, Rajapett, Rauvipaud, Rompicherla, Roopenagoontla, Santa goodipaud, Santa mauglore, Sautlore, Sooravarapulley, Timmaupooram, Toobaud, Toorimilla, Tungedpulley, Vaimavaram, Vancauyalpaud, Vayidana, Velpoor, Vipparla, Vipparlapulley, Vishwanautoony khandriga, Yadavully, Yadlapaud, Yanamadala, Yeddanapoody, Yelchore, Yellamunda, Zaulaudy, Zonnalagudda, Zonnatauvy. Trig. stations:—Adamsahib, Babbeypulley, Condaveed, Cotappacondah, Daunapa, Yellamunda. The leading places, &c., in the talook are the following.——*Adam sahib* (آدم صاحب - ádamsáhib, Hind.; ఆదంసాహెబు - ádamsáhebu, Tel.). From the person so called. Trig. station; lat. 16° 15′ 15·59″; long. 80° 19′ 48·48″; height 1,680 feet; from Condaveed E. 1¾ miles; from Narsarowpett E. 15 miles.——*Babbeypulley* (బబ్బెపల్లి - babbepalli, Tel.). From (bábu, tel. gentleman + palli, tel. village). Trig. station; lat. 15° 56′ 52·79″; long. 80° 10′ 20·71″; height 669 feet; from Babbeypulley W. 1 mile; from Narsarowpett S.S.E. 20 miles.——*Bugglecondah* (బొగ్గులకొండ - boggulakonda, Tel.). See sep. title.——*Chejerla* (చేజెర్ల - chejerla, Tel.). See sep. title.——*Chilcaloorpaud* (చిలకలూరుపాడు - chilakalúrupádu, Tel.). From (chilaka, tel. parrot + úru, tel. village + pádu, tel. village). Zemindarry, Village; lat. of village 16° 05′; long. 80° 13′; from Narsarowpett S.E. 13 miles. To south of Condaveed on banks of Vaugair. A member of the Manore family of zemindars lives here. They were for some time zemindars [q.v.] of Suttenapully and this place.——*Commalpaud* (కొమ్మాలపాడు - kommálapádu, Tel.). From (komma, tel. branch + pádu, tel. village). Village; pop. 1,561; lat. 16° 02′; long. 79° 59′; from Masulipatam W. 77 miles; from Narsarowpett S.S.W. 16 miles. On the Ongole road. Graves of soldiers. Vishnoo temple, 400 years old. Ruined stone fort, 300 years old. Travellers' bungalow [q.v.]. Irrigation tank.——*Condacauvore* (కొండకావూరు - kondakávúru, Tel.). From (konda, tel. hill + kávi, tel. red ochre + úru, tel. village). Village; pop. 630; acres 3,174; lat. 16° 08′; long. 80° 04′; from Masulipatam W. 71 miles; from Narsarowpett S. 8 miles. Inscriptions near temple of Hanooman [q.v.] and in the highly sculptured Vishnoo [q.v.] temple south of fort. Contains Cotappa condah.——*Condaveed* (కొండవీడు - kondavídu, Tel.). See sep. title.——*Conidena* (కొనిదెన - konidena, Tel.). From (kóna, tel. corner + dona, tel. mountain spring). Ancient name (kottiyadona), meaning village + mountain spring. Village; pop. 3,108; acres 9,176; lat. 16° 01′; long. 80° 06′; from Masulipatam W. 72 miles; from Narsarowpett S. 15 miles. Irrigation tank. Some very old temples and inscriptions. A town in olden times.——*Cooncalgoonta* (కుంకలగుంట - kunkalagunta, Tel.). From (kunka, tel. worthless person + gunta, tel. pond). Village; pop. 3,795; acres 8,525; lat. 16° 18′; long. 79° 55′; from Masulipatam W. 82 miles; from Narsarowpett W.N.W. 12 miles. Three deserted temples with inscriptions. Connected with the Chejerla legend.——*Coondoorroo* (కుందుర్రు - kundurru, Tel.). From (kundu, tel. to sink + turru, tel. place). Village; pop. 2,321; acres 9,535; lat. 16° 01′; long. 79° 57′; from Masulipatam W. 81 miles; from Narsarowpett S.W. 18 miles. Two irrigation tanks. Ruins of an ancient fort and several ancient temples. A poligar [q.v.] Mootoomah naidoo once reigned here. Date not known.——*Cotappa condah* (కోటప్పకొండ - kótappakonda, Tel.). See sep. title.——*Daigaramoody* (దేగరమూడి - dégaramúdi, Tel.). From (déga, tel. hawk + múdi, tel. village). Village; pop. 1,658; acres 2,977; lat. 16° 00′; long. 80° 10′; from Masulipatam W. 67 miles; from Narsarow-

pett S. 16 miles. Two old temples. Inscription.——*Daunapa* (దానప్ప - dánappa, Tel.). Trig. station; lat. 15° 56′ 02·91″; long. 79° 58′ 35·12″; height 1,015 feet; from Gorrepaud E. 2 miles; from Narsarowpett S.S.W. 22 miles.——*Govindapooram* (గోవిందపురము - góvindapuramu, Tel.). From (góvindu, tel. proper name + pura, san. town). Village; pop. 2,498; acres 4,868; lat. 16° 09′; long. 80° 09′; from Masulipatam W. 68 miles; from Narsarowpett S.S.E. 6 miles. West is a temple with inscriptions, built by a Chola [q.v.] rajah. Vishnoo temple. Also a deserted temple.——*Maurtore* (మారుతూరు - márutúru, Tel.). From (máruti, san. son of the god of the winds, epithet of hanumán + úru, tel. village). Sanscrit name (márutipura), meaning hanooman + town. Village; pop. 1,474; acres 5,855; lat. 15° 59′; long. 80° 09′; from Masulipatam W.S.W. 67 miles; from Narsarowpett S. 17 miles. Old Vishnoo temple with inscription.——*Nadendla* (నాదెండ్ల - nádendla, Tel.). Village; pop. 3,564; acres 9,904; lat. 16° 11′; long. 80° 14′; from Masulipatam W. 60 miles; from Narsarowpett E.S.E. 9 miles. Two ancient temples with inscriptions. ——*Narsarowpett* (నరసారావుపేట - narasárávupéta, Tel.). See below.——*Nekaricull* (నెకరికల్లు - nekarikallu, Tel.). From (nekkara, tel. tree, cordia myxa, linn. + kallu, tel. stone). Village; pop. 1,894; acres 2,210; lat. 16° 22′; long. 79° 59′; from Masulipatam W. 80 miles; from Narsarowpett N.W. 12 miles. On the high road. Travellers' bungalow [q.v.]. Soldiers' graves. A tope [q.v.]. An irrigation tank. Temples with sculptured figures and inscriptions.——*Pasoomarroo* (పసుమఱ్ఱు - pasumarru, Tel.). From (pasi, tel. cattle + marri, tel. banyan tree, ficus bengalensis, linn.). Village; pop. 2,559; acres 7,343; lat. 16° 04′; long. 80° 14′; from Masulipatam W. 62 miles; from Narsarowpett S.E. 14 miles. Pasoomarroo and Poorshottapatam are about one mile apart; between them lies Chilcaloorpaud. Temple with sculptured figures and inscriptions. Hamlet of this village, Comarivullipaud on bank of Vaugair, is coolest place in the division.——*Poorshottapatam* (పురుషోత్తమపట్టణము - purushóttamapattanamu, Tel.). From (purushóttama, san. proper name + pattana, san. town). Village; pop. 5,250; acres 4,158; lat. 16° 05′; long. 80° 13′; from Masulipatam W. 62 miles; from Narsarowpett S.E. 13 miles [pasoomarroo]. Chilcaloorpaud, is hamlet of Poorshottapatam. Fortress of mud walls with bastions at angles. Two roads, the Great northern road and the Peraula nekaricull road, cross here. Trade in cloths, &c.——*Rajapett* (రాజాపేట - rájápéta, Tel.). From (rájá, san. king + péta, tel. suburb). Village; pop. 2,394; acres 4,710; lat. 16° 06′; long. 80° 09′; from Masulipatam W. 68 miles; from Narsarowpett S.S.E. 11 miles. Formerly gave name to the talook. Ruined sculptured temple. West of the village is an inscription. Old fort. 17 dolmens [coday cull].——*Rauvipaud* (రావిపాడు - rávipádu, Tel.). From (rávi, tel. the peepul tree, ficus religiosa, linn. + pádu, tel. village). Village; pop. 1,335; acres 5,276; lat. 16° 16′; long. 80° 03′; from Masulipatam W. 74 miles; from Narsarowpett N.W. 4 miles. Catholic mission station chiefly Cumma [q.v.] cultivators. Old temple of Hanooman [q.v.]. Shiva temple with inscription.——*Rompicherla* (రొంపిచెర్ల - rompicharla, Tel.). From (rompi, tel. bog + cherla, tel. village). Village; pop. 2,750; acres 6,929; lat. 16° 13′; long. 79° 57′; from Masulipatam W. 80 miles; from Narsarowpett W. 10 miles. Temple of Suncareshwara sawmy with three inscriptions near the Dhwaja stambham [q.v.]. Temple in the fort with two inscriptions; built by Trimal devy, sister of Prataupa roodran [q.v.]. Travellers' bungalow [q.v.]. Soldiers' graves on the Hyderabad road. ——*Sautlore* (సాతులూరు - sátulúru, Tel.). From (sátu, tel. company of travellers + úru, tel. village). Village, Railway station; pop. 2,087; acres 5,357; lat. 16° 15′; long. 80° 10′; from Masulipatam W. 67 miles; from Narsarowpett E.N.E. 4 miles. Tank and large tamarind [q.v.] tope [q.v.]. Inscriptions.——*Vipparla* (విప్పర్ల - vipparla, Tel.). From (vippa, vulg. for ippa, tel. tree, bassia longifolia, linn. + parra, tel. swamp). Village; pop. 2,995; acres 8,672; lat. 16° 18′; long. 79° 59′; from Masulipatam W. 79 miles; from Narsarowpett W. 9 miles. Two large irrigation tanks. Several inscriptions. Saltpetre [shorah] pans. ——*Yelchore* (యేల్చూరు - yéltsúru, Tel.). From (élche, tel. kind of snipe + úru, tel. village). Village; pop. 1,710; acres 6,889; lat. 16° 05′; long. 79° 58′; from Masulipatam W. 80 miles; from Narsarowpett S.W. 13 miles. A large irrigation tank. An inscription. An astrological diagram on a stone.——*Yellamunda* (ఎల్లమంద - ellamanda, Tel.). From (ella, tel. boundary + manda, tel. herd of cattle). Village; pop. 2,427; acres 10,534; lat. 16° 11′; long. 80° 06′; from Masulipatam W. 70 miles; from Narsarowpett S. 5 miles. Ancient temple of Ramalingasawmy with eight inscriptions, dates ranging from A.D. 1131 to 1555. On the summit of a hill, 2½ miles south of the village, is a small temple with carved figures and mantapam [q.v.] and five inscriptions. Trig. station in lat. 16° 09′ 09·73″; long. 80° 04′ 47·49″; height 1,588 feet; from Narsarowpett S. 6 miles; from Yellamunda S.W. 3 miles.——**(2)** Village, Talook head-quarters, Railway station; Kistna dist., Narsarowpett tal.; pop. 5,309; acres 3,641; lat. 16° 14′; long. 80° 06′; from Bezwada W.S.W. 41 miles; from Guntoor W.S.W. 27 miles; from Madras N. 216 miles; from Masulipatam W. 69 miles; from Vinoocondah E.N.E. 25 miles. Formerly called Atlore. Present name from a zemindar who enlarged the fine tank west of the fort. On death of Narsarow his territory was divided between two zemindars Pedda vencata goonda row and Chinna vencata goonda row, one of whom took the fortress of Vinoocondah and the other Bellamcondah. In 1803 one of these resigned his share in favor of the other, and the zemindarry was reunited. In 1846 it was sold and purchased for Government. Vencata narsimha row, the last zemindar, resides in the fort at Narsarowpett, and is the hereditary custodian of the shrine of Cotappa condah. The palace resisted an attack of the Pindarries [q.v.] in 1816. Mango [q.v.] orchards, south of the town. Shiva temple built by Jeinas [q.v.]. Temple of Bheemeshwaran, with an inscription. Temple of Puttaubhy ramasawmy with inscription. American baptist mission station.

NARVEL (नर्वेल - narvala, *Mahr.*; ನರುವಲ್ - naruval, *Can.*). Botanically Viburnum fœtidum, wall., caprifoliaceæ [vricsham]. A shrub, leaves variable, usually ovate-lanceolate, serrated, length 1½ to 2 inches, flowers small, greenish white, berries small, ovoid, and of a vivid red color; all parts of the plant have a powerful unpleasant odour like that of premna integrifolia, linn. [moonnay]; native of burmah found in cultivation throughout western india. Two Viburnums are garden shrubs in europe, Viburnum opulus, linn. and Viburnum tinus, linn.; the former is the Gueldres rose, in which the flowers form a white ball, whence called snow-ball tree; the latter is the Laurestine.

NARY (நரி - nari, *Tam.*). From (narai, tam. grayness). Fox. Plant first term, often joining two genera, indicating wildness. Ex., where transl. is of second term:—Crotalaria verrucosa (narimarutti), threatener; Ledebouria hyacinthoides (narivengáyam), allium cepa; Phaseolus mungo, var. radiatus (narippayaru), pulse; Rothia trifoliata (narippayaru), pulse; Urginia indica (narivengáyam), allium cepa. See gloss. paragraphs.

NASEE (نسی - nasí, *Hind.*). From (nasa, ar. to omit). Intercalary correlation amongst the ancient arabs of the lunar year [saul] with the solar. This was by the addition of a month every third year. Owing to various heathen rites which came to be observed during the intercalary year, this calculation was abolished; consequently the mahomedan names of the months [maheena] have now no relation to the seasons [ritoo]. For intercalation among Hindoos see Adhicam and Maunam.

NASEEB (نصیب - nasíb, *Hind.*). From (nasab, ar. what is fixed). Fate [takdeer].

NASH (नश् - nash, *San.*). To perish.——*Nashtam* (नष्ट - nashta, San.). Loss.——*Nausan* (நாசன் - násan, Tam.). From (násha, san. ruin). Means the god of death [yaman]. Pariah proper name [peyar].

NASL (نسل - nasl, *Hind.*). Lineage. Nasleharaum, from (harám, ar. unlawful), is a villain; a term of abuse [haraumzauda].

NASOOT (ناسوت - násút, *Ar.*). The first of the four stages of a soofee [q.v.] in which a disciple must strictly conform to shareeyat [q.v.] and which is said to be lowest form of spiritual existence.

NAT (नट् - nat, *San.*). To dance.——*Natan* (नट - nata, San.). Dancer.——*Natarajan* (நடராசன் - nadarásan, Tam.). From (nata, san. dancer + rájá, san. king). Epithet of Shiva [q.v.], the king of dancers. Hindoo 2nd or pers. name [peyar].——*Natcheny* (नाचणी - náchaní, Mahr.). Same as Raggy.——*Nateshan* (नटेश - natésha, San.). From (nata, san. dancer + ísha, san. lord). Shiva the lord of dancers. Hindoo 2nd or pers. name [peyar].——*Nautacam* (नाटक - nátaka, San.). From (nat, san. to dance). Acting, dancing, or any public performance. Also one of the three varieties of Tamul [q.v.], used in dramas. See vol. I (52).——*Nautch* (ناچ - nách, Hind.). From (nat, san. to dance). An exhibition given by dancing-girls [dausy]. Usually a combination of singing and slow dancing and gesticulating with an accompaniment of music [sangeetam] played by two or three men standing behind. Two or three words are repeated over and over again till the dancer has exhausted every means of expression; the words are sung by the attendants behind, and the dancer now and then joins in with the song.

NAU (نا - ná, *Hind.*). Without. Naudaur, from (dár, pers. property or house), is having nothing, insolvent. Naumard, from (mard, pers. man), is a coward.

NAUD (ناٹ - nát, *Hind.*; నాడు - nádu, *Tel.*; നാട് - nátu, *Mal.*; நாடு - nádu, *Tam.*). From (nadu, tam. to plant). Country where planting corn, plants or trees is done [graumam, maroötham]. Rural and agricultural tract as distinguished from a city [nagaram, putnam] or a forest tract [caud]. A range of country, hills is as Mulnaud, Wynaud. The plateau of the Neilgherry hills is arranged into three nauds, Paranginaud, Merkoonaud, and Todanaud. Naudautchy is the management of a naud, as oorautchy is that of a village. Naud curts are collections made to meet the expenses of persons deputed in the general interests of a village. Nautamcar is a village headman. Nautcootam is country assembly. Nautkanakan is a village accountant. Nautpooram is country in opposition to town. Nauttavan is the headman of a naud. Malainaud is hilly country. Valanaud is fertile country of which there were formerly five in southern

india:—chola, congoo, malayalam, paundya and tonday.——*Nauda* (నాడ - náda, Tel.). From (nádu, tel. country). Country. Locative singular. Suffix in place names; as Conauda meaning corner country.——*Naudan* (നാടൻ - nátan, Mal.). Belonging to a locality. Cf. Yidangazhy.——*Naudaun* (நாடான் - nádán, Tam.). Title among toddy-drawers. Hindoo third name [peyar].——*Naudava* (ನಾಡವ - nádava, Can.). The same as Nayar.——*Naudiga* (ನಾಡಿಗ - nádiga, Can.). Village accountant in the inland Canarese country. With hardly an exception they are of the Bramin [q.v.] caste. The office is hereditary in common with those of all the other village officials [balootah].——*Naudvauly* (നാടുവാഴി - nátuvázhi, Mal.). See sep. title.——*Nautt* (நாட்டு - náttu, obl., Tam.). Country [q.v.], as opposed to foreign [q.v.] or sheemay [seema].——*Nauttaun* (நாட்டான் - náttán, Tam.). From (nádu, tam. country). The headman of any caste invested with the civil jurisdiction of a tract under the native administration. This title is now-a-days assumed by people of the Shaunaur [q.v.] caste [jauty].

NAUDAH (त्रसर - trasara, *San.*; نلي - nallí, *Hind.*; కొమ్ము - kommu, *Tel.*; ഓടം - ótam, *Mal.*; நாடா - nádá, *Tam.*). Title from tamul. San. from (tras, san. to shake). Hind. means a tube. Tel. means horn. Mal. from (óta, mal. hollow bamboo). Weaver's shuttle; commonly a small hollow bamboo [nesavoo].

NAUDAH (نارا - nárá, *Hind.*). Country twist.

NAUDIR (نادر - nádir, *Ar.*). From (nadara, ar. to remain alone). Singular. Prefixed to an alam forms a lacab; as Naudir ally, wonder of ally [ism].

NAUDVAULY (നാടുവാഴി - nátuvázhi, *Mal.*). From (nátu, mal. country + vázhuka, mal. to rule) [naud].——**(1)** The chief of a Naud or province. He was not considered a Naudvauly who had not at least 100 Nayars [q.v.] attached to his range; any number below that ranked a person as a Deshavauly [q.v.]. See vol. II, 104, 144.——**(2)** The following are the principal Naudvaulies in North malabar, with the talook indicated.——*Avinyaut nayar* (അവിഞ്ഞാട്ട് നായർ - aviññáttunáyar, Mal.), Cooroombranaud.——*Cakkautt rayoonnavar* (കക്കാട്ടുവാഴുന്നവർ - kakkáttuvázhunnavar, Mal.), Cooroombranaud.——*Caumbratt numbiyaur* (കാമ്പ്രത്ത് നമ്പ്യാർ - kámprattunampyár, Mal.), Cottayam.——*Cauracautt edattil numbiyaur* (കാരക്കാട്ടെടത്തിൽനമ്പ്യാർ - kárakkáttetattilnampyár, Mal.), Chiracal.——*Cauryautt numbiyaur* (കാര്യാട്ട് നമ്പ്യാർ - káryáttunampyár, Mal), Cottayam.——*Chandrote numbiyaur* (ചന്ത്രോത്ത് നമ്പ്യാർ - chantróttunampyár, Mal.), Cottayam.——*Chedicherry yedattil numbiyaur* (ചെടിശ്ശേരി എടത്തിൽ നമ്പ്യാർ - chetishshérietattilnampyár, Mal.), Chiracal.——*Choyaly yedattil numbiyaur* (ചുഴലിയെടത്തിൽനമ്പ്യാർ - chuzhaliyetattilnampyár, Mal.), Chiracal.——*Coonnoommail numbiyaur* (കുന്നുമ്മേൽ നമ്പ്യാർ - kunnummélnampyár, Mal.), Cottayam.——*Coorangote nayar* (കുരങ്ങോട്ട് നായർ - kúrannóttunáyar, Mal.), Cottayam.——*Coottauly nayar* (കൂത്താളിനായർ - kúttálináyar, Mal.), Cooroombranaud.——*Cundote yedattil numbiyaur* (കണ്ടോത്ത് എടത്തിൽ നമ്പ്യാർ - kantóttuetattilnampyár, Mal.), Chiracal.——*Etticherry yedattil numbiyaur* (ഇട്ടിശ്ശേരിഎടത്തിൽനമ്പ്യാർ - íttishsherietattilnampyár, Mal.), Chiracal.——*Kizhakk edatt numbiyaur* (കിഴക്കേടത്ത് നമ്പ്യാർ - kizhakkétattunampyár, Mal.), Cottayam.——*Naurangoly chiracal numbiyaur* (നാരങ്ങോളി ചിറക്കൽനമ്പ്യാർ - nárannólichirakkalnampyár, Mal.), Cottayam.——*Padinyauredattil numbiyaur* (പടിഞ്ഞാറെടത്തിൽ നമ്പ്യാർ - patiññáretattilnampyár, Mal.), Chiracal.——*Poothiyedatt edattil numbiyaur* (പുതിയെടത്ത് എടത്തിൽനമ്പ്യാർ - putiyetattuetattilnampyar, Mal.), Chiracal.——**(3)** The following are similarly the principal Naudvaulies in South malabar.——*Alliyil edattil nayar* (അള്ളിയിലെടത്തിൽനായർ - alliyiletattilnáyar, Mal.), Calicut.——*Amarambalatt tirmalpaud* (അമരമ്പലത്ത് തിരുമുല്പാട് - amarampalattutirumulpátu, Mal.), Yernaud.——*Ayyayira prabhoo cartauv* (അയ്യായിരപ്രഭുകർത്താവ് - ayyáyiráprabhukarttávu, Mal.), Yernaud.——*Blahayil nayar* (ബ്ലാഹയിൽനായർ - bláhayilnáyar, Mal.), Ponnany.——*Cannambara nayar* (കണ്ണമ്പ്ര നായർ - kannampranáyar, Mal.), Palghaut.——*Cauppil nannambara tirmalpaud* (കാപ്പിൽനന്നമ്പ്രതിരുമുല്പാട് - káppilnannampratirumulpátu, Mal.), Yernaud.——*Cavalpaura nayar* (കവളപ്പാറ നായർ - kavalappáranáyar, Mal.), Valavanaud.——*Chenautt nayar* (ചേനാട്ട് നായർ - chénáttunáyar, Mal.), Palghaut.——*Chikkote tirmalpaud* (ചിക്കോട്ട് തിരുമുല്പാട് - chíkkóttutirumulpátu, Mal.), Yernaud.——*Congauttil nayar* (കോങ്ങാട്ടിൽ നായർ - kónnáttilnáyar, Mal.), Palghaut.——*Coothiravuttat nayar* (കുതിരവട്ടത്ത് നായർ - kutiravattattunáyar, Mal.), Valavanaud.——*Dharmote panikkar* (ധർമ്മോത്ത് പണിക്കർ - dharmóttupanikkar, Mal.), Valavanaud.——*Malapooratt pauranumby* (മലപ്പുറത്ത് പാറനമ്പി - malappurattupáranampi, Mal.), Valavanaud.——*Mandamoye tirmalpaud* (മണ്ടമ്മുയി തിരുമുല്പാട് - mantammuyitirumulpátu, Mal.), Yernaud.——*Mappooratt tirmalpaud* (മപ്പുറത്ത് തിരുമുല്പാട് - mappurattutirumulpátu, Mal.), Yernaud.——*Moolanyore nayar* (മുലഞ്ഞൂർനായർ - mulaññúrnáyar, Mal.), Valavanaud.——*Moothoovilatt nayar* (മുതുവിലത്ത് നായർ - mutuvilattunáyar, Mal.), Valavanaud.——*Mungara nayar* (മങ്കരനായർ - mankaranáyar, Mal.), Palghaut.——*Mungaut atchan* (മണ്ണാട്ടച്ചൻ - mannáttaççan, Mal.), Calicut.——*Munjery caurnavapaud* (മഞ്ചേരി കാരണവപ്പാട് - mañchérikáranavappátu, Mal.), Yernaud.——*Munnarcaud nayar* (മണ്ണാർക്കാട്ട് നായർ - mannárakkáttunáyar, Mal.), Valavanaud.——*Munnil yedattil nayar* (മണ്ണിൽ എടത്തിൽ നായർ - manniletattilnáyar, Mal.), Calicut.——*Munnore mootta nayar* (മണ്ണൂർമൂത്തനായർ - mannúrmúttanáyar, Mal.), Palghaut.——*Nadoovatt edattil nayar* (നാടുവത്തെടത്തിൽനായർ - natuvattetattilnáyar, Mal.), Calicut.——*Naricote nayar* (നരിക്കോട്ട് നായർ - narikkóttunáyar, Mal.), Palghaut.——*Nelambore tutcharacauvil tirmalpaud* (നിലമ്പൂർതച്ചറക്കാവിൽതിരുമുല്പാട് - nilampúrtaççarakkávil tirumulpátu, Mal.), Yernaud.——*Parappore yedattil nayar* (പറപ്പൂരെടത്തിൽ നായർ - parappúretattilnáyar, Mal.), Calicut.——*Poonnattore numbidy* (പുന്നത്തൂർനമ്പിടി - punnattúrnampiti, Mal.), Ponnany.——*Rekanutt kyemal* (രക്കണത്ത് കയ്മൾ - rakkanattukaymal, Mal.), Palghaut.——*Taracull menon* (തറക്കൽ മേനോൻ - tarakkalménón, Mal.), Valavanaud.——*Tenayancherry elliad* (തെനയഞ്ചേരി എളയത്ത് - tenayañchérielayatu, Mal.), Yernaud.——*Teningal edattil nayar* (തേനിങ്ങൽഎടത്തിൽനായർ - téninnaletattilnáyar, Mal.), Calicut.——*Tricadeery nayar* (തൃക്കടീരിനായർ - trikkatírináyar, Mal.), Valavanaud.——*Vadagara moottaur* (വടകരമൂത്താർ - vatakaramúttár, Mal.), Valavanaud.——*Vagayil nayar* (വാകയിൽ നായർ - vákayilnáyar, Mal.), Ponnany.——*Vengoonauttil numbidy* (വെങ്ങനാട്ടിൽനമ്പിടി - vennunáttilnampiti, Mal.), Palghaut.——*Venmaniyore nayar* (വെണ്മണിയൂർനായർ - venmaniyúrnáyar, Mal.), Palghaut.——*Yedattara nayar* (എടത്തറനായർ - etattaranáyar, Mal.), Palghaut.——*Yelamboolacherry nayar* (എളമ്പുലാശ്ശേരി നായർ - elampuláshshérináyar, Mal.), Valavanaud.——*Yelayautt nayar* (എളയാട്ട് നായർ - elayáttunáyar, Mal.), Valavanaud.

NAUG (नाग - nága, *San.*; ناگ - nág, *Hind.*). From (naga, san. naked). Serpent [sarpam] in general.——*Nagarcoil* (നാഗർ കോവിൽ - nágarkóvil, Mal.). From (nága, san. serpent + kóvil, mal. temple). Town, District judge's head-quarters; Travancore state, Pudmanaubhapooram division, Agasteeshwaram tal.; pop. 16,534; lat. 8° 11′ N.; long. 77° 29′ E.; from Alleppey S.E. 115 miles; from Cottayam S.E. 113 miles; from Madras S.S.W. 390 miles; from Paravore S.S.E. 156 miles; from Quilon S.E. 76 miles; from Trivandrum E.S.E. 38 miles; from the sea E. 13 miles. Suburb of Cottaur. Former seat of Travancore government. Still head-quarters of a district with courts and offices. Centre of a large Christian population. London mission society has a school and printing-press. A centre of snake-worship. Pagoda [q.v.] dedicated to serpent god. The principal image of Naugamma or the snake mother, of copper-gilt, in form of a serpent is carried in procession in a car [rath] once a year. From behind the image for six months a large quantity of black sand is thrown up. For the other six months white sand is thrown up. These are distributed as prasaudam [q.v.] to the devotees. Inside the temple and without are numerous stone images of snakes. People assemble on Sundays and other special days, bringing milk [paul], sugar [q.v.], and cocoanuts [q.v.] to worship the serpent goddess, and for the living cobras [q.v.]. It is said that within a circuit of a mile from the temple no snake bite will be mortal [manarchaul]. Nagarcoil has a reputation for fine lace works [sarigay] done by the Mission converts.——*Nagore* (நாகூர் - nágúr, Tam.). From (nága, san. serpent + úr, tam. village). Sanscrit name (nágapurí), meaning snake town. Town, Port; Tanjore dist., Negapatam tal.; lat. 10° 49′; long. 79° 53′; from Caricaul S. 7 miles; from Madras S.S.W. 157 miles; from Negapatam N. 4 miles; from Tanjore E. 47 miles. On an outlet of the Coleroon. Included in Negapatam municipality. Convenient harbour at the mouth of the Vettaur. Light on bastion; lat. 10° 45′ 43·25″; long. 79° 53′ 27·85″; white; fixed; 14 miles range. Visible from all directions seaward. Masonry column, white. Guide to the anchorage. The town is easily distinguished at sea by pagodas [q.v.] rendered conspicuous by their white color. Chiefly inhabited by Lubbays [q.v.]. Vessels of two or three hundred tons burthen belong to this place, and are navigated by natives, who conduct them to the coast of Sumatra, Acheen, Malacca strait, and other parts on the east side of the Bay of

Bengal, where they have a constant trade. The port with a small territory adjoining was sold by the Rajah of Tanjore to the Dutch at Negapatam in 1771; subsequently taken from them by the Nawaub [q.v.] of the Carnatic [q.v.] with the aid of the English; sacked by Lally in 1758; acquired by the English by a grant of the Rajah in 1776. In 1780-81 food supplies were obtained hence for the British troops. Hyder ceded the place to the Dutch from whom it passed to the English in 1788. In 1868 the port was incorporated with that of Negapatam. Old Shiva temple, celebrated mosque [musjid], with a minaret [q.v.], 90 feet high resorted to during its annual festival by pilgrims from all parts of India. Wesleyan mission station. Oors [q.v.] of Cawder wally [q.v.] about February.——*Nahor* (نهر - nahor, Assamese). Same as Nauga champak.——*Naugabhooshanam* (நாகபூஷணம் - nágappúsanam, Tam.). From (above + bhúshana san. ornament). Epithet of Shiva. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Naugacull* (நாகக்கல் - nágakkal, Tam.). From (above + kal, tam. stone). Stone with serpent figures.——*Naugadonda* (నాగదొండ - nágadonda, Tel.). From (nága, san. serpent + donda, tel. cephalandra indica, naud.). Title from antidote to snake bite. Same as Braminy kite caper.——*Nauga dweepam* (नागद्वीप - nágadvípa, San.). Means serpent island or continent, from prevalence of serpents. One of the nine divisions of Bhaurata varsham or Northern india [bhaurata varsham].——*Naugaisar* (ناگیسر - nágesar, Hind.). From (nága, san. serpent + késara, san. filament); from resort of serpents. Nauga champak, Soora poon, &c.——*Naugalingam* (நாகலிங்கம் - nágalingam, Tam.). From (above + linga, san. phallic emblem of shiva). Hindoo 2nd or pers. name. Commom among non-bramins [peyar].——*Naugam* (नाग - nága, San.; நாகம் - nágam, Tam.). The cobra snake.—"*a*" Serpent worship as belonging to Southern india is fully described at vol. I (82). It is not a primary form of belief among the Dravidians, but has obtained some currency, coming probably from the north-east. Various places in Southern india are named after the serpent, as Nagore, Negapatam, and Nagarcoil. At Nagarcoil the principal images of Naugamma, or the snake mother, of copper-gilt, and in the form of a serpent, is carried in procession in a car like other idols once a year. Inside the temple and without are numerous stone images of snakes. Perhaps the principal seat of this superstition in Travancore is at Manarchaul in Caurtigapully district. Natives are careful not to speak disrespectfully of the naugam; as the Malayaulies of the Shevaroy hills while hunting the tiger [pooly] only speak of it as a dog [nye], so the cobra [q.v.] is called nulla Tumbiraun, the good lord, or nulla paumb, the good snake.—"*b*" In mythology there are the snake gods. These have human heads and the bodies of serpents and wear jewels in their heads. They are the sons of Cashyapan [q.v.] and Cadroo, subject to Vishnoo's bird Garoodan [q.v.], and inhabiting part of Pautaulam [q.v.] called Naugalocam, the capital of which is Bhogavaty. The king of the serpent race, Anantan [q.v.], is superior in wisdom and intelligence, having one thousand heads, on one of which he supports the world. He forms both the couch and canopy of Vishnoo [q.v.]. Snake-worshippers expect after death to go to Naugalocam. Shiva wears a snake as an ornament in the hair of his head; and it is worn as a ring by his wife. Legends are told of the gods churning the sea to recover the elixir of immortality [amritam], with a mountain [mandaram] for a churning stick, and the five-headed serpent Vausooky for a rope, the poison issuing from whose mouth was drunk up by Shiva [q.v.], and made his neck blue. He is hence called Neelacuntan [coormam].—"*c*" A people bearing this name are historical and have left many traces behind them. There were mountains so called, and Nauga dweepam was one of the seven divisions of Bhaurata varsham. The naugas were a race distinct from the ordinary natives of India. They probably obtained their name from worshipping serpents. Certain Sheiva sanyausies [q.v.] who go nearly naked are called Naugas to this day.—"*d*" Plant first term meaning large, usefulness in snake bite, or resort of snakes; often joining two genera. Ex., where transl. is of second term:—Artemisia vulgaris (nágadamaní), subduing; Baliospermum montanum (nágadantí), tooth; Bauhinia scandens (nágavalli), creeper; Calophyllum inophyllum (nágachámpá), michelia champaca; Canthium parviflorum (nágabalá), strength; Crinum asiaticum, var. toxicarium (nágadavana), subduing; Corallocarpus epigæa (nágadonda), cephalandra indica; Crotalaria trifoliastrum (nágagiligittsa), crotalaria; Heliotropium indicum (nágadantí), tooth; Jasminum latifolium (nágamalle), jasminum sambac; Justicia procumbens (nágaputtachettu), ant-hill + tree; Luffa acutangula, var. amara (nágadáli), creeper; Mesua ferrea (nágachampa), michelia champaca, (nágakésara), filament, (nágappú), flower, (nágapushpá), flower; Murraya exotica (nágagolugu), glycosmis pentaphylla; Opuntia dillenii (nágp'haná), hood, from leaf resembling cobra's hood, (nágadáli), creeper, (nágajemudu), euphorbia tirucalli, (nágamullu), thorn, (nágatáli), creeper; Piper betel (nágavallí), creeper; Rhinacanthus communis (nágamalle), jasminum sambac; Rhynchocarpa fœtida (nágadonda), cephalandra indica; Roxburghia gloriosoides (nágapotti), shortness; Ruta graveolens, var. angustifolia, (nágadálisoppu), lustre + vegetable; Strychnos colubrina (nágamusadi), strychnos nux-vomica. See gloss. paragraphs.—"*e*" May be taken as the general term for the important family Elapidæ, ophidii colubriformes venenosi, ophidia [sarpam], reptilia [sarpy, 27], of naturalists [jantoo]. The Elapidæ are thus defined. Body cylindrical or sub-cylindrical; tail rather short, tapering; head with the normal number of shields above; loreal constantly absent; nostril lateral; eye rather small, with round pupil. The venom-fang shows a distinct groove along its front, and the canal in its interior terminates in a slit at its extremity. The following are the South indian species:—Bungarus cæruleus [krait], Bungarus fasciatus [bungaur], Callophis nigrescens, Naja tripudians [cobra], Ophiophagus elaps [hill cobra].——*Naugamany* (நாகமணி - nágamani, Tam.). From (above + mani, san. gem). Hindoo 2nd or pers. name. Applied to males and females. Common among non-bramins [peyar].——*Naugamma* (ನಾಗಮ್ಮ - nágamma, Can.). From (above + amma, can. mother). Serpent goddess worshipped at Nagarcoil and other centres of serpent worship. Otherwise Pudmauvaty, queen of Bijjala [q.v.].——*Naugamullay* (நாகமலை - nágamalai, Tam.). From (above + malai, tam. hill). Sanscrit name (nágashaila), meaning the same. Hill; Madura dist., Madura tal.; lat. 9° 59′; long. 77° 58′; height 1,021 feet; from Madura W.N.W. 14 miles. An offshoot of the Andiputty and Varshanaud ranges, themselves a continuation of the Travancore hills. About 15 miles in length. Trig. station in lat. 9° 59′ 55·72″; long. 77° 58′ 45·79″; height 1,021 feet; from Madura W.N.W. 14 miles; from Poodoocottah W.S.W. 66 miles.——*Naugamully* (నాగమల్లె - nágamalle, Tel.; நாகமல்லி - nágamalli, Tam.). Root antidote to snake bite. Same as Snake jasmine.——*Naugan* (நாகன் - nágan, Tam.). Proper name among the lower castes [jauty]. Familiarly shortened into Naugoo, which is applied to males and females [peyar].——*Naugannan* (நாகண்ணன் - nágannan, Tam.). From (above + annan, tam. elder brother). Hindoo 2nd or pers. name [peyar]. Naugappan similar.——*Nauga punchamy* (నాగపంచమి - nágapanchami, Tel.). Means snake + fifth lunar day. Lunar [chaundramaunam] festival [pundigay, 3a], subject to intercalation [adhicam]. Fifth day in the waning moon [krishnapacsham] of fourth lunar month Ashaudham [mausam] between 5th July and 4th August. Or again fifth day of waxing moon [shoocla pacsham] in fifth lunar month Shrauvanam between 21st July and 20th August. Otherwise Garooda punchamy. On both of these serpent deities are worshipped. Offerings are made to snakes; milk, grain, and other articles being taken to the holes in which they live.——*Naugauttammah* (நாகாத்தம்மா - nágáttammá, Tam.). From (above + áttál, tam. mother + ammá, tam. mother). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Naugdown* (ناگدون - nágdaun, Hind.). From (nág, hind. snake + damana, san. subduing). Title otherwise Common asparagus. Botanically Asparagopsis [shatamooly] officinalis, linn., liliaceæ [vricsham, 136]. Cultivated by English, but does not thrive in Carnatic [q.v.]. The title naugdown is also applied to:—Artemisia vulgaris; Centipeda orbicularis; see gloss. paragraphs.——*Naugeshwaran* (நாகேசுவரன் - nágésuvaran, Tam.). From (above + íshvara, san. lord). Hindoo 2nd or pers. name [peyar].——*Naugilair* (నాగేరు - nágiléru, Tel.). From (nága, san. serpent + éru, tel. river). Sanscrit name (sarpanadí), meaning same. River; Kistna dist., Pulnaud tal. Perennial stream. Rises near Caurempoody and passing Dauchepully, enters the Kistna after a course of about 20 miles. A massive embankment, once dammed up its waters between the Savaditola hill of Caurempoody and the Podily hill of Shingarootla agrahauram. The water is raised into wells on the banks similar to those in Vinoocondah talook on the banks of the Goondlacumma. At Dauchepully, Gaumalpaud, and Shuncaraupooram, huge stone dams have been raised whence small irrigation channels [q.v.] are led.——*Naugojee* (ನಾಗೋಜಿ - nagóji, Can.). From (above + jí, hind. sir). Hindoo 2nd or pers. name. Common among Madhwas and Mahrattas [peyar].——*Naugoola chavity* (నాగులచవితి - nágulatsavati, Tel.). Means serpent + fourth. Lunar [chaundramaunam] festival [pundigay, 3a], subject to intercalation [adhicam]. The fourth day of the waxing moon [shoocla pacsham] in the eighth lunar month of Caurteecam [mausam] between 20th October and 19th November; set apart for the worship of the cobra [q.v.] capella snake by pouring milk into its hole. Also the fourth day of the increasing moon in the fifth lunar month Shrauvanam between 20th July and 19th August; similar observance.——*Naugoovayyan* (நாகுவய்யன் - náguvayyan, Tam.). From (above + aiyyan, tam. master). Hindoo 2nd or pers. name [peyar].——See *Negapatam* (நாகப்பட்டணம் - nágappattanam, Tam.). See sep. title.

NAUL (نعل - naal, *Hind.*). Horse-shoe. Naulbund, from (band, pers. fastener) is a farrier.

NAUL (നാൾ - nál, *Mal.*; நாள் - nál, *Tam.*). A solar day and night [ahorautram, nyauyir]. A natural day [sauvana dinam]. Also a lunar asterism [nacshatram].——*Naulvazhy* (നാൾവഴി - nálvazhi, Mal.). From (above + vazhi, mal. way). Day-book.

NAUL (നാൽ - nál, *Mal.*; நாலு - nálu, *Tam.*). Four.——*Nangoonairy* (நாங்குநேரி - nánguněri, Tam.). See sep. title.

——*Naulady* (நாலடி - náladi, Tam.). From (above + adi, tam. foot). From the class of stanza. A book containing 400 verses or epigrams on morals. The production of some of the Jeina [q.v.] literati of the Madura college [q.v.], and is of equal authority with the Cooral [q.v.], though inferior in sentiment and language. There is a Tamul proverb :—ஆலும்வேலும் பல்லுக்குறுதி நாலுமிரண்டுஞ் சொல்லுக்குறுதி—"As "the splint of the banyan [q.v.] and vail [q.v.] trees gives "strength to the teeth by rubbing them, so naulady and cooral "give strength to the speech." Example of Naulady :—ஆகாதெனினமகத்து நெய்யுண்டாகிற் போகாதெறும்பு புறஞ்சுற்றும் ; யாதுங் கொடா அரெனினு முடையா ரைப்பற்றிவிடா அருலகத்தவர்—"If there be ghee [q.v.] "in the vessel although they cannot get at it, the ants [choomtee] "will creep round the outside ; though the rich give nothing, "the world will tenaciously cling to them."——*Naulauyira prabandham* (நாலாயிரப்பிரபந்தம் - náláyirappirabandam, Tam.). From (above + áyiram, tam. thousand + prabandha, san. work). Same as Tirvyemozhy, Veishnava work.——*Naul mookhan* (நாலுமுகன் - nálumugan, Tam.). From (above + mukha, san. face). The four-faced god ; Bramba [q.v.].

NAULKY (نالکی - nálkí, *Hind.*). State palankeen [q.v.].

NAUMA (نامه - námah, *Pers.*). From (navishtan, pers. to write) [nasindah, navees]. Writing. Suffix in compounds ; as Mooctiarnauma, agent + writing. Rauzeenauma is a deed of assent.

NAUMAM (नाम - náma, *San.*). From (ñá, san. to know) [nyaunam]. Literally name. The tridental mark which the Veishnavas wear on the forehead. Also called Tirnaumam, or holy name. It consists of two white lines, extending from the hair to the eyebrows, and then leading to the nose where they meet, and a yellow or red perpendicular line between them from the nose to the hair. The two white side lines represent the feet of Vishnoo [q.v.] and the centre red line is the symbol for Lutchmy [q.v.]. It is sometimes worn also on the two shoulders and on the breast. The Vadagalay [q.v.] sub-division of the Shreeveishnavas [q.v.] use the mark as above-mentioned, but with the Tengalays [q.v.] the central line is produced to the bridge of the nose. The naumam in very large size is marked on sacred buildings, and of a smaller size on the street-door of ordinary habitations. The mark on forehead is put on after ablution in a sacred tank ; with the use of invocations and anganyausam or finger signs in the case of Bramins [q.v.]. See vol. I (85). Naumam also stands for the clay used for the above purpose [matam]. Plant first term as being striped ; ex., Hemidesmus indicus (námadabéru), striped creeper. For Sheiva marks see Tilacam, Tripoondram, Vibhooty.——*Namcull* (நாமக்கல் - námakkal, Tam.). See sep. title.——*Naumadhaury* (నామధారి - námadhári, Tel.). From (above + dhri, san. to wear). General name for non-braminical Veishnavas.

NAUN (نان - nán, *Hind.*). Bread ; pension. Nauncaur, from (kár, pers. business), is subsistence allowance [malikhana]. Naun parvarish, from (parvarish, pers. protection), is maintenance allowance to a child.——*Nankah* (نانخواه - nánkháh, Pers.). From (nán, pers. bread + kháh, pers. demanding) ; appetiser. Same as Ajwaun.

NAUNAL (काश - kásha, *San.*; खंगर - khangara, *Mahr.*; کاگرا - kágará, *Hind.*; ಹೊಡಕೆಹುಲ್ಲು - hodakehullu, *Can.*; కాకివెదురు - kákiveduru, *Tel.*; ഞാങ്ങണ - ñánnana, *Mal.*; நாணல் - nánal, *Tam.*). Title from tamul. San. from (kásh, san. to shine) ; from silvery racemes of flowers. Mahr. and hind. from (khaggara, san. the plant). Can. from (hodaku, can. to destroy + hullu, can. grass). Tel. from (káki, tel. crow + veduru, tel. bamboo, bambusa arundinaceæ, willd.) ; inferior bamboo. Mal. from (náya, mal. dog + kana, mal. bamboo, bambusa arundinaceæ, willd.). Tam. from (nán, tam. bashfulness) ; from drooping head. San. also (khaggara), applies to the large var. ; (ikshugandhá), meaning smelling like sugar-cane [nerinjy, neermoolly]. Hind. also (kás), from sanscrit. Can. also (darbhe) [darbhay]. Tel. also (rellu) ; (billugaddi) ; (verricheruku), meaning mad + sugar-cane, saccharum officinarum, linn. Tam. also (korukkai), from crackling sound ; (péykkarumbu), meaning devil's sugar-cane ; (eruvai), meaning buffalo reed. Title otherwise Buffalo reed, Crow bamboo, Dog bamboo, Thatch grass [darbhay], Wild sugar-cane. Botanically Saccharum [sharam] spontaneum, linn., graminaceæ [vricsham, 156]. Root perennial ; culms annual, erect, leafy, round ; leaves sheathing, remarkably long and narrow, margins hispid ; mouths of the sheaths woolly ; panicles terminal, spreading, erect, 1–2 feet long, composed of verticelled, filiform, simple ramifications, except the lower verticel or two, spiked as racemes ; flowers paired, one-pedicelled and the other sessile ; calyx two-leaved, margins ciliate, surrounded with soft silvery hairs ; corolla one-valved, ciliate, membranaceous ; stigma feathery, purple. A very tough grass ; grows on the banks of rivers, in hedges, and on moist uncultivated lands ; the immense quantity of long bright silver-colored wool which surrounds the base of the flowers gives it a conspicuous appearance ; the poets say that it gives a plain at a distance the appearance of a broad river. Eaten by buffaloes [khoolgah] ; village cattle take to it during seasons of scarcity. The culm is made into rafts for passing rivers ; also much used for thatching ; some of the larger stalks are occasionally used as pens for writing. Compare Moonshee grass.——*Large naunal* (नल - nala, San. ; نال - nál, Hind. ; برو - barú, Dec. ; ಹುಳುಗಿಲಹುಲ್ಲು - hulugilahullu, Can. ; పెద్దరెల్లు - peddarellu, Tel. ; ഞാങ്ങണ - ñánnana, Mal. ; பெருநாணல் - perunánal, Tam.). San. from (nal, san. to shine). Hind. from sanscrit. Dec. from sanscrit. Can. from (hulu, can. insect + gili, can. fear + hullu, can. grass). Tel. from (pedda, tel. large + rellu, tel. reed). Mal. from (náya, mal. dog + kana, mal. bamboo, bambusa arundinaceæ, willd.). Tam. from (perumai, tam. greatness + nánal, tam. reed, saccharum spontaneum, linn.). San. also (dhamana), meaning blowing ; (nada), meaning sounding ; (pótagala), meaning clasped to the mouth and made to move. Hind. also (durma). Can. also (hulugalagu) ; (hulugilu). Tel. also (puvvuguttigaddi), meaning flower + cluster + grass ; (nágasaramuchettu), meaning musical instrument + plant ; (kikkasagaddi), meaning dense grass ; from thick growth. Title otherwise Baroo, Dog bamboo, Naugaswaram [q.v.]. Botanically Phragmites roxburghii, kunth., graminaceæ [vricsham, 156]. Alias Amphidonax karka ; Arundo karka. Reed ; culms erect, 8–12 feet, round, smooth, covered with the sheaths of the leaves ; leaves approximate, ensiform, smooth ; mouths of the sheaths bearded ; panicles erect, oblong, composed of many filiform, sub-verticelled ramifications, bowing to the wind ; rachis of the branches angular and hispid ; florets alternate ; calyx three to five-flowered ; glumes unequal. From the split stalks are made the common durma mats of bengal ; the fibres also are made into ropes ; pipes [pillangrovy] are made of the culms, by people carrying about dancing snakes [sarpam] ; the stalks in bulk are a common dunnage for ships and boats. No other common species here.

NAUNJIL (நாஞ்சில் - náñjil, *Tam.*). From (ñengu, corr. for ñemungu, tam. to sink + kól, tam. stick) ; grooving or furrowing instrument. Plough.——*Naunjinaud* (നാഞ്ചനാട് - náñchanátu, Mal.). From (náñjil, tam. plough + nádu, tam. country). Tamul portion of South travancore, lying south-west of Tinnevelly and north-west of Cape comorin.

NAUNYAM (नाणक - nánaka, *San.*; நாணயம் - nánayam, *Tam.*). From (nah, san. to bend) ; impressed metal. Coinage. That is to say pieces of metal, mostly of a round, and flat shape stamped by authority with certain impressions, which give them a legal and current value, and also serve as a guarantee for their weight aud fineness ; of gold [pon], silver [velly], and copper [taumram]. In each there is a certain proportion between the quantity of pure metal and its alloy. The alloy of silver is mostly copper and that of gold, both silver and copper. In the computation of coins, the alloy is never reckoned of any value. Besides the standard fineness [carat] of coins, there is also a standard weight fixed for them.——**(1)** There is a rough history of coinage in S. india at vol. I, 615 ; the following is more detailed.—"*a*" Punch coins, or irregularly-shaped pieces of metal stamped with rude symbols, preceded die coins in this as in other countries ; known to sanscrit writers as Pooraunams, meaning ancient ; also called Chaupahs or punches. The oldest form of a copper coin observed is a round ingot or spherule, somewhat depressed by the impact of an obscure sign above, with an occasional mark of the anvil or support beneath. Silver punch-coins have been found in the Paundicoozhies [q.v.], but are foreign coins placed there for their special value ; silver is quite a foreign metal in S. india.—"*b*" Along the Coromandel coast [q.v.], a class of thin copper die-struck coins are found as antiquities. They are found in considerable numbers in or near dunes and sandknolls in the vicinity of the cooppams [q.v.] or fishing hamlets that stud the shore. These are collected by the wives and children of the fishermen after gales of wind or heavy rains, and purchased from them by the itinerant Lubbays [q.v.] and Marcauyar [q.v.] in exchange for useful necessaries ; and by these they are sold to braziers and coppersmiths [cunnaun]. Indicate considerable maritime trade in former times. They bear generally the device of a bull, with occasionally some letters in the cave character on the obverse ; and on the reverse a tree, ship, star, crab, fish, &c. A few specimens are between the size of a six pence and a shilling, rather thicker, of some white metal containing tin [tagaram] ; and bear on the obverse, some the figure of a bull, others of horse, of the same elegant design as those of the copper. These early die-struck coins belonged to either the Coorumbar [q.v.] or the Pullavas [q.v.].—"*c*" The most distinctive coin-devices of the three great Dravidian early dynasties [raj] are as on their flags ; Paundyans [q.v.] a fish, Cholans [q.v.] a tiger, Cherans [q.v.] a bow. The Paundyan fish appears sometimes singly in the centre of a coin with a sun and moon in the field, while in others two fish are represented with either a sceptre or inscription between. Sometimes the fish appears crossed, and in later issues it occupies the exergum, with a dancing figure of Vishnoo [q.v.] or Garoodan [q.v.] in the field. Paundyan issues usually bear an inscription, but rarely decipherable. Commonest name is Soondra paundyan. Other names are Korkay andaun, Coolashekharan, Veera paundyan, Bhootaulan, Samara colauhalan, Cunchy vazhangoom permaul or the king who gave back Conjeeveram, &c. Another type round Madura

bears the lingam [q.v.] on one side, sometimes plain, sometimes surrounded by a row of dots, which may be intended to represent a wreath of flowers; and sometimes in a vimaunam [q.v.] or shrine; while the reverse has two standing figures. At other times the lingam appears on the back of a bull; and occasionally on a bird, possibly in connection with Meenautchy [q.v.], Shiva's wife. The Naicks [q.v.] followed the two fish and sceptre device of the Paundyans. Cholan coins are often distinguishable by the rude figure of a man standing upright, with head thrown back, and apparently holding in front of his face a flower. In his pendant right arm he holds a weapon. A straight line between his legs, and a waving one on either side, mark his flowing cloth, and under his left arm usually appear five dots. The reverse bears a similar figure curled up with legs crossed, his right hand resting on his right leg. This figure is technically called the raucshasan. Beneath the left arm is usually found the name of the king, or rarely some other emblem, such as the Paundyan fish. Cholan type issues in bolder relief, the letters being in a squarer type of Nagry [q.v.], were struck by the kings of Ceylon; known as Lunkeshwaran. The Cheran type shows on one side the Cataury or native long-handled dagger, and on the other the bow. These coins are thin and in appearance not unlike those of the Coorumbas.—"*d*" The early coins of the Andhra [q.v.] monetary system in the north differ from those in the more southern districts. The prevailing metal there is lead [eeyam]. A few occur of copper [taumram], and some of alloy of copper [taumram] and tin [tagaram], but none of gold [pon] or silver [velly]. The lead is generally very pure. They are stamped with symbols of a Booddhist [booddha] character. The obverse has figures of a lion [simham] or horse [ghorah] with the name of the sovereign, but never his effigy. The reverse has often the Booddhist cross or wheel, to which the name of Oojjein symbol has sometimes been given. The pieces vary greatly in size; they are generally round, sometimes square. Some are only struck on one side, the reverse being plain or exhibiting marks of the substance on which they had rested, wood or stone, to receive the impact of the upper die. Many of the smaller pieces appear to have been cast in moulds, with the figure of an elephant rudely represented by three convexities with or without legs. On some specimens, the elephant [q.v.] is sharp and symmetrical, facing mostly to the right, the trunk pendant or raised over the head. On the larger lead pieces is a stately maneless lion, the reverse with Booddhist emblems, or plain; while on the thicker alloyed specimens the animal has an ample mane, is short-legged, one paw uplifted, and on the reverse a vase, the Dronam, between two candelabra.—"*e*" The Vijianugger copper issues bear the figure of some deity, while the reverses vary. Those of Deva royel bear with his name the figure of a bull [rishabham] or elephant [q.v.], or the Ganda bheroondam [q.v.] or double-headed bird familiar on palampores [q.v.] and tapestries. Tirmala has on the obverse of his pieces Hanooman [q.v.]. Krishna devan takes Garoodan [q.v.].—"*f*" The oldest specimens of die-struck gold coinage are spherules quite plain and smooth, save for a single very minute punch mark too small to be identified, by the impress of which they have been slightly flattened. They weigh about fifty-two grains. Their original name being pon [q.v.], which simply means gold in Tamul, becoming honn in Canarese, and the origin of the Mahomedan hoon [q.v.]. The second step in advance from the primitive form of gold coinage is that of very thin, almost circular pieces, nearly an inch and-a-half in diameter, weighing about sixty-six grains. These were succeeded by flat, round, thicker pieces of superior workmanship, which have received the name of Pudma tunkams [q.v.], from having what is called a lotus [nelumbo] in the centre, a favorite emblem amongst the Jeinas [q.v.]. These are from fifty-five to sixty-five, or even seventy grains. The superior execution of the Pudma tunkams ruled for a considerable time with many variations, until the adoption of the double die led to the final and complete disuse of the punch. The earliest design on the reverses of these coins is that of an elegant floral or arabesque pattern. It is found on the Chalookya, Cheran, &c., coins. Next after the Pudma tunkam is a gold piece with four transverse horizontal bars, two and two, in contact with each other, and between the pairs a considerable space, in which are four smaller vertical bars curved at the bottom, and some indistinct marks above and below the tranverse bars. The reverse is not figured, and may therefore be considered to have been plain. The last to be noticed is a gold pagoda [q.v.] with perfect obverse and reverse. The figure on the obverse may be described as a heart-shaped symbol, from the upper lobes of which two-pointed lines rise, often truncated by the margin, and between them a dot; sometimes to the left of these are another dot and a curved line. The figure on the reverse resembles a flat dish in which are two rounded forms like balls. Gradually the gold coinage came to exhibit more definite devices, with the legends in Haleycannada [q.v.] or old Canarese [q.v.] and Nagry [q.v.] characters. The coins themselves became narrower and thicker, but without any alteration of the standard weight, and this continued to be the prevailing character down to 1833. They were also coined in halves under various names, as prataupa, mauda, &c., having the same device as the full-sized piece.—"*g*" Antique die-struck pieces of silver are rarely to be met with. The absence of all mention of silver money is conspicuous in the narratives of the plunder of the Deccan [q.v.]. The currency continued to be mainly of gold until the Mahomedans came to be permanently established in the south. Their preference for the rupee [q.v.] led to the introduction of a silver currency, without however displacing the gold previously in circulation. The substitution of silver money increased with the intercourse of European traders. Single and double silver fanams [q.v.] were coined at the different factories of the English, French, and Danish settlements; the French distinguished by the fleur-de-lis, and afterwards by a cock; the Danish by the cipher of King Christian. The same practice was adopted in Mysore after the fall of Seringapatam, and the Travancore state issues large numbers of silver chuckrams [q.v.] to the present day. In the English factory at Madras, in 1811, a silver pagoda coin was introduced about the size of a half-crown, having a rude representation of a goddess on the obverse, and the gate tower, or gopooram [q.v.] of a temple [coil, pagoda], on the reverse, with the monetary designation of the piece in English, Tamul, and Teloogoo characters. At the same time the authorities issued a large supply of single and double, half and quarter rupees, and silver fanams of an improved form, in pieces of one, two, three, four, five fanams; the silver rupee of 180 grains being convertible at the rate of 350 rupees for 100 pagodas of account.—"*h*" During the two past centuries many zemindars [q.v.], poligars [q.v.] and district chiefs, taking advantage of the weakness of the paramount power, assumed the right of issuing money coined by themselves. Such were the rajahs of Sunda, the Beedar chiefs of Shorapore and Bednore or Nugger, the Reddies [q.v.] of Condaveed, the Poligars [q.v.] of the Ceded districts [q.v.], the zemindars [q.v.] of Ramnaud and Shivagunga, the nawaubs [q.v.] of Savanore, Jinjee, and Cuddapah, the naicks [q.v.] of Tanjore, Trichinopoly, and Madura, &c. Hence an endless variety of copper coins is still met with in the bazaar.—"*i*" After the introduction of his new system of dates, Tippoo invented a series of new names; for his gold mohur [q.v.] is called Ahmedy [q.v.], his half gold mohur Siddeeky [q.v.], his pagoda Farooky [q.v.]. His silver coins are the double rupee or Imaumy, the half rupee or Aubidy, the quarter rupee or Baukiry, the two-anna piece or Jaffery, the one-anna piece or Cauzimy, and the half-anna piece or Khizry. Among the silver coins each refers to name of one of the Imaums [q.v.]. The Aubidy after Zein ool abideen or Aubid i beemaur; the Baukiry after Mahomed, Baukir; the Jaffery after Jaffer i saudik; and the Cauzimy after Moosah cauzim. The gold coins refer to Mahomedan saints. The Ahmedy is from Ahmed, one of the designations of the prophet himself; Siddeeky from Aboo bakr siddeek, the first caliph; and the Farooky from Omar farook, the second caliph. The largest of Tippoo's copper coins is the double peisa [q.v.]. It bears two names Oosmauny and Mooshtary. The first derived from Oosmaun bin affaun, the third caliph [q.v.]. When in the Mowloody year 1221 Tippoo started a series of names for his smaller copper coins, derived from those of different stars, the designation Oosmauny did not agree with the rest. Accordingly the double peisas of Mowloody year 1222 and following bear denomination, Mooshtary, the Arabic name of the planet Jupiter [brihaspaty, najm]. The name of the peisa is zohrah and that of the half-peisa bahraum. These are the Persian designations of the planets Venus [shoocran] and Mars [coojan, mungalan]. The quarter peisa is known as Akhtar, which in Persian signifies a star. The Nawaubs [q.v.] of the Carnatic [q.v.] had gold and copper issues struck in Arcot. Mussalman coins have clear cut impressions and legible superscriptions. Unlike coins of Hindoos, they bear a date.—"*j*" The Portuguese issued money in gold [pon], silver [velly], copper [taumram], and tootnaug [q.v.], in Goa and Cochin. A new stamp usually marking the rule of each successive governor. In no instance do Indo-portuguese coins bear any word in a native language. The following are the relative values of the various Portuguese coins that have found currency in India :—

30	Reis	= 1 Meia tanga.
60	Reis	= 1 Tanga.
$2\frac{1}{2}$	Tangas	= 1 Meia pardao.
2	Meia pardaos	= 1 Pardao.
2	Pardaos	= 1 Rupia.

The Venetian sequin, the Shaunaur [q.v.] cash [q.v.] of the natives, was current in Goa and neighbouring parts; a thin gold coin. The issues of the Danish mint at Tranquebar consisted chiefly of four-cash pieces in copper and far more rarely of ten cash in silver and copper. All bear on one side the monogram of the reigning monarch. French coins struck locally are comparatively few; on obverse either the cock or fleur-de-lis, on the reverse date. The Dutch quarter stiver, known as duits, or challies, are met with in great quantities. Contemporaneous with these is a series of thick and roughly-formed medals, with letters to denote town of mintage. The former were made in a European mint, while the latter were country-made.—"*k*" There are Mahomedan coins of the different dynasties [raj], Arabic, Persian, Pataun, Moghul, &c., and sometimes of the Caliphs who reigned previously to the first Mahomedan invasion. They are distinguished by inscriptions in Arabic or Persian, and few of them, except the zodiacal coins, have figures of any living creature. They are either round or square. Ancient Persian or Parthian coins, with inscriptions in the Pahlava character, and sometimes in Greek are now and then found and generally represent the fire worship on one side. Chinese coins are found on the coast. Roman aurei have been unearthed in a perfect

state of preservation. Some small Roman copper pieces are said to have been struck locally, but this is doubtful. Commonest type of reverses in these bears the figures of three Roman soldiers standing and holding spears in their hands.—"*l*" The indigenous monetary system of Southern india is based on rude seminal and testaceous exponents of value, which have been exchanged for definite metallic counters, regulated by artificial skill, their original names and the numerous changes and variations in which exhibit a certain affinity, indicative of their common origin; but the discrepancies are common throughout, the simple word being all that can be identified as having survived the changes of system. While the Moghul power prevailed the monetary system was very simple. There was current one principal coin of silver, denominated the sicca rupee. It was of a certain weight called the sicca [q.v.], which served also as a standard for weighing other articles. There were gold coins minted, but their price was not fixed, silver being the only standard of value. The principal piece of gold was the mohur; it was of the same weight as the sicca rupee, and both are supposed to have been originally coined without any alloy.—"*m*" The East india company kept as near to this method as the necessary firmness of coin allowed. According to the system in S. india at the early part of British administration, accounts were kept in star pagodas [q.v.], fanams [q.v.], and cash [q.v.]; 80 cash equal to 1 fanam, and 42 fanams equal to 1 pagoda. The East india company and other European merchants kept their accounts at 12 fanams the rupee, and 42 fanams or 3½ rupees the star pagoda; but the natives reckoned the rupee at 12 fanams 60 cash, and the star pagoda at 44 fanams 50 cash. The bazaar exchange fluctuated from 35 to 45 fanams. The gold coins were star or current pagodas, and the silver coins Arcot rupees. Double and single fanams [q.v.] and copper pieces of 20 cash [q.v.], called pie [q.v.], were current; also pieces of 10 and 5 cash, called doody [q.v.] and half doody; and single cash pieces. These copper coins were struck in England, and the value was marked upon each. The star pagoda weighed 52·56 English grains, and the gold was 19½ carats fine; it contained, therefore, 42·048 grains of fine gold, and was worth 7s. 5¼d. sterling; but it was commonly valued at 8s. The Arcot rupee, which was also coined at the Fort st. george mint, weighed 176·4 grains and contained 166·477 grains of fine silver; its sterling value was, therefore, 23¼d. It was divided into 16 annas or 192 pies like the other rupees. Many other coins then circulated on the Coromandel coast [q.v.], of which the following were the most generally current:—The old pagoda, with three sawmy [q.v.] or figures, coined at Madras and Negapatam, which was about 20⅞ carats [q.v.] fine, and which generally bore a batta [q.v.] of 10 per cent. against the new coins of the same places. The new pagoda of Negapatam and Tuticorin which was 18¼ carats fine and was reckoned about 4 per cent. worse than the star pagoda. The Porto novo pagoda, which was 17¾ carats fine, and was about 20 per cent. worse than the star pagoda. The Pondicherry pagoda, which was originally equal in value to the star pagoda, but its standard was lowered to 17 carats and even less. All these different pagodas were nearly of the same weight.—"*n*" In 1811 a coinage from Spanish dollars took place, consisting of double rupees, single rupees, halves and quarters, and pieces of 1, 2, 3, and 5 fanams. One rupee weighed 186·70 grains troy and contained 166·477 grains pure silver, which was the same quantity as was contained in the Arcot rupee. It was therefore worth 23·247d. sterling. A silver coinage of half and quarter pagodas, of dollar silver fineness, also took place then. The silver half-pagoda weighed 326·73 grains troy and was equal to 1¾ Arcot rupee.—"*o*" By a proclamation, dated 7th January 1818, the silver rupee was made to constitute the standard coin of this presidency. The public accounts were in consequence converted from the star pagoda into the Madras rupee at the exchange of 350 rupees for 100 pagodas, and all engagements of the Government became negotiable in the same rupees. The new coinage of silver consisted of rupees weighing 7½ dwts. and 11/12 fine. Thus the rupee contained 165 grains of pure silver and 15 grains of alloy, making together 180 grains, with half rupees, quarters, eighths, and sixteenths in proportion. The sixteenth was the anna, and the eighth, the double anna. The new coinage of gold consisted of rupees, halves, and quarters of the same weight and fineness as the silver rupee. Thus the former contained 165 grains of pure gold and 15 grains of alloy. The new gold rupee, valued at the mint price of gold in England, was worth £1 9s. 2·42d.; and the new silver rupee, valued at the old mint price of silver in England, was 1s. 11·04d.; but, as the fifteenth part of the gold rupee, it was worth 1s. 11·36d. The coinage of the pagoda was at this time discontinued. The charge for coining at the Madras mint was 3 per cent. for gold and 4 per cent. for silver, including the charge for refining.—**(2)** The following is an attempt to reduce to an average table and a standard value the modern but strictly native coins of the presidency, taking them under five divisions according to nationality of the populations using, and adding Sanscrit:—"*a*" Average table of money in Tamul districts:—2 cash or pies = 1 dooggauny or farthing, 2 dooggaunies = 1 doody, 3¾ doodies = 1 chinnapanam or single fanam, 2 chinnapanams = 1 panam or double fanam, 22½ panams = 1 varauhan or star pagoda. Extras:—5 chinnacash = 1 cash, 2 cash = 1 doody. Approximate actual value:—1 panam = 2 annas 6 pies.—"*b*" Average table of money in Teloogoo districts:—2 roowas or pies = 1 dooggauny or farthing, 2 dooggaunies = 1 dub, 6 dubs = 1 baida, 2 baidas = 1 doogoolam, 2 doogoolams = 1 chowlam, 4 chowlams = 1 mauda, 2 maudas = 1 kurruck varahah. Approximate actual value:—1 varahah = 4 rupees.—"*c*" Average table of Canarese money:—2 cash or pies = 1 dooggauny or farthing, 2 dooggaunies = 1 doody, 3 doodies = 1 hauga, 2 haugas = 1 adda, 2 addas = 1 caul. Extras:—3 haugas = 1 mooppauga. Approximate actual value:—1 dooggauny or farthing = 2 pies.—"*d*" Average table of money of Malabar:—2 reis = 1 cash or pie, 4 cash = 1 peisa, 14 peisa = 1 veeroye fanam, 3½ veeroye fanams = 1 rupee. Extras:—10 peisa = 1 velly, 5 vellies = 1 rupee. Cochin state:—10 cash = 1 poottan, 5½ poottans = 1 veeroye fanam, 3½ veeroye fanams = 1 rupee. Extras:—2 poottans = 1 retta poottan. Travancore state:—16 cochin cash = 1 chuckram, 4 chuckrams = 1 caly fanam, 2 caly fanams = 1 anandrye fanam, 3½ anandrye fanams = 1 rupee.—"*e*" Average table of Mahomedan money:—12 damrees or pies = 1 anna, 16 annas = 1 rupee, 3½ rupees = 1 hoon or pagoda. Extras:—1 adhelah = 1, 2, 3 or 4 damrees or pies; 4 damries or pies = 1 peisa or pice; 4 annas = 1 powlah; 16 rupees = 1 ashrafee.—"*f*" Average table of Sanscrit money:—16 panams = 1 dharanam or pagoda, 16 dharanams = 1 nishcam. Approximate actual value:—1 dharanam = 3½ rupees.—**(3)** The following is the recognized table under the English administration:—

12 pies = 1 anna.
16 annas = 1 rupee.
3½ rupees = 1 pagoda.
15 rupees = 1 gold mohur.

A lakh [q.v.] of rupees is 100,000; a crore [q.v.] of rupees 100 lakhs, or 10 millions. Taking the rupee [q.v.] at 2 shillings, an anna will be equal to one and half pence, a pie to half farthing. —**(4)** The heads of this glossary can be consulted for the different terms for money and coins.

NAUR (तन्तु - tantu, *San.*; نار - nár, *Hind.*; ನಾರು - náru, *Can.*; నార - nára, *Tel.*; நார் - nár, *Tam.*). Fibre of any sort. Especially the hempen fibres of various plants. Vegetable fibres are used:—in making ropes, cables and strings, which require strong fibres, capable of flexibility; in making yarns finer than ropes or strings, which should possess the spinning quality or a glossy surface to slide smoothly, parallelism of the fibres being necessary; in making paper, which is produced by felting together, while they are in a wet state, fibres generally very thin and short, and having a curly disposition, so that they become entangled. Fibres produced by dicotyledons are contained in the bark; chief orders are:—linaceæ, malvaceæ, tiliaceæ, leguminosæ, urticaceæ, cannabinaceæ, moraceæ, thymelaceæ, salicaceæ. Fibres produced by the monocotyledons are generally contained in the leaves; chief orders are:—graminaceæ, bromeliaceæ, liliaceæ, juncaceæ, amaryllidaceæ, musaceæ, palmaceæ. Third sort of fibres found are hairs that surround the seed; cotton [q.v.] is the most remarkable of this class. Fibrous plants abound in every hedge row and waste place in the presidency, and many of them contain fibre in large quantity and of excellent quality. Palms [taur] yield strong materials for cordage and mats [boriyah], or bast. Coarse strong fibres are given by plants of the aloe [q.v.] tribe. Those of the American aloe [q.v.] vary from 3–4 feet; of the Fourcroya [foreign aloe], from 6–9 feet; and of Agave vivipara, linn. [bastard aloe], from 3–5 feet. Their thickness is about that of stout pack thread, and they are nearly white and possess considerable strength, but a little stiffness. The fibres of the Yuccas [adam's needle] are much shorter, varying from 1–2 feet; they are however more pliant and finer, resembling human hair. Nearly allied to the aloes and yielding a fibre are many species of Musa [plantain]. For flax see under Linum usitatissimum, linn. [alsee]. For hemp see Cannabis sativa, linn. [kinnab], and Crotolaria juncea, linn. [sunn]. For jute see that head. Besides these there are many miscellaneous. The large hill-nettles give fibre. Jungle tribes make fibres from various barks. The obstacle to the utilisation of this source of wealth has been the want of a simple and efficient means of extracting the fibre, so as to admit of its being sold at a cheap rate while not impairing its quality. The native method of preparing fibre is by maceration in water and beating and scraping; a process slow, expensive, and prejudicial to the quality of the product. The following are two key-lists of the principal indigenous fibres of s. india for which vernacular names are known; further information must be traced in the glossary paragraphs through the small type cross-references at end of this volume; see also vricsham, 7, for the method of expressing this and other products of the plants in the dravidian languages.—"*a*" Abutilon indicum, indian mallow, stem; Acacia arabica, babool, bark; Acacia latronum, buffalo thorn, bark; Acacia leucophlœa, white babool, bark; Adansonia digitata, baobab, bark; Æschynomene aspera, solah, outer bark; Agave americana, american aloe, leaf; Agave vivipara, bastard aloe, leaf; Aloe indica, common indian aloe, leaf; Aloe vulgaris, barbadoes aloe, leaf; Althæa rosea, english hollyhock, stem; Ananas sativus, pine-apple, leaf; Andropogon contortus, spear grass, leaf; Andropogon muricatus, cuscus, leaf; Andropogon schœnanthus, lemon grass, leaf; Anona reticulata, bullock's heart, bark; Antiaris saccidora, sack tree, bark;

Antidesma bunius, chinese laurel, bark; Antidesma ghæsembilla, var. genuinum, gasambilla, bark; Areca catechu, areca, leaf and spathe; Arenga saccharifera, sago palm, fibre round petioles; Artocarpus integrifolia, bread-fruit, bark; Bambusa arundinacea, common bamboo, stem; Bambusa stricta, male bamboo, stem; Bauhinia purpurea, purple mountain ebony, bark; Bauhinia racemosa, small-flowered mountain ebony, bark; Bauhinia tomentosa, wild mountain ebony, bark of small branches; Bauhinia vahlii, large mountain ebony, bark; Bixa orellana, monkey turmeric, bark; Bombax malabaricum, red cotton tree, inner bark; Borassus flabelliformis, palmyra, leaf; Butea frondosa, bengal kino, inner root bark; Calamus rotang, country rattan, stem; Calotropis gigantea, mudar, bark; Cannabis sativa, indian hemp, stem; Careya arborea, hindostany slow match, bark; Caryota urens, bastard sago palm, sheathing petiole; Cerbera odollam, odallam, bark; Cocos nucifera, cocoanut, fibre covering nut; Corchorus capsularis, jute, bark; Corchorus olitorius, wild jute, bark; Cordia myxa, small sebesten, bark; Cordia obliqua, large sebesten, bark; Cordia rothii, narrow-leaved sebesten, inner bark; Corypha taliera, talura palm, leaf; Corypha umbraculifera, talipot, leaf; Crotalaria juncea, sunn, bark; Crotalaria retusa, short giligitcha, bark; Cryptostegia grandiflora, paulay silk cotton, bark; Cyperus corymbosus, indian matting sedge; Cyperus exaltatus, fox-tail sedge, leaf; Cyperus iria, tail sedge, leaf; Dæmia extensa, hedge cotton, stem; Dolichandrone falcata, wody; Dolichandrone rheedii, long-leaved wody, branches and roots; Dregea volubilis, nakchiknee silk cotton; Epicarpurus orientalis, stunted jack, stem; Eragrostis cynosurioides, darbhay, leaf; Eriodendron anfractuosum, silk cotton, wool of fruit; Erythrina indica, common coral tree, bark; Eucalyptus globulus, blue gum, bark; Ficus bengalensis, banyan, bark; Ficus infectoria, stone banyan, bark; Ficus oppositifolia, devil fig, bark; Ficus racemosa, country fig, bark; Ficus religiosa peepul, bark; Ficus tsiela, tsiela, bark; Fourcroya gigantea, great aloe, leaf; Girardina heterophylla, neilgherry nettle, bark; Gossypium barbadense, var. acuminatum, peruvian cotton, wool of fruit; Gossypium herbaceum, indian cotton, wool of fruit; Grewia asiatica, falsah, bark; Grewia excelsa, small tadda, bark; Grewia tiliæfolia, tadda, bark; Guazuma tomentosa, roodrauck tree, bark; Hardwickia binata, yaipy, bark; Helicteres isora, screw tree, bark; Hibiscus abelmoschus, musk bendy, stem; Hibiscus cannabinus, hemp bendy, stem; Hibiscus collinus, hill bendy, stem; Hibiscus esculentus, common bendy, stem; Hibiscus ficulneus, spreading bendy, stem; Hibiscus mutabilis, lotus bendy, bark; Hibiscus rosa-sinensis, china rose bendy, bark; Hibiscus sabdariffa, red hemp bendy, bark; Hibiscus tiliaceus, cork wood bendy, bark; Hibiscus vitifolius, vine-leafed bendy, bark; Linum usitatissimum, flax, bark; Maranta dichotoma, seetalpaty, stem; Melia azadirachta, margosa, bark; Moringa pterygosperma, indian horse radish, bark; Musa paradisiaca, plantain, sheathing foot-stalk; Musa superba, wild plantain, sheathing foot-stalk; Musa textilis, demon plantain, sheathing foot-stalk; Nelumbium speciosum, sacred lotus, stalk; Odina wodier, wodier, bark; Opuntia dillenii, prickly pear, stem; Pæderia fœtida, stinking opal berry, stalk; Pandanus odoratissimus, screw pine, leaf; Parkinsonia aculeata, jerusalem thorn; Pavonia odorata, peramootty, stem; Pavonia zeylanica, shittamootty, stem; Phœnix farinifera, small date; Phœnix sylvestris, wild date, leaflet and petiole; Phragmites roxburghii, large naunal, stalk; Pongamia glabra, indian beech; Saccharum munja, moonj, leaf; Saccharum sara, moonshee grass, leaf; Saccharum spontaneum, naunal, leaf; Salix tetrasperma, indian willow; Sanseviera roxburghiana, bowstring hemp, leaf; Sesbania aculeata, prickly sesban, bark; Sesbania ægyptiaca, common sesban, bark; Sesbania grandiflora, west-indian sesban, inner bark; Shorea robusta, common saul; Sida carpinifolia, lance-leaved balab, stem; Sida rhombifolia, common balah, bark; Sponia wightii, indian nettle, bark; Sterculia colorata, wild papaw, bark; Sterculia guttata, dung tree, bark; Sterculia urens, false tragacanth, liber; Sterculia villosa, odul, bark; Thespesia populnea, portia, bark; Tylophora asthmatica, indian ipecacuanha; Ventilago madraspatana, pappily, bark; Vernonia anthelmintica, wild cumin; Vitis quadrangularis, piranday, stem; Yucca aloifolia, adam's needle, leaf; Zea mays, maize, stalk.—"*b*" Adam's needle, yucca; Aloe, agave, fourcroya; Babool, acacia; Balah, sida; Bamboo, bambusa; Banyan, ficus; Baobab, adansonia; Beech, pongamia; Bendy, hibiscus; Blue gum, eucalyptus; Bread fruit, artocarpus; Bullock's heart, anona; Chinese laurel, antidesma; Cocoanut, cocos; Coral tree, erythrina; Cotton, dæmia, gossypium; Cumin, vernonia; Cuscus, andropogon; Darbhay, eragrostis; Date, phœnix; Dung tree, sterculia; Ebony, bauhinia; Falsah, grewia; Flax, linum; Gasambilla, antidesma; Giligitcha, crotalaria; Hemp, cannabis, sanseviera; Hollyhock, althæa; Horse radish, moringa; Ipecacuanha, tylophora; Jack, epicarpurus; Jerusalem thorn, parkinsonia; Jute, corchorus; Kino, butea; Lemon grass, andropogon; Lotus, nelumbium; Maize, zea; Mallow, abutilon; Margosa, melia; Moonj, saccharum; Moonshee grass, saccharum; Mudar, calotropis; Naunal, phragmites, saccharum; Nettle, girardina, sponia; Odallam, cerbera; Odul, sterculia; Opal berry, pæderia; Palmyra, borassus; Papaw, sterculia; Pappily, ventilago; Peepul, ficus; Peramootty, pavonia; Pine-apple, ananas; Piranday, vitis; Plantain, musa; Portia, thespesia; Prickly pear, opuntia; Rattan, calamus; Red cotton, bombax; Roodrauck, guazuma; Sack tree, antiaris; Sago palm, arenga, caryota; Saul, shorea; Screw pine, pandanus; Screw tree, helicteres; Sebesten, cordia; Sedge, cyperus; Seetalpaty, maranta; Sesban, sesbania; Shittamootty, pavonia; Silk cotton, cryptostegia, dregea, eriodendron; Slow match, careya; Solah, æschynomene; Spear grass, andropogon; Sunn, crotalaria; Tadda, grewia; Talipot, corypha; Talura, corypha; Thorn, acacia; Tragacanth, sterculia; Tsiela, ficus; Turmeric, bixa; Willow, salix; Wodier, odina; Wody, dolichandrone; Yaipy, hardwickia.——*Nauroo* (نارو - nárú, Hind.; ನಾರಿಹುಣ್ಣು - nárihunnu, Can.; నారిపుండు - náripundu, Tel.; നാഡീവ്രണം - nádívranam, Mal.; நரம்புச்சிலந்தி - narambuççilandi, Tam.). All mean fibre + sore. Guinea-worm. Average length 25 inches. Incubation after embryo has entered system about twelve months. The germ becomes deposited beneath the skin working its way into some sudoriparous duct; disease caught while standing or bathing in water [veidyan].

NAUS (नस्य - nasya, *San.*; ناس - nás, *Hind.*; ನಶಿಪುಡಿ - nashipudi, *Can.*; ముక్కుపొడి - mukkupodi, *Tel.*; മൂക്കുപ്പൊടി - múkkuppoti, *Mal.*; மூக்குத்தூள் - múkkuttúl, *Tam.*). Title from sanscrit through hindostany. San. means belonging to the nose. Tel., Mal., Tam. mean nose-powder. Tam. also (podi) meaning powder. Snuff. The pulverised leaves of tobacco [pogauk] ground down with ghee [q.v.] and prepared lime [choonam]. A famous snuff used to be made at Masulipatam. The native snuff-taker usually keeps his supply in a folded leaf. An ornamental snuff-box is made out of the shell of the fruit of Ægle marmelos, corr. [bael], with a hole in one end furnished with a stopper.

NAUSHTA (ناشتہ - náshtah, *Hind.*; నాస్త - násta, *Tel.*). From (noshídan, pers. to drink). Morning breakfast [khanah].

NAUSIR (ناصر - násir, *Ar.*). From (nasara, ar. to succour). Defender. Prefixed to an alam forms a lacab; as Nausir ood dowlah, defender of the empire [ism, noosrat].——*Naseer* (نصیر - nasír, Ar.). From (nasara, ar. to succour). Defender. Part of lacab; as Naseer ood deen, defender of religion [ism, noosrat].——*Nauzir jung* (ناصر جنگ - násirjang, Hind.). Descriptive + khitaub alaumat. Nizam of Hyderabad, 1748-50. Killed by Nawaub of Cuddapah. Vol. I (107), (122), 4, 9; II, 253.

NAUTAN (नाथ - nát'ha, *San.*; நாதன் - náthan, *Tam.*). From (nát'h, san. to have power). Lord [nayagan]. Epithet of the Supreme being, Shiva [q.v.] and Arghan [aroogan]; also applied to a sage or any worthy person. Suffix to names of god and men, as Raghoonautan, Sawminautan [peyar].

NAUTT (నాటు - nátu, *Tel.*; நாற்று - náttu, *Tam.*). Title and Tam. from (náru, tam. to shoot up). Tel. from (nátu, tel. to transplant). Plants thickly sown in a prepared seed-bed for the purpose of being transplanted.——*Nautmoody* (நாற்றுமுடி - náttumudi, Tam.). From (above + mudi, tam. to tie). A handful of plants tied in a bundle for transplanting. Otherwise moody [q.v.].——*Nauttangaul* (நாற்றங்கால் - náttangál, Tam.). From (above + kál, tam. place). Otherwise Nautt pathy or seedling bed. Plant nursery.——*Nautt nadavoo* (நாற்றுநடவு - náttunadavu, Tam.). From (above + natu, tam. to plant); to plant seedlings. Transplanting [paddy].

NAUZIM (ناظم - názim, *Hind.*). From (nazm, ar. order). A governor [nizam]. Part of lacab; as Nauzim jung, arranger in war [ism].

NAUZIR (ناظر - názir, *Hind.*). From (nazr, ar. sight). An inspector. Commonly the officer of a civil court, who is charged with the serving of process and the execution of decrees.

NAVAM (नव - nava, *San.*). Nine.——*Nava chola charitram* (నవచోళచరిత్రము - navachólacharitramu, Tel.). From (above + chóla, san. the king + charitra, san. story). Tale of the nine Cholas; translation from Canarese, into dwipada Teloogoo by Leela manoopa chetty, a Jangam [q.v.]. The names of the nine Cholas:—Caricaulan, Vicraman, Oottoongan, Ahivaran, Varan, Dharman, Satyendran, Veeran and Oottaman. The three first, and two last often occur in books and inscriptions.——*Nava dhaunyam* (నవధాన్యము - navadhányamu, Tel.). From (above + dhánya, san. grain). Nine grains proper to be presented with burnt offerings, oblations to gods or to nine planets [graham], one to each are:—wheat [geung], to sun [sooryan]; paddy [q.v.], to moon [chundran]; tovray [common dholl], to Mars [coojan, mungalan]; payar [green gram], to Mercury [boodhan]; cadalay [bengal gram], to Jupiter [brihaspaty]; avaray [country bean], to Venus [shoocran]; sesamum [gingelly], to Saturn [shany]; oolandoo [black gram], to Rahoo [q.v.]; horse-gram [gram] to Kait [q.v.].——*Nava graham* (नवग्रह - navagraha, San.). Nine planets. See Graham. Compare Najm.——*Nava khandam* (नवखण्ड - navakhanda, San.). From (above + khanda, san. portion). Nine-fold division of India. First actually described by astronomers Parausharan and Varanha mihiran [q.v.], but far older in reality. Nava khandam of Mahabhaurat [q.v.] will be found at vol. I (1), foot-note, para. 3. This was repeated by Bhascaracharry [q.v.], who was later than Varauha

mihiran, also by several Pooraunams [q.v.]. Nava khandam of Varauha mihiran was different, and will be found at vol. I (2), foot-note, para. 7. Only the Bramhaundam and Marcandeya pooraunams state the names of the districts in each of the nine divisions. The Vishnoo, Vayoo, and Matsya pooraunams agree with the Mahabhaurat [q.v.] in describing in detail only five divisions, namely the middle province and those of the four cardinal points [punchakhandam]. According to Hwen thsang's account, peninsular India was divided into nine separate kingdoms, exclusive of Ceylon, which was not considered as belonging to India [q.v.]. These kingdoms were Andhram, Calingam, Choolyam, Concanam, Cosalam, Dhanacataca, Dravidam, Maharashtram, and Malacoota. See those heads.——*Navamy* (नवमी - navamí, San.). The ninth lunar day [tity] of the Pacsham [q.v.]. Lunar festival [pundigay, 5e] [doorganavamy, mahanavamy, shreeram navamy].——*Nava narsimhan* (నవనరసింహుడు - navanarasimhudu, Tel.). From (above + narasimha, san. man-lion form of vishnu). Nine pagodas [q.v.] at Ahobalam.——*Nava naugam* (नवनाग - navanága, San.). From (above + nága, san. serpent). Nine serpents. See vol. I (82).——*Nava nauta siddhar* (நவநாதசித்தர் - navanáthasittar, Tam.). From (above + nát'ha, san. lord + siddha, san. saint). The nine lords [siddhan].——*Nava nidhy* (नवनिधि - navanidhi, San.). From (above + nidhi, san. treasure). Nine jewels held by Coobairan [q.v.], god of wealth. According to the tauntric system [tantram] these divine treasures are worshipped as demi-gods attendant either on coobairan the lord of Nidhies, or Lutchmy [q.v.] the goddess of prosperity. They are:—Pudmam or lotus-like, Maha pudmam or great lotus-like, Chunk or conch-like, Macaram or sword-fish-like, Cutchapam or tortoise-like, Moocoondam or quicksilver-like, Nundam or gem of felicity, Neelam or blue lotus-like, and Kharvam. Pudmam is gold in the form of lotus, and Chunk is gold in the form of conch. These two species of divine gold are held to possess life and yield whatever is desired. Compare the Nibelungs of the Teutons. ——*Nava ratnam* (नवरत्न - navaratna, San.; نورتن - nauratan, Hind.). From (above + ratna, san. gem). The nine gems [ratnam]; coral [moongah], diamond [vajram], emerald [zamarrood], gomaidam [cinnamon stone], lapislazuli [veidooryam], pearl [moty], ruby [laul], sapphire [neelam] and topaz [pookhrauj]. An ancient ornament; compare Urim and Thummim of Jews. The churning of the ocean [samoodram] produced nine gems according to shastrams [coormam]. The nine gems were also nine distinguished poets at the court of Vicramadityan [q.v.]. Their names are by tradition as follows:—Amarasimhan, Calidass, Cshapanacan, Dhanvantary, Ghatacarparan, Shankoo, Vararoochy, Varauha mihiran, Vetaula bhattan.——*Navarautry* (నవరాత్రి - navarátri, Tel.; நவராத்திரி - navaráttiri, Tam.). Means nine nights. Same as Dusserah.——*Nava shacty* (नवशक्ति - navashakti, San.). From (above + shakti, san. power). Nine faculties personified; epithet of Shiva [q.v.] or Vishnoo [q.v.]. The nine personified female energies are:—Bramhauny, of Bramha; Caurtiky, of Soobramanyan; Indrauny, of Indran; Mauheshwary, of Shiva, the great lord; Naurasimhy, of Vishnoo in man-lion form; Pradhaunay, of the first originant; Rowdry, of Roodran; Varauhy, of Vishnoo in the form of a boar; Veishnavy, of Vishnoo. Compare Sapta mautah.——*Navaunicam* (నవాణికము - navánikamu, Tel.). Means nine + daily observance. Any nine days' feast [pundigay, 6d]. Examples are Navarautry, Shreeramnavamy.——*Nawara* (നവര - navara, Mal.). From (navati, san. ninety); ninety-days paddy. A Malabar paddy [q.v.]. Sown in the month of Yedavam [mausam], May-June, and reaped in Carcatacam July-August. Rice light. Possesses medicinal properties. Carootta nawara is black; Nawara mookkony is three-cornered; Velootta nawara is white. Distinguish from Nivvary [q.v.].——*Nowtauk* (నవటాకు - navatáku, Tel.). From (nava, san. nine + táku, tel. notch); one of a nine-notched tally or $\frac{1}{9}$th.—"*a*" Measure of weight. 2 chittacks = 1 nowtauk; 8 nowtauks = 1 pucka seer [niray, 2e]. Approximate actual value, 1 nowtauk = 4 oz. $1\frac{1}{3}$ drs. avoirdupois. Ganjam and Vizagapatam.—"*b*" Measure of capacity. 2 chittacks = 1 nowtauk; 2 nowtauks = 1 pow [alavay, 3e]. Approximate actual value, 1 nowtauk = $8\frac{3}{4}$ cubic inches. Used where pucka seer is used. Compare olluck. See vol. I, 609.

NAVAUR (نوار - navár, *Hind.*). Strong office tape.

NAVEES (نويس - navís, *Hind.*). From (navishtan, pers. to write) [nasindah, nauma]. A writer, secretary.——*Badar naveesy* (بدر نويسى - badarnavísí, Hind.). From (badar, pers. outside + navísí, pers. writing). Writing off items of an account [hisaub, lekka].——*Hoolis navees* (هولس نويس - húlisnavís, Hind.). Official in Canara analogous to modern Revenue inspector.——*Jawaub navees* (جواب نويس - jawábnavís, Hind.). From (jawáb, ar. answer + above). A clerk [goomasta] who reads reports and petitions [arzee] and drafts replies.——*Nasindah* (نويسنده - navísindah, Hind.). From (navishtan, pers. to write) [nauma, navees]. An accountant.

NAVITEY (నవిటె - navite, *Tel.*).—"*a*" Measure of weight. 4 tooms = 1 navitey [niray, 2b]. Approximate actual value 1 navitey = 25 lbs. avoirdupois. Ganjam. Equal to 12 pucka seers of 80 tolahs each. Same as maund. Compare Toolaum.—"*b*" Measure of capacity. 4 tooms = 1 navitey; 5 naviteys = 1 pootty [alavay, 3b]. Approximate actual value, 1 navitey = 910 cubic inches. Ganjam. Compare Can. kulsy, Tel. cooncham of nellore, marcam of godavery, Mal. parrah.—"*c*" Superficial measure. Land requiring a navitey of seed. 20 naviteys = 1 bharnam [alavay, 2b]. Ganjam. As there are two bharnams wet and dry, so there are two naviteys. Compare puddy or nauzhy. See vol. I, 609; II, 510.

NAWAUZ (نواز - nawáz, *Hind.*). From (nawázídan, pers. to caress). Alam from the title of a saint; as Nawauz khan, alam + alaumat [ism].

NAYA (നായ - náya, *Mal.*). Dog [nye].——*Nayaudy* (നായാടി - náyáti, Mal.). From (above + ati, mal. to beat); hunters with dogs. The most degraded of Dravidian tribes, found scattered in jungles of Malabar. They are small in stature, of deep black color, and with hair bushy and curled. Not allowed to approach within 96 feet of Hindoos. They have neither homes nor implements; bushes afford them shelter and roots and proceeds of begging give food. There is a tradition that they are descendants of sons of Vasishtan [q.v.] cursed by Vishwamitran [q.v.] and this accounts for the Bramin [q.v.] names they bear. Numbers have become converts to Mahomedan faith [jauty]. ——*Nayautt* (നായാട്ട - náyáttu, Mal.). From (above + áttam, mal. play). Hunting with dogs.

NAZARETH (நாசரத்து - násarattu, *Tam.*). After the town in Palestine. Village; Tinnevelly dist., Tencaray tal.; pop. 3,849; acres 2,947; lat. 8° 34′; long. 78° 01′; from Shreeveicoontam S.E. 6 miles; from Tinnevelly E.S.E. 23 miles; from the sea W. 11 miles. Mission station.——*Nasrauny* (نصرانى - nasrání, Hind.; നസ്രാണി - nasráni, Mal.). From the word nazarene. Malabar syrian christians [syrian].

NEDOO (നെടു - nedu, *Mal.*). Long.——*Nediyiroopp* (നെടിയിരിപ്പ - netiyirippu, Mal.). From (above + iru, mal. to be). Prolonged existence. A place in Yernaud where the Zamorin's family once resided. The title of the Calicut or Zamorin [q.v.] dynasty [raj].——*Nediyone* (நெடியோன் - nediyón, Tam.). The tall one. Vishnoo [q.v.].——*Nedoom* (നെടും - netum, Mal.; நெடும் - nedum, Tam.). Long. Prefix in place names; as Nedoompalam, meaning long bridge.——*Nedoomaul* (நெடுமால் - nedumál, Tam.). From (mál, tam. vishnu). Same as Nediyone.——*Nedoomullay* (ನೀಡುಮಲೆ - nídumale, Can.). From (nídu, can. long + male, can. a hill). Can. also (himagala), meaning cold rock. Range of hills; Neilgherry district, Coondah and Todanaud divisions. One of three ranges into which the Neilgherries are popularly divided. A division of the Western ghauts which, after touching the coast line of Malabar, runs north and culminates in Neilgherry and Macoorty peaks. The Coondahs, another division, run south; and the central or principal range rises to the summit of Dodabetta.——*Nedootralpaud* (നെടുതറാല്പാടു - netutrálpátu, Mal.). From (above + tara, mal. village + pátu, mal. chief, title). The fifth prince of the Zamorin's family.——*Nidadvole* (నిడదవోలు - nidadavólu, Tel. nidadavólu *). From (niduda, tel. long + prólu, tel. town). Zemindarry, Village; Godavery dist., Tanookoo tal.; pop. of village 3,561; acres 6,761; lat. of village 16° 54′; long. 81° 43′; from Cocanada W.S.W. 37 miles; from Tanookoo N. 11 miles. For description of Zemindarry, see vol. I, 59. On the Ellore canal. Once the capital of the Puncha maha pautacas. Fort in the village constructed by Ibrahim shah of Golcondah as a protection to the Godavery frontier. Two old temples [coil]. Peshcush Rs. 1,15,050.

NEE (नी - ní, *San.*). To lead.——*Naick* (नायक - náyaka, San.; نايك - náyak, Hind.; నాయకుడు - náyakudu, Tel.; നായക്കൻ - náyakkan, Mal.; நாயக்கன் - náyakkan, Tam.). San. means a leader [naidoo]. In the army naick is a rank below havildar [q.v.] and equivalent to corporal. Naick is also another name for the Beydar caste. In poetry naick is the term for hero. In Southern india, the hereditary title of certain Teloogoo castes. In the early part of the sixteenth century, A.D. 1532, the great Hindoo state of Vijianugger established a Naick dynasty [raj], in the person of Vishwanauta naick, under its protection, at Madura. When the Vijianugger sovereignty fell, the Naick dynasty of Madura continued to be dominant. The founder of this dynasty, Vishwanautan, was the son of an officer of the king of Vijianugger. He established himself as king of Madura in 1559, and subjugated Trichinopoly soon afterwards. The greater portion of the fort of Trichinopoly and most of the city itself were built in his reign. The Naicks ruled Trichinopoly and Madura from 1559 to 1740. The greatest of them was the famous Trimal naick, who died in 1659. His grandson, Chokka naick, removed the capital of the kingdom from Madura to Trichinopoly, where he raised the building known as the Nawaub's palace. Its last ruler, a queen, was first aided and then betrayed by Chundah sahib of Tanjore. The ordinary name by which the Naick rulers of Madura are styled in the Tamul country is the Curtaukkal. See vol. I (122), (154); II, 250. Naickan in the Tamul country is a Hindoo third name; common among Vunniyar and

Pullies [peyar]. But more properly applied to Teloogoo shoodras, who have immigrated from the north; these are mostly clerks and farmers, but are also tradesmen, brokers, shopkeepers, and hawkers. In Malabar, Nayaka is the head of the village watch. ——*Naicknairy* (நாயக்கனேரி - náyakkanéri, Tam.). From (náyakkan, tam. title + éri, tam. tank). Village, Pass; North arcot dist., Pulmanair tal.; lat. 12° 57′; long. 78° 38′; from Chittore W.S.W. 39 miles; from Pulmanair S.S.W. 21 miles. Village at summit of pass, almost deserted. The trunk road to Bangalore used to pass up ghaut [q.v.] and on to Vencatagherrycottah, 10 miles to W. Chuttram [q.v.] in ruins. Upon N. hill stands old fort, Peddanayeny droog, stronghold of Poligar [q.v.] of Chauragal, a village to the south. He rebelled in 1794 but was taken prisoner and his fort dismantled. He escaped from prison, and joining the Chittore poligars in rebellion was seized and hanged. Upon a hill to the south are kistvaens [paundicoozhy].——*Naickvaudy* (నాయకవాడి - náyakavádi, Tel.). From (náyaka, san. leader + váda, tel. village). A peon attached to a village, a village watcher. The Taliyaur [q.v.] of Southern districts.——*Naidoo* (నాయడు - náyadu, Tel.). Contracted from (náyakudu, tel.). Tel. form of Naick.——*Naidoopett* (నాయడిపేట - náyadipéta, Tel. náyudupet *). From (náyadu, tel. naick + péta, tel. suburb); called after the naick or rajah of vencatagherry. Village, Head-quarters of Deputy collector; Nellore dist., Polore division of Vencatagherry zemindarry; pop. 2,621; lat. 13° 55′; long. 79° 56′; from Madras N.N.W. 64 miles; from Nellore S. 38 miles; from Ongle S. 111 miles; from Polore N.W. 16 miles; from Raupore S.E. 32 miles. On the right bank of the Swarnamookhy. A hamlet of Vinnamaula. Junction of roads from Madras, Nellore, Calastry, Vencatagherry and Kota. Travellers' bungalow [q.v.]. Well supplied with trees and topes [q.v.]. A spring channel [q.v.] flows through it from the river. Lac [q.v.] bangles [gauzoo] made here and exported to Madras. Also the Cooncoomam powder worn by native females on the forehead. Old temple, not of any importance. Head-quarters of the ameel [q.v.] of the Zemindar [q.v.] of Vencatagherry.——*Naraca chatoordashy* (నరకచతుర్దశి - narakachaturdashi, Tel.). Means the asooran, so called + fourteenth lunar day; because in commemoration of the defeat and death of Naracausooran by Krishnan [q.v.]. Same as Deepauvaly.——*Naracam* (नरक - naraka, San.). From (nara, san. man + kai, san. to cry); place of punishment for man. Hell [pautaulam].——*Naracan* (नरक - naraka, San.). A demon, better known as Naracausooran.——*Narahary* (ನರಹರಿ - narahari, Can.). From (nara, san. man + hari, san. lion); epithet of vishnoo, the man-lion god. Hindoo 2nd or pers. name [narsimhan, peyar]. Confined to Madhwas. ——*Naran* (नर - nara, San.). From (ní, san. to lead); leader or controller. Man, individually or generally. The divine imperishable spirit pervading the universe [poorsham]. Water as the first product of Naran. Narayanan is he who moves on the water, Vishnoo [q.v.].——*Nara narayanan* (नरनारायण - naranáráyana, San.). Incarnate Vishnoo, krishnan. Also a compound name meaning arjoonan [q.v.] and krishnan [q.v.], naran referring to arjoonan as the best of men.——*Naranayyan* (நாராணய்யன் - náranayyan, Tam.). From (náráyana, san. vishnu, the water wanderer + aiyyan, tam. master). Familiarly Naunoo, Nauny. Hindoo 2nd or pers. name [peyar].——*Narapaty* (నరపతి - narapati, Tel.). From (nara, san. man + pati, san. ruler). Ruler of men. Andhra kings of Telingana [q.v.] whose capital was Warangal. Said to have been subjugated by Krishna deva royel of Vijianugger.——*Narasa* (నరస - narasa, Tel.). Short for Narsimhan.——*Narayanan* (नारायण - náráyana, San.). From (nára, san. water + ayana, san. habitation). The divine spirit moving on the water. In the pure monotheistic system, the idea has a coincidence with Parabramh [q.v.] of the Oopanishads [q.v.]. In the pooranical statement Narayanan is represented as having been once reposing on the waters after the great deluge [pralayam], when a lotus [nelumbo] sprang from his navel, in which Bramha [q.v.] was born, and the latter proceeded to restore the creation [srishty]. Compare the expression in the Hebrew Genesis, that the spirit of god moved on the face of the waters. This title like Eeshwaran [q.v.] is claimed by the followers of the three principal deities. Vishnoo [q.v.] is however principally called Narayanan, in which character he is fabled to be sleeping on the serpent Sheshan [q.v.], or Anantan [q.v.], on the waters of eternity, and causing the creation of the world [srishty].——*Narayany* (नारायणी - náráyaní, San.). Lutchmy [q.v.], the wife of Vishnoo——*Narrain* (நாராயணன் - náráyanan, Tam.). Familiarly Naunoo, Nauny. Hindoo 2nd or pers. name [peyar]. Also as Narrainsawmy. ——*Narrainavaram* (నారాయణవరము - náráyanavaramu, Tel. náráyanavaram *). From (náráyana, san. vishnu, the mover on the waters + vana, san. forest). Sanscrit name (náráyanavana), means vishnoo forest.—"*a*" Sub-magistracy, Carvetnugger zemindarry, North arcot district. Pay Rs. 100.—"*b*" Village, Place of pilgrimage, River; Carvetnugger zemindarry; pop. 4,410; lat. 13° 26′; long. 79° 38′; from Arcot N.N.E. 40 miles; from Arnee N.N.E. 56 miles; from Carvetnugger E. 9 miles; from Chittore E.N.E. 37 miles; from Madras W.N.W. 52 miles; from Poottore E. 3 miles; from Ranipett N.N.E. 38 miles; from Tripatty S.E. 19 miles; from Vellore N.E. 46 miles. On the Arunuddy, at base of Nagary hills, in the gap through which the river flows to Naugalaupooram. Coorumbar [q.v.] strongholds. Inscriptions found of Chalookya [q.v.], Pullava [q.v.], and Chola [q.v.] dynasties [raj]. Three miles S. is site of ancient town Acasarauzpooram, in village of Kempoolapolliem. The length of the idol's foot in this village is the standard measurement of length in the zemindarry [q.v.]. Bramhotsavam [pundigay, 6a] in May. Fair every Wednesday. Cloths are woven.——*Narsammah* (నరసమ్మ - narasamma, Tel.). From (narasa, tel. man-lion vishnoo, proper name + amma, tel. mother). Hindoo female proper name. Familiarly shortened into Narsa and Narasoo and Nasy [peyar].——*Narsannapett* (నరసన్నపేట - narasannapéta, Tel. narsannapet *). From (narasanna, tel. proper name + péta, tel. suburb).—"*a*" Deputy tahsildarry, Ganjam district. Pay Rs. 70.—"*b*" Town, Deputy tahsildar's station; Ganjam dist., Chicacole tal.; pop. 5,821; acres 1,023; lat. 18° 24′; long. 84° 05′; from Balligooda S.S.E. 122 miles; from Berhampore S.W. 78 miles; from Chetterpore S.W. 90 miles; from Chicacole N.E. 12 miles; from Madras N.E. 440 miles; from Russellcondah S.S.W. 111 miles; from the sea W. 9 miles.——*Narsapatam* (నరసపట్టణము - narasapattanamu, Tel. narsapatnam *). From (narasimha, san. proper name + pattana, san. town), called after the founder. Town, Head-quarters of Principal assistant collector, Assistant superintendent of Police and Tahsildar; Vizagapatam dist., Golcondah tal.; pop. 5,279; acres 1,686; lat. 17° 40′; long. 82° 39′; from Coraputt S. 77 miles; from Madras N. 349 miles; from Parvatipore S.S.W. 91 miles; from Vizagapatam W. 44 miles; from Vizianagram W. 60 miles. Ruined mud fort, built by Narsimha gajapaty of Vizianagram.——*Narsapore* (నరసాపురము - narasápuramu, Tel.). See sep. title.——*Narsarowpett* (నరసారావుపేట - narasárávupéta, Tel.). See sep. title.——*Narsimha* (నరసింహ - narsimha, Tel.). From (nara, san. man + simha, san. lion). Second of the three Vijianugger dynasties. See vol. I (148); II, 251.——*Narsimha avatar* (नरसिंहावतार - narasimhávatára, San.). From (narasimha, san. man-lion + avatára, san. incarnation). The fifth or man-lion avatar [q.v.] of Vishnoo [q.v.]. A king called Hiranya cashipoo had a son named Prahlaudan, one who was a devoted servant of Vishnoo, and much celebrated for his virtues. On these accounts, and especially as being a votary of Vishnoo, his father persecuted him. At a time when Prahlaudan's life was in danger, Vishnoo burst from one of the pillars of the palace in the shape of a man-lion, killed the king, and drank his blood. With this legend may be compared the remains at Nineveh, where the pillars of palaces were made in the shape of a winged lion with a human face. See vol. I (79). ——*Narsimhacondah* (నరసింహకొండ - narasimhakonda, Tel.). From (narasimha, san. man-lion god + konda, tel. hill). Sanscrit name (védagiri), meaning sacred writing + hill. Hill; Nellore dist., Nellore tal.; lat. 14° 27′; long. 79° 56′; from Nellore W. 7 miles; from the sea W. 20 miles. On the opposite side of the large tank near Nellore, in village of Moolmoody. Important temple dedicated to Narsimhasawmy. Forms triad with Runganaicksawmy at Nellore and Zonnavauda. Europeans visit spot for picnics. Trig. station in lat. 14° 27′ 29·80″; long. 79° 55′ 12·53″; from Nellore W. 7 miles; from Zonnavauda S.S.W. 1¾ miles; from the sea W. 20 miles.——*Narsimha jayanty* (నరసింహజయంతి - narasimhajayanti, Tel.). Means man-lion god + birthday. Lunar [chaundramaunam] festival [pundigay, 6c], subject to intercalation [adhicam]. Fourteenth day of the waxing moon [shooclapacsham] of second lunar month Veishaukham [mausam] between 28th April and 27th May. Anniversary of Vishnoo's Narsimha avatar [q.v.]; devout Bramins fast; observed in temples; it lasts nine days and processions are made provided any person will be at the expense [maryauday].——*Narsimha moorty* (नरसिंहमूर्ति - narasimhamúrti, San.). From (narasimha, san. man-lion vishnoo + múrti, san. embodiment). Vishnoo.——*Narsimhan* (नरसिंह - narasimha, San.; நரசிங்கம் - narasingam, Tam.). From (nara, san. man + simha, san. lion). Epithet of Vishnoo, the man-lion god. Hindoo 2nd or pers. name. Familiarly shortened into Narsa and Narsoo [peyar]. ——*Narsimhooloo* (నరసింహులు - narsimhulu, Tel.). Plural of Narsimhan. Hindoo 2nd or pers. name [peyar].——*Narsingam* (ನರಸಿಂಗ - narasinga, Can.; நரசிங்கன் - narasingan, Tam.). From (nara, san. man + simha, san. lion). Dravidian form of narsimhan [q.v.] above. Old european name for Vijianugger dynasty [raj]. The original dynasty became extinct about 1487, and was replaced by one Narsimhan, who reigned at the time of first arrival of Portuguese. See vol. I (150); II, 251. Narsinga deo again was Gajapaty king of Orissa, surnamed Langoolya, 1237 to 1282, who extended his conquests to Nellore and founded about 185 temples in Oodayagherry talook; he built the great sun temple at Canaurac called the Black pagoda. ——*Narsing row* (نرسنگ راو - narsingráú, Hind.; నరసింగరావు - narasingarávu, Tel.). Proper name [peyar].——*Nauchy* (நாச்சி - náççi, Tam.). Feminine of Nayan. Mistress. Also as Nauchiyaur.——*Nauradan* (नारद - nárada, San.; நாரதன் - nárathan, Tam.). From (nara, san. man + dá, san. to give); giving counsel to man or mankind. ἑρμῆς of Greeks; Mercury of Romans; Apis of Egyptians. Son of Bramha [q.v.]; god of music [sangeetam]. There was a sage of this name. Hindoo third name [peyar].——*Nauram* (नार - nára, San.). From (ní,

san. to lead); as leading to usefulness. Water.——*Nayagan* (நாயகன் - náyagan, Tam.). A leader [naick]; master [nautan]. Epithet of the Supreme being, especially of Shiva [q.v.]. Suffix in Tamul proper names among non-bramins; as Devanayagam, Tillainayagam [peyar].——*Nayan* (நாயன் - náyan, Tam.). From (ní, san. to lead). Master.——*Nayanaur* (நாயனார் - náyanár, Tam.). Honorific form of above. Shiva. Epithet of any of the sixty-three devotees of shiva [aroopatt moover]. A Jeina [q.v.] title. Hindoo third name [peyar].——*Nayar* (നായർ - náyar, Mal.). From (náyaka, san. leader). Hon. plural is Nayammaur.—" *a* " Name allied to Teloogoo Naidoo, Tamul and Canarese Naicken and Hindostany Naick. All these are titles of respect, applied in the manner that Sahib [q.v.] is at the end of a name.—" *b* " So specifically the Shoodras of Malabar. The Greek νάουρα as a tract stood for the country of the Nayars. Cf. ἀριακὴ for the part of the Malabar coast principally occupied by the Aryan [q.v.] or Mahratta [q.v.] bramins [q.v.]. The highest class among malabar nayars is that of the Kiriyatt nayars. For the undivided family life of the Nayars see Avibhactam and Tarwaud. For their marriage customs and their Maroomakkatoyem [q.v.] system of succession to rights or property, see vol. I (111), foot-note. There are traces of resemblance between the customs of the Nayar and those of the Maravar [q.v.] of Ramnaud. The sub-divisions of Nayars are too numerous to specify [jauty]. See vol. I (16), (17), (67), (111), foot-note and vol. II, 100.——*Nayar brigade* (മലയാംഗാട് - malayámgát, Mal.). From (malayálam, mal. malabar + gát, corruption of guard). A force of about 1,400 men, chiefly Nayars, maintained by the Travancore state. It is commanded by European officers of the Madras army appointed by the British government.——*Nayar naud* (நாயருநாடு - náyarunádu, Tam.). Part of Pozhal [q.v.] cottam [q.v.] in the ancient Tondaimundalam [q.v.]. In the present Ponnairy talook, Chingleput district.——*Neem* (نيم - ním, Hind.). See sep. title.——*Neetinery vilacam* (நீதிநெறிவிளக்கம் - níthinerivilakkam, Tam.). From (níti, san. justice + neri, tam. path + vilakkam, tam. illustration). A rather modern Tamul moral treatise. By Coomaragooroopara desican, born at Shreeveicoontam, became Tumbiraun [q.v.] of mutt at Dharmapooram, ended his life as head of a mutt [q.v.] at Benares. The work treats of four great objects of human desire; virtue, riches, enjoyment, and final beatitude [aram]. Arranged more or less after the fashion of the Cooral [q.v.] and the Nauladiyaur [q.v.].——*Neety* (नीति - níti, San.). Conduct in all the relations of domestic, social and political life. Justice, morality, obligation. The aim of Neety shastram is to serve as guide to correct conduct in the relations of domestic, social, and political life. Such are either collections of choice maxims, striking thoughts, and wise sentiments in the form of metrical stanzas; or else books of fables in prose which string together stories about animals and amusing apologues for the sake of the moral they contain [punchatantram]. The regular collections of moral maxims, sentiments, &c., are generally in metrical stanzas. The Dravidian writings which would be considered part of Neety shastram are such works as Cooral, Nauladiyaur, &c. They form the principal and characteristic part of Dravidian literature. The collections of fables and apologues are analogous to the works of the greek Æsop and the arabian Locmaun [q.v.]. There are no indigenous works of this sort among the Dravidians, though there are various translations from the Sanscrit.——*Nein* (نين - nain, Hind.). From (nayana, san. eye). Eye.——*Neinsook* (نين سكھ - nainsukh, Hind.). Title from (nain, hind. eye + sukh, hind. comfort). A kind of muslin [mull].——*Nemiyone* (நேமியோன் - némiyón, Tam.). Means discus one. Vishnoo [q.v.].——*Nemmy* (नेमि - némí, San.; कालापलस - kálápalasa, Mahr.; ನೇಮಿಮರ - néhimara, Can.; నెమ్మి - nemmi, Tel.; ବନ୍ଧନ - bándhona, Oor.). Title from teloogoo. San. means wheel, from wood being used in making wheels of chariots. Mahr. from (kálá, mahr. black + palásha, san. butea frondosa, roxb.). Tel. from sanscrit. San. also (syandaná), meaning chariot, the tree was used in constructing chariot-wheels; (atimukta), meaning surpassing pearls in whiteness [madablota, musk jasmine]; (rat'hadru), meaning chariot tree; (vañjula), meaning desired [bengal ashocam]; (chitrakrit), meaning causing wonder; (tinisha), meaning lasting for nights, long-standing. Can. also (karimutal). Tel. also (mandamotuku); (tellamotuku); (dargu). Title otherwise Chariot tree, Syandanam, Tinisham. Botanically Ougenia dalbergioides, benth., leguminosæ [vricsham, 48]. Alias Dalbergia oojeinensis. Tree, 30 feet; leaves pinnately trifoliolate; leaflets ovate, roundish, rather villous, with undulated curved margins; pedicels one-flowered, rising in fascicles, and as well as the calyx villous; flowers smallish, pale rose, fragrant; flowering in hot season; leaves appear after blossoms; of slow growth, and attains full size in about thirty years. Kino [q.v.] from bark, useful in bowel-complaints. In hot weather branches given as fodder to cattle. Gives astringent red gum [gond]. Wood hard, strong and very tough, heavy and close-grained, not unlike sissoo [q.v.], but handsome; much used; a crystalline substance like magnesia is sometimes found in the wood. No other common species here.——*Nemy* (நேமி - némi, Tam.). From (ní, san. to lead). Wheel. Discus [chuckram].——*Netram* (नेत्र - nétram, San.). From (ní, san. to lead). Eye.——*Netrauvaty* (ನೇತ್ರಾವತಿ - nétrávati, Can. netrávati *). From (nétra, can. eye + vat, can. suffix of possession). River; South canara dist., Mangalore and Ooppinangady tals. Formed at Ooppinangady by the junction of the Netrauvaty proper and the Comauradhaury. The Netrauvaty proper rises in Mysore on the Western ghauts [q.v.] in lat. 13° 10′ and long. 75° 26′ and the Comauradhaury in Coorg. From Ooppinangady the united stream flows to Mangalore, and forms the southern and partly the western boundary of that place. It is affected by the tide to a distance of ten miles, and boats carrying about four tons can at all seasons ascend up to Buntwaul. In the rainy season they can go forty miles up or a few miles above Ooppinangady.——*Nossam* (నోసం - nósam,* Tel.). Corruption of (narasimham, tel. vishnu, the man-lion god). Town; Kurnool dist., Coilcoontla tal.; pop. 2,706; acres 9,261; lat. 14° 59′; long. 78° 26′; from Coilcoontla S. 18 miles; from Kurnool S. 62 miles. Former residence of a powerful Poligar [q.v.], who gave much trouble to the Cuddapah nawaubs [q.v.]. The Reddy ancestors of this family were, under the Vijianugger government, principal Potails [q.v.] of Chenchely mullay, and Deshmookhs [q.v.] of Cumbum, and kept up a body of peons [q.v.], for part of whose substance they had an assignment of fifty-four villages. On the decline of the Vijianugger power they seized the assigned villages. They were reduced by the Cootb shahy princes of Hyderabad, two years later, and permitted to hold their possession [cottacote, moondlapaud, velgode]. The family is extinct. Lacquered ware is manufactured. Weekly market on Wednesdays. Annual festival in Boogga venkateshwarasawmy's temple on fourteenth Jyeshtam [mausam] in June.——*Nowshaudar* (नवसागर - navaságara, San.; ارمينا - arminá, Ar.; نوشادر - nausádar, Hind.; نوساگر - nauságar, Dec.; سدار - sadár, Malay; ನವಸಾಗರ - navaságara, Can.; నవాసారము - navásáramu, Tel.; നവസാരം - navasáram, Mal.; නවසාර - navasára, Singh.; நவாசாரம் - navásáram, Tam.). San. corruption of (narasára, san. essence of man). Tam. also (sháram), meaning essence. Otherwise Nowsaugar. Sal ammoniac. Ammoniæ hydrochloras, Murias ammoniæ, Ammonii chloridum, of chemists. A compound formed by acids [tezaub] in union with alkalies [cauram], earth and metallic oxides. Not sal ammoniac of the ancients, which was impure common salt [ooppoo], perhaps rock salt [sondah namak]. Occurs in colorless, inodorous, translucent tough, fibrous masses, difficult to pulverise, but soluble in water, and of salt cold taste; that met with in bazaar is from unburnt residue of brick kilns [shoolay], in which manure of animals is used as fuel; this is chemically impure. May be formed by neutralizing hydrochloric acid with ammonia and evaporating to dryness. A mineral drug; used sometimes in solution with nitre as a lotion, and also internally as a resolvent; its nauseous taste, which is a great objection to its use, is covered by the addition of liquorice [indian liquorice]; its chief use however is to prepare a rough carbonate of ammonia [soongnah], by rubbing it in palm of hand with a little lime [choonam], this is smelt to relieve headache; in pharm. this substance is alterative in small and continued doses, in larger doses stimulant; the pharm. has also benzoate, carbonate, phosphate, bromide, acetate, citrate, &c., of ammonia. With nitre [shorah] in large quantities nowshaudar is a freezing mixture; it is used by solderers [pattoo] and tinmen to clean surface of metals [loham] and facilitate union between tin [tagaram] and iron [auhan] or copper [taumram]; also by dyers to brighten colors [shauyam]. For Sal volatile see Soongnah.

NEEL (नील - níla, *San.*; نيل - níl, *Hind.*). Means blue-black.—" *a* " Mammal first term. Ex., where transl. is of second term:—Macacus silenus (nílamanti), monkey, macacus genus, and (nílan), blue-black one; Portax pictus (nílgái), cow, bos indicus, and (nílgáú), cow, bos indicus. See gloss. paragraphs.—" *b* " Plant first term often joining two genera. Ex., where transl. is of second term:—Ægle marmelos (nílamalliká), jasminum sambac; Cuscuta reflexa (nílátár), thread; Dædalacanthus nervosus (nílámbramu), sky, (nílamulli), thorny plant; Evolvulus alsinoides (nílapushpí), flower; Ipomæa hederacea (nílkalmí), quill, from stem; Justicia gendarussa (nílanirgundí), vitex negundo; Mangifera indica (nílakapitt'ha), feronia elephantum; Monochoria vaginalis (nílattámarai), nelumbium speciosum; Oryza sativa (nílamañjari), flower-cluster; Phyllanthus maderaspatensis (nílakkadambai), anthocephalus cadamba; Plumbago capensis (nílachitramúla), plumbago zeylanicum, (nílashikhá), crest; Portulaca quadrifida (nílaccira), greens; Wrightia tomentosa (nílampála), milk plant. See gloss. paragraphs.——*Neelacuntan* (नीलकण्ठ - nílakant'ha, San.). From (above + kant'ha, san. throat). A name of Shiva [q.v.], from his having a blue throat, caused by drinking the poison produced at the churning of the ocean [coormam]. Hindoo 2nd or pers. name [peyar].——*Neelacunty* (نيل كنٹھى - nílkanthí, Hind.; حسيني پدا - husainípiddá, Dec.). Hind. from (níl, hind. blue + kanthí, hind. throat); cf. indian jay. Dec. from (husn, ar. beautiful + piddá, hind. black robin). Title otherwise Indian bluethroat. Cyaneula suecica, ruticillinæ, sylviadæ [calacuntam], dentirostres, insessores [pacshy, 23], of naturalists [jantoo]. Alias Cyaneula indica, suecicoides; Motacilla cœrulecula. Throat and breast bright shining azure-blue. No other common species

here.——*Neelak* (नीलक - nílaka, San.). Unknown quantity in algebra [caulak, roopam].——*Neelam* (इन्द्रनील - indranîla, San.; ياقوت ازرق - yákútiazrak, Ar.; ياقوت كبود - yákútikabúd, Pers.; نیلم - nílam, Hind.; ನೀಲ - níla, Can.; నీలము - nílamu, Tel.; നീലക്കല്ലു - nîlakkallu, Mal.; நீலம் - nîlam, Tam.). Title from hindostany. San. from (indra, san. best + níla, san. blue). Ar. from (yákút, ar. garnet + azrak, ar. blue). Pers. from (yákút, ar. garnet + kabúd, pers. blue). Can., Tel. and Tam. from (níla, san. blue). Mal. means blue stone. Sapphire. After the diamond [vajram], the most valuable of gems [ratnam]. The colors are blue, red, grey, white, green, and yellow; the most prized are crimson and carmine red. The best are brought from Burmah; those found in Ceylon, though genuine, are much less beautiful. In that island the green sapphire is common.——*Neelan* (நீலன் - nílan, Tam.). The black man. Feminine Neely. Pariah proper name [peyar].——*Neelapully* (నీలపల్లి - nílapalli, Tel.). From (níli, tel. indigo, indigofera tinctoria, linn. + palli, tel. village). Zemindarry, Town, Port; Godavery dist., Cocanada division; pop. 3,700; lat. of town 16° 44′; long. 82° 16′; from Cocanada S. 15 miles; from Coringa S. 5 miles; from Injaram E. 3 miles; from Madras N.N.E. 278 miles; from Yanam E. 1 mile. Peshcush Rs. 479. On the Godavery. English factory established 1751, captured by Bussy in 1757. Once a place of commercial importance [bendamoorlunka]. Rice [q.v.] factory. ——*Neelaumbram* (اُدوجتی - udujati, Hind.; ಕಪ್ಪುಬೊಬ್ಬುಳಿ - kappu-bobbuli, Can.; నక్కతోక - nakkatóka, Tel.; കരിങ്കുറിഞ്ഞി - karinkuriñûi, Mal.; நீலாம்பரம் - nîlámbaram, Tam.). Title from tamul [blue nail dye]; cf. dædalacanthus. Can. from (kappu, can. black + bobbuli, can. thorn tree, acacia). Tel. from (nakka, tel. fox + tóka, tel. tail). Mal. from (karu, mal. black + kuriñûi, mal. the plant, barleria). Tam. from (níla, san. blue + ambara, san. sky); from pale blue flowers. Can. also (kappu-kurni), meaning black + the plant, barleria. Mal. also (kuranta), meaning earth + delightening. Tam. also (nílámbari), meaning sky blue, from flowers. Title otherwise Black nail dye, Fox tail. Botanically Ecbolium linneanum, kurz., acanthaceæ [vricsham, 101]. Alias Justicia ecbolium. Shrubby; spikes terminal, four-sided; bracteas oval, entire, ciliate, mucronate, equalling the fruit; leaves elliptic-oblong, attenuated at both ends, pubescent; upper lip of the corolla linear, reflexed; flowers large, greenish livid; tube very long and slender; there are varieties dentata and rotundifolia; no other species here. Neelaumbram is also same as Blue nail dye. Compare also:— Barleria cristata (tellanílámbari), white ditto; Dædalacanthus nervosus (nallanílámbram), black ditto; see gloss. paragraphs. ——*Neeleshwar* (ನೀಲೇಶ್ವರ - nîléshvara, Can.). From (níla, san. blue + íshvara, san. lord).—"*a*" Deputy tahsildarry, South canara district. Pay Rs. 70.—"*b*" Town; South canara dist., Cassergode tal.; pop. 9,842; lat. 12° 15′; long. 75° 10′; from Cassergode S.S.E. 19 miles; from Mangalore S.S.E. 46 miles; from the sea E. 2 miles. Southernmost town of Canara and old limit of Keralam [q.v.]. Residence of a rajah descended from the house of the zamorin [q.v.], whose ancestors ruled the northern portion of the Malayalam country.—"*c*" River; South canara district, Cassergode talook; rises in Coorg; flows in a south-westerly direction and falls into the Arabian sea. Length about forty-seven miles. Lies for the most part in South canara. Country craft of small burthen can enter its mouth for a short distance.——*Neely* (नीली - nílí, San.). From (níla, san. dark-blue); from the dye.—"*a*" Botanically the Indigofera genus, leguminosæ [vricsham, 48]. Annual or perennial herbaceous plants or shrubs; leaves pinnate; flowers rose-purplish, bluish or white; fruit a cylindrical or four-sided, straight or curved pod, with many seeds. The species best known to the natives are:—anil [west-indian indigo], argentea [arabian indigo], argentea, var. cærulea [wild indigo], aspalathoides [shiva's neem], echinata [black nerinjy], enneaphylla [red nerinjy], hirsuta [large zanzibar indigo], pentaphylla [dog green gram], tinctoria [common indigo], viscosa [dog neem]. Other s. indian species indigenous or naturalized are:—atropurpurea, cordifolia, glandulosa, linifolia, marginulata, mysorensis, parviflora, pauci-folia, pedicellata, pulchella, subulata, tenuifolia, trifoliata, trita, uniflora, wightii.—"*b*" The dark one. Parvaty [q.v.].——*Neilgherry* (நீலகிரி - nílagiri, Tam.). See sep. title.——*Nilghye* (ऋश्य - rishya, San.; रूही - ruhí, Mahr.; نیل گاؤ - nílgáú, Hind.; نیل گائی - nílgáí, Dec.; ಮರವಿ - maravi, Can.; మనుపోతు - manu-pótu, Tel.; ଘୋଡ଼ାଙ୍ଗ - ghodango, Oor.; വെൺപെരുമാൻ - venperumán, Mal.; கடமை - kadamai, Tam.). Title from hindostany. San. from (ri, san. to go). Mahr. from (róhita, san. nilghye). Hind. from (níl, hind. blue + gáú, hind. cow). Tel. from (mannu, tel. earth + pótu, tel. male buffalo). Oor. means horse-bodied. Mal. from (ven, mal. white + peru, mal. large + mán, mal. deer). Tam. from (kadam, tam. forest + má, tam. animal). San. also (róhita). Hind. also (roz). Title otherwise White-footed antelope. Portax pictus, antilopinæ, bovidæ, ruminantia, mammalia [sastanam, 23], of naturalists [jantoo]. Alias Antilope trago-camelus; Damalis risia; risia from sanscrit. Male of an iron-gray color; lips, chin, lower surface of the tail, stripes inside the ears, rings on the fetlocks, and abdomen, white; head and limbs tinged with sepia-brown; mane, throat tuft, and tip of tail, black. The female is smaller than the male, and tawny or light brown. Length of a male about 6½ to 7 feet; height at the shoulder 4 feet 4 inches to 4½ feet; horns 8 to 9 inches, rarely 10; ear 7, very broad; tail 18 to 21 inches. Rare in the extreme south. It does not occur in Ceylon. Frequents thin forests, and low jungles. It does not affect a hilly country. Not much sought after by sportsmen, nor is its flesh highly esteemed. Is in appearance a mixture of antelope [jinka], bull [maud], and horse [ghorah]. Held peculiarly sacred by Hindoos, from its fancied kinship to the cow [pashoo].

NEEM (निम्ब - nimba, *San.* and *Mahr.*; बेवा - bévá, *Conc.*; آزاد درخت هندی - ázáddarakhtihindí, *Pers.*; نینب - nínb, *Hind.*; نیم - ním, *Dec.*; ಬೇವು - bévu, *Can.* and *Too.*; వేప - vépa, *Tel.*; വേപ്പു - véppu, *Mal.*; කොහොඹ - kohomba, *Singh.*; வேம்பு - vémbu, *Tam.*). Title from sanscrit through deccany. San. from (ní, san. to lead) [nee]; leading to health. Pers. from (ázáddarakht, pers. lilac, melia azedarach, linn. + hindí, pers. indian). Hind. and dec. from sanscrit. Mal. from (vévu, mal. to burn); the tree is proverbial for heat. Tam. from (vé, tam. to heat). San. also (ravipriyá), meaning sun favorite; (vrana-shódhakari), meaning sore cleaner; (arishta), meaning unhurt [black datura, soapnut]; (sarvatóbhadra), meaning good in every way; (hinguniryása), meaning having gum like that of ferula narthex, boiss.; (pichumarda), meaning destroying cooshtam. Mahr. also (bálantanimba), meaning woman after delivery + neem tree, chips used in feeding fire on the occasion; (limba), by corruption. Hind. also (arishtu), from sanscrit. Can. also (hebbévu), meaning big + the tree; (ollebévu), meaning good neem tree. Mal. also (áryavéppu), meaning the aryan neem tree; (rájavéppu), meaning royal neem tree; (áryatikta), meaning aryan bitter, to distinguish from (anáryatikta), the bitter plant of non-aryans [chiretta]. Singh. also (kosamba). Tam. also (arulurathi), meaning favor + strength; (shangu-maru). Title otherwise Ash-leaved bead tree, Margosa being portuguese for bitter, Neemb, Vaimboo, Vaipa. Botanically Melia azadirachta, linn., meliaceæ [vricsham, 36]. Specific name from persian meaning free tree. Alias Aria bepon; Azadirachta indica; Azedarach deletaria, fraxinifolia. Aria bepon is malayalam. Tree, 20 feet; calyx five-partite; petals five; anthers ten on the throat of the stamen tube; leaves pinnated; leaflets ovate-lanceolate, unequal-sided, acuminated, serrated; panicles axillary; flowers small, white, honey scented; fruit, when ripe, purple, size of a small olive [zeitoon], one-celled, one-seeded. A common, quick-growing, and handsome tree, putting forth leaves in hot season; every part especially the bark is bitter; bark varies much in appearance, according to the size and age of the tree; within the fleshy portion of the fruit is a thin hard woody shell, which encloses an oily bitter kernel like a small filbert [findak], greenish white, with a brown testa; the dried fruit resembles a small raisin, the inner portion of the pulp is adherent to the stone, and fibrous from the presence of very large liber cells; the oil expressed from fruit is of a pale yellow color and bitter taste; it has a powerful garlic-like [lussoon] odour; a true gum [gond] exudes like wood-apple [q.v.] gum, occurring in lumps and tears varying from a light yellow to a dark-brown color with slightly bitter taste; stem, &c., yield a sap or toddy. The bark from trunk is covered with a thick scaly epidermis, and varies in thickness from one-fourth to half an inch; that from the small branches is smooth, of a dullish purple color, marked by longitudinal lines of ash-colored epidermis, from one-eighth to one-twelfth of an inch apart; the inner layer of the bark, of a whitish color in the freshy state, is powerfully bitter, far more so than the outer dark-colored layer, which however possesses a greater amount of astringency; there is no difference between bark and root-bark. From the dried bark is obtained an amorphous resin [raul], which is the bitter principle; this resin is soluble in the usual solvents and in boiling solutions of fixed alkalies [cauram], and from the latter it is precipitated by acids [poolipp, tezaub], but in an altered form. The gum is yellowish, like inferior gum-arabic [q.v.], generally in longish vermiform pieces, not bitter, and freely soluble in cold water; it is unaffected by neutral acetate of lead [eeya carcand], gives a curdy white precipitate with basic acetate, a reddish gelatinous precipitate with ferric chloride, is unaffected by borax [vengauram], which it turns of a dull red color; iodine does not affect it, but it precipitates with oxalate of ammonia; it makes a weak mucilage, and is of little value. The margosa toddy [q.v.] is yielded either spontaneously or extracted artificially. In the former case, a clear and colorless liquid begins to flow in a very thin stream or continuous drops from two or three parts of the plant, and continues to do so from three to seven weeks; the trunk and large branches and roots are the parts from which the flow takes place through very small and recent cracks or fissures, and the quantity of the liquid discharged in the 24 hours from the whole tree varies from two to eight bottles according to its size; before the sap begins to flow, a rushing or pumping noise of a liquid is heard within the trunk. The trees which yield the sap artificially are more rare; a root being exposed by removing the earth, it is cut through or only half through and a vessel placed beneath; the sap thus collected is comparatively small in quantity. The neem tree is dedicated to Mauriyamman [q.v.]; for this reason in small-pox epidemics, the leaves are spread on bed of the patient, fans made of them are

used for fanning him, and a bunch of them is fixed above the door as a sign of the presence of the goddess in the house; on the decline of the disease, the whole body is covered with the leaves. In some parts of the country the neem will not grow on its own roots, but only when budded on its larger congener, the melia azedarach, linn. [large neem]. Every part except the wood, that is to say the bark, root-bark, young fruit, nuts or seeds, oil, flowers, leaves, gum and toddy, are medicinal; the root-bark, bark and young fruit are tonic and antiperiodic; the oil, nuts, and leaves are local stimulant, insecticide, and antiseptic; the flowers are stimulant-tonic and stomachic; the gum is demulcent-tonic; the toddy is refrigerant, nutrient and alterative tonic. Preparations of the root-bark, bark and young fruit are decoction, tincture and powder. Decoction; take of the inner layer of the root-bark, cut into small pieces, four ounces, water two pints, boil on a slow fire till the liquid is reduced to one pint, and strain while hot; decoction of bark precisely in same manner; in both cases fresh bark preferable to dry and old; in decoction of fruit, they should be selected before attaining half natural size, cut into small slices and dried in the sun, and then their proportion to the water and the method of boiling and straining are the same as in the decoction of the root-bark. Tincture; take of the inner layer of the root-bark or bark, in coarse powder, four ounces, alcohol or proof spirit one pint, macerate for seven days in a closed vessel with occasional agitation, press, filter and add more spirit, if necessary, to make one pint. Powder; the inner layer of the root-bark or bark, or the dry young fruit, may be reduced to powder, passed through a fine sieve and kept in a closed vessel. Preparations of the leaves, nuts and oil are decoction, paste or poultice, and solution. Decoction; take of the fresh leaves, four ounces; water, two pints; boil till the liquid is reduced to half of its quantity, and strain when cool. Paste or poultice; bruise and rub the fresh leaves with hot or cold water in a stone mortar till they are reduced to a soft and pulpy mass. Solution; bruise and rub the kernel of the nuts with cocoanut [q.v.] oil, water or some other liquid, in a mortar till it becomes well mixed and thin. The oil is either applied by itself or in combination with other drugs, as chaulmoogra [q.v.] oil, &c. Preparation of the flowers is the infusion; take of the flowers, three ounces, hot water, one pint or just sufficient to cover the flowers, infuse in a covered vessel for an hour and strain. Preparation of the gum is mucilage, prepared same as indian gum-arabic. There is no preparation of the sap or margosa toddy, it being always used alone. Doses; of the decoction of the root-bark, bark or young fruit, from one and-a-half to three fluid ounces; of the tincture of the root-bark or stem bark, from one to three fluid drachms; of the powder of any of the above drugs, from one to two drachms; of the infusion of flowers, from one and-a-half to three fluid ounces; of the mucilage of gum, from one to two fluid ounces; of toddy, from two to four fluid ounces. Substituted; the root-bark, bark and young fruit, for cinchona-bark [koinah] and gentian [chiretta]; the oil, nuts and leaves, for carbolic acid; the flowers, for elder flowers, and coriander [cassibor], aniseed [anise] and dill [sowa] oils; the gum, for acacia [babool] and feronia [wood apple] gums; the toddy, for elm bark, diluted phosphoric acid, jamaica sarsaparilla [sarsaparilla china root] and chaulmoogra [q.v.] and cod-liver oils. Bark in decoction and powder is a remedy in ague or intermittent fever, convalescence after fevers, general debility, and loss of appetite; leaves beaten into pulp are externally applied in pustular eruptions, rheumatism, bruises and sprains; a watery or vinous infusion of the leaves is applied to bruises after the application of leeches [attay], and effect is heightened when spirit of camphor is sprinkled over the cloth, steeped in the infusion; dried leaves added to common poultices to prevent glandular tumours from coming to maturity; acrid bitter deep yellow oil, from pericarp of seeds has valuable antispasmodic properties anthelmintic and stimulant, used in leprosy [cooshtam] and as liniment for rheumatic affections; bark gum is stimulant; fruit antiseptic, purgative, emollient and anthelmintic; air passing through neem trees is thought to be highly beneficial to health, and hence the practice among the natives of planting neem trees near their dwelling houses; when carefully prepared the toddy [q.v.] is an excellent stomachic, being taken in doses of about one ounce; gives to pharm. the bark, azadirachtæ cortex: and the fresh leaves, azadirachtæ folia; bark, astringent tonic, and antiperiodic; leaves stimulant; bark used like cinchona; officinal; the air waved with a neem branch is supposed to be a cure for syphilis; the insane are passed through a cleft of the tree, or a stem which having parted and re-united forms a circular opening. Flower is edible; leaves being slightly bitter are put into curry [q.v.]; the leaves are chewed at funeral ceremonies; also simply parched and eaten; pulp between the skin and the seed of the fruit is used as famine food. Margosa cake [ponnauk] is used as a manure in planting districts; the powdered cake, like linseed [alsee] meal, makes a very useful luting in chemical and physical laboratories, and is not liable to the attack of insects [poochy]; leaves also useful in keeping away the boring worm from books; the kernels powdered and mixed with water used for washing the hair; the oil used for imparting colors [shauyam] to cotton [q.v.] cloths; small branches used as tooth brushes; oil sometimes burned in lamps, but emits a heavy and disagreeable smoke; oil makes a good, useful hard soap [sauboon]; trunk yields gum included among gum ghautty [q.v.] of commerce; bark yields a fibre [naur]; tree much used for planting road-sides [shaulay], but the foliage is deciduous. Wood very like mahogany, mottled, hard and heavy, used for cart wheels and ordinary building purposes; old trees yield excellent furniture; wood well adapted for ship-building; so bitter that no insect will attack it. Of this species there are two varieties; one which has a black appearance is called black neem in vernaculars; the other with green prickly leaves, which have an exceedingly bitter taste, is known as arya black neem. There is a Tamul proverb:—வீட்டில் அழகு வேம்பு அடியாகும்—"The shade of a neem tree is good for a house." There is another:—வேப்பெண்ணெய் விருந்து எண்ணெய் அல்ல, மருந்து எண்ணெய்—"Neem oil is not used in entertain-"ments; it is medicinal." The following is a Hindostany proverb:—ایك نیم سب گھر سیتل—"One neem tree cools the "whole house." The following is from Vemana:—అనగ ననగ రాగ మతిశయిల్లుచు నుండు; తినగ తినగ వేము తియ్య నుండు; సాధనమున పనులు సమకూరు ధరలోన—"By talking and conversing, affection "increases; as you continue to eat even the bitter neem leaf, "it becomes sweet; so by practice may we succeed in any art "whatever."——**(1)** *Neemgherry* (నింగిరి - nímgiri, Tel.). From (nım, hind. neem tree, melia azadirachta, linn. + giri, san. hill). Range of hills; Vizagapatam dist., Bissemcuttack tal.; Parvatipore division; between lat. 19° 27′, and 19° 41′, and between long. 83° 22′ and 83° 32′; height 4,972; from Bissemcuttack W. 3 miles; from Corapatt N.E. 57 miles; from Madras N.N.E. 475 miles; from Narsapatam N.N.E. 126 miles; from Parvatipore N. 40 miles; from Vizianagram N. 86 miles; from Goonapore N.W. 29 miles; from Jeypore N.E. 64 miles; from Vizagapatam N. 115 miles. In the extreme north of district. A lofty range, grass covered, at right angles to Eastern ghauts [q.v.], constructing the Royagada valley. A pass 1,200 feet in height leads along its eastern face from Parvatipore to Central provinces. It divides Bissemcuttack and Singapore estates. The Vamshadhaura rises in the range, and the foot-path from Bissemcuttack to Singapore crosses it by the Paupicanama gorge. ——**(2)** *Bitter neem* (کڑوی نیم - karvíním, Dec.). Same as Curry-leaf tree.——*Black neem* (కరివేప - karivépa, Tel.; கருவேம்பு - karuvémbu, Tam.). Same as Curry-leaf tree and Garooga.——*Dog neem* (நாய்வேம்பு - náyvémbu, Tam.). Title from being wild. The pinnate leaf gives the connection. Tam. from (náy, tam. dog + vémbu, tam. neem tree, melia azadirachta, linn.). Title otherwise Viscid wild indigo plant. Botanically Indigofera [neely] viscosa, lamk., leguminosæ [vricsham, 48]. Suffruticose, erect, much branched; branches, petioles, peduncles and legumes glutinous and rigidly hairy; leaves petioled, pinnated; leaflets four to eight pair, elliptic-oblong, pubescent, particularly beneath; racemes about the length of the leaves; legumes cylindrical, horizontal, straight; seeds six to twelve, cylindrical, truncated at both ends; flowers distant, small, greenish-red; flowering nearly all the year.——*Foreign neem* (विलायतीनिंब - viláyatínimba, Mahr.). Same as Large neem.——*Fragrant neem* (सुरभिनिम्ब - surabhinimba, San.). Same as Curry-leaf tree.——*Ground neem* (भूनिम्ब - bhúnimba, San.). Title from bitter taste and lowly habit. Same as French chiretta.——*Hill neem* (निंबर - nimbara, Mahr.; ಬೆಟ್ಟಬೇವು - bettabévu, Can.; ලුණුමිදෙල්ල - lunumidella, Singh.; மலைவேம்பு - malaivémbu, Tam.). Can. from (betta, can. hill + bévu, can. the tree, melia azadirachta, linn.). Singh. from (lunu, singh. saline taste + midella, singh. the tree, barringtonia). Tam. from (malai, tam. mountain + vémbu, tam. neem tree). Can. also (hebbévu), meaning large + the tree; (kádabévu), meaning wild + the tree. Botanically Melia dubia, cav., meliaceæ [vricsham, 36]. Alias Melia composita, robusta, superba. Large tree; young shoots, petioles and panicles very mealy; leaves bi-pinnate, alternate; pinnæ about three pair; leaflets three to seven pair to each pinnæ, ovate, acuminate, crenulated, glabrous, 2–3 inches long; panicles axillary, scarcely half the length of the leaves; flowers numerous, small, whitish, inodorous; flowering in hot season; calyx and petals mealy; stigma large with a five-pointed apex; drupe ovate, size of a large olive [zeitoon], smooth, and yellowish green when ripe. The dried fruit is in size, shape, and color very much like a date [kharjooram], but upon closer examination the pulp is found to adhere firmly to a large and very hard stone; when soaked in water the fruit becomes like an oval yellowish-green plum [auloochah]; the pulp of the fruit has a bitter nauseous taste. Fruit is a remedy for colic, half a fruit being the dose for an adult. Sap-wood grey; heart-wood reddish-white, soft; timber used for building.——*Large neem* (महानिम्ब - mahánimba, San.; विलायतीनिंब - viláyatínimba, Mahr.; بان - bán, Ar.; آزاددرخت - ázáddarrakht, Pers.; مہانینب - maháninb, Hind.; گولی نیم - gaulíním, Dec.; ಹುಚ್ಚುಬೇವು - huççubévu, Can.; తురకవేప - turakavépa, Tel.; മലവേമ്പു - malavémbu, Mal.; මහනිඹ - mahanimba, Singh.; மலைவேம்பு - malaivémbu, Tam.). San. from (mahá, san. large + nimba, san. neem tree, melia azadirachta, linn.). Mahr. from (viláyatí, mahr. european + nimba, san. neem tree). Pers. from (ázád, pers. free + darakht, pers. tree). Hind. from sanscrit. Dec. from (gaulí,

dec. goddess + ním, hind. the tree). Can. from (huççu, can. mad + bévu, can. the tree). Tel. from (turaka, tel. mahomedan + vépa, tel. the neem tree). Mal. from tamul. Singh. from sanscrit. Tam. from (malai, tam. mountain + vémbu, tam. neem tree). San. also (parvatanimba), meaning mountain neem tree; (himadruma), meaning snow tree, applies better to melia dubia, cav., from grey-wood. Ar. also (hábbulbán), meaning seed of melia azedarach, linn. Hind. also (bakáyan). Dec. also (gauriním), meaning parvaty's neem. Can. also (turukabévu), meaning turk + the tree; (chikkabévu), meaning small + the tree. Tel. also (kondavépa), meaning hill + the neem tree. Singh. also (lunumidella), meaning saline barringtonia is melia dubia. Tam. also (shigarinimbam), meaning mountain + neem tree. Title otherwise Bastard bead tree, Bastard cedar [chikrassy, soymida], Evergreen bead tree, False sycamore, Holy tree, Hook tree, Indian lilac, Margosa, Persian lilac, Pride of china, Pride of india, Syrian bead tree, Tauk, White cedar. Botanically Melia azedarach, linn., meliaceæ [vricsham, 36]. Specific name from persian. Alias Azedarach commeline, deleteria; Melia bukaim, commelini, sempervirens. Bukaim is hindostany. Tree, 40 feet; foliage like ash; petals five, nearly glabrous; calyx small, five-cleft; stamen tube ten-cleft; leaves alternate, bipinnate, deciduous; leaflets about five together, obliquely ovate-lanceolate, serrated, finely acuminated, glabrous; peduncles axillary, simple below, above panicled, branched, and many-flowered; flowers smallish, white externally, lilac at the top, fragrant; flowering in march; fruit size of a cherry [q.v.], pale yellow when ripe; nut five-celled; cells one-seeded. The bi-pinnate and occasionally tri-pinnate leaves distinguish it from melia azadirachta, linn. [neem]. The root-bark is very thin and light, rough and dark-brown externally, pale-white internally, and bitterish in taste; the seeds are generally about the size and shape of thick and long grains of rice, but dark-brown and shining; kernel albuminous, pale or yellowish white, and slightly bitterish and oily in taste; the nut or shell of the berries in which the seeds are contained is oval, hard, rough and five-celled with one seed in each cell. Hard brown nut; gum [gond] looks like mocharas [q.v.], similar to ordinary neem gum; the root is nauseous and bitter. Introduced into southern india by mahomedans. The root-bark and seeds are medicinally tonic and anthelmintic. Preparations, powder and decoction; for latter take four ounces of the fresh root-bark, water two pints, boil to one pint. Doses; of powder of root-bark, from forty to eighty grains; of decoction of root-bark, from four fluid drachms to a fluid ounce, of powder of seeds, from one to two drachms. Substituted for gentian [chiretta] and calumba [q.v.]. The pulp surrounding the seeds is in large doses poisonous, and mixed with grease is given to kill dogs [nye]; a decoction of the leaves is astringent, anthelmintic, and stomachic, and injurious to insects; seeds emetic, laxative, and anthelmintic; bark bitter and anthelmintic, substituted for british santonin [absinth]; gives to pharm. root-bark, non-officinal. Fruit is greedily eaten by goats and sheep [aud]. Seeds are often strung as beads [munkah], especially by roman catholics; leaf contains green coloring matter. Sap-wood yellowish-white; heart-wood soft, red; wood used for furniture, but it warps and splits; it polishes well. Large neem is also another name for the Toon [q.v.].——*Lowly neem* (भूनिम्ब - bhúnimba, San.). From the bitterness of the plant. Same as French chiretta, Coromandel gendarussa, and Himalayan chiretta.——*Madagherry neem* (மதகிரிவேம்பு - mathagirivémbu, Tam.). From place so called. Same as Chickrassy and Javanese cedar. ——*Parvaty's neem* (گوری نیم - gauriním, Dec.). Same as Large neem.——*Sandal neem* (சந்தனவேம்பு - shandanavémbu, Tam.). Title from neem-like leaf, and fragrant wood. Same as Toon.——*Shiva's neem* (शिवानिम्ब - shivanimba, San. and Mahr.; ಶಿವಮಲ್ಲಿ - shivamalli, Can.; മണലി - manali, Mal.; சிவனார் வேம்பு - shivanárvémbu, Tam.). San. from (shiva, san. the deity + nimba, san. melia azadirachta, linn.). Mahr. from sanscrit. Can. from (shiva, san. deity + mallika, san. jasminum sambac, ait.). Mal. from (manal, mal. sand) [manaly]. Tam. from (shiva, tam. the deity + vémbu, tam. neem tree, melia azadirachta, linn.); from red flowers. Title otherwise Manelly, Small-flowered aspalathus. Botanically Indigofera [neely] aspalathoides, vahl., leguminosæ [vricsham, 48]. Alias Aspalathus indicus; Indigofera aspalathifolia. Shrubby, erect, young parts whitish, with adpressed hairs; branches slender, spreading in every direction; leaves sessile, digitately three or five-foliolate; leaflets narrow cuneate, small, under side with a few scattered hairs; peduncles solitary, one-flowered, about the length of the leaves; legumes cylindrical, pointed, straight, four to six-seeded; flowers very small, purplish-red; flowering nearly all the year. Leaves, flowers and tender shoots considered by veidyans [q.v.] cooling, demulcent, and alterative; prescribed in decoction in leprous and cancerous affections; root has virtues in easing toothache, and in aphthæ; preparation made from ashes of the burnt plant used to clean dandriff from the hair; oil is got from the root, used to anoint the head in erysipelas. ——*Stunted neem* (మొక్కవేప - mokkavépa, Tel.). Title from pinnate leaves like neem. Tel. from (mokka, tel. stump + vépa, tel. margosa tree, melia azadirachta, linn.). Tel. also (mushkamu); (mukkapukokkisa); (kokkisa); (nélakaligottu), meaning ground + stereospermum chelonoides, dec. Title otherwise Ground trumpet flower tree. Botanically Bignonia genus, bignoniaceæ [vricsham, 99]. A similar title for the Pauthiry.——*Turk's neem* (ತುರುಕಬೇವು - turukabévu, Can.). Title from being introduced into India by mahomedans. Same as Large neem.——*Water neem* (جل نیم - jalním, Hind.). Same as Water zoofah.

NEEM (نیم - ním, *Hind.*). From persian. Half.——*Meetaun* (میتان - mítán, Hind.). Corruption of (ním, pers. half + tan, hind. body). A waistcoat with sleeves [sadry, sheelay].——*Neemah* (نیمہ - nímah, Hind.). From (ním, pers. half). Coat made of muslin [q.v.], has sleeves, and is tied across the breast. It descends to below the calf of the leg, and is worn by male Mahomedans in hot weather [sheelay].——*Neem tunkam* (نیم تنکا - nímtanká, Hind.). From (above + tankamu, tel. coin). A half rupee [tunkam].

NEER (जल - jala, *San.*; पाणी - páni, *Mahr.*; ماء - má, *Ar.*; آب - áb, *Pers.*; پانی - páni, *Hind.* and *Dec.*; ايار - ayár, *Malay*; ನೀರು - níru, *Can.* and *Too.*; నీళ్లు - níllu, *Tel.*; വെള്ളം - vellam, *Mal.*; වතුර - vatura, *Singh.*; நீர் - nír, *Tam.*). Title from tamul. San. from (jal, san. to be cold). Mahr. from (pána, san. drink). Pers. from (ap, san. water). Hind. from (pána, san. drink). Mal. from (vel, mal. white). Tam. from (nira, tam. to spread). Water. The water available in this country is of three kinds, viz., well water from springs [oott], river [aur] water, and tank [q.v.] water collected during rain [mazhay].— "*a*" Springs issuing from the surface of the ground are scarce, they occur however on the tops of high mountains. If the soil is dug almost anywhere veins of water may be found under the surface proceeding from the high land and the ghauts [q.v.]. The depth at which these veins occur is various. In valleys near mountains they are more superficial than elsewhere. Mineral springs do not occur on the coast, but there are several in Jeypore. There is a hot spring in the middle of the Godavery, near Bhadrachellam. The goodness of spring water depends, in a great measure, on the nature of the strata through which it runs. If these strata be impregnated with common salt [ooppoo], or any other similar substance, the water is brackish. A calcareous or gypseous soil [choonam] will produce hard water, because a portion of the calcareous salts will be dissolved by the liquid. In clayey soil [calimunn] the water will be muddy, but generally soft and good, unless the clay happen to contain a mixture of iron or matrial pyrites [auhan]. In primitive tracts of country spring water is always transparent and good. The Padaurta chintaumany says that the water of wells, or natural springs in the sandy beds of rivers, is the most wholesome of all. Well water is often contaminated by the infiltration of sewage, but it is on the whole that most preferred. Varauha mihiran says:—"Just in the same way as "there are arteries for the circulation of blood in human bodies, "there are water courses running in all directions above and "below within the earth; there are eight currents bearing the "same names as those of the eight dicpaties [ashtadicpaulacan], "and there is a large current in the centre known as mahasiray; "besides these there are hundreds of well-known minor currents "bearing distinct names."—"*b*" River water requires no special mention. It ranks in Padaurta chintaumany next after river-bed springs for purity. The water of mountain streams is considered heating.—"*c*" Tank water is generally muddy contains organic and inorganic impurities, the kind, and amount of which depend on the sanitary state and nature of the gathering grounds; it is often rendered impure by people bathing in it, and from the washing in it of clothing and even cattle. Tank water is according to Padaurta chintaumany the worst of all; nevertheless it is sweet.—"*d*" The distinction of water into hard and soft has reference to its less or greater purity. Hard waters are unfit for washing in consequence of containing sulphate of lime, and curdling in place of dissolving soap [sauboon]. 100 parts of water consist of 88·24 oxygen, and 11·76 hydrogen. Sea water contains muriate of soda, muriate of magnesia, muriate of lime, sulphate of soda.—"*e*" At certain season, especially during the monsoon [q.v.], the best water is apt to be muddy. Under these circumstances, recourse is had to the practice of rubbing the inside of a vessel or chatty [q.v.] with clearing nut [q.v.] previous to the water being poured into it.—"*f*" For the value of water to the natives, see Mazhay. There is a Tamul proverb:—தண்ணீரையும் தாயையும் பழிக்கலாமா?— "May one abuse water, or one's mother?"—"*g*" Plant first term often joining two genera. Ex., where transl. is of second term:—Ammannia baccifera (nírmélneruppu), upper + fire, cool to touch but causing blister; Calamus rotang (nírvañni), reed; Canthium didymum (níralli), nymphæa lotus; Canthium parviflorum (nírúri), creeper; Clerodendron inerme (nírnoççi), vitex negundo; Colocasia esculenta (nírchémpu), colocasia antiquorum; Commelyna communis (nírukasuvu), grass; Desmanthus virgatus (nírççundi), to shrink, flowers during rains and is sensitive to touch; Dolichandrone falcata (nirponnalyam), ailanthus malabarica; Hydnocarpus venenata (níruduchettu), to drop out + tree, from usefulness in skin diseases; Hygrophila salicifolia, var. dimidiata (nírççulli), thorny plant; Jussiæa repens (nírubattsali), basella cordifolia; Jussiæa suffruticosa (nírkkirámbu), eugenia caryophyllata, and (níruagnivendramu), ammannia baccifera; Leersia hexandra (nírvvallippullu), creeper + grass, as

growing in wet ground; Monochoria hastæfolia (nírutámara), nelumbium speciosum; Neptunia oleracea (nírutalavapu), to touch from floating on water; Pistia stratiotes (níráku), leaf; Polygonum barbatum (níralari), nerium odorum; Revenalia madagascariensis (nírvágai), albizzia lebbek; Rivea hypocrateriformis (níruboddi), macaranga peltata; Sagittaria obtusifolia (nírççémbu), colocasia nymphæifolia; Stephegyne parvifolia (nírkkadambu), anthocephalus cadamba; Vernonia anthelmintica (nírnoççi), vitex negundo. See gloss. paragraphs.—"*h*" Mammal first term. Ex., where transl. is of second term:—Delphinus perniger (nírupandi), pig; Halicore dugong (nírmanithan), man; Lutra vulgaris (nírnáy), dog. See gloss. paragraphs.—"*i*" Abruck neer, from (abhraka, san. talc) is spring water, having a mineral solution of abruck [q.v.]. Choonam neer is mineral water impregnated with choonam [q.v.]. Mazhay neer is rain water. Ooppoo neer is brackish water. Oottoo neer is spring water. Teeneer, from (tí, tam. fire) is distilled water. Tunneer, from (tan, tam. cool) is cold water. Venneer, from (vem, tam. hot) is hot water.——*Neerady moott* (நீரடிமுத்து - níradimuttu, Tam.). From (above + adi, tam. to strike + muttu, tam. pearl); useful in cooshtam [q.v.] in removing bad secretions. Plant name common to:—Baliospermum montanum; Hydnocarpus venenata. See gloss. paragraphs.——*Neerah* (نیرا - nírá, Hind.; ಎಲೆಕಲ್ಲು - elekallu, Can.; ഇളങ്കള്ള - ilankallu, Mal.; பதனி - pathani, Tam.). Hind. from (níra, san. water). Mal. from (ila, mal. fresh + kallu, mal. toddy). Tam. from (patham, tam. proper quality + nír, tam. water). Toddy [q.v.] which is fresh + drawn and not yet begun to ferment, in which condition it is always found early in the morning before sunrise [verry].——*Neerattipair* (നീരട്ടിപ്പേറു - nírattippéru, Mal.). From (above + atti, mal. to come in contact + péru, mal. birth-right). Birth-right obtained by coming in contact with water. Final sale of jenm [q v.], succeeding Otty [q.v.] when the jenmy [q.v.] after previous transactions can no longer avoid an absolute transfer. In this the jenmy for some further and final consideration gives up all connection with the land, even the remaining right of pre-emption. At the time of executing and delivering the deed, the following persons must be present:—Swajauty, a person of the same caste; Bandhoo, a relative; Pootran, literally the son, but in malabar construed to mean the heir, whether a nephew or son; Narapaty, the rajah; the writer of the deed; Tatra sambandhy, a resident round the spot. In practice the attendance of the Rajah, or the execution of the deed before the Rajah, is dispensed with. It is only necessary that he should be apprized of the transaction. The mortgagee gives two fanams [q.v.], which is placed in a small vessel of water, supposed to come off the estate. The mortgagor, holding the deed in his hand, pours the water over it, which the mortgagor receives as it falls, and either swallows it, or puts it upon his head, or upon his feet, or upon the ground, according to the relative caste of the two parties. The deed is then delivered to the mortgagee. This deed mentions generally that the full value of the property disposed of has been received, and states the boundaries of it, but it does not specify any amount received. The purchaser, in coming into possession, is bound by all the obligations which attached to the proprietor. He cannot disturb those who may be holding the property or any portion of it on Caunom [q.v.] mortgage, but merely receives the surplus rent produce in place of the former landlord. On the other hand, he comes into all the rights and privileges of the former landlord, and may pay off Otty [q.v.] mortgages and sell or transfer the property as he pleases. The deed is Caranam attipair. See vol. II, 104.——*Neeraunican* (நீராணிக்கன் - nıránikkan, Tam.). From (above + ánai, tam. command). A village peon [q.v.] superintending the water-courses [neergunty].——*Neer caul* (நீர்க்கால் - nírkkál, Tam.). From (above + kál, tam. channel). A water-course [caul].——*Neer choondy* (நீர்ச்சுண்டி - nírççundi, Tam.). Tam. from (above + shundu, tam. to shrink); flowers during rains and is sensitive to touch. Title otherwise Water mimosa. Botanically Desmanthus virgatus, willd., leguminosæ [vricsham, 48]. Alias Mimosa virgata. Suffruticose; stem erect, angled; leaves bipinnated; pinnæ three to four pair, with a large concave gland between the lowest pair; leaflets fifteen to twenty pair; peduncles axillary, about as long as the leaves, naked, bearing a globose, few-flowered head; legume narrow-linear, many-seeded; flowers small, white; flowering in the rainy season. No other species here.——*Neer cooly* (நீர்க்கூலி - nírkkúli, Tam.). From (above + kúli, tam. wages). Water-rate; includes either Teervay jausty [q.v.] or Fusl jausty [q.v.]——*Neercorattay* (پانی کا سانپ - pánikásámp, Dec.; ನೀರುಹಾವು - níruhávu, Can.; నీళ్లకొయ్య - níllakoyya, Tel.; നീർമണ്ഡലി - nírmandali, Mal.; நீர்க்கொறட்டை - nírkkorattai, Tam.). Title from tamul. Dec. from (pání, hind. water + sámp, hind. snake). Can. from (níru, can. water + hávu, can. snake). Tel. from (níllu, tel. water + koyya, tel. stick). Mal. from (nír, tam. water + mandali, mal. the snake). Tam. from (nír, mal. water + kuradu, tam. pincers); means water-hold-fast; from the fact that when it bites it will not let go till the flesh is torn out. Title otherwise Checkered snake. Tropidonotus quincunciatus, schleg., colubridæ [paumb], ophidii colubriformes, ophidia [sarpam] reptilia [sarpy, 17], of naturalists [jantoo]. From its frequenting wet paddy fields is commonly reckoned a water snake, but it is not venomous.——*Neercutty* (நீர்க்கட்டி - nírkkatti, Tam.). From (above + kattu, tam. to confine). Same as Neergunty.——*Neergunty* (నీరుగంటి - níruganti, Tel.). From (above + kattu, tel. to confine). Water distributor of a village. The Neergunty's province is to take care of the reservoirs, frequently to inspect the toom [q.v.] or outlet from the tank [q.v.] to the fields, to see that it be not choked with sand or dirt, to prevent every unnecessary and unusual expense of the water, which it is his duty to distribute to each field under the orders of the village headman impartially in quantities proportioned to the extent of the field and stage of the crop [inam].——*Neermoolly* (कोकिलाक्ष - kókiláksha, San.; कोलिस्ता - kólistá, Mahr.; कोंल्बुलेझाड - komlbuléjháda, Conc.; تال مکھانےکاپیر - tálmakhánekáper, Hind.; کولسے کا جھاڑ - kolsekájhár, Dec.; ಕೊಳವಂಕೆಗಿಡ - kolavankegida, Can.; ಕೋವೆಮುಳ್ಳುದೈ - kóvemulludai, Too.; నీరుగొబ్బి - nírugobbi, Tel.; വയൽച്ചുള്ളി - vayalchulli, Mal.; ඉකිරි - ikiri, Singh.; நீர்முள்ளி - nírmulli, Tam.). Title from tamul. San. from (kókila, san. cuckoo + aksha, san. eye); from flowers. Hind. from sanscrit. Dec. from (kolsá, hind. charcoal + jhár, hind. tree) [indian nettle, indian nightshade]. Can. from (kola, can. pond + vanka, can. crooked + gida, can. plant). Tel. from (níru, tel. water + gobbi, tel. the plant). Mal. from (vayal, mal. field + chulli, mal. thorny plant). Tam. from (nír, tam. water + mulli, tam. thorny plant). San. also (gókshura), meaning cow + razor; (kulika), meaning cluster; (ikshura), meaning like sugar-cane; (ikshugandha), meaning sugar-cane, saccharum officinarum, linn. + smell [naunal, nerinjy]; (ékakantaka), meaning having one thorn; (súryabhíra), meaning sun-fearing plant; (gókantaka), meaning cow + thorn [nerinjy]; (kándékshu), meaning knot + sugar-cane, by reason of knots. Mahr. also (tálimakhána), meaning seed of hygrophila spinosa, t. and. Hind. also (gochru); (ikshuganda); (gokshura), from sanscrit meaning cow + razor. Can. also (kolavalike); (mullankóle); (górimidi); (níruppi). Tel. also (gobbi); (korimidi) [coratty pausy]. Title otherwise Cow thorn, Cuckoo's eye, Long-leaved barleria, Water thorn. Botanically Hygrophila spinosa, t. ander, acanthaceæ [vricsham, 101]. Alias Asteracantha longifolia; Barleria hexacantha, longiflora, longifolia; Ruellia longifolia. Annual; stem erect, bluntly quadrangular, hispid; leaves opposite, ensiform, very long; calyx four-cleft; corolla funnel-shaped, five-cleft, one division deeper than the rest; flowers in whorls, axillary, blue or bright violet; flowering in rainy season; spines, three on each side of the stem, equal in length to the whorls; swampy places, very common; native of west coast. The seeds are one of the Punchabeejam or five seeds, the others being those of Celastrus [malkangany], Fenugreek [maitee], Ajwaun [q.v.], and Cumin [jeerah]. Roots often biennial, tapering, with numerous rootlets; the seeds are small and flattish, of irregular form and brown color, the largest $\frac{1}{16}$ of an inch long and $\frac{1}{16}$ broad; when placed in the mouth they immediately become coated with a large quantity of extremely tenacious mucilage, which adheres to the tongue and palate and is of rather agreeable flavor. The roots are employed in dropsical affections and gravel; the leaves boiled in vinegar [caudy] are diuretic. Other common species are:—phlomoides, salicifolia, serphyllum.——*Neer moozhoogy* (நீர்முழுகி - nírmuzhugi, Tam.). From (above + muzhugi, tam. diver). Men who, when the tanks are full and the sluices are out of order, dive down into the sluice and remove the obstruction, &c., a perilous occupation [inam].——*Neermothal* (നീർമുതൽ - nírmutal, Mal.). From (above + mutal, mal. principal. The property in water; as a mode of transfer, is the same as Coodimaneer [otty]. See vol. II, 104.——*Neer nilay* (நீர்நிலை - nírnilai, Tam.). From (above + nil, tam. to stand). Marshy ground.——*Neeroory* (भूम्यामलक - bhúmyámalaka, San.; भुईआवळा - bhuíávalá, Mahr.; भूम्यावाळि - bhúmyáváli, Conc.; بهوئیں آنولہ - bhuínáunlah, Hind. and Dec.; ಕಿರುನೆಲ್ಲಿ - kirunelli, Can.; ನೆಲನೆಲ್ಲಿ - nelanelli, Too.; నేలఉసిరిక - nélausirika, Tel.; നീരുരി - níruri, Mal.; පිටවක්කා - pitavakká, Singh.; கீழாநெல்லி - kízhánelli, Tam.). Title from malayalam. San. from (bhúmi, san. ground + ámalaka, san. phyllanthus emblica, linn.). Hind. from sanscrit. Mahr., &c., from sanscrit. Can. from (kiru, can. small + nelli, can. phyllanthus emblica, linn.). Too. from (nela, too. ground + nelli, too. phyllanthus emblica, linn.). Tel. from (néla, tel. ground + usirika, tel. phyllanthus emblica, linn.). Mal. from (nír, mal. water + úri, mal. creeper). Tam. from (kízh, tam. below + nelli, tam. phyllanthus emblica, linn.); from lowly habit and resemblance. San. also (bhútadhátrí), meaning earth nelly; (putrashréní), meaning multitude of sons; (pítabahup'hala), meaning yellow + many + fruit. Mal. also (kízhánelli); (cherunírúri), meaning small water creepper; (kízhkáynelli), meaning nelly with fruits below. Singh. also (sadáp'hala), meaning always + fruit [cocoanut]. Tam. also (kízhkkáynelli), meaning below + fruit + phyllanthus emblica, linn.; (shimutti). Title otherwise Chimooty, Indian annual phyllanthus, Kizhanelly. Botanically Phyllanthus [aumlacam] niruri, müll., var. genuinus, euphorbiaceæ [vricsham, 118]. Specific name from malayalam. Alias Nymphanthus niruri; Uriuaria erecta. Annual, erect, ramous; branches herbaceous, ascending; floriferous branchlets filiform; leaves small, elliptic, mucronate, entire, glabrous; flowers axillary; male flowers minute, two or three with one

longer pedicelled; female in each axil, terminating in three transverse anthers; capsule globose, glabrous, three-angled, with two seeds in each cell; seed triangular; flowers minute, greenish; white root; leaves bitter; a common weed. Root, leaves, and young shoots used medicinally as deobstruent and diuretic; root and leaves, either in powder or decoction, used in jaundice or bilious complaints; young shoots in infusion given in dysentery; substituted for british copaiba and sweet nitre; quoted in pharm., non-officinal. An undershrub species urinaria called Red neeroory from color of stems has similar diuretic properties. The poolah [q.v.] shrub is called Wild neeroory. Large neeroory is melanthesopsis patens, muller, euphorbiaceæ [vricsham, 118]; alias melanthesa obliqua, turbinata; phyllanthus turbinatus; leaves membranaceous; female flowers solitary, males proceeding from minute about six to nine-bracteolated racemules; calyx obconical, sharply lengthened out, and crenately twelve-lobed round the base of the segments; large shrub; fruit size of a pea [calauyam]; varieties are genuina, oblongifolia, turbinata, vulgaris.——*Neerpayir* (நீர்ப் பயிர் - nírppayir, Tam.). From (above + payir, tam. crop). Wet cultivation [nunjah].——*Nirvala* (वरुण - varuna, San.; वायवरण - váyavarana, Mahr.; برنا - barná, Hind.; بیل پھل کا جھاڑ - belphalkájhár, Dec.; ಬಿಲಪತ್ರಿ - bilapatri, Can.; ನಿರುಜನಿ - nirujani, Coorg; తుడెమదిరెంగి - tudemadirengi, Too.; ఉలిమిడి - vulimidi, Tel.; നീർവ്വാൾ - nírvvál, Mal.; වරණ - varana, Singh.; மாவிலங்கை - mávilangai, Tam.). Title from malayalam. San. from (vri, san. to envelope). Hind. from sanscrit. Dec. from (belphal, hind. fruit of ægle marmelos, corr. + jhár, hind. tree) [bael]. Can. from (bilva, san. the tree, ægle marmelos, corr. + patri, san. leaf). Mal. from (nír, mal. water + vilá, mal. feronia elephantum, corr.). Tam. means great bael [ashy babool, weaver's beam]. San. also (tiktasháka), meaning bitter herb; (ashmaríghna), meaning gravel, the disease + destroyer; (pashugandhá), meaning cow + smell; (ajápá); (vasaha); (varana). Hind. also (belpatrí), meaning bael-leafed. Dec. also (barmíkájhár). Can. also (nirválá); (holenekkimara), meaning river + to lick + tree; (nárumbéle); (mavalanga). Tel. also (usiki); (urumitti); (tellaulimidi), meaning white + the tree; (bilvamu); (márédu), meaning tree + king [bael]; (peddaulimidi), meaning large + cratæva religiosa, forst.; (chinnaulimidi), meaning small + the tree. Mal. also (nírmátalam), meaning water + punica granatum, linn. Singh. also (lunuvarana), meaning salt + the plant. Tam. also (vilvam) [bael]; (periyamávilingai), meaning large + the tree; (shinnamávilangai), meaning small + the tree; (athisáranam). Title otherwise Garlic pear, Holy garlic pear, Mauvilingam, Three-leaved caper tree, Water wood-apple. Botanically Cratæva religiosa, forst., capparideæ [vricsham, 11]. Alias Capparis nurvala, roxburghii, trifoliata; Cratæva inermis, nurvala, tapia, Shrub or small tree; flowers whitish, or cream-colored; Malabar. Gives to pharm. leaves, non-officinal; somewhat aromatic, slightly bitter, stomachic; root has sub-aromatic and bitterish taste, with alterative quality. Wood yellowish-white, when old turning light-brown, moderately hard, even-grained; used for drums, models, writing-boards, combs and in turnery. There are two well-known varieties:—"*a*" Large nirvala is Cratæva religiosa, forst., var. nurvala, ham. Tree, 15–20 feet; leaves trifoliolate; leaflets ovate-lanceolate, acuminated, lateral ones unequal at the base; limb of the petals ovate-roundish; torus hemispherical, very ovoid; calyx four-sepalled; petals four, unguiculate; berry stipitate, pulpy inside; flowers greenish white, with red stamens; racemes terminal. Leaves aromatic, slightly bitter, and stomachic; root having alterative qualities; juice of bark given in convulsions and flatulency, and boiled in oil externally applied in rheumatism.—"*b*" Small nirvala or three-leaved caper, is Cratæva religiosa, forst., var. roxburghii. Tree; flowers large, white, becoming cream-colored with purple filaments; common on banks of rivers, much planted by natives; fruit hard, globose and woody, something like wood-apple [q.v.]; wood soft and easily cut, but tolerably tough, and used for carving models, making writing-boards, and combs, &c.

NEEROO (भस्म - bhasma, *San.*; راکھ - rákh, *Hind.* and *Dec.*; ابو - abu, *Malay*; బూడిద - búdide, *Tel.*; നീറു - níru, *Mal.*; අළු - alu, *Singh.*; நீறு - níru, *Tam.*). San. from (bhas, san. to consume). Hind. and Dec. from (raksha, san. protector). Tel. from (bhúti, san. ashes). Mal. from tamul. Tam. also (shámbal). Ashes. Earthy part of any substance after it has been burnt. Distinguish from Neer, water.——*Pooneer* (பூநீறு - púníru, Tam.). Means flower ashes. Saline efflorescence. See sep. title.——*Tirneer* (திருநீறு - tiruníru, Tam.). Tam. from (tiru, tam. holy). Ashes of burnt cow-dung [shauny] with which Shiva [q.v.] is said to smear his body and hence in imitation of him his followers. Also ashes taken from fire of an agnihotry [q.v.] Bramin [q.v.] or any sacrificial fire. The three transverse lines made with the sacred ashes on the forehead of Sheivites are called Tripoondram [q.v.]. Consecrated by muntram [q.v.], it is worn on forehead or rubbed on whole body as a charm or for soul's benefit. Balls of cow-dung ashes are sold in bazaar [q.v.]. Used in Hindoo houses in scouring brass plates and glassware, also used in cleaning military accoutrements and brass mountings of harness, &c. [vibhooty].

NEEYATT (نیت - níyat, *Hind.*). From (navá, ar. intend). Will. Royal decree.

NEGAPATAM * (ناگپٹن - nágpatan, *Hind.*; நாகப்பட்டணம் - nágappattanam, *Tam.*). From (nága, san. snake + pattana, san. town) [naug]. Tam. also (nágai), meaning snake + place; also (tirunágai), meaning holy + snake place. Sanscrit name (nágapurí), meaning snake town; also (cháritrapura), meaning historic fame + town [cauveryputnam]. Greek νίγαμος. —**(1)** Talook; Tanjore dist., Tahsildar's pay Rs. 250; area 240 square miles; pop. 220,348; language Tamul. Central coast talook. Boundaries; North Nunnilam talook and Caricaul territory, east the sea, south Tritrapoondy talook, west Nunnilam and Munnargoody talooks. Flat level sloping towards the east and south-east. Soil, sandy along the sea coast and black clayey in the interior. Export of rice [q.v.]. Import of timber, betel-nuts [q.v.] and spices, dyeing cloth, and railway workshop materials. Oodambadikay, Pandaviyaur, Seetaur, Velliyaur, Vettaur and Yedaiyaur, give irrigation. Camping ground at Caudambaudy. Places of archæological interest:—Ayyinaur-covilputt, Coottamporetaunirooppoo, Eivacoody, Keevalore, Keezhaiyore, Kidarangandaun, Nagore, Negapatam, Poyyore, Shivanandaurcoil, Sikkil, Taivore, Tappanam pooliyore, Tircar-vausal, Tircoovalay, Tirpoondy, Tirvoymore, Trivarore, Tyauga-rajapooram, Vadacoody, Vadakk poyyore, Vazhivalam, Yettoo-coody. Principal trig. stations:—Nirdhanamungalam, Shila-goory. The leading places &c., in the talook are the following. ——*Andanapett* (அந்தணப்பேட்டை - andanappéttai, Tam.). From (andanan, tam. bramin + péttai, tam. village). Town; pop. 4,519; acres 716; lat. 10° 46′; long. 79° 52′; from Negapatam W.S.W. 1¾ miles; from Tanjore E. 44 miles; from the sea W. 2 miles. Shiva temple. Copper [taumram] and brass [pittalay] vessels manufactured.——*Devoor* (தேவூர் - tévúr, Tam.). From (té, tam. deity + úr, tam. village). Sanscrit name (dévapura), meaning god + town. Village; pop. 1,313; acres 1,162; lat. 10° 44′; long. 79° 46′; from Negapatam W.S.W. 8 miles; from Tanjore E. 40 miles; from the sea W. 8 miles. On the Cadoovaiyaur. Old Shiva temple with inscriptions, one dated A.D. 1425.——*Keevalore* (கீழ்வளூர் - kízh-valúr, kívalúr, * Tam.). From (kízh, tam. east + val, tam. a hillock + úr, tam. village). Village, Railway station; pop. 2,108; acres 1,387; lat. 10° 46′; long. 79° 47′; height 28 feet; from Negapatam W. 7 miles; from Tanjore E. 40 miles; from the sea W. 7 miles. In 1758 ransacked by Lally in the hopes of finding treasure. Old Shiva temple with inscriptions.——*Nagore* (நாகூர் - nágúr, Tam.). See sep. title.——*Negapatam* (நாகப்பட்டணம் - nágappattanam, Tam.). See below.——*Nirdhanamungalam* (நிர்த்தனமங்கலம் - nirttanamangalam, Tam.). From (nis, san. without + dhana, san. riches + mangala, san. prosperity). Trig. station; lat. 10° 42′ 24·76″; long. 79° 51′ 6·13″; from Negapatam S.S.W. 5 miles; from Vadavore W. ½ mile; from the sea W. 3 miles.——*Pooravacherry* (புறவச்சேரி - puravaççéri, Tam.). From (puravam, tam. forest + shéri, tam. village). Village; pop. 2,661; acres 657; lat. 10° 45′; long. 79° 51′; from Negapatam W. 3 miles; from Tanjore E. 45 miles; from the sea W. 3 miles. Weaving centre. ——*Seetaur* (சித்தாறு - shittáru, Tam.). See sep. title.——*Shilagoory* (சிலகுரி - shilaguri, Tam.). Trig. station; lat. 10° 39′ 32·67″; long. 79° 53′ 40·85″; from Negapatam S. 7 miles; from Tirpoondy N.E. 4 miles; from Velangauny S. 1½ miles. On the seashore.——*Sikkil* * சிக்கில் - shikkil, Tam.). From (shikkil, tam. temple + il, tam. place). Sanscrit name (mallikáranya), meaning the plant, jasminum sambac, ait. + forest. Town, Railway station; pop. 2,648; acres 1,288; lat. 10° 45′; long. 79° 51′; height 17 feet; from Negapatam W. 3 miles; from Tanjore E. 44 miles; from the sea W. 3 miles. Old Shiva temple with inscriptions.——*Tirvarore* (திருவாரூர் - tiruvárúr, Tam.). See sep. title.——*Vadoogacherry* (வடுகச்சேரி - vadugaççéri, Tam.). From (vadugan, tam. member of the vaduga caste + shéri, tam. village). Village; pop. 726; acres 998; lat. 10° 43′; long. 79° 49′; from Negapatam W. 7 miles; from Tanjore E. 42 miles; from the sea W. 6 miles. On the Cadoovaiyaur.——*Velangauny* (வேளாங்காணி - vélángáni, Tam.). From (vélán, tam. member of the vellála caste + káni, tam. land). Village, Port; pop. 2,682; acres 1,020; lat. 10° 41′; long. 79° 53′; from Madras S.S.W. 166 miles; from Negapatam S. 6 miles; from Tanjore E.S.E. 47 miles; from Topetoray N. 19 miles. The Cadoovaiyaur flows past. Open road-stead. Church of some importance resorted to during annual festival by R.C. christians.——*Vettacauraniroopp* (வேட்டக்காரனிருப்பு - véttakkáraniruppu, Tam.). From (véttaikkáran, tam. hunter + iruppu, tam. dwelling). Village; pop. 2,098; acres 3,224; lat. 10° 34′; long. 79° 53′; from Negapatam S. 14 miles; from Tanjore E.S.E. 48 miles; from the sea W. 1½ miles.—— **(2)** Deputy tahsildarry, Tanjore district. Pay Rs. 100.—— **(3)** Town, Municipality, Port, Railway station, Head-quarters of Head assistant collector, Talook, Executive engineer, Assistant commissioner of salt and abkary revenue, Telegraph office, Subordinate judge, District moonsif, and Deputy tahsildar, Place of pilgrimage; Tanjore dist., Negapatam tal.; pop. 59,221; acres 2,059; lat. 10° 46′; long. 79° 53′; height 13

feet; from Combaconam S.E. 34 miles; from Madras S.S.W. 160 miles; from Mayavaram S.S.E. 26 miles; from Munnargoody E.N.E. 27 miles; from Nagore S. 4 miles; from Tanjore E. 48 miles; from Velangauny N. 6 miles. At the mouth of the Cadoovaiyaur on an open level, sandy expanse, having a gentle slope to the sea. Chief port of Tanjore and terminus of the South indian railway. Its harbour has a fixed white dioptric light, 82 feet above high water-mark. Light on the jetty near the river mouth; lat. 10° 45′ 30″; long. 79° 50′ 20.″ White; fixed; 14 miles range; visible from all directions seaward, masonry column painted white guide to anchorage. The estuary is capable of receiving small coasting-vessels. With Nagore, which forms part of the municipality, it contains a large Lubbay [q.v.] population. One of the earliest Portuguese settlements on the Coromandel coast [q.v.]. Taken from the Portuguese by the Dutch in 1660 and become the head-quarters of the Dutch trade on the Coromandel coast. Taken from the Dutch by the English in 1781. After the cession of Tanjore territory by treaty in 1799, Negapatam became the head-quarters of the Collector and continued to be so until 1845, when the Collector's head-quarters were removed to Tranquebar. Fourteen temples, all old, twelve Shiva and two Vishnoo. In a Shiva temple is a stone, bearing an epitaph in Dutch to the memory of a European who died in A.D. 1777. Ancient brick tower, 70 feet high, supposed of Booddhist [booddha] or Jeina [q.v.] origin and known as the China tower. The ruins of the old Dutch fort are surrounded by a ditch filled up in many places. Government salt depôt, Wesleyan mission establishment. Ships and coasters maintain a considerable trade, principally in rice, with Ceylon, Burmah and Straits settlements. The following are the travelling distances by road from Negapatam to different places:—

NEILGHERRY (நீலகிரி - nílagiri, *Tam.*). From (níla, san. blue + giri, san. mountain) [neel]. Sanscrit name (astagiri), meaning mountain behind which the sun sets. Old Tamul name, Malainaud, or hill country. One of the ranges of the Hindoo Pooraunic cosmography has the same name; but the title is not uncommon. Revenue district; situated inland, containing the hill plateau and a portion of Wynaud; between 11° 11′ and 11° 42′ N. lat., and between 76° 17′ and 77° 01′ E. long.; bounded N. by Mysore, E. by Coimbatore district, S. by Coimbatore and Malabar districts, W. by Malabar district; square miles 957; pop. 91,034; language Canarese, Tamul and Malayalam. Contains rivers Moyaur, Pycarrah, and Beypore. The whole area of the district is represented by the following sub-areas:—Coondah division, Merkoonaud division, Paranginaud division, Todanaud division, Wynaud division being the south-east portion of Wynaud. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Ootacamund. Head assistant collector, Pundalore, in charge of South-east Wynaud division. Deputy tahsildars; Coonoor, Rs. 100, range situated in the south of Paranginaud division and embracing Paranginaud and Merkoonaud divisions; Goodalore, Rs. 100, range situated in the Numbalagode amshom, South-east Wynaud division; Ootacamund, Rs. 100, range situated in the Todanaud division and embracing Todanaud and Coondah divisions. Similarly judicial officers:—Additional sessions judge, Ootacamund; Subordinate judge, Ootacamund, with civil jurisdiction over the whole district; District moonsif, Goodalore with jurisdiction extending over Wynaud south-east division. Similarly Public works officers:—District engineer, Ootacamund; Sub-divisional officers, Nos. 1 and 2. Contains Registration sub-districts Coonoor, Goodalore and Ootacamund. Contains Forest ranges Coonoor, Kotagherry, Kullaur, Mailore, Moothoomullay, Nediwuttam, Ootacamund and Seegore. Contains Municipalities Coonoor and Ootacamund. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—particulars about towns, II, 48; comparative population, II, 172; location of revenue officers, II, 389; registrars' and sub-registrars' stations, II, 421; rain-guage stations, II, 428; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; missionary stations, II, 455; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 516. A special gazetteer account of the whole district is given at II, 107. For Neilgherry sholahs see Sholah. The following are the principal elevations:—Bevoybetta, 8,488 feet; Coondabetta, 6,555; Coondamoogy, 7,816; Coondah peak, 8,353; Coonoor, 5,886; Devarbetta, 6,571; Devasholahbetta, 8,380; Dimhutty, 6,330; Dodabetta, 8,760; Hokkabetta, 7,267; Kodanaud, 6,815; Kotagherry, 6,571; Macoorty peak, 8,402; Oorbetta, 6,915; Ootacamund, 7,361; Tamrabetta, 7,292. The following table gives various travelling distances in miles on the plateau. These are by new carriage roads, but by old roads the distances are often shorter:—

Avalanchey to Banghy tappaul 9	Nediwuttam to Goodalore ... 9
Banghy tappaul to Sisparra ... 9	Ootacamund to Avalanchey ... 13
Berliaur to Kullaur ... 4	Ootacamund to Bilicull ... 7
Coonoor to Berliaur ... 12	Ootacamund to Calicut ...103
Coonoor to Hoolicull ... 5	Ootacamund to Coonoor ... 11

——(1) The principal places, &c., in the district are the following.——*Adderley estate* (ಗೂಬೆತೋಟ - gúbetóta, Can.). Can. from (gúbe, can. owl + tóta, can. garden). Coffee estate, Berliaur village, Paranginaud; acres 407; lat. 11° 21′; long. 76° 54′; from Coonoor E. 4 miles. In Berliaur village.——*Annappa sholah* (അന്നപ്പശോല - annappashóla, Mal.). From (annappa, can. proper name + shólai, tam. plantation). Coffee estate, Moonnanaud amshom, S.E. Wynaud; from Nelacottah W.N.W. 2 miles. 16·45 acres.——*Arattapauray* (അരാട്ടപ്പാറ - arattappára, Mal.). From (aratti, tam. fear + párai, tam. rock). Tea estate, Ouchterlony valley; from Goodalore S.S.W. 3 miles. 295 acres. ——*Arvencaud* (அரவங்காடு - aravangádu, Tam.). See sep. title.——*Atticull* (ಅತ್ತಿಕಲ್ಲು - attikallu, Can.). From (atti, can. fig tree, ficus glomerata, willd. + kallu, can. stone). Cinchona estate, Todanaud; from Ootacamund N.N.W. 5 miles. 90 acres. ——*Avalanchey* (ಅವಲಾಂಚೆ - avalánche, Can.) See sep. title. ——*Bairhutty* (ಬೇರಹಟ್ಟಿ - bérahatti, Can.). From (béra, can. trade + hatti, can. shepherd village). Hamlet, Paranginaud; lat. 11° 23′; long. 76° 50′. Hamlet of Jackatalla [q.v.] village. Also Tea [q.v.] and Blue gum [q.v.] estate, Paranginaud; from Wellington barracks N.E. 1 mile. 49 acres.——*Baitmund* (ಬೆಟ್ಟಮಂದು - bettamandu, Can.). From (betta, can. mountain + mandu, can. todah hut). Village, Hill, Paranginaud division; lat. 11° 24′; long. 76° 50′; from Coonoor N.N.W. 4 miles; from Ootacamund E. 6 miles.——*Barahuddy* (ಬರೆಅಡಿ - bareadi, Can.). From (bare, can. bare + adi, can. bottom). Tea and cinchona estates, Paranginaud; from Kotagherry E. 3 miles. 166 acres. ——*Bear hill* (ಡೇರ್ಬೆಟ್ಟ - dérbetta, Can.). See sep. title.——*Bellatty* (ಬೆಳ್ಳಟ್ಟಿ - bellatti, Can.). From (bel, can. white + hatti, can. shepherd village). Coffee estate, Coondah division, 58 acres.——*Belliky* (ಬೆಳ್ಳಿಕೆ - belliki, Can.). See sep. title. ——*Benhope* (மரப்பாலம் - marappálam, Tam.). Tam. from (maram, tam. wood + pálam, tam. bridge). Coffee estate, Paranginaud; lat. 11° 20′; long. 76° 52′. On Coonoor ghaut. About 179 acres.——*Benhutty* (ಬನಹಟ್ಟಿ - banahatti, Can.). From (bana, can. temple + hatti, can. village). Coffee estate, Merkoonaud; from Coonoor S.W. 4 miles. 155 acres. ——*Berliaur* (ಬರಲಿಯಾರು - baraliyáru, Can.). See sep. title.——*Bigooly* (ಬಿಗುಳಿ - biguli, Can.). From (bigu, can. to swell). Name of the Coondah river.——*Bilicull* (ಬಿಳಿಕಲ್ಲು - bilikallu, Can.). See sep. title.——*Billimullay* (ಬಿಳ್ಳಿಮಲೆ - billimale, Can.). From (bili, can. tree, rhododendron arboreum, smith + male, can. hill). Cinchona; in Hoolicull village. 3 miles from Coonoor S.W.; 3 acres.——*Brooklands* (புரூக்லாண்ட்சு - purúglándsu, Tam.). Tea estate; acres 149; lat. 11° 21′; long. 76° 51′. A tea estate; within Coonoor town.——*Burnside* (ಗೊಟ್ಟೆಯಟ್ಟು - gotteyattu, Can.). Can. from (gotte, can. fissure

+ attu, can. to burn). Coffee estate; acres 92; 3 miles east of Kotagherry in Conacary village.——*Canavatty* (ಕಣವಟ್ಟಿ - kana- vatti, Can.; கணவட்டி - kanavatti, Tam.). From (kanive, can. pass + hatti, can. shepherd village). Coffee and cinchona estates, Paranginaud; from Kotagherry S.E. 3 miles. 101 acres. ——*Canning seat* (கானிங்க்சிட்டு - káningsíttu, Tam.). See sep. title.——*Carabill sholah* (ಕರಬಿಲ್ಲುಶೋಲೆ - karabillushóle, Can.). From (kara, san. hand + billu, can. bow + shóle, can. cluster of trees). Coffee estate, Todanaud; from Ootacamund N. 7 miles. 51 acres.——*Catherine fall* (கோட்டக்கிரியருவி - kóttakkiriyaruvi, Tam.). See sep. title.——*Caulairy* (ಕಾಲೇರಿ - káléri, Can.). From (kálu, can. quarter + éri, can. tank-bund). Hill, Coondah division; lat. 11° 18′; long. 76° 36′; height 8,622 feet; from Ootacamund S.W. 13 miles; from Macoorty S.S.E. 6 miles.——*Caundal* (காந்தல் - kándal, Tam.). See sep. title. ——*Cauval combey* (ಕಾವಲಕೊಂಬೆ - kávalakombe, Can.). From (kával, tam. guard + kombé, can. kurumbar village). Coffee estate, Merkoonaud. E. of Hoolicull droog. 51 acres.—— *Chappatody* (ചപ്പത്തോടി - chappattódi, Mal.). From (chappu, mal. leaf + todi, mal. garden). Coffee and cinchona estates, Cherangode amshom, S.E. Wynaud; from Cherambaudy N. ¾ mile. 471 acres.——*Cherambaudy* (ചേരമ്പാടി - chérampáti, Mal.). See sep. title.——*Cherangode* (ചേരങ്കോട - chérankótu, Mal.). See sep. title.——*Chinna coonoor* (ಚಿನ್ನಕುನ್ನೂರು - chinna- kunnúru, Can.). From (chinna, can. small + kunnúru, can. village so called). Hill, Todanaud division; lat. 11° 29′; long. 76° 47′; from Ootacamund N.N.E. 6 miles. Overhangs the Moyaur valley.——*Chinna dodabetta* (ಚಿನ್ನದೊಡ್ಡಬೆಟ್ಟ - chinnadod- dabetta, Can.). From (chinna, can. small + doddabetta, can. the great hill). So called in contradistinction to Dodabetta proper. Hill, Merkoonaud division; lat. 11° 22′; long. 76° 45′; height 7,849 feet; from Coonoor W.N.W. 7 miles; from Ootacamund S. 3 miles. Behind the Lawrence Asylum.——*Cholaudy* (ചോലാടി - chóláti, Mal.). From (chóla, mal. grove + nátu, mal. country). Coffee and cinchona estates, Cherangode amshom, S.E. Wynaud; from Cherambaudy W.N.W. 2 miles. 739·74 acres.——*Chowgat- cully* (ಚೌಗತಕಳ್ಳಿ - chaugatakalli, Can.). From (chauka, can. square + kalli, can. milk-hedge, euphorbia genus). Village, Government plantation, Todanaud division; from Ootacamund W. 4 miles.——*Clifton* (கிலிப்டன் - kilibdan, Tam.). Estate, Moonnanaud amshom, S.E. Wynaud; from Nelacottah N. 1¾ miles. 350 acres.——*Codamoolay* (ಕೋಡಮೂಲೆ - kódamúle, Can.). From (kóda, can. monkey + múle, can. corner). Hamlet of Berliaur village, Paranginaud; acres 423; lat. 11° 22′; long. 76° 53′; from Coonoor E.N.E. 3 miles.——*Codamund* (ಕೋಡಮಂದೆ - kódamande, Can.). From (kóda, can. monkey + mandu, can. cattle-fold). Estate, Merkoonaud; from Coonoor S.W. 6 miles. 38 acres.——*Colacumbey* (ಕೊಲಕಂಬೆ - kolakambe, Can.). See sep. title.——*Colcaray* (ಕೊಳಿಕರೆ - kolikare, Can.). Coffee estate, Paranginaud; from Kotagherry S.E. 5 miles. 82 acres.—— *Conabetta* (ಕೋನಬೆಟ್ಟ - kónabetta, Can.). From (kóné, can. crooked + betta, can. hill). Hill, Todanaud division; lat. 11° 30′; long. 76° 46′; height 6,777 feet; from Ootacamund N.N.E. 7 miles. Also called Seegore peak.——*Conavacoray* (ಕೊಣವಕೊರೈ - konavakorai, Can.). From (konava, can. a badaga name + korai, can. a small shola). Hamlet of Jackanairy village, Paranginaud; lat. 11° 25′; long. 76° 56′; from Kotagherry S.E. 2 miles.—— *Coocalbetta* (ಕೂಕಲ್‌ಬೆಟ್ಟ - kúkalbetta, Can.). From (kú, tam. the sound + kal, can. stone + betta, can. hill); echoing rocks. Hill, Todanaud division; lat. 11° 28′; long. 76° 50′; height 7,161 feet; from Ootacamund N.E. 8 miles; from Kotagherry N.W. 6 miles. At almost an equal distance from it and Ootacamund. ——*Coolyaud* (കുള്ളിയാട - kulliyátu, Mal.). From (kulli, mal. female dwarf + nátu, mal. country). Coffee estate, Numbala- gode amshom, S.E. Wynaud; from Goodalore N.E. ½ a mile. Also a Chetty [q.v.] village. 426·50 acres.——*Coomal* (ಕೂಮಲ್ - kúmal, Can.). From (kúmal, tam. proper name); after a coorumban [q.v.] of that name. Coffee estate, Merkoonaud; on S. slopes of Neilgherries overlooking Bhawauny valley. 89 acres.——*Coondabetta* (ಕುಂದಬೆಟ್ಟ - kundabetta, Can.). From (kunru, tam. hill + betta, can. hill). Hill, Coondah division; lat. 11° 17′; long. 76° 43′; height 6,555 feet; from Ootacamund S.S.W. 9 miles.——*Coondah* (ಕುಂದ - kunda, Can.). See sep. title. ——*Coondamoogy* (ಕುಂದಮೂಗೆ - kundamúge, Can.). From (kunru, tam. hill + múge, can. dumb woman). Hill, Paranginaud division; lat. 11° 24′; long. 76° 51′; height 7,690 feet; from Coonoor N. 4 miles; from Ootacamund E. 7 miles. Kotagherry road passes round the eastern face and there is a Government Australian tree [australian gum tree] plantation known as Rallia [q.v.].——*Coonoor* (ಕುನ್ನೂರು - kunnúru, Can.). See sep. title.——*Coorumbaudy* (ಕುರುಂಬಾಡಿ - kurumbádi, Can.). From (kurumba, can. shepherd + pádi, tam. village). Coffee estates, Paranginaud. Above Coonoor ghaut road. From Coonoor E.S.E. 3 miles. 76 acres.——*Coottacaud* (குட்டக்காடு - kuttakkádu, Tam.). From (kuttam, tam. smallness + kádu, tam. jungle). Hill, Todanaud division; lat. 11° 25′; long. 76° 40′; height 7,933·4 feet; from Ootacamund W.N.W. 5 miles; from Doda- betta W.N.W. 7 miles.——*Cotacull* (ಕೋಟಕಲ್ಲು - kótakallu, Can.). From (kóta, can. tribe so called + kallu, can. stone). Coffee estate, Merkoonaud; from Mailoor S. 3 miles. 100 acres.——

Craigmore (ಬರಲನೆ - baralane, Can.). Can. from (baralu, can. dry + ane, can. bund). Coffee and Cinchona estate, Merkoonaud; acres 300; lat. 11° 18′; long. 76° 47′; from Kartairy S. 3 miles.——*Croremund* (ಕ್ರೂರಮಂದು - krúramandu, Can.). See sep. title.——*Culcoodiyore* (ಕಲ್‌ಕುಡಿಯೂರು - kalkudiyúru, Can.). From (kal, tam. stone + kudi, tam. house + úr, tam. village). Hill, Wynaud S.E. division; lat. 11° 25′; long. 76° 40′; height 8,002·4 feet; from Goodalore S.E. 10 miles; from Ootacamund W.N.W. 5 miles.——*Cullhutty* (ಕಲ್ಹಟ್ಟಿ - kalhatti, Can.). See sep. title.——*Cullicoodal* (ಕಳ್ಳಿಕುಡಲು - kallikudalu, Can.). From (kalli, can. milk-hedge plant, euphorbia genus + kúdu, can. junction). Coffee estate, Paranginaud; from Kotagherry S.E. 6 miles. 131 acres.——*Cullore* (ಕಲ್ಲೂರು - kallúru, Can.). Means stone + village. Coffee estate, Paranginaud; from Kotagherry S. 3 miles. 60 acres.——*Culramode* (ಕಲ್ರಮೇಡು - kalramédu, Can.). From (kalla, can. robber + médu, can. rising ground). Coffee estate, Paranginaud; from Coonoor S.E. 1¼ miles. 57 acres.——*Cunnairimookk* (கண்ணேரிமுக்கு - kannérimúkku, Tam.). Hamlet of Kotagherry village, Paranginaud; lat. 11° 26′; long. 76° 54′; from Kotagherry N.N.W. 1¼ miles.—— *Cutchambaura* (കച്ചമ്പാറ - kaççampára, Mal.). Village, Wynaud S.E. division. Gold mining station on the Coothirapoya.—— *Dairbetta* (ದೇರ್‌ಬೆಟ್ಟ - dérbetta, Can.). See Bear hill.——*Deva- mullay* (ದೇವಮಲೆ - dévamale, Can.). From (déva, san. god + + male, can. mountain). Coffee estate, Todanaud and Numbala- gode amshoms; from Goodalore E. 1¾ miles. 441 acres.—— *Devancoonn* (ദേവകുന്ന - dévankunnu, Mal.). From (déva, san. god + kunnu, mal. hill). Coffee estate, Moonnanaud, S.E. Wynaud; from Nelacottah W. 3 miles. 113·95 acres.——*Devar- betta* (ದೇವರಬೆಟ್ಟ - dévarabetta, Can.). See sep. title.——*Deva- sholah* (ದೇವರಶೋಲೆ - dévarashóle, Can.). See sep. title.—— *Devaulah* (ദേവാല - dévála, Mal.). See sep. title.——*Dimhutty* (ಡಿಮ್ಹಟ್ಟಿ - dimhatti, Can.). See sep. title.——*Dodabetta* (ದೊಡ್ಡ ಬೆಟ್ಟ - doddabetta, Can.). See sep. title.——*Dolphin's nose* (மூக்கு மலை - múkkumalai, Tam.). See sep. title.—— *Droog* (ದುರ್ಗ - durga, Can.). Means inaccessible. Coffee estate, Merkoonaud; from Coonoor S.E. 3 miles. 1,089 acres.—— *Eechoray* (ಈಚೋರೆ - íchóre, Can.). Coffee estate, Parangi- naud; from Kotagherry S.E. 5 miles. 68 acres.——*Glenburnie* (கிலென்பார்னி - kilenbarni, Tam.). Coffee estate, Parangi- naud; acres 387; lat. 11° 22′; long. 76° 54′; from Coonoor E.N.E. 4 miles.——*Glencairnie* (ಹಾಲುಹಾಡಾ - háluhádá, Can.). From (hálu, can. milk + háda, can. flat land). Coffee estate, Merkoo naud; acres 188; lat. 11° 18′; long. 76° 46′; from Kartairy S. 3 miles. Lies on both sides of the Alaudeer river. It lies partly in Mailore and partly in Adhicauratty villages.—— *Glendale* (ಬೆಳ್ಳಣ್ಣಿ - bellanni, Can.). Can. from (bella, can. white + anni, can. swamp). Tea estate, Merkoonaud; acres 219; lat. 11° 20′; long. 76° 50′; from Coonoor S.S.W. 1½ miles.——*Gooda- lore* (ഗൂടലൂർ - gútalúr, Mal.). See sep. title.——*Goodalore mullay* (ഗൂടലൂർമല - gútalúrmmala, Mal.). Coffee estate, Ouch- terlony valley; from Goodalore S.S.E. 1¼ miles. 144 acres.—— *Goodicaud* (ಗುಡಿಕಾಡು - gudikádu, Can.). From (gudi, can. temple + kádu, can. jungle). Hill, Coondah division; lat. 11° 18′; long. 76° 37′; height 8,492 feet; from Ootacamund S.W. 11 miles. At the head of the Avalanchey valley.——*Goolicul- mullay* (ഗുളിക്കൽമല - gulikkalmala, Mal.). From (gulikan, mal. the demon + mala, mal. mountain). Hill, Coondah division; lat. 11° 15′; long. 76° 30′; from Ootacamund W.S.W. 20 miles.——*Halashana* (ಹಲಶನ - halashana, Can.). From (halasa, can. jack tree, artocarpus integrifolia, willd. + hane, can. grassy meadow). Coffee estate, Merkoonaud; from Coonoor S.W. 5 miles. 119 acres.——*Haudatoray* (ಹಡತೊರೆ - hadatore, Can.). From (háda, can. flat land + tore, can. ford). Coffee and tea estates, Paranginaud; from Kotagherry S.W. 2 miles. 176 acres.——*Hauvcull* (ಹಾವುಕಲ್ಲು - hávukallu, Can.). From (hávu, can. snake + kal, tam. rock). Coffee estate, Parangi- naud; from Kotagherry E. 3 miles. 159 acres.——*Hill grove* (இல்குரோவ் - ilgurόv, Tam.). Tea and coffee estate, Parangi- naud; acres 464; lat. 11° 21′; long. 76° 52′; from Coonoor E. 3 miles.——*Hokkabetta* (ಹೊಕ್ಕಬೆಟ್ಟ - hokkabetta, Can.). From (hokka, can. entering + betta, can. hill). Peak; height 7,267 feet.——*Hookoor* (ಹುಕೂರು - hukúru, Can.). Tea and coffee estates, Merkoonaud; from Coonoor S.W. 3 miles. 54 acres.—— *Hoolicull droog* (ಹುಲಿಕಲ್ಲುದುರ್ಗ - hulikalludurga, C. n.). See sep. title.——*Ibex hill* (ಮುಟ್ಟುಬೆಟ್ಟ - muttubetta, Can.). See sep. title.——*Ilitoray* (ಇಲ್ಲಿತೊರೆ - illitore, Can.). From (illi, mal. bamboo branch + tore, can. river). Village, Paranginaud; from Wellington N.N.E. 3 miles. 963 acres.——*Jackanairy* (சக்கலரை - shakkalarai, Tam.). See sep. title.——*Jackatalla* (ಜಗತಾಳಾ - jagatálá, Can.). See sep. title.——*Kaity* (ಕೇತಿ - kéti, Can.). See sep. title.——*Kartairy* (ಕಾರ್ಟೇರಿ - kártéri, Can.). See sep. title.——*Keel kotagherry* (ಕೀಳಕೋತಗಿರಿ - kílakótagiri, Can.; கீழ்க்கோத்தகிரி - kízhkkóttagiri, Tam.). From (kízh, tam. east + kóttagiri, tam. the mountain). Village, Parangi- naud division; acres 687; lat. 11° 27′; long. 76° 58′; from Coonoor N.E. 12 miles; from Ootacamund E.N.E. 15 miles. Special residence of Kotars [q.v.]——*Keelnaud* (கீழ்நாடு - kízhnádu, Tam.). From (kízh, east + nádu, tam. country). Division, Todanaud division. One of the two divisions of

Todanaud, occupying the country lying east and north of Dodabetta hill range and north of the Marlemund hill line, as far as Cullhutty and Sholore.——*Kengaray* (ಕೆಂಗರೆ - kengare, Can.). From (kem, can. red + kare, can. bank). Coffee and cinchona estates, and village, Paranginaud; from Kotagherry E. 5 miles. 7,259 acres.——*Kerehauda* (ಕೆರೆಹಾಡ - kerehádá, Can.). From (kere, can. tank + háda, can. flat land). Village, Merkoonaud; lat. 11° 23′; long. 76° 46′. Is a hamlet of Kittoo village.——*Kinnacoray* (ಕಿನ್ನಕೊರೈ - kinnakorai, Can.). Coffee and cinchona estates; Coondah division; from Ootacamund S. 12 miles. 241 acres.——*Kodanaud* (ಕೋಡನಾಡು - kódanádu, Can.). See sep. title.——*Koktoray* (ಕೊಕ್ಕುತೊರೆ - kokkutore, Can.). From (kokku, can. bandicoot + tore, can. bank). Estate, Coondah division; from Ootacamund S.W. 14 miles. No part yet cultivated. 271 acres.——*Koliputty* (ಕೋಳಿಪಟ್ಟಿ - kólipatti, Can.). From (kóli, can. cock + patti, can. place). Coffee estate, Todanaud; from Cullhutty waterfalls N. ½ mile. 292 acres.——*Kotagherry* (ಕೋತಗಿರಿ - kótagiri, Can.). See sep. title.——*Kullaur* (கல்லாறு - kallárn, Tam.). See sep. title.——*Lousiana* (லூசியானா - lúsiyáná, Tam.). Coffee and cinchona estate, Merkoonaud; acres 223; lat. 11° 18′; long. 76° 48′; from Kartairy S.S.E. 4 miles.——*Lovedale* (மஞ்சனக்கோரை - mañjanakkórai, Tam.). See sep. title.——*Lower deva mullay* (കീഴ്ദേവന്മല - kízhdévanmala, Mal.). From (kízh, mal. lower + déva, san. god + mala, mal. mountain). Coffee estate, Numbalagode amshom, S.E. Wynaud and Todanaud; from Goodalore S.E. 1 mile. 117 acres.——*Macoorty* (ಮೂಕುರ್ತಿ - múkurti, Can.). See sep. title.——*Madanaud* (ಮದನಾಡು - madanádu, Can.). From (madai, tam. cave + nádu, can. country). Coffee and cinchona estates. Paranginaud; from Curzon estate N.N.E. 3 miles; from Kotagherry N.E. 8 miles. 216 acres.——*Mailcoondah* (ಮೇಲ್ಕುಂದ - mélkunda, Can.). See sep. title.——*Mailcottah* (மேலக்கோட்டை - mélakkóttai, Tam.). See sep. title.——*Mailnaud* (மேல்நாடு - mélnádu, Tam.). From (mél, tam. west + nádu, tam. country). Division, Todanaud division. One of the two divisions of Todanaud comprising the tract lying between the western slopes of Dodabetta and the Nedoo mullay and Coondah ranges.——*Mailore* (ಮೇಲೂರು - mélúru, Can.). See sep. title.——*Manjore* (ಮಂಜೂರು - manjúru, Can.). From (manju, can. dew + úru, can. village). Coffee and cinchona estates, Coondah division. Situated on right bank of Coondah river. 139 acres.——*Maramoottoo* (മരമുട്ടു - maramuttu, Mal.). From (maram, mal. tree + muttu, mal. support). Coffee estate, Moonnanaud amshom, S.E. Wynaud; from Nelacottah W. 1 mile. 357 acres.——*Marlemund* (ಮಾಲೇಮಂದು - málémandu, Can.). See sep. title.——*Marpanmoody* (மொறப்பிமுடி - morappimudi, Tam.). Village, Wynaud S.E. division; lat. 11° 31′; long. 76° 27′; height 5,014 feet; from Goodalore W.N.W. 6 miles; from Ootacamund W.N.W. 21 miles.——*Marvoohulla* (ಮಾರ್ವುಹಳ್ಳ - márvuhalla, Can.). From (máru, can. fathom + halla, can. pit). Coffee and cinchona estates, Todanaud; from Ootacamund N.E. 12 miles. 340 acres.——*Merkoonaud* (மேற்குநாடு - mérgunádu, Tam.). See sep. title.——*Mettoocherry* (மேட்டுச்சேரி - méttuççéri, Tam.). See sep. title.——*Moodcaud* (ಮೂಡುಕ್ಕಾಡು - múdukkádu, Can.). From (múdu, can. east + kádu, can. jungle). River, Paranginaud and Todanaud divisions; forms the boundary between Todanaud and Paranginaud divisions.——*Moonanaud* (മൂന്നനാട് - múnnanátu, Mal.). See sep. title.——*Moothoomullay* (മുതുമല - mutumala, Mal.). See sep. title.——*Mootnaud* (ಮುತ್ತನಾಡು - muttanádu, Can.). From (muttu, tam. high ground + nádu, can. country). Coffee estate, Merkoonaud; from Coonoor S.W. 4 miles. 302 acres.——*Moottinaudbetta* (ಮುತ್ತಿನಾಡುಬೆಟ್ಟ - muttinádubetta, Can.). From (muttu, tam. high ground + nádu, can. country + betta, can. hill). Hill, Todanaud division; lat. 11° 27′; long. 76° 43′; height 7,620 feet; from Ootacamund N.N.W. 3 miles. At the head of the Seegore pass.——*Mount gordon* (ಗಾರ್ಡನಬೆಟ್ಟ - gárdanbetta, Can.). Tea and cinchona estates, Todanaud; from Pycarrah N. 2 miles. 150 acres.——*Moyaur* (ಮೊಯಾರು - moyáru, Can.). See sep. title.——*Muddanah sholah* (ಮದ್ದನ್ನಶೋಲೆ - maddannashóle, Can.). From (maddanna, can. proper name + shóla, can. plantation). Tea, cinchona and gum estates, Todanaud; from Ootacamund W. 3 miles outside settlement boundary. 52 acres. Another from Ootacamund W. 3 miles within settlement boundary. 62 acres.——*Mullanore* (ಮಲ್ಲನೂರು - mallanúru, Can.). From (malla, san. wrestler + úru, can. village). Coffee, tea, and fruit estates, Paranginaud; from Coonoor E. 1½ miles. 67 acres.——*Munjacombey* (ಮಂಜಕೊಂಬೆ - manjakombe, Can.). From (manju, can. dew + kombe, can. village). Coffee estate, Merkoonaud; from Coonoor W. 8 miles. 25 acres.——*Mushnigoody* (ಮಶಿನಿಗುಡಿ - mashinigudi, Can.). See sep. title.——*Naicken sholah* (നായക്കൻശോല - náyakkanshóla, Mal.). Means naicken's plantation. Coffee and cinchona estates, Numbalagode amshom, S.E. Wynaud. Close to Cherambaudy. 626 acres.——*Naudgauny* (നാട്ടുകാണി - nátukáni, Mal.). From (nátu, mal. country + káni, mal. landmark); free height overlooking the low country. Village, Hill, Wynaud S.E. division; acres 384; lat. 11° 28′; long. 76° 28′; from Goodalore W.S.W. 6 miles; from Ootacamund W.N.W. 20 miles. Gold mining locality. The hill is the highest in the west of the Neilgherries. Also coffee [q.v.] and gum [blue gum] estates, Numbalagode amshom, S.E. Wynaud; from Devaulah S.S.E. 2 miles. 184 acres.——*Nediwuttam* (നടുവട്ടം - natuvattam, Mal.). See sep. title.——*Nedoomullay* (ನೀಡುಮಲೆ - nídumale, Can.). See sep. title.——*Nedoonccoolam* (நெடுங்குளம் - nedungulam, Tam.). From (nedu, tam. long + kulam, tam. tank). Village; Paranginaud Division; acres 8,552; lat. 11° 29′; long. 76° 56′; from Coonoor N.E. 11 miles; from Ootacamund E.N.E. 13 miles. Once every year, the Badagas [q.v.] tread upon fire during a religious ceremony.——*Neilgherry peak* (நீலகிரிமலை - nílagirimalai, Tam.). See sep. title.——*Nelacottah* (നല്ലകോട്ട - nallakótta, Mal.). See sep. title.——*Nelliyaulam* (നെല്ലിയാളം - nelliyálam, Mal.). From (nelli, tam. emblic tree, phyllanthus emblica, linn. + ázham, tam. depth). Village, Wynaud S.E. division; acres 22,134; lat. 11° 31′; long. 76° 24′; from Goodalore W. 10 miles; from Ootacamund W.N.W. 25 miles. Gold mining locality. Residence of Nelliyaulam arasoo, a jenmy. Also Coffee estate, Moonanaud amshom, S.E. Wynaud; from Devaulah N. 4 miles. 102 acres.——*Nircumbey* (ನೀರಕಂಬೆ - nírakambe, Can.). From (níru, can. water + kambe, can. cave). Village, Merkoonaud division; lat. 11° 21′; long. 76° 47′; from Coonoor W. 3 miles; from Ootacamund S.E. 5 miles. Outstation of the Basel mission.——*Numbalagode* (നമ്പലക്കോട്ട - nambalakótu, Mal.). See sep. title.——*Nundhutty* (ನಂದ್ಹಟ್ಟಿ - nandhatti, Can.). From (nane, can. to moisten + hatti, can. village). Coffee estate, Numbalagode amshom, S.E. Wynaud; from Goodalore W. 1¼ miles. 244·39 acres.——*Nunjenaud* (நஞ்சநாடு - nañjanádu, Tam.). See sep. title.——*Ooliyat* (ಉಳಿಯತ್ತು - uliyattu, Can.). From (ulu, can. to plough + ettu, can. bullock). Coffee and cinchona estates, Coondah division; from Mailcoondah N.E. 2 miles. 331 acres.——*Oombelymullay* (ഉമ്പളിമല - umbalimala, Mal.). Coffee and cinchona estates, Ouchterlony valley; from Goodalore S.W. 6 miles. 289 acres.——*Oorbetta* (ಊರಬೆಟ್ಟ - úrbetta, Can.). From (úru, can. country + betta, can. hill). Can. also (dimhattibetta), meaning inferior + village + hill. Other name for Dimhutty hill.——*Ootacamund* (ஒத்தகைமந்து - ottagaimandu, Tam.). See sep. title.——*Orange valley* (ನಾರಂಗಹಳ್ಳ - nárangahalla, Can.). See sep. title.——*Ouchterlony valley* (ಅಕ್ಟರಲೋನಿಹಳ್ಳ - áktaralónihalla, Can.). See sep. title.——*Paranginaud* (ಪರಂಗಿನಾಡು - paranginádu, Can.). See sep. title.——*Paundy* (പാണ്ടി - pánti, Mal.). River, Wynaud S.E. division. Rises in the hills north of Macoorty, and with the Nelambore river forms the Beypore river. It forms the boundary on the North between Ouchterlony valley and the Numbalagode amshom proper.——*Peechulbetta* (ಪೀಚಲಬೆಟ್ಟ - píchalbetta, Can.). From (píchu, can. coir + betta, can. hill). Hill, Todanaud division; lat. 11° 22′; long. 76° 36′; height 8,348 feet; from Ootacamund W.S.W. 10 miles. E. of Macoorty, northern extremity of the Coondahs. Between these two peaks the Pycarrah river takes its rise.——*Peermund* (ಪೇರಮಂದು - péramandu, Can.). See sep. title.——*Periya sholah* (പെരിയശോല - periyashóla, Mal.). Means large plantation. Coffee and cinchona estates, Ouchterlony valley; from Goodalore S.W. 6 miles. 188 acres.——*Pilloor* (ಪಿಲ್ಲೂರು - pillúru, Can.). Coffee estate, Merkoonaud; from Coonoor S. 4 miles. 715 acres.——*Poortey* (ಪೂರ್ತೆ - púrte, Can.). Village, stream, Merkoonaud division; lat. 11° 21′; long. 76° 41′; from Coonoor W. 12 miles; from Ootacamund S.W. 7 miles. The bungalow [q.v.] here was erected at the site of a bund [q.v.] across the stream made on a certain silting process in 1868-69, but the project failed. The stream is often known as the Coondah.——*Pundalore* (പന്തലൂർ - pantalúr, Mal.). See sep. title.——*Pycarrah* (ಪಾಯಕರೆ - páyakare, Can.). See sep. title.——*Rallia* (ಕುಂದಮೂಗೆ - kundamúge, Can.). Vern. from (kunru, tam. hill + múge, can. dumb woman). Village; lat. 11° 25′; long. 76° 52′; height 7,375 feet. Plantation [coondamoogy].——*Rungasawmy's peak* (ರಂಗಸಾಮಿಮಲೆ - rangasámimale, Can.). See sep. title.——*Salada* (ಸೇಲಾಡ - séládá, Can.). Coffee and cinchona estates, Paranginaud; from Kotagherry S. 1½ miles. 283 acres.——*Seegore* (ಸೀಗೂರು - sigúru, Can.). See sep. title.——*Seeputty* (சிப்பட்டி - shippatti, Tam.). From (shígu, tam. thatch grass, aristida setacea, retz. + patti, tam. shepherd village). Village; Wynaud S.E. division; lat. 11° 29′; long. 76° 42′; from Goodalore 4 miles; from Ootacamund 34 miles. Auriferous beds.——*Sholore* (ಶೋಲೂರು - shólúru, Can.). From (shóle, can. grove + úru, can. village). Village, Todanaud division; pop. 1,564; acres 22,541; lat. 11° 29′; long. 76° 42′; from Ootacamund N.N.W. 6 miles. Groups of cromlechs [paundoocull] with sculptures of the nundy [q.v.] and lingam [q.v.] and male and female figures. A cairn [paundicoozhy] opened here was found to contain an iron sickle and some pottery. Several cairns and barrows in the neighbouring hills. Also a tea [q.v.] and cinchona [koinah] estate, Todanaud; from Ootacamund N.W. 5 miles. 251 acres.——*Sisparra* (ചിപ്പിപ്പാറ - chiççippára, Mal.). See sep. title.——*Snowdon* (ದೇವಶೋಲೆಬೆಟ್ಟ - dévashólabetta, Can.). See sep. title.——*Soondabetta* (ಸೂಡಬೆಟ್ಟ - súndabetta, Can.). From (súda, can. mud + betta, can. hill). Hill, Merkoonaud division; lat. 11° 16′; long. 76° 46′; from Coonoor S.W. 8 miles; from Ootacamund S.S.E. 11 miles. Summit of the Mailore pass.——*Tainaud* (ತೇನಾಡು - ténádu, Can.). From (tén, tam. honey + nádu, tam. country). Village;

Paranginaud division; pop. 1,144; acres 7,224; lat. 11° 27′; long. 77° 00′; from Coonoor E. 6 miles; from Ootacamund E. 18 miles. Immediately to south of Kodanaud village.——*Tamrabetta* (ತಾಮ್ರಬೆಟ್ಟ - támrabetta, Can.). From (támra, san. coppery color + betta, can. mountain). Peak; lat. 11° 22′; long. 76° 48′; height 6,957 feet; from Ootacamund S.E. 5 miles.——*Tattapullam* (தட்டப்பள்ளம் - tattappallam, Tam.). From (tattai, tam. level + pallam, tam. valley). Coffee estate, Paranginaud; from Kotagherry S.E. 4 miles. Lies on both sides of the new ghaut road from Kotagherry to Mettapolliem. 363 acres.——*Teppacadav* (ತೆಪ್ಪಕಡವು - teppakadavu, Can.). From (teppa, can. raft + kadavu, can. passage). Village; S.E. Wynaud division; lat. 11° 35′; long. 76° 38′; from Goodalore N.E. 8 miles; from Ootacamund N.N.W. 14 miles. Halting station on the Seegore road. Travellers' bungalow [q.v.]. The road from the Neilgherries to Mysore here crosses the Moyaur, whence the name. ——*Todanaud* (ತೋಡನಾಡು - tódanádu, Can.). See sep. title.——*Tondanoray* (ತೊಂಡನೊರೆ - tondanore, Can.). Coffee estate, Merkoonaud; from Coonoor W. 6 miles. 70 acres.——*Torapully* (തോറപ്പള്ളി - torappalli, Mal.). From (tora, mal. ford + palli, mal. village). Coffee estate, Numbalagode amshom, Wynaud S.E.; from Goodalore N.E. 2 miles. 904 acres.——*Tudor valley* (ತುದರಹಳ್ಳ - tudarahalla, Can.). Coffee and cinchona estates, Merkoonaud; from Coonoor S.W. 7 miles. 94 acres.——*Tullapoya* (തല്ലപ്പുഴ - tallappozha, Mal.). From (tala, mal. head + puzha, mal. river). Ghaut, Merkoonaud division; west of the Mailore pass. Leaving the lowland at a point on the Bhawauny some distance above Shoondaputty, it reaches the plateau near Mailcoondah. Used solely by hill people.——*Tyemullay* (ತಾಯಿಮಲೆ - táyimale, Can.). From (táyi, tam. mother, epithet of a deity + malai, tam. hill). Coffee and cinchona estates, Merkoonaud; from Coonoor S.S.W. 7 miles. 379 acres.——*Velliyangherry* (வெள்ளியங்கிரி - velliyangiri, Tam.). From (velli, tam. silver + am, tam. beauty + giri, san. mountain). Hill, Todanaud division; lat. 11° 26′; long. 76° 36′; height 8,247 feet; from Ootacamund W.N.W. 10 miles; from Macoorty N.N.E. 5 miles.——*Wellington* (ಜಗತಾಳ - jagatálá, Can.). See sep. title.——*Wodayaroyacottah* (ಉದಯರಾಯಕೋಟೆ - udayaráyakóte, Can.). See sep. title.——*Woodlands* (உட்லாண்ட்ஸ் - udlánds, Tam.). Coffee estate, Merkoonaud; acres 718; lat. 11° 17′; long. 76° 47′; from Kartairy S.S.E. 5 miles.——*Wottputray* (ஓட்டுப்பட்டறை - óttuppattarai, Tam.). From (ódu, tam. tile + pattarai, tam. mechanic's workshop). Village, Paranginaud; from Coonoor W. 1 mile. Is a hamlet in Coonoor village, situated on the old road about 1 mile from Coonoor.——*Wynaud, S. E.* (വയനാട് - vayanátu, Mal.). See sep. title.——*Yedapully* (ಎಡಪಳ್ಳಿ - edapalli, Can.). From (ede, can. middle + palli, can. village). Village, Paranginaud; acres 3,000; lat. 11° 23′; long. 76° 51′. Midway between Coonoor and Kotagherry.——*Yellanhully* (ಎಲ್ಲನಹಳ್ಳಿ - ellanhalli, Can.). From (ellana, can. proper name + halli, can. village). Village, Merkoonaud division; lat. 11° 23′; long. 76° 47′; from Coonoor W.N.W. 4½ miles; from Ootacamund S.E. 4 miles.——*Yellay mullay* (எல்லைமலை - ellaimalai, Tam.). See sep. title.——(2) *Neilgherry blue flower* (انتمول - antamúl, Hind.). Same as Indian ipecacuanha.——*Neilgherry nettle* (بچهوا - bichhuá, Hind.; ತುರಿಸಿಕೆಗಿಡ - turisikegida, Can.; ಅರಿಕೆಗಿಡ - árikegida, Too.; ആനച്ചൊറിയണം - ánaççoriyanam, Mal.; ගස්කහඹිලියා - gaskahambiliyá, Singh.). Hind. means scorpion; touch of plant painful. Can. from (turisu, can. to scratch + gida, can. plant). Mal. from (ána, mal. elephant + choriyanam, mal. tragia involucrata, mueller). Singh. from (gas, singh. tree + kahambiliyá, singh. nettle). Can. also (turikegida), meaning cutaneous eruption + plant. Title otherwise Itching plant. Botanically Girardina heterophylla, dalz., urticaceæ [vricsham, 119]. Alias Girardinia leschenaultiana; Urtica heterophylla. Annual, erect; leaves broad-cordate, seven-lobed, lobes oblong, acute, coarsely serrated, clothed on both sides with fine whitish down, armed above with thin scattered prickles, thickly clothed beneath with the same; male and female flowers in distinct glomerate peduncled spikes; flowers small, green; flowering in rainy season; the least touch of any part produces intense pain. Bark abounds in fine, white, glossy, silk-like, strong fibres [naur]; todahs [q.v.] separate the fibres by boiling the plant, and spin it into thin coarse thread. Cf. Indian nettle.——*Neilgherry peak* (നീലഗിരിശിഖരം - nílagirishikharam, Mal.; நீலகிரிமலை - nilagirimalai, Tam.). Means blue-mountain peak. Peak; lat. 11° 23′ N.; long. 76° 32′ E.; height 8,118 feet; from Calicut E. 46 miles; from Munjery N.E. 30 miles; from the sea E. 48 miles; from Goodalore S. 8 miles; from Ootacamund W. 15 miles. N.W. of Culcoodiyore; on Malabar and Neilgherry boundary.——*Neilgherry rhododendron* (ಬಿಳಿಮರ - bilimara, Can.; මාරතමල් - máratmal, Singh.). Can. from (bili, can. white + mara, can. tree). Singh. from (má, singh. large + ratmal, singh. the plant, ixora coccinea, linn.). Can. also (billimara); (púmara), meaning flower + tree, used on neilgherries; (bilipúmara), meaning white-flowered tree. Title otherwise Dwarf rosebay, Large ixora. Botanically Rhododendron arboreum, smith, ericaceæ [vricsham, 78]. Alias Rhododendron puniceum. Tree, 25 feet, leaves very coriaceous, lanceolate, acute, cordate at the base, or attenuated into the thick petiole, shining green above, glabrous below, silvery or rusty-pubescent; flowers densely capitate; calyx none; corolla campanulate, white, rose, or blood-colored; ovary seven to ten-celled; neilgherries and other lofty mountain ranges; in flower all year round, but most profusely in february. Young leaves poisonous to cattle; flowers medicinal, applied to the forehead for headache. Flowers make a sub-acid jelly; flowers eaten by hill tribes. Wood close in the grain, but wanting in fibre and shrinks and twists in seasoning; used for fuel charcoal [adoopp kary]. Varieties are very numerous. No other common species here.

NEIM (نعم - naím, *Ar.*). From (nama, ar. to bestow in abundance) [nimat]. Grace, favor. Part of lacab; as Neim ood deen, the grace of religion [ism].

NEL (നെൽ - nel, *Mal.*; நெல் - nel, *Tam.*). Grain, especially paddy grain. Common still in french and portuguese.—"*a*" Linear measure: 8 yels = 1 nel; 8 nels = 1 ungoolam [alavay, 1a]. Approximate actual value, 1 nel = ·09375 inch. Same as San. yavam, Hind. jow, Mal. tora.—"*b*" Used as goldsmith's weight. 4 nel manies = 1 coondrimany or goomchy seed [niray, 3d]. Approximate actual value, 1 nelmany = ⅛ grain. Same as Hind. dhaun, Can. and Tam. veesha tookkam. See vol. I, 609.——*Nellilakkam* (நெல்லிலக்கம் - nellilakkam, Tam.). Paddy numbers. Reckoning by grains instead of abstract figures [ponnilakkam].——*Nellore* (నెల్లూరు - nellúru, Tel.). See sep. title.——*Nelly* (നെല്ലി - nelli, Mal.). See sep. title.——*Nel many* (நென்மணி - nenmani, Tam.). From (above + mani, tam. grain). Goldsmith's weight; see above. ——*Nelpoora* (നെല്പുര - nelpura, Mal.). From (above + pura, mal. shed). Granary [ganj].

NELLORE * (నెల్లూరు - nellúru, *Tel.*). From (nellu, tam. paddy + úru, tel. village) [nel]. There is also a legend that one Mookkanty reddy found a Moola staunam lingam under a Nelly [q.v.] tree and built a temple on the spot. Sanscrit name (lingapuri), meaning phallic emblem of shiva + town; also (simhapuri), meaning lion + town; also (dhányapura), meaning grain + town. Greek name μάλαγγα. Revenue district; situated on the Coromandel coast [q.v.]; between 13° 29′ and 16° 00′ N. lat., and between 79° 07′ and 80° 19′ E. long.; bounded N. by Kistna district, E. by Bay of Bengal, S. by North arcot and Chingleput, W. by Veligonda hills; square miles 8,760; pop. 1,463,736; language Teloogoo. Rivers:—Goondlacumma, Pennair, Swarnamookhy. Ports:—Canoopurty, Chennayapollem, Cottapatam, Doogarauzpatam, Eetamookkala, Iskapully, Kistnapatam, Meipaud, Paucala, Paumanjy, Ponnapoody, Poody, Ramapatam, Toommalapenta, Toopily, Zoovvaldinney. Mountains:—Cheeemacoorty hill, Oodayagherry droog, Veligonda hills. Sanitarium, Oodayagherry droog. The whole area of the district is represented by the following sub-areas, where talook [q.v.] means an ordinary tract administered by a Tahsildar [q.v.], and division means a zemindarry [q.v.] tract administered by a superior Deputy tahsildar:—Atmacore talook, Canigherry talook, Cauvaly talook, Cundoocore talook, Darshy division, Goodoor talook, Nellore talook, Ongole talook, Oodayagherry talook, Podily division, Polore division, Raupore talook, Vencatagherry division. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Nellore; Sub-collector, Ongole, in charge of Ongole, Cundoocore and Canigherry talooks and Darshy and Podily zemindarry divisions; Head assistant collector Nellore, in charge of Atmacore, Cauvaly, and Oodayagherry talooks; General deputy collector, Naidoopett, in charge of Raupore talook, Polore and Vencatagherry divisions. Tahsildars; Atmacore, Rs. 175, Canigherry, Rs. 150, Cauvaly, Rs. 175, Cundoocore, Rs. 175, Goodoor, Rs. 200, Nellore, Rs. 225, Ongole, Rs. 200, Oodayagherry, Rs. 150, Raupore, Rs. 150. Deputy tahsildars; Addanky, Rs. 100, range situated in the north of Ongole talook; Alloor, Rs. 100, range situated in the north of Nellore talook, north of the Pennair; Darshy, Rs. 120, division situated to the north-west of Ongole talook bordering on Kistna district; Kotah, Rs. 100, range situated in the south-east of Goodoor talook; Podily, Rs. 120, division situated to the south-west of Ongole and north of Canigherry talook; Polore, Rs. 120, division situated to the south-west of Goodoor talook; Vencatagherry, Rs. 120, division situated to the west of Goodoor and to the south of Raupore talooks; Sub-magistrate, Nellore, Rs. 120, jurisdiction extending over Nellore town and 64 villages in the Nellore talook, south of the Pennair. Similarly judicial officers:—Judge, Nellore. District Moonsifs; Nellore, with jurisdiction extending over Goodoor and Raupore talooks and portions of Nellore and Atmacore south of Pennair, and Polore and Vencatagherry divisions; Cauvaly with jurisdiction extending over Cauvaly, Oodayagherry, and portions of Nellore and Atmacore north of Pennair; Canigherry with jurisdiction extending over Canigherry, Cundoocore, Darshy and Podily; Ongole over Ongole talook. Similarly Public Works officers:—District engineer, Nellore. Sub-divisional officers; Codavalore with range extending over Sangam delta, Atmacore talook north of the Pennair and Oodayagherry talook; Ongole with range extending over Ongole, Cundoocore, Cauvaly and Cani-

gherry and Podily division and Darshy divisions; Goodoor with range extending over Atmacore talook south of the Pennair, Goodoor and Raupore talooks and Sooloorpett division and Vencatagherry divisions. Supervisors; Nellore, in charge of Nellore talook south of the Pennair; Bootchireddipollem, in charge of the southern central and a portion of the Eastern channel and Canigherry tank; Pudmanaubha chuttram, in charge of the Eastern channel works and its distribution. Contains registration sub-districts, Addanky, Alloor, Atmacore, Canigherry, Cauvaly, Cottapatam, Cundoocore, Darshy, Goodoor, Nellore, Ongole, Oodayagherry, Podily, Raupore, Sooloorpett, Vencatagherry. Contains Forest ranges, Canigherry, Nellore, Ongole, Oodayagherry, Ramapatam, Raupore, Shreeharicote. Contains Municipalities, Nellore, Ongole. Contains District board; and Talook boards; Nellore embracing Goodoor and Nellore talooks; Atmacore embracing Atmacore, Oodayagherry and Cauvaly talooks; Naidoopett embracing Raupore, Vencatagherry division and Polore division; Ongole embracing Ongole, Cundoocore and Canigherry talooks and Darshy and Podily divisions. The following are the zemindarries in the District:—Calastry a portion, Choondy, Moottiaulpaud, Vencatagherry. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; coast survey, II, 163; light-house, II, 169; comparative population, II, 172; location of revenue officers, II, 388; revenue settlement of the district, II, 415; registrars' and sub-registrars' stations, II, 421; ports, II, 423; salt factories, II, 426; rain-guage stations, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 505; zemindarries contained, I, 56, and II, 299; special public works, I, 398. A special gazetteer account of the whole district is given at II, 112. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Atmacore, Canigherry, Cauvaly, Cundoocore, Darshy, Goodoor, Nellore, Ongole, Oodayagherry, Podily, Polore, Raupore, Vencatagherry.——**(2)** Talook, Nellore district. Tahsildar's pay Rs. 225. Area 638 square miles. Centre coast part of district. Bounded by Cauvaly to the north, Atmacore to the west, Goodoor to the south, and the sea east. There is comparatively little jungle. Towards the south the ground is high and covered with brushwood. Laterite [q.v.] is quarried near Nellore town. Soil rocky and gravelly in the western parts and sandy and loamy in the eastern. Large exports of cattle [maud], paddy [q.v.] and indigo [q.v.]. The Pennair separates the talook into two portions. Channels are the Maldaivy and the Peidair; local drainages for the northern portion. Two supplying channels [q.v.] from the south side of the Nellore anicut [q.v.], with numerous feeders to the different tanks [q.v.], bring a large area of rice [q.v.] land under cultivation. All land that can be irrigated is being rapidly taken up and the prosperity of the cultivators is yearly increasing. Camping grounds:—Alloor, Aumancherla, Bodwauripollem, Caukpulley, Codavalore, Codoor, Comarapoody, Comarica, Condlapoody, Cortore, Covoor, Daumaramadoogoo, Devarpollem, Dontauly, Doovvoor, Gundavaram, Gungaputnam, Indoocoorpett, Indoopore, Iskapully, Laibore, Meipaud, Moolmoody, North aumoolore, North mopore, Ootcore, Padamatipollem, Pedoor, Penoobully, Ponnapoody, Siddipooram, Talamunchy, Varigonda, Varny, Vavvair, Yeedore. Places of archæological interest:—Alloor, Bootchireddipollem, Codavalore, Cortore, Covoor, Daumaramadoogoo, Dontauly, Doovvoor, Gowndlapollem, Gundavaram, Maudrauz goodoor, Moolapett, Nellore, Ootcore, Pedapoottaid, Ponnapoody, Pooriny, Rama teertam, Runganaickoolapett, Sangam, Vellanty, Vidavalore. Principal trig. stations:—Narsimhacondah, Nishanbote, Pennair beacon, Sangam. The leading places, &c., in the talook are the following.——*Alloor* (అల్లూరు - allúru, Tel.). See sep. title.——*Beerapair* (బీరపేరు - bírapéru, Tel.). See sep. title.——*Bootchireddipollem* (బుచ్చిరెడ్డిపాలెము - buççireddipálemu, Tel.). See sep. title.——*Canigherry reservoir* (కనిగిరిచెరువు - kanigiricheruvu, Tel.). See sep. title.——*Codoor* (కోడూరు - kódúru, Tel.). From (kóde, tel. bull + úru, tel. village). Village; pop. 3,443; acres 6,874; lat. 14° 25′; long. 80° 10′; from Nellore E.S.E. 13 miles; from the sea W. 1 mile. On the Buckingham canal [q.v.]. Exports a large quantity of pishannam [q.v.] paddy [q.v.]. Shell lime [kilinjal choonam] is made.——*Comarica* (కొమరిక - komarika, Tel.). From (komaru, tel. beauty). Village; pop. 1,814; acres 1,864; lat. 14° 31′; long. 80° 10′; from Nellore E.N.E. 11 miles; from the sea W. 4 miles. Toonga [q.v.] mats [boriyah] are made.——*Condayapollem* (కొండయపాలెము - kondayapálemu, Tel.). From (kondayya, tel. proper name + pálemu, tel. fortified village). Village; pop. 445; acres 1,588; lat. 14° 25′; long. 80° 01′; from Nellore S. 3 miles; from the sea W. 13 miles.——*Condlapoody* (కొండ్లపూడి - kondlapúdi, Tel.). From (konda, tel. hill + púdi, tel. village). Village; pop. 1,087; lat. 14° 28′; long. 79° 58′; from Nellore W. 4 miles; from the sea W. 18 miles. In face of Narsimhacondah.——*Cortore* (కొరుటూరు - korutúru, Tel.). From (koriti, tel. tree, plecospermum spinosum, trec. + úru, tel. village). Village; pop. 1,194; acres 2,678; lat. 14° 29′; long. 80° 12′; from Nellore E. 12 miles; from the sea W. 1¼ miles. Large tank and ancient Shiva temple dedicated to Pullanautasawmy.——*Covoor* (కోవూరు - kóvúru, Tel.). See sep. title.——*Daumaramadoogoo* (దామరమడుగు - dámaramadugu, Tel.). From (támara, tel. lotus flower, nelumbium speciosum, willd. + madugu, tel. pool). Village; pop. 1,935; acres 2,831; lat. 14° 30′; long. 79° 59′; from Nellore N.W. 5 miles; from the sea W. 17 miles. West of the village was once pool full of lotus [nelumbo] flowers. A low-lying village with Pennair on south, and fed by Canigherry reservoir. Shiva temple with inam [q.v.].——*Doovvoor* (దువ్వూరు - duvvúru, Tel.). From (tuvva, tel. sandy soil + úru, tel. village). Sanscrit name (dúrvásapura), meaning doorvausan, the ill-clad sage + town. Pop. 2,369; lat. 14° 33′; long. 79° 53′; from Nellore N.W. 12 miles; from the sea W. 24 miles. Remains of Mahomedan fort. Once the head-quarters of a Pergunnah [q.v.]. Protected from Pennair by a large flood-bank.——*Durgamittah* (దర్గమెట్ట - dargametta, Tel.). See sep. title.——*Gogoolpully* (గోగులపల్లి - gógulapalli, Tel.). From (gógu, tel. hibiscus cannabinus, linn. + palli, tel. village). Village; pop. 1,403; acres 5,427; lat. 14° 40′; long. 80° 10′; from Nellore N.N.E. 17 miles; from the sea W. 3 miles. Formerly a salt station.——*Gundavaram* (గండవరము - gandavaramu, Tel.). From (gandu, tel. great + pura, san. town). Hind. name (alinagar), meaning proper name + city. Sanscrit name (grant'hapura), means book + town. Village; pop. 3,094; acres 6,418; lat. 14° 34′; long. 80° 01′; from Nellore N. 8 miles; from the sea W. 15 miles. Fine curtain cloths [purdah] are made. An ancient seat of learning. Two ancient temples of Shiva and Vishnoo built by Chola kings. The Shiva god is known by the very unusual name of Ooda[illegible]cauleshwara sawmy, meaning rise + time + lord; because, at certain seasons of year, rays of rising sun fall upon lingam [q.v.].——*Inamadoogoo* (ఇనమడుగు - inamadugu, Tel.). From (inumu, tel. iron + madugu, tel. pool). Village; pop. 2,071; acres 2,805; lat. 14° 31′; long. 81° 04′; from Nellore N.N.E. 5 miles; from the sea W. 11 miles. A low-lying village with extensive cloth weaving.——*Indoocoorpett* (ఇందుకూరుపేట - indukúrupéta, Tel.). From (indu, tel. date tree, phœnix farinifera, roxb. + úru, tel. village + péta, tel. suburb). Village; pop. 4,514; acres 5,542; lat. 14° 28′; long. 80° 09′; from Nellore E. 9 miles; from the sea W. 5 miles. Rattan [q.v.] baskets [tokrah] are made.——*Iskapully* (ఇస్కపల్లె - iskapalle, Tel.). See sep. title.——*Kedamanair* (కేతామన్నేరు - kétámannéru, Tel.). See sep. title.——*Laigoontapaud* (లేగుంటపాడు - léguntapádu, Tel.). From (léga, tel. calf + gunta, tel. pond + pádu, tel. village). Tel. also (légalakonda), meaning calf + hill. Village; pop. 767; acres 1,204; lat. 14° 31′; long. 80° 04′; from Nellore N.E. 6 miles; from the sea W. 10 miles. A low-lying village inaccessible in the rainy season, with the Pennair running close to it. A feeder from the Canigherry reservoir irrigates the lands of the village.——*Maldaivy* (మల్దేవి - maldévi, Tel.). See sep. title.——*Meipaud* (మైపాడు - maipádu, Tel.). See sep. title.——*Modeygoonta* (మోదేగుంట - módégunta, Tel.). From (móda, tel. salt-pan + gunta, tel. pond). Village; pop. 862; acres 782; lat. 14° 33′; long. 80° 05′; from Nellore N.E. 8 miles; from the sea W. 9 miles. The Teloogoo poet [cavy] Pooshpagiry timmappa lived here.——*Moodivarty* (ముదివర్తి - mudivarti, Tel.). From (mudi, tel. old + parti, tel. village). Village; pop. 1,805; acres 4,793; lat. 14° 33′; long. 80° 09′; from Nellore N.E. 11 miles.——*Moolapett* (మూలపేట - múlapéta, Tel.). See sep. title.——*Moolmoody* (ములుమూడి - mulumúdi, Tel.). From (mulumu, tel. stubble field + púdi, tel. village). Tel. also (munulapúdi), meaning sage + village. Sanscrit name (munipura), meaning sage + town. Village; pop. 1,637; acres 5,561; lat. 14° 28′; long. 79° 54′; from Nellore W. 9 miles; from the sea W. 22 miles. Said by Stala pooraunam [q.v.] to have been a residence of Ashwattauman who fought on the side of Cowravas during the Mahabhaurat [q.v.] war. Contains Narsimhacondah.——*Moonoolapoody* (మునులపూడి - munulapúdi, Tel.). From (muni, san. hermit + púdi, tel. village). So called because hermits are said to have made penance here in times of old. Village; pop. 187; acres 2,432; lat. 14° 36′; long. 79° 55′; from Nellore N.W. 12 miles; from the sea W. 19 miles.——*Murripaud* (మర్రిపాడు - marripádu, Tel.). From (marri, tel. banyan tree, ficus bengalensis, linn. + pádu, tel. village). Village; pop. 1,232; acres 5,740; lat. 14° 39′; long. 79° 52′; from Nellore N.W. 17 miles; from the sea W. 21 miles. Ancient temple to Chennakeshwarasawmy. Extensive paddy [q.v.] cultivation.——*Narsimhacondah* (నరసింహకొండ - narasimhakonda, Tel.). See sep. title.——*Naugamambaupooram* (నాగమాంబాపురము - nágamámbápuramu, Tel.). From (nágamámba, tel. proper name + pura, san. town). Village; pop. 471; acres 1,062; lat. 14° 32′; long. 79° 57′; from Nellore N.W. 8 miles; from the sea W. 18 miles. Deshye [q.v.] reddies [q.v.] of Codavalore built the temple. Cultivation is carried on by a feeder from the Canigherry reservoir.——*Nawaubpett* (నవాబుపేట - navábupéta, Tel.). See sep. title.——*Nellore* (నెల్లూరు - nellúru, Tel.). See below.

——*Nidimooshily* (నిడిముషిలి - nidimushili, Tel.). From (nidi, tel. very + mushili, tel. old). Village; pop. 683; acres 1,242; lat. 14° 32′; long. 80° 08′; from Nellore N.E. 9 miles; from the sea W. 6 miles. Curtain cloths [purdah] are made.——*Nishanbote* (నిషాన్బోటు - nishanbótu, Tel.). From (nisháni, hind. signal + bótu, tel. high ground). Trig. station; lat. 14° 41′ 47·90″; long. 79° 58′ 24·01″; height 234 feet; from Chennore N.E. 4 miles; from Nellore N. 17 miles; from the sea W. 14 miles.——*Padoogoopaud* (పడుగుపాడు - padugupádu, Tel.). From (padugu, tel. woof + pádu, tel. village). Village; pop. 817; acres 1,299; lat. 14° 29′; long. 80° 02′; from Nellore N.N.E. 3 miles; from the sea W. 12 miles. The poetess Molla [q.v.] lived here [cavy]. ——*Pautore* (పాటూరు - pátúru, Tel.). From (páti, tel. high level + úru, tel. village). Village; pop. 1,849; acres 2,783; lat. 14° 31′; long. 79° 59′; from Nellore N.N.W. 5 miles; from the sea W. 16 miles. The village was originally built over a mound near the temple of Yaumaulamma [q.v.]. A small stream from the Canigherry reservoir irrigates the lands. Tikkana somayaujooloo [cavy], the translator of Mahabhaurat [q.v.], lived here. Cloths are woven to a large extent by the jendravar [q.v.].——*Pedoor* (పేడూరు - pédúru, Tel.). From (pédu, tel. wood + úru, tel. village); from trees in tank. Village; pop. 1,271; acres 2,442; lat. 14° 26; long. 80° 07′; from Nellore E. 7 miles; from the sea W. 7 miles. Produces large quantities of pishaunam [q.v.] paddy [q.v.].——*Peidair* (పైడేరు - paidéru, Tel.). From (paidi, tel. gold + éru, tel. river). Channel. This is a feeder to the Alloor tank.——*Pennair* (పెన్నేరు - pennéru, Tel.). See sep. title.——*Penoobully* (పెనుబల్లి - penuballi, Tel.). From (penu, tel. great + bali, tel. sacrifice). Village; pop. 1,060; acres 2,365; lat. 14° 30′; long. 79° 56′; from Nellore W.N.W. 7 miles; from the sea W. 19 miles. Stala pooraunam [q.v.] says that Cashyapa prajaupaty [q.v.], while performing a great fire offering in Zonnavauda, made a sacrifice here. Ruined Shiva temple. Small hill near. Cultivation from the Canigherry reservoir.——*Pinaukiny* (పినాకిని - pinákiní, Tel.). See sep. title. ——*Ponnapoody* (పొన్నపూడి - ponnapúdi, Tel.). From (ponna, tel. tree, calophyllum inophyllum, linn. + púdi, tel. village). Village, Port; lat. 14° 40′ N.; long. 80° 11′; from Iskapully S.E. 5 miles; from Madras N. 107 miles; from Nellore N.E. 18 miles; from Varny N.E. 3 miles. A port 3 miles north of the Pennair, carrying on a large coasting trade, principally in gráin. Resorted to by native craft. Granaries on the beach.——*Raibaula* (రేబాల - rébála, Tel.). From (régu, tel. jujube tree, zizyphus jujuba, lamk. + palle, tel. village). Village; pop. 1,280; acres 2,987; lat. 14° 32′; long. 79° 57′; from Nellore N.W. 8 miles; from the sea W. 19 miles. A low-lying village with extensive cultivation by feeder from Canigherry reservoir. Surrounded with thick jungle.——*Rama teertam* (రామతీర్థము - rámatírt'hamu, Tel.). From (ráma, san. the god + tírt'ha, san. place of sacred waters). Tel. also (gaundlapálemu), meaning toddy-drawer + fortified village. Village; pop. 1,586; lat. 14° 40′; long. 80° 12′; from Nellore N.E. 18 miles; from the sea W. 1¼ miles. On the western bank of the Buckingham canal [q.v.] at the mouth of the Peidair. On the north bank of the channel on the beach is the Rama teertam. Temple, with annual festival. Good choultry [q.v.]. ——*Sangam* (సంగం - sangam, Tel.). See sep. title.——*Somrauzpully* (సోమరాజుపల్లె - sómarádzupalle, Tel.). From (sómarádzu, tel. proper name + palle, tel. village). Village; pop. 687; acres 2,209; lat. 14° 29′; long. 80° 12′; from Nellore E. 11 miles; from the sea W. 2 miles.——*Talamunchy* (తలమంచి - talamanchi, Tel.). From (st'halam, san. site + manchi, tel. goodness). Village; pop. 1,880; acres 5,919; lat. 14° 37′; long. 80° 04′; from Nellore N. 11 miles; from the sea W. 10 miles. Large quantities of laterite [q.v.] stone quarried.——*Toorimerla* (తురిమెర్ల - turimerla, Tel.). From (turru, tel. village + mirru, tel. highland). Village; pop. 694; acres 2,570; lat. 14° 38′; long. 79° 57′; from Nellore N.N.W. 13 miles; from the sea W. 17 miles. Curtain cloths [purdah] manufactured.——*Vangull* (వంగల్లు - vangallu, Tel.). From (vanga, tel. brinjal, solanum melongena, linn. + kallu, tel. stone). Tel. also (dzangálavangólu), meaning jangam, member of the caste + place so called. Sanscrit name (ónkálípattana), means omcauly, the deity + town. Village; pop. 1,585; acres 5,278; lat. 14° 36′; long. 79° 52′; from Nellore N.W. 15 miles; from the sea W. 25 miles. Ancient Shiva temple on hill. The Teloogoo poet [cavy] Condoory seetaramiah lived here.——*Varny* (వరిణి - variní, Tel.). From (varanamu, tel. enclosure). Village, Port; pop. 1,586; acres 8,100; lat. 14° 38′ N.; long. 80° 10′; from Madras N. 104 miles; from Meipaud N.N.W. 10 miles; from Nellore N.E. 16 miles; from Ponnapoody S.W. 3 miles. Near mouth of Pennair. ——*Viloocaunipulley* (విలుకానిపల్లె - vilukánipalle, Tel.). From (vilukádu, tel. archer + palle, tel. village). Village; pop. 431; acres 740; lat. 14° 27′; long. 80° 10′; from Nellore E. 10 miles; from the sea W. 4 miles. Gold coins [naunyam] formerly found after heavy showers.——*Yellayapollem* (ఎల్లయపాలెము - yellayapálemu, Tel.). From (ella, tel. border + pálemu, tel. fortified village); border settlement. Village; pop. 2,570; acres 3,975; lat. 14° 33′; long. 80° 00′; from Nellore N.N.W. 7 miles; from the sea W. 16 miles. People from Gundavaram emigrated and settled themselves on the borders of Pautore. Hence the name. To the north is a ruined fort, once flourishing in the time of Raja raja naraindran. Unendowed temple to Mullicarjoona sawmy with annual Bramhotsavam [pundigay, 6a]. Cloths are manufactured.——*Zonnavauda* (జొన్నవాడ - dzonnaváda, Tel.). See sep. title.——**(3)** Town, Sub-magistracy, Nellore district. Pay Rs. 120.——**(4)** Town, Municipality, Head-quarters of Collector, Tahsildar, Police superintendent, District registrar, District judge, Executive engineer, Superintendent of Post and Telegraph offices, District moonsif, Deputy tahsildar, Railway station; Nellore dist., Nellore tal.; pop. 29,336; acres 15,752; lat. 14° 27′; long. 80° 02′; height 57 feet; from Madras N.N.W. 96 miles; from Naidoopett N. 38 miles; from Ongole S. 73 miles; from the sea W. 13 miles. On right bank of Pennair, 12 miles from its mouth. Of great antiquity. Traditionally in the wilderness Dandacauranyam [q.v.]. Climate is dry and salubrious, being subject to no sudden changes of temperature. The prevailing winds during January and February are north-easterly; during March and April, north-easterly and south-easterly; in May and June, south-easterly and south-westerly; in July and August, south-easterly and north-westerly; in September and October, the direction is varying; in November and December it blows steadily from the north-east. The fall of rain [mazhay] during the year is from thirty to forty inches, and it takes place partly during the south-west monsoon [q.v.] in August and September, but chiefly in October, November, and December, under the north-east monsoon. It is connected with Madras by railway, by the Northern trunk road, and also by Buckingham canal. Held by the Vencatagherry zemindars till the Mussalman period, and in 1750 formed fowjdarry [q.v.] of Arcot. In 1752, seized by one Mahomed camaul, who was captured and executed twelve months later. Najeeb oollah the governor rebelled in 1757, and the English forces under Forde assisted in the unsuccessful siege of the town. The Mahrattas and the French visited the town in 1758. The latter were received as friends; but on the raising of the siege of Fort st. george in the same year, Najeeb oollah murdered all the French soldiers in the town save one, and gave in his submission to the English. The houses of the European residents are on the south of the town, along the bank of a large tank, on the farther side of which rises the temple crowned hill of Narsimhacondah. The offices of the Collector are in the old fort now in ruins; opposite stands the police office, formerly a range of barracks. The old cemetery has about 160 tombs, the oldest of which dates back to 1785. American baptist mission, Roman catholic mission, and a mission of the Hermansburg lutherans. The rampart which formerly defended the place has fallen into ruins. In 1787, a peasant ploughing near the town, struck upon the remains of a Hindoo temple, beneath which was found a pot containing gold Roman coins of the second century A.D., mostly bearing the names of Trajan, Hadrian, and Faustina. Some were fresh, but others were worn and perforated, as if they had been used as personal ornaments. When the anicut [q.v.] across the Pennair was being constructed, the workmen found several coffins, apparently of burnt clay, embedded in quartz [vencull]. Some contained more than one body each; which when first seen, were in a perfect state of preservation. There were also found with them spear heads and other implements. Annual festival of Moolastauneshwarasawmy held about February. Festival of Shree runganaicksawmy held about March. The festival visitors camp in the open bed of the river. To the east are extensive rice [q.v.] fields. Large quantities of laterite [q.v.] are quarried in the neighbourhood and used for building purposes and the repair of roads. The following are the travelling distances by road from Nellore to different places :—

To	Viâ	Miles and Furlongs.

NELLY (నెల్లి - nelli, *Tel.*; நெல்லி - nelli, *Tam.*). Rice-like [nel], from small leaflets, rice being emblem of smallness. The premna genus [moonnay]. Also the emblic myrobalan [tripalam].——**(1)** *Neliampathy* (നെല്ല്യാംപതി - nelyámpati, Mal.). From (nelliyân, mal. the deity of the phyllanthus emblica, linn. + pati, mal. place). Range of mountains; Cochin state, Chittoor tal.; from Chittoor S. 10 miles; from Ernacolum N. 34 miles; from the sea E. 20 miles. Forms portion of the south side of the gap in the Western ghauts [q.v.] through which the Ponnany flows, the north side of the gap being bounded by the Palghaut hills. Extreme elevation, about 5,000 feet. At an elevation of from 1,500 to 4,000 feet the hills are covered with forests yielding valuable timber, cardamoms [q.v.], ginger [q.v.], pepper [q.v], &c. Large quantities of honey [shahad] are collected by the Kadar [q.v.], a jungle tribe inhabiting these hills not unlike the Wynaud coorumbar [q.v.]. Coffee [q.v.] has been grown since 1860. Thermometer ranges from 45° to 90°. In June, July and August the monsoon [q.v.] is heavy and high winds blow. Rainfall, annual average 150 to 160 inches.——*Nelliyappan* (நெல்லியப்பன் - nelliyappan, Tam.). From (above + appan, tam. father); meaning deity presiding over nelly tree, shiva [q.v.] or ganesh [q.v.]. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——**(2)** *Coora nelly* (కూరనెల్లి - kúranelli, Tel.). From (kúra, tel. curry + nelli, tel. premna latifolia, roxb.). Same as Curry moonnay.——*Creeper nelly* (നെല്ലിത്താളി - nellittáli, Mal.). Same as Solah and Common sesban.——*Foreign nelly* (சீமைநெல்லி - shímainelli, Tam.). Same as Barbadoes cherry.——*Forest nelly* (കാട്ടുനെല്ലി - káttunelli, Mal.; கீழாநெல்லி - kízhánelli, Tam.). Mal. from (kátu, mal. forest + nelli, mal. phyllanthus emblica, linn.). Tam. from (kízh, tam. below + nelli, tam. phyllanthus emblica, linn.). Title otherwise Many-leaved phyllanthus. Botanically Phyllanthus [aumlacam] polyphyllus, willd., euphorbiaceæ [vricsham, 118]. Alias Phyllanthus emblicoides, lawii, taxifolius. Shrub; leaves narrow or linear-oblongate-elliptic, obtuse at both ends, mucronulate at the apex, densely approximated, recurved at the margin, glabrous, equally broad for some distance; stipules triangular, ovate or lanceolate, denticulate, acuminated; flowers fascicled, very shortly pedicelled, rising from the very small densely bracteated branchlets, all very shortly pedicelled; glands of the male flowers distinct; disc hypogynous, dwarf, annular-crenulate; anthers shortly apiculated; ovary globose; styline column slender; styles thin, elongated, two-cleft; capsules three-furrowed; seeds pale, deeply pitted.——*Kizhanelly* (கீழாநெல்லி - kízhánnelli, Tam.). From (kízh, tam. low + nelli, tam. phyllanthus emblica, linn.). Same as Neeroory.——*Lowly nelly* (भुम्यावळि - búmyávali, Conc.; ನೆಲನೆಲ್ಲಿ - nelanelli, Can. and Too.; నేలఉసిరిక - nélausirike, Tel.; കീഴാനെല്ലി - kízhánelli, Mal.; நிலநெல்லி - nilanelli, Tam.). Title from habit. Conc. from (bhúmi, san. earth + ávâlo, conc. phyllanthus emblica, linn.). Can. and Too. from (nela, can. ground + nelli, can. phyllanthus emblica, linn.). Tel. from (néla, tel. ground + usirike, tel. phyllanthus emblica, linn.). Mal. from (kízhu, mal. below + nelli, mal. phyllanthus emblica, linn.). Tam. from (nilam, tam. ground + nelli, tam. phyllanthus emblica, linn.). Can. also (kirunelli), meaning small + phyllanthus emblica, linn. Tam. also (nílakkadambai), meaning blue + anthocephalus cadamba, miq.; (mélanelli), meaning surface + phyllanthus emblica, linn. Title otherwise Madras phyllanthus. Botanically Phyllanthus [aumlacam] maderaspatensis, linn., euphorbiaceæ [vricsham, 118]. Very variable in habit, erect or decumbent below; stems low and herbaceous, or erect, slender, woody with spreading branches; leaves from ½ inch and cuneate or almost obcordate to 1½ inch, and narrowly oblong-cuneate; nerves few slanting; petiole minute, stipules lanceolate membranous; male flower $\frac{1}{20}$ inch diameter usually fascicled with one much larger female; female $\frac{1}{10}$ inch diameter in fruit; sepals rounded or obcuneate; disk of glands in both sexes; anthers almost sessile on the column, erect, apiculate; fruit dry, $\frac{1}{8}$ inch diameter, globose. The seeds are polished, triangular, of a grey color, finely marked with delicate dark-brown lines like basket-work; length $\frac{1}{16}$ of an inch; breadth somewhat less; one side is arched, the other presents two sloping surfaces united to form a longitudinal ridge, at the pointed end is a small scar marking the attachment to the ovary; the testa is hard and brittle; when soaked in water they immediately become thickly coated with a semi-opaque mucilage; the kernel is oily and has a sweet nutty taste. The seeds are used medicinally on account of the mucilage which they afford.——*Mail nelly* (மேலநெல்லி - mélanelli, Tam.). From (mél, tam. high + nelli, tam. phyllanthus emblica, linn.); tall shrub. Same as Poolah.——*Netted nelly* (ఎర్రపురుగుడు - errapurugudu, Tel.; වල්කයිල - valkayila, Singh.). Title from reticulated appearance of leaf. Tel. from (erra, tel. red + purugudu, tel. phyllanthus multiflorus, willd.). Singh. from (vel, singh. creeper + kayila, singh. the plant, phyllanthus reticulatus, mull.). Tel. also (nallapurugudu), meaning black + phyllanthus multiflorus, willd. Singh. also (kayilavela), meaning same. Title otherwise Netted phyllanthus. Botanically Phyllanthus [aumlacam] reticulatus, mull., euphorbiaceæ [vricsham, 118]. Flowers fascicled; ovary twelve to six-celled, globose, glabrous; styles short, erect, two-lobed; capsules sub-globose, depresso-truncated at the apex. The bark is dark-brown externally, and thickly studded with little elliptic warty rings; beneath the suber is a deposit of chlorophyll, but the substance of the bark is of a dull-red color; taste sweet and astringent. Bark, as it appears in the bazaars, is commonly in pieces about a foot long, and as thick as the wrist, of a dark color outside, and of a faint sweetish taste. Leaves and bark are diuretic alterative and cooling medicine.——*Root nelly* (గడ్డనెల్లి - gaddanelli, Tel.). Same as Indian nettle.——*Small nelly* (அருநெல்லி - arunelli, Tam.). Same as Brazil cherry.——*Sour nelly* (നെല്ലിപ്പുളി - nellippuli, Mal.). From sour fruit. Same as Brazil cherry.——*Stinking nelly* ([illegible] - gabbunelli, Tel.). From stinking leaves. Same as Moonnay.——*White nelly* (తెల్లఉసిరిక - tellausirika, Tel.). Title from color of fruit. Tel. from (tella, tel. white + usirika, tel. phyllanthus emblica, linn.). Title otherwise White phyllanthus. Botanically Phyllanthus [aumlacam] pendulus, roxb., euphorbiaceæ [vricsham, 118]. Shrub, glabrous; branches flexuose, often somewhat pendulous; leaves lanceolate-elliptic, sub-acute, colored at the margin, upper ones smaller; flowers monœcious; racemules situated in the lower part of the branchlets at length half-equalling the leaves, densely bracteated in four rows, pendulous; female flowers solitary in the upper axils; calycine segments orbicular-ovate, acute; disc of either sex urceolar; ovary globose; styles spreading divergingly, two-cleft; flowering in the rainy season.——*Wild kizhanelly* (காட்டுக்கீழாநெல்லி - káttukkízhánelli, Tam.). Same as Poolah.

NELUMBO (पद्म - padma, *San.*; कमळ - kamala, *Mahr.*; सालक - sálaka, *Conc.*; نيلوفر - nílofar, *Ar.* and *Pers.*; كنول - kanwal, *Hind.* and *Dec.*; [illegible] - tárate, *Malay*; ಕಮಲ - kamala, *Can.*; ತಾವರೆ - távare, *Too.*; తామర - támara, *Tel.*; ପଦ୍ମ - padam, *Oor.*; താമര - támara, *Mal.*; නෙළුම් - nelum, *Singh.*; தாமரை - támarai, *Tam.*). Title from singhalese [nal]. San. from (pat, san. to go + ma, san. water), water-going plant. Mahr. from (kam, san. water + ala, san. to adorn). Ar. from (níla, san. blue + utpala, san. water-lily). Hind. from like mahratta [red indian water-lily, white indian water-lily]. Malay from (tárang, malay, bright). Can. from sanscrit. Too. from tamul. Tel. from tamul [oval-leaved china root]. Oor. from sanscrit. Mal. from (tázh, mal. to sink + maram, mal. plant). Singh. from (nalina, san. lotus). Tam. from (támarasa, san. the plant). San. also (kamala), meaning supported by water or adorning water [red indian water-lily]; (kókanada), meaning praised by ruddy goose, the red variety; (pundaríka), meaning white lotus; (támarasa), meaning red-colored lotus; (jalaja), meaning water born; (aravinda), meaning having filament; (padmachári), meaning lotus + moving; (shatapatra), meaning hundred petalled [cabbage rose]; (sahasrapatra), meaning thousand petalled; (ambuja), meaning water born; (nálíka), meaning having reed-like stalk; (kushéshaya), meaning water resting; (pankéruha), meaning mire growing; (sárasa), meaning pertaining to tank; (sarasíruha), meaning tank growing; (rájíva), meaning shining; (pushkara), meaning nourishing [arabian costum]; (nalina), meaning tied or closed by the moon. Pers. also (báklaikabti), meaning coptic potherb. Hind. also (lálkanwal), meaning red lotus; (ambuj); (padam). Malay also (sároja), meaning tank-born. Can. also (támare). Too. also (allige). Tel. also (saugandhikamu), meaning sweet smelling; (tellatámara), meaning white + the plant; (tellanipadmamu), meaning white + the plant; (yerratámara), meaning red + the plant; (errafámarapadmamu), meaning red + lotus. Mal. also (tandár), meaning water flower; (ventámara), meaning white lotus. Singh. also (nelumbu); (kamal). Tam. also (tirumálundi), meaning vishnoo's navel, from mythological place of origin [pralayam]; (shivapputtámarai), meaning red lotus. κρίνεα ῥόδοις ἐμφέρεα of herodotus, κύαμος αἰγύπτιος of theophrastes. Title otherwise Chinese water-lily, Coptic bean, Egyptian bean, Egyptian lotus, Hundred-petalled flower, Moonfoe, Mystic lotus, Nutty lotus, Peltated water-lily, Pudmam, Pythagorean bean, Sacred lotus, Spiral thread, Taumaray, Thousand-petalled flower, Vishnoo's navel, Water bean. Botanically Nelumbium speciosum, willd., nymphæaceæ [vricsham, 7]. Generic name from singhalese. Alias Cyamus mysticus, nelumbo; Nelumbium asiaticum, tamara; Nelumbo indica, nucifera; Nymphæa nelumbo; Tamara alba, rubra. Tamara is tamul. Aquatic; leaves orbicular, attached by their centre, glabrous, under surface pale, margins

somewhat waved; peduncles longer than the petioles, erect; root-stock horizontal, fleshy, sending out many fibres from the under-surface; petioles long, rising above the surface of the water, scabrous with acute tubercles; corolla polypetalous; connectivum produced beyond the cells of the anthers into a clavate appendage; nuts loose in the hollows of the torus, one to two-seeded; flowers large, white or rose-colored; flowering nearly all year. Large, broad-leaved herb of the water-lily family; found in tanks; flowers during hot season; new blown flowers of rose-colored [gool] variety have agreeable fragrance, those of white and yellow have less odour; produces seed in drooping, cone-shaped seed-vessels; ripens seed about close of rains [mazhay]; the seed receptacle has been compared to a pomegranate [anaur] cut in half, and by herodotus to a wasp's nest; seeds consist of oblong nuts, twice the size of peas [calauyam], when perfectly ripe so hard as to require a hammer to break them; when ripe, the seeds are loose each in their separate cell, and if shaken make a noise like a rattle; stems, petioles, and flower-stems are raised above the water; leaf from its structure growing entirely round the stalk defends both flowers and fruit arising from its centre from contact with water. The seeds or nuts are hard and dark brown, round, oval or oblong, about the size of the seeds of soap-nut [q.v.] tree, with a white, albuminous and slightly sweetish kernel; the root occurs in the bazaar in small and circular pieces, varying in diameter from 3 or 4 lines to 1 inch, with several holes arranged in a circular form with a solitary and generally smaller one in the centre; odourless and slightly mucilaginous in taste; the holes are the result of the cut ends of the spiral tubes; long, fine filaments are found within the cells of the stalks. This is the sacred egyptian lotus, which originally found its way from india where it was indigenous; as a device the flower enters into all the ornaments of brass [pittalay] vessels used in hindoo temples [coil, pagoda]; it is the immediate attribute of vishnoo [q.v.] from being the first of aquatic plants and a personification of water; it is also sacred to lutchmy [q.v.] who is called camalay [q.v.]; it is generally an emblem of female beauty. In cultivation, the mode of sowing the seeds is by enclosing them in balls of clay [calimunn] and throwing them into the water. The flowers, seeds and roots are medicinally similar to indian water-lily [q.v.]; filaments are astringent and cooling; seeds are diuretic and refrigerant; large leaves form a cool bed in fever; the milky viscid juice of the leaf and flower-stalks is a remedy in diarrhœa; petals are slightly astringent; sherbet [q.v.] of the plant is used as refrigerant; root is used as a paste in cutaneous affections. Seeds eaten by the natives either raw, roasted, or boiled; roots after being cut into slices, dried and fried in oil, are eaten; stalk and leaf eaten as vegetables [keeray]; unripe nuts have flavor of filberts [findak]; on ripening, they become hard and are then roasted. Fibres [naur] used as wicks to burn in the temple worship, and leaves used as plates on which offerings are placed. The Tamul Cooral has the following:—வெள்ளத் தனைய மலர்நீட்ட மாந்தர்தம் முள்ளத் தனைய துயர்வு—"the stalks of "water-flowers are proportionate to the depth of water; so is "men's greatness proportionate to their minds." There are several varieties with white or rose-colored flowers, and with or without a prickly stem; a blue variety is native of cashmere and persia. No other common species here. This lotus [q.v.] must be distinguished from two other plants of the same name known to the ancients; viz., the herb Melilotus officinalis, willd.; and the lotus of the lotophagi, Zizyphus jujuba [bair]. Distinguish also from the Indian water-lily.——*Black nelumbo* (కృష్ణతామర - krishnatámara, Tel.). Same as Indian shot.——*Blue nelumbo* (నీరుతామర - nírutámara, Tel.; കരിങ്കുവലയം - karinkuvalayam, Mal.; நீலத்தாமரை - nílattámarai, Tam.). Title from color of flowers. Tel. from (níru, tel. water + támara, tel. nelumbo). Mal. from (kari, mal. black + kuvalaya, san. water-lily, nymphæa). Tam. from (níla, san. blue + támarai, tam. lotus, nelumbium speciosum, willd.). Tel. also (nírukátsa), meaning water + plant so called. Mal. also (karinkúvalam) by corruption. Tam. also (karunguvalai), meaning black + monochoria, from blue flowers. Title otherwise Blue lotus. Botanically Monochoria vaginalis, presl., pontederaceæ [vriesham, 135]. Alias Pontederia vaginalis. Root perennial, creeping; leaves radical, narrow-cordate, pointed, entire, smooth, glossy; from 2–4 inches long, 1–2 inch broad; petioles sub-erect, tapering, fistulous, smooth, from 6–12 inches long; those that bear a raceme are swelled a little about the middle, and there open like a spathe lengthways near the base, those that do not bear flowers are enlarged into a sheath, which embraces the exterior leaves; raceme short peduncled, after flowering time, drooping, from six to twelve-flowered; pedicels about ½ inch long; flowers blue and pretty; calyx no other than the common spathe of the raceme; petals six, three exterior are the smallest and oblong, three interior obovate; filaments ascending, inserted round the base of the germ, the lowermost one is generally broad, and two-cleft, its lower division bears a blue anther, the other nothing; the rest are yellow, germ superior; style single; stigma glandular. Aquatic herb on margins of tanks. Root used in diseases of liver and stomach; pulverized and mixed with sugar [q.v.], administered for asthma; leaves, bruised and mixed with milk [paul], administered in cholera; root chewed for toothache; young shoots are edible. Another species is hastæfolia.——*Floating nelumbo* (कालानुशारिवा - kálánushárivá, San.; कातरी - kátarí, Mahr.; چولی - chulí, Hind.; بڑا انتر گنگا - baráantargangá, Dec.; ಅಂತರಗಂಗೆ - antaragange, Can.; అంతరతామర - antaratámara, Tel.; ചെറുചിറ്റാമ്പൽ - cheruchittámbal, Mal.; நெய்தலாம்பல் - neydalámbal, Tam.). Title from resemblance and floating roots. San. from (kála, san. time + anusri, san. to follow); follows seasons. Hind. from (shítalí, san. the plant). Dec. from (bará, dec. large + antargangá, dec. the plant). Can. from (antara, san. atmosphere + gangá, san. ganges); from roots floating on water. Tel. from (antara, san. atmosphere + támara, tel. lotus, nelumbium speciosum, willd.); from roots floating on water, without grounding. Mal. from (cheru, mal. small + chittámbal, mal. the lily, nymphæa stellata, willd.). Tam. from (ney, tam. to become fleshy + ámbal, tam. water-lily, nymphæa lotus, linn.); from fleshy leaves. San. also (kumuda), meaning earth + delight [red indian water-lily]; (kumudiní), meaning assemblage of lily; (kumudvatí), meaning abounding in lilies; (shítalí), meaning cooling, from roots used as sarsaparilla, hemidesmus indicus, r. br.; (shítalíjatá), meaning cooling tuft of hair. Hind. also (barachulí), meaning large variety; (kamúdní); (guljafarí), meaning the marigold, tagetes patula, linn.; (khairposh), meaning wood cover. Tel. also (chirialli), meaning small + nymphæa lotus, linn.; (peddaákáshatámara), meaning large + sky + nelumbium speciosum, wild.; (peddaantaratámara), meaning large + the plant; (tórelaga). Mal. also (neytalámbal), meaning water-lily of maritime tracts; (nírámbal), meaning water + nymphæa lotus, linn. Tam. also (ágásattámarai), meaning same; (ágásavalli), meaning sky creeper; (andarattámarai), meaning atmosphere + lotus; from roots floating in water without adhering to soil; (periyavágásathámarai), meaning large + the plant. Title otherwise Buck-bean, Camoodee, Floating heart, Fringed water-lily, Indian buck bean, Marsh buck bean, Marsh flower, Marsh trefoil, Water fringe. Botanically Limnanthemum cristatum, griseb., gentianaceæ [vriesham, 90]. Alias Menyanthes cristata; Villarsia cristata. Aquatic; leaves cordate-orbicular, roughish above, glandular beneath; calyx segments ovate-lanceolate; segments of the corolla waved, ciliated, with a longitudinal crest within; flowers white, cymose, inserted on the petiole; capsule one to two-seeded; seeds muricated. Found floating in lakes and tanks; middle-sized flowers with a yellow tube and a white-bearded limb; tuberous roots are used medicinally. Another and similar species is Indicum.——*High ground nelumbo* (మెట్టతామర - mettatámara, Tel.). From habitat and resemblance. Same as Foreign agatty and Malabar arrowroot.——*Hill nelumbo* (மலைத்தாமரை - malaittámarai, Tam.). Same as Oval-leaved china root.——*One-leaf nelumbo* (चारटी - chárati, San.; रतान्पुरुस् - ratánpurus, Mahr.; पुरुषरत्न - purusharatna, Conc.; رتن پرس - ratanpurs, Hind.; رتن پرس - ratanpurus, Dec.; ಓರೆಲೆದಾವರೆಗಿಡ - óreledávaregida, Can.; పురుషరత్నము - purusharatnamu, Tel.; ഒരിലത്താമര - orilattámara, Mal.; මහයොතුවන්න - mahayotuvanna, Singh.; ஓரிலைத்தாமரை - órilaittámarai, Tam.). Title from single petal of flower. San. from (char, san. to spread). Mahr. from (ratna, san. gem + purusha, san. man); as a tonic. Conc. from (purusha, san. man + ratna, san. gem). Hind. from (ratna, san. gem + purusha, san. man). Can. from (ór, can. one + ele, can. leaf + dávare, can. lotus, nelumbium speciosum, willd. + gida, can. plant). Tel. from (purusha, san. man + ratna, san. precious stone). Mal. from (oru, mal. one + ila, mal. leaf + támara, mal. lotus). Singh. from (maha, singh. large + yotuvanna, singh. the plant so named). Tam. from (ór, tam. one + ilai, tam. leaf + támarai, tam. nelumbium speciosum, willd.); from monopetalous flower. San. also (purusharatna), meaning man + gem; (ékapatri), meaning single + leaf; (padmachárini), meaning lotus + spreading; (atichará), meaning greatly spreading. Can. also (purusharatna), meaning man + gem. Tel. also (nélakobbari), meaning ground + cocoanut, cocos nucifera, linn.; (súryakánti), meaning sun + lover [soorya caunty]; (magalingamu), meaning male + emblem of shiva, reputed aphrodisiac [weaver's beam]. Mal. also (nilampiranda), meaning ground + spreading plant. Tam. also (shúryagándi), meaning sun + lustre; (purusarattinam), meaning man + gem; (órithazhttámarai), meaning one + petal + lotus; from monopetalous flower. Title otherwise Cape green violet, Madder-leaved violet, One-leaf lotus, Shrubby ionidium, Suffruticose violet. Botanically Ionidium suffruticosum, ging., violaceæ [vriesham, 13]. Alias Ionidium capense, enneaspermum, frutescens, heterophyllum; Solea enneasperma, erecta; Viola enneasperma, frutescens, suffruticosa. Perennial; stem scarcely any; leaves alternate, subsessile, lanceolate, slightly serrate, smoothish; peduncles axillary, solitary, one-flowered, shorter than the leaves, jointed above the middle, with two bracts at the joints; calyx five-cleft; petals five, two upper ones smallest, linear-oblong, two lateral ones sub-ovate, with long recurved apices, lower one largest, broad-cordate, supported on a claw; capsules round, one-celled, three-valved; seeds several; flowers small, rose-colored, flowering nearly all year; common weed; grows abundantly in low and damp places. The drug as sold in the shops consists of the root and some of the leafy portion of the plant attached to it; the roots are yellowish-white, 3–4 inches in length, about $\frac{1}{12}$th of inch in diameter at the upper part,

gradually tapering downwards, woody and tough, and covered with a corky bark. Whole plant is medicinally demulcent, refrigerant, tonic and diuretic; juice of fresh leaves is pressed out by bruising them with water, and administered alone or in combination with fenugreek [maitee] seeds; dose of the leaves is one drachm, twice or three times a day; substituted for oleum copaibæ and spiritus ætheris nitrosi; leaves and tender stalks demulcent, used by natives in decoction [kwautam] and electuary; also employed, in conjunction with mild oil, in preparing cooling liniment for head; root in infusion is diuretic. ——*Pit nelumbo* (గుర్రపుడెక్క - gurrapudekka, Tel.; കുഴിത്താമര - kuzhittámara, Mal.; நீர்ச்செம்பு - nírççémbu, Tam.). Title from usual habitat. Tel. from (gurramu, tel. horse + dekka tel. hoof). Mal. from (kuzhi, mal. pit + támara, mal. nelumbium speciosum, willd.). Tam. from (nír, tam. water + shémbu, tam. colocasia nymphæifolia, kunth.). Tam. also (kuliri), meaning cold. Title otherwise Adder's tongue, Arrowhead, Arrowleaf, Water archer, Water kachvee. Botanically Sagittaria obtusifolia, l., alismaceæ [vricsham, 133]. Root fibrous, annual; leaves radical, erect, long-petioled ovate-sagittate; apex circular, lobes or barbs divaricate, tapering to long, narrow, fine points, smooth many-nerved; 6–12 inches long, 4–8 inches broad; petioles 2–3 feet long, thick, one side flat, the other angular; scapes including flower bearing part 2–4 feet high, erect, five to six-angled, striated, the lower verticle, and sometimes the second, bear branches mixed with one-flowered pedicels; involucre at each verticle three-fold, sessile, conical; flowers numerous, small, white; male flowers for the most part terminal, peduncled; peduncles slender; calyx three-leaved; corol three-petalled; filaments six, below they are enlarged, so as to occupy the whole of the centre of the flowers; anthers two-lobed; hermaphrodite flowers, for there are no female flowers, more numerous below, robust, peduncled; calyx and corol as in the male; filaments six, with their enlarged bases surrounding the germs; germs about thirty, sessile; stigma-lobed, bearded, or downy; drupes numerous, collected on a globular receptacle, turbinate, dry, wrinkled; nut one-seeded, but there are also two empty cavities, one on each side of the seed; seed bent double, with the two extremities pointing to the base, by one of which it is affixed to the bottom of the drupe. Handsome aquatic plant. Other common species are:—cordifolia, sagittifolia.——*Rootless nelumbo* (कुंभिका - kumbhiká, San.; انترگنگا - antarganga, Hind. and Dec.; ಅಂತರಗಂಗೆಗಿಡ - antaragangegida, Can.; ನೀರತ - nírata, Too.; అంతరతామర - antaratámara, Tel.; കുടപ്പായൽ - kutappáyal, Mal.; ஆகாசத்தாமரை - ágásattámarai, Tam.). Title from floating roots. San. from (kumbha, san water pot); cf. coomby. Hind. from (antar, hind. inside + gangá, hind. ganges). Can. from (antara, san. inside + gange, can. water + gida, can. plant). Tel. from (antara, san. inside + támara, tel. lotus, nelumbium speciosum, willd.), from roots floating in water and not grounding in the earth. Mal. from (kuta, mal. pitcher + páyal, mal. duck-weed, lemna). Tam. from (ákásha, san. sky + támarasa, san. lotus flower, nelumbium speciosum, willd.); floating lotus. San. also (váriparní), meaning having water-colored leaves. Too. also (antaragange). Tel. also (ákáshatámara), meaning sky + lotus; (nírubudiki), meaning water + bathing; (níráku), meaning water + leaf; (túdikúra). Mal. also (nírççíra), meaning water greens; (annillápponnu), meaning shapeless floating plant. Tam. also (andarattámarai), meaning sky + the lotus plant, nelumbium speciosum, willd. Title otherwise Antargunga, Aucausha taumaray, Sky lotus, Tropical duck-weed, Water soldier, Water spogel, West indian water lettuce. Botanically Pistia stratiotes, linn., pistiaceæ [vricsham, 151]. Alias Plantago aquatica; Tala indica. Stemless, floating; roots numerous, fibrous; leaves subsessile, wedge-shaped at the base, elliptic or obovate, alternated at the base, glaucous on the upper surface, radiate-veined, about twenty, spreading out, central leaves smaller than the outer ones, inner ones erect, tomentose; fibres long, terminated by other plants; flowers axillary, solitary, erect, on short peduncles, white or pale yellow; flowering in april; tanks and ditches, everywhere. Decoction or infusion cooling and demulcent; leaves made into poultice for piles; mixed with rice and cocoanut [q.v.] milk are given in dysentery, and with rosewater [goolaub] and sugar in cough and asthma; root is laxative and emollient. In moderate quantity the living plant in wells, &c., helps to purify the water. Other species are:—ægyptiaca, crispita.——*Round-leaved nelumbo* (चांदा - chándá, Mahr.; चंदडे - chandadé, Conc.; ಬೆಟ್ಟದಾವರೆ - bettadávare, Can.; ಉಪ್ಪಾಲ - uppála, Too.; పుట్టతామర - puttatámara, Tel.; ഉപ്പില - uppila, Mal.; வட்டத்தாமரை - vattattámarai, Tam.). Can. from (betta, can. hill + dávare, can. lotus). Too. from (uppu, too. salt). Tel. from (putta, tel. ant hill + támara, tel. nelumbium speciosum, willd.). Mal. from (uppu, mal. salt + ila, mal. leaf), from leaves preserving salt from damp. Tam. from (vattam, tam. circle + támarai, tam. lotus). Can. also (uppalige); (chendakanni); (upligi); (upalkai); (kanchupranthi). Mal. also (vattattámara), meaning round lotus. Tam. also (kandubárangi) [knotted bhraungy]; (vattikkanni). Title otherwise Round-leaved lotus, Salt lotus, Varee tree. Botanically Macaranga indica, wight, euphorbiaceæ [vricsham, 118]. Tree; leaves stipuled, peltate; stipules paired, broad-ovate, cuspidate; male flowers panicled, glomerate; bracts petioled, glandulose; calyx three-parted, pubescent; stamens six to eight; female panicles axillary; flowers solitary or paired, pedicelled, bracteate; style one; ovary one-celled; calyx four-parted; capsule covered with resinous points, flowers greenish; flowering in december and january; very common in western forests. Coffee [q.v.] trees thrive under the shade, as the fallen leaves are good manure; gummy substance of tragacanth [kateerah] kind exudes from cut branches and base of the petioles, of light crimson color, and has been used for taking impressions of leaves, coins, and medallions; wood greyish-red, moderately hard. A species peltata is called hill-lotus. Other species are:—digyna, flexuosa, tomentosa.——*Shrinking nelumbo* (ముణుగుతామర - munugutámara, Tel.). See under Shoondy.

NERAID (నేరేడు - nérédu, Tel.). Same as Common jaumoon. Compare:—Flacourtia ramontchi, var. sapida (nakkanérédu), fox jaumoon; Premna herbaceæ (nélanérédu), lowly jaumoon.

NERIJA (నెరిజ - neridza, Tel.; නෙරළු - neralu, Singh.; செலுப்பை - sheluppai, Tam.). Title from teloogoo. Tel. also (bíra); (nerasi); (nirasi); (niradza); (niridza); (botanskam); (kanemis). Tam. also (karkavá); (irkuli); (siri). Title otherwise Chelooppay, Olive-wood. Botanically Elæodendron glaucum, pers., celastrineæ [vricsham, 40]. Alias Elæodendron paniculatum, roxburghii; Nerija dichotoma; Rhamnus nerija. Nerija from teloogoo. Tree; leaves opposite, elliptical or ovate, crenate-serrated, young ones glaucous; calyx five-partite; petals five, linear-oblong; peduncles axillary; cymes lax, dichotomous, divaricated, about half the length of the leaves, usually with a solitary flower in the forks; drupe one-celled, obovoid; but somewhat crustaceous and soft; flowers small, yellow; found everywhere, most variable as to size. The root bark is compact and brittle, and has a granular fracture; it occurs in small irregular fragments, is of a dull reddish color, and is covered by a scabrous brittle suber, the external surface of which is brown or sometimes yellowish, and the substance and internal surface of a bright brick red; some pieces of the bark show small warty prominences which are usually fissured exposing the brick red color of the suber. Both leaves and bark are astringent to the taste and slightly bitter. Gum [gond] occurs in roundish tears about half inch in diameter, rough or cracked on the surface, tasteless, forming a sherry-colored solution; root is called specific in snake bites; fresh bark of roots rubbed with water applied externally to remove almost any swelling, a very strong astringent; bark also used for dyeing [shauyam]. Wood not very strong or stiff, but tough, close and even grained, the surface curled and flowered and of a reddish brown, suited for cabinet work; used by natives for the manufacture of combs, suited for picture frames, &c. No other common species here.

NERINJY (गोक्षुरक - gókshuraka, San.; गोखरू - gókharú, Mahr.; नेगलमुळ्ळु - négalmullu, Conc.; حسك - hasak, Ar.; خسك - khasak, Pers.; گوکھرو - gokhrú, Hind. and Dec.; ಸಣ್ಣನೆಗ್ಗಿಲು - sannaneggilu, Can.; ನೆಗಿಲುಮುಳ್ಳು - négilumullu, Too.; పల్లేరు - palléru, Tel.; ഞെരിഞ്ഞിൽ - ñeruññil, Mal.; සෙම්බුනෙරෙඤ්චි - sembunereñchi, Singh.; நெருஞ்சில் - neruñjil, Tam.). Title from tamul. San. from (gó, san. cow + kshura, san. hoof); from the resemblance of the cocci when adhering together in pairs to a cloven hoof. Mahr. from sanscrit. Ar. from (hasaka, ar. to bear rancour). Pers. from arabic. Hind. and dec. from sanscrit. Can. from (sanna, can. small + neggilu, can. small caltrops). Too. from (négilu, too. caltrops + mullu, too. thorn). Mal. from tamul. Tam. from (neri, tam. to press). San. also (vanashringáta), meaning wild trapa bispinosa, roxb.; (shvadamshtrá), meaning dog's tooth, as having thorn resembling dog's tooth; (trikantakavallí), meaning triple thorned creeper; (ikshugandhá), meaning sugar-cane smelling, in allusion to the aroma of the plant [naunal, neermoolly]; (palamkashá), meaning flesh injuring; (svádukantaka), meaning sweet-thorned [swaudoocantacam]; (gókantaka), meaning cow's thorn [neermolly]; (sudamshtra), meaning well-toothed; (raktasudamshtra), meaning red + the plant. Ar. also (bastítaj). Can. also (negalu); (neggilumullu), meaning caltrops + thorn; (nerigilu). Tel. also (chiripalléru), meaning small + the plant; (errapalléru), meaning red + the plant. Singh. also (nereñchi). Tam. also (aççuram); (tirigandagam), meaning three-thorned. Greek τρίβολος. Title otherwise Cow's thorn, Dog tooth, Gokhoor, Gokroo, Land caltrops, Small caltrops. The thistles of St. Mathew. Botanically Tribulus terrestris, linn., zygophylleæ [vricsham, 30]. Alias Tribulus lanuginosus. Trailing; leaves opposite, abruptly pinnated, pleasant smelling and sweet tasted; leaflets about five to six pair, nearly equal, with a close-pressed villous pubescence; peduncles shorter than the leaf; flowers axillary; calyx deeply five-partite; petals five, broad, obtuse; fruit five-coccous, cocci each with two prickles; flowers solitary, bright yellow, sweet-scented; fibrous root; fruits, small and spiny. The fruit is roundish, five-cornered, five-celled, about the size of bengal-gram [q.v.], and armed with prickles, source of annoyance to foot travellers; each of cells contains one or two four-horned seeds; the fruit possesses no particular taste or smell, but the seeds are slightly bitterish, due to the presence of an alkaloid. Fruit, leaves and root diuretic in decoction; seeds powdered in infusion used in dropsy and gonorrhœa; fruits one of the ten dashamoolam [q.v.]; all parts in pharm. non-officinal. Decoction; take of the dry fruit, bruised, three ounces; water, one

pint and-a-half; boil on slow fire till the liquid is reduced to one pint, strain when cool. Juice of the fresh leaves pressed out by bruising without water and passing through cloth. Doses; of the decoction, from one to three fluid ounces; of the juice, from one to two fluid ounces; four or five times a day. A weak substitute for spirit. æther. nit., tragacanth, buchu and uva ursi. There is a variety with red flowers whose leaves have smell of cloves [lavangam]. No other common species here.——*Black nerinjy* (ಕಾರ್ನೆಗ್ಗಿಲು - kárneggilu, Can.; నల్లపల్లేరు - nallapalléru, Tel.; கருநெருஞ்சில் - karuneruñjil, Tam.). Title from yielding indigo; the legumes are bristly on the convex side; hence native association with the thistles. Can. from (káru, can. black + neggilu, can. tribulus terrestris, linn.). Tel. from (nalla, tel. black + palléru, tel. tribulus terrestris). Tam. from (karumai, tam. blackness + neruñjil, tam. tribulus terrestris, linn.). Tel. also (nílipalléru), meaning indigo + nerinjy. Title otherwise Black pallair, Round-leaved camel's thorn. Botanically Indigofera [neely] echinata, willd., leguminosæ [vricsham, 48]. Alias Hedysarum erinaceum, rotundifolium; Onobrychis rotundifolia. Herbaceous, prostrate; branches angular; leaves simple, obovate, dotted with glands; racemes peduncled, shorter than the leaves, six to eight-flowered; keel pointed; legumes crescent-shaped, bristly on the convex side; seed solitary, reniform; moist sandy soils near the coast; very common.——*Elephant nerinjy* (गजदंष्ट्री - gajádamshtrí, San.; गोखरू - gókharú, Mahr.; حسك كبير - hasakikabír, Ar.; خسك كلان - khaskikalán, Pers.; بڑا گوکھرو - barágokhrú, Hind.; هتی گهوکرو - hattíghokrú, Dec.; ಆನೆನೆಗ್ಗಿಲು - áneneggilu, Can.; ಆನೆನೆಗಿಲ್ - ánenégil, Too.; ఏనుగపల్లేరు - énuga-palléru, Tel.; കാക്കമുള്ള് - kákkamullu, Mal.; අත්නෙරංචි - atnerañchi, Singh.; ஆனைநெருஞ்சில் - ánaineruñjil, Tam.). Title from size of leaf and drupe. San. from (gaja, san. elephant + damshtra, san. tusk). Mahr. from (gókshura, san. cow's hoof, tribulus terrestris, linn.). Ar. from (hasak, ar. tribulus terrestris, linn. + kabír, ar. large). Pers. from (khask, ar. tribulus terrestris, linn. + kalán, pers. large). Hind. from (bará, hind. large + gokhrú, hind. tribulus terrestris, linn.). Dec. from (hattí, dec. elephant + ghokrú, dec. tribulus terrestris, linn.). Can from (áne, can. elephant + neggilu, can. tribulus terrestris, linn.). Too. from canarese. Tel. from (énuga, tel. elephant + palléru, tel. tribulus terrestris, linn.). Mal. from (kákka, mal. crow + mullu, mal. thorn). Singh. from (at, singh. elephant + nereñchi, singh. tribulus terrestris, linn.). Tam. from (ánai, tam. elephant + neruñjil, tam. tribulus terrestris, linn.). Hind. also (farídbútí), meaning fareed's plant; from a saint so called having lived on the water rendered mucilaginous with the leaves [jamtee]. Can. also (ánnegilu), meaning elephant + tribulus terrestris, linn.; (doddaneggilu), meaning large + the plant. Tel. also (peddapalléru), meaning large + tribulus terrestris, linn. Mal. also (káttuñeriññil), meaning wild, tribulus terrestris, linn.; (ánañeriññil), meaning elephant or large caltrop. Tam. also (peruneruñjil), meaning large + small caltrop, tribulus terrestris, linn.; from large leaf. Title otherwise Crow thorn, Fareedbootee, Fareed's plant, Large nerinjy, Prickly pedalium. Botanically Pedalium murex, linn., pedalineæ [vricsham, 100]. Small plant, one to two feet; calyx five-parted, upper segments shortest; corolla with a three-cornered tube and five-lobed limb, sub-labiate; stamens four; leaves opposite, obovate, obtuse, regularly toothed, truncate, smooth; flowers yellow on short pedicels; drupe armed with sharp spines, and containing a two-celled, four-winged nut; cells two-seeded; seeds arillate; flowers axillary, solitary, yellow; found particularly at cape comorin on seashore; flowers in the rainy and cold seasons. Whole plant has odour of musk [custoory]; root of deep orange color; the young branches, petioles, under-surface of leaves and immature capsules have a frosted appearance, which is due to the presence of numerous small, sessile, brilliant, crystalline, four to five-partite glands; the substance of the fruit consists in great part of dense fibro-vascular tissue, forming a kind of four-winged nut, the corky part consists of delicate cellular tissue, when fresh it is green and succulent; simple agitation of the young branches in water, without any crushing, produces a viscid mucilage like white of egg. Juice is a good gargle; the fresh plant as above said renders water or milk very mucilaginous without altering the taste, color, or smell of the liquid; the thickening disappears in a few hours; this beverage given in gonorrhœa, being diuretic; quoted in pharm. non-officinal. The leafy stems are used in the same way in thickening butter-milk [mor], to which they give a rich appearance; plant acts as sand-binder [manal]. No other common species here.——*Red nerinjy* (वसुका - vasuká, San.; भुईगुली - bhuígulí, Mahr.; ಕೆನ್ನೆಗ್ಗಿಲು - kenneggilu, Can.; ఎఱ్ఱపల్లేరు - errapalléru, Tel.; ചെറുപുള്ളടി - cherupullati, Mal.; செப்புநெருஞ்சில் - sheppuneruñjil, Tam.). Title from color of flowers; the trailing character makes the native association with the trailing thistles; see also black nerinjy. San. from (vas, san. to dwell), possessing virtue; medicinal. Mahr. from (bhuí, mahr. ground + gulí, mahr. indigo plant, indigofera tinctoria, linn.). Can. from (kem, can. red + neggilu, can. tribulus terrestris, linn.). Tel. from (erra, tel. red + palléru, tel. tribulus terrestris, linn). Mal. from (cheru, mal. small + pullati, mal. desmodium gangeticum, dec.). Tam. from (shem, tam. red + neruñjil, tam. tribulus terrestris, linn.). San. also (suvarççala), meaning shining; (gópála), meaning cow-protector; cattle fodder. Can. also (chenneggilu), meaning red + caltrops. Tel. also (chiragadamu) [sweet potato]; (chalapaççi). Title otherwise Red pallair, Trailing camel's thorn, Trailing indigo plant. Botanically Indigofera [neely] enneaphylla, linn., leguminosæ [vricsham, 48]. Alias Hedysarum prostratum; Indigofera cæspitosa. Perennial, procumbent; young parts and leaves pubescent with white hairs; branches prostrate and edged; leaves pinnate, sessile, leaflets three to five pairs, obovate-oblong racemes sessile, short, dense, many-flowered; legumes oval, pubescent, not winged; seeds two, ovate and truncated at one end; flowers small, bright red; flowering nearly all the year. Infusion of the whole plant diuretic and given by veidyans [q.v.] in fevers and coughs; expressed juice is given as an alterative in old syphilitic diseases; it is sub-acid and pleasant tasted. The plant is eaten by cattle. ——*Small nerinjy* (چهوٹا گوکهرو - chhotágokhrú, Hind.). From small bristly germs. Same as Burdock datura.——*Vegetable nerinjy* (కూరపల్లేరు - kúrapalléru, Tel.). Title from use. Tel. from (kúra, tel. vegetable + palléru, tel. tribulus terristris, linn.). Botanically Vitis [draucshay] auriculata, roxb., ampelideæ [vricsham, 42]. Alias Cissus auriculata. Young shoots succulent; petioles and inflorescence softly pubescent; stipules large, linear-oblong, recurved; leaves long-petioled, with five pedate or digitate leaflets; leaflets oblong-obovate or rhomboid, shortly acuminated, serrulated, under side softly pubescent; peduncles as long as the petioles, axillary or terminal; cyme much branched; petals distinct; fruit red, size of a cherry [q.v.], one-seeded; flowers small, green; flowering throughout the year.

NERRUCK (نرخ - nirkh, *Hind.*). From persian. A tariff, especially established by authority. Nerruck nauma is a list of market prices [bazaar].

NESAVOO (वाय - váya, *San.*; باف - báf, *Pers.*; بنا - bunná, *Hind.*; నేత - néta, *Tel.*; നെയ്ത്തു - neyttu, *Mal.*; நெசவு - nesavu, *Tam.*). San. from (vé, san. to weave). Tam. from (ney, tam. to weave). Weaving. Carried on in most villages, where men of the proper caste are found [keikkila]. Indian loom [tarry] is probably oldest machine in the world. Cloths are woven either with the fine foreign thread [nool] sold in the bazaar, or oftener with the rough thread spun by the native agriculturalists. The thread is first steeped in water for three days, and then dried. It is then wound round large spindle-like bamboo [q.v.] frames [taur], which are on a small scale what the warping-mill is to the English warper. A small hollow piece of smooth bamboo [ausmaun] 2 inches long, held in the hand, answers to the English mechanical heck-box. To get the length of warp [pauv] and make the leash [pinay], the thread is then passed in and out round pegs fixed in a certain order on a wooden frame [ausmaun]. It is taken off this in skeins made by going 30, 60 or 120 times round the pegs. Each skein is a poonjam [q.v.]; and as the higher number of threads is given to the finest yarn, 120 poonjam or 120 times round the pegs indicates a fine cloth. The thread thus skeined is then attached to the warp-beam [mady cumboo] by the beamer the same as in England, and flat thin bits of bamboo are inserted between the threads and the various warp threads [pauv] are separated from one another. After this the warp is elevated off the ground on trestles [muttay coothiray] and the thread is softened by soaking it with conjee [q.v.], by means of a long brush [cootchoo]. This process is to be seen under every tree in a weaving village. The warp threads are then rolled round the warp-beam [mady cumboo] and so left till the loom [tarry] is ready to receive them. The heddles [viloothoo] for shedding the warp threads, the batten [atchoo] for laying the woof, the treadles [mithy], and the shuttles [naudah], do not differ materially from the portions of an old English hand-loom. The weaver sits with his feet in a pit below the loom. The most primitive looms are sometimes erected in the open air under trees.

NEW (نو - nau, *Hind.*). Prefix [now].——*New year* (نوروز - nauroz, Hind.; సంవత్సరాది - samvatsarádi, Tel.; வருடப்பிறப்பு - varudappirappu, Tam.). First day of the year; universally a day of consecration and feasting. Falls on different dates among hindoos according as they follow the lunar [chaundramaunam] or luni-solar [chaundramaunam] or solar [madhyamasowramaunam] calendar [punchaungam]. The tamuls follow sowramaunam reckoning and their year is sidereal; begins 12th April, gregorian reckoning; see Tamul new year. The teloogoos and the canarese follow the chaundramaunam reckoning and their year is luni-solar; begins some days earlier than 12th April; see Teloogoo new year. The malayalam year like the tamul is sidereal; begins 15th September; see Collam. For the Mahomedans who follow the purely lunar reckoning the first day of the year in the first of moharram [q.v.]; begins any day in the year. Chittray or cheitram is the name of first month of the year in the south, Veishaukh in the north of India; for reasons see Maunam and Mausam.

NEY (நெய் - ney, *Tam.*). Ghee [q.v.].——*Neyoonny* (काटे - kárta, Conc.; گرگونرو - gargunaru, Hind.; ಲಿಂಗತೊಂಡೆ - lingatonde, Can.; లింగదొండ - lingadonda, Tel.; നെയ്യുണ്ണി - neyyunni, Mal.; ஐவிரலி - aivirali, Tam.). Title from malayalam. Can. from (linga, san. emblem of shiva + tonde, can. the plant), from seeds. Tel. from (linga, san. emblem of shiva + donda, tel. cephalandra indica, naud.), from seeds. Mal. from (ney, mal.

ghee + unni, mal. eater), from medicinal use. Tam. from (aindu, tam. five + viral, tam. finger); from palmate leaf. Mal. also (neyyómakam), meaning ghee + bishop's weed, carum copticum, benth. Tam. also (aivéli), perhaps by corruption. Greek βρυωνία. Title otherwise Bryony, Ghee ajwaun. Botanically Bryonia laciniosa, linn., cucurbitaceæ [vricsham, 62]. Creeper; stems glabrous; tendrils bifid; leaves slightly scabrous, palmately five-lobed; segments oblong-lanceolate; acuminated, serrated; petioles shorter than the leaves, muricated; male flowers fascicled; female solitary in the same axil; berries the size of a cherry [q.v.], spherical, glabrous, three-celled; seeds few in each cell, with a pulpy aril; margins tuberose; sides gibbous and suberose; flowers small, yellowish-green; flowering all the year; the fruit is pale-red with white streaks; whole plant is bitter. Juice of leaves mixed with milk taken internally in bilious complaints. Leaves boiled and eaten as greens [keeray]. No other common species here.

NEYZA (نیزه - nezah, *Hind.*). Spear. On the seventh khun of Moharram [q.v.] Mahomedans take out a spear in procession. A lime [q.v.] is fixed on the top of it, emblematic of Hoossain's [q.v.] head, which was thus carried by Yazeed's order through different cities.

NI (नि - ni, *San.*). Prefix of intensity; also means in, down. ——*Neecha* (नीच - nícha, San.). From (ni, san. prefix meaning down + anch, san. to bend). Low. The Neecha or polluted castes [jauty] are of the plains four:—Pariahs, Poolayar, Nayaudies, Oollaudar. And of the hills, four:—Veydan, Caniyaur, Coorooba, Malaiyarasar. See each head.——*Neidatham* (नैषध - naishadha, San.; நைடதம் - naidatham, Tam.). From (nishadha, san. country so called). The history of Nalan [q.v.], king of Nishadham [neishadam]. It comprises 1,171 stanzas arranged in 29 cantos. The Tamulians call it the nectar of poets. The following stanza celebrates the beauty of Damayanty's face:—ஒழுகொளிவிரிந்த கதிர்மதிவண்ண னுந்தியந் தாமரையுறை வோன்—முழுமதிக்கலையு ணிறைந்தபோழகை மொண்டுகொண் டரிபாந்தகன்ற—மழைமதர் நெடுங்கட் டமயந்தி வதனம் வகுத்தனன் காத்திறு வெடுத்த—புழைவழித் தோன்றும் விசும்பி னையன்றோ களங்கமென் றின்னமும் புகல்வார்—"He "Bramha [q.v.], who dwells in the lotus-flower [nelumbo], "blooming from the navel of the bright sapphire-colored Vishnoo "[q.v.], formed the face of the long-eyed Damayanty [q.v.] by "taking his materials from the great beauty which is concen-"trated in the full moon [chundran]; and it is the blue sky, "which is seen through the cleft thus made in the moon "that people still call the moon-spot."——*Neimishauranyam* (नैमिषारण्य - naimishháranya, San.). From (nimisha, san. moment + aranya, san. forest); so called because in it the sage gowramookhan destroyed an army of asoorans [q.v.] in a nimisham [q.v.]. A paradisiacal wilderness; sometimes styled Shadauranyam [q.v.] or six wildernesses. It is probable that the original site was the valley of Cashmere.——*Nelambore* (നിലമ്പൂർ - nilampúr, Mal. nilambúr*). From (nilimpa, san. god + úr, mal. village). Sanscrit name (nilimpapura), meaning god + village.—"*a*" Village, Head-quarters of Assistant conservator of Forests, Government forest; Malabar dist., Yernaud tal.; pop. 13,699; lat. 11° 17′; long. 76° 16′; from Calicut E. 30 miles; from Munjery N.N.E. 14 miles; from the sea E. 31 miles. Extensive teak [q.v.] plantations belonging to Government, begun about 1853. Numerous dolmens [coday cull] and menhirs [paundoocull] and rock-cut caves. Gold-washing.—"*b*" Valley; Malabar dist., Yernaud tal. Shape of a horse shoe, elevation about 400 feet. A great part is an alluvial deposit of enormous depth. The river which drains valley empties into sea at Beypore, and 4 miles from mouth of the river a navigable canal communicates with another river, which traverses heart of Calicut bazaar. The river is connected with Calicut roadstead by a bar always open. A good cart road is carried from Calicut through Nelambore up the Carcoor ghaut [q.v.] to S.E. Wynaud, whence main line is carried on to Mysore, with branches on north to Devaulah goldfields and South wynaud and on south to Ouchterlony valley and to Ootacamund. Besides the teak [q.v.] plantations, Government now possess a wide tract of forest purchased in 1818 at a court sale, and formerly belonging to the family of the Amarambalatt trimalpaud.——*Nepaul* (नेपाल - népála, San.). From (niyamapála, san. protector of vows, a sage the reputed founder of the first of ruling race). An independent native state at the foot of the Himalayas. Compare:—Aconitum ferox, nepaul aconite plant; Berberis aristata, nepaul barberry plant; Capsicum frutescens, nepaul chilly; Cinnamomum glanduliferum, nepaul camphor wood, nepaul sassafras; Osyris nepalensis, nepaul tea; Rumex nepalensis, nepaul sorrel. The name Nepaulam is given by natives to the plants:—Baliospermum montanum; Croton tiglium; Jatropha curcas. See gloss. paragraphs. ——*Nibandhanay* (निबन्धन - nibandhana, San.). From (above + bandh, san. to tie). An agreement [oodambadikay].——*Nicoombham* (निकुम्भ - nikumbha, San.). From (ni, san. prefix of certainty + kumbha, san. pot); from oil-bearing seeds. Botanically the Jatropha genus, euphorbiaceæ [vricsham, 118]. Woody plants, with alternate stipulate leaves and flowers in cymes. The species best known to the natives are:—curcas [wild aumanac] glandulifera [rat aumanac], multifida [small wild aumanac].——*Nidhy* (निधि - nidhi, San.). From (above + dhá, san. to put). A fund. One of the nine divine treasures [nava nidhy] of Coobairan [q.v.] who is styled lord of nidhies. Nidhy shastram is a system of metallurgy embracing rules for discovering buried treasure. ——*Nigamam* (निगम - nigama, San.). From (above + gam, san. to go). Entrance; quotation. Collective name for the four Vedas [q.v.], while Augamam [q.v.] is Sheiva religion and ritual. ——*Nigantoo* (निघण्टु - nighantu, San.). San. from (above + han, san. to destroy); as explaining doubts. Vocabulary or dictionary from a language with itself; same as Abhidhaunam, Acarauthy. There is no Dravidian word. There is no separate word for dictionaries in the European sense, from one language into another. The Sanscrit vocabularies are numerous; best known is Amara cosham [q.v.]. The three old Tamul vocabularies are Divaucauram, Pingalam, and Choodaumany in that order. From these Beschi [veera maumoony] made the Chatooracaurathy [q.v.]. In the other languages there is nothing ancient; but in Teloogoo the modern Andhra deepacam and Shabdaurta calpataroo may be mentioned.——*Nimisham* (निमिष - nimisha, San.). From (above + mish, san. to look). Winking. Measure of solar time. 15 nimishams or eye-winks = 1 caushtay [caulam, 2]. Approximate actual value, 1 nimisham = ·213 of an English second. Also $\frac{1}{3600}$th of an alipalam according to solar calendar [caulam, 6]. Generally roughly used for an English minute. See vol. I, 609.——*Nishaudam* (निषाद - nisháda, San.). From (nishad, san. to sink down). Last note of gamut [swaram].——*Nishaudan* (निषाद - nisháda, San.). From (above + sad, san. to go). Name applied in the Ramayanam [q.v.] to the wild forest tribes, by Menoo [q.v.] to the son of a Bramin by a Shoodra woman [mlecha].——*Nishaun* (نشان - nishán, Hind.). From (nishándan, pers. to fix in the ground); by way of signal. Standard [dhwajam, jenda].——*Nishauny* (نشانی - nisháni, Hind.). From (nishándan, pers. to place). Signature [keiyoppam], a mark.——*Nisheen* (نشین - nishín, Hind.). From (nishastan, pers. to sit). Seated.——*Nishkam* (निष्क - nishka, San.). Ancient gold coin. 16 dharanams = 1 nishkam [naunyam, 2f]. Approximate actual value, 1 nishkam = 56 rupees or 4 gold mohurs [q.v.].——*Nisinda* (نسنده - nisinda, Hind.). From (ni, san. prefix meaning out + syand, san. to shed); from juice. Same as Notchy.——*Nityam* (नित्य - nitya, San.). Ever; perennial. ——*Nityan* (नित्य - nitya, San.). The eternal. Shiva [q.v.].——*Nitya poojah* (नित्यपूजा - nityapújá, San.). From (nitya, san. daily + pújá, san. worship). Daily worship [poojah].——*Nityaunandam* (நித்தியானந்தம் - nittiyánandam, Tam.). From (nitya, san. eternal + ánanda, san. happiness). Hindoo 2nd or pers. name [peyar, sadaunandan].——*Nivritty* (निवृत्ति - nivritti, San.). From (above + vrit, san. to turn), turning back, returning. Release from transmigrations [samsauram].——*Nivvary* (नीवार - nívára, San.; నివ్వరి - nivvari, Tel.). San. from (nivri, san. to ward off). Title otherwise Mountain paddy, Mountain rice, Upland rice, Wild rice. Botanically Oryza mutica, roxb., gramінaceæ [vricsham, 156]. See Paddy.——*Niyamam* (नियम - niyama, San.). Literally restraint. Religious observances; the second stage of yogam [q.v.].——*Niyogy* (नियोगी - niyógí, San.). From (niyóga, san. appointment); holder of government appointment under native rule. A class of secular andhra Bramins [q.v.], as opposed to the Veidica or priestly class.——*Nyausam* (न्यास - nyása, San.). From (nyas, san. to lay down). The lowering of voice. Tonic at conclusion [swaram].——*Nyauyam* (न्याय - nyáya, San.). See sep. title.

NICKA (نکاح - nikáh, *Hind.*). From (nukh, ar. to marry). The religious ceremony of marriage, among Mahomedans. The wedding festivities are shaudy [q.v.]. In Arabia, Egypt, and Persia the nicka is the principal part of the marriage ceremony. In India, a marriage confined to the nicka is deemed wanting in respectability. The term is also here applied to a second or less honorable marriage, the shaudy [q.v.] wife being alive. Nickanauma is a marriage certificate.

NICOBAR (نیکوبار - nikobár, *Hind.*; நக்கவாரம் - nakkaváram, *Tam.*). Otherwise Sambalang, or Nine islands. A group of islands in the Bay of Bengal to the south of the Andamans. Nicobar traffic is ready money transaction where one party does not trust another; Nicobar talk is a mistrustful speech; Nicobary is a dwarf cocoanut tree.——*Nicobar bread fruit* (کیورا - keurá, Hind.). Same as Screw-pine.

NIEPA (نیپا کی چھال - nípákíchhál, *Hind.*). Samadarah.

NIFT (نفت - nift, *Hind.*). Naphtha [q.v.].——*Naphtha* (نفت - nift, Ar.). Title from arabic from (nafata, ar. to boil); earth ebullition. Petroleum [niftroomy, munnteilam] rectified by distillation, and this in turn refined gives kerosene. Also in Europe the product of destructive distillation of coal [nilakary]. Naphtha does not congeal at zero; it ignites readily and burns with voluminous sooty flame; not soluble in water but is so in alcohol, ether and oils [nift]. In veterinary practice used externally with other oils [yennay] for mange.——*Niftroomy*

(نفترام - niftrámí, Hind.). Hind. from (nift, ar. naphta + rám, hind. turkish empire). Petroleum [munnteilam]. Liquid form of bitumen [shilajit].

NIL (நில் - nil, *Tam.*). To stand.——*Naula* (నేల - nála, Tel.). Common form of (néla, tel. ground). Suffix in place names; as Goontanaula, meaning low land.——*Nilacottah* (நிலக்கோட்டை - nilakkóttai, Tam.). From (nilam, tam. ground + kóttai, tam. fort); the situation being low.—"*a*" Deputy tahsildarry, Madura district. Pay Rs. 70.—"*b*" Village, Head-quarters of Deputy tahsildar and Sub-registrar; Madura dist., Dindigul tal.; pop. 4,893; acres 2,423; lat. 10° 10′; long. 77° 54′; from Dindigul S.S.W. 15 miles; from Kodaykarnal E.S.E. 24 miles; from Madras S.W. 258 miles; from Madura N.W. 24 miles; from Rameshwaram W.N.W. 112 miles; from Ramnaud N.W. 84 miles. One of the twenty-four polliems [q.v.] of the former Dindigul district, resumed in 1773.——*Nilam* (ನೆಲ - nela, Can.; నేల - néla, Tel.; നിലം - nilam, Mal. நிலம் - nilam, Tam.). From (nil, tam. to stand).—"*a*" Ground, land. For the five kinds see Desham.—"*b*" Plant first term, meaning of lowly habit, often joining two genera. Ex., where transl. is of second term:—Andrographis paniculata (nélabévalagida), (nélabévu), and (nélavému), melia azadirachta; Arachis hypogæa (nélagadlé), (nélkadale), and (nélashanaga), cicer arietinum; Baliospermum montanum (nélajídi), semecarpus anacardium; Calamus erectus (nélapóka), areca catechu; Cassia species (nélaponna), calophyllum inophyllum; Cleome viscosa (nélaváminta), gynandropsis pentaphylla; Curculigo orchioides (nélatádi), borassus flabelliformis; Enicostema littorale (nélaguli), capparis grandis, (nélagurugudu), casteria tomentosa; Geniospermum prostratum (nilatulasi), ocimum sanctum; Ipomæa digitata (nélakumbala), cucurbita maxima; Jatropha glandulifera (néiaámudapuchettu), ricinus communis; Justicia gendarussa (nélavávili), vitex trifolia; Justicia procumbens (nélabévinagida), melia azadirachta; Kœmpferia rotunda (nelasampige), michelia champaca; Lippia nodiflora (nélapippali), piper longum; Naregamia alata (nelanáranga), citrus; Polianthes tuberosa (nélasampenga), michelia champaca; Premna herbacea (nélanérédu), eugenia jambolana; Sida cordifolia (nilattutti), abutilon indicum; Sida humilis (nélabenda), hibiscus esculentus, (nélatutti), abutilon indicum; Swertia chirata (nélvému), melia azadirachta; Vernonia anthelmintica (nélavávili), vitex trifolia. See gloss. paragraphs.——*Nila maunyam* (நிலமானியம் - nilamániyam, Tam.). From (nilam, tam. land + mánya, san. privilege). Emolument given in land, not cash [inam].——*Nilanashtam* (நிலநட்டம் - nilanattam, Tam.). From (nilam, tam. land + nashta, san. loss). Loss on land by its being left uncultivated or thrown up. In the communal village system the loss had to be made good by contributions from the remaining ryots [q.v.]——*Nilapanay* (நிலப்பனை - nilappanai, Tam.). From palm like leaf. Same as Black moosly.——*Nilaveeram* (நிலவீரம் - nilavíram, Tam.). From (nilam, tam. land + víra, san. strength). Medicinal earth; also soda earth [pooneer].——*Niloovoo* (నిలువు - niluvu, Tel.). From (nilutsu, tel. to stand). The height of a man standing. Fathom. Linear measure. 4 mooras = 1 niloovoo; 2,000 niloovoos = 1 pargoo [alavay, 1b.]. Approximate actual value, 1 niloovoo = 6 feet. Same as San. vyaumam, dandam, Hind. baum, Can. bauroo, Tam. maur, bauham. See vol. I, 609; II, 505. Compare Poorsham.——*Nirttal* (നിറുത്തൽ - niruttal, Mal.). Cessation. Land abandoned on account of becoming unfit for cultivation.

NIMAT (نعمت - nimat, *Ar.*). From (nama, ar. to bestow in abundance) [neim]. Grace. Prefixed to an alam forms a lacab; as Nimat ally, grace of ally [ism].

NIOTA (കരിന്നൊട്ട - karinnotta, *Mal.*). Samadarah.

NIR (निर् - nir, *San.*). Prefixed to verbs and verbal derivatives expresses out, forth, out of, away from; before substantives, away from; also forms negative adjectives with other nouns. ——*Negundo* (निर्गुण्डी - nirgundí, San.; निगंडु - nigundu, Conc.). From (nir, san. out + gam, san. to go); from shedding juice. Specific title. Same as Notchy. White negundo is the same as Coral jasmine.——*Neirritan* (नैरृत - nairrita, San.; நிருதி - niruthi, Tam.). From (nirriti, san. the deity). The regent of the south-west quarter [ashtadic paulacan].——*Niracsham* (निरक्ष - niraksha, San.). From (nir, san. negative prefix + aksha, san. latitude). The terrestrial equator [naudy mundalam]. Niracsha desham are the equatorial parts of the earth [bhoomy]. Niracsha pooram are the four cities supposed to lie under the equator, 90° apart [lunka].——*Nirayanam* (निरयण - nirayana, San.). From (nir, san. negative prefix + ayana, san. motion); in astronomy [jyotisham], without precession [ayanam, craunty pautagaty].——*Nirgrantan* (निर्ग्रन्थ - nirgrant'ha, San.). From (above + grant'ha, san. tie); free from ties. Mendicant [jeina]. ——*Nirmalan* (निर्मल - nirmala, San.). From (above + mala, san. dirt), free from dirt; pure. Shiva [q.v.].——*Nirooctam* (निरुक्त - nirukta, San.). From (above + vach, san. to speak). The fourth Vedaungam [q.v.]. Its object is etymological explanation of difficult Vedic words.——*Nirrity* (निर्ऋति - nirriti, San.; நிருதி - niruthi, Tam.). From (nirri, san. to die). Means destruction. God of death. Regent of the asterism [nacshatram] Moolam [q.v.]. Regent of the south-west [ashtadic paulacan]. See vol. I (78).——*Nirvamshyam* (निर्वंश्य - nirvamshya, San.). From (nir, san. negative prefix + vamsha, san. spine). Invertebrate. Animals [jantoo] that have no back-bone or vertebral column, and which have a body consisting of a single cavity enclosing all their vital organs. This sub-kingdom [oopaganam] includes the lower forms of animal life. Such as in ascending scale. Sponges [mooabaudal], Corals [moongah], Starfishes [taurah matsyam], Worms [keerah, poochy], Centipedes [kankhajoor], Spiders [makree], Crustaceans [kavachiny], Insects [poochy], Molluscs [chippy]. For vertebrate see Vamshyam. ——*Nirvaunam* (निर्वाण - nirvána, San.). From (nirvá, san. to be liberated). Term used by Booddhists [booddha] for final emancipation from matter and reunion with the deity [samsauram].

NIRAY (நிறை - nirai, *Tam.*). From (niru, tam. to weigh). Weight. That is to say the natural property of matter, proportioned to its bulk and the density of its parts, determined by being balanced in a scale against some known or acknowledged weights placed in the opposite scale. A standard for length [alavay] being determined, a standard for weight is thence deduced; as a vessel of any certain dimensions filled with distilled water, or other homogeneous liquid, weighs the same in the same latitude.——**(1)** For the native standards of weight see vol. 616, and II, 505. The fifth book of the Malayalam kanak sauram treats of the weights of gems [ratnam], gold [pon], pearls [moty], &c., for ascertaining which it gives the following formula:—1 nel = 1 veesha tookkam, 4 nels = 1 coonny or retty, 2 coonnies or retties = 1 munjaudy, 2 munjaudies = 1 pana tookkam, 10 pana tookkams = 1 calanjy. All of these, except the punnum [q.v.], are the names of well-known vegetable products, the first being the staple cereal [dhaunyam] of the province, like grain in english, the other three are the seeds of common trees or shrubs. At the present day the employment of seeds for the purposes of weighing is confined to village goldsmiths [tattaun] and petty jewellers. The larger merchants dealing in precious stones [ratnam] employ standard artificial weights, neatly made of brass [pittalay], like the European apothecary and troy weights, following the testaceous assumed standards. They are called emerald weights, but are used for all kinds of gems except the diamond [vajram]. The native heavy weights are shown at vol. I, 617.——**(2)** The following is an attempt to reduce to an average table and a standard value the bazaar weights of the Presidency, taking them under five divisions according to nationality of the populations using, and adding Sanscrit:—"*a*" Average table of bazaar weights in Tamul districts:—9 panatookkams or fanam weights = 1 varauhaniday or pagoda weight, 10 varauhanidays = 1 pollum, 40 pollums = 1 viss, 8 viss = 1 maund, 20 maunds = 1 candy. Extras:—1¼ viss = 1 took, 2 tooks = 1 yeday; 100 pollums = 1 toolaum, 12 toolaums = 1 pothy or bullock-load. Approximate actual value:—1 pollum = 540 grs. 1 maund = 25 lbs. avoir.—"*b*" Average table of bazaar weights in Teloogoo districts:—10 varahahyettoos or pagodas weight = 1 pollum, 40 pollums = 1 viss, 8 viss = 1 maund, 20 maunds = 1 bauroo. Extras:—10 pollums = 1 yebalam; 2 viss = 1 dhaday = 1 yettoo; 8 maunds = 1 nagoo; 15 maunds = 1 cuntlam or bullock-load. Approximate actual value:—1 pollum = 540 grs.—"*c*" Average table of Canarese bazaar weights:—24 rupees = 1 cutcha seer, 1⅔ cutcha seers = 1 rattel, 6 rattels = 1 dhaday, 4 dhadays = 1 maund, 20 maunds = 1 bauroo. Approximate actual value:—1 rattel = 1 lb.—"*d*" Average table of bazaar weights of Malabar:—10 rupee weights = 1 pollum, 100 pollums = 1 toolaum, 20 toolaums = 1 bhauram or cart-load. Extras:—4 pollums = 1 rattel. Approximate actual value:—1 rattel = 1 lb.—"*e*" Average table of Mahomedan bazaar weights:—3 tolahs = 1 pollum, 8 pollums = 1 cutcha seer, 5 cutcha seers = 1 punch seer, 2 punch seers = 1 dhurrah, 4 dhurrahs = 1 maund, 20 maunds = 1 candy. Extras:—5 tolahs = 1 chittack; 3½ cutcha seers = 1 pucka seer, 40 pucka seers = 1 Indian maund. Approximate actual value:—1 Indian maund = 82 2/7 lbs. avoir.—"*f*" Average table of Sanscrit commercial weights:—16 manshams or black gram seeds = 1 carsham, 4 carshams = 1 palam, 100 palams = 1 toolaum, 20 toolaums = 1 bhauram or cart load, 10 bhaurams = 1 auchitam. Approximate actual value:—1 palam = 1,440 grs.——**(3)** The following is an attempt to reduce to an average table and a standard value the goldsmith's weights of the Presidency, taking them under five divisions according to nationality of the populations using, and adding Sanscrit:—"*a*" Average table of goldsmith's weights in Tamul districts:—2 coondrimanies or abrus seeds = 1 munjaudy or adenanthera seed, 2 munjaudies = 1 pana tookkam or fanam weight, 9 pana tookkams = 1 varauhaniday or pagoda weight. Extras:—12 munjaudies = 1 tunkam; 12 pana tookkams = 1 calanjy; 20 munjaudies = 1 calanjy; 44 munjaudies = 1 rupee weight. Approximate actual value:—1 pagoda weight = 54 grains Troy.—"*b*" Average table of goldsmith's weights in Teloogoo districts:—4 gooriginjas or abrus seeds = 1 chinnam, 9 chinnams = 1 varahahyettoo or pagoda weight, 4 varahahyettoos = 1 dub, 16 dubs = 1 tunkam. Extras:—1 gooriginja = 1 baida, 2 baidas = 1 doogoola, 2 doogoolas = 1 chowlam, 4 chowlas = 1 mauda, 2 maudas = 1 varahahyettoo. Approximate actual value:—1 pagoda weight = 54 grains troy.—"*c*" Average table of Canarese goldsmith's weights:—4 veesam or rice grains = 1 gooriginja or hauga or abrus seed, 2 haugas =

1 manjoty or adda, or adenanthera seed, 2 manjoties = 1 hana or fanam weight, 9 hanas = 1 varauhaniday or pagoda weight. Approximate actual value:—1 pagoda weight = 54 grains troy.—"*d*" Average table of goldsmith's weights of Malabar:—2 coonny cooroo or abrus seeds = 1 munjaudy or adenanthera seed, 2 munjaudies = pana tookkam or fanam weight, 30½ pana tookkams = 1 rupee weight. Approximate actual value:—1 rupee weight = 180 grains troy.—"*e*" Average table of Mahomedan goldsmith's weights:—6 zarrahs or mustard seeds = 1 jow or barley corn, 2 jows = 1 dhaun or rice in husk, 4 dhauns = 1 retty or goomchy or abrus seed, 8 goomchies = 1 mausha seed or black gram, 4 maushas = 1 miscal, 3 miscals = 1 tolah. Approximate actual value:—1 tolah = 180 grains troy.—"*f*" Average table of Sanscrit goldsmith's weights:—6 sarshapams or mustard seeds = 1 yavam or barley corn, 3 yavams = 1 goonjam seed or abrus seed, 6 goonjams = 1 aunah, 2 aunahs = 1 mausham or black gram seed, 8 maushams = 1 tolah, 8 tolahs = 1 palam, 8 palams = 1 sharauvam. Extras:—24 racticams or retties or abrus seeds = 1 tunkam, 16 maushams = 1 carsham, 4 carshams = 1 palam.——**(4)** The following is an attempt to reduce to an average table and a standard value the old testaceous weights of the Presidency:—3 likhyams or poppy seeds = 1 rajasarshapam or black mustard, 3 rajasarshapams = 1 gowrasarshapam or white mustard, 6 gowrasarshapams = 1 yavam or barley corn, 3 yavams = 1 retty or krishnalah or coondrimany or abrus seed, 2 retties = 1 maushacam or munjaudy, 20 munjaudies = 1 calanjy or bonduc seed. Extras:—5 retties = 1 mausham of gold; 4 veesam or rice grain = 1 coondrimany; 6 zarrahs or mustard = 1 jow or barley, 2 jows = 1 dhaun or rice in husk, 4 dhauns = 1 goomchy or abrus seed, 8 goomchies = 1 maush or phaseolus grain. Approximate actual value:—1 coondrimany = 1·5 grains, 1 goomchy = 1·875 grains, 1 retty = 1·75 grains.——**(5)** The beads of this glossary can be consulted for the different terms for weights.

NISAUR (نثار - nisár, *Ar.*). From (nasara, ar. to scatter). Offering. Prefixed to an alam forms a lacab; as Nisaur ally, offering of ally. Mostly Shiah name [ism]. Cf. Nuzzer.

NISBAT (نسبت - nisbat, *Hind.*). From (nasaba, ar. to refer). Relationship [ism].

NISHASTAH (श्यानद्रव्य - shyánadravya, *San.*; نشسته - nishastah, *Hind.*; ಜಿಗಟು - jigatu, *Can.*; అటకలి - atakali, *Tel.*; പശ - pasha, *Mal.*; பசை - pasai, *Tam.*). San. from (shyána, san. adhesive + dravya, san. substance). Starch. Amylum of chemists. Starch may be divided into starch used for food and starch used for industrial purposes. The best kind for the latter purpose is white, soft, friable, and easily reduced to powder; insoluble in cold water, alcohol, and in ether, but readily affording a gelatinous solution in warm water [gum, vajram]. The following are two key-lists in the briefest possible terms of the principal starch products of s. india; further information must be traced in the glossary paragraphs through the small type cross-references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of the plants in the dravidian languages.—"*a*" Arenga saccharifera, sago palm, heart of stem; Caryota urens, bastard sago palm, pith of trunk; Corypha umbraculifera, talipot, pith of trunk; Curcuma angustifolia, malabar arrowroot, root; Curcuma leucorrhiza, red malabar arrowroot, root; Cycas circinalis, indian sago palm, nut; Cyperus rotundus, common sedge, tuber; Eulophia, sp., salep, tuber; Gracilaria lichenoides, ceylon moss; Ipomæa batatas, sweet potato, tuber; Manihot utilissima, tapioca, tuber; Musa paradisiaca, plantain, fruit; Nymphæa lotus, red indian water-lily, underground stem and root; Phœnix farinifera, small date, pith of stem; Phœnix sylvestris, wild date, pith of stem; Saccharum munja, moonj, pith of culm; Tacca pinnatifida, otaheite salep, root; Trapa bispinosa, water caltrops, kernel; Triticum vulgare, wheat, grain.—"*b*" Arrowroot, curcuma; Caltrops, trapa; Ceylon moss, gracilaria; Date, phœnix; Moonj, saccharum; Plantain, musa; Potato, ipomæa; Sago palm, arenga, caryota, cycas; Salep, eulophia, tacca; Sedge, cyperus; Talipot, corypha; Tapioca, manihot; Water-lily, nymphæa; Wheat, triticum.

NISSA (نسا - nisá, *Hind.*). From arabic. A female suffix usually found with the names of Syeds [q.v.], but it has now become the termination of the generality of female names of respectable classes.

NITTA (نٹا - nitta, *Hind.*; ಶಿವಲಿಂಗಮರ - sivalingamara, *Can.*; సాంబ్రాణిమాను - sámbránimánu, *Tel.*; சாம்பிராணி மரம் - shámbiránimaram, *Tam.*). Title from african. Can. from (shiva, san. god + linga, san. phallic emblem + mara, can. tree). Tel. from (sámbráni, tel. frankincense + mánu, tel. tree). Tam. from (shámbiráni, tam. frankincense + maram, tam. tree). Title otherwise Meense tree. Botanically Parkia biglandulosa, w. et a., leguminosæ [vricsham, 48]. Alias Mimosa pedunculata. Rachis of leaf downy, 1 foot or more long; pinnæ 40–60, 3–4 inches long; leaflets one-nerved, rigid, ¼ inch by $\frac{1}{24}$ inch; peduncle under a foot long; calyx ⅓ inch; tube glabrous; teeth pilose; immature pod downy, narrowed gradually into a long stalk. Large tree; white bark, feathery foliage; flowers in balls, pendulous from a long stalk; flower buds resemble balls of red velvet; came from africa. The legumes are filled with a farinaceous pulp; this is made into sweetmeats; good avenue [shaulay] tree, requires care and regular watering; wood hard, surrounded by an astringent bark. Another species is roxburghii.

NIVAYAT (نايطى - náití, *Pers.*). From (náit, ar. name of clan in arabia). A sect of Mahomedans. Most of them are Sheikhs [q.v.]. Early emigrants from Arabia which they left on being persecuted by a local governor. Settled in Concan [q.v.], and thence spread. Divided into several clans. Very enterprizing.

NIYAUZ (نياز - niyáz, *Pers.*). Humility. Offering. Cf. Nuzzer. Prefixed to an alam forms a lacab; as Niyauz hoossain, the offering of hoossain. Mostly taken by Shiahs [ism].

NIZAM (نظام - nizám, *Ar.*). From (nazama, ar. to arrange) [nauzim]. Regulator. Part of lacab; as Nizam ood deen, regulator of religion [ism].——*Nizam ally asaf jah i sauny* (نظام علی آصف جاه ثانی - nizámaliásafjáhisání, Hind.). Alam + khitaub. One of the best known Nizams of Hyderabad, 1761 to 1800; the first to become English feudatory and to maintain what is known as the Hyderabad subsidiary force, for which he ceded the territories acquired after the Mysore conquests in 1792 and 1799. See vol. I (180), 9; II, 253.——*Nizam ool moolk* (نظام الملك - nizámulmulk, Hind.). From (above + mulk, ar. kingdom). Title conferred by Emperor Farrookh siyar, on the first ruler of Hyderabad; afterwards assumed by his successors when the kingdom became independent of the Moghul dynasty. See vol. I (145), (150), 9; II, 252.——*Nizampatam* (నిజాముపట్టణము - nijámupattanamu, Tel.). From (nizám, ar. nizám + pattana, san. town). Tel. also (peddapalli), meaning great + village; changed by english to Pettipoly. Native name Arjamputnam. Town, Port, Salt factory, Sea custom assistant superintendent's head-quarters, Kistna dist., Repully tal.; pop. 4,598; acres 11,576; lat. 15° 54′; long. 80° 42′; from Eepoorpollem E. 17 miles; from Madras N. 193 miles; from Masulipatam W.S.W. 36 miles; from Repully S.W. 14 miles. In bay to west of Kistna delta. Considerable coasting trade in small country craft. Mentioned by Ferishta. In the time of Rama royel, when the Mahomedan confederation against him had ended in his defeat and death, Ibrahim padshah gave to Pooligaddapaupa narsimhan and to his three sons, Mullappan, Nundy, and Veeran the districts of Oodayagherry, Nizampatam and Sarwapully. The subordinates of the descendants of Mullappan and Veeran rebelled and the three districts were subsequently united under the descendants of Nundy rajah. English commenced to trade here for the first time on the Eastern coast, 1611. In 1679 the name was changed to Nizampatam. Factory established 1621; dissolved, 1653; resettled, 1697; ceded to the French by the Nizam as part of the Northern circars [q.v.], 1753; part of the Nizampatam circar bestowed on the English by Nizam salaubut jung, 1759; grant confirmed by the Moghul's firmaun [q.v.], 1765; plundered by Hyder's cavalry during the second Mysore war 1780 to 1784. Now the site of an extensive salt manufactory. The Assistant superintendent of Sea customs takes charge of the extensive swamps covered with mangrove [q.v.] which provide Masulipatam with firewood. Nizampatam beacon trig. station in lat. 15° 52′ 49·85″; long. 80° 42′ 22·61″; from Nizampatam S. 2 miles; from Repully S. 16 miles; on the sea-shore.——*Nizam shahy* (نظام شاهی - nizámsháhí, Hind.). The name of the branch of the Bahmany [q.v.] dynasty [raj] which, on the dismemberment of the latter in 1489 A.D., established itself at Ahmednugger in the Deccan [q.v.]. The founder was Malik ahmed nizam ool moolk bahry, meaning in charge of falcons, from whom it is sometimes called the Bheiry dynasty. The dynasty lasted till 1637, when its territories were divided between the Moghuls and Beejapore. See vol. I (149); II, 252.——*Nizaumat* (نظامت - nizámat, Hind.). Administration of police and criminal law [adawlut].——*Nizaumat adawlut* (نظامت عدالت - nizámatadálat, Hind.). The court of criminal justice. Under the Mahomedan government, the highest criminal court was so called, while the district criminal court was called the Fowjdarry adawlut [q.v.].

NIZHAL (നിഴൽ - nizhal, *Mal.*). Shadow, shade [chauyay].——*Nizhalcoot* (നിഴൽക്കൂട്ടം - nizhalkkúttam, Mal.). From (above + kúttam, mal. assembly). Meeting of corporate bodies in temples [coil, pagoda], and graumams [q.v.] under a tree [coot].

NO (நோ - nó, *Tam.*). To afflict.——*Nomboo* (நோன்பு - nónbu, Tam.). From (nól, tam. to do penance). Penance [tapas], fasting [vratam].——*Notchy* (நொச்சி - noççi, Tam.). See sep. title.

NODY (நொடி - nodi, *Tam.*). A snap; time of a snap of the finger. The following is the scale:—60 nodies or finger-snaps = 1 vinaudy or indian minute [caulam, 1]. Approximate actual value, 1 nody or indian second = ·4 english seconds. Same as san. param [caulam, 4, 5], caushta calay [caulam, 6], vipalam [caulam, 6].

NOKE (നോക്കു - nókku, *Mal.*). To see.——*Nokichartt* (നോക്കിച്ചാർത്ത - nókkiççártta, Mal.). From (nókku, mal. to see + chárttu, mal. assessment). Statement of survey from inspection of the quantity of seed required for sowing a field [viraippaud].——*Notagar* (నోటగాడు - nótagádu, Tel.; நோட்டக்காரன் -

nóttakkáran, Tam.). Tel. from (nóta, tel. inspection + kádu, tel. person). Tam. from (nóttam, tam. inspection + káran, tam. doer). The village shroff [q.v.] who examines the coins [naundoer] ... [naunyam] handed to him by the tandalcauran [q.v.], and accounts for the same to the nauttaunmeicauran [nautamcar]. He acts under the orders of the latter, and accompanies remittances [irsaul] to the talook [q.v.] cutcherry [q.v.]. In Malabar, a money-changer [balootah].——*Nottam* (ನೋಟ - nóta, Can.; നോട്ടം - nóttam, Mal.; நோட்டம் - nóttam, Tam.). From (nókku, tam. to see). Inspection, especially of coin [inam, naunyam]. ——*Nottan* (நோட்டன் - nóttan, Tam.). Same as Notagar.

NOLLA (నొల్ల - nolla, *Tel.*). From (nollu, tel. to level land). Otherwise Nollamaun. Leveller. Plank of wood slightly hollowed, with handle like a plough [calappay] attached, drawn over the ground by bullocks [maud, paramboo].

NONDY (நொண்டி - nondi, *Tam.*). Means a lame person. A comic poem in which a rogue is represented as losing his foot in attempting to steal a horse [ghorah].

NOOGA (නුග - nuga, *Singh.*). Botanically Ficus [atty] laccifera, roxb., moraceæ [vricsham, 121]. Arboreous; leaves long-petioled, from cordate to oval, obtuse, pointed, shining, three-nerved; fruit-receptacles axillary, sessile, oval, smooth, size of a gooseberry, appearing in the hot season and ripening in the rains; malabar, &c.

NOOH (نوح - núh, *Ar.*). Noah. Used to form sait [q.v.] names; as Nooh sait [ism].

NOOJOOM (نجوم - nujúm, *Hind.*). Plural of (najm), meaning star. Also (ilminujúm) or science of stars. Astrology [heiyat, ilm, jyotisham]. Noojoomy is an astrologer [joshy]. The following are some of the commonest terms.——*Arz* (عرض - arz, Hind.). From (araza, ar. to become broad). Latitude [acsham, vicshaipam].——*Aseer* (اثير - asír, Hind.). From (asara, ar. to affect); from its affecting all other spheres. Also (arsh). The ninth or highest sphere.——*Astrolabe* (اصطرلاب - usturláb, Hind.). Instrument for measuring the altitude [avanataumsham, irtifah] of the sun [sooryan] and stars [nacshatram]. ——*Azimuth* (السمت - assamt, Hind.). From (al, ar. the + samt, ar. the region towards which aim is directed). See Agracoty [zenith].——*Badr* (بدر - badr, Hind.). From (badara, ar. to become full). Moon [chundran] in her fourteenth night [hilaul]. ——*Bood i shams* (بعد شمس - budishams, Hind.). From (bud, ar. distance + shams, ar. sun). Apogee.——*Boorj* (برج - burj, Hind.). From (baraja, ar. to build a tower). Constellation [nacshatram]; sign [raushy] of the zodiac [raushy chuckram]. ——*Coorb i doonyah* (قرب دنيا - kurbidunyá, Hind.). From (kurb, ar. near + dunyá, ar. earth). Perigee.——*Coorb i shams* (قرب شمس - kurbishams, Hind.). From (kurb, ar. near + shams, ar. sun). Perihelion [chalotcham, sheeghrotcham].—— *Coorra* (كرة - kurrah, Hind.). Globe [golam].——*Coorra i arz* (كرة ارض - kurrahiarz, Hind.). From (above + arz, ar. earth). Terrestrial globe [bhoogolam].——*Coorra i falak* (كرة فلك - kurrahifalak, Hind.). From (above + falak, ar. firmament). Celestial globe [bhagolam, khagolam].——*Coors* (قرص - kurs, Hind.). Means round. Sun's disc.——*Cowkab i mootahayira* (كوكب متحيرة - kaukabimutahayirah, Ar.). Erratic star which at one time appears to retrograde and at another time to pursue a direct and forward course. Such are the planets [graham, najm]:—Mars [coojan, mirreek, mungalan], Jupiter [brihaspaty, mooshtary], Mercury [boodhan, ootaurid], Venus [shoocran, zohra], Saturn [shany, zoohal].——*Dayirah* (دائرة - dáirah, Hind.). Means circle. Orbit [cacsham].——*Doomdaur sitaura* (دم دار ستارة - dumdársitárah, Hind.). From (dum, pers. tail + dár, pers. having + sitárah, pers. star). Also (jhárútárah), meaning broom + star. Comet [dhoomkait, kait, oolcay].—— *Dowr* (دور - daur, Hind.). Cycle. Dowr i cumr is lunar cycle, at the commencement of which Adam was created.——*Falak* (فلك - falaka, Hind.). From (falaka, ar. to become round). Celestial sphere; seven in number each containing a planet.—— *Halo* (هالة - hálah, Hind.). Luminous circle [paridhy].——*Hazeez* (حضيض - hazíz, Hind.). From arabic, low. The lower apsis [ootcham] of a planet [owj].——*Hilaul* (هلال - hilál, Hind.). From (halla, ar. to agree). *i.e.*, from month to month. New moon [amavausyay, arcaindoo, sangamam, badr].——*Ijtimah i cumr* (اجتماع قمر - ijtimáikamar, Hind.). Moon [chundran] in conjunction [moocaubilah i cumr].——*Ikhtilauf manzar* (اختلاف منظر - ikhtiláfmanzar, Hind.). From (ikhtiláf, ar. difference + manzar, ar. position of an object). Parallax [acshavalanam, sheeghram].——*Inhirauf* (انحراف - inhiráf, Hind.). From (harufa, ar. to incline). Declination [craunty].——*Inkilaub* (انقلاب - inkiláb, Hind.). From (kalaba, ar. to change). Precession [ayanaumsham, craunty pautagaty, maunam].—— *Inkilaub i noocta i itidaul* (انقلاب نقطة اعتدال - inkilábinuktahiitidál, Hind.). Precession of equinoxes [maishauyanam]. ——*Irtifah* (ارتفاع - irtifá, Hind.). From (rafa, ar. to rise). Altitude [avanataumsham].——*Ittisaul* (اتصال - ittisál, Hind.). From (vasala, ar. to unite). Contact [lagnam].——*Khatt i istiwah* (خط استوا - khattiistiwá, Hind.). From (khatt, ar. line + istiwá, ar. equal). Equator [niracsham].——*Khatt i itidaul* (خط اعتدال - khattiitidál, Hind.). From (khatt, ar. line + itidál, ar. even); from days and nights being equal. Equinoctial line [naudy mundalam].——*Kiraun* (قران - kirán, Hind.). From (karana, ar. to live together). Conjunction [crauntam, sangamam, yogam, yoog].——*Kiraun ool nahsein* (قران النحسين - kiránulnahsain, Hind.). From (kirán, hind. conjunction + nahas, ar. inauspicious). Conjunction of two malignant planets, Jupiter [mooshtary] and Venus [zohra].——*Kiraun ool sadein* (قران السعدين - kiránulsadain, Hind.). From (kirán, hind. conjunction + saad, ar. auspicious). Conjunction of two beneficent planets [graham, najm], Saturn [shany, zoohal] and Mars [coojan, mirreek, mungalan].——*Mintakat ool boorooj* (منطقة البروج - mintakatulburúj, Hind.). From (mintakah, ar. belt + burúj, ar. signs of zodiac). Zodiac [raushy chuckram].——*Mooaddil ool nahaur* (معدل النهار - muaddilunnahár, Hind.). From (muaddil, ar. equalizer + nahár, ar. days). Celestial equator [naudy mundalam]. ——*Moocaubilah i cumr* (مقابلة قمر - mukábilahikamar, Hind.). Moon [chundran] in opposition [ijtimahicumr].——*Nadir* (نظير - nazír, Hind.). From (nazara, ar. to see), looking towards or opposite of zenith. Ar. also (simtulkadam), meaning towards the feet. Hind. also (patál). Point of the heavens [bhagolam] directly beneath observer's feet. Opposed to zenith [q.v.]. See sep. title.——*Nisf oon nahaur* (نصف النهار - nisfunnahár, Hind.). From (nisf, ar. half + nahár, ar. days). Meridian [raikhay].——*Noocta i itidaul i khareefy* (نقطة اعتدال خريفي - nuktahiitidálikharífí, Hind.). From (nuktah, ar. point + itidál, ar. even + kharíf, ar. autumn). Autumnal equinox [toolauyanam].——*Noocta i itidaul i rabee* (نقطة اعتدال ربيعي - nuktahiitidálrabíyí, Hind.). Vernal equinox [maishauyanam, rishy]. ——*Oofook* (افق - ufak, Hind.). Horizon [cshitijam].——*Oorooj* (عروج - urúj, Hind.). From (araja, ar. to ascend). Culmination [oordhwa sancramanam].——*Owj* (اوج - auj, Hind.). Higher apsis [ootcham] of a planet [graham, hazeez].——*Raus* (راس - rás, Hind.). Ascending node [craunty pautam, rahoo, zanab]. ——*Raus ool hamel* (راس الحمل - rásulhaml, Hind.). From (rás, ar. head + haml, ar. aries). First point of Aries [maisham]. ——*Russud* (رصد - rasad, Hind.). From (rasuda, ar. to watch). Observatory.——*Samt ool inkilaub* (سمت الانقلاب - samtulinkiláb, Hind.). From (samt, ar. path + inkiláb, ar. changing). Solstitial colure.——*Samt ool itidaul* (سمت الاعتدال - samtulitidál, Hind.). From (samt, ar. path + itidál, ar. equinox). Equinoctial colure [maishauyana mundalam].——*Sawaubit* (ثوابت - sawábit, Hind.). From (sabata, ar. to fix). Fixed star [nacshatram].——*Seiyaurah* (سيارة - saiyárah, Hind.). From (sair, ar. to wander). Planet [graham].——*Shafak* (شفق - shafak, Hind.). Twilight [sundhyay].——*Shihaub* (شهاب - shiháb, Hind.). From (shahaba, ar. to gleam). Meteor [kait, oolcay].——*Tareek ool shums* (طريق الشمس - taríkulshams, Hind.). From (tarík, ar. way + shams, ar. sun). Also (samtulshams), meaning path of the sun. Ecliptic [craunty mundalam].—— *Tool* (طول - túl, Hind.). From (tála, ar. to elongate). Longitude [deshauntaram, sauyanam].——*Zanab* (ذنب - zanab, Hind.). From (zanaba, ar. to follow closely). Descending node [craunty pautam, kait, raus].——*Zaut ool halk* (ذات الحلق - zátulhalk, Hind.). From (zát, ar. possessed of + halk, ar. circle). Armillary sphere [golayantram].——*Zenith* (سمت الراس - samturrás, Hind.). From (samt, ar. direction + rás, ar. head). The point of the heavens [bhagolam] directly or vertically over head [oordhwam, ootcham]. Opposed to Nadir [q.v.].

NOOL (तन्तु - tantu, *San.*; تاگا - tágá, *Hind.*; நூல் - núl, *Tam.*). Spun thread, especially cotton [q.v.]. As soon as cotton berries ripen and open, the cotton is gathered and dried, and put through the seeding machine [rautnam]. The cotton free of seed is then given to the cotton cleaner [doodeycoolam], who bows it clean of husk and other dirt, the result being that the cotton becomes clean and soft. It is then formed into flocks [cottay], and thread is spun from these flocks by means of either the spindle [cathir] or the spinning wheel [rautnam]. These two are the well known articles. In either case as soon as the front of the spindle is covered by yarn sufficiently twisted, the yarn is wound back on to the body of the spindle by guiding its direction. The flocks of cotton are generally held in the left hand. Cotton is spun into thread generally in the hot season, being damp in the cold season. The spinning is done by the women inside their houses [nesavoo]. Nool also means any literary composition [grantam].——*Nolatauly* (നൊലിത്താളി - núlittáli, Mal.; කරවලකබෙල්ල - karavalakabella, Singh.; நொலைத்தாளி - nolaitháli, Tam.). Title from tamul. Mal. from (núl, mal. thread + táli, mal. creeper, convolvulus); bark used for rope. Tam. from malayalam. Title otherwise Chinese laurel. Botanically Antidesma [amla shaucam] bunias, müller, euphorbiaceæ [vricsham, 118]. Alias Antidesma alexiteriæ; Stilago bunias. Middle-sized tree; leaves alternate, entire, lanceolate-oblong; spikes axillary and terminal; male flowers triandrous, with an abortive column in the centre; flowers green; fruit red. Whole plant a remedy against bites of snakes; leaves are acid and

diaphoretic, and when young are boiled with pot-herbs for syphilitic affections. The fruit is eatable, sub-acid. Bark used for making ropes [naur]. The timber is greatly affected by immersion in water, becoming heavy and black as iron [auhan].

NOONAH (நுணா - nuná, *Tam.*). Same as Dyeing mulberry.

NOONGH (நுங்கு - nungu, *Tam.*). Means to swallow. The pulpy kernel of the young palmyra [q.v.] fruit.

NOOR (نور - núr, *Hind.*). From (nára, ar. to shine). Light. Attribute of god [allah]. Title of prophet. Common alam. Also part of lacab; as Noor ahmed, light of the prophet; Noor bee, alam + female alaumat; Noor ood deen, light of the faith [ism]. The following were Jehaungeer's gold coins:—Nooraunny, means full of light, weight ½ tolah; Noor i jehauny, means light of the world, weight 1 tolah; Noor i mihr, means light of love, weight 5 tolahs; Noor i carm, means light of grace, weight 10 tolahs; Noor i dowlat, means light of the empire, weight 20 tolahs; Noor i sultauny, means sultan's light, weight 50 tolahs; Noor i shahy, means royal light, weight 100 tolahs.

NOOSRAT (نصرت - nusrat, *Ar.*). From (nasara, ar. to succour) [nausir]. Victory. Prefixed to an alam forms a lacab; as Noosrat ally, victory of ally. Noosrat jung, victorious in war [ism].

NOOTLA (నూతల - nútala, *Tel.*). From (núyi, tel. well). Plural locative form. Wells. Suffix in place names.

NOOZVEED (నూజివీడు - nújivídu, *Tel.* núzvíd *). From (núvu, tel. oil-seed plant, sesamum indicum, dec. + vídu, tel. town).——(1) Zemindarry, Kistna district. Area 694 square miles. Population 153,628. Language Teloogoo. N.E. inland part of district. Boundaries; north Nizam's dominions and Ellore talook of Godavery district, east Ellore talook of Godavery district and Goodivauda talook, south Bezwada talook, west Bezwada talook and Vissanapett division. Plain interspersed by hills. Soil regar [q.v.]. Irrigation by anicut [q.v.] canals. See vol. I, 59, foot-note. Places of archæological interest:—Augiripully, Auyatapulley, Ayilore, Condanainavaram, Gollanapulley, Medore, Moostabauda, Mullavilly, Noozveed, Ooyoor, Pedda maddauly, Poorshottapatam, Rauvoolapaud, Shoorsainacote, Sooravaram, Yeedara, Yeedore. Trig. station:—Doodgut. The leading places, &c., in the zemindarry are the following.——*Augiripully* (అగిరిపల్లె - ágiripalle, Tel.). From (ávu, tel. cow + giri, san. hill + palle, tel. village). Village, Hill, Place of pilgrimage; pop. 3,078; lat. 16° 41′; long. 80° 49′; from Gunnavaram N. 10 miles; from Masulipatam N.W. 41 miles; from Noozveed S. 9 miles. Sacred temple on high rock with stone steps. And a number of shrines along the ascent. Temple below hill. Cave temples close to temple on the hill. ——*Boodamair* (బుడమేరు - budaméru, Tel.). See sep. title.——*Capileshwarapooram* (కపిలేశ్వరపురము - kapiléshvarapuramu, Tel.). From (kapila, san. sage so called + íshvara, san. lord + pura, san. town). Zemindarry, Village; pop. 3,042; lat. 16° 20′; long. 80° 54′; from Gunnavaram S.S.E. 15 miles; from Masulipatam W.N.W. 20 miles; from Noozveed S. 31 miles. Head-quarters of a zemindar of the Noozveed family. Peshcush Rs. 15,838.——*Doodgut* (దుద్దుగగట్టు - duddugagattu, Tel.). From (duddekku, tel. to surpass + gattu, tel. hill); high hill. Trig. station; lat. 16° 46′ 10·34″; long. 80° 59′ 01·90″; height 488 feet; from Cautrenipaud S. 2 miles; from Noozveed E. 6 miles.——*Gollapully* (గొల్లపల్లె - gollapalle, Tel.). See sep. title.——*Gunnavaram* (గన్నవరము - gannavaramu, Tel.). See sep. title.——*Medore* (మేడూరు - médúru, Tel.). From (médi, tel. fig tree, ficus glomerata, miq. + úru, tel. village). Zemindarry, Village; pop. 1,885; acres 3,250; lat. 16° 18′; long. 80° 53′; from Gunnavaram S. 18 miles; from Masulipatam W.N.W. 19 miles; from Noozveed S. 35 miles. Zemindar of the pergunnah [q.v.] of that name has a tannah [q.v.] here. Inscription [shausanam] records a battle fought by Krishna deva royel of Vijianugger. Peshcush Rs. 16,292. ——*Noozveed* (నూజివీడు - nújivídu, Tel.). See below.——*Ooyoor* (ఉయ్యూరు - uyyúru, Tel.). Zemindarry, Village; pop. 4,044; lat. 16° 22′; long. 80° 53′; from Gunnavaram S. 12 miles; from Masulipatam W.N.W. 22 miles; from Noozveed S. 29 miles. Someshwaran temple with inscriptions. Peshcush Rs. 15,656. ——*Tailaprole* (తేలప్రోలు - télaprólu, Tel.). From (télu, tel. scorpion + prólu, tel. town). Zemindarry, Village; pop. 2,253; lat. of village 16° 35′; long. 80° 55′; from Gunnavaram E.N.E. 6 miles; from Masulipatam N. 32 miles; from Noozveed S. 15 miles. Peshcush Rs. 15,728.——*Vedoorpauvoolore* (వెదురుపావులూరు - vedurupávulúru, Tel.). From (veduru, tel. bamboo, bambusa arundinacea, willd. + pávulúru, tel. village so called). Village; pop. 2,048; lat. 16° 34′; long. 80° 46′; from Gunnavaram W.N.W. 4 miles; from Masulipatam N.W. 37 miles; from Noozveed S.S.W. 17 miles. Good water wells.——*Ventrapragada* (వెంట్రప్రగడ - ventrapragada, Tel.). After a person of that name. Zemindarry, Village; pop. 1,803; lat. of village 16° 27′; long. 80° 57′; from Gunnavaram S.E. 10 miles; from Masulipatam N.W. 23 miles; from Noozveed S. 23 miles. Peshcush Rs. 15,429.——(2) Deputy tahsildarry, Kistna district. Pay Rs. 100.——(3) Town; Kistna dist., Noozveed zemindarry; pop. 7,637; acres 921; lat. 16° 47′; long. 80° 53′; from Bezwada N.E. 26 miles; from Guntoor N.E. 43 miles; from Gunnavaram N.N.E. 17 miles; from Madras N. 258 miles; from Masulipatam N.N.W. 45 miles; from Vinoocondah N.E. 90 miles. On rising ground, surrounded by jungle. Head-quarters of zemindarry. Captured by English twice in 1783, and once in 1788. Large cocoanut [q.v.] and mango [q.v.] topes [q.v.]. Modern fort. Temple of Vencateshwarasawmy built 400 years ago and a mosque [musjid] of the same age.

NORTH ARCOT (ఉత్తరఆర్కాడు - uttaraárkádu, *Tel.*; வடவார்க்காடு - vadavárgádu, *Tam.*). Always called by natives Chittore zillah [q.v.]. Revenue district; situated inland, between 12° 20′ and 13° 55′ N. lat., and between 78° 17′ and 80° 09′ E. long.; bounded N. by Cuddapah and Nellore districts, E. by Chingleput district, S. by South arcot and Salem districts, W. by Mysore; square miles 7,620; pop. 2,180,487; lang. Teloogoo and Tamul. Contains rivers Cheyaur, Palaur, Poyney; mountains Eastern ghauts, Jawaudy hills, Nagary hills; sanitarium Pulmanair. The whole area of the district is represented by the following sub-areas:—Arcot talook, Arnee jagheer, Calastry zemindarry, Carvetnugger zemindarry, Chittore talook, Chundragherry talook, Cungoondy zemindarry, Goodiyattam talook, Polore talook, Poonganore zemindarry, Pulmanair talook, Vellore talook, Wallajahpett talook, and Wandiwash talook. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Chittore; Sub-collector, Vellore, in charge of Arcot, Goodiyattam and Vellore talooks and Cungoondy zemindarry; Head assistant collector, Ranipett, in charge of Wallajahpett and Chundragherry talooks and Calastry and Carvetnugger zemindarries; General deputy collector, Arnee, in charge of Wandiwash and Polore talooks and Arnee jagheer. Assistant collector or Special deputy collector, Chittore, in charge of Chittore and Pulmanair talooks and Poonganore Zemindarry. Tahsildars; Arcot, Rs. 225; Chittore, Rs. 175, this talook includes the polliems of Naraganty, Bungaur, Toomba, and Goodiputty; Chundragherry, Rs. 150, this talook includes the polliems of Cullore and Poolicherla; Goodiyattam, Rs. 175; Polore, Rs. 150; Pulmanair, Rs. 150; Vellore, Rs. 175; Wallajahpett, Rs. 250, this talook includes the mittah of Argilavaudy; Wandiwash, Rs. 200. Deputy tahsildars; Arconum, Rs. 70, range situated in the east of Wallajahpett talook; Tripatty, Rs. 70, range situated in the east of Chundragherry talook; Vencatagherrycottah, Rs. 70, range situated in the south-west of Pulmanair talook. Sub-magistrates; Arnee, Rs. 70, jurisdiction extending over whole of the Arnee jagheer, square miles 183; Calastry, Rs. 100, jurisdiction extending over one-half of the western portion of Calastry zemindarry, square miles 471; Cungoondy, Rs. 100, jurisdiction extending over whole of the Cungoondy zemindarry, square miles 346; Maderpauk, Rs. 70, jurisdiction extending over one-half of the eastern portion of Calastry zemindarry, square miles 403; Poottore, Rs. 100, jurisdiction extending over one-half of the northern portion of Carvetnugger zemindarry, square miles 510; Poonganore, Rs. 100, jurisdiction extending over whole of the Poonganore zemindarry, square miles 674; Trittany, Rs. 100, jurisdiction extending over one-half of the southern portion of Carvetnugger zemindarry, square miles 433; Vellore town, Rs. 70, range situated in the east of Vellore talook. Similarly judicial officers:—Judge, Chittore. District moonsifs; Arnee, with jurisdiction extending over Arcot, Wandiwash and Polore talooks and Arnee jagheer; Chittore with jurisdiction extending over Chittore and Pulmanair talooks and Poonganore zemindarry; Sholinghur with jurisdiction extending over Wallajahpett talook and Trittany division; Tripatty with jurisdiction extending over Chundragherry talook and Calastry zemindarry, and Poottore division; Vellore with jurisdiction extending over Vellore and Goodiyattam talooks and Cungoondy zemindarry. Similarly Public works officers:—District engineer, Vellore. Sub divisional officers; Assistant engineer, Vellore; Sub-engineer, Ranipett. Contains Registration sub-districts Amboor, Arconum, Arcot, Arnee, Calastry, Chittore, Cungoondy, Goodiyattam, Maderpauk, Polore, Poonganore, Poottore, Pulmanair, Tripatty, Trittany, Trivettore, Vellore, Wallajahpett, Wandiwash. Contains Forest ranges Chundragherry, Pulmanair, Vellore. Contains Municipalities Goodiyattam, Tripatty, Vellore, Wallajahpett. Contains District board. And Talook boards; Chittore embracing Chittore, Pulmanair and Chundragherry talooks and Poonganore zemindarry; Vellore embracing Vellore, Arcot and Goodiyattam talooks and Cungoondy zemindarry; Ranipett embracing Wallajahpett talook and Calastry and Carvetnugger zemindarries; and Arnee embracing Arnee jagheer and Polore and Wandiwash talooks. Government have recently sanctioned the transfer of Chundragherry talook to Ranipett talook board from 1890-91. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; comparative population, II, 172; location of revenue officers, II, 378; revenue settlement of the district, II, 406; registrars' and sub-registrars' stations, II, 420; rain-gauge stations, II, 428; police divisions, II, 431; maps

published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 506; zemindarries contained, I, 58 and II, 294. Special public works, I, 403. A special gazetteer account of the whole district is given at II, 53. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Arcot, Arnee, Calastry, Carvetnugger, Chittore, Chundragherry, Cungoondy, Goodiyattam, Polore, Pooganore, Pulmanair, Vellore, Wallajahpett, Wandiwash.

NOTCHY (निर्गुण्डी - nirgundí, *San.*; निर्गुंड - nirgunda, *Mahr.*; निर्गुडु - nigundu, *Conc.*; اثلق - aslak, *Ar.*; پنجنگشت - panjangusht, *Pers.*; نرگندی - nirgandí, *Hind.*; شمبالی - shambálí, *Dec.*; ಲಕ್ಕಿ - lakki, *Can.*; నెక్కి - nekki, *Too.*; నల్లవావిలి - nallavávili, *Tel.*; ବେଗୁନା - beygúna, *Oor.*; നൊച്ചി - noçￇi, *Mal.*; සුදුනික - sudunika, *Singh.*; நொச்சி - noççi, *Tam.*). Title from tamul [no]. San. from (nirgá, san. to go out); to shed, from juice. Pers. from (panj, pers. five + angusht, pers. finger); five-foliolate leaf. Hind. from sanscrit. Tel. from (nalla, tel. black + vávili, tel. vitex trifolia, linn.). Mal. from tamul. Singh. from (sudu, singh. white + nika, singh. vitex). Tam. from (noși, tam. to pain); leaves are pungent and stimulating and used in fomentations. San. also (sinduvára), meaning preventing flow; the plant being used to prevent flow of humours and laxity; (indrasurasa), meaning indran + the plant; (shvétasurasa), meaning white + the plant; (indrání), meaning beloved of indran; (surasa), meaning good + juice [common-toolsy]. Ar. also (fanjangusht), meaning five + finger; (zúkhamsatulaurák), meaning lord of five leaves; (zúkhamsatulasábi), meaning lord of five fingers. Pers. also (sísbán). Hind. also (sambhálú); (nisinda). Dec. also (shamálú). Can. also (karinekkilu), meaning black + vitex; (bilenekki), meaning white + the plant; (karlekki), black + the plant. Tel. also (tellavávili), meaning white + vitex trifolia, linn.; (vávili). Mal. also (velnoççi), meaning white + the plant. Singh. also (nilnika), meaning black + vitex. Tam. also (vellainoççi), meaning white + the plant, from color of leaf. Title otherwise Five-leaved chaste tree, Nisinda, Quadrangular chaste tree. Botanically Vitex [sindoocam] negundo, linn., verbenaceæ [vricsham, 102]. Specific name from sanscrit. Alias Vitex bicolor, incisa, paniculata. Tree; branchlets, petioles and rachis of the panicle pubescently tomentose; leaves long-petioled, three to five-foliolate, leaflets oblong, attenuate-acuminate, acute at the base and with the middle ones petioled, quite entire or coarsely serrated, puberulous above, canescent below, or afterwards glabrous; panicle terminal, compound, spreading; cymes very shortly peduncled, divaricately-dichotomous, bracteolate, white with velvety tomentum; calyx shortly five-toothed; lower lip of the corolla somewhat downy at the base, flowers smallish, blue; flowering nearly all the year. Root tonic, febrifuge and expectorant; the leaves when heated and applied externally are discutient, and are applied to swellings of joints, &c.; internally they are anodyne, diuretic and emmenagogue; the dried leaves are smoked to relieve headache and catarrh; pillow stuffed with the leaves is placed under the head for relief of headache; mahomedans smoke the dried leaves for headache and catarrh; decoction of leaves used as warm bath for women after delivery; in pharm. non-officinal; the dried fruit acts as vermifuge. Branches are used for wattle-work; ashes used as mordant [cauram]; tree used for hedges. Wood greyish-white, hard.——*Black notchy* (கருநொச்சி - karunoççi, Tam.). Same as Common gendarussa.——*Field notchy* (ಹೊಲನೆಕ್ಕಿ - holanekki, Can.; నెవలేడి - nevalédi, Tel.; കാറിൽ - káril, Mal.). Can. from (hola, can. field + nekki, can. vitex). Mal. from (kár, mal. black + il, mal. spot). Can. also (sengenitkarril); (karril). Tel. also (lúki). Title otherwise Cotton-leaved notchy. Botanically Vitex [sindoocam] leucoxylon, linn. f., verbenaceæ [vricsham, 102]. Alias Rothia leucoxylon; Vitex bombacifolia, saligna. Small tree; leaves long-petioled, three to five-foliolate; leaflets elliptic or ovate-oblong, shortly and obtusely acuminated; attenuated into the petiole, entire, sub-coriaceous, shining and glabrous above; cymes axillary, long peduncled, corymbose, many-flowered; lower lip of corolla densely woolly; drupe large, obovate, black when ripe; flowers whitish-yellow; flowering from february to april; small, black fruit containing very soft pulp; bark and root astringent; wood whitish and compact.——*Tall notchy* (నెవలిఅడుగు - nevaliadugu, Tel.; ମୁରିଆ - muriya, Oor.; மயிலடி - mayiladi, Tam.). Tel. from (nevali, tel. peacock + adugu, tel. foot). Tam. from (mayil, tam. peacock + adi, tam. foot); probably from appearance of leaf. Tel. also (búsi), meaning frightful looking. Title otherwise Peacock's foot notchy. Botanically Vitex [sindoocam] pubescens, vahl., verbenaceæ [vricsham, 102]. Alias Vitex arborea; Wallrothia articulata. Large tree; branchlets four-sided, channelled, and with the petioles and young leaves pubescent or slightly tomentose; leaves long-petioled, three to five-foliolate; leaflets elliptic or ovate-oblong, attenuate-acuminate, rounded at the base, subsessile, coriaceous, penni-nerved, glabrous, shining above, pale and finely puberulous beneath; panicles whitish, powdery tomentose, terminal, compound, ovato-pyramidal, compact; cymes interspersed with foliaceous bracts longer than the calyx; forests in malabar. Drupe globose, size of a pea [calauyam]; bears flowers in hot season. Wood smooth, grey, with an olive-brown tinge, very hard, close-grained; wood becomes chocolate colored on exposure.——*Water notchy* (सुरस - surasa, San.; राननिर्गुंडी - ránanirgundí, Mahr.; काळोनिर्गुंडु - kálónigundu, Conc.; ابی اثلق - aslakiábí, Ar.; پنجنگشت ابی - panjangushtiábí, Pers.; سفید سنبہالو - sufedsambhálú, Hind.; اجلی شنبالی - ujlíshambálí, Dec.; لگندی - lagundí, Malay; ನೀರುಲಕ್ಕಿ - nírulakki, Can.; ಕರಿನೆಕ್ಕಿ - karinekki, Too.; వావిలి - vávili, Tel.; കരുനൊച്ചി - karunoççi, Mal.; මියම්මිලිල - míammilila, Singh.; நீர்நொச்சி - nírnoççi, Tam.). Title from habitat. San. from (su, san. good + rasa, san. juice); from usefulness. Mahr. from (rána, mahr. wild + nirgundí, san. vitex negundo, linn.). Ar. from (aslak, ar. vitex negundo, linn. + áb, pers. water). Pers. from (panjangusht, pers. vitex negundo, linn. + áb, pers. water). Hind. from (sufed, hind. white + sambhálú, hind. vitex negundo, linn.). Dec. from (ujlí, hind. white + shambálí, hind. vitex negundo, linn.). Can. from (níru, can. water + lakki, can. vitex negundo, linn.). Too. from (kari, too. black + nekki, too. vitex negundo, linn.). Mal. from (karu, mal. black + noççi, mal. vitex negundo, linn.). Tam. from (nír, tam. water + noççi, tam. vitex negundo, linn.). San. also (nílanirgundí), meaning black vitex negundo, linn.; (jalanirgundí), meaning water notchy; (krishnanirgundí), meaning black notchy; (shép'háliká), is blue-flowered variety [coral jasmine]; (suvahá), meaning well-enduring tree, blue-flowered variety; (níliká), meaning blue variety; (shvétasurasa) is white-flowered variety. Hind. also (páníkísambhálú), meaning water chaste tree; (nisindha); (seduari); (somalu); (sinbálú). Dec. also (páníkíshambálí), meaning water chaste tree. Malay also (samálusanbálú). Can. also (karnuççi), meaning black + the plant. Tel. also (tellavávili), meaning white + the plant; (níruvávili), meaning water + the tree; (chiruvávili), meaning small + the plant; (nílavávili), meaning blue + the plant; (nélavávili), meaning ground + the plant. Mal. also (nírnoççi), meaning water notchy. Tam. also (shirunoççi), meaning small + the plant; (karunoççi), meaning black + the plant; from color of stem and leaf. Greek ἄγνος, Latin castus, derived from use at sacred rites of Ceres by Athenian women. Title otherwise Common chaste tree, Hemp tree, Indian privet, Indian wild pepper, Monk's pepper, Three-leaved chaste tree, Tree of chastity, Vauvily, White-leaved panicled chaste tree. Botanically Vitex [sindoocam] trifolia, linn., verbenaceæ [vricsham, 102]. Alias Vitex integerrima. Shrub, 10 feet; leaves ternate and quinate; leaflets ovate, acute, entire, hoary beneath; panicle with a straight rachis; pedicels dichotomous; flowers terminal, racemose, violet; flowering in april and may; leaves lightly bitter but of aromatic taste and smell. A clear sweet oil of greenish color is extracted from root. Medicinal properties like notchy, but stronger; this generally used in medicine in preference; leaves and young shoots are powerfully discutient; leaves powdered and taken with water are a cure for intermittent fevers; the fruit is said by veidyans [q.v.] to be nervine, cephalic, and emmenagogue, and is prescribed in powder in electuary and decoction [kwautam]; leaves in pharm. non-officinal; useful in baths and fomentations, in treatment of beribery [q.v.] and in the allied and obscure affection called burning of the feet. Fruit sometimes used for pepper [q.v.].

NOW (نو - nau, *Hind.*). From (nava, san. new). New [hosa, poothoo].——*Nowgaum* (నాగాము - naugámu, Tel.). From (nau, hind. new + gráma, san. village). Proprietary estate, Village; Ganjam dist.; pop. 754; lat. of village 18° 41′; long. 84° 20′; from Chetterpore S.W. 65 miles; from Chicacole N.E. 36 miles; from the sea W. 11 miles. Sub-division of Temboor. Peshcush Rs. 2,257.——*Nowpada* (నాపద - naupadá, Tel. naupada *). From (nau, hind. new + pádu, tel. village). Village, Port; Ganjam dist., Chicacole tal., Tekkaly estate; pop. 1,835; lat. 18° 33′; long. 84° 21′; from Bhauvanpaud W. 4 miles; from Chetterpore S.W. 70 miles; from Chicacole N.E. 32 miles; from Madras N.E. 456 miles; from Poondy S.W. 12 miles. On Orissa coast [q.v.]. Chief place of salt manufacture in district. Open roadstead.——*Nowroz* (نوروز - nauroz, Pers.). Persian new year's day, 21st March, when the sun [sooryan] enters Aries [maisham] of the tropical zodiac [maunam, raushy chuckram]; is celebrated by feasts. Mahomedan proper name [ism].——*Nowrungapore* (నవరంగపురము - navarangapuramu, Tel.). See sep. title.

NOWBUT (نوبت - naubat, *Hind.*). From (naub, ar. to take turn); as beaten by turns. A large kettle drum [paray, saungeetam].

NOWCAR (نوکر - naukar, *Hind.*). From persian. A servant, an official.

NOWRUNGAPORE (نورنگاپور - naurangápur, *Hind.*; నవరంగపురము - navarangapuramu, *Tel.*). From (nava, san. nine + ranga, san. vishnu + pura, san. town) [now].——(1) Division, Vizagapatam district; population 116,399; language Ooriya. Boundaries:—E. Calahundy, S. Coraputt and Jeypore divisions, W. Bustar, N. Central provinces. An undulating plain mostly covered with saul [q.v.]. The greater part forms a sub-division of the Jeypore estate, allotted to the support of the family of Cheitanya deo [goodaury]. Places of archæological interest:—

Coorsy, Dodrah, Hoody, Nowrungapore, Oommarcote, Palsagaum, Podagauda, Pooppgaum, Puppadahundy, Royagada. Principal trig. stations :—Bor dongry, Deo pahar, Hattibena, Heerapore, Shirasy. The leading places, &c., in the division are the following.——*Bor dongry* (బొరదొంగిరి - bóradongiri, Tel.). From (bora, mahr. jujube tree, zizyphus jujuba, lam. + dongari, mahr. little hill). Trig. station; lat. 19° 53' 47·53"; long. 82° 15' 31·56"; height 2,158 feet; from Nowrungapore N.N.W. 50 miles.——*Deo pahaur* (ديو پهاڑ - deupahár, Hind.; దేవపహార - dévupahará, Tel.). From (deu, pers. giant + pahár, hind. mountain). Trig. station; lat. 19° 40' 19·40"; long. 82° 29' 08·58"; height 2,704 feet; from Chotchah N.N.E. 1¼ miles; from Nowrungapore N. 31 miles.——*Hattibena* (హత్తిబెన - hattibená, Tel.). From (hattí, hind. elephant + bennu, can. back). Trig. station; lat. 19° 51' 42·34"; long. 82° 03' 53·14"; height 2,613 feet; from Cotagaum W.S.W. 2 miles; from Nowrungapore N.N.W. 53 miles.——*Heerapore* (హీరాపురము - hírápuramu, Tel.). From (híra, san. diamond + pura, san. town). Trig. station; lat. 19° 36' 14·99"; long. 82° 09' 34·42"; height 3,063 feet; from Heerapore S.S.E. 2½ miles; from Nowrungapore N.W. 38 miles.——*Jugganautpore* (జగన్నాథపురం - jagannát'hapuram, Tel.). From (jagannát'ha, san. lord of world, a king + pura, san. town); from burial place of jagganath rauz. Village; pop. 926; lat. 19° 12'; long. 82° 47'; from Jeypore N.E. 25 miles; from Nowrungapore E.S.E. 12 miles; from Vizagapatam N.N.W. 106 miles. One old temple and one new temple.——*Nowrungapore* (నవరంగపురము - navarangapuramu, Tel.). See below.——*Oommarcote* (ఉమ్మరకోట - ummarakóta, Tel.). From (umr, ar. proper name + kóta, tel. fort). Old fort, Village, Head-quarters of a Revenue ameen; pop. 526; lat. 19° 40'; long. 82° 15'; from Jeypore N.N.W. 69 miles; from Nowrungapore N.W. 37 miles; from Vizagapatam N. 148 miles.——*Puppadahundy* (పప్పడాహండి - papadáhandi, Tel.). From (pappada, tel. a cake + handi, tel. pot). Village; pop. 428; lat. 19° 20'; long. 82° 34'; from Jeypore N. 33 miles; from Nowrungapore N. 8 miles; from Vizagapatam N. 123 miles. Two old temples.——*Shirasy* (శిరసి - shirasi, Tel.). From (shira, san. head). Trig. station; lat. 19° 19' 39·21"; long. 82° 30' 43·75"; height 2,311 feet; from Nowrungapore N.W. 8 miles; from Puppadahundy W.S.W. 4 miles.——*Tentoolicoonty* (తెంతులికుంటి - tentulikunti, Tel.). From (tintulí, san. tamarind tree, tamarindus indica, linn. + kunta, tel. pond). Village; lat. 19° 18'; long. 82° 46'; from Jeypore N.N.E. 31 miles; from Nowrungapore E.N.E. 12 miles; from Vizagapatam N.N.W. 115 miles. Manufacture of match-locks and battle axes. Large weekly market on Monday.——**(2)** Deputy tahsildarry; Vizagapatam district; pay Rs. 150.——**(3)** Village, Head-quarters of Deputy tahsildar; Vizagapatam dist., Jeypore zemindarry, Nowrungapore magisterial division; pop. 2,976; lat. 19° 14'; long. 82° 36'; from Coraputt N.N.W. 35 miles; from Jeypore N. 26 miles; from Madras N.N.E. 440 miles; from Narsapatam N. 104 miles; from Parvatipore W.N.W. 63 miles; from Vizagapatam N.N.W. 112 miles; from Vizianagram N.W. 92 miles. Old town, but temples are modern.

NOY (நொய் - noy, *Tam.*). Small.——*Noyil* (நொய்யல் - noyyal, Tam. nóyil *). From (noymai, tam. smallness + al, tam. darkness); from its small moss-covered dark stream. River; Coimbatore dist., Coimbatore, Pulladam and Dharaupooram tals. Rises in the Velliyangherry hills in lat. 10° 55' 45"; long. 76° 45' 40" immediately W. of Coimbatore town and above Bolamputty valley. It runs through valley and directly across district from W. to E., traversing Coimbatore talook in the south and Pulladam, and forming the N. boundary of Dharaupooram talook and S. boundary of Erode talook. Joins Cauvery at Neycooppam at junction of Erode and Caroor talooks in lat. 11° 4' N., long. 77° 59' 30" E. Length 108 miles. Little more than a jungle stream, being dry for many months together, and then in high and rapid flood for several days. There are twenty-six old anicuts [q.v.]. The denudation of the hills surrounding the Bolamputty valley and the cultivation of the valley itself have tended to diminish the continual supply of water. At present only anicuts in first 30 miles are efficient.

NRITYAM (नृत्य - nritya, *San.*). From (nrit, san. to dance) [nat]. Dance, including all theatrical representation. One of the three parts of books on Indian music [gaunam, vaudyam].

NUKKEE (نکی - nakkhí, *Hind.*). Means nailed. Gold and silver lace [kinaury] used for bodices [cholee] and for edgings.

NUL (நல் - nal, *Tam.*). Good.——*Nakkeeran* (நக்கீரன் - nargíran, Tam.). From (above + gir, san. speech). One of the literati of the Madura college [q.v.] and author of the Antaudy panayam, a poem in honor of Shiva [q.v.]. Chunk-cutter by caste [jauty].——*Nalvazhy* (நல்வழி - nalvazhi, Tam.). From (above + vazhi, tam. method). A good method. One of Avvay's five aphoristic works taught in schools [avvay].——*Nelacottah* (നല്ലകോട്ട - nallakótta, Mal. nellakóta *). From (nalla, mal. good + kótta, mal. fort). Tract of country, Village; Neilgherry dist., Wynaud S.E. division; acres 10,770; lat. of village 11° 33'; long. 76° 27'; from Goodalore N.W. 7 miles; from Ootacamund W.N.W. 21 miles. In Moonanaud amshom. Fort built during Mysore wars, but now in ruins, resisted repeated attacks of Tippoo sultan. Held by Pychee [q.v.] rebel during early years of century.——*Nulla* (நல்ல - nalla, Tam.). Good.——*Nullamoottoo* (நல்லமுத்து - nallamuttu, Tam.). From (nalla, tam. good + muttu, tam. pearl). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Nullannan* (நல்லண்ணன் - nallannan, Tam.). From (nal'la, tam. good + annan, tam. elder brother). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Nullashevagan* (நல்லசேவகன் - nallasévagan, Tam.). From (nalla, tam. good + sévaka, san. servant). The good warrior; Ayenaur [ayen].——*Nullatumby* (நல்லதம்பி - nallattambi, Tam.). From (nalla, tam. good + tambi, tam. younger brother). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Nullatunneer* (நல்லதண்ணீர் - nallathannír, Tam.). From (nalla, tam. good + tannír, tam. water). Fresh water. Name of one of the seven oceans [bhoogolashastram, samoodram].——*Nullauthan* (நல்லாதன் - nalláthan, Tam.). From (above + áthan, tam. teacher). Ancient poet [pauvalan]. Made hundred epigrams called Tricatoocam. Each epigram contains a comparison of three things and their result as :—கொல்யானைக்கோடும் குணமிலியும் எல்லில் பிறன்கடைநின் றொழுகுவானும்—மறந்தெரியாதாடும் பாம்பாட்டுமறிவிலியும் மூவர் நாடுங்காற்றூங்குபவர்.
—"He who runs against the killing elephant [q.v.], he who "stands outside his neighbour's door in the night time, he who "makes the snake [sarpam] dance; these three do so at their "peril."——*Nunjah* (நஞ்செய் - nañjey, Tam.). Tam. from (nal, tam. good + shey, tam. cultivation). Soil fit for the cultivation of rice [paddy] and admitting of artificial irrigation. Generally called wet land [poonjah, wet crop]. Nunjah baughayet is cultivation of garden crop on Nunjah land. Nunjah mail poonjah is dry grain raised on Nunjah. Nunjah taram poonjah is land classed as wet, but used as dry. There is a Tamul proverb :—மதகடி நஞ்செயும் மலையடிப் புஞ்செயும்—"Nunjah at the foot of a sluice [mathagoo] and poonjah at the "foot of a hill are alike;" both are best.——*Nunjenaud* (நஞ்சநாடு - nañjanádu, Tam.). From (nañjai, tam. wet land + nádu, tam. country). Village, Valley; Neilgherry dist., Todanaud division; acres 33,218; lat. 11° 22'; long. 76° 41'; from Ootacamund S.W. 5 miles. Village is on W. slope of the valley. The head of the latter is a ravine formed by two spurs of Dodabetta and known as Lovedale. It gradually opens out, and stretches for some miles in the direction of the Avalanchey valley. It is watered by a tributary of the Pycarrah and consists mainly of undulating stretches of grazing land. There is a low hill with excavations round its base, resembling an entrenched camp.——*Nunnaury* (நன்னாரி - nannári, Tam.). Means sweet smelling. Same as Indian sarsaparilla. Foreign nunnaury is Sarsaparilla china root.——*Nunnery* (நன்னெறி - nanneri, Tam.). From (nal, tam. good + neri, tam. way). Ethical treatise by Shiva pracausa desican, at Conjeeveram, seventeenth century.——*Nunnilam* (நன்னிலம் - nannilam, Tam.). See sep. title.——*Nunnool* (நன்னூல் - nannúl, Tam.). See sep. title.

NULLA (నల్ల - nalla, *Tel.*). Black.——*Nullamada* (నల్లమద - nallamada, Tel.). Same as Ooppata mangrove.——*Nullamullay* (నల్లమల - nallamala, Tel.). From (above + mala, tel. hill). Range of mountains; Kurnool and Cuddapah districts. From Budwail W. 11 miles; from Cuddapah N. 16 miles; from Kurnool E. 41 miles; from Nundicotcore E. 28 miles. For description, see vol. II, 115.——*Nulla vaulagily* (دریا کاسانپ - daryákásámp, Hind.; నల్లవాలగిలి - nallaválagili, Tel.). Title from teloogoo. Hind. from (daryá, hind. sea + sámp, hind. snake). Tel. from (nalla, tel. black + válaga, tel. a sea fish). The genus Pelamis, hydrophidæ [tuttapaumb], ophidii colubriformes venenosi, ophidia [sarpam], reptilia [sarpy, 28], of naturalists [jantoo]. One of the most common of sea-snakes. The best known species is Pelamis bicolor. Alias Hydrus bicolor; Hydrophis pelamis, variegata; Pelamis ornata, platurus. The following four varieties of this species are known :—"*a*" Color black above; sides and belly uniform brownish-olive; tail with black spots.—"*b*" Back black; belly and sides brown, separated by a black and a yellow band. Large spots posteriorly.—"*c*" Black of back narrow, become sinuous behind middle of the body; posteriorly a dorsal series of rhombic confluent spots. Sides and belly with an irregular series of rounded, black or brown spots. This variety has been named sinuata.—"*d*" Yellow, with about fifty brown, black-edged cross bands, extending nearly to the belly, which is crossed by narrow vertical brownish-black streaks, alternating with the dorsal bands. Some of the dorsal bands are confluent, forming a zigzag band. Head yellow, variegated with black.

NULLAH (نالا - nálá, *Hind.*). A water-course [caulvye], a ravine.

NUM (நம் - nam, *Tam.*). Our. Prefixed to Veishnavite proper names [peyar].——*Nannayya bhatt* (నన్నయభట్టు - nannayyabhattu, Tel.). From (nánnayya, tel. familiar form of address for father + bhatta, san. title). First of the three Teloogoo Audy cavies [cavy] [ticcana, yerra pragada]. Under Raja raja naraindran in Rajahmundry. Translated first three parvams [q.v.] of Bhauratam [q.v.]. Also Andhrashabda chintaumany, Teloogoo grammar in Sanscrit metre; otherwise

Nannayya bhatteeyam.——*Numbermaul* (நம்பெருமாள் - namberumál, Tam.). From (above + perumál, tam. vishnu, the great god). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Nummalwar* (நம்மாழ்வார் - nammázhvár, Tam.). From (above + ázhvár, tam. a disciple of vishnu). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Nummayya* (ನಮ್ಮಯ್ಯ - nammayya, Can.). From (above + ayya, can. master). Hindoo 2nd or pers. name [peyar].——*Nyna* (నాయన - náyana, Tel.). From (ná, tel. my + anna, tel. father). Hindoo 2nd or pers. name. More commonly term of address to father; also term of address by elders towards young men [peyar].

NUMB (நம்பு - nambu, *Tam.*). Belief. Vedam [q.v.], the hindoo sacred writings.——*Numbalagode* (നമ്പലക്കോട് - nambalakótu, Mal.). From (nampólan, mal. a ruler of that name + kódu, mal. fort). Amshom; Neilgherry dist., Wynaud S.E. division; pop. 14,868; acres 88,842; lat. 11° 26′ to 11° 42′; long. 76° 24′ to 76° 38′; from Ootacamund W. 14 miles. Tract consists of five deshoms [q.v.], Ghermalittara, Devaulah, Goodalore, Paudantara, and Shreemadhoora. Five temples of repute are situated in this amshom [q.v.], viz., Ayira villy, Calingara, Moothoomullay, Numbalagode, and Shree madhoora. Belongs to the Nelambore tirmalpaud. A temple of Baidagan [q.v.], the hunting god of the Todahs [q.v.].——*Numban* (நம்பன் - namban, Tam.). From (nambu, tam. to desire). Shiva [q.v.].——*Numbeeshan* (നമ്പീശൻ - nampíshan, Mal.). From (above + açcan, mal. father). Honorific form of Numby.——*Numberoya* (ನಂಬೇರಾಯ - numbéráya, Can.). From (above + ráya, can. king). Hindoo 2nd or pers. name [peyar].——*Numbidy* (നമ്പിടി - nampiti, Mal.). From (above + ati, mal. foot). A trustworthy dependent. Another form of Numby.——*Numbiyaur* (നമ്പിയാർ - nampiyár, Mal.). From (above + ár, mal. honorific plural termination). A temple priest. A title among petty chiefs of North malabar. Hindoo third name [peyar].——*Numbiyauttiry* (നമ്പിയാതിരി - nampiyátiri, Mal.). From (above + tiri, mal. prosperity, title). Originally the head of fighting Bramins [keraloputty], now a title among the junior rajahs of Calicut [zamorin].——*Numboodripaud* (നമ്പൂതിരിപ്പാട് - nampútirippátu, Mal.). From (nampu, mal. veda + tiri, mal. holy + pátu, mal. chief, a title). A head Numboory.——*Numboory* (നമ്പൂരി - nampúri, Mal.). See sep. title.——*Numbootiry* (നമ്പൂതിരി - nampútiri, Mal.). From (nampu, mal. veda + tiri, mal. blessed). The original form of Numboory.——*Numby* (നമ്പി - nampi, Mal.). Means trustworthy. Priest. To be distinguished from Numboories. Inferior Bramins in Malabar; others being Elliads and Moottads. They perform ceremonies for Shoodras. Follow Maroomakkatoyem [jauty, maroomakkatoyem, numbidy].

NUMBOORY (നമ്പൂരി - nampúri, *Mal.*). From (nambu, mal. veda + óthu, mal. to teach + tiri, mal. holy, title) [numb]. Caste, title. The Bramins [q.v.] peculiar to the west coast; as opposed to the modern stranger bramins from the east coast or Puttar [q.v.].——**(1)** The portion of the Malabar coast immediately to the north of Dymirice is called by Ptolemy and the author of the Periplus ἀριακή or Aryan land; this latter probably refers in part to the Numboories. Compare ναούρα or the country of the Nayars. Numboory bramins belong neither to Gowda [q.v.] nor Dravida [q.v.]; nevertheless they are said to have been invited into Malabar by Parshooraman [keraloputty]. Evidently they are a very early immigration of Bramin colonists. See vol. I (66); II, 100, 135. In the early history of the Numboory caste in Malabar there was a division into two factions, the Punniyore [q.v.] graumam adopting the Veishnavite faith with the Veishnavite emblem of the pig or boar, and the Chovoor [q.v.] graumam that of Shiva with the emblem of a bird. These are not to be understood as single villages merely. The Chovoor graumams finally prevailed. The whole caste however has since adopted the Vedantist sheiva doctrines of Shuncaracharry, himself believed to have been a Numboory [talee]. Their organization is by graumams [q.v.] or villages, as the Nayar [q.v.] are organized by taras [q.v.] and nauds [q.v.], and Teeyar [q.v.] and other foreigners by cherries. The principal pure Numboory graumams now extant are:—Aulatore, Caricaud, Irinyaulacode, Punniyore, Perinchelloor, Peroovanam, Chovoor, Trishivaperoor, Venganaud, Yedacaud, but see below. The graumams are presided over by six Smartas [q.v.], who are presidents of the assemblies at which caste offences are tried. The Numboory caste divides at the present day into two larger classes; Numboodripauds and Numboories. The former, as their name implies, are of superior rank. Those Numboories who have performed a public sacrifice or yaugam [q.v.] are called Chomaudripauds, or persons who have sacrificed with Somam [q.v.] juice. As a rule the Numboories lead very simple lives. The women are styled antarjanam [q.v.] or agattamaur [q.v.], that is to say indoors people. Numboories wear the chooday [q.v.] or sacred tuft of hair not on the crown of the head but on the forehead. They seldom go abroad without holding a chuttram or large umbrella. They are extensive landowners, often possessed of much wealth. The family property is owned and enjoyed in common by all the members of the family; and to preserve this intact for the general welfare and protection, in order that is to say that the family property may descend undivided, the eldest son alone is permitted to marry, the younger sons being only provided with subsistence and obliged to form temporary connections with Shoodra and other females of inferior caste. The mistresses of the younger sons remain in their own homes, for the Bramins cannot on account of caste eat food with them, and the children being by Hindoo law of necessity illegitimate can only be supported by and inherit property from their mothers' brothers. If the eldest son be without issue, he may marry one or two additional wives. If the eldest brother still have no children, or die without issue, the next in succession may marry, and so on. Division of family property is forbidden among these, and is not practised. Those who can claim support from the common fund are:—all the males of the family, their wives, their virgin daughters, and sisters, widows; and this for the last two classes only while residing in the house. The law of inheritance followed is Makkatoyem [q.v.], as opposed to the Maroomakkatoyem [q.v.] of the shoodras [nayar]. The Numboory's hospitality and charity are proverbial. Besides Numboories there are in Malabar several classes of inferior Bramins styled Numbidies, Elliads, Yembrauntries, &c.——**(2)** The following are the principal Numboory houses in North malabar, all Chiracal talook.——*Anakye* (ആനക്കഴി - ánakkazhi, Mal.).——*Caricherry parappore* (കരിശ്ശേരിപറപ്പൂർ - karishshériparappúr, Mal.).——*Carmaurat* (കരുമാരത്ത് - karumárattu, Mal.).——*Cartiyairy parappore* (കാർത്തിയേരിപറപ്പൂർ - kárttiyériparappúr, Mal.)——*Chembocoonnat* (ചെമ്പൊകുന്നത്ത് - chempokunnattu, Mal.).——*Chiracote mallicherry* (ചിറക്കോട്ട് മല്ലിശ്ശേരി - chirakkóttumallishshéri, Mal.).——*Codal cokkoonnam* (കൊടൽകൊക്കുന്നം - kotalkokkunnam, Mal.).——*Codallore peroor* (കൊടല്ലൂർപേരൂർ - kotallúrpérúr, Mal.).——*Cooditala* (കുടിത്തല - kutittala, Mal.).——*Coormattore* (കുറുമാത്തൂർ - kurumáttúr, Mal.).——*Irraishy podavar* (ഇരുവേഷ്ശിപുടവർ - iruvéshshiputavar, Mal.).——*Keeyatral* (കീഴത്രിൽ - kízhatril, Mal.).——*Madattil mallicherry* (മാടത്തിൽമല്ലിശ്ശേരി - mátattilmallishshéri, Mal.).——*Maniyal cokkoonnam* (മണിയാൽകൊക്കുന്നം - maniyálkokkunnam, Mal.).——*Mannore* (മണ്ണൂർ - mannúr, Mal.).——*Marcaunattil peroor* (മാർക്കാണത്തിൽപേരൂർ - márkkánattilpérúr, Mal.).——*Meppully* (മേപ്പള്ളി - méppali, Mal.).——*Moolloor poothoocoody* (മുള്ളൂർപുതുക്കുടി - mulúrputukkuti, Mal.).——*Moondrote poolipada* (മുന്ത്രോട്ട്പുലിപ്പട - muntróttupulippata, Mal.).——*Moottedat mallicherry* (മുട്ടേടത്ത് മല്ലിശ്ശേരി - muttétattumallishshéri, Mal.).——*Mothachira mallicherry* (മൊതച്ചിറമല്ലിശ്ശേരി - motaççiramallishshéri, Mal.).——*Nadoovat podavar* (നടുവത്ത് പൊടവർ - natuvattupotavar, Mal.).——*Naricode* (നരിക്കോട് - narikkótu, Mal.).——*Ottoopooracal* (ഓട്ടുപുരക്കൽ - óttupurakkal, Mal.).——*Padinyaurat colacherry* (പടിഞ്ഞാറത്ത് കുളശ്ശേരി - patiññárattukulashshéri, Mal.).——*Padinyauttut* (പടിഞ്ഞാറ്റത്ത് - patiññáttattu, Mal.).——*Palamrita parappore* (പാലമൃതപറപ്പൂർ - pálamritaparappúr, Mal.).——*Panyote* (പന്ന്യോട്ട് - pannyóttu, Mal.).——*Pappinyote* (പാപ്പിനിയോട്ട് - pápinyóttu, Mal.).——*Poondotattilpodavar* (പൂന്തോട്ടത്തിൽപൊടവർ - púntóttattilpotavar, Mal.).——*Poothoocoody cokkoonnam* (പുതുക്കുടികൊക്കുന്നം - putukkutikokkunnam, Mal.).——*Poothoocoody colacherry* (പുതുക്കുടികൊളശ്ശേരി - putukkutikolashshéri, Mal.).——*Poorva coonnoonmal* (പൂവ്വക്കുന്നുമ്മൽ - puvvakkunnunmal, Mal.).——*Shekhara pooliyapada* (ശേഖരപുലിയപ്പട - shékharapuliyappata, Mal.).——*Tertala mallicherry* (തേരത്തലമല്ലിശ്ശേരി - térattalamallishshéri, Mal.).——*Vadakote pooliyapadamba* (വടക്കോട്ട് പുലിയപടമ്പ - vatakkóttupuliyapatampa, Mal.).——*Varnacode* (വാരണക്കോട് - váranakkótu, Mal.).——*Vauricote mallicherry* (വാരിക്കോട്ടുമല്ലിശ്ശേരി - várikkóttumallishshéri, Mal.).——*Vengaprat bhattatiry* (വെങ്ങപ്രത്ത് ഭട്ടതിരി - vénnaprattubhattatri, Mal.).——*Vycaulcokkoonnam* (വയക്കാൽകൊക്കുന്ന് - váyakkalkókkunn, Mal.).——*Yedattat* (എടത്തട്ട് - etattattu, Mal.).——*Yedavalat podavar* (എടവലത്ത് പൊടവർ - etavalattupotavar, Mal.).——*Yeledat colacherry* (എളേടത്ത് കുളശ്ശേരി - elétattukulashshéri, Mal.).——*Yeledat mallicherry* (എളേടത്ത് മല്ലിശ്ശേരി - elétattumallishshéri, Mal.).——**(3)** The following are the principal Numboory houses in South malabar, with the talook indicated.——*Aghorani* (അഘോരം - aghóram, Mal.), Cochin.——*Alacat* (അളകത്ത് - alakattu, Mal.), Valavanand.——*Alwancherry tumbraukkal* (ആഴ്‌വാഞ്ചേരിതമ്പ്രാക്കൾ - ázhuvánchéritamprákkal, Mal.), Ponnany.——*Andalaud* (അണ്ടലാട് - antalátu, Mal.), Valavanaud.——*Auttpooratt bhattatiripaud* (ആറ്റുപുറത്ത് ഭട്ടതിരിപ്പാട് - áttupurattubhattatiripátu, Mal.), Valavanaud.——*Avanyicautt bhattatiripaud*

NUMDAH (نمدا - namdá, *Hind.*). From (namad, pers. a rag). A saddle cloth. Properly made of felt.

NUND (नन्द् - nand, *San.*). To be happy.——*Nundam* (नन्द - nanda, San.). From (nand, san. to be glad). Happiness.——*Nundan* (नन्द - nanda, San.; நந்தன் - nandan, Tam.). Name of a cowherd, otherwise Nundagopan, the foster father of Krishnan [q.v.]. Also that of a chuckler [q.v.] who is reputed to have reigned as a king for three hours, and to have issued leather coin. There is a Tamul proverb:—என் காரியம் எல்லாம் நந்தன் படைவீடாய்ப் போயிற்று—"My affairs are gone "like Nundan's ruined capital." Nundan is a common Hindoo 2nd or pers. name [peyar].——*Nundavanam* (नन्दवन - nandavana, San.; నందవనము - nandavanamu, Tel.). From (nanda, san. pleasure + vana, san. garden). Elysium. Name given to flower pot containing Toolsy [q.v.] worshipped in honor of Vishnoo. Land held for growing flowers for use of a temple [inam].——*Nundiaul* (నంద్యాల - nandyála, Tel.). See sep. title.——*Nundicanama* (నందికనమ - nandikanama, Tel.). From (nandi, san. the bull of shiva + kanama, tel. ravine). From the temple of mahanundy or bull-god in its neighbourhood. Pass; Kurnool dist., Nundiaul and Cumbum tals.; lat. 15° 25′ N.; long. 78° 49′ E.; from Cumbum S.W. 25 miles; from Kurnool E.S.E. 53 miles; from Madras N.W. 195 miles; from Nundiaul E.S.E. 19 miles; from Pyaupaly E.N.E. 69 miles. Most southerly pass in the Nullamullays. First opened in 1852. Chiefly used for transport of salt from coast districts. Carries main road from Kurnool to Cumbum and the east coast at Ongole over the Nullamullay hills. The distance from Gauzoolapully, at the western foot of the hills to Krishnamshettipully on the eastern side is 22 miles. The highest point of the road is about 2,000 feet. Traversed by railway. Formerly lead [eeyam] and diamond [vajram] mines were worked near entrance.——*Nundicotcore* (నందికోటకూరు - nandikótukúru, Tel.). See sep. title.——*Nundidroog* (ನಂದಿದುರ್ಗ - nandidurga, Can.; nundydroog, Mys. gov.). From (nandi, san. shiva's bull + durga, san. mountain fortress). Fortified hill and place of pilgrimage in the Chikbullapore talook, Colaur district, 31 miles north of Bangalore.——*Nundigauma* (నందిగామ - nandigáma, Tel.). See sep. title.——*Nundikeshwaran* (नन्दिकेश्वर - nandikéshvara, San.). From (nandi, san. the bull god + íshvara, san. lord). Shiva.——*Nundinagry* (नन्दीनागरी - nandínágarí, San.). From being specially sacred. Southern kind of Devanagry. See vol. I (49).——*Nundraus* (نندراج - nandráj, Hind.; నందరాజు - nandarádzu, Tel.). The joyful king. Proper name [peyar].——*Nundy* (नन्दि - nandi, San.). Means the happy one. μινώταυρος of Greeks; Apis of Egyptians. Otherwise Shaulancauyanan, meaning hall + resident; Taundava taulican, meaning dance + beater, or who beats time to the dance of shiva; Basava and Rishabham. The snow white bull, the attendant and favorite vehicle [vauhan] of Shiva [q.v.]. It is always represented on a pedestal, crouching in front of Sheiva fanes; the head turned towards the small door of the shrine, as if waiting to receive its rider, the deity. Evidently a relic of bull-worship. Compare the calves at Dan and Bethel; the molten calf at Sinai; the Apis and Mnevis of Egypt; Mithra's bull in Persia; in all these cases, worshipped as the symbol of the presence of a power higher than itself. The importance of cattle [maud] to primitive life probably gave rise first to bull-worship. In the Institutes of Menoo [q.v.], chapter 8, vol. 16, the divine form of justice is represented as vrisham or a bull. The bull itself is worshipped among the Lingadhauries [lingayet] of Mysore under the name of Basava [q.v.]. Nundy has had avatars. When Nundy, by assuming a likeness to Shiva, caused a blush on the cheeks of Parvaty [q.v.], Shiva sent his vehicle down to earth to do penance; hence the mountain Nundidroog. Another mission to earth was in the person of the elder Basava. Though the cow [pashoo] is a sacred animal, she does not share the special worship paid to the bull. See vol. I (72), (86). Nundy also means the first, sixth or eleventh day [tity] of a fortnight [pacsham] considered as three auspicious days. Cf. Jayay.

NUNDIAUL (నంద్యాల - nandyála, *Tel.* nandyál*). From (nandí, san. the bull of shiva + álaya, san. abode) [nund].——(1) Talook, Kurnool district. Tahsildar's pay Rs. 200. Area 854 square miles. Population 96,292. Language Teloogoo and Hindostany. Centre of district. Bounded N. by Nundicotcore talook; E. by Nullamullays, which separate it from Cumbum talook; W. by Yerramalas; S. by Coilcoontla and Sirwail

talooks. Formed a portion of the old Gundicote province. Is the N. part of Coondair valley. Being shut in by hills and jungles, is unhealthy. The Coondair valley is extensive flat open country, covered with black-cotton soil [regar], deposited on a stratum of slaty limestones [choonam cull] and shales. The rest of talook is mountainous tract forming a plateau on Yerramalas. Chief products are arikeloo [varagoo], paddy [q.v.], great millet [cholum], Italian millet [tinay], horse-gram [madras horse-gram]; orchard and garden produce, tobacco [pogauk], linseed [alsee], castor-oil [aumanac] seeds, indigo [q.v.] and cotton [q.v.]. Grain exported by rail to Bellary, &c. Piece-goods, dried cocoanuts [q.v.], jaggery [q.v.], and betel [q.v.] nuts imported from Bellary. Trade in grain and tobacco with Bestavaurpettah in Cumbum talook and Vinoocondah in Kistna district. Jaggery [q.v.] and coarse sugar [q.v.] are manufactured at Cadamalcaulwa, Caulwa and Nundiaul; the greatest portion of it is consumed locally while a portion finds its way to Kurnool. China ware, European goods and European liquors are brought down by rail either from Bellary or Madras. Gingelly [q.v.] oil and lamp oil [q.v.] are manufactured by indigenous oil-mill owners. Cotton tape [navaur] for cots made in the talook. Mats [boriyah] at Goracull out of Toonga [coray] reed, by side of Tammarpully channel. Merchants from Proddootore in Cuddapah district, &c., have established indigo manufactories. Steatite [sowcauracull] grey and green is quarried in Mooddavaram and Balapalapully, hamlet of Coolmoolapully and exported to Madras and Hyderabad. Close-grained grits quarried out in plateau of Gany and worked into grinding stones by Woddars. Formerly diamond [vajram] mines at Mooddavaram and Baswapore. Timber exported by rail to Bellary, and Putticondah talook. Salt imported from Nellore district. Lubbays from south and Cuddapah mussalman merchants buy hides [chamrah] from local butchers and chucklers [q v.] and export to Madras and Cuddapah. Ghee [q.v.] to Bellary. In 1843 Mauritius sugar-cane [q.v.] was introduced and has nearly supplanted the native cane, now confined to Cadamalcaulwa at foot of hills. Chief river is Coondair fed by Cauly and Palaur from Nullamullays and Munnair from Yerramalas. Largest tank is Nundiaul fed by Palaur, and by Mahanundy. Kurnool-Cuddapah irrigation canal, runs through talook. Camping grounds:—Caulwa boogga, Chindoocore, Gauzoolapully, Tammirauzpully. Places of archæological interest:—Ayalore, Ayyavaury codore, Baitamcheroo, Bandy atmacore, Baswapore, Bilcala goodoor, Boojanore, Bramhanapully, Cadamalcaulwa, Carimaddoola, Caulwa, Caunaula, Channakkapully, Chindoocore, Chintalapulley, Conatalapaud, Condazootoor, Cowlore, Gadigeyraivla, Gadivaimla, Galchenpollem, Gany, Gonavaram, Goontanaul, Goracull, Mahanundy, Mittanaula, Narayanapooram, Nundiaul, Parmatore, Paunem, Paurnapully, Peddacaunala, Pesaravye, Polore, Poolimuddy, Santa zootoor, Shekoonaula, Togarchaid, Worvacoll, Yerragoontla. Principal Trig. stations:—Goommanacondah, Goondlabramheshwar. The leading places, &c., in the talook are the following.——*Ayalore* (అయలూరు - áyalúru, Tel.). From (ayyalu, tel. proper name + úru, tel. village). Sanscrit name (shat'hakópapura), meaning vishnoo, the foe of rogues + town. Village; pop. 1,340; acres 4,048; lat. 15° 27'; long. 78° 34'; from Kurnool S.E. 41 miles; from Nundiaul S. 4 miles. Shiva temple. Chola inscription. In A.D. 1493 the village was granted as Sarwa maunyam [q.v.] by Narsimha deva of Vijianugger.——*Baitamcheroo* (బేతంచెరువు - bétamcheruvu, Tel.). From (bettamu, tel. cane, calamus rotang, linn. + cheruvu, tel. tank). Village, B.K.S. railway station; pop. 1,776; acres 6,353; lat. 15° 27'; long. 78° 11'; from Kurnool S.S.E. 27 miles; from Nundiaul W. 23 miles. Vijianugger inscriptions. Caves in neighbourhood. Situated on a pleateau. Ruined fort. Fair on Sunday.——*Bandy atmacore* (బండిఆత్మకూరు - bandiátmakúru, Tel.). From (bandi, tel. cart + átmakúru, tel. place so called). Village, Railway station; lat. 15° 35'; long. 78° 34'; pop. 2,416; from Kurnool E. 35 miles; from Nundiaul N.E. 7 miles. Three miles east of route from Cuddapah to Kurnool.——*Baswapore* (బసవపురము - basavapuramu, Tel.). From (basava, can. the bull-god + pura, san. town). Sanscrit name (mahánandí), meaning the great nundy, the bull-god. Village; pop. 273; acres 869; lat. 15° 25'; long. 78° 41'; from Kurnool S.E. 48 miles; from Nundiaul E. 10 miles. Once famous for lead [eeyam] and diamond [vajram] mines. Former residence of a Poligar [q.v.]. Baupoo naidoo, the ancestor of the Poligars of Baswapore, Poollalcheroo and Bolloopully, served under the Vijianugger royel and obtained district of Dornaul in jagheer [q.v.]. About 1,712 pollem was divided among the three branches of family and in 1709 Baswapore and Bolloopully were annexed to Kurnool, while Poollalcheroo remained under Cuddapah. Baswapore division resumed by Munro. At foot of Nullamullay hills and principal timber mart.——*Bilcala goodoor* (బిలకలగూడూరు - bilakalagúdúru, Tel.). From (bilakamu, tel. bamboo work + gúdúru, tel. place so called). Village; pop. 1,022; acres 4,052; lat. 15° 41'; long. 78° 29'; from Kurnool E.S.E. 28 miles; from Nundiaul N. 14 miles. Inscription of Warangal dynasty, dated A.D. 1307.——*Caulwa* (కాలవ - kálava, Tel.). See sep. title.——*Coondair* (కుందేరు - kundéru, Tel.). See sep. title.——*Galchenpollem* (గాలిచెన్నయపాలెము - gálichennayapálemu, Tel.). From (gálichennaya, tel. proper name + pálemu, tel. fortified village). Village; pop. 1,078; acres 4,768 lat. 15° 37'; long. 78° 37'; from Kurnool E.S.E. 38 miles; from Nundiaul N. 11 miles. South-east are three old temples. Irrigated by four tanks.——*Gany* (గని - gani, Tel.). Means a mine. Village; pop. 1,790; acres 10,163; lat. 15° 40'; long. 78° 22'; from Kurnool E.S.E. 21 miles; from Nundiaul N.W. 17 miles. Near Goommanacondah hill. Good tobacco [pogauk].——*Gaulicondah* (గాలికొండ - gálikonda, Tel.). See sep. title.——*Gauzoolapully* (గాజులపల్లి - gádzulapalli, Tel.). From (gádzu, tel. glass bracelet + palli, tel. village). Village; pop. 943; acres 3,743; lat. 15° 25'; long. 78° 40'; from Kurnool S.E. 47 miles; from Nundiaul E. 10 miles. Irrigated by spring channel on the road to Cumbum. Tamarind [q.v.] tope [q.v.] is best camping ground in talook.——*Goommanacondah* (గుమ్మనకొండ - gummanakonda, Tel.). From (gummana, tel. proper name + konda, tel. hill). Trig. station; lat. 15° 38' 18·94"; long. 78° 20' 05·61"; height 1,567 feet; from Gany S.W. 2 miles; from Nundiaul N.W. 17 miles.——*Goondlabramheshwar* (గుండ్లబ్రహ్మేశ్వరం - gundlabrahméshvaram, Tel.). From (gundu, tel. rock + brahma, san. the god + íshvara, san. lord). Hill; lat. 15° 37'; long. 78° 46'; height 2,964 feet; from Kurnool E.S.E. 47 miles; from Nundiaul E.N.E. 18 miles. One of highest peaks of Nullamullays. The plateau is reached from Nundiaul and Velgode. Trig. station in lat. 15° 36' 58·94"; long. 78° 45' 53·61"; height 2,964 feet; from Narayanapooram E.S.E. 9 miles; from Nundiaul E.N.E. 18 miles.——*Mahanundy* (మహానంది - mahánandi, Tel.). From (mahá, san. great + nandi, san. the bull of shiva). Place of pilgrimage; lat. 15° 28'; long. 78° 40'; from Kurnool E.S.E. 45 miles; from Nundiaul E. 9½ miles. Uninhabited in Nullamullay forests, with tepid spring. The formation is altered sandstone [manal cull] and limestone [choonam cull]. Once famous diamond and lead mines of Baswapore are in vicinity. Annual festival on Shivarautry [pundigay, 6a]. Temple to Mahanundeshwara sawmy with five inscriptions. The temperature of spring is about 89°. The water reddens litmus paper; oxalate of ammonia renders it slightly milky. The channel [q.v.] from the spring irrigates a large area.——*Munnair* (మన్నేరు - mannéru, Tel.). From (mannu, tel. sand + éru, tel. river). River. Tributary of the Coondair. Rises in the Yerramalas.——*Nullamullay* (నల్లమల - nallamala, Tel.). See sep. title.——*Nundiaul* (నంద్యాల - nandyála, Tel.). See below.——*Nundicanama* (నందికనమ - nandikanama, Tel.). See sep. title.——*Omcauram* (ఓంకారం - ómkáram, Tel.). From (ómkára, san. the symbol of the trinity). Place of pilgrimage. Tepid spring in Nullamullay forest like Mahanundy. Bathing makes barren women bear.——*Paunem** (పానెము - pánemu, Tel. pánem *). From (páni, san. hand); after its tutelar deity, paunikeshwaran or hand-god, shiva. Village, B.K.S. railway station, Hills; pop. 3,706; acres 11,756; lat. 15° 31'; long. 78° 24'; from Kurnool S.E. 29 miles; from Nundiaul W.N.W. 9 miles. Village at foot of Yerramalas, on Cuddapah-Kurnool road. Residence of a Beydar [veddah] poligar [q.v.]. Temple of Paunikeshwarasawmy. Old fort. Irrigated by two tanks.——*Peddacaunala* (పెద్దకానల - peddakánala, Tel.). From (pedda, tel. great + kána, tel. forest). Sanscrit name (krishnarájasamudra), meaning krishnaroya + ocean. Village; pop. 1,329; acres 5,991; lat. 15° 25'; long. 78° 30'; from Kurnool S.E. 39 miles; from Nundiaul S.S.W. 5 miles. Inscriptions. Tank. On road from Nundiaul to Coilcoontla.——*Polore* (పోలూరు - pólúru, Tel.). From (póli, tel. proper name + úru, tel. village). Village; pop. 1,879; acres 3,841; lat. 15° 32'; long. 78° 29'; from Kurnool S.E. 32 miles; from Nundiaul N.W. 5 miles. Residence of surviving representative of Handey poligar family, who, as zemindars of Nundiaul and Anantapore, played an important part in the local history of seventeenth century. Roman catholic mission station.——*Poolimuddy* (పులిమద్ది - pulimaddi, Tel.). From (puli, tel. sour + maddi, tel. terminalia arjuna, bedd.). Village; pop. 1,018; acres 3,061; lat. 15° 32'; long. 78° 30'; from Kurnool S.E. 34 miles; from Nundiaul N.N.W. 4 miles. Has good stone quarries.——*Rungapooram* (రంగాపురం - rangápuram, Tel.). From (rangadu, tel. proper name + pura, san. town). Village, Railway station; pop. 2,080; acres 9,464; lat. 15° 25'; long. 78° 07'; from Kurnool S. 29 miles; from Nundiaul W.S.W. 29 miles.——*Vandootla* (వందుట్ల - vandutla, Tel.). From (vandi, san. panegyrist + unta, tel. residence). Village, Plateau; lat. 15° 36'; long. 78° 23'; from Kurnool S.E. 24 miles; from Nundiaul N.W. 13 miles. On Paunem hills. Long narrow wall of quartz [vencull] joins its northern end with the plateau of Chintalapulley.——*Worvacoll* (వొరవకొల్లు - vóravakollu, Tel.). From (varava, tel. channel + kollu, tel. pool). Village; pop. 1,358; acres 6,871; lat. 15° 41'; long. 78° 13'; from Kurnool S.E. 13 miles; from Nundiaul W. 24 miles. Old fort. Ancient temple of Keshavasawmy. Two temples built by Goozeratty diamond merchants. On high road from Kurnool to Nundiaul.——*Yerramala* (ఎర్రమల - erramala, Tel.). See sep. title.

(2) Village, Head-quarters of Tahsildar, Divisional officer, District moonsif and Deputy conservator of Forests, Railway station; Kurnool dist., Nundiaul tal.; pop. 10,737; acres 11,912; lat. 15° 29'; long. 78° 32'; from Cumbum W.S.W. 41 miles; from Kurnool S.E. 38 miles; from Madras N.W. 203 miles; from Pyaupaly E.N.E. 52 miles. On E. bank of Coondair, rising in importance. The houses are built of soft purple shales, which crumble to pieces during the rains. Nine Sheivite

pagodas [q.v.]. Temples of Vencateshwarasawmy, Bramhaunandeshwara sawmy, and Mullicarjoonan. Noted for lacquer-work. Largest fair in district on Saturday. Tank built in twelfth century by Chola prince.

NUNDICOTCORE (నందికొటుకూరు - nandikótukúru, Tel. nandikótkur *). From (nandi, san. the bull of shiva + kóta, tel. fort + úru, tel. village) [nund].——**(1)** Talook, Kurnool district. Tahsildar's pay Rs. 175. Area 1,322 square miles. Population 88,560. Language Teloogoo. Largest talook. N. of district. Bounded N. by Kistna, E. by Nullamullays, S. by Nundiaul talook, and W. by Ramalcottah talook and Toongabudra. Nearly half covered with hills and jungles, near which extensive pasture lands. Climate unhealthy. Through middle runs great water shed between Kistna and Pennair, and it was by a heavy cutting across it at Mittacoondala through purple shale rocks that the waters of the Toongabudra were turned into the valley of the Coondair. Soil is black 50 per cent., loamy 37 per cent. and red 13 per cent. chiefly in the north and near the hills. Principal crops are arikeloo [varagoo], paddy [q.v.], great millet [cholum], Italian millet [tinay], horse-gram [q.v.], green gram [q.v.], tobacco [pogauk], chillies [q.v.], omam [ajwaun], castor-oil [aumanac] seeds, indigo [q.v.], cotton [q.v.] and mustard [rayaun]. The principal article of industry is cumblies [q.v.] of wool, very thick in texture and durable. Commerce is confined to export of Omam [ajwaun] and timber and import of lamp-oil [q.v.] from Nizam's dominions. Toongabudra and Kistna drain almost the whole talook. Bhavanausy is principal hill stream. Kurnool-Cuddapah irrigation canal runs through talook. In only eleven villages Boyaraivla, Cooroocoonta, Cottapully, Daumgatla, Goovvalcoonta, Indreshwaram, Modecoor, Moosalimadoogoo, Rampore, Shivapooram, and Velgode, there are tanks. Camping grounds:—Atmacore, Gaudideymadoogoo, Mandlem, Nundicotcore, Velgode, Zootoor. In Joopaud, Pagidyaula and Velpoonore there are Canal bungalows available for Europeans. Places of archæological interest:—Alaganore, Allotta, Anantapooram, Atmacore, Bhaunmookkala, Bijnivaimla, Bollavaram, Boyaraivla, Bramhana cotacore, Cadoomore, Cherookcherla, Chintapully, Collamnullah, Conidyaula, Cooroocoonta, Cunnamadacala, Daumgatla, Doorgam, Ganapooram, Gaudideymadoogoo, Indreshwaram, Iscala, Jalacanore, Kaidavaram, Maddigootta, Mandlem, Midootore, Mittacoondala, Moosalimadoogoo, Moravacondah, Naugalooty, Naugatore, Nootanapulley, Nundicoonta, Nundicotcore, Pagidyaula, Pasoopoola, Pauroomantsala, Pautacote, Peddachervoo, Sangameshwaram, Shikharam, Shivapooram, Shuncaraneinipulley, Siddapore, Siddepully, Siddeshwaram, Srisheilam, Talamoodipy, Tarigoppoola, Tartoor, Vaddeymaun, Vaimpenta, Veerabhadra droog, Yellagode, Yellaula, Yerramatam, Zootoor. Principal trig. stations:—Peddacoodwa, Siddapore. The leading places, &c., in the talook are the following.——*Atmacore* (ఆత్మకూరు - átmakúru, Tel.). See sep. title.——*Beilooty* (బైలూటి - bailúti, Tel.). From (bailu, tel. open plain + úru, tel. village). Village; lat. 15° 52′; long. 78° 45′; from Kurnool E. 43 miles; from Nundicotore E. 30 miles. Cluster of Chentsoo huts at W. entrance of Muntraula canama [ghaut]. Halting stage.——*Bhavanausy* (భవనాశి - bhavanáshi, Tel.). From (bhava, san. birth + násha, san. destruction). River; Tributary of Kistna. Rises in Nullamullays near ruined village of Siddapore and running by Atmacore, Pautacote and Zootoor empties itself into Kistna at Sangameshwaram.——*Chundragoortypatnam* (చంద్రగూర్తిపట్నము - chandragúrtipatnamu, Tel.). From (chandra, san. moon + gúrti, san. praise + pattana, san. town). Lat. 16° 10′; long. 78° 56′; from Kurnool E.N.E. 59 miles; from Nundicotcore E.N.E. 46 miles. Site of ruined city on north of Kistna which separates it from the Srisheilam. A legend is related about this place of a king who wished to commit incest and hence its ruin. The Chentsoos [q.v.] who live near Srisheilam say that at nights sounds like the bustle of a town are heard.——*Gaudideymadoogoo* (గాడిదెమడుగు - gádidemadugu, Tel.). From (gádide, tel. ass + madugu, tel. pond). Village; pop. 2,125; acres 5,352; lat. 15° 47′; long. 78° 11′; from Kurnool E.S.E. 7 miles; from Nundicotcore W.S.W. 10 miles. Vijianugger inscription dated A.D. 1547. Shiva temple with inscription dated A.D. 1551.——*Iscala* (ఇస్కల - iskala, Tel.). From (isuka, tel. sand). Village; pop. 1,219; acres 2,401; lat. 15° 51′; long. 78° 34′; from Kurnool E. 31 miles; from Nundicotcore E. 17 miles. Temple of Naugeshwaran very old. Ruined temple of Anjaneyan. Mosque 200 years old. Vijianugger inscription dated A.D. 1562.——*Joty canama* (జోతికనమ - jótikanama, Tel.). See sep. title.——*Kistna* (కృష్ణ - krishna, Tel.). See sep. title.——*Midootore* (మిడుతూరు - midutúru, Tel.). From (midata, tel. locust + úru, tel. village). Village; pop. 2,610; acres 9,148; lat. 15° 46′; long. 78° 20′; from Kurnool E.S.E. 16 miles; from Nundicotcore S. 6 miles. Vijianugger inscriptions dated A.D. 1547, 1553, 1561 and 1581.——*Moosalimadoogoo* (ముసలిమడుగు - musalimadugu, Tel.). From (mosali, tel. crocodile + madugu, tel. pond). Village; pop. 983; acres 4,205; lat. 15° 58′; long. 78° 29′; from Kurnool N.E. 28 miles; from Nundicotcore N.E. 13 miles. Strong fort, attacked in seventeenth century by Cootb shahy prince of Golcondah, on account of diamond [vajram] mines then worked. For a time residence of several Pataun [q.v.] families. Inscriptions. Trig. survey station near.——*Moravacondah* (మొరవకొండ - moravakonda, Tel.). From (morapa, tel. gravel + konda, tel. hill). Village, Hill; pop. 911; acres 6,549; lat. 16° 01′; long. 78° 19′; from Kurnool N.E. 19 miles; Nundicotcore N. 10 miles. Three deserted temples and an old mosque [musjid]. Ruins of old fort dismantled in 1839 when Kurnool was annexed.——*Muntraula canama* (మంత్రాలకనమ - mantrálakanama, Tel.). See sep. title.——*Nullamullay* (నల్లమల - nallamala, Tel.). See sep. title.——*Nundicotcore* (నందికొటుకూరు - nandikótukúru, Tel.). See below.——*Pautacote* (పాతకోట - pátakóta, Tel.). From (páta, tel. old + kóta, tel. fort). Village; pop. 1,755; acres 6,484; lat. 15° 57′; long. 78° 26′; from Kurnool E.N.E. 23 miles; from Nundicotcore N.E. 10 miles. Three deserted temples. Old fort originally built by colonists from Telingana about same time as Moosalimadoogoo, during Andhra [q.v.] period. Town once very large. Brass [pittalay] utensils and bells [ghantay] are made.——*Pedda coodwa* (పెద్దకుడువ - peddakuduva, Tel.). From (pedda, tel. great + kuduva, tel. mountain foot path). Trig. station; lat. 16° 01′ 01·94″; long. 78° 30′ 43·61″; height 2,070 feet; from Moosalimadoogoo N.E. 4 miles; from Nundicotcore N.E. 17 miles.——*Sangameshwaram* (సంగమేశ్వరం - sangaméshvaram, Tel.). See sep. title.——*Siddapore* (సిద్ధాపురం - siddhápuram, Tel.). From (siddha, san. saint + pura, san. town). Village; pop. 1,274; lat. 15° 54′; long. 78° 45′; from Kurnool E. 43 miles; from Nundicotcore E. 30 miles. In Nullamullay forests. Remains of bund of an immense tank which reaches S. to Velgode, 16 miles off. Naugalooty temple, 2½ miles N.E., is connected with Srisheilam, 15 miles away, by a stone-paved roadway, passing through Collam nullah. Several small shrines stand by roadside on way to Srisheilam. Trig. survey station in lat. 15° 55′ 46·94″; long. 78° 43′ 53·61″; height 2,064 feet; from Nundicotcore E.N.E. 29 miles; from Siddapore N.N.W. 3 miles.——*Srisheilam* (శ్రీశైలం - shríshailam, Tel.). See sep. title.——*Tartoor* (తర్తూరు - tartúru, Tel.). From (tariti, tel. sack cloth + úru, tel. village). Village; pop. 1,002; acres 5,470; lat. 15° 51′; long. 78° 22′; from Kurnool E. 18 miles; from Nundicotcore S.S.E. 4 miles. Old temple of Keshavasawmy. Another temple 400 years old. Annual festival to Rungasawmy. No proper temple for this god. The image is 6 inches high and made of wood covered with gold armour. It is in a Caupoo's house which is frequented by worshippers.——*Toongabudra* (తుంగభద్ర - tungabhadra, Tel.). See sep. title.——*Vaddeymaun* (వడ్డెమాను - vaddemánu, Tel.). From (vadde, tel. member of the caste of earth-diggers + mánu, tel. tree). Village; pop. 1,459; acres 5,831; lat. 15° 51′; long. 78° 15′; from Kurnool E. 11 miles; from Nundicotcore W. 4 miles. Vijianugger inscriptions of A.D. 1563 and 1544.——*Veerabhadra droog* (వీరభద్రదుర్గము - vírabhadradurgamu, Tel.). From (vírabhadra, san. distinguished hero, epithet of shiva + durga, san. fort). Village, Hill; lat. 16° 04′; long. 78° 29′; from Kurnool N.E. 30 miles; from Nundicotcore N.E. 18 miles.——*Velgode* (వెలుగోడు - velugódu, Tel.). See sep. title.——*Velgoty canama* (వెలుగోటికనమ - velugótikanama, Tel.). See sep. title.——*Velpoonore* (వేల్పునూరు - vélpunúru, Tel.). From (vélpu, tel. angel + úru, tel. village). Village; pop. 1,966; acres 7,171; lat. 15° 42′; long. 78° 33′; from Kurnool E.S.E. 32 miles; from Nundicotcore S.E. 20 miles. Ceremonies annually performed at temple of Cauly [q.v.] ammah, when children are thrown over bushes of thorn.——*Yerramala* (ఎర్రమల - erramala, Tel.). See sep. title.——**(2)** Village, Tahsildar's head-quarters; Kurnool dist., Nundicotcore tal.; pop. 2,753; acres 5,714; lat. 15° 52′; long. 78° 19′; from Cumbum W. 59 miles; from Kurnool E. 14 miles; from Madras N.W. 232 miles; from Nundiaul N.N.W. 30 miles; from Pyaupaly N.N.E. 55 miles. Eight deserted Shiva temples. Idol of Hanooman [q.v.] 11½ feet high which was left untouched by the Nawaubs of Kurnool.

NUNDIGAUMA (నందిగామ - nandigáma, * *Tel.*). From (nandi, san, shiva's bull + gráma, san. village) [nund]. Sanscrit name (nandigráma), meaning same.——**(1)** Talook, Kistna district, Tahsildar's pay Rs. 150. Area 531 square miles; pop. 126,701. Language Teloogoo. Lies west of the Condapully range between the Kistna and the Nizam's dominions. N. of district. Bounded north Nizam's dominions, east Bezwada talook, south Suttenapully talook, west Suttenapully talook and Nizam's dominions. Includes the two detached zemindarries of Lingagherry and Moongaula. The road from Bezwada to Hyderabad traverses the talook from east to west. The diamond [vajram] producing villages of Partiaul, Codavettycull, and Oostepully, on the left bank of the Kistna, were reserved by the Nizam when the Condapully circar was ceded to the East india company in 1766. In this talook there are very many stone circles [azhauram] and various spots supposed to contain remains of Booddhist monuments. Physical aspect is plain interspersed by hills. Regar [q.v.] soil predominates. Agriculture and silk-weaving industries. Commerce in silk cloths, cotton [q.v.] and lamp-oil [q.v.] seeds. The Moonair with its tributary the Varair and also the Palair flow from the north through this talook and enter the Kistna. Irrigation from rain-fed tanks [q.v.] and a few channels [q.v.] from the Moonair. Camping grounds:—Comarabanda, Cunchacacherla, Maudhavaram, Moongaula, Nawaubpett, Nundigauma, Shermahomedpett. Places of archæological interest:—Adivy rowlapaud,

Anoomanchipully, Rabbellapaud, Bheemavaram, Boodavauda, Conacanchy, Cowtavaury agrahauram, Cunchacacherla, Cunchala, Goodimetla, Jayantipooram, Joojjoor, Juggayapett, Malacanpooram, Mooctyaula, Moonagaulapully, Mooppaula, Nawaubpett, Partiaul, Peddavaram, Penooganchiprole, Pokkoonore, Polampulley, Ramreddipully hill, Rauvairila, Rauvoolapaud, Sowtapully, Vedaudry. Trig. stations:—Chintalpaud, Joojjoor droog, Rungapooram, Zonnalagudda. The leading places, &c., in the talook are the following.——*Boodavauda* (బూదవాడ - búdaváda, Tel.). From (búda, tel. milk-vessel + váda, tel. village). Village; pop. 291; acres 5,035; lat. 16° 53′; long. 80° 04′; from Masulipatam W.N.W. 84 miles; from Nundigauma W. 18 miles. Ruins of an ancient village inhabited by Booddhists. Stone circle and dolmens [coday cull]. East is a temple of Mootyaulamman.——*Chintalpaud* (చింతలపాడు - chintalapádu, Tel. chintalapád*). From (chinta, tel. tamarind, tamarindus indica, linn. + pádu, tel. village). Trig. station; lat. 16° 39′ 53·07″; long. 80° 17′ 24·55″; height 194 feet; from Nundigauma S.S.W. 8 miles; from Yaitore N.W. 4 miles.——*Conacanchy* (కోనకంచి - kónakanchi, Tel.). From (kóna, tel. hill valley + kanchi, tel. place so called). Village; pop. 1,692; acres 4,664; lat. 16° 49′; long. 80° 15′; from Masulipatam N.W. 73 miles; from Nundigauma N.W. 7 miles. Inscriptions.——*Cunchacacherla* (కంచకచెర్ల - kanchakacherla, Tel.). See sep. title.——*Joojjoor droog* (జుజ్జూరుదుర్గము - dzuddzúrudurgamu, Tel.). From (dzudzuru, tel. cluster + durga, san. hill). Trig. station; lat. 16° 42′ 25·54″; long. 80° 30′ 35·09″; height 1,791 feet; from Joojjoor S.E. 4 miles; from Nundigauma E. 13 miles.——*Juggayapett* (జగ్గయ్యపేట - jaggayyapéta, Tel.). See sep. title.——*Kistna* (కృష్ణ - krishna, Tel.). See sep. title.——*Lingagherry* (లింగగిరి - lingagiri, Tel.). See sep. title.——*Mooctyaula* (ముక్త్యాల - muktyála, Tel.). From (mukti, san. absolution + álaya, san. abode). Village; pop. 696; acres 3,700; lat. 16° 49′; long. 80° 07′; from Masulipatam W.N.W. 82 miles; from Nundigauma W. 14 miles. On the Kistna. Residence of the zemindar of Chintapully. Ancient village site with remains of foundation of temple. Close by are dolmens [coday cull] and stone circles [azhauram]. Five inscriptions, two in the Vishnoo and three in the Shiva temple.——*Moonair* (మునేరు - muniyéru, Tel.). See sep. title.——*Moongaula* (మునగాల - munagála, Tel.). See sep. title.——*Nundigauma* (నందిగామ - nandigáma, Tel.). See below.——*Palair* (పాలేరు - páléru, Tel.). See sep. title.——*Partiaul* (పర్తియాల - partiyála, Tel.). See sep. title.——*Penooganchiprole* (పెనుగంచిప్రోలు - penuganchiprólu, Tel.). From (penu, tel. great + kancha, tel. hedge + prólu, tel. town). Village; pop. 3,959; acres 9,588; lat. 16° 54′; long. 80° 17′; from Masulipatam N.W. 77 miles; from Nundigauma N.N.W. 9 miles. Inscription dated 1620.——*Raghavapooram* (రాఘవపురము - rághavapuramu, Tel.). From (rághava, san. ráma the hero + pura, san. town). Village; pop. 1,504; acres 3,291; lat. 16° 46′; long. 80° 21′; from Masulipatam N.W. 66 miles; from Nundigauma E. 2 miles. Remains of a fort built in 1686 by Vasireddy chowdaury ramayya. Church mission society station with about eight hundred Christians. Ramreddipully hill lies north.——*Rungapooram* (రంగాపురము - rangápuramu, Tel.). From (ranga, san. the god + pura, san. town). Trig. station; lat. 16° 46′ 16·92″; long. 80° 21′ 22·04″; height 574 feet.——*Zonnalagudda* (జొన్నలగడ్డ - dzonnalagadda, Tel.). From (dzonna, tel. millet, sorghum vulgare, pers. + gadda, tel. mound). Trig. station; lat. 16° 51′ 38·52″; long. 80° 21′ 22·73″; height 564 feet; from Zonnalagudda W. 1½ miles; from Nundigauma N.N.E. 6 miles.——**(2)** Village, Talook head-quarters, Sub-registry office; Kistna dist., Nundigauma tal.; pop. 3,064; acres 6,987; lat. 16° 46′; long. 80° 20′; from Bezwada N.W. 28 miles; from Guntoor N.N.W. 35 miles; from Madras N. 254 miles; from Masulipatam N.W. 66 miles; from Vinoocondah N.E. 60 miles. Formerly zemindarry [q.v.] village.

NUNDOO (कर्कटक - karkataka, *San.*; سرطان - sartán, *Ar.*; خرچنگ - kharchang, *Pers.*; کیکڑا - kekrá, *Hind.*; ನಳ್ಳಿ - nalli, *Can.*; ఎండ్రకాయ - endrakáya, *Tel.*; ഞണ്ട് - ñantu, *Mal.*; நண்டு - nandu, *Tam.*). Title from tamul. San. from (karka, san. beauty). Ar. from (surata, ar. to swallow). Pers. from (khar, pers. rough + chang, pers. claw). Hind. from (karkata, san. crab). Can. from (nali, can. smooth). Tel. from (endu, tel. to dry + káya, tel. fruit); from the dry appearance. Crab. Cancer pagurus of naturalists [jantoo, kavachiny]. The one commonly met with here differs from the English black-clawed crab; being smaller, and the claws not so dark-colored. Good and edible at proper season on Coromandel coast [q.v.]. Not used by veidyans [q.v.]. The following are the chief kinds.——*Cadal nundoo* (கடல்நண்டு - kadalnandu, Tam.). From (kadal, tam. sea). Sea-crab.——*Cadookye nundoo* (கடுக்காய்நண்டு - kadukkáynandu, Tam.). From (kadukkáy, tam. indian gallnut). Small crabs size of gallnuts [chebulic myrobalan], used in broth medicinally.——*Coola nundoo* (குளநண்டு - kulanandu, Tam.). From (kulam, tam. tank). Small tank crab.——*Neelacauly nundoo* (நீலக்காலிநண்டு - nílakkálinandu, Tam.). From (nílam, tam. blue + kál, tam. leg). Blue legged.——*Orcaul nundoo* (ஒருகால்நண்டு - orugálnandu, Tam.). From (oru, tam. one + kál, tam. leg). With one claw only.——*Pee nundoo* (பீநண்டு - pínandu, Tam.). From (pí, tam. dung). Common, found in holes in moist ground.——*Shembauray nundoo* (செம்பாறைநண்டு - shembárainandu, Tam.). From (shem, tam. red + párai, tam. rock). Large and red.——*Tillay nundoo* (தில்லைநண்டு - tillainandu, Tam.). From (tillai, tam. the tree, excæcaria agallocha, müller). Black, found under the Tillay [tiger's milk] tree on the seashore.——*Vayal nundoo* (വയൽഞണ്ട് - vayalñantu, Mal.; வயல்நண்டு - vayalnandu, Tam.). From (vayal, tam. field). Fresh water, found in the fields. Also called Cazhany nundoo.——*Vellay nundoo* (வெள்ளைநண்டு - vellainandu, Tam.). From (vellai, tam. white). Whitish. Also called Paul nundoo or Milk-crab, from its color.

NUNJOO (நஞ்சு - nanju, *Tam.*). Poison. Frequently appears in proper names as a contraction for Nunjoondan or shiva, the poison-eater.——*Nunjammah* (ನಂಜಮ್ಮ - nanjamma, Can.). From (nanju, can. short for nanjundappa, can. shiva, the poison lord + amma, can. mother, feminine suffix, titular affix). Familiarly Nunja, Nunjoo. Hill-tribe female proper name [peyar].——*Nunjjappan* (ನಂಜಪ್ಪ - nanjappa, Can.). From (nañju, can. poison + appa, can. father, masculine suffix). Shiva, the poison lord, as having drunk poison [neelacuntan]. Familiarly Nunja, Nunjoo. Hindoo 2nd or pers. name [peyar].——*Nunjoondam* (खरपेंढरी - kharapéndharí, Mahr.; ಬೊಂಗೆರಿ - bongeri, Can.; ఉడిమంజ - udimanja, Tel.; ବମେନିୟା - bameniyá, Oor.; நஞ்சுண்டமரம் - nañjundamaram, Tam.). Title from tamul. Mahr. from (khara, mahr. dirt + péndharí, mahr. the shrub). Can. from (bonge, can. hole). Tam. from (nañju, tam. poison + un, tam. to eat + maram, tam. tree). Botanically Gardenia [gandharajah] turgida, roxb., rubiaceæ [vricsham, 71]. Deciduous; branches rigid, robust; bark pale; leaves 1-4 inches; narrowed into a short petiole, pale when dry; stipules triangular, caducous; calyx of male flower small ⅛ inch; mouth wide truncate; of female flower ⅓-⅔ inch, limb shortly campanulate; teeth oblong, or sub-spathulate, foliaceous; corolla white, fragrant; tube slightly dilated upwards, ⅓-½ inch long; limb 1 inch diameter; fruit 1-3 inches, ovoid, or globose, smooth, pericarp thick; endocarp woody, shining within; plancentas five or six. Small armed tree or large shrub, flowers large white fragrant; wood close-grained, hard white with a purplish tinge, no heart-wood; annual rings indistinct; good but splits and cracks in seasoning; there is a variety montana.——*Nunjoondan* (ನಂಜುಂಡ - nanjunda, Can.). From (nañju, can. poison + unnu, can. to eat). Shiva, the poison-eater [neelacuntan], who is worshipped in this character as Nunjoondeshwaran in Nanjangode in mysore. Familiarly Nunjoo, Nunja. Hindoo 2nd or pers. name [peyar].——*Nunjooraikandan* (நஞ்சுறைக்கண்டன் - nañjuraikkandan, Tam.). From (above + urai, tam. abode + kant'ha, san. neck). Shiva [neelacuntan].

NUNNILAM (நன்னிலம் - nannilam,* *Tam.*). From (nal, tam. good + nilam, tam. soil) [nul].——**(1)** Talook, Tanjore district. Tahsildar's pay Rs. 250. Area 293 square miles. Population 215,907. Language Tamul. Inland centre part of district. Boundaries; north Mayavaram talook, east Caricaul territory, south Negapatam and Munnargoody talooks, west Combaconam talook. Flat level. Soil, black clayey. Agriculture and cloth weaving. Irrigation by Arasilaur, Moodicondanaur, Prauvidayanaur, Trimalrajanaur, Valappaur, Vettaur. Places of archæological interest:—Covilputt, Nunnilam, Shreevaunjyam, Teevangoody, Tirvilimooyalay, Tricalavore, Trichengauttangoody, Tricunnamangay, Tricunnapooram, Tripoogalore. The leading places, &c., in the talook are the following.——*Autalaiyore* (ஆத்தலையூர் - áttalaiyúr, Tam.). From (á, tam. cow + talai, tam. field + úr, tam. village). Village; pop. 1,621; acres 760; lat. 10° 53′; long. 79° 43′; from Nunnilam E. 4 miles; from Tanjore E.N.E. 43 miles.——*Codavausal* (குடவாசல் - kudavásal, Tam.). See sep. title.——*Coolicaray* (குளிக்கரை - kulikkarai, Tam. kulikarai*). From (kuzhi, tam. hollow + karai, tam. boundary). Village, Railway station; pop. 587; acres 867; lat. 10° 46′; long. 79° 38′; height 47 feet; from Nunnilam S.S.W. 8 miles; from Tanjore E. 29 miles.——*Coondalore* (குந்தளூர் - kúndalúr, Tam.). From (kúndal, tam. palmyra leaf + úr, tam. village). Village; pop. 1,016; acres 994; lat. 10° 56′; long. 79° 35′; from Nunnilam W.N.W. 7 miles; from Tanjore E.N.E. 28 miles.——*Cundramaunicam* (கண்டராமாணிக்கம் - kandaramánikkam, Tam.). From (kandu, tam. found + edutta, tam. taken + mánikkam, tam. gem). Village; pop. 1,435; acres 1,241; lat. 10° 55′; long. 79° 34′; from Nunnilam W.N.W. 7 miles; from Tanjore E.N.E. 27 miles. An old Vishnoo temple.——*Moodicondaun* (முடிகொண்டான் - mudigondán, Tam.). From (mudi, tam. crown + kondán, tam. wearer). Sanscrit name (makutapura), meaning crown + town; also (makutéshvara), meaning crown + lord or shiva, the peak lord. Village; pop. 2,344; acres 1,912; lat. 10° 54′; long. 79° 41′; from Nunnilam N.E. 3 miles; from Tanjore E.N.E. 35 miles. A Shiva temple.——*Nunnilam* (நன்னிலம் - nannilam, Tam.). See below.——*Prauvidayanaur* (பிராவிடையனாறு - pirávidaiyanáru, Tam.). See sep. title.——*Seetaur* (சிற்றாறு - shittáru, Tam.). See sep. title.——*Shreevaunjyam* (ஸ்ரீவாஞ்சியம் - shirívâñjiyam, Tam.). From (shrí, san. holy + vâñchhya, san.

desirable). Village, Place of pilgrimage; pop. 1,571; acres 1,065; lat 10° 52′; long. 79° 37′; from Nunnilam W. 3 miles; from Tanjore E.N.E. 29 miles. Old Shiva temple. Sacred tank resorted to for bathing on Sundays in Caurtigay [mausam] or November.——*Trichengauttangoody* (திருச்செங்காட்டாங்குடி - tiruççengáttángudi, Tam.). From (tiru, tam. beautiful + shem, tam. red + kádu, tam. jungle + kudi, tam. place); called after shiva consecrated in shengaud or red forest. Tam. also (shengádu), (shengáttángudi), meaning shiva of the red forest + village. Village; pop. 974; acres 828; lat. 10° 52′; long. 79° 46′; from Nunnilam E. 8 miles; from Tanjore E.N.E. 40 miles. Old Shiva temple.——*Tricunnapooram* (திருக்கண்ணபுரம் - tirukkannappuram, Tam.). From (tiru, tam. beautiful + kannan, tam. god krishna + pura, san. city). Village; pop. 1,381; acres 1,557; lat. 10° 52′; long. 79° 45′; from Nunnilam E. 6 miies; from Tanjore E.N.E. 39 miles. Old Vishnoo temple.——*Tripoogalore* (திருப்புகலூர் - tiruppugalúr, Tam.). From (tiru, tam. holy + pugazh, tam. praise + úr, tam. village). Tam. also (pugalúr), praise + town. Village; pop. 1,416; acres 1,072; lat. 10° 53′; long. 79° 45′; from Nunnilam E. 6 miles; from Tanjore E.N.E. 39 miles. Old Shiva temple. ——**(2)** Village; talook head-quarters; Tanjore dist., Nunnilam tal.; pop. 2,758; acres 1,158; lat. 10° 53′; long. 79° 40′; from Combaconam E.S.E. 16 miles; from Madras S.S.W. 156 miles; from Mayavaram S.S.W. 16 miles; from Munnargoody N.E. 18 miles; from Negapatam W.N.W. 18 miles; from Tanjore E.N.E. 32 miles. Old Shiva temple.

NUNNOOL (நன்னூல் - nannúl, *Tam.*). From (nal, tam. good + núl, tam. treatise) [nul]. Cf. French belles lettres and Latin literæ humaniores. Work on tamul grammar [lacshanam, vyaucaranam] by Pavanandy [q.v.] independent of Paniny [q.v.]. The most learned tamul work. Cf. Cooral for ethics, and tamul Ramayanam and Chintaumany for epic style. Follows the plan of Tolgauppyam [q.v.], which in turn is based on Agastyan's [q.v.] lost sootrams. Dedicated to Gungan, a petty chieftain of Madura country.——**(1)** The Nunnool consists theoretically of the six following portions.—"*a*" *Pauyiram* (பாயிரம் - páyiram, Tam.). Preface sub-divided into Pothoo pauyiram or general preface and Shirapp pauyiram or special preface. The writer of a preface to any work and the author of the work itself are not identical in Indian writings. The person from whom the preface to Nunnool proceeded was a pupil of Pavanandy. It is much the most generally interesting part. "i" In the general preface, the writer treats on the five following subjects:—the nature of a classical work, the character and qualifications of a teacher, the method of teaching, the character and qualifications of the scholar, and the conduct of scholars during the time of instruction. He writes largely on the first subject. All works, he says, are of three kinds; primary, supplemental, and deducive. The primary work originates from the deity, who is of perfect and infinite understanding. There is no wisdom without revelation. Supplemental and deducive works are human, but must be in accordance with the divine. Original communications should be quoted in all their purity and integrity. He enumerates seven principles or characteristics of authorship, viz., consent, dissent, neutrality, originality, selection, criticism, and dogmatism. He specifies ten defects and ten beauties of language. The defects are:—brevity, redundancy, tautology, contradiction, vulgarisms, ambiguity, weakness, irrelevancy, inappropriate transitions, and unintelligibleness. The ten beauties are:—conciseness, clearness or comprehensiveness, agreeableness, use of appropriate words, harmony, profundity, method, respect for standard authorities, choice of proper subjects, and illustrations. He enumerates thirty-two canons of criticism. True criticism, he says among other things, consists first in showing the consistency of the subject of a work with generally received opinions as well as with those of approved authors, and secondly in a nicety of judgment by the exercise of which fit places are awarded to appropriate topics. His definition of a sootram is to the effect that it contains as much matter in as few words as possible, and still the force and minuteness of the same is so unaffected thereby that they appear as clear as the reflexion of an object in a mirror. In his estimation a commentary should contain fourteen particulars:—the text, its purport, its several bearings, definition, divisions, examples, objections, answers, explanatory notes, analysis, paraphrase, dogma, advantage, and proof. "ii" In the particular preface, the writer treats on various subjects regarding authorship and the art of book-making. A work is to be named from the nature of its contents, the name of the author, the character of the metre or style in which it is written, or according to the author's option or fancy. There are four ways in which a book may be produced; by abridgment, by enlargement, by a union of both, and by translation. A preface should not be written by the author himself, at least that part of the preface which must be necessarily egotistic, but by the author's tutor, or a fellow student, or a pupil, or by a fit commentator or editor. There are circumstances however when a man may praise himself. They are, when appeal is made to a superior for support; when it is necessary to make known one's own worth; and when railed at for ignorance by opponents.—"*b*" *Yezhoot adhicauram* (எழுத்ததிகாரம் - ezhuttathigáram, Tam.). From (ezhuttu, tam. letter + adhikára, san. subject). Orthography, comprising:—Yezhoottiyal and Pathaviyal, denominated caroovy or theoretic orthography; Ooyireett poonariyal; Meyyeett poonariyal; Ooroopp poonariyal, designated sheygay or practical orthography. Written by Pavanandy.—"*c*" *Shol adhicauram* (சொல்லதிகாரம் - shollathigáram, Tam.). From (shol, tam. word + adhikára, san. subject). Consisting of:—Peyariyal, of nouns; Vinayiyal, of verbs; Pothooviyal, of parts of speech in general; Ideitcholliyal, of affixes, prefixes, and unmeaning particles; Ooritcholliyal, of adjectives and adverbs. Written by Pavanandy.—"*d*" *Porool* (பொருள் - porul, Tam.). From (poru, tam. to unite with). Matter; or the mode in which, by uniting words, a discourse is formed. This head treats on amplification, the affections of the mind, &c. It is sub-divided into agaporool, and pooraporool; that is to say, into matter interior and exterior. The former relates to the passions and affections of the mind, which act on man internally; the latter, to things external to man. This portion was since written by Naurcaviraja numby.—"*e*" *Yaup* (யாப்பு - yáppu, Tam.). From (yá, tam. to bind). Versification. The Tamul writers confine their remarks on this head to the subject of prosody, and say nothing of the art of poetry. This portion was since written by Amrita saugaran.—"*f*" *Any* (அணி - ani, Tam.). Embellishment. This head treats on tropes and figures. Written by Dandy.——**(2)** The five heads beyond the preface are called in sanscrit Puncha lutchanam. The writer lays down rules, and then gives the exceptions in minute detail. The five parts are comprised in the following line:—எழுத்துச்சொற்பொருளி யாப்பணி.——**(3)** There have been various commentators on the Nunnool; the most popular one is that by Shuncara namashivauyan, a native of Tinnevelly.

NURM (نرم - narm, *Hind.*). From (narma, san. sport). Mild. ——*Nerbudda* (नर्मदा - narmadá, San.). From (narma, san. happiness + dá, san. to give). Called by Ptolemy ναμαδός. This river has from time immemorial marked the boundary between Upper and Southern india. It takes its source near the Vindhyam mountain in the province of Malwah and flows into the sea near Surat.——*Nurm gurm* (نرم گرم - narmgarm, Hind.). Literally mild and hot. Threats and persuasions alternating.

NUT OIL (پھلی کا تیل - phallikátel, *Hind.*). Generally means oil from the Ground-nut.

NUTT (నట్టు - nattu, *Tel.*). Title otherwise Bent grass. Botanically Andropogon [beard grass] pilosus, wight., graminaceæ [vricsham, 156]. Alias Ischæmum pilosum. Diœcious; culms 4–5 feet, smooth; leaves glaucous, smooth; spikes terminal, fascicled, three to four together, white and hairy; sessile spikelet with the lower flower male, the upper female, pedicelled floret female, all bearded with long white hairs, upper valve of the female floret awned; glumes all minutely two-cleft; common in black soil.

NUTTAM (నత్తము - nattamu, *Tel.*; நத்தம் - nattam, *Tam.*). —"*a*" Land reserved for building ground and gardens, &c., above irrigation level. Inhabited by Shoodras, in opposition to an Agrahauram [q.v.]. Nuttamaur are a sub-division of Vellaula [q.v.]. Nuttapaul is a deserted village.—"*b*" Name of a village and Range of hills, Pass; Madura dist., Mailore tal.; pop. 4,017; acres 1,372; lat. 10° 13′; long. 78° 16′; from Madura N.N.E. 23 miles; from Mailore N.N.W. 15 miles. Formerly a road from Madura to Trichinopoly passed through, but was abandoned on account of fever.

NUTTAY (शम्बूक - shambúka, *San.*; گھونگا - ghungá, *Hind.*; ಬಸವನಹುಳ - basavanahula, *Can.*; నత్తగుల్ల - nattagulla, *Tel.*; അച്ചു - aççu, *Mal.*; நத்தை - nattai, *Tam.*). Can. from (basava, can. bull + hula, can. worm); from its slow gait. Whelk. Buccinum, sp. of naturalists. The same tamul name is given to the eating snail or Helix pomatia [chippy].

NUTTER (نطهر - nathar, *Ar.*). From arabic. Purified. Name of a saint [walee] buried at Trichinopoly. Taken as alam; as Nutter beg, alam + alaumat [ism].——*Nutternagar* (نطهرنگر - natharnagar, Hind.). From (above + nagar, pers. city). Same as Trichinopoly.

NUZZER (نذر - nazr, *Ar.*). From (nazara, ar. to vow). Gift or offering. Prefixed to an alam makes a lacab; as Nuzzer ally, ally's gift; most taken by shiahs [ism]. Nuzzer is a ceremonial present from inferior to superior, converse of inam [q.v.].——*Nuzrauna* (نذرانہ - nazránah, Hind.). Sums exacted by the State on various occasions.——*Nuzzer o niyauz* (نذر و نیاز - nazrwaniyáz, Hind.). From (above + niyáz, ar. oblation). Vows and oblations:—"*a*" in the name of god [allah],—"*b*" in the name of the prophet [mahomed],—"*c*" in the name of companions,—"*d*" in the name of the saints [walee]. These are not observed on any fixed day, but each performs them according to the vow he has made.

NYAUNAM (ज्ञान - ñána, *San.*; ஞானம் - ñánam, *Tam.*). From (ñá, san. to know) [naumam]. Knowledge in general; knowledge of a specific and religious kind, that which is derived

from meditation [dhauranay], and the study of philosophy [darshanam], which teaches man the divine nature and origin of his immaterial part [autmam], with unreality [mauyay] of corporeal enjoyments or worldly forms, and which separating him during life from terrestrial objects, secures him after death a final emancipation [mocsham] from existence and re-union [sauyoojyam] with the universal spirit [samsauram]. Nyaunam is also male and female proper name; taken by native christians by itself and in combination [peyar]. Suffix in proper names as Shivanyaunam.——*Nyauna caundam* (ज्ञानकाण्ड - ñánakánda, San.). From (above + kánda, san. section). Knowledge section. The esoteric portion of the Vedam [q.v.], as distinguished from exoteric portion Carma caundam or the section on ceremonies and works.——*Nyaunacunn* (ஞானக்கண் - ñánakkan, Tam.). From (above + kan, tam. eye). Proper name. Common among non-bramins and native christians [peyar].——*Nyaunamany* (ஞானமணி - ñánamani, Tam.). From (above + nani, san. gem). Hindoo 2nd or pers. name. Common among non-bramins. Epithet of Bramha [peyar].——*Nyauna moorty* (ज्ञानमूर्ति - ñánamúrti, San.). From (above + múrti, san. embodiment). Saraswaty [q.v.].——*Nyannapracausham* (ஞானப்பிரகாசம் - ñánappiragásam, Tam.). From (above + prakásha, san. shining). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Nyauna prasoonaumba* (జ్ఞానప్రసూనాంబ - ñánaprasúnámba, Tel.). From (above + prasúna, san. flower + ambá, san. mother). Parvaty at Calastry.——*Nyauna sambandhan* (ஞானசம்பந்தன் - ñánasambandan, Tam.). From (above + sambandha, san. union). A Sheiveite bramin who visited Madura in the reign of the Paundya king Coon [soondra paundy tevar], and gained him over from the Jeina to the Sheiva sect. The Jeina [q.v.] or Shamanar [q.v.] followers, to the number of eight thousand, were then persecuted and hanged or banished. He instituted several monasteries. Some remain to this day, whose spiritual head has the title of Nyauna shiva acharry.——*Nyaunashikhaumany* (ஞானசிகாமணி - ñánasigámani, Tam.). From (above + shikhámani, san. crest jewel). Hindoo 2nd or pers. name. Common among non-bramins [peyar]. —*Nyaunaubharanam* (ஞாநாபரணம் - ñánábaranam, Tam.). From (above + ábharana, san. jewel). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Nyaunaudhicam* (ஞானாதிகம் - ñánáthigam, Tam.). From (above + adhika, san. additional, superior), meaning having spiritual knowledge. Hindoo 2nd or pers. name. Common among non-bramins [peyar]. ——*Nyaunopadesham* (ज्ञानोपदेश - ñánópadésha, San.; ஞானோபதேசம் - ñánóbathésam, Tam.). From (above + upadésha, san. instruction). Spiritual instruction.——*Nyauny* (ज्ञानी - ñání, San.). From (ñána, san. wisdom). Bramha, the wise. Wise authors; as of Shiva vaucyam, Cooral, Neetisauram, &c.

NYAUYAM (न्याय - nyáya, *San.*). From (ni, san. prefix + i, san. to go); signifies going into a subject, that is to say investigating it analytically [ni].——**(1)** Justice, reason, propriety right, equity, rule, precept of morality, peculiar class of doctrine. Nyauya stalam is a Court of judicature. Nyauyaudhipaty is a Judge.——**(2)** One of the six schools of philosophy [darshanam]. Ascribed to Gowtaman [q.v.]. The Nyauyam is, as generally accepted, chiefly concerned with logic, but this is actually merely one part of a single topic. The Nyauyam proper differs from its later development, the Veishaishicam, by propounding sixteen topics in its first sootram.—"*a*" The first topic of these sixteen is Pramaunam, this is, the means or instruments by which pramay or the right measure of any subject is to be obtained. Under this head are enunciated the different processes by which the mind arrives at true and accurate knowledge. These processes are declared in the third sootram of the first book to be four, viz.:—Pratyacsham, perception by the senses, Anoomaunam, inference; Oopamaunam, comparison; Shabdam, verbal authority or trustworthy testimony, including vedic revelation. The treatment of the second of these, viz., inference, possesses special interest as indicating that the Hindoos have not, like other nations, borrowed their logic and metaphysics from the Greeks. Inference is divided into five Avayavams or members:—Pratinyay or proposition, stated hypothetically; Haitoo or the reason; Oodauharanam sometimes called Nidarshanam or example, equivalent to the minor premise; Nigamanam or conclusion, i.e., the pratinyay or proposition restated as proved. This method of splitting an inference or argument into five divisions is familiarly illustrated by native commentators thus. The hill is fiery; for it smokes; whatever smokes is fiery, as a kitchen-hearth; this hill smokes; therefore this hill is fiery. Here there is a combination of enthymeme and syllogism.—"*b*" The second topic of the Nyauyam is Prameyam, by which is meant all the objects or subjects of Pramay; those points, in short, about which correct knowledge is to be obtained. This topic includes all the most important subjects investigated by native philosophy. The Prameyam are twelve thus. Soul (átman); Body (sharíram); Senses (indriyam); Objects of sense (art'ham); Understanding or intellection (buddhi); Mind (manas); Activity (pravritti); Faults (dósham); Transmigration (prétyabhávam); Consequences or fruits (p'halam); Pain (duhkham); Emancipation (apavargam).—"*c*" With regard to the fourteen other topics, they are not so much philosophical categories as an enumeration of the regular stages through which a controversy is likely to pass. There is first the state of Samshayam or doubt about the point to be discussed. Next there must be a Prayojanam or motive for discussing it. Next a Drishtauntam or familiar example must be adduced in order that a siddhauntam or established conclusion may be arrived at. Then enters an objector with Avayavam or argument split up into five members. Next follows the Tarcam or refutation and reductio ad absurdum of such objection, and the Nirnayam or ascertainment of the true state of the case. But even a further vaudam or controversy takes place, which leads to Jalpam, wrangling, followed by; Vitanday, cavilling; Haitoo aubhausam, fallacious reasoning; Chalam, quibbling artifices; Jauty, futile replies; and Nigraha staunam, the putting an end to all discussion by a demonstration of the objector's incapacity for argument.—"*d*" The above are the sixteen topics. After enumerating them the system proceeds to state how deliverance from the misery of repeated birth is to be attained. Thus:—misery, birth, activity, fault, false notions; on the removal of these in turn, beginning with the last, there is the removal also of that which precedes it; then ensues final emancipation. That is to say, from false notions comes the fault of liking, disliking, or being indifferent to anything; from that fault proceeds activity; from this mistaken activity proceed actions involving either merit or demerit, which merit or demerit forces a man nolens volens to pass through repeated births for the sake of its reward or punishment. From these births proceed misery, and it is the aim of philosophy to correct the false notions at the root of this misery [samsauram]. See vol. I (74).

NYAYIR (ஞாயிறு - náyiru, *Tam.*). From (ñálu, tam. to drop + éru, tam. to rise); that which ascends and descends. Sun [sooryan].——*Nairam* (நேரம் - néram, Tam.). From (ñáyir, tam. sun). Time. Moonnairam is forenoon and Pinnairam is afternoon. The following is the scale:—2 jaumams or watches = 1 nairam or half day light, 2 nairams = 1 pagal or day light [caulam, 1]. Approximate actual value, 1 nairam = 6 European hours.——*Nyayit kizhamay vratam* (ஞாயிற்றுக்கிழமைவிரதம் - ñáyittukkizhamaiviratham, Tam.). From (ñáyiru, tam. sun + kizhamai, tam. day of the week + vrata, san. vow). Solar observance [pundigay, 6d]; a fast on sundays in honor of sun, for prevention and cure of diseases especially of eyes. This in the fifth solar month Auvany [mausam], i.e., between 15th August and 14th September, is specially meritorious [maryauday].

NYE (श्वान - shvána, *San.*; कुत्रा - kutrá, *Mahr.*; كلب - kalb, *Ar.*; سگ - sag, *Pers.*; کتا - kuttá, *Hind.*; انجنگ - anjing, *Malay*; ನಾಯಿ - náyi, *Can.* and *Too.*; కుక్క - kukka, *Tel.*; କୁକୁର - kukkura, *Oor.*; നായ - náya, *Mal.*; බල්ලා - ballá, *Singh.*; நாய் - náy, *Tam.*). Title from tamul. San. from (shvi, san. to go); as going to and fro. Hind. from (kukkura, san. dog). Tel. from (kukkura, san. dog). Ar. also (abúkhálid), meaning father of rats. Dog. Canis [shwaunam] familiaris, canidæ [cookooram], digitigrada, carnivora, mammalia [sastanam, 12], of naturalists [jantoo]. Plant first term, meaning wild or inferior. Ex., where transl. is of second term:—Achyranthes aspera (náyuruvi), piercing plant, from pricks; Atalantia monophylla (náyibéladamara), feronia elephantum, wood-apple; Carissa spinarum (náyikalamegida), carissa; Cleome viscosa (náyvélai), gynandropsis pentaphylla; Dillenia pentagyna (náyttékku), tectona grandis; Gynandropsis pentaphylla (náykkadugu), brassica juncea, mustard; Indigofera pentaphylla (náyppayaru), phaseolus mungo; Indigofera viscosa (náyvémbu), melia azadirachta; Ocimum canum (náyttulasi), ocimum sanctum; Tylophora asthmatica (náyppálai), milky plant; Urginia indica (náyulli), allium sativum. See gloss. paragraphs.——*Konye* (वृक - vrika, San.; लाण्डगा - lándagá, Mahr.; ذيب - zíb, Ar.; گرگ - gurg, Pers.; بھیڑیا - bheriyá, Hind.; لانڈگا - lándgá, Dec.; ತೋಳ - tóla, Can.; ಚೆಂನನಾಯಿ - chennanáyí, Too.; తోడేలు - tódélu, Tel.; ଢେଙ୍କ - dhenkya, Oor.; ചെന്നായ - chenáya, Mal.; கோநாய் - kónáy, Tam.). Title from tamul. San. from (vrik, san. to seize); the seizer. Mahr. from (landa, san. excrement); depreciatory. Too. from (channa, too. red + náyi, too. dog). Mal. from (chem, mal. red + náya, mal. dog). Tam. from (kó, tam. great + náy, tam. dog). Ar. also (abújadah), meaning father of curly hair. Hind. also (hundár); (nekra); (bighána). Title otherwise Indian wolf. Canis [shwaunam] pallipes, canidæ [cookooram], digitigrada, carnivora, mammalia [sastanam, 12], of naturalists [jantoo]. Alias Canis lupus. The Indian wolf is hoary fulvous or dirty reddish white, some of the hairs tipped black, which gives it a grizzled appearance; somewhat reddish on the face and limbs, the latter paler than the body; lower parts dingy white; tail thinly bushy, slightly black tipped. Ears rather small. Rare in wooded districts, abundant in open country. Wolves breed in holes in the ground, or caves, having only three or four young, it is said. Usually silent, but sometimes bark like a pariah dog [pye]. The howling after their prey, recorded of the European wolf, is seldom heard in India. The Indian wolf is somewhat inferior in size to the European one, and is probably less ferocious. Stories have been related of Indian wolves suckling young infants carried off. Wolves hunt in packs in the open plains, where there is no cover

or concealment; they scrape a hole in the earth, in which one of the pack lies down and remains hid, while the others drive a herd of antelope [jinka] over him. Their chief prey however is sheep [aud]. Sometimes a large wolf is seen to seek his prey singly. These are reckoned particularly fierce. Wolves are not killed by native shikarries [q.v.], who consider that the gun which shoots a wolf will miss other animals. Indian species not here found are:—Laniger or thibetan wolf, Lupus or european wolf.——*Neernye* (उद्र - udra, San.; पाणिमांजर - pánimáñjara, Mahr.; سگ دریا - sagidaryá, Pers.; اود - úd, Hind.; پانی کتا - pánikákuttá, Dec.; مامبرنگ - mámbrang, Malay; ನೀರುನಾಯಿ - nírunáyi, Can. and Too.; నీటికుక్క - nítikukka, Tel.; ଓଡ଼ - lodna, Oor.; നീർനായ - nírnáya, Mal.; நீர்நாய் - nírnáy, Tam.). Title from tamul. San. from (ud, san. to wet). Mahr. from (páni, mahr. water + máñjara, mahr. cat). Pers. from (sag, pers. dog + daryá, pers. sea). Hind. from sanscrit. Dec. from (pání, hind. water + kuttá, hind. dog). Tam. from (nír, tam. water + náy, tam. dog). Mahr. also (jalamáñjara), meaning water + cat. Pers. also (gurbahiábí), meaning water cat; (sagiáb), meaning water dog. Hind. also (údbilás), meaning wet cat. Malay also (anjinglaut), meaning dog + sea. Tam. also (mináy), meaning fish + dog. Title otherwise Otter. Lutra vulgaris, lutrinæ, mustelidæ, semi-plantigrada, carnivora, mammalia [sastanam, 8], of naturalists [jantoo]. Alias Lutra indica. Otters are a well marked group of animals, distinguished by their elongated and somewhat flattened form, short and stout limbs, with the toes well webbed and spreading, and with naked soles. The fur is close, fine and short, consisting of a woolly fur beneath, and a layer of smooth glossy hairs above. The eyes are provided with a nyctitating membrane, or additional half-transparent eyelid like that of birds, as a defence to them under water. The teeth are strong and sharp, and the tubercles of the molars very pointed, to secure their prey, which is almost entirely fish, which they hunt for and capture under water with wonderful activity and skill. The skull is said to have something in common with seals. Frequents alike rivers, and salt water inlets. It has its lair under large rocks, and, in alluvial countries, excavates extensive burrows; partly nocturnal in habits. On the Malabar coast it hunts in the sea. Indian species not here found are:—Aurobrunnea, Leptonyx or clawless otter, Ellioti.

O (ओ - ó, San.; و - wáu, Hind.; ஓ - o, ஓ - ó, Tam.). San. long for Bramha [q.v.]. Hind. numerically symbol for 6; Friday the sixth day of the week [vauram], sign [raushy] Libra [toolaum].

OART (ഓട്ട - ótu, *Mal.*). Portuguese horta. Old Anglo-indian for garden [tote].

ODALAY (ஓதலை - óthalai, *Tam.*). From (ótham, tam. moisture + ali, tam. to preserve); as growing in dry land. Same as Catechu [q.v.] acacia [cantalam].

ODE (ஓடு - ódu, *Tam.*). To run.——*Oday* (ஓடை - ódai, Tam.). From (ódu, tam. to run). A water-course [caulvye, channel].——*Oodata* (ఉడత - udata, Tel.). From (ódu, tel. to run). Squirrel [anil].——*Oodatavaur* (ఉడతవారు - udatavárú, Tel.). From (udata, tel. a squirrel). Poligar family. For skill in shooting a squirrel [anil], Lingam naidoo founder of family, was made poligar [q.v.] by rajah of Golcondah and gained this name. His jurisdiction was over 147 villages of Nellore, Goodoor, Atmacore and Raupore. Present poligar, tenth in descent.——*Ottapidauram* (ஓட்டப்பிடாரம் - óttappidáram, Tam.). See sep. title.

ODHRAM (ओड्र - ódra, *San.*). The northern part of Orissa [ootcalam, ooriya]. See vol. I (2).

ODUL (اودر - udar, *Hind.*; ಬಿಳಿದಾಳೆ - bilidále, *Can.*; ஓடல் - ódal, *Tam.*). Title from tamul. Hind. from tamul. Can. from (bili, can. white + táli, can. borassus flabelliformis, linn.); from white grey spongy wood. Tam. also (tanakku) [golden silk cotton, tanakk]; (ánainármaram), meaning elephant + fibre + tree; (vakkunármaram), meaning bark + rope + tree [sunn]. Title otherwise Aunay naur, Elephant rope tree, Wuck naur tree. Botanically Sterculia [cauvalam] villosa, roxb., sterculiaceæ [vricsham, 26]. Small tree; leaves deeply and palmately five to seven-lobed, under side soft, velvety, lobes acuminated, deeply toothed; calyx five-partite, patent; carpels coriaceous, rough, with stellate pubescence; flowers small, pale yellow, scarlet; flowering in march. Gives a white pellucid gum [gond]; only slightly soluble and has no adhesive properties. Bark yields a valuable fibre [naur], made into very strong ropes used by elephants [q.v.] to drag timber with; bags [gunny] also made from it. Wood grey, very soft and spongy. Distinguish from Odallam.

OHDAH (عهده - ohdah, *Hind.*). From (ahd, ar. agreement). An office [amal], civil or military.

OIL (تل - til, *Hind.*). Prefix.——*Oil-cake tree* (அரப்புமரம் - arappumaram, Tam.). Title from leaves being used to wash with, like mohwah [q.v.] oil cake [ponnauk]. Same as Dark sirissa.——*Oil plant* (تل کا جھاڑ - tilkájhár, Hind.). Same as Gingelly.

OKKALIGA (ಒಕ್ಕಲಿಗ - okkaliga, *Can.*). From (okkalu, can. tenancy). Low-caste laborers of Canara. Numbers about 50,000 [jauty].

OKRO (اوکرو - okro, *Hind.*). W. indian word. Common bendy.

OLAY (تارکا پتا - tárkápattá, *Hind.*; తాటాకు - tátáku, *Tel.*; ഓല - óla, *Mal.*; ஓலை - ólai, *Tam.*). Tam. also (narukku), meaning a piece cut off, of olay; applied to an olay document or note of hand [chit]. Leaf of any palm [taur], especially for writing upon [cadjan]. Also worn by lower orders on lower lobe of ear [nagay]. For Olay paumb see Cadjan snake.

OLE (ఓలు - ólu, *Tel.*). Congregation. Suffix in place names as Madgole, meaning chuckler's association.

OLIBANUM (कुन्दुरुकी - kundurukí, *San.*; لبان - lubán, *Ar.*; பறங்கிச்சாம்பிராணி - parangiççámbiráni, *Tam.*). Title from hebrew lebonah, signifying milk. San. from (kundu, san. olibanum). Ar. from (laban, ar. juice). Tam. from (parangi, tam. european + shámbiráni, tam. frankincense). Greek λίβανος, Latin olibanum. Title otherwise Frankincense. A gum resin [googal]. Product of the Boswellia genus, burseraceæ [vricsham, 35]; balsamiferous trees; leaves compound; flowers white, in clusters; fruit triangular and three-celled; seeds compressed and winged. The species best known to the natives are:—carterii [true olibanum], serrata [indian olibanum], serrata, var. glabra [yellow dammer]. The product is gummi-resina olibanum, thus masculum, of chemists. Occurs in semi-transparent tears of light yellow color; brittle and adhesive when warm; in taste bitterish and somewhat pungent and aromatic; when burnt very fragrant, and as such used as an incense [ood]; in medicine stimulant, astringent and diaphoretic. Cf. and distinguish the Bdellium [q.v.] trees, which are Balsamodendrons.——*Indian olibanum* (सल्लकी - sallakí, San.; सालई - sálaí, Mahr.; विशेषधूप - vishéshadhúmpu, Conc.; لبان - lubán, Ar.; کندر - kundur, Pers. and Hind.; کندر کا جھاڑ - kundurkájhár, Dec.; ವಿಶೇಷಧೂಪದಮರ - vishéshadhúpadamara, Can.; అందుగు - andugu, Tel.; വെള്ളക്കുന്തുരുക്കം - vellakkunturukkam, Mal.; හල් - hal, Singh.; குந்துருக்கம் - kundurukkam, Tam.). San. from (shall, san. to go); as yielding gum. Mahr. from sanscrit. Conc. from (vishésha, san. distinction + dhúpa, san. incense); as yielding good incense. Ar. from (laban, ar. juice). Dec. from (kundur, ar. olibanum + jhár, hind. tree). Can. from (vishésha, san. distinction + dhúpa, san. incense + mara, can. tree). Tel. from (andukonu, tel. to take fire); incense. Mal. from (vella, mal. white + kunduruka, san. frankincense). Tam. from (kunduruka, san. olibanum) [piney, piney dammer, yellow dammer]. San. also (surabhi), meaning fragrant; (gajabhakshyá), meaning eaten by elephants; cf. peepul; (kundurukí), meaning producing coondoor; (hládiní), meaning delightening; (kunduru); (sálashi). Ar. also (kundur); (kundurizakr), meaning male olibanum; (bastaj). Hind. also (avalkundur), meaning olibanum of first sort; (sálgá); (sálhe); (gandaberoza), meaning turpentine from similarity of consistence when fresh from tree [ganda firoza]. Can. also (chittu). Mal. also (kuntirukkam); (chiténti). Singh. also (hadumula). Tam. also (kungiliyam) [yellow dammer]; (parangisámbiráni), meaning european + frankincense. Title otherwise Indian frankincense, Lobaun, Male olibanum, Ood, Salye. Botanically Boswellia [olibanum] serrata, roxb., burseraceæ [vricsham, 35]. Alias Boswellia thurifera; Libanus thurifera. Large tree; leaves unequally pinnated; leaflets oblong, obtuse, serrated, pubescent; racemes axillary, single, shorter than the leaves; calyx five-toothed; petals five; flowers small, white; flowering in march and april; seeds solitary, with a winged membrane; capsule three-angled. The gum-resin [googal] is distributed through the leaves and bark, and even exudes as a milky juice from the flowers; it occurs as a transparent golden yellow, semi-fluid substance, which slowly hardens with time; it is pungent, having a slightly aromatic taste and balsamic resinous odour; it becomes opaque when immersed in alcohol or in water; the opaque, soft, whitish mass produced by water when rubbed in a mortar forms an emulsion. The gum-resin is medicinally internal and external stimulant, expectorant, stimulant-diuretic and stomachic; also a slight hepatic stimulant; substituted for benzoate of soda, gummi-rubrum [australian gum tree], gum-ammoniacum [ooshak] and abietis resina. Used as incense in roman catholic and greek churches. Wood rough, white when fresh cut, darkening on exposure, moderately hard; used for fuel and for making charcoal [adooppkary].——*Male olibanum* (کندر ذکر - kundurizakr, Ar.). Same as Indian olibanum.——*True olibanum* (कुन्दुरुकी - kundurukí, San.; साळी - sálí, Mahr.; سلائی - saláí, Hind.; لبان کا جھاڑ - lubánkájhár, Dec.; பறங்கிச்சாம்பிராணிமரம் - parangiççámbiránimaram, Tam.). San. from (kundu, san. olibanum). Mahr. from (sallakí, san. boswellia serrata, roxb.). Hind. like mahratta. Dec. from (lubán, ar. olibanum + jhár, hind. tree). Tam. from (parangi, tam. european + shámbiráni, tam. frankincense, boswellia serrata, roxb. +

maram, tam. tree). San. also (pálankí), meaning brought up by protection [paulak]; (kunda); (mukunda); (sallakí), meaning gum-yielding tree. Hind. also (gandaberoza), meaning turpentine. Title otherwise Coondoor tree, Foreign sambrauny, Ganda firoza, Lobaun, Male frankincense, Ood, True frankincense. The best or medicinal product is called Male frankincense. Resin [raul] in tears is known as Coondoor, but in soft masses is called Ganda firoza [q.v.]. Botanically Boswellia [olibanum] carterii, bird., burseraceæ [vricsham, 35]. Middling-sized tree of the northern somauly country in africa and of southern arabia; cape guardafui used to be called promontorium aromatum. The stem gives the gum-resin [googal], true olibanum; as this flows from the tree, it is of the consistence of turpentine [carpoora teilam], a clear greenish color; when dry it consists of tears often an inch in length and of an ovate or oblong, clavate or stalactitic form, and mixed with impurities; the pieces are light yellow to brown or pale green or colorless; the odour is balsamic and resinous, especially while being burned; taste is bitter and terebinthinous, and the resin softens in the mouth; adhesive when warm; when burnt it flames with steady clear light but dense smoke, not easily extinguished, burns for a long time leaving behind a black ash not whitish; it is not perfectly soluble in water or alcohol; the powder is citron yellow; frequently adulterated by dammer [q.v.], sandrach [q.v.], and other cheaper resins [raul]. Very ancient commercial commodity. In pharm. a terebinthinate stimulant, action directed on the mucous membrane, especially of the lungs; preparation, unguentum olibani; officinal; substituted for british ammoniacum. Continues, unless when its place is supplied by the javanese product benzoin [q.v.], to perfume the churches, mosques [q.v.], and temples of europe and asia. Several other species yield true olibanum.——*Turkish olibanum* (کندوررومی - kundurirúmí, Pers.). Same as Mastic.

OLIVE WOOD (زیتون کی لکڑی - zaitúnkílakrí, *Hind.*). From similar wood. Same as Nerija.

OLLUCK (ஆழாக்கு - ázhákku, *Tam.*). From (arai, tam. half + ozhakku, tam. the measure) [oyak]. Tamul form of Ayak [q.v.]. Measure of capacity. 8 ollucks = 1 puddy [alavay, 3a, d]. Approximate actual value, 1 olluck = 12½ cubic inches. Used in Madras. Equal to $\frac{1}{20}$th of a gallon. Compare Nowtauk. See vol. I, 609; II, 514.

OLOOGOO (ഒഴുക - ozhuku, *Mal.*; ஒழுங்கு - ozhungu, *Tam.*). From (ozhugu, tam. to act according to rule). Boundary; and so register of the measurement and extent of fields and holdings [adangal]. Standard; and so a standard rate for assessment [teervay], for price of grain [agavilay], &c. As a method for making the demand in ryotwarry [q.v.] see vol. I, 124, 136.

OM (ओम् - óm, *San.*). An antiquated form of ayam, That one or He. Later taken to represent the vedic trinity of Adity [q.v.], Varoonan [q.v.], and Mitran [q.v.]. Later again taken to be from (a, san. vishnu + u, san. shiva + ma, san. brahma). Compare the greek ὀμφή, and the arabic and hebrew Amen. A mystic ejaculation uttered in place of naming the supreme being [bramh] or the supreme spirit poorsham [q.v.]. The hand is placed before the mouth while saying it, or it is pronounced inaudibly. A Bramin beginning or ending any holy exposition must always pronounce the syllable. It is also placed at the beginning of books. A whole chapter of the Vayoo pooraunam [q.v.] is devoted to this term. It is said to typify the three spheres of the world [trilocam], the three holy fires, the three Vedams [q.v.], the three steps of Vishnoo [q.v.], &c. In the Devanagry [q.v.] and Grantam [q.v.] alphabets, it is expressed by a triple sound in one character [pranavam]. It is common to all classes of Hindoos, and so was historically antecedent to the five letters of the Sheivas [punchaucsharam], or eight of the Veishnavas [muntram]. The Booddhists [booddha] also use it [matam]. See vol. I (92).——*Omcauram* (ओंकार - ómkára, San.). From (above + kára, san. sound). The syllable om.——*Omnamo narayanauya* (ओंनमोनारायणाय - ómnamónáráyanáya, San.). From (above + namas, san. salutation + náráyana, san. vishnu). Salutation to Vishnoo [q.v.].——*Omramauya nama* (ओंरामायनमः - ómrámáyanamah, San.). From (above + ráma, san. the god + namas, san. salutation). Salutation to Rama [q.v.].——*Omtatsat* (ओंतत्सत् - ómtatsat, San.). From (above + tat, san. that + sat, san. reality). A muntram [q.v.].——*Oncauly* (ఓంకాళి - ómkáli, Tel.). From (above + káli, san. the deity). Deity [cauly].

OMALORE (ஓமலூர் - ómalúr, *Tam.* omalúr *). From (váma, san. shiva + úr, tam. village). Otherwise Walmere. Village, Deputy tahsildar's station; Salem dist., Salem tal.; pop. 1,158; acres 1,907; lat. 11° 45′; long. 78° 05′; from Madras S.W. 175 miles; from Namcull N.W. 37 miles; from Oossoor S.E. 70 miles; from Salem N.W. 10 miles; from Tripatore S. 63 miles; from Yercaud S.W. 12 miles. On bank of Sharabhunganuddy. Formerly a petty chieftainship. Old Shiva temple with inscriptions [shausanam]. Fort.

OMAM (ಓಮ - óma, *Can.*; ஓமம் - ómam, *Tam.*). From (yamáni, san. the plant). Bishop weed seed [ajwaun].——*Omam water* (ஓமத்திராவகம் - ómattirávagam, Tam.). From (above + dravaka, san. essence). Distilled from seeds.

ONGIL (ஓங்கில் - óngil, *Tam.*). From (óngu, tam. to rise to the surface + il, tam. not). Otherwise Tunny fish. There is a Tamul proverb:—ஆழமறியும் ஓங்கில் மேளம் அறியும் அரவம்—"the ongil fish is acquainted with depth, and the "snake knows the sound of a drum." And another:—ஓங்கில் அறியும் உயர் கடலின் ஆழம், பாங்கி அறிவாள் தன் பத்தாவின் வலிமை—"an ongil fish knows the depth of the "ocean, a wife knows her husband's strength."

ONGOLE * (వంగోలు - vangólu, *Tel.*). From (vangala, tel. proper name + prólu, tel. town); from house name of astrologer of an addanky rajah. Greek κόττις [cottapatam].——(1) Talook, Nellore district. Tahsildar's pay Rs. 200. N. coast part of district. Area 797 square miles. Bounded N. by Baupatla and Narsarowpett talooks in Kistna district, E. by Bay of Bengal, S. by Cundoocore. Zemindarry divisions of Darshy and Podily form the western limit. Little jungle. The extensive plains are devoted to unirrigated cultivation, and in consequence of the superior quality of the soil very fine crops are raised. Small hills at and near Ongole and in the Addanky division and a high group of hills at Cheemacoorty. The hills in Ongole contain good iron [auhan] stone. In Addanky division the soil consists of the best black-cotton soil [regar]. Most villages have good topes [q.v.]. The Great northern trunk road runs north to south through the talook and a branch takes off near Medaramittah to Hyderabad. A trunk road connecting Cottapatam with Cumbum runs through the talook from east to west. The cattle [maud] are finer than those in any other part of the district, and are famed throughout the presidency. Pulses [dholl] and oil-seeds [yennay] are largely exported. Intersected by Goondlacumma and Mooshy, and minor streams, viz., Coniky vaugoo, Inagalair and Moodigondy. Garden lands [totacaul] extend along the banks of the rivers, and the water is obtained from wells sunk in the beds. Streams are not made use of for irrigation. Gonasapoody and some adjoining villages are partly irrigated by water from Kistna canals. But few wells. Camping grounds:—Addanky, Alloor cottapatam, Ammanabrole, Canoopurty, Caurmanchy, Cheemacoorty, Dooddoocore, Eetamookkala, Inamanamelloor, Maddoolore, Ongole, Ramateertam, Rauvinootla, Santanootalapaud, Tangootore, Yalaparla, Velampulley, Yendlore. Places of archæological interest:—Addanky, Canoopurty, Ongole, Pelloor. Principal trig. stations:—Cheemacoorty, Condalore, Conijaid, Medaramittah, Nishaunicondah, Ongole, Pashoomoodra beacon, Pautapaud beacon. The leading places, &c., in the talook are the following.——*Addanky* (అద్దంకి - addanki, Tel.). See sep. title.——*Ammanabrole* (అమ్మనబ్రోలు - ammanabrólu, Tel.). From (amma, tel. mother + prólu, tel. town); because water is sweet as mothers' milk. Village; pop. 3,250; acres 7,747; lat. 15° 35′; long. 80° 11′; from Nellore N.N.E. 78 miles; from Ongole N.E. 8 miles; from the sea W. 6 miles.——*Beeramgoonta* (బీరంగుంట - bíramgunta, Tel.). From (bíra, tel. luffa acutangula, roxb. + gunta, tel. pond). Village; pop. 188; lat. 15° 30′; long. 80° 13′; from Nellore N. 72 miles; from Ongole E. 8 miles; from the sea W. 3 miles. Formerly a salt [ooppoo] factory [cotaur]. Now a hamlet of Paudarty.——*Canoopurty* (కనుపర్తి - kanuparti, Tel.). See sep. title.——*Caravady* (కరవది - karavadi, Tel.). From (khara, san. a giant + vadha, san. destruction). Familiarly Carody. Sanscrit name (kharavadha), meaning kharan, the giant + killing. Village; lat. 15° 33′; long. 80° 10′; from Nellore N.N.E. 75 miles; from Ongole E.N.E. 5 miles; from the sea W. 7 miles. This village and Dasarauzpully are clubbed. It is said that the giant called Kharausooran the cousin of Ravanan was killed by Rama here [caramana].——*Caurmanchy* (కారుమంచి - kárumanchi, Tel.). From (káru, tel. season + manchi, tel. good). Village; pop. 2,414; acres 2,618; lat. 15° 23′; long. 80° 02′; from Nellore N. 64 miles; from Ongole S.S.W. 10 miles; from the sea W. 9 miles. On Mooshy. Remarkable for its breed of cattle [maud].——*Chedalvauda* (చెదలవాడ - chedalaváda, Tel.). From (chedalu, tel. white-ants + váda, tel. village). Village; pop. 1,198; acres 4,049; lat. 15° 37′; long. 80° 08′; from Nellore N. 80 miles; from Ongole N.N.E. 7 miles; from the sea W. 10 miles. On Goondlacumma. Temple of Vishnoo as Runganaick sawmy. Festival for ten days during Cheitram [mausam] or april. Dyeing [shauyam] of cloths is carried on.——*Cheemacoorty* (చీమకుర్తి - chímakurti, Tel.). See sep. title.——*Condalore* (కొండలూరు - kondalúru, Tel.). From (konda, tel. hill + úru, tel. village). Tel. also (konijédu), meaning corner + marsh. Trig. station; lat. 15° 26′ 16·93″; long. 80° 01′ 25·76″; height 383 feet; from Ongole S.W. 7 miles; from Tammavaram S. 19 miles; from the sea W. 12 miles.——*Conijaid* (కొనిజేడు - konijédu, Tel.). From (kona, tel. corner + jédu, tel. marsh). Village; pop. 2,506; acres 6,892; lat. 15° 27′; long. 80° 00′; from Nellore N. 68 miles; from Ongole W.S.W. 8 miles; from the sea W. 16 miles. Indigo [q.v.] manufacture. Trig. station in lat. 15° 27′ 9·48″; long. 80° 0′ 50·66″; from Conijaid E.N.E. 1¾ miles; from Ongole S.W. 6 miles.——*Cottapatam* (కొత్తపట్నం - kottapatnam, Tel.). See sep. title.——*Dasarauzpully* (దసరాజుపల్లి - dasarádzupalli, Tel.). From (dasarádzu, tel. proper name + palli, tel. village). Village; pop. 3,240; lat. 15° 32′; long. 80° 08′; from Nellore N. 75 miles; from Ongole E.N.E. 3 miles; from the sea W. 9 miles. A hamlet

of Caravady.——*Eedoomoody* (ఈడుముడి - ídumúdi, Tel.). From (ita, tel. date palm, phœnix farinifera, roxb. + púdi, tel. village). Village; pop. 1,142; acres 1,514; lat. 15° 43′; long. 80° 14′; from Nellore N. 88 miles; from Ongole N.E. 17 miles; from the sea W. 6 miles. Manufacture of white blankets [cumbly].——*Eetamookkala* (ఈతముక్కల - ítamukkala, Tel.). From (íta, tel. date palm, phœnix farinifera, roxb. + mukka, tel. portion). Village, Port; pop. 3,223; lat. 15° 23′; long. 80° 09′; from Cottapatam S.W. 6 miles; from Madras N. 155 miles; from Nellore N. 64 miles; from Ongole S.S.E. 10 miles; from Paucala N.N.E. 7 miles. Between Paucala and Paudarty. Resorted to chiefly by native craft. Anchorage good. Formerly a salt [ooppoo] factory [cotaur]. Village goddess is Jwaulamookhy. Festival for five days in Shrauvanam [mausam] or august.——*Goondamorla* (గుండమొర్ల - gundamorla, Tel.). From (gundu, tel. round + móra, tel. face). Village, Bay; lat. 15° 30′ N.; long. 80° 15′ E.; from Nellore N.N.E. 73 miles; from Ongole E. 10 miles. The bay is north of the village, about 2 miles south of the Goondlacumma river. Bar open throughout the year. Vessels formerly resorted to it as an anchorage during N.E. monsoon [q.v.]. A hamlet of Paudarty.——*Goondlacumma* (గుండ్లకమ్మ - gundlakamma, Tel.). See sep. title.——*Inamanamelloor* (ఇనమనమెల్లూరు - inamanamellúru, Tel.). From (inumu, tel. iron + meda, tel. neck + úru, tel. village). Village; pop. 2,562; acres 5,041; lat. 15° 36′; long. 80° 07′; from Nellore N. 79 miles; from Ongole N.N.E. 7 miles; from the sea W. 11 miles. On right bank of Goondlacumma. Formerly head-quarters of a Tahsildar [q.v.]. Ruins of fort. Cloth dyeing [shauyam].——*Medaramittah* (మేదరమిట్ల - médaramitta, Tel.). From (médari, tel. basket-weaver + mitta, tel. mound). Village; pop. 2,717, the village is clubbed with Bodwauripollem; acres 8,130; lat. 15° 43′; long. 80° 04′; from Nellore N. 87 miles; from Ongole N. 15 miles; from the sea W. 17 miles. Trig. station in lat. 15° 43′ 54·04″; long. 80° 02′ 53·59″; height 568 feet; from Ongole N.N.W. 15 miles; from Tammavaram E.N.E. 3 miles; from the sea W. 19 miles.——*Meilavaram* (మైలవరము - mailavaramu, Tel.). From (maila, tel. dirt + pura, san. town). Village; pop. 308; acres 2,011; lat. 15° 39′; long. 80° 02′; from Nellore N. 82 miles; from Ongole N.N.W. 11 miles; from the sea W. 18 miles. Brass [pittalay] vessels manufactured.——*Mooshy* (ముశి - mushi, Tel.). See sep. title.——*Nidamanore* (నిడమనూరు - nidamanúru, Tel.). From (nidama, tel. long + úru, tel. village). Village; pop. 2,841; acres 3,541; lat. 15° 39′; long. 80° 07′; from Nellore N. 83 miles; from Ongole N. 10 miles; from the sea W. 13 miles. On Mooshy. Remarkable for breed of cattle [maud].——*Nishaunicondah* (నిషానికొండ - nishánikonda, Tel.). From (nisháni, hind. signal + konda, tel. hill). Trig. station; lat. 15° 31′ 01·96″; long. 79° 37′ 12·62″; height 2,185 feet; from Irsaulagoondam E.S.E. 5 miles; from Ongole W. 31 miles; from the sea W. 42 miles.——*Ongole* (వంగోలు - vangólu, Tel.). See below.——*Pashoomoodra beacon* (పసుముద్ర - pasumudra, Tel.). From (pasulu, tel. cattle + mudra, tel. stamp). Trig. station; lat. 15° 18′ 30·73″; long. 80° 8′ 13·96″; from Anantavaram S.S.E. 3 miles; from Ongole S.S.E. 14 miles.——*Paudarty* (పాదర్తి - pádarti,* Tel.). From (pádu, tel. ruin + parti, tel. village). Village, Port; pop. 2,186; acres 8,276; lat. 15° 28′; long. 80° 14′; from Canoopurty S.S.W. 9 miles; from Cottapatam N.N.E. 1¾ miles; from Madras N. 161 miles; from Nellore N. 71 miles; from Ongole E.S.E. 9 miles.——*Pautapaud beacon* (పాతపాడు - pátapádu, Tel.). From (páta, tel. old + pádu, tel. village). Trig. station; lat. 15° 30′ 24·03″; long. 80° 14′ 29·66″; from Devarampaud S. 3 miles; from Ongole E. 10 miles.——*Pelloor* (పెల్లూరు - pellúru, Tel.). From (pella, tel. ruin + úru, tel. village). Village; pop. 1,376; lat. 15° 28′; long. 80° 06′; from Nellore N. 69 miles; from Ongole S. 4 miles; from the sea W. 10 miles. On the great northern road. Fort in ruins. Head-quarters of the Vencatagherry rajah's tahsildar [q.v.] of Pelloor talook [q.v.].——*Pondore* (పొందూరు - pondúru, Tel.). From (ponnu, tel. gold + úru, tel. village). Village; pop. 2,678; acres 3,272; lat. 15° 25′; long. 79° 58′; from Nellore N. 66 miles; from Ongole S.W. 11 miles; from the sea W. 15 miles. Trade in indigo [q.v.]. On the Mooshy.——*Santanootalapaud* (సంతనూతలపాడు - santanútalapádu, Tel.). From (santa, tel. fair + núyi, tel. well + pádu, tel. village). Village; pop. 1,246; acres 9,272; lat. 15° 33′; long. 79° 59′; from Nellore N. 75 miles; from Ongole W.N.W. 8 miles; from the sea W. 19 miles. Indigo trade.——*Shingaricondah* (శింగరికొండ - shingarikonda, Tel.). From (singamu, tel. lion + konda, tel. hill). Hill; lat. 15° 52′; long. 80° 01′; from Nellore N. 96 miles; from Ongole N.N.W. 25 miles; from the sea W. 38 miles. A small hill 3 miles north-west of Addanky. Temple to Vishnoo [q.v.] as Narsimhasawmy.——*Tangootore* (టంగుటూరు - tangutúru, Tel.). Town; pop. 8,096; acres 9,290; lat. 15° 21′; long. 80° 05′; from Nellore N. 61 miles; from Ongole S. 12 miles; from the sea W. 5 miles. On the trunk road from Madras to Ganjam. Traveller's bungalow [q.v.]. Two temples one of Shiva as Naugeshwarasawmy, the other of Vishnoo as Chennakeshwarasawmy. Festivals to Shiva in Maugham [mausam] or february and to Vishnoo in Veishaukham or may. Car ceremonies [ratotsavam] are celebrated. Coloopoo [q.v.] or festival of village goddess performed to Ledotamma once in two years in June.——*Valaparla* (వలపర్ల - valaparla, Tel.). From (vala, tel. right + pari, tel. side). Village; pop. 2,705; acres 3,453; lat. 15° 56′; long. 80° 05′; from Nellore N. 101 miles; from Ongole N. 29 miles; from the sea W. 67 miles. Handkerchiefs [roomaul] woven.——(2) Town, Head-quarters of Sub-collector, Assistant superintendent of Police, District moonsif, Tahsildar and Sub-registrar. Hospital, Telegraph station. A municipal town; Nellore dist., Ongole tal.; pop. 10,860; acres 2,838; lat. 15° 31′; long. 80° 06′; from Madras N. 168 miles; from Naidoopett N. 111 miles; from Nellore N. 72 miles; from the sea W. 11 miles. In northern extremity of district; 11 miles north-east of left bank of Mooshy. In 1794 seat of a collectorate distinct from Nellore. Before British rule, this part of the country was ruled over by a dynasty of Shoodra rajahs, one of whom, about 150 years ago, built the fort. His seat of government however was at Addanky. The fort is now in ruins. The scenery in the neighbourhood is picturesque. The town is subject to occasional shocks of earthquake [mahy campam]. The hill near the fort is impregnated with iron [auhan]. American baptist mission has a large station. Travellers' bungalow [q.v.]. The rajah's descendants built a Vishnoo [q.v.] temple on one hill and his diwaun [q.v.] Vencauyalapauty veeranna built a Shiva [q.v.] temple on another. Trade in dry grain [q.v.] and pulses [dholl]. The great Northern trunk road and a branch road through Addanky connects it with Santamauglore 50 miles distant in the Kistna district on the Bellary-Kistna railway. Trig. station in lat. 15° 29′ 56·85″; long. 80° 04′ 53·90″; height 249 feet; from Coppole W.N.W. 3 miles; from Ongole S.W. 1 mile; from the sea W. 12 miles.

OOBBEY (ಉಬ್ಬು - ubbe, *Can.*). From (ubbu, can. to swell). Steam, worshipped as god by washermen [dhoby].

OOBHAYA (उभय - ubhaya, *San.*). From (ubh, san. to break). Both.——*Oobhaya cavy* (उभयकवि - ubhayakavi, San.). From (above + kavi, san. poet). A poet who writes in two languages, as Sanscrit and Tamul.——*Oobhayam* (ഉഭയം - ubhayam, Mal.; உபயம் - ubayam, Tam.). Anything offered or devoted to religious purposes; ceremonies performed in temples [coil, pagoda]. In malabar applied to the fruit-bearing trees; cocoanut [q.v.], betel nut [q.v.], jack [q.v.] and pepper [q.v.] vine [keracalpam].——*Oobhaya raushy* (ಉಭಯರಾಶಿ - ubhayaráshi, Can.). From (above + ráshi, san. heap). Heap of corn gathered and stacked, but not yet apportioned between the two sharers.

OOD (عود - úd, *Ar.*). From (áda, ar. to restore). Benzoin.——*Oodbutty* (عود بتی - údbattí, Hind.). From (above + battí, hind. stick). Incense stick.

OOD (ال - ud, *Ar.*). Al before d in Arabic compounds, as Mohee ood deen [al].

OODAH (اودا - úda, *Hind.*; ஊதா - úthá, *Tam.*). Purple or blue. Plant first term, often joining two genera. Ex., where transl. is of second term:—Barleria cristata (úthámulli), thorny shrub; Exacum bicolor (údácharáitah), swertia chirata; Hibiscus syriacus (údágudhel), hibiscus rosa-sinensis; Justicia gendarussa (údísambhálú), vitex negundo. See gloss. paragraphs.

OODAMALPETT (உடுமலைப்பேட்டை - udumalaippéttai, *Tam.* udamalpet*). From (udu, tam. sheep + malai, tam. mountain + péttai, tam. suburb). Sanscrit name (chakragiri), meaning circle + mountain.——(1) Talook, Coimbatore district. Tahsildar's pay Rs. 175. Area 583 square miles. Population 143,056. Language Tamul. S. of district. Bounded N. by Pulladam talook; E. by Dharaupooram talook and Pulney talook of Madura district; S. by Travancore territory, the Anamullays being the great S. barrier; W. by Pollachy talook. Amaravatty flows nearly due north on the eastern edge. An open, gently undulating plain, flat in black cotton [regar] tract on W. and N., but undulating in the S. and E. The climate is fairly good, but the winds of the south-west monsoon are severely felt. Western portions share in the moisture brought by the south-west monsoon [q.v.]. The proximity of the hills gives a fair rainfall and abundant water to villages on the south. Forests are a notable feature. The open, sandy, and treeless wastes south-east of Oodamalpett near the foot of the hills were once rich jungles like those of Anamullay, but are now treeless and exhausted. Pasture, except in forests and proximity of hills, is scanty; especially in black cotton and stony tracts. Soils comprise 15 per cent. of red loam, 62 per cent. of red sand, 12 per cent. of black clay, and 11 per cent. of black loam. Red soil is chiefly on the N., S. and E.; black on the S. and W.; hardly any of the latter is found E. of the road running N. and S. between Dhully and Periyaputty. The so-called red sand is in some parts very stony and gravelly, and in the N. and E. there is a good deal of hard calcareous tufa [munn]. Wet crops are paddy [q.v.] and sugar-cane [q.v.]. Dry crops are cholum [q.v.], cumboo [bajrah], raggy [q.v.], tinay [q.v.], shaumay [q.v.], varagoo [q.v.], horse-gram [q.v.], pulses [dholl], Bengal gram [q.v.], gingelly [q.v.] seed, castor-seed [aumanac], cotton [q.v.]. Garden crops are cholum, cumboo, raggy, tinay, shaumay, varagoo, tobacco [pogauk], and cummin [jeerah]. The fine yield of cholum and cotton seed provides a vast amount of dry and rich cattle food and the cumboo, dholl and cotton stalks yield fuel. Firewood is largely supplied from the forests. Fruit trees grow well, the tamarinds [q.v.] and pomegranates [anaur] being very good, the latter the finest of their species. Trade is considerable; chiefly

in cotton, grain and cloths. The only important ferry is that over the Amravatty on the Pulney road. The talook is chiefly irrigated by the Amravatty and partly by the Coothiraiyaur and Palaur, and tanks supplied by them, and also a few rain-fed tanks [q.v.]. The river irrigation is good and continues from June to April. Projects for a new anicut [q.v.] below Cullaupooram. Zemindarries :—Jotamputty, Meivaudy, Metrautty, Toongauvy, Vedaputty. Places of archæological interest :—Cadatore, Caniyore, Cholamaudevy, Comauralingam, Cooroomullay, Cozhmam, Cunnaudipoottore, Dhully, Goodimungalam, Madattoocalam, Poondy, Shuncararamanullore, Trimoortycoil. Principal Trig. station :—Colloopolliem. The leading places, &c., in the talook are the following.——*Amravatty* (அமராவதி - ámarávathi, Tam.). See sep. title.——*Anamullay* (ஆனைமலை - ánaimalai, Tam.). See sep. title.——*Bhootinuttam* (பூதிநத்தம் - púthinattam, Tam.). From (bhúti, san. prosperity + nattam, tam. village). Village; pop. 1,459; acres 3,857; lat. 10° 34′; long. 77° 15′; from Coimbatore S.S.E. 34 miles; from Oodamalpett S.W. 3 miles. Well irrigated by Amravatty. Sugar-cane [q.v.]. Gives name to a chain of tanks extending from Dhully to Oodamalpett.——*Cadatore* (கடத்தூர் - kadattúr, Tam.). From (kadam, tam. jungle + úr, tam. village). Village; pop. 2,661; acres 1,534; lat. 10° 37′; long. 77° 27′; from Coimbatore S.E. 40 miles; from Oodamalpett E. 10 miles. Old Shiva temple built by Chola king.——*Caniyore* (கணியூர் - kaniyúr, Tam.). From (kani, tam. cultivated land + úr, tam. village). Village; pop. 2,987; acres 765; lat. 10° 36′; long. 77° 26′; from Coimbatore S.E. 39 miles; from Oodamalpett E. 9 miles. Small temple in ruins. Small ruined fort which belonged to Coomaran, a ruler celebrated in country ballads. 4 miles W. are ruined Mahomedan buildings.——*Cauratolzo* (காரத்தொழுவு - kárattozhuvu, Tam.). From (kárai, tam. tree, canthium parviflorum, lamk. + tozhuvam, tam. cattle stall). Village; pop. 2,293; acres 3,046; lat. 10° 37′; long. 77° 26′; from Coimbatore S.E. 38 miles; from Oodamalpett E.N.E. 9 miles.——*Colloopolliem* (கொள்ளுப் பாளையம் - kolluppálaiyam, Tam.). From (kollu, tam. horse-gram, dolichos biflorus, linn. + pálaiyam, tam. camp). Trig. station; lat. 10° 41′ 43·96″; long. 77° 21′ 38·76″; height 1,208 feet; from Goodimungalam E. 3 miles; from Oodamalpett N.E. 9 miles.——*Comauralingam* (குமாரலிங்கம் - kumáralingam, Tam.). From (kumára, san. the son god + linga, san. phallic emblem of shiva). Village; pop. 4,320; acres 6,653; lat. 10° 29′; long. 77° 24′; from Coimbatore S.E. 44 miles; from Oodamalpett S.E. 10 miles. Ancient Shiva temple built by a Chola king. Irrigated by Amravatty.——*Cullaupooram* (கல்லாப்புரம் - kallappuram, Tam.). From (kal, tam. stone + pura, san. town). Village; pop. 250; acres 2,603; lat. 10° 26′; long. 77° 20′; from Coimbatore S.S.E. 45 miles; from Oodamalpett S.S.E. 11 miles. Enclosed by hills and jungle. Irrigated by Amravatty.——*Dhully* (தளி - tali, Tam.). Means a temple. Village; pop. 2,085; acres 7,982; lat. 10° 31′; long. 77° 14′; from Coimbatore S.S.E. 37 miles; from Oodamalpett S.W. 7 miles. Close to Anamullay and Trimoortycoil. Former head-quarters of poligar [q.v.]. Village resumed after rising of poligar in 1800.——*Jelliputty* (செல்லிப்பட்டி - shellippatti, Tam.). From (jalli, can. road metal + patti, tam. cattle-fold). Village; pop. 3,063; acres 3,317; lat. 10° 30′; long. 77° 15′; from Coimbatore S.S.E. 38 miles; from Oodamalpett S.S.W. 7 miles.——*Jotamputty* (சோத்தம்பட்டி - shóttambatti, Tam. jotampati *). From (jótanu, can. proper name + patti, tam. cattle-fold). Village; pop. 646; acres 2,086; lat. 10° 36′; long. 77° 24′; from Coimbatore S.E. 38 miles; from Oodamalpett E. 7 miles. Poliput [q.v.]. Peshcush Rs. 143.——*Meivaudy* (மைவாடி - maivádi,* Tam.). From (mai, tam. black + vádi, tam. enclosure). Village; pop. 1,670; acres 6,025; lat. 10° 36′; long. 77° 22′; from Coimbatore S.E. 36 miles; from Oodamalpett E. 5 miles. Poliput [q.v.]. Peshcush Rs. 561.——*Metrautty* (மெட்ராத்தி - medrátti, Tam. metráthi *). From (metta, tel. mound + ráyi, tel. stone). Village; pop. 3,031; acres 7,208; lat. 10° 39′; long. 77° 23′; from Coimbatore S.E. 35 miles; from Oodamalpett E.N.E. 8 miles. Poliput [q.v.]. Peshcush Rs. 1,965.——*Oodamalpett* (உடுமலைப்பேட்டை - udumalaippéttai, Tam.). See below.——*Palaur* (பாலாறு - páláru, Tam.). See sep. title.——*Toongauvy* (துங்காவி - tungávi,* Tam.). From (tunga, san. height + ávi, tam. tank). Village; pop. 2,701; acres 6,309; lat. 10° 38′; long. 77° 23′; from Coimbatore S.E. 36 miles; from Oodamalpett E.N.E. 6 miles. Poliput [q.v.]. Peshcush Rs. 848.——*Trimoortycoil* (திருமூர்த்திக்கோவில் - tirumúrttik-kóvil, Tam.). From (trimúrti, san. the trinity + kóvil, tam. temple). Village; lat. 10° 28′; long. 77° 12′; from Coimbatore S.S.E. 39 miles; from Oodamalpett S.W. 10 miles. Venerated shrine of Hindoo triad [trimoorty], consisting of old mantapam [q.v.] with rock sculptures. Near a stone-built chuttram [q.v.] close by eight stone images surround a stone pillar. Pilgrims on Sundays all year round. Annual festival. The temple is built exactly on the water-shed; that part of the stream on which it is situated flows into the Arabian sea, and the other part, diverted by a dam, flows into a feeder of the Cauvery and thence into the Bay of Bengal.——*Vedaputty* (வேடப்பட்டி - védappatti, Tam. vedapati *). From (védan, tam. a hunter + patti, tam. cattle-fold). Village; pop. 440; acres 1,371; lat. 10° 35′; long. 77° 24′; from Coimbatore S.E. 39 miles; from Oodamalpett E. 8 miles. Poliput [q.v.]. Peshcush Rs. 146.——**(2)** Town, Talook head-quarters; Coimbatore dist., Oodamalpett tal.; pop. 5,308; acres 1,942; lat. 10° 35′; long. 77° 18′; height 1,192 feet; from Coimbatore S.E. 34 miles; from Erode S.S.W. 62 miles; from Madras S.W. 268 miles; from Ootacamund S.S.E. 66 miles; from Pollachy E.S.E. 17 miles; from Suttimungalam S. 63 miles. Staging bungalow [q.v.]. Weekly market on Monday.

OODAN (உடன் - udan, *Tam.*). With.——*Oodambadikay* (உடம்படிக்கை - udambadikkai, Tam.). From (above + padi, tam. to unite). A covenant [caraur nauma, dastavaiz].

OODAYAGHERRY (اُدگیر - udgír, *Hind.*; ఉదయగిరి - udayagiri,* *Tel.*). From (udaya, san. rising + giri, san. mountain) [bot]; hill of sunrise or the east.——**(1)** Talook, Nellore district. Tahsildar's pay Rs. 150. Area 871 square miles. Centre inland part of district. Bounded :—On north by Canigherry, on west by Eastern ghauts, on south by Atmacore, on east by Cauvaly. The extreme north-west is occupied entirely by the Calastry zemindarry. Other villages belonging to the Zemindarry are scattered throughout the talook. The west of the talook is very hilly. In the north-west there is a detached range of hills, and the country between them and the Veligondas is very unhealthy. The south of the talook is drained by the Boggair and the north by the Munnair and its tributary the Pillapair. Soil fertile in the east, rocky and covered with jungle in the west. A large indigo [q.v.] factory at Garimenpenta. Copper [taumram] formerly found in same neighbourhood. Rivers are Munnair and Boggair. Principal tanks [q.v.] :—Choontsoolore, Mondaulla nauyoonipulley tanks, Nundavaram, Oodayagherry, Totala chervoopulley and Vencatrowpulley. A large reservoir once existed in the zemindarry villages near Gundypollem. No other means of irrigation except wells on the banks of the Boggair, from which water is raised. Many garden lands are watered by private wells. Camping grounds :—Doottalore, Nundipaud, Oodayagherry, Yaipalgoonta. Places of archæological interest :—Alamail mungaupooram, Dausaripully, Devammacheroo, Masahibpett, Maseedpulley, Nullagonda, Nundipaud, Oodayagherry. Principal trig. stations :—Chaucolloo, Oodayagherry droog, Yerracondah. The leading places, &c., in the talook are the following.——*Chaucolloo* (చాకొల్లు - tsákollu, Tel.). From (tsáki, tel. washerman + kolanu, tel. tank). Trig. station; lat. 14° 56′ 47·83″; long. 79° 33′ 25·68″; height 610 feet; from Bolinivauripollem W.S.W. ¾ mile; from Oodayagherry E.N.E. 15 miles.——*Corisa condah* (గొరిసకొండ - korisakonda, Tel.). From (gorise, tel. hoof + konda, tel. hill). Hill.——*Cumpasamoodram* (కంపసముద్రము - kampasamudramu, Tel.). From (kampa, tel. brushwood + samudra, san. ocean). Village; pop. 1,027; acres 4,513; lat. 14° 47′; long. 79° 17′; from Nellore N.W. 54 miles; from Oodayagherry S.S.W. 7 miles. The Boggair takes its rise in the Veligondas near Vencatapooram village, 4 miles from village.——*Dausaripully* (దాసరిపల్లె - dásaripalle, Tel.). From (dásari, tel. member of the caste + palle, tel. village). Village; pop. 328; lat. 14° 52′; long. 79° 23′; from Nellore W.N.W. 51 miles; from Oodayagherry E. 3 miles. Cave with an inscription [shausanam].——*Doottalore* (దుత్తలూరు - duttalúru, Tel.). See sep. title.——*Dornaul* (దొరనాల - doranála, Tel.). See sep. title.——*Garimenpenta* (గరిమెనపెంట - garimenapenta, Tel.). From (garima, tel. great + penta, tel. heap). Village; pop. 2,323; lat. 15° 00′; long. 79° 36′; from Nellore N.W. 47 miles; from Oodayagherry N.E. 20 miles. Large indigo [q.v.] factory. Copper [taumram] formerly found.——*Gundy pollem* (గండిపాలెము - gandipálemu, Tel.). See sep. title.——*Khancheroo* (ఖాన్‌చెరువు - khâncheruvu, Tel.). From (khán, hind. mahomedan title + cheruvu, tel. tank). Shrotriem [q.v.] village; pop. 662; acres 1,799; lat. 15° 01′; long. 79° 24′; from Nellore N.W. 56 miles; from Oodayagherry N.N.E. 10 miles. Ancient temple to Varadarajan and Anjaneyan. Endowed by the Shrotriemdar [q.v.]. On a small hill in the village a Shivaulyam founded by a Cumsaula [q.v.] about fifty years ago, still living. Festivals are celebrated on Shivarautry [pundigay, 6a] and Caurtigay [mausam] or November soma vauram [q.v.] or monday. Part of the village belongs to Calastry zemindarry. Dry and garden crops [vellaumay] are raised.——*Munnair* (మన్నేరు - mannéru, Tel.). See sep. title.——*Oodayagherry* (ఉదయగిరి - udayagiri, Tam.). See below.——*Saucalacondah* (చాకలకొండ - tsákalakonda, Tel.). From (tsákali, tel. washerman + konda, tel. hill). Shrotriem village; pop. 2,568; acres 16,471; lat. 41° 57′; long. 79° 34′; from Nellore N.W. 46 miles; from Oodayagherry E.N.E. 16 miles. Belongs to Bootchireddipollem reddy.——*Seetaramapooram* (సీతారామపురము - sítárámapuramu, Tel.). From (sítáráma, san. ráma with síta + pura, san. town). Village; pop. 3,233; lat. 15° 01′; long. 79° 11′; from Nellore N.W. 68 miles; from Oodayagherry N.W. 15 miles. Belongs to Calastry. Near the Veligondas. Remains of an old fort, built of stone in mud, which enclosed 1 gorroo [q.v.] or 3½ acres of land. The walls are eight cubits high.——*Singanapulley* (సింగనపల్లె - singanapalle, Tel.). From (singanna, tel. proper name + palle, tel. village). Village; pop. 806; lat. 14° 42′; long. 79° 16′; from Nellore N.W. about 53 miles; from Oodayagherry S.S.W. 13 miles. At the foot of the Veligondas.——*Varigoontapaud* (వరిగుంటపాడు - variguntapádu, Tel.). From (vari, tel. paddy + gunta, tel. pond + pádu, tel. village). Village;

pop. 1,220; lat. 15° 00′; long. 79° 28′; from Nellore N.W. 52 miles; from Oodayagherry N.E. 12 miles. Many Balijes [q.v.] here who trade in pearls [moty].——*Veligonda* (వెలిగొండ - veligonda, Tel.). See sep. title.——*Venganapollem* (వెంగనపాలెము - venganapálemu, Tel.). From (venganna, tel. proper name + pálemu, tel. fortified village). Village; pop. 3,902; lat. 14° 57′; long. 79° 31′; from Nellore N.W. 48 miles; from Oodayagherry N.E. 13 miles.——*Vinjamore* (వింజమూరు - vinjamúru, Tel.). From (vinjamma, tel. proper name + úru, tel. village). Village; pop. 5,256; lat. 14° 50′; long. 79° 38′; from Nellore N.W. 37 miles; from Oodayagherry E. 19 miles. Belongs to Calastry. Many betel [q.v.] leaf gardens.——*Yaipalgoonta* (ఏపలగుంట - épelagunta, Tel.). From (épe, tel. tree, hardwickia binata, roxb. + gunta, tel. pond). Village; pop. 1,160; acres 6,053; lat. 14° 47′; long. 79° 21′; from Nellore N.W. 50 miles; from Oodayagherry S. 7 miles. Exceedingly fine muslins [q.v.] once made.——*Yerracondah* (ఎర్రకొండ - errakonda, Tel.). See sep. title.——**(2)** Town, Hill, Head-quarters of Tahsildar and Sub-registrar; Nellore dist., Oodayagherry tal.; pop. 3,885; acres 10,651; lat. 14° 53′; long. 79° 20′; height of hill 2,954 feet; from Madras N.W. 141 miles; from Naidoopett N.W. 77 miles; from Nellore N.W. 54 miles; from Ongole S.W. 66 miles. A channel [q.v.] called Conacaulwa brings water from the hill. Very numerous Mahomedan population, descendants of the courts of former nawaubs [q.v.], now in a state of poverty. Formerly a wall round this town, which has entirely disappeared. There are said to have been 360 pagodas [q.v.], demolished by the Mahomedans. There were three more important than the rest, two in the village and one at the foot of the droog [q.v.]. Formerly a place of importance, and the capital of a small kingdom founded by Langoolya gajapaty [q.v.] in the fourteenth century, one of whose descendants was defeated by Krishnaroyel in 1509. From that date it was held by semi-independent chiefs, who repeatedly rebelled against the central authority at Golcondah. Four generations ago the Jagheer [q.v.] of Oodayagherry was granted by the Court of Hyderabad to a certain family, who remained undisturbed till 1839, when the holder Abbaus ally khan was deprived of it for treasonable conduct. He died a state prisoner in 1841. The next representative of the family Ghouse ally khan resided at Nellore as quasi state prisoner with a monthly pension of Rs. 250. He died in 1873. His son Davood ally now enjoys the pension. The hill once strongly fortified is quite isolated, being 8 miles from main chain of Eastern ghauts [q.v.]. The position was a very strong and commanding one. It consisted of thirteen fortresses, eight on hill and five below. About nine-tenths of hill is rendered inaccessible, except by three or four paths communicating with the low country, by precipices varying from 400 to nearly 1,000 feet in height; and every path is defended by several lines of fortification, aided by horse-shoe towers, which, built upon every rock commanding the roads or rather steps render it a very formidable place to attack. The northern part of the hill is lowest, and on this side is the principal approach, which consists of a flight of steps, running along the face of a deep ravine, and commanded by several towers and many lines of rampart and bastion. Within the fortifications is a small village, inhabited by Mootraucha [q.v.] people, descendants of former servants of the Hindoo rajahs, and the remains of temples, palaces and tombs. The southern or highest part of the hill is connected with the northern by a narrow way flanked on either side by precipices, with very precipitous paths to the low country on the east and west sides, and here again the fortifications are very numerous though not in such good repair as on the north. The southern hill is the highest, and from within the fortifications which enclose it there is only one path to the low country, constructed almost entirely in masonry steps along the face of the precipices on the west side. This staircase is a most extraordinary work, taking advantage of every mass of rock which could give it some support and zigzagging along and under overhanging cliffs many hundred feet high, while the sheer drop from the edge of the steps is in many places 100 to 150 feet. These stairs lead to a lower line of ramparts on the west side, within which the principal supplies of water are found. The climate on the top of the hills is about 15 degrees cooler than Oodayagherry itself. The water is most excellent, though difficult of access from the higher levels, while the hills are entirely free from fever at all times of the year. On the top of the Droog is a mosque [musjid] on which are two Persian inscriptions [shausanam] relating the establishment of a garden on the hill in Hijra [q.v.] 1070 or A.D. 1659, and of the mosque in question in Hijra 1071 or A.D. 1660 by Sheikh hoossain in the reign of Abdoollah shah of the Golcondah Cootb shahy dynasty [raj]. There are other inscriptions dated A.D. 1543 and 1546. Trig. station in lat. 14° 51′ 54·14″; long. 79° 19′ 03·91″; height 2,954 feet; from Gungireddipollem S.W. 4 miles; from Oodayagherry W.S.W. 2 miles. For Oodayagherry in Ganjam and Travancore see under Oot.

OODAYARPOLLIEM (உடையார்ப்பாளையம் - udaiyárppálaiyam, *Tam.* udayarpalaiyam *). From (udaiyán, tam. member of the caste + pálaiyam, tam. fortified village); no connection with oodaya, east [wodeya]. Sanscrit name (brahmapurí), meaning bramha, the god + town; also (mudgapurí), meaning kidney bean, phaseolus mungo, linn. + town.——**(1)** Talook, Trichinopoly district. Tahsildar's pay Rs. 200. Area 753 square miles. Greatest length from N. to S. 29 miles, breadth from S.W. to N.E. 45 miles. 222 square miles are included in Oodayarpolliem and Ariyalore zemindarries. The former is entirely in this talook, and the latter divided between it and Perambalore. Population 290,563. Language Tamul. N.E. of district. Bounded N. by the Vellaur and Vriddachellam talook of South arcot, S. by the Coleroon, E. by Chidambaram talook of South arcot, and W. by Perambalore and Trichinopoly talooks. The general aspect is flat, and there are no mountains or hills of importance. About 63,750 acres are covered with low brushwood jungle. Soil is for the most part a mixture of red sand [manal] and clay [calimunn]. Stripes of black soil run along the banks of the Vellaur and Coleroon. To the west and throughout the greater part of Ariyalore zemindarry the soil is black cotton [regar] thinly spread over a substratum of limestone [choonam cull]. Varagoo [q.v.], cumboo [bajrah], raggy [q.v.], dholl [q.v.], horse-gram [q.v.], gingelly [q.v.], oil [yennay] seed, groundnut [q.v.] and indigo [q.v.], are grown. Large quantities of firewood are carried for sale from different parts to Tanjore district. Weaving [nesavoo] and auvauram [tungaid] bark industry. There is little wet cultivation. The Ponnairy channel from the Coleroon irrigates seventeen villages. Candarauditayam channel, taken off at the Nandaiyaur anicut [q.v.] in Trichinopoly talook, irrigates seven villages. The most important tanks [q.v.] are the Candarauditayam tank, the tank in Shreepoorandaun village, and Shoocra tank. Places of archæological interest:—Ambaupooram, Ariyalore, Candarauditayam, Carookkeicauvalapparcoil, Caumarasavully, Gungaycondapooram, Jayancondacholapooram, Keelaiyore, Keelpaloovore, Oodayarpolliem, Tirmalvaudy, Tirmanore, Vicramam, Vunnam. Principal Trig. stations:—Colattore, Cutchipermaul, Moottoovancherry, Neinapiriyaun, Shalooppay. The leading places, &c., in the talook are the following,——*Ariyalore* (அரியலூர் - ariyalúr, Tam.). See sep. title.——*Colattore* (குளத்தூர் - kulattúr, Tam.). From (kulam, tam. tank + úr, tam. village). Trig. station; lat. 11° 17′ 01·33″; long. 79° 22′ 40·55″; height 214 feet; from Oodayarpolliem N.N.E. 8 miles.——*Coleroon* (கொள்ளடம் - kolladam, Tam.). See sep. title.——*Cutchipermaul* (கச்சிப்பெருமாள் - kaççipperumál, Tam.). From a person of that name. Trig. station; lat. 11° 12′ 06·50″; long. 79° 21′ 07·37″; height 258 feet; from Oodayarpolliem N. 1 mile.——*Gungaycondapooram* (கங்கைகண்டப்புரம் - kangaikkandappuram, Tam.). See sep. title.——*Jayancondacholapooram* (செயங்கொண்டசோளப்புரம் - sheyangondasólappuram, Tam.). See sep. title.——*Keelpaloovore* (கீழப்பளுஆர் - kízhappaluvúr, Tam.). See sep. title.——*Maroothiyaur* (மருதையார் - maruthaiyár, Tam.). See sep. title.——*Moottoovancherry* (முத்துவாஞ்சேரி - muttuváñjéri, Tam.). From (muttuván, tam. proper name + shéri, tam. village). Trig. station; lat. 11° 02′ 12·90″; long. 79° 18′ 32·01″; height 183 feet; from Oodayarpolliem S. 10 miles.——*Neinapiriyaun* (நயினப்பிரியான் - nayinappiriyán, Tam.). From (nayinan, tam. aiyyanár + pirán, tam. lord). Trig. station; lat. 11° 07′ 51·83″; long. 79° 23′ 19·11″; height 133 feet; from Oodayarpolliem S.E. 5 miles.——*Oodayarpolliem* (உடையார்ப்பாளையம் - udaiyárppálaiyam, Tam.). See below.——*Shalooppay* (சலுப்பை - shaluppai, Tam.). From (shaluppu, tam. top of branches). Trig. station; lat. 11° 14′ 54·83″; long. 79° 28′ 59·76″; height 111 feet; from Oodayarpolliem E.N.E. 11 miles.——*Tirmalvaudy* (திருமழவாடி - tirumalaivádi, Tam.). From (tiru, tam. beautiful + mazhu, tam. the battle axe of shiva + pádi, tam. village). Sanscrit name (parashunrityapura), meaning battle axe + dance + town. Village; pop. 1,567; acres 1,287; lat. 10° 53′; long. 79° 07′; from Ariyalore S. 16 miles; from Oodayarpolliem S.W. 26 miles; from Trichinopoly E. 25 miles. Highly sculptured Shiva temple with Chola inscriptions.——*Valanday* (வளந்தை - valandai, Tam.). From (valam, tam. fertility + ai, tam. place). Village; pop. 4,761; acres 4,015; lat. 11° 20′; long. 79° 27′; from Ariyalore E.N.E. 25 miles; from Oodayarpolliem N.E. 12 miles; from Trichinopoly N.E. 59 miles. Weaving and bangle [gauzoo] making.——*Vellaur* (வெள்ளாறு - vellárn, Tam.). See sep. title.——**(2)** Zemindarry; Trichinopoly dist., Oodayarpolliem tal.; pop. 290,563. About 1,696 a peshcush [q.v.] of Rs. 40,000, was fixed upon this zemindarry by Nawaub [q.v.] of Carnatic [q.v.]. In 1757 the poligar [q.v.] was invaded by the French and forced to pay a tribute of same amount. In 1765 Nawaub assisted by English drove him from his polliem for refusal to contribute men and money for reduction of Madura. The expelled poligar took refuge first in Tanjore and then in Mysore until 1780, when with the assistance of Hyder he regained possession and was in possession till 1783, when he became renter of his district. The entire management of the estate was in 1798 handed over to an agent of the Nawaub; a monthly allowance of Rs. 1,000 being paid to poligar. This continued till Trichinopoly was made over to Company in 1801. On the 23rd December 1817 a Sunnud-i-milkyat-i-istimrar [q.v.] was issued to the poligar, he receiving merely the village in which he lived together with villages surrounding head-quarters. Present peshcush, Rs. 642.——**(3)** Town, General deputy collector's division; Trichinopoly dist., Oodayarpolliem tal.; pop. 7,739; lat.

11° 11'; long. 79° 21'; from Ariyalore E.N.E 15 miles; from Madras S.S.W. 144 miles; from Moosiry E.N.E. 59 miles; from Shreerungam N.E. 46 miles; from Trichinopoly E.N.E. 47 miles. Agricultural and market town, built in 1314 by poligar [q.v.] Chinna nullapoodeiyaur as directed in a dream. Head-quarters of the zemindarry. Formerly considerable but now much decayed. The zemindar's palace is in a ruinous state, but contains a fine durbar [q.v.] hall with some good wooden carving, and an inscription [shausanam]. It is in an old fort built by Mahrattas. Old Shiva temple with semi-circular tank.

OODID (उडिद - udída, *Mahr.*). Same as Black gram.

OODIPY (ಉಡುಪಿ - udipi, *Can.*). From (udu, san. star + pati, san. chief). The chief of the stars, i.e., the moon [chundran].—**(1)** Talook, South canara district. Tahsildar's pay Rs. 225. Area 787 square miles; N. central coast of district. Boundaries:—North, Coondapore talook; south, Mangalore talook; east, Mysore territory; west, Arabian sea. Western part is fairly level. East and north-east are hilly and include the lower spurs of the Western ghauts [q.v.]. Soil ferruginous and generally fertile. Agriculture is chief industry. Hand looms [tarry], exist. Inferior cloths manufactured at Oodipy. A tile [wode] factory at Malpey. Rice [q.v.], coir [q.v.], areca-nuts [q.v.], turmeric [country saffron], sandal-wood [sandal], sandal-wood oil and paddy [q.v.] are exported. Imports are kerosine oil, cloth, salt [ooppoo], glass-ware [cunnaudy] and china-ware. Irrigation is chiefly dependant upon rain, average fall 150 inches. During the dry season a supply of water is derived from rivers, streams, tanks and private wells. Camping grounds on the coast:—Oodipy, Bramhahwar, Caup, Kotey. Inland:—Hiriyadka, Caurcal, Ajekaur, Moodraudy, Hebry, Someshwaram and Halady. Places of archæological interest:—Bailore, Bramhahwar, Caurcal, Honnholey, Irvettore, Keravaushey, Maraney, Miyaura, Moollore, Nullore, Varanga, Yermaul, Yellarey, Yellore. The leading places, &c., in the talook are the following.—*Agoomby* (ಆಗುಂಬೆ - águmbi, Can.). See sep. title.—*Alevore* (ಅಲೆವೂರು - alevúru, Can.). Village; pop. 1,283. One of the sixteen nagarams mentioned in Bhootaula pandya's aliya santauna [q.v.] law.—*Andaur* (ಅಂದಾರ - andára, Can.). From (anda, san. egg), from egg-shaped peak of ghaut.—"*a*" Village; pop. 751; lat. 13° 20'; long. 75° 4'.—"*b*" Pass [ghaut]; South canara dist., Oodipy tal.; lat. 13° 20' 15" N.; long. 75° 4' E. Leads into Mysore; impracticable for vehicles.—*Balisauvira* (ಬಲಿಸಾವಿರ - balisávira, Can.). From (bali, can. family + sávira, can. thousand). A Maugaunam [q.v.] or Sub-division of the talook comprising a large area of forty-six villages; pop. 37,650. According to tradition one thousand balies [q.v.] or families of Naudavar [q.v.] following the Aliya santauna [q.v.] law of inheritance once lived in this area.—*Barcore* (ಬಾರ್ಕೂರು - bárkúru, Can.). See sep. title.—*Bramhahwar* (ಬ್ರಹ್ಮಾವರ - brahmávara, Can.). From (brahmá, san. the creator + pura, san. town). Sanscrit name (brahmapura), meaning same. Village; pop. 1,084; lat. 13° 26'; long. 74° 47'; from Mangalore N. 40 miles; from Oodipy N. 7 miles; from the sea E. 4 miles. On the route from Mangalore to Bednore. Former residence of Tahsildar of Barcore talook. Camping station.—*Calyaunapooram* (ಕಲ್ಯಾಣಪುರ - kalyánapura, Can.). See sep. title.—*Caup* (ಕಾಪು - kápu, Can.). From (kápu, can. protection). Maugaunam [q.v.] or Sub-division of talook [q.v.] comprising five villages, Sub-port; pop. 6,100; lat. 13° 13'; long. 74° 47'; from Bombay S.S.E. 406 miles; from Mangalore N.N.W. 25 miles; from Oodiyauvar S. 6 miles; from Oodipy S. 8 miles; from Ootchil N. 3 miles; from the sea E. 1½ miles. A camping station in Moollore village.—*Caurcal* (ಕಾರ್ಕಳ - kárkala, Can.). See sep. title.—*Chitpaudy* (ಚಿಟ್ಪಾಡಿ - chitpádi, Can.). From (chitta, can. small + pádi, can. a jungle); so called probably from scrub jungle surrounding the village. Village; pop. 421. Gives its name to a family of Ballaulas [q.v.] in Canara.—*Coonjaur* (ಕುಂಜಾರು - kunjáru, Can.). From (kunja, too. hill + úru, can. country). Can. also (durgabetta), meaning doorga, the goddess + hill. Sanscrit name (durgáchala), meaning doorga, the goddess + hill. Part of Caurcal, village.—*Daryah bahaudur ghur* (دریا بہادر گڑھ - daryábahádurgarh, Hind.). See sep. title.—*Hangarcutta* (ಹಂಗಾರಕಟ್ಟೆ - hangárakatte, Can.). See sep. title.—*Krishnapooram* (ಕೃಷ್ಣಾಪುರ - krishnápura, Can.). From (krishna, san. deity + pura, san. town). Mutt [q.v.]. One of the eight mutts [q.v.] in the town of Oodipy.—*Malpey* (ಮಲ್ಪೆ - malpe, Can.). See sep. title.—*Moodraudy* (ಮುದ್ರಾಡಿ - mudrádi, Can.). From (mudra, san. seal + adi, can. dependent). Village; pop. 1,897; from Mangalore N. 51 miles. Seat of a Ballaula chief under the Jeina [q.v.] chowtar rajah.—*Munnarghur* (ಮನ್ನಾರಘಡ - mannáraghada, Can.). From (manneyaru, can. king + garh, hind. fort). Site of a fort; lat. 13° 13'; long. 74° 46', from Mangalore N.W. 25 miles; from Oodipy S.S.W. 8 miles; from the sea E. ½ mile.—*Nellicaur* (ನೆಲ್ಲಿಕಾರು - nellikáru, Can.). From (nellu, can. paddy, oryza sativa, linn. + káru, can. wet season). Village; pop. 939. Good granite [caroom cull] quarries.—*Nidambore* (ನಿದಂಬೂರು - nidambúru, Can.). From (nidamba, can. the surname of a ballala who owned extensive estates in the mágani + úru, can. country). Village; pop. 1,645. Gives its name to a Ballaula [q.v.] family in Canara.—*Oodipy* (ಉಡುಪಿ - udipi, Can.). See below.—*Ootchil* (ಉಚ್ಚಿಲ - uççila, Can.). From (uççа, san. high + achala, san. mountain). A Sub-port; lat. 13° 11'; long. 74° 47'; from Bombay S.S.E. 408 miles; from Caup S. 3 miles; from Mangalore N.N.W. 23 miles; from Yermaul N. 1½ miles; from the sea E. ¼ mile. On a creek north of Mangalore.—*Padbidry* (ಪಡುಬಿದ್ರಿ - padubidri, Can.). From (paduva, can. west + bidu, can. vishnu + adri, can. mountain). Village, Sub-port; pop. 2,183; lat. 13° 07'; long. 74° 49'; from Bombay S.S.E. 412 miles; from Mangalore N.N.W. 19 miles; from Moolky N. 3 miles; from Oodipy S. 14 miles; from Yermaul S.S.E. 3 miles; from the sea E. ¾ mile. On a creek north of Moolky. Seat of a Ballaula family still extant.—*Palamar* (ಫಲಮಾರ - p'halamára, Can.). From (p'hala, san. fruit + árá, can. country). Village; pop. 1,290. Contains a mutt [q.v.] of one of the Oodipy sawmies.—*Poottigey* (ಪುತ್ತಿಗೆ - puttige, Can.). From (puttu, can. ant-hill + ga, can. suffix of possession). Village; pop. 3,241. A mutt [q.v.] belonging to one of the Oodipy sawmies.—*Saint Mary's isles* (ತೋನಸೆಪಾರ - tónasepára, Can.). See sep. title.—*Seetanuddy* (ಸೀತಾನದಿ - sítánadi, Can.). See sep. title.—*Someshwaram* (ಸೋಮೇಶ್ವರ - sómeshvara, Can.). From (sóma, san. epithet of shiva + íshvara, san. lord). Village; pop. 1,345; lat. 13° 29'; long. 75° 06'; from Mangalore N.N.E. 45 miles; from Oodipy E.N.E. 23 miles; from the sea E. 25 miles.—*Sooda* (ಸೂಡ - súda, Can.). From (chúdá, san. head). Village; lat. 13° 12'; long. 74° 54'; from Mangalore N. 23 miles; from Oodipy S.E. 12 miles; from the sea E. 8 miles. Temple of Soobramanyan [q.v.]. Car festival [ratotsavam].—*Sooraul* (ಸುರಾಲು - surálu, Can.). Village; pop. 355; lat. 13° 27'; long. 74° 53'; from Mangalore N. 39 miles; from Oodipy N.E. 10 miles; from the sea E. 10 miles. Seat of a Jeina [q.v.] rajah.—*Swarnanuddy* (ಸುವರ್ಣನದಿ - suvarnanadi, Can.). See sep. title.—*Varanga* (ವರಂಗ - varangá, Can.). Village; pop. 959; Jeina temple. Seat of a Jeina rajah of the Heggadey [q.v.] family.—*Yermaul* (ಯರ್ಮಾಳ - yarmála, Can.). Village, Sub-port; pop. 1,750; lat. 13° 10'; long. 74° 48'; from Bombay S.S.E. 410 miles; from Mangalore N.N.W. 21 miles; from Oodipy S. 12 miles; from Ootchil S.S.E. 1¾ miles; from Padbidry N.N.W. 3 miles. On a creek between Padbidry and Moolky.—**(2)** Town, Talook head-quarters, Place of pilgrimage; South canara dist., Oodipy tal.; pop. 7,272; lat. 13° 21'; long. 74° 47'; from Bombay S.S.E. 398 miles; from Coondapore S.S.E. 20 miles; from Malpey E. 3 miles; from Madras W. 374 miles; from Mangalore N. 33 miles; from Oodiyauvar N.N.E. 3 miles; from Poottore N.W. 50 miles; from Soobramanya N.W. 74 miles; from the sea E. 3 miles. Near the mouth of the Oodipy river. Formed of parts of Badagabett, Moodanidambore, Poollore and Shivully villages. Malpey is the recognized port. A road proceeds across the Agoomby ghaut [q.v.] into Mysore. Some islands form a harbour. Considered the most sacred spot in the Canarese country, and its shrines of Krishnan [q.v.] is much frequented by pilgrims from Mysore. There are three temples and eight mutts [q.v.]. Important festival once in two years. The temples are rude buildings, roofed with copper [taumram].

OODOO (உடு - udu, *Tam.*). Arrow.—*Oodoomoo* (गोधा - gódhá, San.; ضب - zabb, Ar.; سوسمار - súsmár, Pers.; گوہ - goh, Hind.; گھورپھور - ghorphor, Dec.; ಗೊಡ್ಡ - godda, Can.; ఉడుము - udumu, Tel.; ഉടുമ്പ - utumpu, Mal.; உடும்பு - udumbu, Tam.). Title from teloogoo. San. from (gudh, san. to envelop). Ar. from (zabba, ar. to attack); from the habit of striking with its tail. Hind. and Can. from sanscrit. Tel., Mal. and Tam. from (udu, tam. arrow). West indian title is Guana or Iguana. The terms may be considered co-extensive with the family Varanidæ, sauria [godhicay], reptilia [sarpy, 6], of naturalists [jantoo]. Water lizards. Belly protuberant; tail long and round, thick at commencement, tapering gradually towards sharp point; back, tail, and throat are serrated, whole surface covered with numerous shining scales, reflecting various colors in sunshine. This family contains the largest species of lizards [chipkalee]; most of them live in the neighbourhood of large rivers, excellent swimmers; carnivorous, feeding on all the different water-animals and on the eggs of birds, and likewise on those of other large reptiles. Movements on land are not much less rapid than in the water. Several species climb trees; active during a part of the night; able to remain under water for a prolonged period without the necessity of rising to the surface in order to breathe. Body of dried guana, made into electuary with ghee [q.v.] given in consumptive complaints, head, tail and feet, being removed. Flesh relished by Mahomedans, supposed to be strengthening. There is a Tamul proverb:—உடும்புக்கு இரண்டு நாக்கு மனிதனுக்கு ஒரு நாக்கு—"the iguana has two tongues, "man only one;" referring to its forked tongue. The representative species in southern india is Varanus lunatus. Banded water lizard. Neck, trunk, and tail marked with cross-bands, sides and legs dotted with white.

OOGAH (உகா - ugá, *Tam.*). From (uga, tam. to please); from shining leaves. Same as Tooth-brush tree.

OOGRA (उग्र - ugra, *San.*). Means pungency; in allusion to the pepper [q.v.]. The Malabar country.

OOKH (اوکھ - úkh, *Hind.*). From (ikshu, san. sugar-cane). Same as Sugar-cane.

OOL (ഉൾ - ul, *Mal.*; உள் - ul, *Tam.*). Within.—*Oolcoody* (உள்க்குடி - ulkkudi, Tam.). From (above + kudi, tam. an inhabitant). Khoodkasht of N. india. A permanent resident

tenant with hereditary rights, as distinguished from the paracoody [q.v.]. He stands between the mirassidar [q.v.] and the paracoody. See vol. I, 114.——*Ool cundauyam* (உடகந்தாயம் - udgandáyam, Tam.). From (above + kandáyam, tam. period of three months for the payment of taxes). Assessment not paid to Government, but to some other person.——*Oollauda* (ഉള്ളാട - ullâta, obl.; ഉള്ളാടൻ - ullátan, pers. sing.; ഉള്ളാടർ - ullátar, pers. pl., Mal.). From (above + âlu, mal. to rule); interior proprietors. A hunter tribe [veddah] at the base of the Cochin ghauts [q.v.].——*Oolmanay* (உள்மனை - ulmanai, Tam.). From (above + manai, tam. house). House within site of the village, opposed to Paramanay beyond.——*Oolsharat bhoomy* (உள்சரத்துப்பூமி - ulsarattuppúmi, Tam.). From (above + shart, hind. condition + bhúmi, san. earth). Sub-tenure.——*Ootchamayam* (உட்சமயம் - udchamayam, Tam.). From (ul, tam. within + samaya, san. religion). The six systems of religion considered orthodox by the Sheivas:—Veiravam making bheirava supreme; Vaumam regarding the female principle in nature as the primæval form of deity; Caulamookham similar to vaumam; Mauvratam teaching that the deity is a pure spirit; Paushoopatam similar to mauvratam; Sheivam which teaches that the deity is both spirit and matter, assuming form for accomplishing his purposes [augamam, matam, moorty].

OOLAH (உலா - ulá, *Tam.*). Abbreviation from (ulávu, tam. to walk). Procession. A species of poem in which the praises of a hero are sung.

OOLAMAH (علما - ulamá, *Ar.*). Plural of (álim, ar. learned). Part of lacab; as Shums ool oolamah, sun of the learned.

OOLANDOO (உளுந்து - ulundu, *Tam.*). From (uzha, tam. to exert energy); tonic. Same as Black gram.——*Oolandoorpett* (உளுந்தூர்ப்பேட்டை - ulundúrppéttai, Tam. ulundurpet*). From (ulundu, tam. black-gram, phaseolus mungo, linn., var. radiatus, linn. + úr, tam. village + péttai, tam. suburb).—"*a*" Deputy tahsildarry, South arcot district. Pay Rs. 70.—"*b*" South arcot dist., Tricalore tal.; pop. 1,221; acres 1,874; lat. 11° 42′; long. 79° 20′; from Chidambaram N.W. 34 miles; from Cuddalore W. 32 miles; from Madras S.W. 118 miles; from Tindivanam S.S.W. 43 miles; from Tricalore S.S.E. 19 miles; from Vriddhauchellam N. 14 miles. Halting station for travellers on the Salem, Trichinopoly, Madras, and Cuddalore trunk roads. Weekly fair on Wednesday. Trig. station in lat. 11° 40′ 30·99″; long. 79° 19′ 25·24″; height 250 feet; from Oolandoorpett S.S.W. 1½ miles; from Tricalore S.S.E. 21 miles.

OOLINJA (ज्योतिष्मती - jyótishmatí, *San.*; कानफुटी - kánap'hutí, *Mahr.*; طفطف - taftaf, *Ar.*; حب الكلخال - habbulkhalkhál, *Pers.* and *Hind.*; ಎರುವಬಳ್ಳಿ - éruvaballi, *Can.*; ഉറുണ്ടെബുറു - urundebúru, *Too.*; బుడ్డకాకర - buddakákara, *Tel.*; உழிஞை - uzhiñña, *Mal.*; පෙනෙලවැල - penelavala, *Singh.*; முடக்கொத்தான் - mudakkottán, *Tam.*). Title from malayalam. San. from (jyótis, san. light + mat, san. suffix of possession); as shining in the dark [malkangany]. Mahr. from (karnasp'hótá, san. the plant). Can. from (éru, can. climbing + balli, can. creeper). Tel. from (budda, tel. bladder + kákara, tel. momordica charantia, linn.). Singh. from (penella, singh. fire brand + vala, singh. creeper). Tam. from (mudakkam, tam. contraction by paralysis + kottam, tam. victory), as curing palsy and gout. San. also (nagná), meaning naked; (jyótirvriksha), meaning bright tree; (káravi), meaning stimulant [black jeerah]; (párávatánghri), meaning pigeon + knee, from red stalk; (karnasp'hóta), meaning ear + boil, from juice used to cure earache. Can. also (agniballi), meaning fire + creeper; (kákaralata), meaning momordica charantia, linn. + creeper; (buddakákaratíge); (érumballi), meaning climbing creeper. Tel. also (nallagulivinda), meaning black + abrus precatorius, linn.; (apparinta), meaning blistering; (ullena), meaning insignificant; (ekkudutíga), meaning climbing + creeper; (pátalitivva); (vekkudutíga), meaning hiccup + creeper; (nallagulisinda). Tam. also (periyayilaimudakkottán), meaning large + leaf + the plant; (tiragamúlagam), meaning to be wrinkled + root; (samuttirathóyam), meaning ocean + water; from similarity of use; (kottavan), meaning victorious one; cf. cottaun. Title otherwise Balloon vine from capsules, Black liquorice, Bladder fruit, Blister creeper, Fire-brand creeper, Heart-pea, Heart-seed, Joty, Palsy curer from root, Pigeon's knee, Shining tree. Botanically Cardiospermum halicacabum, linn., sapindaceæ [vricsham, 43]. Alias Corindum halicacabum. Annual, climbing; stem, petioles, and leaves nearly glabrous; leaves biternate; leaflets stalked, oblong, much acuminated, coarsely cut and serrated; petals four, each with an emarginate scale above the base, the two lower ones with their scales furnished with a glandular crest at their extremity, and ending in a yellow inflexed appendage beneath the apex; fruit a membranous bladdery capsule, three-celled, three-valved; seeds globose, with a two-lobed aril at the base; flowers racemose; common peduncles with two opposite tendrils under the racemes; flowers small, white or pink, on long axillary peduncles; flowering all year. Climbing herb with wiry stems, small flowers producing large inflated membranous capsules enclosing seeds; when ripe, black, with a distinct heart-shaped white mark; a tree which appears to shine in the dark; roots white and fibrous with a rather disagreeable odour, and an acrid nauseous and somewhat bitter taste; the plant owes its medicinal properties to the presence of saponin. The root, which is diaphoretic and diuretic, is given in decoction as an aperient; it is mucilaginous and slightly nauseous to the taste; on the malabar coast the leaves are administered in pulmonic complaints, and, mixed with castor-oil [aumanac], are internally employed in rheumatism and lumbago; the whole plant, rubbed up with water, is applied to rheumatism and stiffness of the limbs; the leaves, mixed with jaggery [q.v.] and boiled in oil, are a good specific in sore eyes; the whole plant, steeped in milk [paul], is successfully applied to reduce swellings and hardened tumours. In moluccas, leaves cooked as vegetables [keeray]; not here except in famine.

OOLLAUN (پنکوا - pankawwá, *Hind.* and *Dec.*; ఉల్లంగిపిట్ట - ullangipitta, *Tel.*; உள்ளான் - ullán, *Tam.*). Title from tamul. Hind. from (pání, hind. water + kavvá, hind. crow). Tel. from (ullangi, tel. lapwing + pitta, tel. bird). Tam. from (ulai, tam. mire) [ooloovay], so called from its frequenting marshes, &c. Tam. also (ullal). Snipe. Scolopacinæ family, scolopacidæ [vanacookkootam], longirostres, grallatores, aves [pacshy, 41], of naturalists [jantoo]. Those to be scientifically distinguished are shown in the sub-heads below. The following are varieties recognised in tamul:—Coray oollaun as frequenting sedges; Keery oollaun as resembling an ichneumon; Shoottautty oollaun or water wag-tail, as shaking its tail continually while walking; Tadimook oollaun, whose bill resembles a stick; Toodoop oollaun, whose bill resembles a paddle.——*Common snipe* (जलकुक्कुट - jalakukkuta, San.; اسناف - isnáf, Hind. and Dec.; ముక్కుపురిడి - mukkupuridi, Tel.; നീർക്കോഴി - nírkkózhi, Mal.; மாரியுள்ளான் - máriyullán, Tam.). San. from (jala, san. water + kukkuta, san. fowl). Tel. from (mukku, tel. bill + puridi, tel. quail). Mal. from (nír, mal. water + kózhi, mal. fowl). Tam. from (mári, tam. rain + ullán, tam. snipe). Hind. also (surkháb), meaning sucker of water. Tam. also (pathukkáy), meaning one that hides. Gallinago scolopacinus, scolopacinæ, scolopacidæ [vana cookkootam], longirostres, grallatores [pacshy, 41], of naturalists [jantoo]. Alias Scolopax burka, gallinago, uniclavus. Crown black divided longitudinally by yellowish white line; dusky brown eye-streak, yellowish supercilliary one; back and scapulars velvet black, crossed with chestnut brown bars, and with longitudinal streaks of ochre yellow; wing-coverts dusky brown, edged reddish white; quills blackish; chin and throat white; cheeks, neck and breast above mottled black and ferruginous; flanks barred white and dusky; lower part of breast and abdomen pure white; tail black, with terminal third red-brown, barred black and tipped whitish; lower wing-coverts white, very faintly barred; bill reddish brown, paler at base; irides deep brown; legs greyish green; length 11-12 inches; very abundant during cold weather; frequent marshes, inundated paddy [q.v.] fields, rice [q.v.] stubble fields; rise with a piping call, and fly against the wind.——*Jack snipe* (கோழியுள்ளான் - kózhiyullán, Tam.). Tam. from (kózhi, tam. fowl + ullán, tam. snipe). Title otherwise Judcock, Juddock. Gallinago gallinula, scolopacinæ, scolopacidæ [vana cookkootam], longirostres, grallatores [pacshy, 41], of naturalists [jantoo]. A smaller bird; difficult to flush; makes its appearance later than the common snipe, and departs earlier.——*Painted snipe* (కసువుకోడి - kasuvukódi, Tel.; ଚେକୁଚୋଡ଼ - chekkuchodai, Oor.; மயிலுள்ளான் - mayilullán, Tam.). Title from variegated plumage. Tel. from (kasuvu, tel. grass + kódi, tel. fowl). Tam. from (mayil, tam. peacock + ullán, tam. snipe); from variegated plumage. Tam. also (shivappumúkkullán), meaning redness + bill + snipe. Rhynchæa bengalensis, scolopacinæ, scolopacidæ [vana cookkootam], longirostres, grallatores [pacshy, 41], of naturalists [jantoo]. Variegated plumage; larger bird than either species just mentioned, flight more resembles that of woodcock [indian woodcock] than snipe; it has the cry of the snipe on rising, but of a deeper tone.——*Wood snipe* (காட்டுள்ளான் - káttullán, Tam.). Gallinago nemoricola, scolopacinæ, scolopacidæ [vana cookkootam], longirostres, grallatores [pacshy, 41], of naturalists [jantoo]. Alias Nemoricola nipalensis. Solitary snipe found in elevated regions; not common.

OOLOOCAM (उलूक - ulúka, *San.*). From (ul, san. to burn); from dazzling eyes at night. Owls. Strigidæ family, raptores, aves [pacshy, 3], of naturalists [jantoo]. Divide into:—Striginæ, screech owls; Syrniinæ, hooting owls; Asioninæ, large-eared owls; Buboninæ, great horned owls, eagle owls, and small scops owls; Surniinæ, owlets. There is a Tamul proverb:—அத்திப்பூவைக் கண்டவர்கள் உண்டா ஆந்தைக்குஞ்சைப் பார்த்தவர்கள் உண்டா—"are there any who have seen the blossom of the fig [atty]? are there any who have seen the young of an owl?" And another:—ஆந்தை சிறிது கீச்சுப்பெரிது—"the owl is small, its screech is loud." The species best known to the natives are shown below.——*Boorichoory* (زوع - zuva, Ar.; چغد - chughd, Pers. and Hind.; بری چری - burichurí, Dec.; ಹಂದಿಕಿರ - handikíra, Can.; చావుపిట్ట - tsávupitta, Tel.; നത്ത - nattu, Mal.; சாக்குருவி - shákkuruvi, Tam.). Title from deccany. Ar. from (zuva, ar. to be timid). Dec. from (burí, hind. bad + churí, hind. bird). Can. from

(handi, can. pig + kíra, can. parrot). Tel. from (tsávu, tel. death + pitta, tel. bird). Mal. means to limp. Tam. from (shá, tam. death + kuruvi, tam. small bird); bird of ill omen. Title otherwise Indian screech-owl. Strix javanica, striginæ, strigidæ [ooloocam], raptores [pacshy, 3], of naturalists. Alias Strix delicatula, flammea. Lives in deserted buildings; hunts by night. The Grass owl is strix candida; lives in long grass; rises heavily and flies only a short distance, when it drops suddenly into the grass.——*Chinna goodlagooba* (چھوٹا گگو - chhotághuggú, Hind. and Dec.; చిన్నగుడ్లగూబ - chinnagudlagúba, Tel.). Hind. from (chhotá, hind. little + ghuggú, hind. owl). Tel. from (chinna, tel. small + gudlagúba, tel. owl). Title otherwise Short-eared owl. Otus brachyotus, asioninæ, strigidæ [ooloocam], raptores [pacshy, 3], of naturalists. Alias Brachyotus palustris. Hunts by night, though it flies by day; its voice is a double or treble hoot, not unlike the call of the hoopoe [hoodhood].——*Chittagooba* (ಚಿಟ್ಟುಗೂಬೆ - chittagúbe, Can.; చిట్టగూబ - chittagúba, Tel.). Can. and Tel. from (chitti, tel. small + gúba, tel. owl). Title otherwise Indian scops owl. Ephialtes pennatus, buboninæ, strigidæ [ooloocam], raptores [pacshy, 3], of naturalists. Alias Ephialtes spilocephalus; Scops aldrovandi, malayanus, sunia, zorca. A larger kind is Ephialtes lempigi.——*Choghadbesrah* (چغد بیسرا - choghadbesrá, Hind.; పైడికంటివేసడము - paidikantivésadamu, Tel.). Hind. from (choghad, pers. owl + besrá, hind. hawk). Tel. from (paidikanti, tel. owlet + vésadamu, tel. hawk). Hind. also (kalpechak), meaning death owl. Title otherwise Brown hawk owl. Ninox scutellatus, surniinæ, strigidæ [ooloocam], raptores [pacshy, 3] of naturalists. Alias Athene malayensis; Ninox nipalensis; Strix hirsuta, lugubris. Peculiar call, resembling the cry of a strangling cat [poonay], or a hare [mosal] when caught by hounds. Natives consider this bird very unfortunate, and when one of them cries near a house the inhabitants go out with lights, to which it has a great aversion, and drive it away.——*Hoohoo cheel* (بوم - búm, Ar. and Pers.; هوهو چیل - húhúchíl, Hind.; ഊമൻ - úman, Mal.). Hind. from (húhú, hind. the call + chíl, hind. kite). Mal. from (úma, mal. dumb). Title otherwise Forest eagle owl. Huhua nipalensis, buboninæ, strigidæ [ooloocam], raptores [pacshy, 3], of naturalists. Generic name from hindostany. Alias Bubo orientalis; Huhua pectoralis. It has a low deep and far-sounding, moaning hoot.——*Nulla goodlagooba* (جنگلی گگو - janglíghuggú, Hind. and Dec.; నల్లగుడ్లగూబ - nallagudlagúba, Tel.). Hind. from (janglí, hind. wild + ghuggú, hind. owl). Tel. from (nalla, tel. black + gudlagúba, tel. owl). Title otherwise Dusky horned owl. Urrua coromanda, buboninæ, strigidæ [ooloocam], raptores [pacshy, 3], of naturalists. Alias Urrua umbrata.——*Peidicunty* (पिङ्गल - pingala, San.; पिंगला - pingalá, Mahr.; بوم - búm, Pers.; چغد - choghad, Hind. and Dec.; ಹಾಲಹಕ್ಕಿ - hálahakki, Can.; పైడికంటి - paidikanti, Tel.; നത്ത - natta, Mal.; ஆந்தை - ándai, Tam.). San. means yellow. Can. from (hálu, can. milk, means white + hakki, can. bird). Tel. from (paidi, tel. gold + kannu, tel. eye). Mal. from (nattu, mal. to limp). Hind. also (katoriapechak), meaning harsh owl. Title otherwise Spotted owlet. Athene brama, surniinæ, strigidæ [ooloocam], raptores [pacshy, 3], of naturalists. Alias Noctula indica, tarayensis. Extremely common; noisy; call is double note; is regarded with aversion; used by shikarries [q.v.] for catching small birds. The forest species is Athene radiata. The malabar species is Athene malabarica.——*Yerra goodlagoola* (घुबड - ghubada, Mahr.; هامه - hámah, Ar.; کور بوم - korbúm, Pers.; گگو - ghuggú, Hind. and Dec.; ఎర్రగుడ్లగూబ - erragudlagúba, Tel.; கோட்டான் - kóttán, Tam.). Pers. from (kor, pers. blind + búm, pers. owl). Hind. from (ghúka, san. owl). Tel. from (erra, tel. red + gudlagúba, tel. owl). Tam. from (kódu, tam. branch); from its horn. Title otherwise Rock horned owl. Urrua bengalensis, buboninæ, strigidæ [ooloocam], raptores [pacshy, 3], of naturalists. Alias Urrua cavearia. The cry is a loud hoot, like durgoon, durgoon.

OOLOOVAY (உளுவை - uluvai, *Tam.*). From (ulai, tam. mud) [oollaun]; mudfish. Title otherwise Goby, White caboose. The genus Gobius, gobiidæ, acanthopterygii, teleostei, pisces [matsyam, 23], of naturalists [jantoo]. The species best known to the native are shown below, Cf. also Ground goby.——*Ground goby* (పొట్టేలుసొర - pottélusorra, Tel.; மண்ணுளுவை - mannuluvai, Tam.). Title from frequenting sea bottom. Tel. from (pottélu, tel. ram + sorra, tel. shark, carcharias genus). Tam. from (man, tam. ground + uluvai, tam. white caboose, gobius genus). Tel. also (nalladindi), meaning black + stump. Title otherwise Mudskate. Rhynchobatus ancylostomus, rhinobatidæ, batoidei, plagiostomata, chondropterygii [matsyam, 49], of naturalists [jantoo]. Alias Rhamphobatis ancylostomus; Rhina ancylostomus, cyclostomus. Snout very broad with a semi-circular outline; has longitudinal rows of tubercles; dull brown, lighter beneath; the body and sometimes the fins covered with whitish spots; occasionally some tortuous black lines; swims slowly just above the bottom of the sea not far from the shore, picking up what it finds. Another common species is Djeddensis.——*Ringed goby* (మాతురి - máturi, Tel.; குண்டலவுளுவை - kundalavuluvai, Tam.). Title from markings. Tam. from (kundala, san. ring + uluvai, tam. white caboose, gobius genus). Gobius [ooloovay] striatus, gobiidæ, acanthopterygii, teleostei [matsyam, 23], of naturalists. Alias Euctenogobius striatus. Body elongated; sides compressed. Snout elongated, cheeks inflated. Jaws of equal length, or the lower slightly longer. Cleft of mouth nearly horizontal. Scales ctenoid, those anterior to dorsal fin smaller than rest on body; none on cheeks and head; thirty rows between occiput and dorsal fin; fourteen rows between origin of second dorsal and anal fins. Colors generally light fulvous, with bluish tinge along sides, becoming dirty-white beneath; irregular bands from back towards middle of body, also some thin black lines proceed upwards on abdomen opposite to anal fin; cheeks glossed silver; pectoral, ventral and anal whitish-yellow; both dorsals diaphanous, with five or six rows of brown dots; caudal with eight or nine vertical rows of spots in upper half or two-thirds. Fresh waters and backwaters of Madras and Canara.——*River goby* (खर्प - kharpa, Mahr.; میٹھے پانی کا شیکھرا - míthepáníkáshekhrá, Hind.; ಅಬ್ರೊಣಿ - abróni, Can.; చికిడొండు - chíkidondu, Tel.; കതിരാൻ - katirán, Mal.; நல்லதண்ணுளுவை - nallathannuluvai, Tam.). Title from habitat. Hind. from (míthá, hind. fresh + pání, hind. water + shekhrá, hind. gobius genus). Can. from (abra, san. cloud + oni, can. line); from marking on head; cf. abrony. Tel. from (chíku, tel. blind + dondu, tel. eel, anguilla genus). Mal. from (katiram, mal. beauty). Tam. from (nalla, tam. good + tan, tam. water + uluvai, tam. white caboose, gobius genus). Mahr. also (kóka); (ballikóka), meaning lizard koka. Hind. also (naddíkáshekhrá), meaning river + gobius genus. Tel. also (isukadondu), meaning sand + eel, anguilla, genus; (kóramutte), meaning fang + fish, clupea longiceps; (ballimutte), meaning lizard + clupea longiceps. Mal. also (ottippúzhán), meaning retiring + the fish, eleotris fusca; (púvan), meaning flowery, from reddish color. Title otherwise Koke. Gobius [ooloovay] giuris, gobiidæ, acanthopterygii, teleostei [matsyam, 23], of naturalists. Specific name from (gaura, san. reddish). Alias Gobius bulleekokah, catebus, kokius, koku, kora, korah mottah, kurpah, platycephalus, spectabilis. Bullee kokah from mahratta; koku from mahratta; koramottah from teloogoo; kurpah from mahratta. Lower jaw longer; scales extend superiorly to nearly as far as hind edge of eyes, and twenty-five to thirty rows before base of dorsal fin, where they are smaller than those on body which are angular and ctenoid; colors vary both with localities and also with color of water, generally fawn-color, with cloudy markings on head, and irregular bands, spots, or blotches, on back and sides of body; vertical fins spotted; much esteemed by natives as being very light and wholesome, unless elaborately cooked is not relished by europeans, because of deficiency in or earthy taste; very voracious and takes a bait freely; all pieces of freshwater throughout plains; an edible fish 8 inches long.——*Scorpion goby* (بچھو مچھی - biçghúmaççhí, Hind.; నూనెముట్టె - núnemutte, Tel.; தேள்கெண்டை - télgendai, Tam.). Title from tail. Hind. from (biççhú, hind. scorpion + maççhí, hind. fish); from its dreaded wounds. Tel. from (núne, tel. oil + mutte, tel. fish, clupea longiceps), from gloss of body; cf. caranx ire. Tam. from (tél, tam. scorpion + kendai, tam. carp, barbus genus). Gobius [ooloovay] viridipunctatus, gobiidæ, acanthopterygii, teleostei [matsyam, 23], of naturalists. Alias Gobius nunamottah, venenatus. Nunamottah from teloogoo. Cheeks swollen, having many rows of warts; lower jaw longer, cleft of mouth oblique; scales about thirty-two rows between dorsal fin and hind edge of orbit, a few on upper portion of opercle; colors olive, with series of four or five large badly defined blotches along sides; many scales with light centre, which in life is emerald green; dorsals dark at bases, usually having light edges with dark basal band; ventral, anal, and caudal gray, last with light upper edge; sea; common at madras; 5 inches in length.

OOLY (ಉಳಿ - uli, *Can.*). From (ul, can. live). Survivorship [aliyasantauna].

OOLY (ఉలి - uli, *Tel.*). Small.——*Oollangy* (तुनतुनें - tunatuném, Mahr.; تمتما - timtimá, Hind.; ఉల్లంగి - ullangi, Tel.). Mahr. from imitation of call. Tel. from (uli, tel. small + anga, san. body). Hind. also (chobaha); (tuntuna); (pankukri), meaning water hen. Sandpipers. Totaninæ, scolopacidæ [vana cookkootam], longirostres, grallatores, aves [pacshy, 41], of naturalists [jantoo]. Bill moderate, tip hard and pointed; outer toe joined by web to middle one; change of plumage in summer to black or dusky beneath, and not rufous; migratory birds, winter visitants to india; they pick up small crustacea [kavachiny] and molluscs [chippy] from the surface, and do not insert their bills deeply like snipes [oollaun] and stints; solitary in habit. The species best known to the natives are:—Spotted sandpiper, actitis glareola; a marsh sandpiper; Green sandpiper, actitis ochropus; Common sandpiper, actitis hypoleucos; Green shanks, totanus glottis; rises with loud shrill cry: excellent eating; reaches this country towards the middle or end of september, and leaves for the north in april; Small green shanks, totanus stagnatilis, Spotted red shanks, totanus fuscus; Red shanks, totanus calidris; the μάρτυρος or tell-tale of greeks.——*Oollauk* (ఉల్లాకు - ulláku, Tel.). From (uli, tel. small + áku, tel. palmyra leaf). Memorandum left with goods specifying the quantity and the owner [olay].

OOLYAM (ஊழியம் - úzhiyam, *Tam.*). From (úzh, tam. custom). Service from an inferior to a superior; so wages for

such service. Circar oolyam are personal gratuitous services and forced labor for Government and temples [amaunjy, maraumut].

OOM (ام - umm, *Ar.*). Mother. Coonyat [ism].

OOMAY (उमा - umá, *San*). From (av, san. to protect). Parvaty [q.v.].——*Oomamaheshwaran* (உமாமகேசுவரன் - umámagésuvaran, Tam.). From (above + mahéshvara, san. shiva, the great lord). Shiva [q.v.] with Parvaty [ardhanaury]. Hindoo 2nd or pers. name [peyar].——*Oomanautan* (உமாநாதன் - umánáthan, Tam.). From (above + nat'ha, san. lord). Shiva, the lord of Parvaty. Hindoo 2nd or pers. name [peyar].

OOMDA (عمده - umdah, *Ar.*). From (amada, ar. to support). Pillar. Part of lacab; as Oomdat ool moolk, pillar of state [ism].——*Oomdat ool oomrah* (عمدةالامرا - umdatulumará, Hind.). From (above + umará, ar. ameers). Pillar of nobles. Name of eldest son of Wallajah [q.v.] and nawaub [q.v.] of Carnatic [q.v.], 1795 to 1801. See vol. I (186), 44; II, 252.

OOMED (امید - umíd, *Hind.*). From arabic. Hope. Oomedwar is a candidate for employment, a volunteer. Oomedwar pattaulam is volunteer corps.

OOMR (عمر - umr, *Ar.*). From (amara, ar. to preserve). Life, existence. Name of prophet's companion. Common alam; as Syed oomr, alaumat + alam [ism].

OOMRAH (امرا - umará, *Ar.*). Pl. of (amír, ar. commander; lord). The nobles of a native mahomedan court collectively. Lacab suffix; as Ameer ool oomrah, lord of lords [ameer, ism].

OON (ان - un, *Ar.*). Al before n in Arabic compounds; as Abd oon nabee, slave of the prophet [al].

OON (உண் - un, *Tam.*). To eat.——*Oombaly* (ಉಂಬಳಿ - umbali, Can.). From (unnu, can. eating). Subsistence. Inam [q.v.] land.——*Oonny* (உண்ணி - unni, Tam.). From (un, tam. to eat). Means a wart on the body. Also an infant. Hindoo 2nd or pers. name [peyar]. Also hindoo third name in Malabar assumed by members of some families and showing royal descent.——*Oo'pera* (ഊട്ടുപുര - úttupura, Mal.). From (úttu, mal. feeding + pura, mal. house). Free inn for bramins, a peculiar religious institution of Travancore. They are about forty-two in number, situated at convenient stages throughout the country, mostly in connection with the principal temples [coil, pagoda]. In them bramins are fed at the expense of the circar [q.v.] with curry [q.v.] and rice [q.v.], rice boiled in water, chutney [q.v.], curd [tyre], milk [paul], fruits [pazham], &c. Neither travelling nor resident bramins however are allowed to remain in the same Ootpera longer than two days, unless sickness or other unavoidable cause prevents their leaving the place. In some of these houses only one meal a day is allowed, while in others meals are provided both morning and evening. A small quantity of boiled rice is distributed to poor shoodras [q.v.] daily at noon, and in two or three instances this is given to all castes [jauty] indiscriminately [chuttram]. The principal Ootpera is at the temple of Pudmanaubhan at Trivandrum. See vol. II, 135, 291.

OONDEE (اندی - undí, *Hind.*). Same as Common poon.

OONJAL (ஊஞ்சல் - úñjal, *Tam.*). Swing.——*Oonjal tirnaul* (ஊஞ்சற்றிருநாள் - úñjattirunál, Tam.). Swinging the images [shilay, vigraham] of gods and goddesses in an ornamental swing at the close of the annual festival [pundigay, 6d]. Dolotsavam of the north.

OOPA (उप - upa, *San.*). Prefix denoting subordination or inferiority. Also means near.——*Ohary* (ഓഹരി - óhari, Mal.). From (upa, san. together + hri, san. to take). A share [bhaugam].——*Oopadaunam* (उपदान - upadána, San.). From (above + dá, san. to give). Offering; alms, charity [kheirauty].——*Oopadesham* (उपदेश - upadésha, San.). From (above + dish, san. teach). Doctrine, teaching [oopanishad].——*Oopagraumam* (उपग्राम - upagráma, San.). From (above + gráma, san. village). A hamlet.——*Oopamaunam* (उपमान - upamána, San.). From (above + má, san. to measure). Measuring one thing near another; comparison; one of the four processes, according to Nyauya [q.v.] philosophy, by which the mind arrives at true and accurate knowledge. The other three are pratyacsham or sense perception, anoomaunam or inference, and shabdam or verbal testimony.——*Oopanayanam* (उपनयन - upanayana, San.). From (above + ní, san. to lead); approaching a gooroo [q.v.] to receive auricular instruction in the gayatry [q.v.], which is the essential part of the ceremony. The ceremony of investiture with the sacred thread [poonool] or cord worn over the left shoulder and under the right, for the twice-born castes [dwijan], or Bramins [q.v.], Cshatriyas [q.v.], and Veisyas [q.v.]. Cotton [q.v.] for Bramin, flax [sunn] for Cshatriya, wool [pushm] for Veisya. See vol. II, 235.——*Oopanishad* (उपनिषद् - upanishad, San.). From (above + ni, san. down + sad, san. to sit). Sitting at the feet of a teacher [gooroo]. Certain mystical writings attached to the Bramhanam [q.v.] portion of the old Vedams, the aim being ascertainment of secret sense of Vedam [q.v.]. Also called Rahasyam or mystical doctrine [oopadesham]. The Greeks and Romans had their so-called mysteries reserved only for the initiated. Even the Koran [q.v.] is held to possess an exoteric meaning called Zauhir [q.v.] and an esoteric called Bautin; and in latter times a mystical system of pantheistic philosophy called Soofeeism [soofee] was developed in Persia out of this esoteric teaching. Similarly Vedam or sacred knowledge is said to possess two distinct branches. The first is called Carma caundam [q.v.], which, embracing both Muntram [q.v.] and Bramhanam is for that large majority of persons who are unable to conceive of religion except as a process of laying up merit by external rites [carmam]. The second is called Nyauna caundam [q.v.], and is reserved for that select few who are capable of the true knowledge. The one, it may be added, implies action, the other cessation from all action. The Oopanishads are for the most part short, mystical and obscure. The ordinary enumeration of them is said to be 51; but there are others bearing that name, considered to be spurious. The following are some of the most important:—the Eitareya oopanishad and Cowsheetaky bramhana oopanishad of the Rig vedam; the Teittireeyam belonging to the Teittireeya samhitay of the Yajoor vedam, the Brihad auranyacam attached to the Shatapata bramhanam of the Vaujasaneyee samhitay of that Vedam and the Eesham or Eeshauvausyam forming an actual part the fortieth chapter of this latter Samhitay, this being the only instance of an Oopanishad attached to a Samhitay rather than a Bramhanam; the Chandogyam and Kena oopanishad belonging to the Sauma vedam; the Prashnam, Moondacam, Maundoocyam, and Katam belonging to the Atarva vedam [matam].——*Oopapooraunam* (उपपुराण - upapurána, San.). From (above + purána, san. history). Secondary pooraunams [q.v.]. This name is given to eighteen works subordinate, one to each, to the eighteen Maha pooraunams or principal pooraunams. The general character of these works is very similar to that of the principal pooraunams. The Oopapooraunams, as reckoned in the south, are:—Aungiram, Bhaurgavam, Capilam, Cauly, Doorvausam, Maunavam, Maureecham, Naurasimham, Nauradeeyam, Nundy, Ooshanam, Paurausharam, Sanatcoomauram, Shaumbhavam, Shivatanmam, Sowram, Vasishta lingam, Vauroonam.——*Oopaucarmam* (ఉపాకర్మ - upákarmam, Tel.). From (above + á, san. prefix meaning near + kri, san. to do). Preparation to read the vedam. Same as Auvany avittam.——*Oopaudhy* (उपाधि - upádhi, San.). From (above + ádhá, san. to place). Condition. In vedauntam [q.v.] specially applied to certain forms or properties considered conditions or disguises of spirit; attributive. In luni-solar [chaundramaunam] calendar [punchaungam], an expunged day [adhicam, tity].——*Oopaudhyauyan* (उपाध्याय - upádhyáya, San.). From (above + adhí, san. to study). Priest [acharry], teacher [gooroo, peyar].——*Oopaungam* (उपाङ्ग - upánga, San.). From (above + anga, san. limb). Additional limbs of the Vedam [q.v.]. To be distinguished from Vedaungam and Oopavedam. They are six:—Dharma shastram, on jurisprudence; Itihausam, or epic poems; Mimaumsam, on philosophy; Pooraunam, or legendary histories; Tantram, on ritual; Yogam, on logic.——*Oopauntyam* (उपान्त्य - upántya, San.). From (above + antya, san. last). Corner of the eye. Last but one, in mathematics [ganitam].——*Oopavausam* (उपवास - upavása, San.; நோம்பு - nómbu, Tam.). From (upa, san. at + vas, san. to dwell); dwelling in a state of abstinence. Fast [pundigay, 6d]. As a religious act comprises abstinence not merely from food and drink but from all sensual gratification, from perfumes, flowers, unguents, ornaments, betel, music, dancing, &c., the use of a mattress when sleeping, and even sleep itself. The fasts observed for each deity are mentioned under the heads of those deities. Some are observed in behalf of deceased parents, brothers, sisters, children, &c. For a deceased child a partial fast is observed for eight days, and for a deceased grown-up person the same for sixteen days with carmauntram [q.v.] at the end. The fasts and the various rites are repeated on every thirtieth day from day of decease for the first year, and this is called mausicam [mausam]; and then again at every anniversary of the deceased, which is called tity [q.v.]. The eleventh day [yecaudashy] of every fortnight [pacsham] is kept as a rigid fast; and on the days of the new [amavausyay] and full moon [powrnimay] and those in which an eclipse [grahanam] of either the sun [sooryan] or moon [chundran] takes place, and on several other occasions, a half fast is observed [maryauday].——*Oopavedam* (उपवेद - upavéda, San.). From (above + véda, san. sacred writing, so called). Secondary vedams [q.v.], which however have really little or no connection with either the Vedam or Smrity [q.v.]. To be distinguished from Vedaungam, Oopaungam. They are:—Ayoor vedam, or science of medicine [veidyan], derived from the rig vedam; Dhanoor vedam, or military science, derived from the yajoor vedam; Gaundharva vedam, or science of music [sangeetam], derived from the sauma vedam; Shilpam [q.v.], or staupatya vedam [staupatyam], on the mechanical arts and architecture, derived from the atarva vedam [shastram].

OOPPINANGADY (ಉಪ್ಪಿನಂಗಡಿ - uppinangadi, *Can.*). From (uppu, can. salt + angadi, can. shop) [ooppoo]; salt store.——(1) Talook, South canara district. Tahsildar's pay Rs. 175. Area 951 square miles; S. inland of district. Boundaries:—on the north, the Mysore territory; on the south the Casser-

gode talook and Coorg; on the east, Mysore territory and Coorg; and on the west, Mangalore and Cassergode talooks. For the most part a hilly country well-clothed with forest. Rice [q.v.], pepper [q.v.], cardamoms [q.v.], areca-nuts [q.v.], timber and other forest produce are exported. Imports chiefly cotton [q.v.] goods and articles of european manufacture. Irrigation dependent chiefly on the rains, but after close of the monsoon [q.v.], the streams, natural pools and private tanks [q.v.] and wells are resorted to. Camping grounds on the Mangalore and Mercara road:—Sumpaujey, Soolya, Cauv poottore. On the Codicull-Charmaudy ghaut road:—Charmaudy, Beltangady. On the Mangalore and Manjarabad road:—Sirady, Golitutt, Ooppinangady, Mauny. Places of archæological interest:—Alancauram, Bantra, Beltangady, Byle, Cadaba, Goorvauyankerey, Indoobett, Jemalabad, Mauchina, Mullarmaudy, Oojrey, Ooppinangady, Panja, Poottore, Soobramanya. Principal trig. stations:—Ammedicull, Bullanaudgoodda, Coothiraymookh. The leading places, &c., in the talook are the following.——*Ambatamoory* (ಅಂಬಟಮುರಿ - ambatamuri, Can.). From (ambata, can. wild mango, spondias mangifera, willd. + muri, mal. village). Pass [ghaut]; lat. between 13° 01′ and 13° 4′ N.; long. between 75° 31′ and 75° 33′ E. Leads into Mysore, but is little used.——*Ammedicull* (ಅಮ್ಮೆಡಿಕಲ್ಲು - ammedikallu, Can.). Trig. station; lat. 12° 58′ 38·82″; long. 75° 33′ 13·38″; height 4,267 feet; from Poottore N.E. 26 miles.——*Beilangady* (ಬೈಲಂಗಡಿ - bailangadi, Can.). From (bailu, can. a plain + angadi, can. shop). A Sub-division of talook [q.v.] or Maugaunam [q.v.] comprising six villages; pop. 1,979.——*Beltangady* (ಬೆಳ್ತಂಗಡಿ - beltangadi, Can.). See sep. title.——*Bisley* (ಬಿಸಲೆ - bisale, Can.). See sep. title.——*Bullanaudgoodda* (ಬಲ್ಲನಾಡುಗುಡ್ಡ - ballanádugudda, Can.). Trig. station; lat. 12° 41′ 00·40″; long. 75° 12′ 23·20″.——*Cadaba* (ಕಡಬ - kadaba, Can.). Village; pop. 1,025; lat. 12° 45′; long. 75°31′; from Mangalore E. 43 miles; from Poottore E. 18 miles. In ancient days one of the four centres, when the country along the coast was divided into 64 sections [graumam] under Bramin governors by Mayoora vurman [keraloputty]. Temple [coil, pagoda] of Ganesh [q.v.].——*Charmaudy* (ಚಾರ್ಮಾಡಿ - chármádi, Can.). See sep. title.——*Comauradhaury* (ಕುಮಾರಧಾರಿ - kumáradhári, Can.). See. sep. title.——*Coothiraymookh* (ಕುದುರೆಮುಖ - kuduremukha, Can.). See sep. title.——*Coottiyaur* (ಕುತ್ತಿಯಾರ - kuttiyára, Can.). Village; pop. 1,182; lat. 12° 59′; long. 75° 19′; from Mangalore E.N.E. 30 miles; from Poottore N.N.E. 17 miles. Jeina [q.v.] temple [basty] and mantapam [q.v.]. The town of Beltangady lies in this village.——*Dharmastala* (ಧರ್ಮಸ್ಥಳ - dharmast'hala, Can.). From (dharma, san. charity + st'hala, san. place). Place of Hindoo pilgrimage in the village of Mullarmaudy; pop. 1,325; lat. 12° 57′; long. 75° 26′; from Beltangady E.S.E. 8 miles; from Mangalore E. 38 miles; from Poottore N.E. 18 miles. Well endowed temple of Munjoonautan. The Dharmastala jautrey [q.v.] or illumination festival for four days in November or December. Nadauvaly festival once in 12 years for 13 days.——*Jemalabad* (جمال آباد - jamálábád, Hind.). See sep. title.——*Manjarabad* (ಮಂಜರಾಬಾದ್ - manjarábád, Can.). See sep. title.——*Mardala* (ಮರ್ದಲ - mardala, Can.). A maugaunam [q.v.] or sub-division of talook comprising seven villages; pop. 1,638.——*Neranky* (ನೆರಂಕಿ - neranki, Can.). A sub-division of talook comprising 24 villages; pop. 7,640.——*Neriya* (ನೆರಿಯ - neriya, Can.). Village; pop. 659; contains cardamom [q.v.] jungles.——*Netrauvaty* (ನೇತ್ರಾವತಿ - nétrávati, Can.). See sep. title.——*Ooppinangady* (ಉಪ್ಪಿನಂಗಡಿ - uppinangadi, Can.). See below.——*Pooshpagherry* (ಪುಷ್ಪಗಿರಿ - pushpagiri, Can.). See sep. title.——*Poottore* (ಪುತ್ತೂರು - puttúru, Can.). See sep. title.——*Sissal* (ಶಿಸಲ - shisala, Can.). Village; pop. 255; lat. 12° 54′; long. 75° 32′; from Mangalore E. 45 miles; from Poottore E.N.E. 23 miles.——*Soobramanya* (ಸುಬ್ರಹ್ಮಣ್ಯ - subrahmanya, Can.). See sep. title.——*Soolya* (ಸುಳ್ಯ - sulya, Can.). A small town in the village of Canattil cayartody; pop. 618; lat. 12° 33′; long. 75° 26′; from Mangalore E. 42 miles; from Poottore S.E. 18 miles.——*Sumpaujey* (ಸಂಪಾಜೆ - sampáje, Can.). See sep. title. ——**(2)** Village; South canara dist., Ooppinangady tal.; pop. 1,612; lat. 12° 50′; long. 75° 17′; from Mangalore E. 27 miles; from Poottore N.N.E. 6 miles. On the Netrauvaty. Until recently head-quarters of the talook. An old temple at the confluence of the Netrauvaty and Comauradhaury is held very sacred.

OOPPOO (लवण - lavana, *San.*; मीठ - mít'ha, *Mahr.*; ملح - milh, *Ar.*; نمك - nimak, *Pers.*; لون - lon, *Hind.*; نمك - namak, *Dec.*; گرم - garám, *Malay*; ಉಪ್ಪು - uppu, *Can.* and *Too.*; ఉప్పు - uppu, *Tel.*; ഉപ്പ് - uppu, *Mal.*; ලුණු - lunu, *Singh.*; உப்பு - uppu, *Tam.*). San. from (lú, san. to cut); as a digestive. Mahr. from (mishta, san. savoury). Hind. and Singh. from sanscrit. Tam. from (uva, tam. to expand); native salt is an efflorescence. Hind. also (namak) [namak]. Any chemical salt, whether acid [poolipp, tezaub] or alkaline [cauram].——**(1)** Usually stands for common salt; sodii chloridum of chemists, alias sodæ murias. This when obtained by the evaporation of sea-water with more or less artificial processes for its purification, &c., is common salt or sea-salt; see vol. I, 440. When found native in large masses, which only requires to be dug and reduced to powder it is rock-salt [sondah namak]. When it is obtained naturally and without artificial processes as the result of a single evaporation of sea-water lying in hollows or on marshes it is called swamp salt [parra ooppoo]. When found in a state of efflorescence on the surface of the soil after rains in the inland districts and subsequently purified it is called effloresced salt. When educed from earth containing saline properties [sowdoo] by filtration, and evaporation or boiling of the liquid, it is called educed salt [att ooppoo]. In small and repeated doses common salt promotes appetite and assists the processes of digestion and assimilation; in large doses in solution it acts as an emetic, purgative and anthelmintic; locally applied rubefacient; a chemical antidote in poisoning by nitrate of silver [candy cauram]. Used in dyeing [shaayam]. There is a Tamul proverb:—உப்புக்கட்டிருஞ்சல் லோகம் கட்டும்—"if there be a "supply of salt the world will be sustained." See vol. I, 436; II, 40.——**(2)** For medicinal salts see Sarakk.——**(3)** The following are the different terms for salt or alkaline earth [sowdoo].——*Calar* (களர் - kalar, Tam.). From (kalam, tam. dark). Same as Ooppalar.——*Ooppalar* (చవటనేల - tsavatinéla, Tel.; உப்பளறு - uppalaru, Tam.). From (alaru, tam. mud). Tel. means saline earth + soil. Also called Calar. A soil which is a mixture of clay [calimunn] and sand [manal] largely impregnated with alkaline matters; it is generally met with in hollows or swamps on the coasts, and occurs also in particular localities inland; it is absolutely unproductive except when large volumes of fresh water are available, in which case the salts are washed away by repeated flooding.——*Ooshar bhoomy* (ऊषरभूमि - úsharabhúmi, San.; చవటనేల - tsavatinéla, Tel.). Same as Ooppalar.——*Oovar munn* (సున్నపుచవుడు - sunnaputsavudu, Tel.; உவர்மண் - uvarman, Tam.). Tel. means lime + saline earth. Dhoby's earth [q.v.].——*Oozhamunn* (உழமண் - uzhaman, Tam.). Corruption of Oovar munn.——*Pooneer* (பூநீறு - púníru, Tam.). Means flowering ashes. Otherwise Nilaveeram. A kind of bangle earth [gauzoo sowdoo]. See separate head.——*Poo vazhalay* (பூவழலை - púvazhalai, Tam.). Means earth soap. Same as Pooneer.——*Shavatt munn* (చవటనేల - tsavatinéla, Tel.; சவட்டுமண் - shavattuman, Tam.). Any earth containing sowdoo [q.v.]——*Valaiyal munn* (గాజుచవుడు - gádzutsavudu, Tel.; வளையல்மண் - valaiyalman, Tam.). Means glass bangles + earth. Otherwise Gauzoola ooppoo bhoomy. Mineral sand [manal] of which glass bangles [gauzoo] are made [gauzoo sowdoo].——**(4)** *Ooppalam* (ఉప్పళము - uppalamu, Tel.; உப்பளம் - uppalam, Tam.). A salt pan.——*Ooppalapaud* (ఉప్పలపాడు - uppalapádu, Tel.). From (uppalamu, tel. salt marsh + pádu, tel. village). Village, Hill; Kurnool dist., Coilcoontla tal.; lat. 15° 11′; long. 78° 05′; from Coilcoontla W.S.W. 18 miles; from Kurnool S. 45 miles. Largest hill plateau in the district. East lies Coondair valley and beyond are Nullamullays. On E. is a sudden descent to the low country and on other sides to a narrow flat terrace. It is difficult of ascent. The only way of getting to it is from the south-west by the denuded bay north-east of Goodipaud. Even here the cart traffic is only from Ooppalapaud to this bay, there being a terrace of flat beds of limestone [choonam cull] beyond it. Drained by the Tirmalair.——*Ooppanaur* (ఉప్పుకయ్య - uppukayya, Tel.; உப்பனார் - uppanár, Tam.). Means salt river. A channel communicating with the sea [ooppatair].——*Ooppary* (ఉప్పరి - uppari, Tel.). From (above + ari, tel. personal suffix). Tel. form of Ooppaura.——*Ooppatair* (ఉప్పుటేరు - uppu-téru, Tel.). From (uppu, tel. salt + éru, tel. river). A tidal or salt-water river [ooppanaur].——*Ooppaura* (ಉಪ್ಪಾರ - uppára, Can.). A caste in Canara and Mysore, including bricklayers, laborers, gardeners, &c.; originally salt-makers. The Ooppaurar were originally of teloogoo origin. They have hereditary chiefs called Yejmaun [q.v.]. They may eat meat, but may not drink spirituous liquors [arrack]. They are allowed a plurality of wives. The girls continue to be marriageable after the age of puberty, but a widow cannot marry again. They bury the dead [shavacaud]. The god of the caste is Vishnoo [q.v.], but they pray to Dharma rajan [q.v.], and offer sacrifices to the Shacties [q.v.]. They have no knowledge of a future life. To be distinguished from the Woddar [q.v.]. Numbers about 100,000, chiefly in Beliary and Godavery [jauty]. See vol. II, 230.——*Ooppellore* (ఉప్పేలూరు - uppuélúru, Tel.). From (uppu, tel. salt + élúru, tel. place so called). Native name of Ellore, Godavery district, to distinguish it from Vellore or Rye ellore.——*Ooppinangady* (ಉಪ್ಪಿನಂಗಡಿ - uppinangadi, Can.). See sep. title.——*Ooppoo cottauram* (ఉప్పుకోఠారము - uppukot'háramu, Tel. உப்புக்கொட்டாரம் - uppukkottáram, Tam.). Salt depôt [cotaur].——*Ooppoo nilam* (చవటనేల - tsavatinéla, Tel.; உப்புநிலம் - uppunilam, Tam.). Brackish ground [calar, ooppalar, sowdoo].——*Ooppoovaudy* (నట్టు - nattu, Tel.; உப்புவாடி - uppuvádi, Tam.). From (vádi, tam. enclosure). Tel. means platform. A platform for piling salt upon.——**(5)** *Attooppoo* (ಅಟ್ಟುಪ್ಪು - attuppu, Can.; కాచుడుప్పు - kátsuduppu, Tel.; அட்டுப்பு - attuppu, Tam.). From (adu, tam. to boil + uppu, tam. salt). Tel. means boiled + salt [cautch ooppoo]. Common salt educed from soils containing it simple or in combination with other salts, by the process of filtration and then evaporating or boiling.——*Bhaidy ooppoo* (భేదిఉప్పు - bhédiuppu, Tel.; பேதியுப்பு - péthiyuppu, Tam.). From (bhédi, san. purgative + uppu, tam.

salt). Epsom salts or sulphate of magnesia [caunta munn].——*Caroopp ooppoo* (నల్లఉప్పు - nallauppu, Tel.; கருப்புப்பு - karuppuppu, Tam.). From (karuppu, tam. black + uppu, tam. salt). Same as Bitloban [q.v.].——*Caur ooppoo* (పర్రఉప్పు - parrauppu, Tel.; കാരുപ്പ് - káruppu, Mal.; காருப்பு - káruppu, Tam.). Means black + salt. Wild salt that appears spontaneously; otherwise swamp salt [parra ooppoo].——*Cautch ooppoo* (కాచుడుప్పు - kátsuduppu, Tel.; காய்ச்சுப்பு - káyççuppu, Tam.). Means boiled + salt. Same as Att ooppoo.——*Cull ooppoo* (రాతిఉప్పు - rátiuppu, Tel.; கல்லுப்பு - kalluppu, Tam.). Means stone + salt. Same as Indooppoo.——*Curry ooppoo* (వంటఉప్పు - vantauppu, Tel.; கறியுப்பு - kariyuppu, Tam.). Means curry stuff + salt. Tel. means cooking + salt. Name for common salt.——*Draucsha ooppoo* (द्राक्षालवण - drákshálavana, San.; द्राक्षीमीठ - drákshímít'ha, Mahr.; نمك انگور - namakiangúr, Pers., Hind. and Dec.; ದ್ರಾಕ್ಷಿಉಪ್ಪು - drákshiuppu, Can.; ద్రాక్షఉప్పు - drákshauppu, Tel.; திராக்கவுப்பு - tirákkavuppu, Tam.). San. from (drákshá, san. grape + lavana, san. salt). Mahr. from (drákshá, san. grape + mít'ha, mahr. salt). Pers from (nimak, pers. salt + angúr, pers. grape). Tel. from (drákshá, san. grape + uppu, tel. salt). Tartar. Also called Tartrate of potash, Cream of tartar. Potassæ tartras acida, or Potassæ bitartras of chemists. With veidyans [q.v.], refrigerant, diuretic and laxative; in large doses, hydragogue, cathartic [namak, ospitry].——*Gandhac ooppoo* (గంధకఉప్పు - gandhakauppu, Tel.; கந்தகவுப்பு - kandagavuppu, Tam.). Means sulphur + salt. That kind of bitloban [q.v.] which has the smell of sulphur [gandhac].——*Indooppoo* (सैन्धव - saindhava, San.; سوندا نمك - sondánamak, Hind.; لاهوری نمك - láhorínamak, Dec.; ఇందుప్పు - induppu, Tel.; ഇന്തുപ്പ് - induppu, Mal.; இந்துப்பு - induppu, Tam.). Title and Drav. from (sindhu, san. country so called + uppu, tam. salt). San. means produced in sind. Hind. means sind salt; Dec. means lahore salt. Rock salt; same as Sondah namak.——*Mara ooppoo* (दारुलवण - dárulavana, San.; మానుప్పు - mánuppu, Tel.; மரவுப்பு - maravuppu, Tam.). Means tree + salt. Potash [jharka namak]; used as mineral dye [shauyam].——*Moongil-ooppoo* (వెదురుప్పు - veduruppu, Tel.; மூங்கிலுப்பு - múngiluppu, Tam.). Bamboo [q.v.] salt. Same as Tabasheer.——*Parra ooppoo* (పర్రఉప్పు - parrauppu, Tel.; கழியுப்பு - kazhiyuppu, Tam.). Tel. from (parra, tel. salt marsh + uppu, tel. salt). Swamp or spontaneous salt [caur ooppoo].——*Pottle ooppoo* (ಪೆಟ್ಲುಪ್ಪು - petluppu, Can.; పెట్లుప్పు - petluppu, Tel.; பொட்டிலுப்பு - pottiluppu, Tam.). From (pottil, tam. firelock + uppu, tam. salt). Can. from (pettalu, can. to burst). Tel. from (petlu, tel. to explode + uppu, tel. salt). Saltpetre [shorah].——*Savity ooppoo* (చవిటిఉప్పు - tsavitiuppu, Tel.; சவட்டுப்பு - shavattuppu, Tam.). Title and Tel. from (tsavudu, tel. fuller's earth + uppu, tel. salt). Same as Attooppoo.——*Shaumbal ooppoo* (బూడిదెఉప్పు - búdideuppu, Tel.; சாம்பலுப்பு - shámbaluppu, Tam.). Means ashes + salt. Potash from vegetable ashes; same as Sujjee khaur [q.v.]——*Valaiyal ooppoo* (ಗಾಜುಪ್ಪು - gájuppu, Can.; గాజుప్పు - gádzuppu, Tel.; വളയുപ്പ് - valayuppu, Mal.; வளையலுப்பு - valaiyaluppu, Tam.). Can. from (gáju, can. glass + uppu, can. salt). Mal. from (vala, mal. bangle + uppu, mal. salt). Tam. means glass bangles + salt. A very white medicinal salt from Pooneer [q.v.] earth. Fel vitri or glass gall. Carminative in medicine. Same as Poongauram [q.v.].——*Vediyooppoo* (పెట్లుప్పు - petluppu, Tel.; വെടിയുപ്പ് - vetiyuppu, Mal.; வெடியுப்பு - vediyuppu, Tam.). From (vedi, tam. explosion + uppu, tam. salt). Saltpetre; same as Pottle ooppoo.

OOR (ال - ur, *Ar.*). Al before r in Arabic compounds; as Abd oor raheem, slave of the merciful [al].

OOR (ಊರು - úru, *Can.*; ఊరు - úru, *Tel.*; ഊര് - úr, *Mal.*; ஊர் - úr, *Tam.*). From (uru, tam. to dwell). Agricultural village [graumam]; as opposed to Caud [q.v.], or wild untilled tract. Suffix in place names; as Ahtoor, meaning river village. In Anglo-indian termination changed always, except in an iambus, to ore [q.v.]; as Coimbatore, Nellore, Tanjore, Vellore. There are 23 places in Southern india mentioned by Ptolemy which end in ουρ or ουρα. The following are examples :—σαλούρ, κορέουρα, ποδοπέρουρα, παλούρα, ἀρεμβούρ, μαγούρ, μαντιττούρ, κορινδιούρ. ποδοπέρουρα evidently means new great town, and παλούρα milk town. A south indian village consists not only of the residences of the inhabitants, but of a tract of land around them within determinate boundaries, including arable [sheygaul] and pasture lands [cuncha], wood [caud], waste [beed], and water [neer]. For village tenures see vol. I, 112, foot-note. Every village has an establishment of officers and servants, more or less complete according as its original organization has been less or more interfered with [balootah, graumam].——**(1)** The following translations from original Teloogoo papers show the way in which villages have been formed.—"*a*" Account of the village of Mahimalore in Nellore district. Thirteen hundred years ago this neighbourhood was an entire forest; that is to say in Shal. Sac. 424. A person named Mahimaloo in consequence of the oppression of Vencata bhauscara row, a petty ruler, emigrated from the Pauk naud, and Mahimaloo is alluded to in the account, as Our ancestor. He came to the neighbourhood of Pondore, and remained there six months, protected by the Boy [q.v.] and Mootraucha [q.v.] tribes. But the emigrating family [valsa] being large, they built another village, consisting at first only of four or five mud huts. It was called Mahimalore, after the name of the head of the family. Acquiring wealth, Mahimaloo called hither other families; and, the village being enlarged, he attended to its regulation. A Bramin named Vencannah, who had accompanied him from the first in his emigration, was made village accountant [curnum]. The younger brother of Mahimaloo from some disagreement left him, and built another village to the north-east, which he called Nundivaram. This person called Nundy reddy had two sons named Ramayya and Bheemayya, one of whom was a cowherd, and the other a shepherd. Both of these formed distinct hamlets, called Bheemavaram and Ramaya pully. The former becoming spiritually enlightened resolved not to eat without having a god, and accordingly built a Shiva [q.v.] fane [coil, goody], the image [shilay, vigraham] of which received the name Bheemalingeshwaran. After his death the building went to ruin, but vestiges of it remain. The aforesaid Nundy reddy appointed Vencannah, the Bramin as accountant both of his own villages and his son's villages. The descendants of that Bramin have continued to be hereditary accountants. In Shal. Sac. 1,139, the chief of the Velgotiwaur, named Vencatapaty naidoo, built a fane to Shree vengopaulsawmy. Subsequently people from other places came hither and built eight villages around. In a Shooclam [brihaspaty chuckram] year a famine occurred, and these villages became entirely desolate. When Krishnaroya [q.v.] conquered the Gajapaty [q.v.] prince, he placed three persons, named Lakky rauz, Chittam rauz and Narrain rauz in possession of the fort [cottay] of Mahimalore, each of which persons formed a district called after his own name. After their death the management was in the hands of people appointed by the Circar [q.v.] under the Oodayagherry jagheer [q.v.], and so it continues to the present time. The names of the subsequent headmen are all Mahomedan; down to the English rule, wherein the name of Mr. Travers as Collector appears. There follow very minute details of villages, fanes, reservoirs, groves, classes, and numbers of trees.—"*b*" Account of the village of Raupore in Nellore district. About 524 years ago, this place was wild and uninhabited; the diwaun [q.v.] of the Gajapaty [q.v.] had the jungle cleared, and, by permission of the Circar, established a village which he called Raupore. Some villages were built by other persons. A Bramin was named as accountant [curnum] and his descendants held the office. When the Chola rajah came hither the office was sold to a person under the Chola [q.v.] ruler. The fort was built by Pedda comaura yantsama naidoo of the Velgotiwaur race, who excavated three water reservoirs; he also built some fanes [coil, pagoda]. The accountants built a shrine to the tutelary goddess, which alone now continues. One named Krishnappa naick came from the west and plundered, when one Vijnam khan fought with him and took him prisoner. The names of two or three Mahomedan rulers follow, down to the assumption of the district by the Honorable Company.—"*c*" Account of the village of Kota in Nellore district. The formation of the village is dated in Shal. Sac. 513, and ascribed to the accountants of Tondiman [q.v.] chuckravurty [q.v.]. Some Jeinas [q.v.] from the neighbourhood engaged in cultivation. The Bramins were accountants. One named Mookkanteshwaran governed. His son was Ranadheeran. His younger brother was Manodheeran. Then Nundan chuckravurty. Next the Jeinas from the Conjeeveram country. Then the Chola rajah. Next Ambhojam rajah. Then Siddhy rauz. Then Vaimareddy. At the request of the people, owing to the dread of robbers, the latter appointed one named Chittait bodhanalingama naidoo as a guardian of the town and neighbourhood. Subsequently when Narsimha deva royer ruled a dispute arose between the Bramins and the Jeinas and many of the Jeinas were killed. The remains of their class emigrated towards the south. In the time of Krishnaroya some one excavated a water reservoir [cheroo]. Fanes were built by different people. The government came into the hands of the Royel [q.v.] by whom the population was increased. Timma naidoo built a village called by his own name, and brought some merchants to the place. Others built villages, and, after a few transitions of power, the rule came into possession of the Nellore chieftain.——**(2)** The ninth chapter of the Maunasauram [q.v.] treats of villages and towns. It regards the formation of streets [veety] and the allotment of suitable sites for the building of temples [coil, pagoda], piazzas, &c. The extent of villages or towns is declared to admit of forty varieties, consisting of from five hundred to twenty thousand dandams [q.v.] square, each sort exceeding the one immediately below it by five hundred dandams. The whole area of a village, with the lands thereunto belonging, being divided into twenty equal parts, one is assigned for the occupation of Bramins, six or more for that of the three other classes, and the remainder for agriculture. A street that goes round the village or town is called mungala veety [q.v.], which should be from one to five dandams in width. That which runs from east to west is called raja patam; that which has gates on both sides raja veety; that which has sundhies or angles, sundhy veety; and that which is in a southerly direction, maha caulam or vimaunam [q.v.].

There are eight sorts of villages or towns, namely:—dandacam or that which resembles a staff; sarwatobhadram, or in every respect happy; nundyauvartam or the abode of happiness; pudmacam or that which has the form of a lotus [nelumbo] flower; swasticam [q.v.] or that which resembles the mystical figure so named; prastaram or that which has the shape of a couch; caurmookam or that which resembles a bow; chatoor mookham or that which has four faces. The height of the buildings should correspond in every street as far as practicable, and in all structures of the same number of storeys. The outer door should be placed not exactly in the middle of the façade, but a little more to one side than to the other. In the front of the houses should be erected a vaidicay [pyall], or raised seat or pedestal on each side of the door. An edifice is called shooddham which is composed of but one kind of material, as stone [cull], brick [shengal], &c., and this is considered the best of all. Mishram is that which is composed of two kinds of materials, as brick and stone, or stone and metal [loham]. Sankeernam is that composed of three or more kinds of materials, as timber, stone, brick, metal, &c. [maunasauram, staupatyam, veed].——*Ooran* (ஊரான் - úran, Tam.). From (above + an, tam. personal termination). Chief of agricultural tract [marootham].——*Ooraulan* (ഊരാളൻ - úrálan, Mal.). From (above + álu, mal. to own). Formerly the representatives of villages, part of whose duty it was to manage the village temples. Now the founders or present managers of temples [coil, pagoda]. Their office is Ooroyma.——*Oorauly* (ഊരാളി - úráli, obl.; ഊരാളൻ - úrálan, pers. sing.; ഊരാളർ - úrálar, pers. pl., Mal.). A forest tribe on the West coast. Inhabit the Todoopoya hills. They build their huts on trees, like the Arayar [malayarasar]. They entertain a singular aversion to buffaloes [khoolgah], whose approach they anxiously avoid; and are expert in the use of the bow. Ooraulies and Oollaudar intermarry. From the practice of polyandry, they are, like the Todahs [q.v.] on the Neilgherries, fast diminishing in numbers. They consider themselves superior to the Poolayar [q.v.] and Pariahs [jauty]. See vol. II, 104.——*Oorautchy* (ஊராட்சி - úrádchi, Tam.). From (above + ál, tam. to rule). Management of a village [maniyam].——*Oorcheroo* (ఊరుచెరువు - úrucheruvu, Tel.). From (above + cheruvu, tel. tank). Tank [q.v.] for common use of villagers.——*Oorcuttey* (ಊರುಕಟ್ಟೆ - úrukatte, Can.). From (above + katte, can. raised ground). Raised seat round a tree in front of a village where villagers assemble.——*Oor gownden* (ஊர்க்கௌண்டன் - úrkkaundan, Tam.). Head of a village [gownden].——*Oor maniyam* (ஊர்மணியம் - úrmaniyam, Tam.). From (above + maniyam, tam. superintendence). Revenue head of a village [maniyam, monigar].——*Oor maunyam* (ஊர்மானியம் - úrmániyam, Tam.). From (above + mánya, san. privilege). Village free lands, exempted from revenue for the performance of village duties [inam].——*Oorote* (ഊരോട്ടു - úróttu, Mal.). Oblique form of Ooragam. From (úr, mal. village + akam, mal. inside). Village; Malabar dist., Yernaud tal.; lat. 11° 5′; long. 76° 01′; from Calicut S.E. 20 miles; from Munjery W. 8 miles. Oorotemala hill and trig. station is in the same amshom [q.v.].——*Ooroyma* (ഊരായ്മ - úráyma, Mal.). The office of an Ooraulan. Proprietorship of a temple [coil, pagoda].——*Ooroymacauran* (ഊരായ്മക്കാരൻ - úráymakkáran, Mal.). Same as Ooraulan.——*Oor valam* (ஊர்வலம் - úrvalam, Tam.). From (above + valam, tam. right side). A procession, through a town, &c., when the party begins to move to the right [pradackshinam].——*Ore* (ಊರು - úru, Can.; ఊరు - úru, Tel.; ഊർ - úr, Mal.; ஊர் - úr, Tam.). Suffix in place names.

OOR (ஊறு - úru, *Tam.*). To ooze.——*Oorny* (ஊறணி - úrani, Tam.). From (úru, tam. to ooze). Tank [q.v.]. Suffix in place names.——*Ootancaray* (ஊத்தங்கரை - úttangarai, Tam.). See sep. title.——*Ootatoor* (ஊட்டத்தூர் - úttattúr, Tam.). From (úttu, tam. fountain + úr, tam. village). Village; Trichinopoly dist., Perambalore tal.; acres 2,910; lat. 11° 5′; long. 78° 55′; from Perambalore S. 11 miles; from Trichinopoly N.N.E. 21 miles. Gave its name to a talook abolished in 1817. Taken by French in 1750. Old and well-sculptured Shiva temple [coil] with inscriptions [shausanam].——*Ootcore* (ఊటకూరు - útukúru, Tel.). From (úta, tel. spring + úru tel. village). Village; Nellore dist., Raupore tal.; pop. 465; acres 2,982; lat. 14° 15′; long. 79° 47′; from Nellore S.W. 22 miles; from Raupore E. 14 miles. Inscriptions. Small tank and much wet cultivation. Abruck [q.v.] found mixed with sand [manal]. Trig. station in lat. 14° 14′ 26·38″; long. 79° 44′ 56·59″; height 524 feet; from Raupore E.N.E. 12 miles; from Toorimerla S.S.W. 4 miles.——*Oott* (ఊట - úta, Tel.; ஊற்று - úttu, Tam.). From (úru, tam. to ooze). Spring. Suffix in place names; as Nariyoott, meaning jackal spring. Oottcaul, from (kál, tam. channel), is a water-course leading from a spring [casham, caul, spring channel].

OORAFAH (عرفا - urafá, *Ar.*). Plural of (árif, ar. the intelligent). Part of lacab of the religious; as Ayeen ool oorafah, the eye of the contemplative.

OORAY (உரை - urai, *Tam.*). Means speech. Commentary. This should, according to the Nunnool, contain the following fourteen particulars;—"*a*" the text;—"*b*" the general scope or purport of the text;—"*c*" grammatical connection or parsing;—"*d*" literal meaning or giving equivalent words;—"*e*" free rendering of the text or paraphrase;—"*f*" illustration by examples;—"*g*" anticipating objections;—"*h*" answering objections;—"*i*" explanatory notes or special remarks;—"*j*" supplying ellipses;—"*k*" determining the meaning of doubtful terms, or giving the opinion of different commentators;—"*l*" determining the meaning between a diversity of opinions;—"*m*" practical application;—and "*n*" textuary proofs. There are two sorts of commentaries, viz., Caundigay or brief, and Vriddhy or diffuse [nunnool].

OORDHWAM (ऊर्ध्व - ùrdhva, *San.*). From (vridh, san. to increase); raised upwards. Elevation [oonnatam], zenith [jyotisham, ootcham, zenith].——*Oordhwa avanataumsham* (ऊर्ध्वावनतांश - úrdhvávanatámsha, San.). From (above + avanatámsha, san. altitude). Meridian altitude [jyotisham].——*Oordhwa bauhoo* (ऊर्ध्वबाहु - úrdhvabáhu, San.). From (above + báhu, san. arm). A devotee who holds his arms above his head till they are fixed in that position.——*Oordhwa nataumsham* (ऊर्ध्वनतांश - úrdhwanatámsha, San.). From (above + natámsha, san. zenith distance). Meridian zenith [q.v.] distance [jyotisham].——*Oordhwa poondram* (ऊर्ध्वपुण्ड्र - úrdhvapundra, San.). From (above + pundra, san. a mark on the forehead). The perpendicular line on the forehead worn by the Veishnavas [naumam]. Cf. Tripoondram.——*Oordhwa sancramanam* (ऊर्ध्वसंक्रमण - úrdhvasankramana, San.). From (above + sankramana, san. transit). Culmination of a celestial object, time of transit [sancramanam] or of passing the meridian [jyotisham, raikhay].

OORDOO (اردو - urdú, *Hind.*). From turkish; means camp. Hindostany language as formerly spoken at courts of Delhi and Lucknow; formed by Arabic, Persian, and Turkish words upon a grammatical basis of the pracritic Hindee and original Sanscrit [bhaushay]. Took its rise with the first invasions of the mahomedans in the twelfth century, in the mahomedan court at Delhi; as the invaders were a mixed multitude consisting of Arabs, Persians, Afghans, Turks, &c., this half court and half camp dialect consisted of a great number of Arabic and Persian words and a sprinkling of the Turkish, while nevertheless based on the grammar of the Hindee dialect as spoken round Agra and Delhi. Under Acbar and his successors Jehaungeer and Shah jehaun, it became the speech of the cultivated classes and attained the status of a new language from its extensive Arabic and Persian vocabulary, its readiness to adapt itself to new words and new ideas, and its elegant idioms. It has now a literature of its own and is fast replacing, if it has not already done so, the lingua franca of the south, the Deccany [q.v.] dialect. Oordoo poesy may be said to be the fashionable accomplishment of every educated Mahomedan in his leisure hours. Oordoo writers are innumerable and Oordoo prose and poetical works are text books at the Madras university. See vol. I (60).

OORF (عرف - urf, *Hind.*). From (arafa, ar. to know). Known as, alias. Also a pet-name, formed generally with the addition of Laul, Sahib, Miyaun, and Jaun to an alam [ism].

OORIYA (ఓఢ్ర - ódhra, obl.; ఓఢ్రుడు - ódhrudu, pers. sing.; ఓఢ్రులు - ódhrulu, pers. pl., *Tel.*). Inhabitants of Orissa [q.v.]. The bramins of this name are a branch of the Gowda [q.v.] division of bramins [q.v.]; called also odhra desham or ootcala bramins; they are chiefly employed in government and priestly offices. The Ooriya language is an aryan pracritic language [bhaushay, jauty].

OOROO (उरु - uru, *San.*). From (vri, san. to cover). Great.——*Oorlaum* (ఉర్లాము - urlámu, Tel. urlám *). From (uru, san. great + lámu, tel. cave). Proprietary estate, Village; Ganjam dist., pop. 11,536; sq. miles 2½; lat. of village 18° 25′; long. 84° 02′; from Chetterpore S.W. 91 miles; from Chicacole N.E. 10 miles; from the sea W. 12 miles. Zemindarry [q.v.] was formerly in possession of Cunnepully ramavadhaunooloo, but sold by Government for arrears about 1812. Booddhiraus basavarauz, who purchased it, died in 1814, and his widow afterwards managed the estate. One of her three daughters, Viyyamma, married Cundoocoory perayya lingam, and had a son Basavarauz puntooloo, on whom the estate devolved in 1855. On his death in 1878 his only son, Vishwanauta row, was a minor, and the estate came under the Court of Wards. The boy died in 1880 from an accident. His widow, Maha lutchmamma, is the present proprietrix without any issue. The estate still continues under Court of Wards. Jiroyaty [q.v.] villages in the estate are Chodavaram, Cobagaum, Devaudy, Gopaulapenta, Killaum, Mabagaum and Oorlaum. Inam [q.v.] villages are:—Jonnaum, Loocoolaum, Maukivalsa, Pervataulapett, subsequently acquired by purchase, Pattanja valsa, Vantamundalam and Vencatroya pooram. Besides these there is a family property in Godavery district consisting of a share in Cunchanapully, paying a yearly rent of Rs. 443. The proportion of dry lands [poonjah] to wet [nunjah] is about one to ten. The estate is devoid of hills or forests and no cultivable land is waste. Peshcush Rs. 12,467.——*Oorvashy* (उर्वशी - urvashí, San.). From (above + vashí, san. having will). Hot desire. An apsaras of Indran's [q.v.] heaven [swargam]. Also identified with Gungay [q.v.]. How she was rescued from a demon by Pooroorayan

whom she married afterwards has been dramatized by Calidass [q.v.] in his Vicramorvashy [q.v.].——*Oorvauroo* (उर्वारु - urváru, San.). See sep. title.

OOROO (உரு - uru, *Tam.*). From (rúpa, san. shape). Shape.——*Oorav* (ఉరవు - uravu, Tel.). Beauty.——*Ooravacondah* (ఉరవకొండ - uravakonda,* Tel.). From (uravu, tel. beauty + konda, tel. hill).—"*a*" Deputy tahsildarry, Anantapore district. Pay Rs. 70;—"*b*" Village, Deputy tahsildar's station; Anantapore dist., Gooty tal.; pop. 8,557; acres 7,477; lat. 14° 57′; long. 77° 18′; from Anantapore N.W. 29 miles; from Bellary S.E. 26 miles; from Gooty W.S.W. 29 miles; from Madras N.W. 240 miles; from Penoocondah N.N.W. 62 miles. Fine tope [q.v] outside the town. Built at the foot of a triangular-shaped hill, height 1,922 feet.——*Oorvilly* (உருவில்லி - uruvilli, Tam.). From (above + villi, tam. bowman). Manmatan [q.v.], the beautiful bowman.——*Oorvily* (உருவிலி - uruvili, Tam.). From (above + ili, tam. one who has not); formless. Manmatan.

OOROOL (ഉരുള - urula, *Mal.*). Circular.——*Oondavully* (ఉండవల్లి - undavalli, Tel.). From (unda, tel. round + palli, tel. village). Sanscrit name (anantashayana), meaning vishnoo, the eternal + seat. Village, Hill; Kistna dist., Guntoor tal.; pop. 1,194; acres 1,690; lat. 16° 30′; long. 80° 37′; from Guntoor N.N.E. 16 miles; from Masulipatam W.N.W. 41 miles. On the Kistna. The celebrated four-storeyed rock-cut cave temple is a specimen of the hindoo religious art of the seventh or eighth century. Probably excavated by veishnavite Chalookyas [q.v.] who came from Calyaun, after they had conquered the Shaulancauyana [q.v.] dynasty [raj] of this or the Vengy [q.v.] country. Dedicated to Vishnoo as Narayanan [q.v.] or Ananta shayanan, a colossal sculpture of whom recumbent is seen in the third storey. Many other rock-cut shrines and mantapams [q.v.] about the hill.——*Oorool kiyang* (ഉരുളക്കിഴങ്ങ - urulakkizhannu, Mal.). From (above + kizhannu, mal. root). A potato [q.v.].

OORS (عرس - urs, *Hind.*). From (arasa, ar. to unite); union of soul. Religious ceremony celebrating the union of the soul of deceased saint [walee] with the deity. Generally applied to the anniversary of a saint's death; as Cawder wally ka oors, the festival dayof Cawder wally [q.v.].

OORVAUROO (उर्वारु - urváru, *San.*). From (uru, san. much + ár, san. to cause to flow) [ooroo]; diuretic. San. also (gavákshí), meaning cow + eye. Botanically the Cucumis genus, cucurbitaceæ [vricsham, 62]. Melons and cucumbers. Climbing herbs, hispid or scabrous; leaves stalked, palmately lobed or five-angled or entire, dentate or serrate; flowers yellow, shortly peduncled; fruit fleshy, indehiscent, large or small, spherical or elongate, smooth or tuberculate; seeds very many, oblong, compressed, mostly smooth. The species best known to the natives are shown below. For water-melons see Indravally; for pumpkin see Carcauroo; for white pumpkin see Wax-gourd and Fakeer's bottle; for snake cucumber see Snake gourd; for spiked bitter cucumber see Carolah.——*Common cucumber* (त्रपुषा - trapushá, San.; कांकडी - kámkadí, Mahr.; तौसे - tausé, Conc.; قثا - kisá, Ar.; خیارزه - khiyárzah, Pers.; کهیرا - khírá, Hind. and Dec.; تیمون - timun, Malay; ಮುಳ್ಳುಸವುತೆ - mullusavute, Can.; ತೆಕ್ಕರೆ - tekkare, Too.; ముల్లుదోస - -mulludósa, Tel.; କାକ୍ନୈ - kaknai, Oor.; മുള്ളൻവെള്ളരി - mullanvellari, Mal.; රටකැකිරි - ratakékiri, Singh.; முள்வெள்ளரி - mulvellari, Tam.). San. from (trapa, san. bashfulness + ush, san. to burn), from soft flesh and being easily cooked; cf. tagaram. Ar. from (kassa, ar. to collect); from abundant growth. Pers. from (khiyár, pers. cucumber + zah, pers. born); referring to smallness of fruit. Can. from (mullu, can. thorn + savute, can. cucumber). Tel. from (mullu, tel. thorn + dósa, tel. cucumber). Mal. from tamul. Singh. from (rata, singh. foreign + kakira, singh. cucumis). Tam. from (mul, tam. thorn + vellari, tam. the plant). San. also (urváru), meaning much + discharging, applied to urine, a diuretic; (hastiparní), meaning elephant + leaf; (mútrap'hala), meaning urine fruit; (sukhásha), meaning eaten with pleasure. Hind. also (bislombí); (indráwan), meaning colocynth; (khírákankarí), meaning short cucumber; (kankarí), meaning cucumber; (pahárííndráyan), meaning mountain colocynth. Malay also (antimun); (katimun). Can. also (kakkarikáyi); (savuteballi), meaning cucumber + creeper. Tel. also (dósa); (kondabudama), meaning hill + the plant, cucumis trigonus, roxb. Mal. also (kakkari); (vellari), meaning having white grains, from the white rice-like seeds. Tam. also (malaittummatti), meaning mountain + the plant, cucumis trigonus, roxb.; (kakkari), from (kakrí, hind.) [country melon]; (vellari), meaning white + stripe; (kíraikkáy), meaning vegetable + fruit. Greek κολοκύνθη; compare bitter water-melon [q.v.]. Title otherwise Foreign cucumber, Hill colocynth, Wine fruit. Botanically Cucumis [oorvauroo] sativus, linn., cucurbitaceæ [vricsham, 62]. Alias Cucumis hardwickii, muricatus. Leaves ovate five-angular or slightly lobed, lobes acute hispidulous on both surfaces and also often with soft hairs, petals $\frac{5}{8}$ inch, fruit glabrous sometimes tuberculated commonly elongate; flower largish, yellow. The juice mixed with alcohol is used in rheumatic affections; seeds possess cooling properties, also diuretic; pulp of fruit is purgative like colocynth [bitter water melon]; mentioned in pharm. Curried or pickled [chutney]; young ones known as gherkins. A fixed fat oil [yennay] from the seeds, used in cookery and for lamps. Compare:—Citrullus colocynthis, bitter cucumber; Cucumis trigonus, fowl's cucumber, and pubescent cucumber; Luffa acutangula, acute-angled cucumber; Momordica charantia, spiked bitter cucumber; Trichosanthes anguina, snake cucumber. See gloss paragraphs.——*Common melon* (खर्वूजा - kharvújá, San. and Mahr.; بطیخ هندی - bittíkhihindí, Ar.; خربوزه - kharbuzah, Pers., Hind. and Dec.; سامڠک - sámangka, Malay; ಮಿನಿಕೆಗಿಡ - minikegida, Can.; ఖర్బూజాదోస - karubúdzudósa, Tel.; വത്തക്ക - vattakka, Mal.; மொலாம்பழம் - molámbazham, Tam.). San. from persian. Ar. from (bittíkh, ar. melon + hindí, ar. indian). Pers. from (khar, pers. large + buzah, pers. sweet fruit). Can. from (minuku, can. to shine). Tel. from (kharbuzah, hind. melon + dósa, tel. cucumber, cucumis sativus, linn.). Mal. from (pateca, port. melon). Tam. from (melon + pazham, tam. fruit). Malay also (bakaka); (páteka); (manaiki); (tamiki). Can. also (ibbudlu). Tel. also (mulámpandu), meaning melon fruit. Tam. also (vellari), meaning white + streak. The cucumber of the Bible, Numb. xi. 14. Greek σίκυς. Title otherwise Common melon, Indian melon, Kharboja, Melon cucumber, Musk melon of old writers, Sweet melon [true musk melon]. Botanically Cucumis [oorvauroo] melo, linn., cucurbitaceæ [vricsham, 62]. Alias Cucumis maltensis; Melo vulgaris. Trailing; stems scabrous; leaves broad cordate, more or less five-lobed; lobes rounded and toothed; male flowers crowded, females solitary; fruit short, oval, when young pubescent, when old glabrous, variegated; flowers largish yellow; native of n.w. india; extensively cultivated. Seeds a cooling medicine; used in suppression of urine. Flesh of the fruit sweetish.——*Country cucumber* (पिण्डारक - pindáraka, San.; कारी - kárí, Mahr.; पेंडारे - péndárí, Conc.; جنگلی ککری - janglíkakrí, Hind.; جنگلی کنکری - janglíkankarí, Dec.; ಕಾಡುಮಿನಿಕೆಬಳ್ಳಿ - káduminikeballi, Can.; ಅಡಕಬಾರೆ - adakabáre, Too.; బుడమ - budama, Tel.; കരുമത്തൻ - karumattan, Mal.; කැකිරි - kakira, Singh.; தும்மட்டி - tummatti, Tam.). Hind. from (janglí, hind. wild + kakrí, hind. cucumber, cucumis melo, linn.). Dec. from hindostany. Can. from (kádu, can. wild + minikeballi, can. + cucumis melo, linn.). Tel. compare indian winter cherry. Mal. from (karu, mal. black + mattan, mal. pumpkin, cucurbita maxima, duch.). San. also (vishálá), meaning wide. Hind. also (kachari); (indráwan), meaning colocynth [bitter water melon]; (janglíindráyan), meaning wild colocynth; (bislombhí); (baramkáíkájhár). Can. also (budumékayi); (mekke); (halmekkeballi); (hirimekke); (doddamekke); (adikabálí); (paççekáyigida). Too. also (pendáre). Tel. also (nakkadósa), meaning fox + cucumber, cucumis sativus, linn.; (nélabudama), meaning ground + the plant; (adavibudama), meaning forest + the plant; (adaviputtsa), meaning forest + the plant; (nallabudama), meaning black + the plant; (puttsa); (kódibudama), meaning fowl + the plant. Mal. also (valiyamukkálpíra), meaning large bryonia. Tam. also (péyttummatti), meaning wild + the plant; (káttuttummatti), meaning forest + the plant; (kommatti); (shukkam). Title otherwise Callous-leaved bryonia, Dark pumpkin, Fowl's cucumber, Pubescent cucumber. Botanically Cucumis [oorvauroo] trigonus, roxb., cucurbitaceæ [vricsham, 62]. Alias Bryonia callosa, punctata; Cucumis madraspatanus, pseudocolocynthis, pubescens, turbinatus. Climbing shrub, spreading; stem filiform, furrowed, rough with bristly hairs; leaves on long petioles, cordate, three to five-lobed, roundish, toothed, scabrous, and hispid on the veins below; berries globose, largish, smooth; flowers yellow; flowering nearly all the year. Small bitter seeds are mixed with oil and employed as vermifuge; also in veterinary practice; pulp of fruit, purgative like colocynth; mentioned in pharm. Fruit used as pickle [chutney]. Fixed fat oil [yennay] from seeds by boiling used for lamps. There is a variety called in all the languages Wild.——*Country melon* (कर्कटी - karkatí, San.; कांकडी - kámkadí, Mahr.; قثا - kisá, Ar.; خیار - khiyár, Pers.; ککری - kakrí, Hind.; کنکری - kankarí, Dec.; ಕರುಂಬಳ - karumbala, Can.; ಕರುಕುಂಬಡ - karukumbada, Too.; దోస - dósa, Tel.; കക്കരി - kakkari, Mal.; கக்கரி - kakkari, Tam.). San. from (karka, san. thorn + at, san. to go); from the prickly nature of fruit. Mahr. from sanscrit. Ar. from (kassa, ar. collect); from growing in abundance. Hind. from sanscrit. Dec. from sanscrit. Can. from (karu, can. black + kumbala, can. gourd). Mal. from sanscrit. Pers. also (khiyáridaráz), meaning long cucumber; (khiyárzah), meaning small cucumber. Malay also (smangha). Can. also (mullusavute). Tel. also (mulludósa), meaning thorn + cucumber; (vellagummadi), meaning white + pumpkin, cucurbita maxima, duch.; (nakkadósa), meaning fox + cucumber; (pandilidósa), meaning pandaul + cucumber. Mal. also (narayankumbalam), meaning grey + white gourd. Tam. also (narivellari), meaning fox + cucumis sativus, linn.; (mulvellari), meaning thorn + the plant, cucumis sativus, linn. Title otherwise Field cucumber, Fox cucumber, Grey cucumber, Kakree, Pandaul cucumber, Prickly cucumber, Prickly melon. Botanically Cucumis [oorvau-

roo] melo, linn., var. utilissimus, roxb., cucurbitaceæ [vricsham, 62]. Alias Cucumis utilissimus. Stems exactly as in cucumis sativus [common cucumber], but not quite so extensive; tendrils simple; leaves broad-cordate, generally more or less five-lobed; lobes rounded, tooth letted; above pretty smooth, below scabrous, the largest about 6 inches each way; floral leaves of the female flowers sessile, and very small; male flowers axillary, peduncled, crowded, but opening in succession; female flowers axillary, peduncled, solitary; both sorts yellow about 1-1½ inches diameter; flowering nearly all year; fruit fleshy, generally a very perfect oval; when young downy and clouded with lighter and darker green; when ripe perfectly smooth, variegated with deeper and lighter yellow; 4-6 inches long, and 3-4 inches diameter. Fruit varies in color from dark green to nearly white, usually changing to a bright orange color when ripe; when little more than one-half grown, is oblong, and somewhat downy, in this state pickled; when ripe about as large as an ostrich's egg, and same shape. Seeds, like those of the other cucurbitaceous fruits, contain much farinaceous matter, blended with a large portion of mild oil; for applying the seeds to different purposes, the usual mode of cleaning them from the pulpy mass in which they are contained is to mix them up with wood ashes, rub them therein, and spread them out to dry. In cultivating, the seeds are mixed with those of sorghum vulgare, pers. [cholum], or some others of the large culmiferous tribe and sown together with them; latter shade the former. The powder of the toasted seeds mixed with sugar is a powerful diuretic; promotes the passage of sand or gravel; substituted for british spiritus ætheri nitrosi, and pareira brava [indian pareira]. When cut these gourds have much the flavor of the melon, and they will keep good for several months if carefully gathered without being bruised and hung up; they are also in this stage eaten raw, and much used in curries [q.v.] by the natives; the natives dry and grind the seeds into a meal, which they employ as an article of diet; they also express a mild oil [yennay] from them, which they use in food for lamps and in arts and manufactures.——*Mottled melon* (उर्वारु - urváru, San.; پھونٹ - phúnt, Hind.; پھوٹ - phút, Dec.; పెద్దదోస - peddadósa, Tel.; പുട്ടുവെള്ളരി - puttuvellari, Mal.; வெள்ளரி - vellari, Tam.). Hind. means cracked or burst, from its bursting spontaneously when ripe. Tel. from (pedda, tel. large + dósa, tel. the cucumber plant). Mal. from (pishta, san. flour + vellari, mal. cucumis sativus, linn.); from flour-like pulp of ripe fruit. Tam. from (vel, tam. white + ari, tam. streak). Hind. also (túti); (kachrá) when unripe. Tel. also (dósa); (peddakáya), meaning large + fruit. Tam also (kakkari). Title otherwise Flour cucumber, Phoont. Botanically Cucumis [oorvauroo] melo, linn., var. momordica, roxb., cucurbitaceæ [vricsham, 62]. Alias Cucumis momordica. Leaves round-cordate, sometimes five-angled, scollop-toothed; male flowers fascicled axillary, peduncled, crowded; female flowers solitary peduncled; fruit very smooth, oblong, generally tapering a little towards the end, with elevation or depression; 20-24 inches long, 3-6 inches diameter; when ripe bursting slowly into various portions. Flower largish, yellow; fruit pale yellow when ripe, quite smooth, 1-2 feet long, 3-6 inches diameter; seeds rather smaller than those of the common melon [q.v.]. Seeds are a cooling medicine. Fruits much eaten; when young they are a substitute for common cucumber [q.v.]; when ripe, with the addition of sugar [q.v.] they are little inferior to the melon.

OORY (ഉറി - uri, *Mal.*; உறி - uri, *Tam.*). From (uru, tam. to unite with).—"*a*" A net or swinging tray for suspending articles in a house, out of reach of ants, &c.—"*b*" Measure of capacity, chiefly grain. 2 oyaks = 1 oory; 2 oories = 1 nauzhy [alavay, 3d]. Approximate actual value, 1 oory = 8 cubic inches. Variable. Compare olluck. See vol. I, 609; II, 516.——*Oory ady* (உறியடி - uriyadi, Tam.). From (above + adi, tam. to beat); from ceremony of breaking pots. Lunar [chaundramaunam] festival [pundigay, 6d]. A ceremony in honor of Krishnan [q.v.], between 9th August and 8th September, commemorating his juvenile exploits in stealing ghee, butter, etc., from the houses of the gopies [q.v.]. Observed specially by the Yaudavas [q.v.] or shepherds. On the evening of the day after Krishna jayanty [q.v.], the idol is borne through the streets in procession and shepherds climb greased poles for money at the top [maryauday].

OORY (உரி - uri, *Tam.*). Quality [goonam].——*Ooritchol* (உரிச்சொல் - uriççol, Tam.). Adjectives and adverbs. Thus defined in the Nunnool:—பல்வகைப் பண்பும் பகர்பெயராகி, ஒருகுணம் பலகுணம் தழுவிப் பெயர்வினை. ஒருவா செய்யுட் குரியன உரிச்சொல்—"qualifying words are "words that stand immediately before a noun or verb to denote "some one or more properties or qualities that are seen in things "and actions."—"*a*" The Nunnool [q.v.] divides all qualities or attributes into four classes. The qualities of organized bodies [indriyam], i.e., of spirit in connection with body are thirty-two:—knowledge, kindness, desire, fear, modesty, fortitude, patience, determination, retention, confusion, thought, aversion, lust, mercy, shame, anger, boldness, envy, love, want, langour, weariness, affliction, pleasure, youth, old age, hatred, superiority, evil, perseverance, cruelty, haughtiness, and forgetfulness. The qualities of action of embodied living principle are five:—eating, sleeping, adoring, adorning, and walking. The qualities common to all bodies [bhootam] are six:—form, as square, length, circle, angle, &c.; measure, as one, two, three; color, as white, red, gold, black, green, &c.; smell, as good smell, bad smell; taste, as bitter, sour, astringent, saltness, sweetness, acridness; sensation, as heat, cold, softness, hardness, heaviness, lightness, smoothness, and roughness. Qualities which spirits have with or without bodies are nine, viz.:—visibility, concealment, increase, decrease, removal or motion, reception, trembling, connection, and giving.—"*b*" Adjectives and adverbs may be formed of all the above terms, by adding ஆன, உள்ள, or ஆகிய. They are indeclinables. Adjectives have no comparative and superlative degrees as in English and Sanscrit, but they are formed by the use of the fourth or fifth case, as, இதற்கு அது பெரித, இதிலும் அது பெரிது, that is greater than this, and by addition of எல்லாம், as எல்லாவற்றிலும் அது பெரித, that is greatest of all.

OOS (أص - أس - أث - us, *Ar.*). Al before s in Arabic compounds; as Abd oos samad, slave of the eternal [al].

OOSH (أش - ush, *Ar.*). Al before sh in Arabic compounds; as Abd oosh shakoor, slave of the grateful [al].

OOSHAK (اشق - ushshak, *Ar.*; اشه - ushshah, *Pers.*; اشق - ushshak, *Hind.* and *Dec.*; గమనాయకచెట్టు - gamanáyaka-chettu, *Tel.*; கமநாயகச்செடி - kamanáyagaççedi, *Tam.*). Title from arabic. Tel. corruption of gum ammoniacum. Tam. corruption of gum ammoniacum. Title otherwise Eastern giant fennel, Gum ammoniac tree. Botanically Dorema Ammoniacum, don., umbelliferæ [vricsham, 67]. Stem of plant abounds in a milky juice; agent for extracting it a beetle [zeerangy], multitudes of which pierce the stem; gum [gond] is then gathered and hardens into gum ammoniac. The article occurs in bazaars [q.v.] in two forms; first in voluminous masses of yellowish color, enclosing white almond-like [baudam] tears, the whole being of plastic consistence, and very impure; secondly, in tears of irregular form, white or yellowish, opaque, rather solid, agglutinated or distinct, compact, brittle, of glassy fracture, and free from impurities. Medicinally similar to, but less powerful than, asafœtida [q.v.]; officinal in pharm.; activity resides in a volatile oil [yennay] and a resin [raul]. Aureum is similar.

OOSHAS (उषस् - ushas, *San.*). From (vas, san. to shine). Aurora. The dawn, in the Aryan system [aroonan].

OOSHBAH (عشبہ - ushbah, *Hind.*). From arabic meaning green. Sarsaparilla.——*Country ooshbah* (ناٹ کا عشبہ - nátkáushbah, Dec.). Same as Indian sarsaparilla.——*Wild ooshbah* (جنگلی عشبہ - janglíushbah, Hind.). Same as Oval-leaved china root.

OOSHTRAM (उष्ट्र - ushtra, *San.*). From (ush, san. to burn); as bearing heat. Camel [ottagam].——*Ooshtarkhaur* (दुष्पर्शा - dushparshá, San.; धमासा - dhamásá, Mahr.; شوكة البيضا - shaukatulbaizá, Ar.; اشترخار - ushturkhár, Pers., Hind. and Dec.). Title from persian. San. from (dus, san. preposition showing difficulty + sprish, san. to touch); from prickly nature. Ar. from (shaukat, ar. thorn + baizá, ar. egg). Pers. from (ushtur, pers. camel + khár, pers. thorn). Ar. also (ákúl); (háj). Pers. also (bádáwurd), meaning wind breaker. Title otherwise Camel thorn. Botanically Fagonia arabica, linn., salvadoraceæ [vricsham, 86]. Alias Fagonia mysorensis. Shrub; leaves opposite, bistipulate; stipules thorny, subulate, very sharp, longer than the leaf; leaflets linear, cuspidate; peduncles from between the stipules of the opposite leaves, solitary, one-flowered; capsule pubescent; flowers white; on high lands. Leaves and twigs possess cooling properties. No other common species here. Same title given to Arabian manna [q.v.].

OOSSOOR (ಹೊಸೂರು - hosúru, Can. hosúr*). From (hosa, can. new + úru, can. village) [hosa].——(1) Talook, Salem district. Tahsildar's pay Rs. 200. Area 1,169 square miles. Population 155,768. Language chiefly Teloogoo and Canarese and partly Tamul. Between N. lat. 12° 09′ and 12° 53′ and E. long. 77° 31′ and 78° 18′. Extreme length from north to south 50 miles, and breadth from east to west 43 miles; average breadth being about 30 miles. Is a Balaghaut [q.v.] talook, or talook above the ghauts [q.v.], W. of district. Bounded north and west by Mysore territory; east by Krishnagherry and Dharmapoory talooks; and south by Dharmapoory talook and Collegaul talook of Coimbatore, between which and Oossoor frontier the Cauvery runs. Comprises the ancient talooks of Dencanicottah and Oossoor, which were merged into one in 1860, and is the most recently acquired portion of the district, having come into the hands of the British after the death of Tippoo in 1799. The northern portion is almost level. On the east is a series of rocky hills. On the south-east for about twenty miles, the Melagherries form an unbroken chain, separating the talook from Dharmapoory. The whole north and western part as far as Dencanicottah and Jowlikerey, is on the Mysore plateau. Beyond this the talook drops in

excessive plateaus. To one of the lower access is gained by the Anchatty ghaut. After that there are eight or nine descents before the level of Pennagaram and the Cauvery is attained viâ Nautroypolliem. The talook profits more from the south-west than from the north-east monsoon [q.v.]. Soil is chiefly red and sandy loam. There is a great absence of black soil; the only parts of the talook sufficiently level to admit of marshes and vast water-spreads being too well drained by nature for water to stand there. Red soils form 80 per cent. of the whole; regar [q.v.] 19 per cent., and there is only 1 per cent. of exceptional soil. Iron [auhan] is obtained at Vepanahully. The presence of gold [pon] is possible. It was found in Mysore territory in olden times not far from the Oossoor boundary, and a remarkably fine quartz [ven cull] reef exist near Camalaupooram to the north-west of Tully. There is some trade in grain and oil-seeds [yennay]. Weaving [nesavoo] is also carried on. Crops are cumboo [bajrah], raggy [q.v.], black cholum [q.v.], motchay [country bean], mustard [rayaun] and castor-oil seeds [aumanac], horse-gram [q.v.], and dholl [q.v.]. The talook is noted for the large number of areca [q.v.] gardens, mostly growing under tanks [q.v.]. The culture of black cholum for fodder is notable, as no crop is grown specially for that purpose below the ghauts. Large quantities of jack [q.v.] fruit, limes [lemon], and oranges [q.v.] of particularly good quality, and of a peculiar but excellent kind of plantain [q.v.] are grown in the neighbourhood of Tully. Sugar-cane [q.v.] is much grown in Dencanicottah division. Tobacco [pogauk] of a fair quality is also grown for local consumption. Exports are raggy [q.v.], beans [country bean], gram [q.v.], gingelly-oil, gingelly [q.v.] seeds and cattle [maud] chiefly to North arcot, Bangalore, and other parts of this district. Imports are rice [q.v.], green gram [q.v.], wheat [geung], cloths, salt [ooppoo], iron [auhan], ploughshares [calappay], &c., principally from Bangalore, Madras and Arnee and other parts of this district. The cattle of the talook are very fine and large herds of them graze in the forests of the Dencanicottah division. The breed is that known as the Mysore breed, the animals being of larger frame than the Aulambaudy cattle, but shorter in the leg. Both as milkers and for draught they are in much demand, large numbers being sent to the annual fairs at Trinomallee, Shreerungam. The Ponniaur, Chennaur, and other minor streams traverse the talook. The most important irrigation works are the Auliyaulam anicut [q.v.] across the Ponniaur about 9 miles east of Oossoor, Sauraundahully tank, and Tully tank. As the talook is influenced by both monsoons [q.v.], the supply of water for wet cultivation is more certain and regular than in the other parts of the sub-division. Camping ground:—Jakkairy. Zemindarries:—Ancooshagherry poliput, Bangalore, Shoolagherry. Places of archæological interest:—Bailore, Baugalore, Berikay, Birjapully, Dencanicottah, Devarcoondany, Goomalaupooram, Kelamungalam, Mullicaurjoona droog, Oodenapully, Oossoor, Ratnagherry, Shoolagherry, Tully. Principal trig. stations:—Anchatty droog, Ancooshagherry droog, Devarbetta, Gootroyenmullay, Mariyaulam, Oossoor. The leading places, &c., in the talook are the following.——*Anchatty* (அஞ்சட்டி - añjatti, Tam.). See sep. title.——*Anchatty droog* (அஞ்சட்டித்துருக்கம் - añjattitturukkam, Tam.). Trig. station; lat. 12° 35′ 20·69″; long. 77° 55′ 54·42″; height 3,195 feet; from Anchatty droog S. ¼ mile; from Oossoor S.S.E. 11 miles.——*Ancooshagherry* (ಅಂಕುಶಗಿರಿ - ankushagiri, Can. ankusagiri *). From (ankusha, san. elephant goad + giri, san. mountain); from its resemblance to an elephant goad. Tam. also (périgaippálaiyam), meaning kettle-drum + fortified village. Zemindarry, Village, Hill; pop. 1,527; lat. of village 12° 41′; long. 78° 07′; from Oossoor E.S.E. 18 miles; from Salem N. 70 miles. Polliem also known as Berikay. Peshcush Rs. 7,190. Ancooshagherry droog is Trig. station in lat. 12° 40′ 25·56″; long. 78° 07′ 34·32″; from Ancooshagherry E. ¾ mile; from Oossoor E.S.E. 18 miles.——*Bailore* (ಬೇಲೂರು - bélúru, Can.). From (bélu, can. to sacrifice + úru, can. village); supposed site of vasishtan's sacrifice. Can. also (doddabélúru), meaning great bailore. Village; pop. 375; acres 485; lat. 12° 34′; long. 77° 48′; from Oossoor S.S.W. 12 miles; from Salem N.N.W. 68 miles. Inscription [shausanam] of Mysore dynasty [raj], dated A.D. 1673.——*Balaghaut* (بالا گھات - bálághát, Hind.). See sep. title——*Baugalore* (ಬಾಗಲೂರು - bágalúru, Can.). See sep. title.——*Chennaur* (சென்னாறு - shennáru, Tam.). See sep. title.——*Dencanicottah* (ಡೆಂಕಣಿಕೋಟೆ - denkanikóte, Can.). See sep. title.——*Devarbetta* (ದೇವರಬೆಟ್ಟ - dévarabetta, Can.). From (déva, san. god + betta, can. hill). Hill; pop. 73; lat. 12° 38′; long. 77° 40′; height 3,368 feet; from Oossoor W.S.W. 16 miles; from Salem N.N.W. 75 miles. Trig. station in lat. 12° 37′ 29·93″; long. 77° 40′ 05·22″; height 3,368 feet; from Devarbetta W. ¼ mile; from Oossoor W.S.W. 16 miles.——*Gootroyen hills* (ಗುತ್ತಿರಾಯನಮಲೆ - guttiráyanamale, Can.; குத்திராயன்மலை - kuttiráyanmalai, Tam.); means gootroyen's hill, from a chieftain who ruled the surrounding country. Hills; lat. 12° 16′; long. 77° 54′; height 4,580 feet; from Oossoor S. 32 miles; from Salem N.N.W. 46 miles. Trig. station in lat. 12° 15′ 47·25″; long. 77° 53′ 48·67″; height 4,580 feet; from Gootroyen N.N.E. ½ mile; from Oossoor S. 32 miles.——*Hoscote* (ಹೊಸಕೋಟೆ - hosakóte, Can.). From (hosa, can. new + kóta, san. fort). Village; pop. uninhabited; acres 149; lat. 12° 38′; long. 77° 57′; from Oossoor S.S.E. 9 miles; from Salem N.N.W. 68 miles.——*Jakeery* (ಜಕ್ಕೇರಿ - jakkéri, Can.). See sep. title.——*Jowlikerey* (ಜವಳಿಕೆರೆ - javalikere, Can.). From (javali, can. proportionate + kere, can. tank). Village; pop. 461; acres 759; lat. 12° 31′; long. 77° 41′; from Oossoor S.W. 19 miles; from Salem N.N.W. 68 miles.——*Kelamungalam* (ಕೆಲಮಂಗಲ - kelamangala, Can.). See sep. title.——*Mariyaulam* (மரியாளம் - mariyálam, Tam.). Trig. station; lat. 12° 22′ 43·02″; long. 77° 44′ 48·97″; height 3,448 feet; from Mariyaulam W.S.W. 1 mile; from Oossoor S.S.W. 26 miles.——*Matagherry* (ಮತ್ತಗಿರಿ - mattagiri, Can.). See sep. title.——*Melagherry* (ಮೇಲಗಿರಿ - mélagiri, Can.). See sep. title.——*Oodenapully* (ಉದ್ದನಹಳ್ಳಿ - uddanahalli, Can.). From (uddanu, can. proper name + halli, can. village). Village; pop. 289; lat. 12° 36′; long. 77° 59′; from Oossoor S.E. 12 miles; from Salem N.N.W. 67 miles. At the foot a large bare rock of numerous gneissic out-crops. Public bungalow [q.v.]. The approach from Oossoor is picturesque. Dolmen [codaycull] with sculptured figures of warriors in the neighbourhood. One and-a-half miles west are sculptured cromlechs [paundoo coozhy] and holed dolmens.——*Oossoor* (ಹೊಸೂರು - hósúru, Can.). See below.——*Ponniaur* (பெண்ணையாறு - pennaiyáru, Tam.). See sep. title.——*Shoolagherry* (ಶೂಲಗಿರಿ - shúlagiri, Can.). From (shúla, san. trident + giri, san. mountain); the three lumps of the hills suggesting a resemblence to the sacred trident [shoolam]. Zemindarry, Village, Hill; pop. 1,104; acres 57,729; lat. of village 12° 40′; long. 78° 04′; from Oossoor E.S.E. 13 miles; from Salem N. 70 miles. The Poligar [q.v.] is related by marriage to the zemindar [q.v.] of Poonganore. Peshcush Rs. 5,499.——*Tully* (ತಳಿ - tali, Can.). See sep. title.——*Vepanahully* (ವೇಪನಹಳ್ಳಿ - vépanahalli, Can.). From (vépa, tel. margosa, melia azadirachta, linn. + halli, can. village). Village; pop. 1,171; lat. 12° 42′; long. 78° 14′; from Oossoor E. 25 miles; from Salem N. 72 miles. Iron is smelted.——**(2)** Town, Divisional and Talook head-quarters; Salem dist., Oossoor tal.; pop. 5,756; acres 2,111; lat. 12° 44′; long. 77° 52′; from Madras W. 165 miles; from Namcull N. 106 miles; from Salem N.N.W. 77 miles; from Tripatore W.N.W. 53 miles; from Yercaud N.N.W. 71 miles. On the side of a slight elevation. It is feverish and the water-supply has fallen off. Large community of weavers. Trade is almost entirely in grains and seeds. About half a mile from the town is a rocky hill, 300 feet above the plain and 3,120 feet about the sea, crowned by a pagoda [q.v.] of some size, visible for a considerable distance. In the side of the hill is a cave with a lingam [q.v.]. West of the town is an old fort [cottay], though useless now, from the commanding position which the pagoda hill occupies. It was taken by the British in 1791. Trig. station in lat. 12° 43′ 34·90″; long. 77° 52′ 51·49″; height 3,120 feet; from Choodavaudy W. ¼ mile; from Oossoor E. ⅜ mile.

OOSTAUD (استاد - ustád, *Pers.*). From persian. Preceptor.

OOSY (ஊசி - úsi, *Tam.*). From (súchi, san. needle). Needle, slender or fine. Plant first term from small pointed fruit or flower. Ex., where transl. is of second term:—Asclepias prolifera (úsippálai), milk plant; Capsicum minimum (úsimilagáy), capsicum; Jasminum auriculatum (úsimalligai), jasminum sambac; Oxystelma esculentum (úsippálai), milk plant; Phaseolus semi-erectus (úsittagarai), cassia tora. See gloss. paragraphs.——*Oosilam* (உசிலம் - usilam, Tam.). From (usi, tam. sharpness); from thorns. Same as Biswool.——*Oosilamputty* (உசிலம்பட்டி - usilambatti, Tam.). From (usilam, tam. a tree, acacia pennata, willd. + patti, tam. village).—"*a*" Deputy tahsildarry, Madura district. Pay Rs. 70.—"*b*" Village, Head-quarters of Deputy tahsildar and Sub-registrar, Madura dist., Tirmungalam tal.; pop. 6,183; acres 3,646; lat. 9° 58′; long. 77° 50′; from Dindigul S.S.W. 30 miles; from Kodaykarnal S.E. 27 miles; from Madras S.S.W. 272 miles; from Madura W. 22 miles; from Rameshwaram W.N.W. 112 miles; from Ramnaud W.N.W. 79 miles; from Tirumungalam N.W. 15 miles. Weekly market every Wednesday.

OOT (उत् - ut, *San.*). Up, forth [ood].——*Ood* (उद् - ud, San.). Prefix meaning up.——*Oodaunam* (उदान - udána, San.). From (above + an, san. to breathe). One of the five vital airs [vayoo], that which rises up the throat and passes into the head.——*Oodaya* (ഉദയ - udaya, Mal.). From (above + i, san. to go). Rising. Epithet of sun [sooryan]. Prefixed to names of Travancore rulers, as Oodayamaurtandan. Not the same word as Wodeyar [q.v.] of Mysore and Coorg.——*Oodayagherry* (ఉదయగిరి - udayagiri, Tel.; ഉദയഗിരി - udayagiri, Mal.). From (udaya, san. sunrise + giri, san. mountain).—"*a*" Deputy tahsildarry, Ganjam district. Pay Rs. 200.—"*b*" Village, Head-quarters of Deputy tahsildar, Sub-magistrate and District moonsif; Ganjam dist., Goomsoor maliah division; pop. 501; lat. 20° 08′; long. 84° 25′; from Balligooda E.S.E. 29 miles; from Berhampore N.N.W. 61 miles; from Chetterpore N.W. 65 miles; from Chicacole N.N.E. 128 miles; from Madras N.N.E. 545 miles; from Russellcondah N.W. 20 miles.—"*c*" Deputy tahsildar's station, pay Rs. 200. Ganjam dist., Pedda kimedy maliahs, Senior assistant agent's division; lat. 19° 09′; long. 84° 12′; from Balligooda S.S.E. 72 miles; from Berhampore W.S.W. 42 miles; from Chetterpore W.S.W. 56 miles; from Chicacole N.N.E. 61 miles; from Russellcondah S.S.W 60 miles. A Sowrah [q.v.] village situated in the centre of Pedda kimedy

maliahs of which it is the head-quarters. Is called Ramagherry-oodayagherry to distinguish it from Goomsoor-oodayagherry. Is on the maliah [q.v.] military road.—"*d*" Hill, Fort and town; Travancore state, Pudmanaubhapooram division, Cullcoolam tal.; lat. 8° 15′; long. 77° 23′; from Trivandrum S.E. 31 miles; from the sea N. 8 miles. Also called Pooliyacoorchy, meaning pooliyar jungle. Formerly one of the principal military stations of the province. The fort is built of strong granite [caroom cull] blocks round a lofty isolated hill by the southern main road to Trivandrum and lies a little to the south-east of the ancient town of Pudmanaubhapooram. Built for the Maharajah by a Dutch general named D'Lanoy. There is a cloth manufactory here. A detachment of the Company's troops was formerly stationed there. Inside the fort are the ruins of a church now overgrown with jungle. The Dutch general's tombstone still exists in the chapel. At the foot of the hill outside the fort there is a Bramin village.—"*e*" Talook of Nellore district; see sep. title.—"*f*" General sanscrit name for eastern ghauts [q.v.]——*Oodayam* (उदय - udaya, San.). From (above + ay, san. to go). Rising, ascending, creation. Prefix in place names. For hours of sunrise and sunset see Sooryan. For the astrological effects of rising of a planet [graham] or zodiacal sign see Raushy.——*Ooddesham* (उद्देश - uddésha, San.). From (above + dish, san. o show). Estimate.——*Oodgautry* (उद्गातृ - udgátri, San.). From (above + gai, san. to sing). One of the four chief priests [hotry]. The one who chants the hymns of the Sauma vedam [q.v.].——*Oodgeetam* (उद्गीथ - udgít'ha, San.). From (above + gá, san. to sing). The office of the oodgautry; also the syllable Om [q.v.].——*Oodyogam* (उद्योग - udyóga, San.). From (above + yuj, san. to join). Office [amal].——*Oojaula* (اجالا - ujálah, Hind.). From (above + jval, san. to blaze). Bright. Oojaula bee, bright lady [ism].——*Oojjein* (उज्जयिनी - ujjayiní, San.). From (ut, san. intensive prefix + jí, san. to conquer). Greek ὀζήνη. Capital of Vicramadityan [q.v.], and one of the seven sacred cities [caushy, nagaram]. Sanscrit geographers calculate their longitude [deshauntaram] from it, making it their first meridian [jyotisham, lunka, raikhay].——*Oonmattan* (उन्मत्त - unmatta, San.). From (above + matta, san. mad). Mad; a form of Shiva [q.v.].——*Oonnatam* (उन्नत - unnata, San.). From (above + nata, san. bent, inclination). Elevation.——*Ootcalam* (उत्कल - utkala, San.). From (utkala, san. to unbind); open or coast country. The modern Orissa, or the Ooriya country. Bounded on south by Telingana [q.v.], and on east by sea. On west and north a line drawn from Sonapore to Midnapore in Bengal is the boundary. See vol. I (2). Ootcalam is one of the main sub-divisions of Gowda [q.v.] or Northern bramins [odhram, ooriya].——*Ootcham* (उच्च - uççá, San.). Means apex.—"*a*" Apsis of a planet's [graham, noojoom] orbit [cacsham]. Mandotcham [q.v.] is the higher apsis or aphelion, and Sheeghrotcham [q.v.] or chalotcham is the lower apsis or perihelion.—"*b*" Also zenith [q.v.], that point of the heavens [bhagolam] which is directly over or vertical to an observer, and is the prolongation of the earth's radius to meet the celestial sphere. The nadir [q.v.] is the point directly beneath, or vertical below, the observer; the natives have no name for this. The zenith and nadir are the poles of the horizon [cshitijam, jyotisham, oordhwam].——*Ootchangy droog* (ಉಚ್ಚಂಗಿದುರ್ಗ - uççangidurga, Can.). From (huççangi, can. durgá, the terrific deity + durga, san. fort). Sanscrit name (utsavámbádurga), meaning festival + goddess + fort. Village, Hill; Bellary dist., Hurpanhully tal.; pop. 2,875; acres 9,852; lat. 14° 33′; long. 76° 06′; from Bellary S.W. 69 miles; from Hurpanhully S.S.E. 16 miles. The village is at the foot of the droog [q.v.]. The hill fort, built by one of the Hurpanhully poligars [q.v.], is now in ruins. The droog has a natural position of great strength, being almost perpendicular on the north and west sides.——*Ootchasamayam* (ഉച്ചസമയം - uççasamayam, Mal.). From (uççá san. high + samaya, san. time). Midday [ooroomam].——*Ootchicamullay* (உச்சிகமலை - uççigamalai, Tam.). From (uchhikha, san. high-crested + malai, tam. hill). Hill; North arcot dist.; Vellore tal.; lat. 12° 54′; long. 79° 01′; from Chittore S.S.W. 24 miles; from Vellore W. 12 miles. A chief peak of the jawaudies.——*Ootpatty* (उत्पत्ति - utpatti, San.). From (above + pad, san. to fall). Birth [jenmam], production.——*Ootramallore* (உத்திரமேரூர் - uttiranmérúr, Tam.). From (uttara, san. name of a viráta king + mél, tam. west + úr, tam. village). Sanscrit name (rájéndrachólachaturvédamangala), meaning rajendra cholan, the chola king + four sacred writings + village, or sacred place of bramins versed in the four vedams built by rajendra cholan.—"*a*" Deputy tahsildarry, Chingleput district. Pay Rs. 70.—"*b*" Town, Deputy tahsildar's head-quarters; Chingleput dist., Madrantacam tal.; pop. 2,733; acres 10,931; lat. 12° 37′; long. 79° 48′; from Chingleput S.W. 16 miles; from Conjeeveram S. 16 miles; from Madrantacam N.W. 12 miles; from Madras S.W. 47 miles; from St. Thomas' mount S.W. 39 miles, from Sydapett S.W. 41 miles; from the sea W. 30 miles. Important under Hindoo and Mahomedan rule. Came into British possession when Carnatic [q.v.] was cleared of French by Clive in 1752 after battle of Cauverypauk. Captured by French in 1754 and in same year recaptured by English with assistance of Maufooz khan. Again occupied by French in June, and retaken in July 1757 by British. In August French again took it, and, during next six or eight months, made forays in surrounding villages, from which they collected money in return for sparing standing crops. In beginning of 1758 it was again in possession of English. In October 1759 it had again fallen into hands of French. Finally recovered in December after Coote's reduction of Wandiwash and Carangooly. The old fort, now dismantled, was built by a rajah, Oottara comauran, son of a North india ruler; and restored by Rajendra cholan. Principal antiquities are temple of Soondra varadarajahsawmy, temple of Veicoonta permaul and historical inscription [shausanam] of Chola [q.v.] dynasty [raj], inscriptions of Chola dynasty on walls of temple of Kedaureshwaran, and on temple of Keilausa nautan. The architecture of the Shiva [q.v.] temple [coil] is curious and imposing. Roman catholics are numerous in the neighbourhood.——*Ootsarpiny* (उत्सर्पिणी - utsarpiní, San.). Age of increase, according to Jeinas [avasarpiny, caulam, jeina].——*Ootsavam* (उत्सव - utsava, San.). From (above + su, san. to produce); that which produces joy. Festival [pundigay, 6d]. Is a Sheivite term and corresponds to Veishnavite tirnaul [q.v.]. The principal festival in temple is called Brambotsavam [q.v.], or Mahotsavam. Every year the return of spring [vasantam] is celebrated in temples by a festival called Vasanta ootsavam which is held in the month of Chittray [mausam], i.e., between 12th April and 12th May [maryauday].——*Oottamam* (उत्तम - uttama, San.). From (above + tama, san. superlative suffix). Perfection, excellence, virtue.——*Oottamapolliem* (உத்தமப்பாளையம் - uttamappálaiyam, Tam.). From (uttama, san. best, epithet of a páudiyan + pálaiyam, tam. fortified village). Village, Deputy tahsildarry, pay Rs. 70. Head-quarters of the Deputy tahsildar and Sub-registrar; Madura dist., Periyacoolam tal.; pop. 7,475; acres 4,624; lat. 9° 49′; long. 77° 23′; from Madura W. 54 miles; from Periyacoolam S.S.W. 25 miles. Former head-quarters of a polliem [q.v.]. Large stone statue represents a servant of a king of Madura. Old Shiva temple with copper [taumram] plate shausanam [q.v.]. Inscription dated A.D. 1493.——*Oottarajyay* (उत्तरज्या - uttarajyá, San.). From (above + jyá, san. sine). The versed sine [jyah] of an arc [chaupam, jyotisham].——*Oottaram* (उत्तर - uttara, San.). From (above + tara, san. comparative suffix). Posterior, later. The poems denominated thus are secondary or apocryphal. Thus Oottara ramayanam is founded on history of Rama [q.v.], and Oottara harichendra oopaukhyaunam relates that hero's adventures in a formerb irth. These are grounded on a Sanscrit poem, as Ovid's tales are founded on Greek legends. Oottara mimaumsam is another name for Vedauntam [q.v.]. Oottaram is also the north, from that direction having been at back of aryans [q.v.] after entering india. For the lunar mansion of this name see Nacshatram. Also means a written statement or answer given back. Pungoony ottaram or Oottara phalgoony is a Luni-solar [chaundramaunam] festival [pundigay, 5c] on the day when the moon [chundran] falls in the asterism [nacshatram] Phalgoony, in the twelfth solar month of Pungoony [mausam], i.e., between 12th March and 11th April, and a feast is kept in honor of the marriage of Shiva [q.v.], Vishnoo [q.v.] and other gods. Season for private weddings [maryauday]. See vol. I (92).——*Oottarauyanam* (उत्तरायण - uttaráyana, San.). From (above + ayana, san. going). The sun's course northwards; also southern solstice [ayanam, jyotisham].——*Oottarauyana poonyacaulam* (உத்தராயணபுண்ணியக்காலம் - uttaráyanappunniyakkálam, Tam.). Means northward motion of sun + auspicious time. Otherwise Macara sancraunty [q.v.]. Same as Pongal. Cf. Dacshinaunyana poonyacaulam.——*Oottaunaicaudashy* (ఉత్థానైకాదశి - utt'hánaikádashi, Tel.). From (utt'hána, san. rising + ékádashi, san. eleventh). Otherwise Bodhana yecaudashy or waking eleventh day. Lunar [chaundramaunam] festival [pundigay, 3e], subject to intercalation [adhicam]. The eleventh tity [q.v.] of the waxing moon [shooclapacsham] of the eighth lunar month Caurteecam [mausam] between 28th October and 26th November, the anniversary of that on which Vishnoo [q.v.] awoke from his slumber of four months. A day for contemplation [maryauday].

OOT (ا - ت - ut, *Ar.*). Al before in Arabic compounds; as Abd oot tauhir, slave of the pure [al].

OOTACAMUND * (ஒத்தகைமந்து - ottagaimandu, *Tam.*). From (ottai, canarese, dwarf bamboo + káy, tam. fruit + mandu, tam. todah village). Sanscrit name by corruption (udakamandala), meaning water + region.—"*a*" Deputy tahsildarry, Neilgherry district. Pay Rs. 100.—"*b*" Town, Municipality, Sanitarium, Collector's head-quarters, Deputy tahsildar's station, Seat of subordinate civil court; Neilgherry dist., Todanaud div.; pop. 15,053; acres 14,842; lat. 11° 25′; long. 76° 44′; height 7,228 feet; from Coimbatore N.N.W. 34 miles; from Coonoor N.W. 8 miles; from Devaulah E.S.E. 21 miles; from Kotagherry W. 12 miles; from Madras W.S.W. 266 miles; from Pundalore E.S.E. 25 miles. Includes a tract of country lying within a circle three miles in radius. For description see vol. II, 116. The following are the travelling distances by road from Ootacamund to different places:—

—"c" Lake; Neilgherry district, Todanaud division. Formed by a dam thrown across the openings between two hills. At the upper or south end it is constantly fed by a small stream, which escapes by an overflow under a bridge at its lower or northern extremity, but the great bulk of the water is derived from the heavy rains during the S.W. monsoon [q.v.]. Divided into two portions by a bund [q.v.], under the centre of which is a bridge. Its form is sinuous, the bends being caused by projecting spurs of the hills on either side. A road follows the windings of its banks. Nearly one and-a-half miles in length. In some parts of considerable breadth and depth. The temperature of the water is almost invariably higher than that of the air.

OOTANCARAY (ஊத்தங்கரை - úttangarai, *Tam.* uttankarai*). From (úttu, tam. spring + karai, tam. bank) [oor] from a spring near the town.——**(1)** Talook, Salem district. Tahsildar's pay Rs. 150. Area 910 square miles. Population 138,113. Language Tamul. East of district. Between N. lat. 11° 47′ and 12° 25′ and E. long. 78° 15′ and 78° 47′. Extreme length from north to south is about 36 and from east to west 34 miles, the average being about 24 and 30 miles respectively. Bounded north by Tripatore talook; west by Krishnagherry and Dharmapoory talooks; south by Salem and Ahtoor talooks; and east by Cullacoorchy and Trinomallee talooks in South arcot district. Lies in a basin surrounded on the south east, and partially on the west by hill ranges, and on the north merges in the Tripatore valley. The uncultivated portions are more or less covered with scrub, which, in the southern and eastern portions becomes denser; while in the south-west, where the railway traverses Cadatore mittah, a large area of black soil lies waste. The principal basin [nadee] of the talook is the valley of the Ponniaur, which is recruited from north and south by the Paumbaur and Vauniyaur. Though apparently hill-girt the talook has free communication by the ghauts [q.v.] at Chengamam, Cottaputty, Moocanore, Mullapooram, Munjavaudy, while on the north and north-west the way is open to Tripatore and Krishnagherry. The railway runs through the centre of the talook. The gneissic system prevails, traversed by numerous trap-dykes. Magnetic iron [auhan] beds of unusual richness exist at Teertamullay. There is but little granite [caroom cull]. Tillage, weaving [nesavoo], grain and hide [chamrah] trades, the collection of bark for dyeing [shauyam] and tanning [chamrah], and trade in other jungle produce, from the chief industries of the talook. An indigo [q.v.], factory at Pullyputty is in ruins. The trade with South arcot and Pondicherry through the Singaurapett pass used to be considerable; but since the construction of the coast railway, it has decreased. Chief products are raggy [q.v.], cumboo [bajrah], varagoo [q.v.], horse-gram [q.v.], gingelly [q.v.], tovray [dholl], oolandoo [blackgram], tinay [q.v.], and shaumay [q.v.], toovalauriyam [raggy], motchay [country bean], &c., in dry lands; and paddy [q.v.] of various kinds, tobacco [pogauk], chillies [q.v.], betel [q.v.], cocoanut [q.v.], arecanut [q.v.], plantains [q.v.], groundnut [q.v.], &c., in wet lands and gardens. An interesting fact is the successful cultivation of coffee [q.v.], in the plains, near Bheiranuttam. The numerous palmyras [q.v.] which grow in the Government waste lands supply building materials. The cattle [maud] are inferior. The best are generally to be found in or about Cadatore mittah. The chief article of export is Auvauramputtay [tungaid], which, with raw hides [chamrah], is sent to Vaniyambaudy. Tamarind [q.v.] goes to Pondicherry in exchange for salt [ooppoo], and is also exported to Vaniyambaudy and through the Cottapputty valley to Salem and Ahtoor. Horse-gram [q.v.], dholl [q.v.], gingelly [q.v.], and castor-oil seeds [aumanac], and, in small quantities, ghee [q.v.] are exported to Bangalore, Tripatore, Coimbatore and Salem. Salt [ooppoo] is also imported from Madras. The Jalacanteshwaram aur, Meenaur, Paumbaur, Ponniaur, Varattaur, Vauniyaur, and many other streams are almost wholly unutilized, or flow away to enrich fields in South arcot. The Ponniaur, the only river of the first rank, the Jalacanteshwaram nuddy, Paumbaur, and Vauniyaur are perennial, though their supply is scanty in the dry season. On the Ponniaur, during the freshes, ferries ply at Hanoomateertam and Irmattore. The principal tanks are those of Aulapooram, Haroor, Moottootaungal, Naicknairy, Teertagirivalsay, and Vencatasamoodram. There is an agreeable camping ground at Periya munjavaudy. The camping grounds at Haroor and Ootancaray are deficient in shade. Those at Shingaurapett and other places are indifferent. Zemindarries:—Anandore, Cadatore, Cammeynullore, Taulanuttam, Tirvanaputty, Vaunyaputty. Places of archæological interest:—Adhicauraputty, Agrahauram, Ajjamputty, Anandore, Andiyore, Atchalavaudy, Aulambaudy, Bheiranuttam, Bodipauray forest, Bommady, Bommamputty, Cadatore, Cammeynullore, Caragambutty, Chettipolliem, Chintalpaudy, Comauraputty, Conambutty, Congavaimb, Coodoomiyamputty, Cottauraputty, Cullauvy, Govindapooram, Gowndaputty, Hanoomateertam, Haroor, Irmattore, Jangalvaudy, Keelchengambaudy, Keelpauray, Keeraiputty, Keezhanore, Krishnapody, Mahavanoreputty, Mattiyamputty, Mauramputty, Mettooputty, Molayanore, Mondacooly, Mookanoreputty, Mookareddiputty, Moppiriputty, Mottancoorchy, Mullapooram, Nadooputt, Pauppaputty, Payyamputty, Periyadalavoypaudy, Periyaputty, Polliem, Ponnairy, Poongany, Poyyaputty, Puttooconaumbutty, Samalputty, Shekkamputty, Shellaputty, Shengapaudy, Shoolacaray, Taulanuttam, Taumarcoliyamputty, Taumbal, Tauthamputty, Teertamullay, Tencaraycottah, Vauthaputty, Vedacuttamadoogoo, Vencataupooram, Veppamputty, Veppanuttam, Wodasalputty, Woddaputty, Yeechambaudy, Yeedalputty, Yehoor, Yelavaday, Yettiputty. The leading places, &c., in the talook are the following.——*Anandore* (ஆனந்தூர் - ánandúr, Tam.). From (ánanda, san. shiva, the joyful + úr, tam. village). Zemindarry, Village; pop. 1,029; sq. miles $6\frac{7}{16}$; lat. of village 12° 16′; long. 78° 25′; from Ootancaray W. 11 miles; from Salem N.N.E. 44 miles. Ruined Shiva temple in the village. Considerable trade. Peshcush Rs. 1,526.——*Beiranaickenputty* (பைரநாயக்கம்பட்டி - pairanáyakkambatti, Tam.). From (bhairanáyaka, can. name of a person + patti, tam. cattle-fold). Village; pop. 1,250; acres 6,834; lat. 12° 02′; long. 78° 41′; from Ootancaray S.S.E. 17 miles; from Salem N.E. 42 miles.——*Bodipauramullay* (போடிப்பாறைமலை - pódippáraimalai, Tam.). From (bódi, tel. bare + párai, tam. rock + malai, tam. mountain). Hill; lat. 12° 03′; long. 78° 39′; from Ootancaray S.S.E. 17 miles; from Salem N.E. 40 miles. Several dolmens [codaycull] in the jungle.——*Bommady* (பொம்மடி - pommadi, Tam.). From (bomma, tel. proper name). Zemindarry, Village; pop. 1,418; lat. of village 11° 59′; long. 78° 19; from Ootancaray S.W. 26 miles; from Salem N. 24 miles. Ten dolmens [codaycull]. Now an amauny [q.v.] village. Weekly fair on Thursdays.——*Booddireddiputty* (புட்டிரெட்டிப்பட்டி - puttirettippatti, Tel.). From (buddireddi, tel. name of a person + patti, tam. cattle-fold). Village, Railway station; pop. 845; lat. 12° 03′; long. 78° 21′; height 1,432 feet; from Ootancaray S.W. 22 miles; from Salem N.N.E. 28 miles.——*Cadatore* (கடத்தூர் - kadattúr, Tam. kadatúr*). From (kadaru, tam. a jungle + úr, tam. village). Zemindarry, Village; pop. 1,279; acres 59,820; lat. of village 12° 05′; long. 78° 20′; from Ootancaray S.W. 20 miles; from Salem N. 30 miles. West is a ruined Shiva temple, said to have been built by Cholas [q.v.]; with which are three inscriptions [shausanam], and near it a Vishnoo temple. Peshcush Rs. 4,295.——*Cammeynullore* (கம்மெநல்லூர் - kammenallúr, Tam. kambainellúr*). From (kammai, tam. a plant, amarantus campestris, willd. + nal, tam. good + úr, tam. village). Zemindarry [q.v.], Village; pop. 1,194; lat. of village 12° 13′; long. 78° 22′; from Ootancaray W.S.W. 15 miles; from Salem N.N.E. 39 miles. Healthy and connected by road with Morapore. The residence of Baulajee row. Ruined fort. Ancient Shiva temples with inscriptions. Peshcush Rs. 8,575.——*Caurapaudy mullay* (காரைப்பாடிமலை - káraippádimalai, Tam.). From (kárai, tam. plant, thorny webera, canthium parviflorum, lamk. + pádi, tam. village + malai, tam. mountain). Mountain; lat. 11° 59′; long. 78° 38′; from Ootancaray S.S.E. 20 miles; from Salem N.E. 36 miles.——*Cheppauny mullay* (செப்பாணிமலை - sheppánimalai, Tam.). From (cheppuvádu, tel. chuckler + malai, tam. mountain). Mountain; lat. 12° 02′; long. 78° 39′; from Ootancaray S.S.E. 14 miles; from Salem N.E. 41 miles.——*Chintalpaudy* (சிந்தலப்பாடி - shindalappádi, Tam.). From (chinta, tel. tamarind, tamarindus indica, linn. + pádi, tam. village). Village; pop. 141; lat. 12° 05′; long. 78° 24′; from Ootancaray S.W. 18 miles; from Salem N.N.E. 32 miles. Has a weekly market on Tuesdays and a large tank.——*Chittairimullay* (சித்தேரிமலை - shittérimalai, Tam.). From (shiru, tam. small + éri, tam. tank + malai, tam. mountain). Hill; lat. 11° 53′; long. 78° 33′; from Ootancaray S. 26 miles; from Salem N.E. 28 miles. There are a few habitations on the hill.——*Coonnatore* (குன்னத்தூர் - kunnattúr, Tam.). From (kunru, tam. hill + úr, tam. village). Village; pop. 1,035; acres 1,586; lat. 12° 21′; long. 78° 33′; from Ootancaray N.N.W. 6 miles; from Salem N. 53 miles. Three miles north-east from Samalputty railway station, with which it is connected by a road, as also with the road from Tripatore to Ootancaray,

Formerly a cusbah [q.v.].——*Cottapputty* (கோட்டப்பட்டி - kóttappatti, Tam.). From (kóttam, tam. cattle-pen + patti, tam. village). Village, Pass; pop. 924; acres 261; lat. 11° 59′; long. 78° 43′; from Ootancaray S.S.E. 22 miles; from Salem N.E. 41 miles. The ghaut [q.v.] passes to Vaulapaudy viâ Bailore and thence east and west to Ahtoor and Salem.——*Cullauvy* (கல்லாவி - kallávi, Tam.). From (kal, tam. stone + ávi, tam. tank). Village, Railway station; pop. 1,081; lat. 12° 15′; long. 78° 29′; height 1,321 feet; from Ootancaray W. 6 miles; from Salem N.N.E. 45 miles. Ruined fort.——*Hanoomateertam* (ಹನುಮತ್ತೀರ್ಥ - hanumattírt'ha, Can.). See sep. title.——*Haroor* (ಹರೂರು - harúru, Can.). See sep. title.——*Irmattore* (இரமத்தூர் - iramattúr, Tam.). From (iravu, tam. descent + maddi, tel. tree, terminalia tomentosa, bedd., var. typica + úr, tam. village). Village; pop. 732; lat. 12° 16′; long. 78° 21′; from Ootancaray W. 16 miles; from Salem N.N.E. 43 miles. On bank of Ponniaur.——*Iroolaputty* (இருளப்பட்டி - irulappatti, Tam.). From (irulan, tam. member of a tribe of foresters, so called + patti, tam. cattle-pen). Village; pop. 578; acres 1,517; lat. 11° 56′; long. 78° 27′; from Ootancaray S.S.W. 23 miles; from Salem N.E. 26 miles. Yearly festival in August.——*Jendamode* (செண்டாமேடு - shendámédu, Tam.). See sep. title.——*Maukkal* (மாக்கல் - mákkal, Tam.). From (má, tam. blackness + kal, tam. stone); slate stone. Mountain; lat. 11° 58′; long. 78° 41′; from Ootancaray S.S.E. 22 miles; from Salem N.E. 37 miles.——*Menisy* (ಮೆಣಸಿ - menisi, Can.). From (menasu, can. black pepper, piper nigrum, linn.). Village, Peak; pop. 1,629; acres 3,817; lat. 11° 58′; long. 78° 24′; from Ootancaray S.S.W. 23 miles; from Salem N.N.E. 26 miles.——*Morapore* (மொரப்பூர் - morappúr,* Tam.). From (morapa, tel. gravel + úr, tam. village). Village, Railway station; pop. 374; acres 407; lat. 12° 08′; long. 78° 26′; height 1,307 feet; from Ootancaray S.W. 14 miles; from Salem N.N.E. 36 miles.——*Mullapooram* (மல்லாப்புரம் - malláppuram, Tam. mallápuram *). From (malla, san. a wrestler + pura, san. town). Village, Railway station; pop. uninhabited; acres 868; lat. 11° 59′; long. 78° 17′; height 1,389 feet; from Ootancaray S.W. 27 miles; from Salem N.N.E. 23 miles. Old Shiva temple [coil] with inscriptions [shausanam].——*Mullay cull* (மலைக்கல் - malaikkal, Tam.). Means mountain rock. Mountain; lat. 11° 59′; long. 78° 42′; from Ootancaray S.S.E. 22 miles; from Salem N.E. 40 miles.——*Ootancaray* (ஊத்தங்கரை - úttangarai, Tam.). See below.——*Paumbaur* (பாம்பாறு - pámbáru, Tam.). See sep. title.——*Paupy reddy putty* (பாப்பிரெட்டிப்பட்டி - páppirettippatti, Tam.). From (pápireddi, tel. proper name + patti, tam. cattle-fold). Village; pop. 2,175; acres 1,510; lat. 11° 55′; long. 78° 25′; from Ootancaray S.S.W. 27 miles; from Salem N.E. 22 miles. At foot of Shevaroy hills.——*Pedaur* (பேடார் - pedár, Tam.). From (bidáru, tel. halting place). Village; pop. 124; acres 788; lat. 12° 17′; long. 78° 28′; from Ootancaray W. 7 miles; from Salem N.N.E. 45 miles. Near is a temple to Chendroyasawmy. Annual festival in March. A place of pilgrimage.——*Ponniaur* (பெண்ணையாறு - pennaiyáru, Tam.). See sep. title.——*Pulliputty* (பள்ளிப்பட்டி - pallippatti, Tam.). From (palli, tam. member of the caste + patti, tam. cattle-fold). Village; pop. 577; acres 2,222; lat. 11° 56′; long. 78° 27′; from Ootancaray S.S.W. 24 miles; from Salem N.E. 25 miles. Weekly market on Thursdays. Has a camping ground, and an Orr's chuttram [q.v.].——*Samalputty* (சாமல்பட்டி - shámalbatti, Tam. sámalpati*). From (tsámalu, tel. grain, panicum miliaceum, linn. + patti, tam. cattle-fold). Village, Railway station; pop. 240; acres 921; lat. 12° 19′; long. 78° 32′; height 1,265 feet; from Ootancaray N.W. 5 miles; from Salem N.N.E. 50 miles. Near the 157th mile from Madras is a rock with the figures of a lingam [q.v.], two bulls, and two men; and an inscription.——*Shingaurapett* (சிங்காரப்பேட்டை-shingárappéttai, Tam.). From (shringára, san. beauty + péttai, tam. suburb). Tam. also (shingárakkóttai), meaning beauty + fort. Village; acres 196; lat. 12° 15′; long. 78° 40′; from Ootancaray E.S E. 6 miles; from Salem N.E. 51 miles. Lies under the lee of the Jawaudy hills near the frontier of the talook where the road to Cuddalore enters Chengam pass [ghaut].——*Tarsal mullay* (தறசல்மலை - tarasalmalai, Tam.). From (darusu, tel. boundary + malai, tam. mountain). Mountain; lat. 11° 58′; long. 78° 40′; from Ootancaray S.S.E. 22 miles; from Salem E.N.E. 36 miles.——*Taulanuttam* (தாளநத்தம் - tálanattam, Tam.). From (tála, san. palmyra tree, borassus flabelliformis, linn. + nattam, tam. village). Zemindarry, Village; pop. 660; lat. of village 12° 03′; long. 78° 22′; from Ootancaray S.W. 21 miles; from Salem N.N.E. 28 miles. North-west is a ruined temple said to have been built by Cholas [q.v.]. Peshcush Rs. 755.——*Teertamullay* (தீர்த்தமலை - tírttamalai, Tam.). From (tírt'ha, san. sacred water + malai, tam. mountain); from the sacred springs it contains. Village, Mountain, Place of pilgrimage, Hill; pop. 570; acres 496; lat. 12° 06′; long. 78° 38′; from Ootancaray S.S.E. 12¾ miles; from Salem N.E. 42 miles. Old Shiva temple on a steep and lofty hill with inscriptions and copper-plate grant. Annual festival in February or March. Forms northern extremity of Tennaunday mullay pass [ghaut]. The Valasamullay and Teertamullay were, at the time of the cession of this district, the seats of forts built and held by two poligars [q.v.] of Dharmapoory.——*Tencaraycottah* (தென்கரைக்கோட்டை - tengaraikkóttai, Tam.). From (ten, tam. south + karai, tam. boundary + kóta, san. fort). Village; pop. 504; acres 3,871; lat. 12° 01′; long 78° 26′; from Ootancaray S.S.W. 20 miles; from Salem N.N.E. 29 miles. Now deserted but once the cusbah [q.v.] of the talook [q.v.]. A mud fort, commanding one of the entrances to the Baramahaul [q.v.], gave it some importance in Mysore wars. In 1768, it changed hands two or three times. The fort is dismantled and the tank in disrepair. The fort contains a ruined Shiva [q.v.] temple and a Rama [q.v.] temple. Tradition attributes building of temple to Chennappa naick, Poligar [q.v.] of Salem. The tank [q.v.] and anicut [q.v.] over Jalacanteshwaram river are attributed to his brother.——*Tennaunday mullay* (தென்னாண்டைமலை - tennándaimalai, Tam.). See sep. title.——*Tirvanaputty* (திருவணம்பட்டி - tiruvanambatti, Tam.). From (tiru, tam. holy + vana, san. forest + patti, tam. cattlefold). Mittah; pop. 815; acres 1,865; lat. 12° 15′; long. 78° 25′; from Ootancaray W. 11 miles; from Salem N.N.E. 43 miles. Peshcush Rs. 777.——*Valasamullay* (வலசைமலை - valasaimalai, Tam.). From (valasa, tel. migration + malai, tam. mountain). Hill; lat. 12° 01′; long. 78° 45′; from Ootancaray S.S.E. 22 miles; from Salem E.N.E. 43 miles. On the borders of Ootancaray.——*Vauniyaur* (வாணியாறு - vániyáru, Tam.). From (váni, san. the goddess of speech + áru, tam. river). River. Has its rise in the northern slopes of the Shevaroy hills, and flowing in a northerly direction joins the Ponniaur river.——*Vellay cull* (வெள்ளைக்கல் - vellaikkal, Tam.). Means white stone, referring to quartz [ven cull]. Mountain; lat. 12° 01′; long. 78° 40′; from Ootancaray S.S.E. 18 miles; from Salem N.E. 40 miles.——*Vencatasamoodram* (வெங்கடசமுத்திரம் - vengadasamuttiram, Tam.). From (vénkata, san. vishnu + samudra, san. ocean). Village; acres 1,058; lat. 11° 56′; long. 78° 23′; from Ootancaray S.S.W. 26 miles; from Salem N.N.E. 22 miles. Between the Munjavaudy road and the northern slopes of the Shevaroys.——*Yeralvauny* (ஏரல்வாணி - éralváni, Tam.). From (éral, tam. bivalve shell + váni, tam. water). Hill; lat. 11° 58′; long. 78° 45′; from Ootancaray S.S.E. 23 miles; from Salem E.N.E. 43 miles.——**(2)** Town, Talook head-quarters, Salem dist., Ootancaray tal.; pop. 1,380; acres 293; lat. 12° 16′; long. 78° 35′; from Madras W.S.W. 129 miles; from Namcull N.N.E. 76 miles; from Oossoor E.S.E. 57 miles; from Salem N.N.E. 49 miles; from Tripatore S.S.W. 16 miles; from Yercaud N.N.E. 40 miles. Inhabitants are chiefly Chetties [q.v.] and deal in grains. An Orr's chuttram north of the town is fitted up as a public bungalow [q.v.]. The Arbuthnott tope [q.v.] contains 40 acres. The town is intersected by two roads, one of which leads from Salem to Tripatore and the other from the Samalputty railway station, which is only 5 miles off, viâ Ootancaray, Shingaurapett, and the Chengam pass to Mercaunum in South arcot. From the latter road, about 3 miles west of Ootancaray, branches off another road which, near Poothore, taps the Cullauvy and Anandore markets, and joins the trunk road from Madras near Irmattore.

OOTAURID (عطارد - utárid, *Ar.*). The planet [graham, najm] Mercury [boodhan]. Called also the Celestial moonshee [q.v.]. Its orbit [cacsham] is in the second heaven [asmaun], and is considered to be a propitious star [nacshatram], for those born under its reign will be men of wisdom and learning and of admirable memory. So part of lacab; as Ootaurid jung, propitious in war [ism].

OOTHOO (ஊது - úthu, *Tam.*). To swell.——*Odallam* (होंड्यारूकु - hóndyárúku, Conc.; بنتن باسر - bintanbásar, Malay; ಮೊಂಡೇಮರ - mondémara, Can.; ತೆಂಡೇಮರ - tendémara, Too.; ഉതലം - utalam, Mal.; ගොංකදුරු - gonkaduru, Singh.; காட்டரளி - kástarali, Tam.). Title from malayalam. Can. from (mondu, can. lopped + mara, can. tree). Singh. from (gon, singh. oxen + kaduru, singh. poisonous tree); from property. Mal. from (útu, mal. to swell); bladder, hence round fruit floating in water. Tam. from (kádu, tam. forest + arali, tam. nerium); from appearance of leaf and flower. Can. also (chendémara); (hondémara). Mal. also (ponna), meaning rising up, from the round fruits. Tam. also (káttumá), meaning forest + mangifera indica, linn.; from fruit like mango [chironjee, wild mango]; (uthalai). Title otherwise Jungle mango, Oothalay, Wild nerium. Botanically Cerbera odollam, gærtn., apocynaceæ [vricsham, 87]. Specific from malayalam. Alias Cerbera lactaria, manghas, quaternifolia; Manghas lactescens; Tanghinia lactaria, laurifolia, manghas, odollam. Manghas on account of mango-like fruits. Bushy tree, 20 feet, native of salt swamps [ooppalar]; leaves alternate, lanceolate, approximate, shining; calyx five-cleft, segments revolute; corymbs terminal; segments of corolla sub-falcate; stigma large and conical, two-cleft at the apex, resting on a saucer-shaped receptacle, the circumference fluted with ten grooves; large cymes of pure white with yellowish throat, fragrant, flowers; flowering nearly all the year; the ripe carpel is ovoid, 2–4 inches long, somewhat resembling a green mango [q.v.], fibrous and woody within, and contains a single broad, compressed, white seed, consisting of two irregularly attached oily cotyledons. The fleshy drupe is medicinally inert, the nut is narcotic and even poisonous, and the bark is

purgative; milky sap and leaves, emetic and purgative; in pharm. non-officinal. Natives in travancore employ the fruit to kill dogs [nye]. Oil [yennay] is extracted from the seed, burnt in lamps; fibre [naur] from bark. Wood grey, very soft, spongy; annual rings marked by a sharp line; only occasionally used for firewood. There is a Malayalam saying :—സുഖദുഃഖങ്ങൾ വെള്ളത്തിൽ ഇട്ട ഉദ്ദള്ളക്കായ്പോലെ—"pleasure and pain are "like odallam fruits dropped in water," i.e., ever turning and never vanishing. No other common species here. Distinguish from Odul.——*Oothalay* (உதலே - uthalai, Tam.). From (úthu, tam. swell). Same as Odallam.

OOTRAJ (اترج - utraj, *Ar.*). Same as Citron.

OOTTA (ఉత్త - utta, *Tel.*). False.——*Oottrainy* (ఉత్తరేను - uttarénu, Tel.). Means false jujube. Same as Indian burr.

OOVA (உவ - uva, *Tam.*). To expand, delight.——*Oovah* (ఉవ్వ - uvva, Tel.; உவா - uvá, Tam.). From (ava, tam. to please). Means pleasing tree. Same as Chaltah.——*Oovar* (உவர் - uvar, Tam.). From (uva, tam. to expand); natural salt being an efflorescence. Saltish [ooppoo]. Oovarneer is one of the seven oceans; the brackish ocean [samoodram].

OOYIR (உயிர் - uyir, *Tam.*). From (uy, tam. to subsist). Life [jeevam]. A vowel. There are 12 vowels in Tamul, of which அ, இ, உ, எ, ஒ are the five short vowels, and ஆ, ஈ, ஊ, ஏ, ஐ, ஓ, ஔ are the seven long vowels. See vol. II, 205.——*Ooyirmey* (உயிர்மெய் - uyirmey, Tam.). Combined vowel-consonant sign. There are 216 in Tamul.——*Ooyirtoondilcauran* (உயிர்த்தூண்டிற்காரன் - uyirttúndirkkáran, Tam.). From (above + túndil, tam. fish-rod + káran, tam. suffix denoting doer). He who fishes life. A minor deity in the temple of Ancaulamman [q.v.], whose business is to bring to the latter the souls of those who die by their own hands [yaman].

OOZ (اَز - اُز - از - ال - az, *Ar.*). Al before z in Arabic compounds; as Ahl ooz zikr, meaning men of prayers [al].

OPIUM (افیم - afím, *Hind.*). See Aphainam.

OR (ஒரு - oru, *Tam.*). One [yecam].——*Orila* (पृश्निपर्णि - prishniparni, San.; ഓരില - órila, Mal.). Title from malayalam. San. means spotted leaf. Mal. means single leaf. San. also (atiguha), meaning great mystery; (nágabalá), meaning serpent + sida. Title otherwise Sweet-smelling hare-foot. Botanically Uraria lagopoides, dec., leguminosæ [vricsham, 48]. Alias Doodia lagopoides; Hedysarum alopecuroides, lagopoides. Suffruticose, procumbent, rooting at the joints; stems pubescent; leaves simple and ternate, terminal leaf-let much the larger, roundish-ovate, mucronate, sprinkled with scabrous pubescence; racemes dense, very hairy; pedicels incurved at the apex and with the calyx densely bearded; upper lip of calyx short, segments ovate-acuminated, lower reflexed, the segments elongated and subulate-setaceous; legume two-jointed; joints orbicular-ovate, polished; flowers rose colored; flowering nearly all year. Veidyans [q.v.] consider it alterative, tonic and anticatarrhal; given to pregnant women with milk to prevent abortion; an ingredient in dashamoolam [q.v.]. Tendrils used for dyeing [shauyam]. Another species is picta.——*Orsaul* (ஒருசால் - orusál, Tam.). From (above + shál, tam. furrow). Once ploughed.

ORANGE (कमलाफल - kamaláp'hala, *San.*; نارنج - náranj, *Ar.*; نارنگ - nárang, *Pers.*; కిచ్చిలి - kiççili, *Tel.*; നാരകം - nárakam, *Mal.*; நாரத்தை - nárattai, *Tam.*). Title from (náranj, ar.); 'a norange' being corrupted into 'an orange.' San. from (kamala, san. lovely + p'hala, san. fruit). Mal. from (nága, san. red lead + ranga, san. color). Tam. from (náru, tam. to smell). San. also (náranga), meaning not displeasing; (nágaranga), meaning red oxide of lead + color. Tel. also (dabba); (kittali). Tam. also (kozhuñji), meaning plumpness [sweet orange, zanzibar indigo]; (tambaikkáy), from teloogoo. Botanically Citrus [jambeeram] aurantium, linn., rutaceæ [vricsham, 32]. Tree, 20–25 feet; spines axillary, solitary; young shoots glabrous; leaves oval, elongated, acute, sometimes slightly toothed; petioles more or less dilated and winged; flowers white, large; fruit orange-colored, roundish or ovoid, usually depressed, rarely terminated by a small knob; rind with convex vesicles of oil; pulp sweet. The above is the typical plant, found in india and china; several varieties are wild in forests, particularly on mountains. For the citrus decumana see Pummelow; for the citrus japonica see Cumquot; for the different citrus medicas see Lime.——(1) *Orange grass* (نارنگی کے باس کا گھاس - nárangíkebáskághás, Dec.). Title from smell. Same as Indian grass.——*Orange root* (కిచ్చిలిగడ్డ - kiççiligadda, Tel.). Same as Europe zedoary and Long zedoary.——*Orange valley* (ನಾರಂಗಹಳ್ಳ - nárangahalla, Can.). From (náranga, san. orange + halla, can. valley); wild oranges [q.v.] and limes [lemon] abound. Valley; Neilgherry district. Todanaud and Paranginaud divisions; height 4,500 feet; from Ootacamund N.E. 14 miles. Starts from N.E. angle of Dodabetta, and skirting Kotagherry tableland, breaks through edge of plateau, and descends to low country exactly opposite Guzzelhutty pass [ghaut]. It is a deep indentation, and being shut in by lofty hills, the temperature is very high. Owing to this feature and richness of soil, vegetation is tropical.——(2) *Bergamot orange* (जम्बीर - jambíra, San.; निंबू - nimbú, Mahr.; निंबुवो - nimbuvó, Conc.; لیمو - límú, Ar., Pers. and Hind.; نیمبو - nímbú, Dec.; ನಿಂಬೆ - nimbe, Can.; ಲಿಂಬೆಮರ - limbemara, Too.; నిమ్మ - nimma, Tel.; ചെറുനാരകം - cherunárakam, Mal.; දෙහි - dehi, Singh.; எலுமிச்சை - elumiççai, Tam.). Title from turkish; the name bergamotta was originally applied to a large kind of pear [amrood], called in turkish prince's pear; the name has no reference to the town of bergamo. San. from (jam, san. to eat). Mahr. from (nimbúka, san. the plant). Can. from (nimbe, can. lime). Mal. from (cheru, mal. small + nárakam, mal. lime, citrus). San. also (jambha), meaning attractive; (nimbúka), from arabic. Ar. also (límúihámiz), meaning sour lime. Pers. also (límúitursh), meaning sour lime; (burtukálánah), meaning portugal orange. Can. also (limbe). Tel. also (gajanimma), meaning elephant + lime. Mal. also (jónakanárakam), meaning mahomedan lime. Tam. also (ambu); (shambíram); (shadábalam), meaning always + fruit. Title otherwise Lemon bergamot, Lime tree, Mahomedan's lime Giving Bergamot lime, Bergamot oil, Oleum bergamii, Oleum bergamottæ of chemists. Botanically Citrus [jambeeram] aurantium, linn., var. bergamia, brandis, rutaceæ [vricsham, 32]. Alias Citrus bergamia. Small tree; leaves oblong, acute or obtuse, under side somewhat pale; petiole more or less winged; flowers small, white; fruit pale-yellow, pear-shaped or depressed; closely resembling in flowers and foliage the bitter orange [q.v.]; taste of fruit acidulous with pleasant aroma. Used as condiment [chutney]; possesses all virtues attributed to lemon [q.v.]; an essence much used by perfumers is prepared from flowers and fruit——*Bile orange* (پتماری - pitmárí, Hind.). Same as Shrub orange.——*Bitter orange* (नागरङ्ग - nágaranga, San.; نارنج - náranj, Ar.; نارنگ - nárang, Pers.; نارنگی - nárangí, Hind.; جاروك پوش - járukpos, Malay; కిచ్చిలి - kiççili, Tel.; கடாரை - kadárai, Tam.). Title from taste of all parts. San. from (nága, san. red lead + ranga, san. color). Tam. from (kadu, tam. pungency + ár, tam. sharpness). Tel. also (kittali). Tam. also (kadáranárttai). Title otherwise Bigarade orange, Box-leaved orange, Seville orange. Botanically Citrus [jambeeram] aurantium, linn., var. bigaradia, brand., rutaceæ [vricsham, 32]. Alias Citrus aurantium, var. amara, bigaradia, vulgaris. Shrub or small tree; leaves oblong, more or less elongated, acute or obtuse, under side somewhat pale; petioles more or less winged or margined; flowers usually small, white; fruit pale yellow, pyriform or depressed; rind with vesicles of fragrant oil. The leaves differ from those of the sweet orange [q.v.] by the petiole only; the flowers are alike in both species; the rind of the fruit is bitter, acrid, and hot to the taste, the pulp acid and bitter, the seeds excessively bitter. Hardly known here; but this was the first cultivated in europe.——*China orange* (چینی نارنگی - chínínárangí, Dec.). Same as Musk lime and Sweet orange.——*Shrub orange* (तिपानी - tipání, Mahr.; भुयिनारिंगी - bhuyináringí, Conc.; پتماری - pitmárí, Hind.; ನೆಲನಾರಂಗ - nelanáranga, Can.; ನೆಲಕಂಚಿ - nelakanchi, Too.; നിലനാരകം - nilanárakam, Mal.). Title from lowly habit and resemblance. Mahr. means three-leaved; from trifoliate leaves. Conc. from (bhúmi, san. earth + náranga, san. orange, citrus aurantium, linn.). Hind. from (pit, hind bile + márí, hind. killer); from use of leaves against biliousness. Can. from (nela, can. earth + náranga, can. orange). Too. from (nela, too. ground + kanchi, too. orange). Mal. from (nila, mal. ground + nárakam, mal. orange). Mahr. also (pittavéla), meaning bile + creeper; (pittamárí), meaning heat killer. Can. also (nelakanchi), meaning earth + orange; (nalakanugida). Title otherwise Bile orange. Botanically Naregamia alata, w. & a., meliaceæ [vricsham, 36]. Generic name from (nárakam, mal. citrus aurantium, linn.). Alias Turrea alata. Small shrub, glabrous; calyx small, cup-shaped, five-cleft; petals five, very long, strap-shaped, distinct, free; filaments united into a long slender tube that is inflated and globular at the apex, the mouth with ten very slight antherbearing crenatures; leaves trifoliolate; leaflets cuneate-obovate, quite entire, sessile; petiole margined; flowers on long axillary solitary peduncles, white; capsule slightly membranaceous, three-cornered, three-valved; seeds two; flowering in april and may. Root and leaves used in rheumatism; juice mixed with cocoanut [q.v.] oil used in psora.——*Sweet orange* (नागरङ्ग - nágaranga, San.; नारिंगी - náringí, Mahr.; सोन्नारिंग - sónnáringa, Conc.; شجر نارنج - shajarináranj, Ar.; درخت نارنگ - darakhtinárang, Pers.; نارنگی کا پیر - nárangíkáper, Hind.; نارنگی کا جہاڑ - nárangíkájhár, Dec.; جاروك منيس - járúkmanis, Malay; ಕಿತ್ತಲೆಮರ - kittalemara, Can.; ಕಿತ್ಲಿ - kitli, Too.; కిచ్చిలి - kiççili, Tel.; മധുരനാരകം - madhuranárakam, Mal.; දොඩම - dodama, Singh.; கொழுஞ்சி - kozhuñji, Tam.). Title from taste of fruit. San. from (nága, san. red lead + ranga, san. color). Mahr. from sanscrit. Conc. means gold orange. Ar. from (shajar, ar. tree + náranj, ar. orange, citrus aurantium, linn.). Pers. from arabic. Hind. from (nárangí, hind. orange + per, hind. tree). Dec. from hindostany. Malay from (járuk, malay, citron + manis, malay, sweet). Mal.

from (madhura, san. sweet + nárakam, mal. lime, citrus). Tam. from (kozhumai, tam. plumpness) [orange, zanzibar indigo]. San. also (svádunáranga), meaning sweet orange; (náranga), by corruption. Hind. also (nímbú), meaning lime; (sangtrá); (kaunlánímbú), meaning thin-skinned orange. Malay also (járukjápun), meaning japan orange. Tel. also (nárinja); (gajanimma), meaning elephant + lime, citrus medica, linn. var. acida, brandis; (dabba); (kittali); (nárijamu). Mal. also (kolañchinárakam). Singh. also (náranga). Tam. also (kiççili), from teloogoo. Title otherwise China orange, Common country orange, Portugal orange. Botanically Citrus [jambeeram] aurantium linn., var. aurantium proper, brandis, rutaceæ [vricsham, 32]. Alias Aurantium acre, orientale; Citrus bigaradia, nobilis. Tree, 20-25 feet; flowers white, large; differs little in appearance from the lime [q.v.] tree, citrus medica, linn.; fruit globose, cortex thin, pulp sweet; tree attains great age, upwards of 600 years; superior kinds come from sumatra and ceylon; originally introduced into europe from india by portuguese. The juice is used in lieu of british lemon-juice and citric acid; gives to pharm. dried outer portion of the rind of the fruit, auranti cortex, stomachic and tonic, for british lemon peel. For eating, the native orange has a poor flavor; sherbet [q.v.], made with juice of ripe fruit, a favorite beverage in hot whether, safer than lime juice; the flowers distilled produce orange water, used in cooking, medicine, and as a perfume, ingredient in oil of neroli. Wood yellowish-white, like box moderately hard, close and even-grained; but not available of any size; good for engraving. The following sub-varieties are cultivated:—Cownlanimboo, meaning large loose skinned orange; the hill orange of northern circars [q.v.]; sometimes called mandarin orange; Burrachin, or large china, fine smooth-skinned, cloved, large, very sweet, resembling china-orange, citrus sinensis; Hyderabaudy, smaller than last, but like it, cloved and smooth-skinned, very sweet; Chotachin, small china, small cloved orange; makes marmalade; Coffrie, large, skin very rough; a sweet, well-flavored fruit; Common orange of the country, austere and coarse.

ORIENTAL (شرقی - sharkí, *Hind.*). From (sharaka, ar. to shine as when the sun rises). Prefix.——*Oriental liquidamber* (اسطرك شرقی - ustarakisharkí, Hind.). Same as Indian storax. ——*Oriental nettle* (گزنۂ شرقی - gaznahisharkí, Hind.). Same as Indian nettle.——*Oriental sesamum* (سمسم شرقی - simsimisharkí, Hind.). Same as Gingelly.

ORISSA (ओड्र - ódhra, *San.*). Province of Bengal forming the northern boundary of Ganjam [odhram, ootacalam].——*Orissa flower* (ओड्रपुष्प - ódhrapushpa, San.). Same as China rose bendy.

OSARY (ஓசரி - ósari, *Tam.*). Misfortune.——*Osoorammah* (ஓசுராம்மா - ósúrammá, Tam.). From (ósari, tam. misfortune + ammá, tam. mother). One of the village ammans [q.v.]

OSHADHY (ओषधि - óshadhi, *San.*). From (avasa, san. food + dhá, san. to hold). Herb [vricsham].——*Oshadhipaty* (ओषधिपति - óshadhipati, San.). From (above + pati, san. master). The moon [chundran].

OSHTAM (ओष्ठ - ósht'ha, *San.*). From (ava, san. down + st'ha, san. stand). Lip.——*Oshtacarnaca* (ओष्ठकर्णक - ósht'hakarnaka, San.). From (above + karna, san. ear). Having lips extending to their ears. A term of derision applied by early aryans to aborigines of India [kirautan, mlecha, nishaudan].

OSMAN (عثمان - usmán, *Ar.*). Means literally a young serpent or dragon. The name of the third caliph [q.v.] and prophet's companion and son-in-law, who, in consequence of his having married two of the daughters of the prophet, was called Zin noorain, master of two lights. Common alam; as Osman khan, alam + alaumat [ism]. Osmauny was a copper coin of Tippoo's equivalent to double peisa [q.v.].

OSPITRY (آسپتری - áspatrí, *Hind.*; ಆಸ್ಪತ್ರಿ - áspatri, *Can.*; ఆస్పత్రి - áspatri, *Tel.*; ആസ്പത്രി - áspatri, *Mal.*; ஆசுபத்திரி - ásubattiri, *Tam.*). Title is a native term in use in all the languages for hospital, corrupted from the english.——**(1)** The following are two key-lists in the briefest possible terms of the products of the vegetable kingdom utilised in the prescribed indian pharmacopœia, for which vernacular equivalents are with certainty known; further information must be traced in the glossary paragraphs through the small type cross-references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of the plants in the dravidian languages.—"*a*" Abrus precatorius, indian liquorice, root; Acacia arabica, babool, bark, gum; Acacia catechu, catechu, cutch; Acacia farnesiana, cassie oil plant, bark, gum; Acacia ferruginea, anasandra, bark; Acacia leucophlæa, white babool, bark; Acalypha indica, cooppamainy, juice; Achyranthes aspera, indian burr, all parts; Aconitum ferox, indian aconite, root; Aconitum heterophyllum, atees, root; Aconitum napellus, european aconite, root, leaf; Acorus calamus, sweet flag, root; Adansonia digitata, baobab, pulp, bark; Adhatoda vasica, malabar nut, whole plant, inspissated juice of leaves and root; Ægle marmelos, bael, fruit; Agave americana, american aloe, root; Ailanthus excelsa, coromandel ailanto, bark; Ailanthus malabarica, malabar ailanto, bark, gum resin; Albizzia amara, dark sirissa, bark; Albizzia lebbek, common sirissa, gum; Aleurites triloba, lumbang nut, oil; Alhagi maurorum, arabian manna, saccharine exudation from stem; Aloe indica, common indian aloe, aloes, fresh juice; Aloe socotrina, bombay aloe, aloes; Aloe vulgaris, barbadoes aloe, aloes; Alpinia galanga, greater galangal, root, seed; Alpinia nutans, nodding galangal, rhizome; Alpinia officinarum, lesser galangal, root; Alstonia scholaris, dita, bark; Altingia excelsa, java storax, balsamic fluid; Anacardium occidentale, cashew, gum, oil from shell, oil from nut, spirit from fruit; Anacyclus pyrethrum, pellitory, root; Anamirta cocculus, indian berry, berry; Andrographis paniculata, french chiretta, dried stalk, root; Andropogon muricatus, cuscus, root; Andropogon nardus, citronella, oil; Andropogon schœnanthus, lemon grass, oil; Anisochilus carnosus, country lavender, juice; Anisomeles malabarica, malabar catmint, leaf; Anthemis nobilis, chamomile, flowers; Antiaris saccidora, sack tree, bark, seed; Arachis hypogæa, ground-nut, oil; Areca catechu, areca, nut, cutch; Argemone mexicana, mexican poppy, oil; Argyreia speciosa, broad-leaved bind-weed, leaf; Aristolochia bracteata, indian worm-killer, juice; Aristolochia indica, isharmool, root, leaf; Artemisia vulgaris, indian absinth, dried plant; Astragalus verus, tragacanth, gummy exudation from stem; Atropa belladonna, belladonna, leaf, root; Baliospermum montanum, wild croton, seed; Balsamodendron mukul, mookul bdellium, resin; Balsamodendron myrrha, myrrh, resin; Bambusa arundinacea, common bamboo, tabasheer, splints; Bassia butyracea, butter mohwah, oil; Bassia latifolia, wild mohwah, oil, spirit from flower; Bassia longifolia, common mohwah, oil, spirit from flower; Berberis aristata, berberry, root bark; Bœrhaavia repens, var. diffusa, spreading hog-weed, root; Bombax malabaricum, red-cotton tree, mocharas gum; Borassus flabelliformis, palmyra, toddy, downy substance from base of frond; Brassica alba, white mustard, seed; Brassica juncea, indian mustard, seed; Brassica nigra, black mustard, seed; Butea frondosa, bengal kino, kino, seed; Cæsalpinia bonducella, bonduc, seeds; Cæsalpinia coriaria, divy-divy, legume; Cæsalpinia sappan, sappan, wood; Calophyllum inophyllum, common poon, oil; Calotropis gigantea, mudar, root-bark; Canarium commune, elemi, resin; Canarium strictum, black dammer, resin; Cannabis sativa, indian hemp, whole plant; Capsicum minimum, bird's eye chilly, fruit; Carapa moluccensis, crab oil plant, bark; Carica papaya, papaw, juice; Carum carui, caraway, fruit; Carum copticum, ajwaun, seed; Carum roxburghianum, ajmood ajwaun, fruit; Caryota urens, bastard sago palm, toddy; Cassia absus, black horse gram, seeds; Cassia acutifolia, nubian senna, leaf; Cassia alata, ringworm shrub, leaf; Cassia angustifolia, tinnevelly senna, leaf; Cassia auriculata, tungaid, seed, bark; Cassia fistula, indian laburnum pulp; Cassia obovata, aleppo senna, leaf; Cassia occidentalis, stinking-weed, leaf; Cassia sophera, stinking casondy, leaf; Cassia tora, chakondah, leaf; Casuarina equisetifolia, whip tree, bark; Cedrela toona, toon, bark; Cedrus deodara, deodar, oil; Celastrus paniculatus, malkangany, seed, oil; Cerbera odollam, odallam, bark, milky sap, leaf; Chrysanthemum coronarium, indian chamomile, flower, root; Cicer arietinum, bengal gram, acid juice; Cinchona calisaya, calisaya bark; Cinchona officinalis, crown bark; Cinchona succirubra, red bark; Cinnamomum camphora, camphor cinnamon, camphor; Cinnamomum iners, country cinnamon, inner bark; Cinnamomum tamala, cassia cinnamon, buds, bark; Cinnamomum zeylanicum, ceylon cinnamon, bark; Cissampelos pareira, indian pareira, root, bark; Citrullus colocynthis colocynth, pulp; Citrus aurantium, var. aurantium, proper, sweet orange, rind; Citrus aurantium, var. bergamia, bergamot orange, fruit; Citrus aurantium, var. bigaradia, bitter orange, rind; Citrus medica, var. limonum, lemon, rind, oil of rind, juice; Clerodendron infortunatum, saraswaty's leaf, leaf, juice; Clerodendron serratum, knotted bhraungy, root; Clitoria ternatea, crow creeper, seed, root bark; Cocculus palmatus, calumba, root; Cocculus villosus, jamtee, stem; Cochlospermum gossypium, golden silk cotton, gum; Cocos nucifera, cocoanut, oil, toddy, downy substance from base of fronds; Colchicum autumnale, wild colchichum, fresh corm, seed; Coleus aromaticus, country borage, juice; Colocasia antiquorum, indian kale, juice; Convolvulus scammonia, scammony, root, gum resin; Coptis teeta, mishmee bitter, root; Corallocarpus epigæa, snake caper, root; Cordia myxa, small sebesten, fruit, bark; Cordia obliqua, large sebesten, fruit, bark; Cordia rothii, narrow-leaved sebesten, bark; Coriandrum sativum, coriander, fruit; Coscinium fenestratum, false calumba, stem; Cratæva religiosa, garlic pear, leaf; Crinum asiaticum var. toxicarium, root; Crocus sativus, saffron, stigmas; Croton oblongifolius, devil's goad, oil; Croton tiglium, purging croton, seed; Cucumis sativus, common cucumber, juice, seed, pulp; Cucumis trigonus, country cucumber, seed, pulp; Cucurbita maxima, great pumpkin, seed; Cucurbita pepo, common pumpkin, seed; Cuminum cyminum, cummin, seed; Curculigo orchioides, weevil root, root; Curcuma amada, mango-ginger, root; Curcuma angustifolia, malabar arrowroot, starch; Curcuma aromatica, round zedoary, root; Curcuma longa, turmeric, root; Curcuma zedoaria, long zedoary, root; Cydonia vulgaris, quince, seed; Cyperus pertennis, straight sedge, root; Cyperus rotundus, common sedge, root; Dæmia extensa, hedge cotton, leaf; Datura fastuosa, purple datura, leaf, seed; Datura fastuosa, var. alba,

white datura, leaf, seed; Datura stramonium, europe datura, leaf, seed; Diospyros embryopteris, gaub, fruit; Diospyros melanoxylon, coromandel ebony, bark; Dipterocarpus turbinatus, gurjan, balsam; Dorema ammoniacum, gum ammoniac; Dracontium polyphyllum, wild telnga potato, root; Dregea volubilis, nakchiknee silk cotton, leaf; Echium sp., gajwaun, leaf, stem, flower; Eclipta alba, bhangrah, root; Ehretia buxifolia, rough coorvitchy, root; Elettaria cardamomum, cardamom, capsule; Enicostema littorale, small chiretta, whole plant; Erythræa roxburghii, roxburgh's chiretta, whole plant; Eugenia caryophyllata, clove tree, flower bud; Eugenia jambolana, common jaumoon, bark; Eupatorium ayapana, agrimony hemp, leaf; Euphorbia antiquorum, square milk-hedge, juice; Euphorbia nereifolia, leafy milk-hedge, root; Euphorbia tirucalli, round milk-hedge, juice; Exacum bicolor, country gentian, whole plant; Exacum pedunculatum, whole plant; Exacum tetragonum, whole plart; Exogonium purga, jalap, dried root; Feronia elephantum, wood-apple, gum; Ferula galbaniflua, galbanum, gum-resin; Ferula narthex, asafœtida, gum; Ficus bengalensis, banyan, juice; Ficus carica, european fig tree, fruit; Ficus oppositifolia, devil fig, fruit, seed, bark; Flacourtia cataphracta, indian plum, leaf and tender shoots; Fœniculum vulgare, indian fennel, fruit; Fraxinus ornus, sicilian manna, saccharine exudation; Garcinia indica, mate mangosteen, oil from seed; Garcinia mangostana, mangosteen, fruit; Garcinia morella, ceylon gamboge, gum-resin; Garcinia morella var. pedicellata, siam gamboge, gum-resin; Gardenia gummifera, decamallee, resin; Gardenia lucida, decamallee, gum-resin; Gisekia pharnaceoides, sand greens, whole plant; Glycirrhiza glabra, liquorice, root; Gmelina asiatica, small cashmere tree, leaf; Gossypium arboreum, tree cotton, cotton-wool; Gossypium barbadense, peruvian cotton, cotton-wool; Gossypium herbaceum, indian cotton, wool; Gracilaria lichenoides, ceylon moss, whole plant; Gymnema sylvestre, small indian ipecacuanha, leaf; Gynandropsis pentaphylla, dog mustard, leaf; Gynocardia odorata, chaulmoogra, seed; Hedychium spicatum, european zedoary, root; Heliotropium indicum, indian heliotrope, leaf; Hemidesmus indicus, indian sarsaparilla, root; Herpestis monniera, water hyssop, juice of leaf; Hibiscus esculentus, common bendy, capsule; Hibiscus rosa-sinensis, china-rose bendy, juice of flowers; Holarrhena antidysenterica, tellicherry bark, seed, bark; Hordeum vulgare, barley; Hydnocarpus venenata, fish-poison tree, oil from seed; Hydrocotyle asiatica, indian pennywort, leaf; Hygrophila spinosa, neermoolly, leaf, root; Hyoscyamus niger, henbane, leaf; Illicium anisatum, star anise, seed; Ipomæa cymosa, frog creeper; Ipomæa hederacea, kaladanah, seed; Ipomæa sepiaria, laldanah, seed; Ipomæa turpethum, indian jalap, root; Jasminum sambac, arabian jasmine, flower; Jatropha curcas, physic nut, oil from seed; Jatropha glandulifera, adul oil, oil from seed; Jatropha multifida, small french physic nut, oil from seed; Juniperus communis, juniper, berry; Justicia gendarussa, common gendarussa, leaf; Kœmpferia galanga, indian galangal, root; Kœmpferia rotunda, false zedoary, root; Lathyrus sativus, vetch, seed; Lawsonia alba, henna plant, leaf; Leucas aspera, rough toombay, dried plant; Linum usitatissimum, flax, seed; Liquidambar orientale, indian storax, prepared storax; Lobelia nicotianæfolia, wild tobacco, seed; Luffa acutangula, var. amara, bitter luffa, whole plant; Mallotus philippensis, kamela, kamela powder; Mangifera indica, mango, kernel; Melaleuca leucodendron, cajeput, oil; Melia azadirachta, margosa, bark, leaf; Melia azedarach, large neem, root-bark; Mentha piperita, peppermint, oil from fresh plant; Mentha viridis, spearmint, oil from fresh plant; Meriandra bengalensis, bengal sage, leaf; Mesua ferrea, nauga champak, flower, bark, root; Methonica superba, wild bachnaug, root; Michelia champaca, champak, bark; Mimusops elengi, ilanjy, bark; Mirabilis jalapa, false jalap, root; Moringa pterygosperma, indian horse-radish, root; Mucuna pruriens, common cowitch, hair of pod; Murraya kœnigii, curry-leaf tree, bark, root, leaf; Musa paradisiaca, plantain, leaf; Myrica sapida, box myrtle, bark; Myristica fragrans, common nutmeg, nut; Myristica malabarica, malabar nutmeg, oil; Nardostachys jatamansi, indian spikenard, root; Nerium odorum, oleander, flower; Nicotiana tabacum, tobacco, leaf; Nigella sativa, small fennel, seed; Ochrocarpus longifolius, soora poon, flower; Ocimum basilicum, sweet basil, leaf, seed; Ocimum gratissimum, shrubby basil, seed; Ocimum sanctum, holy basil, leaf; Odina wodier, wodier, bark, gum; Olea europæa, olive, oil; Ophiorrhiza mungos, mongoose snake-root, root; Oryza sativa, paddy, rice, rice flour; Papaver rhæas, red poppy, petals; Papaver somniferum, opium poppy, capsule, and opium; Pedalium murex, elephant nerinjy, fresh plant; Peganum harmala, syrian rue, seed; Peucedanum graveolens, dill, fruit; Phyllanthus emblica, emblic myrobalan, fruit; Phyllanthus niruri var. genuinus, neeroory, root, leaf, young shoot; Picrorhiza kurrooa, bitter root, root; Pimenta acris, pimento, dried unripe berry; Pimpinella anisum, anise seed, oil; Piper betel, betel pepper, leaf; Piper chaba, chaab pepper, fruit; Piper cubeba, cubeb pepper, dried berries; Piper longum, long pepper, root, fruit; Piper nigrum, black pepper, dried berries; Pistacia lentiscus, mastic, resin; Plantago ovata, spogel, seed; Plumbago rosea, officinal leadwort, root, root-bark; Plumbago zeylanica, ceylon leadwort, root-bark; Pogostemon patchouli, patchouli; Polygala senega, senegal nangay, dried root; Polygala telephioides, large nangay, root; Pongamia glabra, indian beech, seed; Prunus amygdalus, almond, nut; Prunus domestica, plum, dried drupe; Psidium guyava var. pomiferum, red guava, bark; Psidium guyava var. pyriferum, white guava, bark; Pterocarpus marsupium, malabar kino, inspissated juice obtained from incisions in the trunk; Pterocarpus santalinus, red sanders, wood; Punica granatum, pomegranate, root-bark; Quercus infectoria, dyer's oak, galls; Quercus robur, british oak, bark; Quisqualis indica, rangoon creeper, seed; Randia dumetorum, common emetic nut, fruit; Rauwolfia serpentina, snake root, root; Rheum emodi, indian rhubarb, root; Rheum moorcroftianum, indian rhubarb, root; Rheum webbianum, indian rhubarb, root; Rhinacanthus communis, snake jasmine, fresh root, seed; Rhus succedanea, red lac sumach, galls; Ricinus communis, castor oil, seed; Rosa centifolia, cabbage rose, petals, and volatile oil from petals; Rosa gallica, french rose, petals, dried petals, petals of unexpanded flowers; Rubia cordifolia, munjeet, root; Ruta graveolens, rue, whole plant, oil; Saccharum officinarum, sugarcane, sugar; Salicornia brachiata, glosswort, ashes; Salix caprea, hedge willow, flower; Salix tetrasperma, indian willow, bark; Salvadora oleoides, large tooth-brush tree, oil, root-bark; Salvadora persica, tooth-brush tree, leaf, bark, fruit; Santalum album, sandal-wood, wood-oil; Scindapsus officinalis, elephant long pepper, fruit; Semecarpus anacardium, marking nut, juice between laminæ of shell; Sesamum indicum, gingelly, oil, seed, leaf; Sesbania grandiflora, west-indian sesban, bark, leaf; Shorea robusta, common saul, resin; Sida carpinifolia, lance-leaved balah, root; Smilax glabra, large china root, root; Smilax lanceæfolia, indian china root, root; Smilax officinalis, sarsaparilla china root, root; Smilax ovalifolia, oval-leaved china root, root; Solanum ferox, hairy nightshade, leaf; Solanum indicum, indian night shade, root; Solanum nigrum, indian hound's berry, juice of leaf; Solanum trilobatum, prickly shoonday, root, leaf; Solanum verbascifolium, shoonday, leaf; Solanum xanthocarpum, prickly brinjaul, stem, flower and fruit; Soymida febrifuga, rohan tree, bark; Strychnos colubrina, snake-wood tree, wood; Strychnos nux-vomica, poison nut, seed; Strychnos potatorum, clearing nut, seed; Styrax benzoin, gum benjamin, resin; Suæda indica, indian saltwort, ashes; Suæda nudiflora, sea-side indian saltwort, ashes; Swertia affinis, blue-flowered chiretta, stem; Swertia angustifolia, stem; Swertia chirata, himalayan chiretta, dried stalk and root; Swertia decussata, mahableshwar chiretta, stem; Tamarindus indica, tamarind, pulp; Tamarix articulata, red tamarisk, galls, bark; Tamarix gallica, indian tamarisk, galls, manna; Tectona grandis, teak, flower; Terminalia belerica, belleric myrobalan, fruit; Terminalia catappa, country almond, kernel, oil; Terminalia chebula, chebulic myrobalan, fruit, gallnut, flower; Terminalia tomentosa var. typica, black murdah, bark; Thalictrum foliolosum, momiree, root; Thespesia populnea, portia, gamboge from fruit; Thevetia nereifolia, exile tree, bark; Tinospora cordifolia, goolancha, root; Toddalia aculeata, lōpez root, root; Tribulus terrestris, land caltrops, fruit, leaf, root; Trichodesma indicum, donkey toombay, leaf; Trichosanthes palmata, bitter snake gourd, rind; Triticum vulgare, wheat, flour, starch; Tylophora asthmatica, indian ipecacuanha, leaf; Typhonium orixense, elephant yam, root; Uncaria gambier, gambier, catechu; Urginia indica, squill, bulb; Vateria indica, piney, resin; Vernonia anthelmintica, wild cumin, seed; Viscum monoicum, misseltoe, leaf; Vitex negundo, notchy, root, leaf; Vitex trifolia, water notchy, leaf; Vitis vinifera, grape vine, raisins; Withania coagulans, country asgand, fruit; Withania somnifera, asgand, root; Zanthoxylum alatum, tejbul, fruit, seed, bark; Zingiber cassumunar, bengal root, rhizome; Zingiber officinale, ginger, rhizome; Zingiber zerumbet, false ginger, rhizome.—"*b*" Absinth, artemisia; Adul oil, jatropha; Ailanto, ailanthus; Ajwaun, carum; Almond, prunus, terminalia; Aloe, agave; Anasandra, acacia; Anise, illicium, pimpinella; Asafœtida, ferula; Asgand, withania; Atees, aconitum; Babool, acacia; Bachnaug, methonica; Bael, ægle; Balah, sida; Bamboo, bambusa; Banyan, ficus; Baobab, adansonia; Barley, hordeum; Basil, ocimum; Bdellium, balsamodendron; Beech, pongamia; Belladonna, atropa; Bendy, hibiscus; Bengal root, zingiber; Benjamin, styrax; Berberry, berberis; Betel, piper; Bhangrah, eclipta; Bhraungy, clerodendron; Bitter root, picrorhiza; Bonduc, cæsalpinia; Borage, coleus; Box myrtle, myrica; Brinjaul, solanum; Burr, achyranthes; Cajeput, melaleuca; Calisaya bark, cinchona; Caltrops, tribulus; Calumba, cocculus; Caraway, carum; Cardamom, elettaria; Cashew, anacardium; Cashmere tree, gmelina; Cassie oil, acacia; Castor, ricinus; Catechu, acacia; Catmint, amisomeles; Ceylon moss, gracilaria; Chakondah, cassia; Chamomile, anthemis, chrysanthemum; Champak, mesua, michelia; Chaulmoogra, gynocardia; Chilly, capsicum; China root, smilax; Chiretta, andrographis, enicostema, erythræa, swertia; Citronella, andropogon; Clearing nut, strychnos; Clove, eugenia; Cocoanut, cocos; Colocynth, citrullus; Cooppamainy, acalypha; Coorvitchy, ehretia; Coriander, coriandrum; Cotton, gossypium; Cowitch, mucuna; Crab oil, carapa; Croton, baliospermum; Crow creeper, clitorea; Crown bark, cinchona; Cubeb, piper; Cucumber, cucumis; Cumin, cuminum, vernonia; Curry leaf, murraya; Cuscus, andropogon; Dammer, canarium; Decamallee, gardenia; Deodar, cedrus; Devil's goad, croton; Dill, peucedanum; Dita, alstonia; Divy divy cæsalpinia; Ebony, diospyros; Elemi, canarium; Emetic nut, randia; Exile tree, thevetia; False calumba, coscinium; Fennel, fœniculum, nigella; Fig, ficus; Fish poison, hydnocarpus; Flax, linum; Frog creeper, ipomæa; Gajwaun, echium; Galangal, alpinia, kœmpferia; Gal-

banum, ferula; Gambier, uncaria; Gamboge, garcinia; Garlic pear, cratæva; Gaub, diospyros; Gendarussa, justicia; Gentian, exacum; Gingelly, sesamum; Ginger, zingiber; Glosswort, salicornia; Golden silk cotton, cochlospermum; Goolancha, tinospora; Gram, cassia, cicer; Groundnut, arachis; Guava, psidium; Gum ammoniac, dorema; Gurjan, dipterocarpus; Hart's ear, cacalia; Hedge cotton, dæmia; Hemp, cannabis, eupatorium; Henbane, hyoscyamus; Henna, lawsonia; Hog weed, bœrhaavia; Horse radish, moringa; Hound's berry, solanum; Hyssop, herpestes; Ilanjy, mimusops; Indian berry, anamirta; Indian plum, flacourtia; Ipecacuanha, gymnema, tylophora; Isharmool, aristolochia; Jalap, exogonium, ipomæa, mirabilis; Jamtee, cocculus; Jasmine, jasminum, rhinacanthus; Jaumoon, eugenia; Kaladanah, ipomæa; Kale, colocasia; Kamela, mallotus; Kino, butea, pterocarpus; Laburnum, cassia; Laldanah, ipomæa; Lavender, anisochilus; Leadwort, plumbago; Lemon, citrus; Lemon grass, andropogon; Liquorice, abrus, glycirrhiza; Lopez root, toddalia; Lumbang, aleurites; Malabar arrowroot, curcuma; Malabar nut, adhatoda; Malkangany, celastrus; Mango, mangifera; Mango ginger, curcuma; Mangosteen, garcinia; Manna, alhagi, fraxinus; Margosa, melia; Marking nut, semecarpus; Mastic, pistacia; Mexican poppy, argemone; Milk-hedge, euphorbia; Mishmee bitter, coptis; Misseltoe, viscum; Mohwah, bassia; Momiree, thalictrum; Mudar, calotropis; Munjeet, rubia; Murdah, terminalia; Mustard, brassica, gynandropsis; Myrobalan, phyllanthus, terminalia; Myrrh, balsamodendron; Nangay, polygala; Neem, melia; Neermoolly, hygrophila; Neeroory, phyllanthus; Nerinjy, pedalium; Night shade, solanum; Notchy, vitex; Nutmeg, myristica; Oak, quercus; Odallam, cerbera; Oleander, nerium; Olive, olea; Orange, citrus; Paddy, oryza; Palmyra, borassus; Papaw, carica; Pareira, cissampelos; Patchouli, pogostemon; Pellitory, anacyclus; Pennywort, hydrocotyle; Pepper, piper, scindapsus; Peppermint, mentha; Physic nut, jatropha; Piney, vateria; Plantain, musa; Plum, prunus; Poison nut, strychnos; Pomegranate, punica; Poon, calophyllum, ochrocarpus; Poppy, papaver; Portia, thespesia; Potato, dracontium; Pumpkin, cucurbita; Quince, cydonia; Rangoon creeper, quisqualis; Red bark, cinchona; Red cotton, bombax; Red sanders, pterocarpus; Rhubarb, rheum; Ringworm shrub, cassia; Rohan, soymida; Rose, rosa; Rue, peganum, ruta; Sack tree, antiaris; Saffron, crocus; Sage, meriandra; Sago palm, caryota; Saltwort, suæda; Sandal, santalum; Sand greens, gisekia; Sappan, cæsalpinia; Saraswaty's leaf, clerodendron; Sarsaparilla, hemidesmus; Saul, shorea; Scammony, convolvulus; Sebesten, cordia; Sedge, cyperus; Senna, cassia; Sesban, sesbania; Shoonday, solanum; Silk cotton, dregia; Sirissa, albizzia; Snake caper, corallocarpus; Snake gourd, trichosanthes; Snake root, ophiorrhiza, rauwolfia; Snake wood, strychnos; Spearmint, mentha; Spikenard, nardostachys; Spogel, plantago; Squill, urginia; Stinking weed, cassia; Storax, altingia, liquidambar; Sugar cane, saccharum; Sumach, rhus; Sweet flag, acorus; Tamarind, tamarindus; Tamarisk, tamarix; Teak, tectona; Tejbul, zanthoxylum; Tellicherry bark, holarrhena; Tobacco, lobelia, nicotiana; Toombay, leucas, trichodesma; Toon, cedrela; Tooth-brush tree, salvadora; Tragacanth, astragalus; Tungaid, cassia; Turmeric, curcuma; Vetch, lathyrus; Vine, vitis; Weevil root, curculigo; Wheat, triticum; Whip tree, casuarina; Willow, salix; Wodier, odina; Wood apple, feronia; Worm-killer, aristolochia; Yam, typhonium; Zedoary, curcuma, hedychium, kœmpferia.——(2) The following is a list of the principal products of the animal kingdom utilised in the indian pharmacopœia:—Acipenser huso, sturgeon, isinglass [meen vajram]. Apis mellifica, honey bee, honey [shahad], wax [mom]. Coccus cacti, cochineal [kirmiz]. Cybium commersonii, liver oil [seer]. Euphesetes macrocephalus, spermaceti [hoot]. Mylabris cichorii, telini fly [q.v.]. Sanguisuga, leech [attay]. Squalus carcharias, sharkliver oil [soorah]. Viverra zibetha, civet [custoory].——(3) The following is a list of the principal products of the mineral kingdom utilised in the indian pharmacopœia:—Acidum arseniosum, arsenic [paushaunam]. Acidum hydrochloricum [namak tezaub]. Acidum nitricum, nitric acid [shoreyka tezaub]. Acidum sulphuricum, sulphuric acid [gandhac tezaub]. Alumen, alum [fatakree, padicauram]. Ammonia [nowshaudar]. Ammonii chloridum, nowsaugar [nowshaudar]. Antimonium, antimony [soorma]. Antimonium sulphuratum [soorma]. Aqua, water [neer]. Argenti nitras, nitrate of silver [caudy cauram]. Argenti oxidum, oxide of silver [velly paspam]. Argentum, silver [velly]. Argentum purificatum, refined silver [chokka velly]. Arsenicum, arsenic [paushaunam]. Calx, quicklime [choonam]. Carbon, charcoal [kary]. Creta præparata, prepared chalk [sheemay choonam]. Cupri sulphas, mor toottam [mayil toottam]. Cuprum or copper [taumram]. Ferri oxidum magneticum [cauntam]. Ferri peroxidum hydratum [iroomboo tooroo]. Ferri sulphas [annabhaidy]. Ferrum [auhan]. Hydrargyri oxidum rubrum, red oxide of mercury [rasa sindooram]. Hydrargyri perchloridum, perchloride of mercury [shavveeram]. Hydrargyri subchloridum, subchloride of mercury [rascapoor]. Hydrargyri sulphas, sulphate of mercury [rasa paspam]. Hydrargyrum, mercury [rasam]. Magnesia [caunta munn]. Plumbi acetas, acetate of lead [eeya carcand]. Plumbi carbonas, carbonate of lead [eeyam, moottoovelly]. Plumbi nitras, nitrate of lead [vediyoopp eeyam]. Plumbi oxidum [moordarsing]. Plumbum, lead [eeyam]. Potassæ nitras, saltpetre [shorah]. Potassæ tartras, tartrate of potash [draucsha ooppoo]. Potassæ tartras acida, acid tartrate of potash [draucsha ooppoo]. Sodæ biboras, biborate of soda, borax [vengauram]. Sodæ carbonas, carbonate of soda [sujjee khaur]. Sodæ sulphas, glauber's salt [namak]. Sodii chloridum, common salt [ooppoo]. Sulphur [gandhac]. Sulphur sublimatum, sublimed sulphur. Zinci carbonas, carbonate of zinc [madal toottam]. Zinci sulphas, sulphate of zinc [vellay toottam]. Zincum, zinc [tootnaug].——(4) The following list shows the pharmacopœia terms for medicinal powers arranged alphabetically, with the sanscrit equivalents; compare Veidyan:—Alteratives, rasauyanam; Anthelmintics, krimignam; Antidotes to bites of snakes and other animals, vishagnam; Antiscorbutics, cooshtagnam; Antispasmodics, aucshepagnam; Astringents, stambhanam; Carminatives, vautagnam; Counter-irritants, praty copanam; Demulcents, shamacam; Diuretics, mootralam; Emetics, vamanam; Emmenagogues, ritoo janacam; Expectorants, chedanam; Febrifuges, jvaragnam; Gums, niryausam; Insecticides, keetagnam; Lactagogues, stanya jananam; Lactifuges, stanya shoshanam; Mydriatics, taurah vivauranam; Nutritives, vrimhanam; Oils, teilam; Parturifacients, prasava saudhanam; Purgatives, viraichanam; Refrigerants, nirvaupanam; Sedatives, shamanam; Silagogues, laulah srauvy; Stimulant applications in affections of the eye, netra roga deepanam; Stimulant applications in skin diseases, tvak roga deepanam; Stimulants, general, deepanam; Stimulant to ulcers, abscesses, &c., vrana vidradhy deepanam; Styptics, shonita staupanam; Sudorifics, svedanam; Terebinthinate stimulants, tilaparneeya deepanam; Tonics, astringent, toovara balyam; Tonics, bitter and aromatic, tikta soogandhy balyam; Vesicants, spotacapralepanam.

OTAHEITE (تہیتی - tahítí, *Hind.*). Otherwise Tahiti; the largest of the Society islands.——*Otaheite apple* (ولایتی امرا - viláitíamrá, Hind.; மரிமா - marimá, Tam.). Hind. from (viláítí, hind. foreign + amrá, hind. spondias mangifera, willd.). Tam. from (marul, tam. devil + má, tam. mango, mangifera indica, linn.). Title otherwise Hog plum, Vi tree. Botanically Spondias [amrautam] dulcis, willd., anacardiaceæ [vricsham, 45]. Tree of south sea islands; graceful foliage of alternate odd-pinnate leaves, small yellow flowers, producing an oval fruit; this has a large fibre-covered stone in the centre, the size and form of a large hen's egg, of a deep amber [karbah] color, blotched for the most part with rusty russet like the color of tarnished gold; fragrance resembles that of the quince [bedauna]; to taste, very acid, flavor like that of bad mango [q.v.]. No other species here.——*Otaheite cashew* (تہیتی کاکاجو - tahítíkákájú, Hind.). Same as Malacca jaumoon.——*Otaheite gooseberry* (تہیتی کی حرفالیوڑی - tahítíkíharfáleurí, Hind.). Same as Brazil cherry.——*Otaheite salep* (सूरण - súrana, San.; کندہ - kandah, Hind.; بڑا کندا - barákandá, Dec.; تکا - takka, Malay; పెద్దకంద - peddakanda, Tel.; ചേന - chéna, Mal.; காருக்கருணை - kárákkarunai, Tam.). San. from (súr, san. to hurt) [telinga potato]. Hind. means bulbous root. Dec. from (bará, hind. large + kandá, hind. bulbous root). Tel. from (pedda, tel. large + kanda, tel. amorphophallus campanulatus, blume). Tam. from (káru, tam. to taste bitter + á, tam. negative particle + karunai, tam. dracontium polyphyllum, linn.). Malay also (takkaliker). Tel. also (kanda) [elephant yam, telinga potato]; (chunda). Tam. also (periyagarunai), meaning big + dracontium polyphyllum, linn.; (káráççénai). Title otherwise Chaina, Elephant yam [telinga potato], Mergui arrowroot, Pi plant, Salep tacca, South sea arrowroot, Tacca starch, Tahiti arrowroot. Botanically Tacca pinnatifida, forsk., taccaceæ [vricsham, 147]. Generic name from malay. Root tuberous, perennial, very large, round and smoothish, with a few fibres issuing from the surface; leaves radical, three-parted, divisions two to three partite, and alternately pinnatifid, margins waved; petioles slightly grooved, 1 to 3 feet long; scapes radical, round, smooth, slightly grooved, and striped with darker and paler green; umbels consisting of ten to forty long-pedicelled, drooping, greenish flowers, intermixed with as many long drooping bracts; involucel six to twelve leaved; leaflets lanceolate, recurved, beautifully marked with pale-purple veins; calyx globose, fleshy, six-cleft, segments incurved, green, with purplish margins; corolla none. Root yields large quantity of white nutritious fecula, resembling arrowroot; root intensely bitter when raw; however much eaten by natives, specially in travancore. The Tahitians prepare from the floral scapes a white straw, with which they make hats. No other common species here.——*Otaheite walnut* (تہیتی اکروٹ - tahítíakrot, Hind.). Same as Lumbang nut.

OTCHAN (ഓച്ചൻ - óççan, *Mal.*; ஓச்சன் - óççan, *Tam.*). A class of Shoodras in Malabar. Employed amongst fishermen as priests and servants of temples [coil, pagoda] dedicated to village deities [jauty]. Beat drums [paray] like pariahs [q.v.]. See vol. I (68).——*Ochira* (ഓച്ചിറ - óççara, Mal.). From (óççan, mal. drum-beater + kara, mal. village). Village; Travancore state, Quilon division, Caroonaugapully tal.; from Cauyancollam S. 6 miles. At present noted for a mock fight exhibited on the occasion of the annual festival, in commemoration of battles fought on the spot between Cauyancollam and Champakacherry rajahs. Festival about the 15th June of each year lasting for two days when a cattle [maud] market is held.——*Osy* (ஓசி -

ósi, Tam.). Priestess at a Pidaury [q.v.] temple [coil, pagoda]. Pariah female proper name [peyar].

OTE (ഓട്ട - óttu, *Mal.*). Corr. of (akattu), from (akam, mal. inside). Suffix in place names as Cangote, Corote, Cotiote, Oorote, Tannote, Terriote.

OTTAGAM (उष्ट्र - ushtra, *San.*; ऊट - úta, *Mahr.*; جمل - jamal, *Ar.*; شتر - shutr, *Pers.*; اونٹ - únt, *Hind.*; اونتا - unta, *Malay*; ಒಂಟೆ - onte, *Can.* and *Too.*; ఒంటె - onte, *Tel.*; ଓଟ - ota, *Oor.*; ഒട്ടകം - ottakam, *Mal.*; ඔටුවා - otuvá, *Singh.*; ஒட்டகம் - ottagam, *Tam.*). San. from (ush, san. to burn); as bearing heat [ooshtram]. Rest from sanscrit. San. also (kraméla). Ar. also (hijíd); (bakhtí), meaning bactrian. Title otherwise Dromedary camel. Camelus dromedarius, camelidæ, ruminantia, mammalia [sastanam, 26], of naturalists [jantoo]. Camels are sometimes classed as Tylopoda. Their feet are composed of toes protected by cushion-like soles, and not by a horny covering like those of the Artiodactyli generally. Two species of camelidæ are known, Camelus dromedarius, the one-humped camel or domedary; and Camelus bactrianus, or the two-humped. They are now completely domesticated. The former spread from Arabia into North africa, India, &c.; the latter spread from Central asia. The Dromedary camel is used in southern india as a beast of burden, and is also kept by zemindars [q.v.] for display [ooshtram].

OTTAPIDAURAM (ஒட்டப்பிடாரம் - óttappidáram, *Tam.* otapidáram *). From (ódai, tam. tank + pidári, tam. the village goddess so called + agam, tam. place) [ode].——**(1)** Talook, Tinnevelly district. Tahsildar's pay Rs. 150. Area 1,061 square miles, including Yettiyaupooram zemindarry. Population 342,145. Languages, Tamul and Teloogoo. N.E. of district. Bounded E. by sea, W. by Tinnevelly and Shuncaraneinarcoil talooks, S. by Tinnevelly and Tencaray talooks, and N. by Ramnaud zemindarry and Shauttore talook. A few detached masses of gneiss rocks rising abruptly from the plains form conspicuous objects, but generally the country is level, rising and falling very slightly in long and broad slopes, which follow the drainage lines from north-west to south-east. The soil is almost wholly of a uniform character, the talook being a wide black cotton [regar] plain relieved by scanty and poor topes [q.v.] of tamarind [q.v.] here and there, and by thickets of babool [q.v.] in every tank bed. To the west and south however there is a considerable area of red sands and loams, amounting to nearly one-tenth of the area of the talook. There are extensive areas of rich black loamy soil producing fine crops of cotton [q.v.], cumboo [bajrah], cholum [q.v.] fodder and bengal-gram [q.v.], and also a large area of poor gravelly soil impregnated with soda [munn cauram]. Near the coast the white sea sands [manal] prevail, producing chiefly palmyras [q.v.] and babool [q.v.] thorns. The latter are valued for making agricultural implements, being extremely hard, and for firewood; also for their seeds, which are excellent food for sheep [aud]. Trade is chiefly in cotton, for which there are several steam cotton presses. The annual export is estimated at about 51,000 bales of 500 lbs. each and 33,000 bales of 400 lbs. each, nearly the whole being sent to Tuticorin. Coffee [q.v.] from the ghaut [q.v.] estates, salt [ooppoo], cotton-goods, and palmyra [q.v.] jaggery [q.v.] are other exports. Imports are chiefly english piece-goods and yarn, paddy [q.v.], rice [q.v.], metals [loham] and betelnuts [q.v.]. The only important manufactures are native cloths and palmyra jaggery. There are numerous irrigation tanks [q.v.], chiefly rainfed, and almost every village has an oorny [q.v.], for the storage of drinking water, collected during the north-east monsoon [q.v.] and subsequent showers for use during the hot weather. Wells frequently dry up or are very generally impregnated with salt. Well cultivation by means of bullocks is much followed in parts and good crops of tobacco [pogauk], cholum [q.v.], chillies [q.v.], vegetables, and betel [q.v.] leaf are obtained. The largest part of the talook [q.v.] is zemindarry [q.v.], Government lands being less than one-third of the whole. Besides Yettiyaupooram zemindarry, the talook contains the following estates:—Auttangaray, Cadambore, Caudalgoody, Caurayccorchy mittah, Coolatore, Mailmaunday, Maniyauchy, Mulleeswarapooram, Naugalaupooram, Peroorany mittah, Poothoor mittah, Ramasawmypooram, Soondraputchaiyaupooram, Tattanairy. Places of archæological interest:—Atchangoolam, Audanore, Carishalcoolam, Caumayyanaickenputty, Cayataur, Cazhoogoomullay, Coolatore, Coomarettiyaupooram, Culcoomy, Gownagherry, Mandicoolam, Meenautchipooram, Moodookkmindaunputty, Mooramban, Mungalam, Naugalaupooram, Naulvausancottah, Pashoovandanay, Punchaulamcoorchy, Tuticorin, Vaunarmootty, Veippaur, Vellaram, Vilanticoolam, Yelavalangaul, Yettiyaupooram, Yilamboonam. Principal trig. stations:—Coolayanullore, Meenautchy, Melaculloorny, Mottoorny, Shooplaupooram, Soorangoody. The leading places, &c., in the talook are the following.——*Auttangaray* (ஆத்தங்கரை - áttangarai, Tam.). From (áru, tam. river + karai, tam. bank). Zemindarry, Village; pop. 1,631; acres 9,227; lat. of village 9° 11′; long. 78° 10′; from Ottapidauram N. 20 miles; from Tinnevelly N.E. 43 miles; from the sea W. 16 miles. Peshcush Rs. 3,372.——*Cadambore* (கடம்பூர் - kadambúr, * Tam.). From (kadambu, tam. a tree, barringtonia racemosa, blume + úr, tam. village). Zemindarry, Village, Railway station; pop. 2,421; Cadambore village 17,282 acres; lat. of village 9° 00′; long. 77° 54′; height 292 feet; from Ottapidauram W.N.W. 12 miles; from Tinnevelly N.E. 22 miles; from the sea W. 27 miles. Weekly fair on Wednesdays. Peshcush Rs. 3,742.——*Caudalgoody* (காடற்குடி - kádargudi, Tam.). From (kádu, tam. forest + al, tam. without + kudi, tam. village). Zemindarry, Village; pop. 853; Zemindarry 24,473 acres; lat. of village 9° 12′; long. 78° 17′; from Ottapidauram N.E. 25 miles; from Tinnevelly N.E. 50 miles; from the sea W. 15 miles. Peshcush Rs. 880.——*Caumayyanaickenputty* (காமயநாயக்கன்பட்டி - kámayanáyakkanbatti, Tam.). From (kámayanáyakkan, tam. proper name + patti, tam. village). Village; pop. 1,269; lat. 9° 05′; long. 77° 59′; from Ottapidauram N. 12 miles; from Tinnevelly N.E. 29 miles; from the sea W. 29 miles. In Yettiyaupooram zemindarry. Mission established in 1660. Roman catholic church.——*Cayataur* (கைத்தார் - kaittár, Tam. kayatár *). From (kaittá, tam. wild croton, jatropha curcas, linn. + áru, tam. river). Village; pop. 3,233; acres 2,050; lat. 8° 57′; long. 77° 49′; from Ottapidauram W. 17 miles; from Tinnevelly N.E. 16 miles; from the sea W. 29 miles. On the Madura road. Deserted Vishnoo [q.v.] temple with four inscriptions. The copper [taumram] images [vigraham] of the temple were carried away to Yettiyaupooram and are now worshipped there. Ancient and well-sculptured Shiva [q.v.] temple. Ruined fort. Large market on Thursdays. Dawk [q.v.] bungalow [q.v.].——*Cazhoogoomullay* (கழுகுமலை - kazhugumalai, Tam.). See sep. title.——*Coolatore* (குளத்தூர் - kulattúr, Tam.). From (kulam, tam. tank + úr, tam. village). Zemindarry, Village; pop. 4,195; village 11,558 acres; lat. of village 9° 00′; long. 78° 14′; from Ottapidauram E.N.E. 13 miles; from Tinnevelly E.N.E. 39 miles; from the sea W. 4 miles. Jeina [q.v.] statue [gomataroya], worshipped by ordinary Sheivites. Market on Tuesdays. S.P.G. mission station. Peshcush Rs. 1,897.——*Coolayanullore* (குலயநல்லூர் - kulayanallúr, Tam.). From (kolaiñan, tam. a hunter who lives by killing + nal, tam. good + úr, tam. village). Trig. station; lat. 8° 55′ 33·71″; long. 78° 01′ 24·93″; height 346 feet; from Ottapidauram W.N.W. 3 miles; from the sea W. 14 miles.——*Cooroomullay* (குருமலை - kurumalai, Tam.). See sep. title.——*Crownchateev* (கிரௌஞ்சத்தீவு - kirauñjattívu, Tam.). See sep. title.——*Eeraul* (ஈரால் - írál, Tam.). From (ír, tam. two + ál, tam. banyan tree, ficus bengalensis, linn.). Village; pop. 3,355; lat. 9° 06′; long. 78° 03′; from Ottapidauram N. 13 miles; from Tinnevelly N.E. 34 miles; from the sea W. 25 miles.——*Mailmaunday* (மேல்மாந்தை - mélmándai, Tam.). From (mél, tam. west + mándai, tam. cattle stand). Zemindarry, Village; pop. 5,161; acres 20,032; lat. of village 9° 04′; long. 78° 20′; from Ottapidauram E.N.E. 21 miles; from Tinnevelly E.N.E. 47 miles; from the sea N. 4 miles. Weekly market on Mondays. Peshcush Rs. 1,412.——*Maniyauchy* (மணியாச்சி - maniyáççi, Tam.). See sep. title.——*Meenautchy* (மீனாச்சி - mínáççi, Tam.). From a person of that name. Trig. station; lat. 9° 12′ 34·00″; long. 78° 01′ 17·06″; height 322 feet; from Malaputty W.N.W. ½ mile; from Ottapidauram N. 20 miles; from the sea W. 29 miles. *Melaculloorny* (மேலக்கல்லூறணி - mélakkallúrani, Tam.). From (mél, tam. west + kal, tam. stone + úrani, tam. spring). Trig. station; lat. 9° 14′ 14·99″; long. 78° 12′ 55·76″; height 141 feet; from Ottapidauram N.N.E. 24 miles; from the sea N. 23 miles.——*Mottoorny* (மோட்டூறணி - móttúrani, Tam.). From (módu, tam. high ground + úrani, tam. spring). Trig. station; lat. 9° 17′ 25·76″; long. 78° 19′ 02·72″; height 133 feet; from Ottapidauram N.N.E 31 miles; from the sea N. 19 miles.——*Naugalaupooram* (நாகலாப்புரம் - nágaláppuram, Tam. nágalápuram *). From (nágal, tam. the nauval wood tree, eugenia jambolana, lamk., var. caryophyllifolia + pura, san. town). Zemindarry, Village; pop. 2,490; estate 15,812 acres; lat. of village 9° 14′; long. 78° 11′; from Ottapidauram N.E. 22 miles; from Tinnevelly N.E. 46 miles; from the sea N.W. 18 miles. Jeina statue [gomataroya] formerly here taken to Madras museum. Chief S.P.G. mission station. Peshcush Rs. 6,445.——*Ottapidauram* (ஒட்டப்பிடாரம் - óttappidáram, Tam.). See below.——*Poothoor* (புதூர் - puthúr, Tam. pudúr). From (puthu, tam. new + úr, tam. village). Zemindarry, Village; pop. 1,255; mittah 13,088 acres; lat. of village 9° 17′; long. 78° 11′; from Ottapidauram N.N.E. 27 miles; from Tinnevelly N.E. 49 miles; from the sea N.W. 22 miles. S.P.G. mission station. Peshcush Rs. 6,414.——*Punchaulamcoorchy* (பாஞ்சாலக்குறிச்சி - páñjálakkuriççi, Tam.). See sep. title.——*Shoolliteev* (சுள்ளித்தீவு - shullittívu, Tam.). See sep. title.——*Shooplaupooram* (சுப்பலாப்புரம் - shuppaláppuram, Tam.). From (subbulu, tel. proper name + pura, san. town). Sanscrit name (subrahmanyapura), meaning soobramanyan, the pious god + town. Trig. station; lat. 9° 04′ 20·93″; long. 78° 07′ 23·11″; height 149 feet; from Coomarettiyaupooram S.E. ½ mile; from Ottapidauram N.N.E. 11 miles; from the sea W. 18 miles.——*Soorangoody* (சுரங்குடி - shurangudi, Tam.). From (shuram, tam. desert + kudi, tam. village). Trig. station; lat. 9° 06′ 02·71″; long. 78° 21′ 59·22″; height 67 feet; from Ottapidauram E.N.E. 23 miles; from the sea N. 4 miles.——*Tattanairy* (தத்த

ஏனேரி - tattanéri, Tam.). From (tattan, tam. proper name + éri, tam. tank). Zemindarry, Village; pop. 2,644; lat. of village 9° 05′; long. 78° 18′; from Ottapidauram N.E. 20 miles; from Tinnevelly E.N.E. 46 miles; from the sea N. 6 miles. Peshcush Rs. 237.——*Tattapauray* (தட்டப்பாறை - tattappárai, Tam. tatapárai*). From (tattai, tam. flat + párai, tam. rock). Village; pop. 1,368; acres 3,838; lat. 8° 49′; long. 78° 03′; height 98 feet; from Ottapidauram S. 6 miles; from Tinnevelly E.N.E. 24 miles; from the sea W. 9 miles.——*Tuticorin* (தூத்துக்குடி - túttukkudi, Tam.). See sep. title. ——*Veippaur* (வைப்பாறு - vaippáru, Tam.). See sep. title.—*Vembaur* (வேம்பார் - vémbár, Tam.). From (vémbu, tam. margosa tree, melia azadirachta, linn. + pár, tam. bank). Village, Port; lat. 9° 5′ N.; long. 78° 24′ E; from Madras S.S.W. 302 miles; from Ottapidauram E.N.E. 25 miles; from Tinnevelly E.N.E. 52 miles; from Veippaur E.N.E. 8 miles. In Mailmaunday zemindarry. On Gulf of Manaar, at mouth of the Ooppaur creek and on boundary between Tinnevelly and Madura.——*Vilauticoolam* (விளாத்திக்குளம் - viláttikkulam, Tam.). See sep. title. ——*Yettiyaupooram* (எட்டையாபுரம் - ettaiyáppuram, Tam.). See sep. title.——(2) Town, Talook head-quarters, Tinnevelly dist., Ottapidauram tal.; pop. 3,631; acres 9,205; lat. 8° 55′; long. 78° 04′; from Madras S.S.W. 318 miles; from Palamcottah E.N.E. 24 miles; from Shermadevy E.N.E. 35 miles; from Shreevillipoottore S.E. 48 miles; from Tinnevelly E.N.E. 27 miles; from Tuticorin N.W. 12 miles; from the sea W. 11 miles. Weekly fair on Tuesdays.

OTTOO (ಒಟ್ಟು - ottu, *Can.*). Whole. Ottoogoottagay is the entire assessment or rent.

OTTY (ഒററി - otti, *Mal.*). From (ottuka, mal. to step aside). The stepping aside or making way for another. Veppoo in Palghaut talook, meaning deposit; Palishamadak in Nedoonganaud and Valavanaud talooks, meaning return of interest [palisha]. The tenure of land where a Malabar caunom, in the progressive scale of tenancies which is always regarded as an essential characteristic of land tenure there, commences to give the tenant a right of pre-emption, with other incidents strengthening his dominion, and making it still less like lease and still more like mortgage [panayam]. The tenure gives the tenant or mortgagee possession and the entire produce of the land, not merely possession with an interest as in Caunom [q.v.]. The landlord here retains nothing but the proprietary title, a nominal rent, and the power to redeem. Where no period has been stipulated, the landlord may redeem at any time. The twelve years' term does not appear to have been applied to the Otty tenure until some time after it was recognized as an ordinary incident of a caunom. The principal alone is repayable at redemption, the mortgagee recovering the interest of his money currently from the produce of the land. The mortgage that is to say is usufructuary, the usufruct extinguishing the interest. If the landlord be desirous of raising a further sum and the Otty mortgagee refuse to advance it, the money may be received from a third party and the mortgage transferred to him. But the original mortgagee has a right to be first consulted. In fact the same incidents are attached to an Otty tenure as to a Caunom, and in addition the mortgagee has the right of pre-emption if the mortagagor wishes to dispose of the property. Between an Otty deed and a final sale-deed or Neer attipair [q.v.] caranam, [q.v.], some one or more of three deeds may according to circumstances be interposed, termed respectively:—Keividotty, Otticoompooram, Coodimaneer. These are deeds [caranam] of sale with reservation of certain detailed seigniorial rights to original proprietor, a mode of disposing of land highly feudal and still practised in some parts of Europe. In all of them however the power of redemption is gone for the landlord, and in that respect pre-emption merely has been transferred from the mortgagee to him. For conspectus of Malabar tenures, see vol. II, 104. The following are the three intermediate transactions mentioned above. See vol. I, 128.——"*a*" *Keividotty* (കൈവിടോററി - kaivitotti, Mal.). From (kai, mal. hand + vitá, mal. without leaving + otti, mal. mortgage). The first stage between Otty and Neer attipair. The landlord demands a further loan and gives this deed in exchange. The landlord relinquishes the power of transferring the property to a third party, and binds himself to borrow any further sum he may require only from the mortgagee. The mortgagee is precluded from disposing of the land to a third party for more than he paid or on any other terms than those on which he acquired the occupation. Also if he wish to dispose of it, he is bound to give the proprietor the option of redeeming it. The deed is Caranamkeividotty.——"*b*" *Otticoompooram* (ഒററിക്കുമ്പുറം - ottikkumpuram, Mal.). From (above + puram, mal. beyond). The Caunom which is in addition to the Otty. A tenure differing scarcely appreciably from Keividotty. The deed is Caranamotticoompooram.——"*c*" *Coodimaneer* (കുടിമനീർ - kutimanír, Mal.). From (kutima, mal. tenantry + nír, mal. water). Otherwise Neermoothal, Jenmpanayam. When the landlord requires to borrow a still further sum on the security of land assigned to an Otty mortgagee to whom he has already executed a Keividotty or Otticoompooram deed, he gives him a Neermoothal or Coodimaneer document, by which he makes over to him all excepting the right got by water. The further advance is recoverable with the amount of the original mortgage, the Otty claim being in fact merged in the Coodimaneer deed. A payment not exceeding two fanams [q.v.] is now annually made to the possessor of the title. In executing the deed under this mode of transfer the landlord goes through the form of casting a few drops of water from his hand. This tenure prevails only in the neighbourhood of Calicut. The deed is Caranamcoodimaneer [maryauday].

OTY (ഒടി - oti, *Mal.*). A piece of rice-ground.

OUCHTERLONY VALLEY (ಅಕ್ತರಲೋನಿಹಳ್ಳ - áktaralónihalla, *Can.*). After Colonel James Ouchterlony. Valley; Neilgherry dist., Wynaud S.E. div.; area 40 square miles; lat. 11° 23′ to 11° 29′ N.; long. 76° 27′ to 76° 35′ E.; from Goodalore S. 3 miles; from Ootacamund W. 13 miles. A beautiful valley, at an average elevation of 3,000 feet above sea-level; situated below S.W. wall of Neilgherries. First explored by Colonel Ouchterlony, in 1844–45, and at that time covered with virgin forest. Coffee cultivation was introduced, and there are now very numerous coffee [q.v.] estates, occupying about 5,200 acres. Cinchona [koinah] and tea [q.v.] also flourish. The whole valley has been converted into a busy English settlement, employing over 5,000 native hands. The expenditure in the valley is about Rs. 9,00,000 annually.

OWK* (ఔక - auka, *Tel.*). Means bog.—"*a*" Deputy tahsildarry, Kurnool district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station; Kurnool dist., Coilcoontla tal.; pop. 2,862; acres 8,584; lat. 15° 13′; long. 78° 10′; from Coilcoontla W. 13 miles; from Cumbum S.W. 70 miles; from Kurnool S. 43 miles; from Madras N.W. 207 miles; from Nundiaul S.W. 30 miles; from Pyaupaly E. 25 miles. Built or improved by Timmaraja in 1463 A.D. Former seat of a powerful line of local chiefs. The ancestors were servants under Bookka roya of Vijianugger, from whom in 1450 they obtained a jagheer [q.v.] in Yaudiky district, which was continued by the Hyderabad kings, together with an assignment of 33 additional villages for the service of 1,800 men. Under Aurangzeeb the jagheer [q.v.] was resumed, but Owk assigned for the service of 1,000 peons [q.v.]. The last holder was pensioned by Munro. A scion of the family is the present Reddy of Owk who lives in the dilapidated fort. Vishnoo temple. Annual festival on 11th Veishaukham [mausam] in May. A fine tank [q.v.] between two hillocks. The Tirmalair escapes from the hills west of the town. Opposite the town are two waterfalls [aroovy] Gollalair and Palair. Weekly market on Wednesdays.

OWVAL (اول - awwal, *Hind.*). From (awala, ar. to precede). Principal.

OY (ఓయి - óyi, *Tel.*; ஓய் - óy, *Tam.*). Appellative masculine termination and vocative; used towards equals and inferiors [peyar]. The feminine term corresponding is Osy [ra].

OYAK (ഉഴക്ക് - uzhakku, *Mal.*; ஒழக்கு - ozhakku, *Tam.*). Measure of capacity, chiefly grain. Also liquid measure. Twice the ayak [q.v.] or olluck [q.v.].—"*a*" 2 ayaks = 1 oyak; 2 oyaks = 1 oory [alavay, 3d]. Approximate actual value, 1 oyak = 4 cubic inches. Malabar. Varies with yidangaahy.—"*b*" 2 ollucks = 1 oyak; 4 oyaks = 1 puddy [alavay, 3a]. Approximate actual value, 1 oyak = 25 cubic inches. Madras. Compare the Pow. See vol. I, 609; II, 514, 516.

P (प - pa, पा - pá, *San.*; پ - pe, *Hind.*; ப - pa, பா - pá, *Tam.*). Hind. symbol for two. Tam. the fraction 1/40 [mah].

PACH (पच् - pach, *San.*). To cook.——*Pachwye* (پچوی - pachwí, Hind.). An intoxicating drink prepared in Ganjam from fermented grain. It is made either from maize [mecca cholum] or rice [q.v.] or sorghum [cholum]. The grain is boiled and spread out on a mat to cool. It is then mixed with a ferment of vegetables and kept in a large earthen vessel for some days. Warm water may at any time be mixed with it. In a few hours it ferments, and is ready for use [joogady, mooskiraut].——*Pauchanam* (पाचन - páchana, San.). A decoction [kwautam], infusion. Also a dissolvent ——*Paungah* (پانگا - pángá, *Hind.*). Culinary salt obtained from sea-sand. Subsequently purified by boiling [curry ooppoo].

PACSHAM (पक्ष - paksha, *San.*). From (paksh, san. to take). Side, half wing.—"*a*" One of two halves of a lunar month [mausam]; the half called Shoocla pacsham or the Bright half extending from new moon [amavausyay] to full moon [powrnimay], and the half called Krishna pacsham or the Dark half extending from full moon to new moon. These sanscrit and anglo-indian terms are tolerably descriptive of the facts as appearing immediately after sunset or say from 6 to 8 p.m. which is their origin; but they are very misleading in respect of

the phenomena of the entire night or the distinctive quantity of the fortnight. The following table shows actual figures for a sample period of thirty days, and they are nearly the same for every lunar month [chaundramausam] throughout the year:—

Date of lunar month [chaundramausam].	Date of solar month [sowramausam].	Sun [sooryan]. Rises.	Sun [sooryan]. Sets.	Moon [chundran]. Rises.	Moon [chundran]. Sets.	Number of hours of moonlight [chundricay].	Period of moonlight [chundricay]. From	Period of moonlight [chundricay]. To	Age of moon [calay, piray].	Remarks.

The three periods, bright fortnight so called, dark fortnight so called, and fortnight made up of posterior week of first and prior week of second, can be compared thus:—Bright fortnight, so called; there is moonlight immediately after sunset with its period gradually lengthening from an hour or so to the whole night, and simultaneously with the lengthening of period the moon itself gradually grows from new to full; the nights altogether get brighter and brighter. Dark fortnight so called; there is an interval of an hour or so of darkness after sunset before the moon appears, the interval gradually increasing to the whole night, and the moon simultaneously proceeds from full to new; the nights altogether get darker and darker. Period from 8th to 21st of lunar month; in first week the evenings have moonlight and in second week they lose it more and more; but throughout the whole fortnight the moon is never less than half-moon, and the period of moonlight during the night is a minimum of 6 hours rising to 12. It is evident that the third of these periods is the real bright fortnight, wherein moonlight generally prevails; the remainder of the month is the real dark fortnight, as well known both to agriculturalists and criminal classes. The moon-waxing fortnight is also called Poorva pacsham or first half, and Apooryamauna pacsham or waxing half. The moon-waning fortnight is also called Apara pacsham or latter half and Apacsheeyamauna pacsham or waning half. The moon-waxing fortnight is known in tamul as Valar piray and the other as Tey piray [q.v.]. The following is the scale of lunar time measure:—30 moohoortams = 1 tity or lunar day, 15 tities = 1 pacsham or lunar fortnight, 2 pacshams = 1 chaundra mausam or lunar month or lunation [caulam, 4]. See vol. I, 611.—"*b*" Each tity [q.v.] is called numerically, closing with new moon or full moon; so that there are two tities of the same name or number in each month. The bright fortnight commences with the new moon, of which the tity or lunar day is called Paudyamy or the first, and continues until Poonnama [q.v.] or the full moon; the dark fortnight then begins in the same manner with a tity or lunar day named Paudyamy or the first, and ends with Amavausyay [q.v.] or the change, when the moon, by its conjunction with the sun [arcaindoo sangamam], concludes the lunar month [mookhyam, shooclaudy]. Sometimes, as in N. india, the lunar month is made to begin with paudyamy of Krishna pacsham and ends with powrnimay [gownam, krishnaudy].—"*c*" The dark pacsham of the month of Bhaudrapadam or Poorattaushy [mausam] or september called Mahaulya pacsham [q.v.] is consecrated to the worship of deceased parents.—"*d*" Parties to a quarrel sometimes call themselves the Shoocla pacsham, and their opponents the Krishna pacsham.—"*e*" Pacsham is also a premise in logic [nyauyam, tarcam]. Major premise is poorva pacsham and minor premise is, aparapacsham.——*Bahoola pacsham* (बहुलपक्ष - bahulapaksha, San.). From (bahula, san. black). Same as Krishna pacsham [bahoolam].——*Krishna pacsham* (कृष्णपक्ष - krishnapaksha, San.). From (krishna, san. black). Moon-waning fortnight. Otherwise Bahoolam [q.v.]. For the method of reckoning [maunam] the month by beginning of krishna pacsham see Krishnaudy.——*Pacshy* (पक्षी - pakshí, San.). See sep. title.——*Paucala* (పాకల - pákala,* Tel.). From (páka, tel. village). Village; Nellore dist., Cundoocore tal.; pop. 3,404; acres 5,565; lat. 15° 17′; long. 80° 07′; from Cundoocore E.N.E. 12 miles; from Eetamookkala S.S.W. 7 miles; from Nellore N. 57 miles; from Ramapatam N. 16 miles. Temple of Vengopaulsawmy, and Ramalingasawmy. Three small tanks. Salt factory at Oorlapolliem close by. Formerly a port. Connected with interior by a good metalled road. Anchorage good. About four miles to north is the outlet of an estuary which receives the Palair and Mooshy and forms the boundary between what navigators consider the Coromandel and Golcondah coasts [q.v.]——*Paukam* (పాకం - pákam, Tel.; பாக்கம் - pákkam, Tam.). From (pakkam, tam. side); seaside. A maritime tract [waukam].——*Poyacarry* (پایکاری - páikárí, Hind.). From (pákhí, hind. side + kárí, hind. workman). A cultivator without hereditary rights [paracoody, pykasht]. Similar to Metayer in old France.——*Punkah* (پنکہا - pankhá, Hind.). From (paksha, san. wing). A portable fan made from the leaf of the palmyra [taur]. So a large, fixed, and swinging fan, formed of cloth stretched on a rectangular frame, and suspended from the ceiling; or similarly a bar with a weighted curtain attached; kept in motion by the pulling of a cord.——*Pykasht* (پائی کاشت - páíkásht, Hind.). From (paksha, san. side + kásht, pers. cultivation). Non-resident cultivator, who cultivates lands in a village to which he does not belong by birth or hereditary claim, and holds his lands either for a stipulated term, or at pleasure of some member or members of the proprietary body [khoodkasht, paracoody, poyacarry].——*Shoocla pacsham* (शुक्लपक्ष - shuklapaksha, San.). From (shukla, san. white). Moon-waxing fortnight. Otherwise Shooddham. For the method of reckoning [maunam] the month by beginning of shoocla pacham see Shooclaudy.——*Shooddha pacsham* (शुद्धपक्ष - shuddhapaksha, San.). From (shuddha, san. clear). Same as Shooclam [jyotisham].

PACSHY (पक्षी - pakshí, *San.*). From (paksha, san. wing). [pacsham].——**(1)** Term equivalent to class Aves, sub-kingdom vertebrata [vamshyam] of animal kingdom [jantoo]. Animals which are covered with feathers and are oviparous. The european orders are founded partly on form of bill, and more especially on form of feet. Families are characterized by more minute distinctions of the bill and feet, together with the characters drawn from the wings, tail, and certain habits more or less common to all. A genus comprises one or many species closely resembling one another in the structure of bill, feet, wings and tail, and in habits; yet differing in color, size, or some minute differences of structure.——**(2)** The following is a key-synopsis for the birds of s. india carried down to species, connecting the european and native terminology; the small capitals indicate orders, the small capitals in inverted commas indicate sub-orders or tribes, the italic indicates families, the italic in inverted commas indicates sub-families, and the genera and species stand in ordinary roman type.—RAPTORES.—1 *Vulturidæ* [*gridhram*]. "*Vulturinæ*."—Otogyps calvus [rangidh]; Gyps indicus [burragidh], bengalensis [gidh].—"*Neo*,

phroninæ."—Neophron percnopterus [dung kite].—2 *Falconidæ* [*bheroondam*]. Graculus carbo [large cormorant], sinensis, javanicus [small cormorant].—" *Plotinæ.*"—Plotus melanogaster [snake cormorant].——**(3)** The following are the orders arranged alphabetically, with the Sanscrit equivalents, references to the key-synopsis, and brief notes as to classification.——*Gemitores* (कपोतसन्तान - kapótasantána, San.). From (kopóta, san. pigeon). Pigeons and doves. Intermediate to Rasores and Insessores. Divided into the following families:—Treronidæ [haritaulam], fruit-eating or tree pigeons; Columbidæ [blue rock pigeon, capotam, tootroo], ordinary pigeons and doves, feeding partly on the ground and partly on trees; Gouridæ, or ground pigeons [imperial dove].——*Grallatores* (जलचारिसन्तान - jalachárisantána, San.). From (jala, san. water + char, san. to move). Waders; shorebirds. Divided into two large groups, one in which the young run at once when hatched, the other in which the young are helpless at birth and remain in the nest till near maturity. "i" Young when hatched able to run at once. Pressirostres. containing the bustard [toghdar], plovers [battan], and cranes [saurasam]. Longirostres containing snipes [oollaun] and sandpipers [oollangy]. Latitores containing rails [krishaungy] and waterhens [krishaungy]. "ii" With young helpless at birth. Cultirostres containing storks [adjutant bird], herons [paddy bird] and ibises [deerghachanchoocam].—"*a*" Pressirostres. Alias Cursores. Comprise bustards [toghdar], plovers [battan], and cranes [saurasam]. May be distinguished from longirostres, by usually shorter and thicker bill, more robust make, average greater size; and in habits frequent open dry plains more habitually than banks of rivers, shores or marshes. Distributed among the following families:—Otididæ or bustards [toghdar], and floricans [q.v.], Cursoridæ or courser-plovers, Glareolidæ or swallow-plovers, Charadridæ or plovers [battan], Hæmatopodidæ or shore-plovers, Gruidæ or cranes [saurasam].—"*b*" Longirostres. Small wading birds. Very closely related to the plovers [battan] in structure and internal anatomy, but differ in their more lengthened bill, slender form, more aquatic habits, and mode of coloration [indian wood-cock, oollangy, oollaun, vanacookkootam].—"*c*" Latitores [krishaungy]. Alias Macrodactyli, Alectorides. Include Rails, Waterhens, Coots [krishaungy] and Jacanas. Moderate sized birds, stout legs and long feet, walk on soft and marshy ground, even on aquatic plants, fly badly. Body much compressed. Divided into two families, Parridæ and Rallidæ.—"*d*" Cultirostres. Alias Gradatores. Differs from all preceding tribes of Grallatores in young being born naked or nearly so, helpless, requiring to be fed by their parents in the nest till nearly full grown. Nestle on trees and among reeds. Comprise storks [adjutant bird], herons [paddy bird], and ibises [deerghachanchoocam]. All stalk slowly along the ground, or in water, looking for their food; flight powerful and easy.——*Insessores* (निषादीसन्तान - nishádísantána, San.). From (nishad, san. to sit down). Alias Passeres and Picæ, Passerinæ and Zygodactyli, Passeres and Scansores, Oscines and Volucres, Oscines and Clamatores, Cantores and Strepitores. Perching birds; comprise all birds not included among swimming or wading birds, gallinaceous or game birds, and the birds of prey; form nearly three-quarters of all known birds. Insessores differ from all birds, except Raptores, the Ardeidæ [paddy bird], Columbidæ [capotam], Cracidæ, and Megapodidæ, by having the toes all on one plane. All singing birds belong to this order. The following are the tribes:—"*a*" Fissirostres. Gape of mouth wide. Divided into the following families:—Hirundinidæ or swallows and swifts [abaubil]; Caprimulgidæ or goatsuckers [ajapye]; Trogonidæ, or trogons [cuffnee choory]; Meropidæ or bee-eaters [patringah]; Coraciadæ or rollers [indian jay]; Halcyonidæ or kingfishers [kilkilah]; Bucerotidæ or hornbills [sooliman moorghy]; and Eurylaimidæ or broad bills.—"*b*" Scansores. Alias Zygodactyli. Toes in pairs. They do not all of them climb, some hop about branches of trees in search of fruit and insects. Divided into the following families:—Psittacidæ or parrots [keeram, lory]; Picidæ or woodpeckers [gardan eyengtha, marangotty]; Megalaimidæ or barbets; Cuculidæ or cuckoos [cokam, crow pheasant, jungle parrot, koel].—"*c*" Tenuirostres. Bill, most slender and long, often curved; in a few, short and thick. Comprise the following groups, which may be divided into:—"i" Richly colored. Troidæ or humming birds; Nectarinidæ or honey suckers; Paradiseidæ or birds of Paradise. "ii" Plain plumage. Meliphagidæ or honeyeaters; Certhiadæ or creepers; Upupidæ or hoopoes [hood-hood].—"*d*" Dentirostres. Bill usually with tooth or notch in upper mandible near tip. The families are:—Laniadæ or shrikes [pingalam]; Muscicapidæ or flycatchers [macshagrauhy]; Merulidæ or thrushes [shauricay]; Brachypodidæ or short-legged thrushes [boolbool]; Sylviadæ or warblers [calacuntam].—"*e*" Conirostres. Bill usually entire at tip, thick, more or less conic. Divided into the following families:—Corvidæ, comprising crows and magpies [caurvam]; Sturnidæ, mynas and starlings [myna]; Fringillidæ [boosapriyam], the most numerous of all, comprising sparrows, weaver-birds [q.v.], amaduvads [avadavat], buntings, and rose linnets; Alaudidæ or larks [aghiyah].——*Natatores* (प्लवसन्तान - plavasantána, San.). From (plu, san. to swim). Alias Palmipedes. Feet webbed, legs placed far backwards on body. Like grallatores, some are capable of running at once from the shell, and soon feed themselves, autophagi; while others form rude nests on trees, or rocks, or among the herbage of the shore, and feed their young till they are able to fly, heterophagi.—"*a*" Lamellirostres. Bill furnished at the edges with thin horny lamellæ, which serve as a sieve. Geese [hamsam] and ducks [varatam]. Chiefly frequent fresh waters, marshes, lakes, and rivers; a few preferring salt water [rajahamsam].—"*b*" Mergitores. Alias Colymbides. Comprise two families of the Divers or loons, colymbidæ, and the Grebes, podicipidæ [paundoob].—"*c*" Vagatores. Alias Longipennes, Laridæ. Wings long; divided into two families:—Procellaridæ, comprising the albatrosses and petrels; Laridæ, the gulls and terns [samoodra caukkay].—"*d*" Piscatores. Alias Pelicanidæ. Divided into:—Flying fishers or Phaetonidæ; Plunging fishers or Sulidæ; Pouncing fishers or Attagenidæ; Swimming fishers or Pelecanidæ; Diving fishers [jalacaukkay] or Graculidæ.——*Raptores* (चौरसन्तान - chaurasantána, San.). From (chaura, san. robber). Alias Accipitres, Rapaces, Raptatores. Birds of prey. Agree with insessores in having all their toes upon one plane, but differ in their strong bill and strong feet, with curved claws; upper mandible is always longer than the lower one, hooked at tip and pointed. Large wings, often very long; sight very acute. Analogous to the feræ among the mammalia [sastanam]. Divided into:—Vulturidæ or true vultures [gridhram]; Falconidæ or hawks and eagles [bheroondam]; and Strigidæ [ooloocam] or owls [chillam, cooralam, dung kite, gidh, pattry, shyainacam, shyainam].——*Rasores* (क्षुरीसन्तान - kshurísantána, San.). From (kshur, san. to scratch). Alias Gallinæ, Gallinacei, Pulveratrices. Game birds. Capable of domestication. Evince analogies with ruminating animals among mammals [sastanam]. Crop represents paunch, have both a low degree of intelligence, easily domesticated, head too is in many of both orders adorned with appendages, horns, and crests; afford more wholesome food to man than any other orders. Divided into the following families:—Pteroclidæ or sand-grouse [rock pigeon], Phasianidæ [jeevanjeevam, jungle fowl, mayil, moorghy], Tetraonidæ or grouse and partridges [batair, teetar, tittiram], Tinamidæ [black quail, dabky].——**(4)** The following are the families and sub-families in alphabetical order with references:—Accipitrinæ, falconidæ, raptores, 2; Alaudinæ, fringillidæ, insessores, 27; Alcedininæ, halcyonidæ, insessores, 9; Ampelidæ, insessores, 24; Anastomatinæ, tantalidæ, grallatores, 47; Anatidæ, natatores, 50; Anatinæ, anatidæ, natatores, 50; Anseridæ, natatores, 49; Aquilinæ, falconidæ, raptores, 2; Ardeidæ, grallatores, 46; Artaminæ, laniadæ, insessores, 19; Asioninæ, strigidæ, raptores, 3; Attagenidæ, natatores, 56; Brachypodidæ, insessores, 22; Buboninæ, strigidæ, raptores, 3; Bucerotidæ, insessores, 11; Buteoninæ, falconidæ, raptores, 2; Calamoherpinæ, sylviadæ, insessores, 23; Campephaginæ, laniadæ, insessores, 19; Campephilinæ, picidæ, insessores, 13; Caprimulgidæ, insessores, 5; Caprimulginæ, caprimulgidæ, insessores, 5; Carpophaginæ, treronidæ, gemitores, 28; Centropodinæ, cuculidæ, insessores, 15; Certhiadæ, insessores, 17; Charadridæ, grallatores, 38; Charadrinæ, charadridæ, grallatores, 38; Ciconidæ, grallatores, 45; Columbidæ, gemitores, 29; Columbinæ, columbidæ, gemitores, 29; Coraciadæ, insessores, 8; Corvidæ, insessores, 25; Corvinæ, corvidæ, insessores, 25; Coturnicinæ, tetraonidæ, rasores, 33; Cuculidæ, insessores, 15; Cuculinæ, cuculidæ, insessores, 15; Cursoridæ, grallatores, 36; Cypselinæ, hirundinidæ, insessores, 4; Dendrocittinæ, corvidæ, insessores, 25; Dicæinæ, nectarinidæ, insessores,

16; Dicrurinæ, laniadæ, insessores, 19; Drymoicinæ, sylviadæ,
insessores, 23; Emberizinæ, fringillidæ, insessores, 27; Esacinæ,
charadridæ, graiiatores, 38; Estreldinæ, fringillidæ, insessores,

(5) The following are the genera in alphabetical order, with
references:—Acanthoptila, merulidæ, 21; Acanthylis, hirundi-
nidæ, 4; Accipiter, falconidæ, 2; Acridotheres, sturnidæ, 26;
Acrocephalus, sylviadæ, 23; Actitis, scolopacidæ, 41; Ægialitis,
charadridæ, 38; Agrodroma, sylviadæ, 23; Alauda, fringillidæ,
27; Alcedo, halcyonidæ, 9; Alcippe, merulidæ, 21; Alseonax,
muscicapidæ, 20; Ammomanes, fringillidæ, 27; Anas, anatidæ,
50; Anastomus, tantalidæ, 47; Anthropoides, gruidæ, 40; Aquila,
falconidæ, 2; Arachnechthra, nectarinidæ, 16; Arachnothera,
nectarinidæ, 16; Ardea, ardeidæ, 46; Ardeola, ardeidæ, 46; Ardetta,
ardeidæ, 46; Artamus, laniadæ, 19; Arundinax, sylviadæ, 23;
Astur, falconidæ, 2; Athene, strigidæ, 3; Attagen, attagenidæ,
56; Aythya, anatidæ, 50; Batrachostomus, caprimulgidæ, 5;
Baza, falconidæ, 2; Botaurus, ardeidæ, 46; Brachypodius, brachy-
podidæ, 22; Brachypternus, picidæ, 13; Branta, anatidæ, 50;
Budytes, sylviadæ, 23; Buphus, ardeidæ, 46; Buteo, falconidæ,
2; Butorides, ardeidæ, 46; Calandrella, fringillidæ, 27; Calidris,
scolopacidæ, 41; Calobates, sylviadæ, 23; Caprimulgus, capri-
mulgidæ, 5; Carpodacus, fringillidæ, 27; Carpophaga, treronidæ,
28; Casarca, anseridæ, 49; Centropus, cuculidæ, 15; Ceryle,
halcyonidæ, 9; Ceyx, halcyonidæ, 9; Chætornis, merulidæ, 21;
Chalcophaps, gouridæ, 30; Chaptia, laniadæ, 19; Charadrius,
charadridæ, 38; Chatarrhœa, merulidæ, 21; Chauleasmus, ana-
tidæ, 50; Chelidon, hirundinidæ, 4; Chibia, laniadæ, 19; Chryso-
colaptes, picidæ, 13; Chrysonotus, picidæ, 13; Chrysophlegma,
picidæ, 13; Ciconia, ciconidæ, 45; Circætus, falconidæ, 2; Circus,
falconidæ, 2; Cisticola, sylviadæ, 23; Coccsystes, cuculidæ, 15;
Columba, columbidæ, 29; Collocalia, hirundinidæ, 4; Copsychus,
sylviadæ, 23; Coracias, coraciadæ, 8; Corvus, corvidæ, 25; Cory-
dalla, sylviadæ, 23; Coturnix, tetraonidæ, 33; Cotyle, hirundi-
nidæ, 4; Criniger, brachypodidæ, 22; Crocopus, treronidæ, 28;
Cryptolopha, muscicapidæ, 20; Cuculus, cuculidæ, 15; Cursorius,
cursoridæ, 36; Cyanecula, sylviadæ, 23; Cyornis, muscicapidæ,
20; Cypselus, hirundinidæ, 4; Dendrochelidon, hirundinidæ, 4;
Dendrocitta, corvidæ, 25; Dendrocygna, anseridæ, 49; Dendro-
phila, certhiade, 17; Dicæum, nectarinidæ, 16; Dicrurus, laniadæ,
19; Dromas, homatopodidæ, 39; Drymoipus, sylviadæ, 23;
Dumetia, merulidæ, 21; Edolius, laniadæ, 19; Elanus, falco-
nidæ, 2; Ephialtes, strigidæ, 3; Erythropus, falconidæ, 2;
Erythrosterna, muscicapidæ, 20; Esacus, charadridæ, 38;
Estrella, fringillidæ, 27; Eudynamys, cuculidæ, 15; Eulabes,
sturnidæ, 26; Eumyias, muscicapidæ, 20; Eupodotis, otididæ,
35; Euspiza, fringillidæ, 27; Falcinellus, tantalidæ, 47; Falco,
falconidæ, 2; Francolinus, tetraonidæ, 33; Franklinia, sylviadæ,
23; Fulica, rallidæ, 44; Fuligula, anatidæ, 50; Galerida, fringil-
lidæ, 27; Gallicrex, rallidæ, 44; Gallinago, scolopacidæ, 41;
Gallinula, rallidæ, 44; Galloperdix, phasianidæ, 32; Gallus,
phasianidæ, 32; Garrulax, merulidæ, 21; Gecinus, picidæ, 13;
Gelochelidon, laridæ, 53; Geocichla, merulidæ, 21; Geronticus,
tantalidæ, 47; Glareola, glareolidæ, 37; Graculus, graculidæ, 58;

(6) Title heads in this glossary cover each family and

contained sub-family, genus and species, clearly known to be distinguished by the natives. The bird nomenclature of the natives being as yet not very well ascertained, the number of such items in volume may be found comparatively inconsiderable. —(7) For insects see Poochy; for fishes see Matsyam; for batrachians see Bhaicam; for reptiles see Sarpy; for mammals see Sastanam. A general conspectus of the fauna [jantoo] of s. india was given in vol. II, appendix IV.

PADAM (पद् - pada, *San.*). From (pad, san. to fall). Step; foot-mark; footing or station; abode; position, place or office of dignity; foot-measure; fourth part; line of a verse; a quarter or quadrant [paudam]; word [mozhy]. Plant second term, as meaning foot; ex., where transl. is of first term:—Bauhinia malabarica (basavanapáda), ox; Clitoria ternatea (vrishapádi), bull; Coldenia procumbens (gódápadí), iguana, (hamsapádi), swan, (tripádí), three; Ficus bengalensis (bahupád), many; Jasminum sambac (bhúpadí), earth, fixed in the earth; Leea hirta (parvatapádi), mountain, (surapádi), divine; Vitis pedata (gódhápadí), iguana; see gloss. paragraphs. Compare Payeen, Pye.—*Padaurtam* (पदार्थ - padárt'ha, San.). From (pada, san. thing + art'ha, san. meaning). Lit. meaning of a word or thing. General property or attribute that may be predicated or affirmed of existing things. Otherwise category. Aristotle made ten categories, viz., substance, quantity, quality, relation, action, passion, time, place, situation and habit. The tamulians specify seven, viz.:—Dravyam, substance; Goonam, quality; Carmam, action; Saumaunyam, identity; Vishaisham, variety; Samavauyam, relation; and Abhauvam, annihilation [veishaishicam]. See this expanded at vol. I (74), foot-note. For elementary substance, see Dravyam; for matter, see Bhootam; for organic and inorganic, see Indriyam and Anindriyam, and Punchendriyam; for organic kingdom, see Ganam [jantoo, vricsham]; for organic class, see Vargam; for organic order, see Santaunam; for organic family, see Coolam; for organic genus, see Jauty; for organic species, see Bhaidam. Oopa prefixed to either of the above means a sub-head. For inorganic minerals, see Dhautoo.—*Padya* (ಪದ್ಯ - padya, Can.). From (pad, san. foot). A stanza of four lines.—*Pauda caunicay* (பாதக்காணிக்கை - páthakkánikkai, Tam.). Offering to the feet, contribution to gooroo [q.v.]. Compare Wolfa.—*Pauda chauram* (पादचार - pádachára, San.). From (páda, san. a quadrant + chára, san. motion); progress of planets reckoned by quartering the signs [raushy]. The position of the planets [graham] on a particular day, being one of the five articles of Punchaungam [jyotisham, punchaungam].—*Paudam* (पाद - páda, San.; பாதம் - pátham, Tam.). From (pad, san. to go). The foot; foot-print. The foot-measure of 12 ungoolams [q.v.]. Also fourth part, from foot of a quadruped being one out of four [pautica]. The fourth part of a stanza of four lines or any verse [padya]. The quadrant of a circle [chuckram, mundalam]. The paudams of the ayanaumsham [q.v.] are the four quadrants of the epicycle [paridhy, prauk chuckram], or parts of the arc [chaupam] described by the first point [craunty pautam, maishauyanam] of the tropical zodiac [raushy chuckram] in consequence of the precessional variation [craunty pauta gaty]. Title of respect added to proper names; term of address. Also suffix in proper names as Gooroopaudam, Shivapaudam [padam, peyar]. Compare Payeen, Pye.—*Paudamoodray* (पादमुद्रा - pádamudrá, San.). From (páda, san. foot + mudrá, san. stamp). The tradition of an impressed footstep in ascending to heaven is very common among the tamulians [q.v.]. The mark on Adam's peak [q.v.] in Ceylon, although it has from the Portuguese been called Adam's footstep, is a Booddhist [booddha] tamul relic [dharmaraja cull, kadam].—*Pauda poornacam* (పాదపూరణకం - pádapúrnakam, Tel.). From (páda, san. fourth part of stanza, verse + púrna, san. full). A phrase inserted in verse merely to fill the metre.—*Paujy* (پاجی - pájí, Hind.). From (pái, pers. foot). A scoundrel; term of abuse.—*Pautica* (పాతిక - pátika, Tel.). From (páda, san. foot), that being fourth part in quadrupeds. A fourth part [paudam]. Goldsmith's weight. 2 pauticas = 1 baida [niray, 3b]. Approximate actual value, 1 pautica = ¾ grain. ½ of one goonj [goomchy] seed.—*Payeen* (پائين - páín, Hind.). Foot [padam, paudam, pye].—*Payeen ghaut* (پائين گهاٹ - páínghát, Hind.). From (páín, hind. foot + ghát, hind. hill-pass). The country below table-land. The term used to be applied principally on the west coast; but the expression Carnatic payeen ghaut is also frequent as applied to the low country of Madras on the east side of the peninsula [carnatic]. Talaghaut [q.v.] is the low country not so near the foot of the ghauts [q.v.] as Payeen ghaut. See vol. I (25) [balaghaut].—*Peik* (پيک - paik, Hind.; పైక - paika, Tel.). From (pái, pers. foot). A foot messenger [peon] having arms [sillah]. In Cuttack irregular foot soldiers [inam]. Military tribe of Vizagapatam [janty]. See vol. I (66); II, 141.—*Peikam* (పైకము - paikamu, Tel.). From (paiká, mahr.). Money. Peikam bunt is a zemindarry [q.v.] peon [q.v.] paid in cash [q.v.] instead of in grain.—*Peisa* (پيسا - paisá, Hind.). From (pai, hind. foot). The original form of Pice [q.v.]. Corresponds to the hindoo Doody [q.v.] or Dub [q.v.].—*Peon* (پياده - piyádah, Hind.). From persian through portuguese peáo. A foot messenger. A servant waiting in offices. A police officer [buntrote, jawaun, peik].—*Pice* (پيسا - paisá, Hind.; ಪೈಸಾ - paisá, Can.; పైసా - paisá, Tel.; பைசா - paisá, Tam.). From (pái, mahr. from páda, san. foot). Copper coin. 3 pies = 1 pice; 4 pice = 1 anna [naunyam, 2e]. $\frac{1}{64}$th of a rupee. Also called quarter anna. Approximate actual value, 1 pice = 1½ farthings. Almost same as hindostany Adhelah. Anjengo pice is $\frac{1}{64}$th of a rupee [q.v.]. The pice, though not used in accounts, is in popular bazaar use. The coin was at one time precisely an inch in diameter, weighing 100 grains troy. The aunay pice, or elephant pice, was a mysore coin having a figure of an elephant [q.v.] with the sun [sooryan] or moon [chundran] or both above. Pice is sometimes used as a name for money generally; cf. Cash. The name pice is also applied to a weight; a variable division of the seer [q.v.] ranging in different localities from 156¼ grains up to 276¼ grains. See vol. I, 609.—*Pie* (پائی - pái, Hind.). Through mahratta. From (páda, san. quarter). The plural is pies. Cf. the singular Pice.—"*a*" Small copper coin. 12 pies = 1 anna [naunyam, 2e]. Approximate actual value, 1 pie = ½ a farthing. Same as Hind. damree, Tel. roowa, Tam. cash.—"*b*" Superficial measure. 12 pies = 1 anna [alavay, 2e]. Approximate actual value, 1 pie = 200 square feet. Used in N. arcot, S. arcot, Chingleput and the Neilgherries. $\frac{1}{144}$th of a cawny [q.v.].—"*c*" The title is also Anglo-indian for pariah [q.v.] or unowned village dogs [nye]; corruption of pariah. Also spelt Pye. See vol. I, 609.—*Pow* (پاو - páu, Hind.; పావు - pávu, Tel.). From (páda, san. one-fourth). Through mahratta.—"*a*" Measure of capacity. 2 nowtauks = 1 pow; 4 pows = 1 pucka seer [alavay, 3e]. Approximate actual value, 1 pow = 17½ cubic inches. Compare Oyak.—"*b*" Bazaar weight. 2 pollums = 1 pow; 4 pows = 1 cutcha seer [niray, 2e]. Approximate actual value, 1 pow = 2½ oz. avoir.—"*c*" Goldsmith's weight. 2 chowlams = 1 pow; 2 pows = 1 mauda [niray, 3b]. Approximate actual value, 1 pow = 13½ grains. ¼ of a pagoda weight [q.v.]. Compare Mausham. See vol. I, 609.—*Powlah* (پاولا - páulá, Hind.). From (páu, hind. one-fourth). Coin. 4 annas = 1 powlah; 4 powlahs = 1 rupee [naunyam, 2e]. Approximate actual value, 1 powlah = 4 annas. Commonly used. Same as Hind. chowanny, Can. caul, Tel. doogoolam, Tam. caul. Compare Mal. velly.—*Pownah* (پاونا - páuná, Hind.). From (páda, san. one-fourth + úna, san. deficient). Through Mahratta. A quarter less than unity. Three-fourths. Pownah cowle is a cowle [q.v.] on three-fourths of original assessment [teervay].—*Poyel* (پايل - páyal, Hind.). From (pái, pers. foot). Anklet. Of gold [pon] or silver [velly], hollow or solid, knocking together as the wearer walks and making a ringing noise. Generally worn by dancing girls among Hindoos [poyzeb].—*Poyzeb* (پائے زيب - páezeb, Hind.). From (pá, pers. foot, + zeb, pers. adorner). Ornament [zewar] worn round ankles resembling a horse's curb chain, set with a fringe of small spherical bells, which tinkle at motion of limbs [poyel].—*Pye* (پائے - páe, Hind.). From sanscrit. A foot [padam, paudam, payeen].—*Pyejan* (پينجن - paínjan, Hind.). From (pada, san. foot + rañjana, san. pleasing). Small bells fastened round the feet of children [zewar].—*Pyekhana* (پاخانا - páikháná, Hind.). From (pái, hind. foot + khánah, pers. house). A latrine.—*Pyemauly* (پائی مالی - páímálí, Hind.). From (pái, hind. foot + málí, pers. trampled). Damage done by foot-trampling, as by troops or cattle passing.—*Pyjauma* (پائجامه - páijámah, Hind.). From (pái, hind. foot + jámah, pers. clothing). Trousers tied with string at waist, such as are worn by mussalman [q.v.] men and women [jauma]. Among europeans, sleeping drawers. Trousers of natives in the Central provinces are generally tight [sharayee]; here loose [izaur]. The English took the habit of sleeping drawers from the Portuguese [sheelay].—*Pyly* (పాయిలి - páyali, Tel.). From (pávu, tel. quarter). Measure of capacity. 2 pows = 1 pyly; 2 pylies = 1 seer [alavay, 3c]. Approximate actual value, 1 pyly = 35 cubic inches. Mysore. Compare Tavva of godavery, Sola of kistna.—*Pyrahan* (پيرهن - pairahan, Hind.). From (pái, hind. foot + rahan, hind. keeper). A gown with flaps in the skirt, having buttons in three places [sheelay].

PADDY (धान्य - dhánya, *San.*; तांदळ - tándúla, *Mahr.*; तांदुल - tándula, *Conc.*; ارز - arruz, *Ar.*; برنج - birinj, *Pers.*; دهان - dhán, *Hind.* and *Dec.*; پدی - padi, *Malay*; ಭತ್ತ - bhatta, *Can.*; ಅರಿ - ari, *Too.*; వడ్లు - vadlu, *Tel.*; ଧାନ - dháno, *Oor.*; നെല്ല - nellu, *Mal.*; හාල් - hál, *Singh.*; நெல் - nel, *Tam.*). Title from malay. San. from (dhá, san. to support) [dhaunyam]. Mahr. and conc. from (tandula, san. rice). Hind. from sanscrit. Can. from (bhakta, san. boiled rice; food) [bhatta]. Tel. from (vari, tel. corruption of nívára, san. paddy). San. also (nívára), meaning warding off, applies to a wild variety; (tandula), meaning beaten rice; (nílamañjarí), meaning blue cluster of flowers; (abdhiká), meaning relating to sea; (vríhi), meaning covering; eight sorts are enumerated; the word is not mentioned in the rig vedam [q.v.], but first appears in atarva vedam [q.v.], together with mausham [black gram], tilam [gingelly] and yavam [jow]; specially applied to variety ripening in the rains; (aranya), meaning forest; (áshuvríhi), meaning rice ripening quickly in the rainy season; (sháli), meaning produced in an enclosed space; said to be of ten varieties, and two are

specially distinguished, one white growing in deep water and the other red requiring only a moist soil. Hind. also (chával), meaning rice threshed. Dec. also (chánwal), meaning rice not in husk. Malay also (gabah). Can. also (nellu); (navare-bhatta); (akki) is rice. Tel. also (biyyamu); (úrivadlu), meaning village + paddy; (chénivadlu), meaning dry land + paddy; (errajilamavadlu), meaning red + kind of rice so called; (mattakárulu), meaning inferior + kind of rice so called; (vari). Mal. also (ari), meaning rice. Tam. also (arisi), meaning husked paddy. Greek ὄρυζον, ὄρυζα. Latin oryza. Title is applied only when plant is growing, or when at any rate the grain has not been husked. Title otherwise Rice [q.v.] plant. Botanically Oryza sativa, linn., graminaceæ [vricsham, 156]. Generic is from tamul through arabic.—**(1)**—"*a*" Cultivated throughout the country, but met with also in a truly wild condition in some swampy expanses. The majority of the wild states of this grass are annuals growing in dense tufts and producing coarse much branched radical stems, the erect portions of which root at the deflected nodes. They form spongy sheaths, through the presence of air-chambers in their texture, which sheaths are intended to support the ascending stems, as these in their growth have to keep pace with the rise of the level of water, rice being killed when completely submerged. The lower sheaths are often devoid of lamina; ligule large, membranous, bifurcated into sickle-shaped arms on either side of the stem, each arm having seven pairs of erect rigid hairs. Inflorescence a panicle of spikes on short peduncles which have an ochreate-like hairy scale at the point of origin of the spikes; pedicels short with the receptacular apex large and often greatly distorted, the upper and lower facets sometimes fully one-eighth of an inch apart; the scale-like ears of these facets are sometimes very large, and in exceptional cases one or both are even produced into what might be called additional outer glumes. Outer glumes large, very often tri-dentate, midrib prominent; inner glumes considerably elongated, being as a rule 0·325 inches in length, curved, pointed at both extremities, and in the great majority the larger one is produced into a long awn frequently distinctly articulated and possessed at its base of two glandular processes which correspond to the extremities of the lateral nerves; surface more or less hairy, especially on the keel and nerves, structure manifesting regular rows of shining granulations. There are endless cultivated forms; the progression from the wild to the cultivated forms is in the reduction of the size and alteration of the shape of the receptacle, in the loss of the awn, and in the shortening but widening of the combined outline of the inner glumes, a character consequent doubtless on the formation of a shorter, though thicker and more compact, grain; in cultivated rices again the progression in value is from the awned to the awnless forms, and from the colored to the colorless. The following is the description of an average cultivated type:—grass; culms numerous, jointed, round and smooth; leaves sheathing, long, scabrous outside; panicles terminal; rachis common and partial, angular, hispid; flowers simple, pedicelled; calyx glume two-valved, one-flowered, the larger valve ending in a long, hispid, colored awn; corolla two-valved, growing to the seed. Seeds when barked are white, nearly transparent, cylindrical, linear, furrowed, obtuse at both ends, brittle; flour very white, friable, insipid, dry, inodorous and tasteless, very soft, and swelling much when cooked; gluten none. Paddy seed was originally taken from this country to north america, and its cultivation has been so successful in carolina as to have led to its being reimported here as seed [viray].—"*b*" The most fertile soil for rice-sowing is land periodically inundated in the neighbourhood of large rivers [aur], where the plant can receive much fertilising matter [adaimunn, vandalmunn] from the overflow of the streams; the crop needs a temperature of at least 73°, humidity and heat being indispensable conditions of its growth; the outturn per acre varies according to natural climatic conditions and method of cultivation [vellaumay]. For the ordinary process of cultivation, the ground is squared off into plots varying in size, generally averaging from 30 to 40 yards in length and breadth marked off by ridges [varapp] or small bunds [q.v.] about two feet high and one broad; this plot, after being freely saturated with water from some irrigation source, is thoroughly ploughed up and manured [yeroo]; frequently green herbs and shrubs are ploughed into the soil, the favorite shrub for this purpose being the mudar or calotropis gigantea [yercum]; the ground thus prepared is covered over with water and allowed to stand from two to four inches over the soil to favor putrefaction and create a puddle; in a few days it is again ploughed up into a deep muddy mixture [sher]; a piece of board tied on to the yoke of a pair of bullocks [yair] is then drawn over the puddle to equalize it; it is now ready to receive the seed [viray]; the rice is prepared for sowing by being first steeped in water until it begins to germinate, which generally occurs in from two to three days, when it is conveyed to the field ready for sowing; the seedsman takes as much seed as he can conveniently carry in the cloth around his waist and enters the field; as he passes from one end to the other he scatters the seed broadcast, whilst an assistant carries a supply in a basket and walks along the bund [q.v.] to replenish the seedsman as the quantity becomes exhausted; the soil is then allowed to dry for some three or four days, by which time the seedlings [nautt] will have sprung up and have attained about two inches in height, when the field is irrigated and the water is allowed to stand a couple of inches above the soil and so maintained till the harvest is gathered; during the first and second months the fields are handweeded by women and boys, when, should the plants be found crowded together at any place, they are removed so as to leave from four to six inches of space between each; plants are also put in, so as to complete the stand; should at any time the plants grow lanky, from eight to ten inches of the tops are cut away by the sickle, which by arresting their rapid growth renders the plants much more fruitful. The above is the ordinary and wet sowing system of cultivation [coodapa, shettcaul]. In some circumstances or with some varieties of rice the field is ploughed up after a shower of rain [mazhay, monsoon] merely and without regard to the irrigation source, and the seeds are thereupon sown in their natural condition and unsoaked; when the sprouts [nautt] are between four and six weeks old, the field is artificially irrigated for the first time, and the water-supply maintained till the grain ripens and the stalks are ready for the sickle; this is the so called dry sowing system of cultivation [gaddavary, pooldy caul, veligada], but note that the land is still nunjah [q.v.] land and the artificial irrigation is only postponed; this system is adopted when the early irrigation fails, and where the soil is loamy [pasalay munn] or light sandy [manal]; weeding is much heavier under this. By a third method nurseries [nauttangaul] are prepared and the seeds sown therein; when the plantlings [nautt] have attained the age of six or eight weeks, they are transplanted into the fields prepared in the first of the two methods mentioned above to receive them; this is the nursery system of cultivation [nautt nadavoo]; the system gives trouble, but is highly remunerative; there is a Tamul proverb:—நடவுக்குத்தெளி நாலத்தொன்று—"paddy sown yields but "a fourth of that planted." As a fourth system dry paddy even occurs amongst dry cultivation [modan, pulliyaul]; for this the land is specially well manured [yeroo]. Whichever of the above systems of cultivation is adopted, irrigation is unnecessary for the last twenty or thirty days before a paddy crop is harvested; should an unfavorable wind prevail, and the plant be attacked by any grub, the usual course is to cut off the water altogether for a time and let the soil dry; rice suffers often from a yellowish green fly. The manure used in rice cultivation, briefly mentioned above, consists of every kind of refuse procurable excepting human excrement; the dung [shauny] and urine of cattle [maud], goats [vellaud], horses [ghorah], asses [gadhah], sheep [aud], and bats [vavvaul], ashes [neeroo], lime [choonam], sweepings of houses, husks [boosam] of paddy and other grains [dhaunyam], skins of fruits, decayed leaves of various kinds, bark, muck from the tanpit, milk hedge [q.v.], varagoo [q.v.] and other straw, are some of the many substances commonly used, and many are applied only in particular circumstances and on highly scientific principles; the practice of diluting manure [yeroo] with large quantities of water is known to the ryot [q.v.], and various modes of making, altering, and correcting soils are well understood; the fluviatile deposits [adaimunn, vandal munn] found in the beds of channels [q.v.] and tanks [q.v.] are largely made use of; sheep [aud], goats [vellaud] and cattle [maud] are frequently enfolded on the land for purposes of manure [yeroo]. The principle of raising different crops in rotation is understood and to a limited extent acted upon, but the peculiarity of the mode of agriculture necessarily followed in a country where deep ploughing generally ruins the soil precludes the ryot from doing exactly the same as the english farmer. The number of crops of paddy that may be obtained from the same ground in the course of twelve months will depend much on the nature of the country. The districts through which large rivers [aur] run have a great advantage in this respect, such for instance as those of trichinopoly and tanjore, which have an almost continual succession of rice crops throughout the year owing to the cauvery being filled by both the south-west and north-east monsoons [q.v.]. In the northern and eastern parts of the carnatic [q.v.] which are in a great measure dependent on the natural rains [mazhay] and the water that is preserved in tanks [q.v.] or reservoirs, the different seasons for sowing and reaping rice are as follows; the shumbah [q.v.] or winter crop, which is reckoned the best, is sown towards the end of september, and is cut in february and march, the water by which it is nourished is that which falls during the north-east monsoon [q.v.] and what has been left by the monsoon in low grounds and tanks; this being reaped, on the same ground where it grew provided that water can be had is sown the madangal [q.v.] or summer catch crop, which is commonly got in june and july, but is in general the least productive and the most uncertain of the whole year's cultivation, as from the extreme heat of the weather during the time that it is growing the ears frequently fail to fill well; the caur [q.v.] or autumn crop, which is considered the second best, is put into the ground when the first rains begin to fall and after the excessive heat is a little abated, in other words in july and august, and is brought to maturity by the monsoon rains and reaped in december and january about a month or six weeks before that of the shumbah; upon the ground whence the caur crop is taken, in december and january, is sown the nawara or spring catch crop, provided there is water enough remaining, and this is got in a month or six weeks before that of the madangal; shumbah [q.v.], madangal [q.v.], caur [q.v.] and nawara [q.v.] are described by the natives as the four sorts of crop yielded by nadee mautricam [q.v.] or lands irrigated by rivers and first class

deramautricam or lands dependant on rain. After rice-stalks have been cut they are carried off the fields, when they are stacked and left for two or three days or more; the sheaves are then spread on a prepared ground [calam] and are beaten with long bamboo [q.v.] sticks, or buffaloes and cattle [khoolgah, maud] are made to tread on the stalks so spread until seeds separate from them; to separate the grain from dust and chaff [boosam] baskets filled with paddy are held up above the head and the paddy allowed to drop, when the breeze blows the dust and chaff away; if there be no breeze a cooly [q.v.] winnows the grain with a fan; the mode of separating the husk from the grain is by beating it with the rice-stamper, this work being usually performed by women, see later.—"*c*" The above are general particulars of cultivation; the following are special for different localities.—"*d*" In the Nellore district rice cultivation is carried on under both coodapa [q.v.] and veligada [q.v.], wet sowing and dry sowing. The latter system is adopted only where the supply of irrigation will not suffice early in the season for the land, or where the soil is loamy or light sandy and so favors that mode of cultivation. Under coodapa, paddy can be sown at any time that water may be available, for one of the several crops is sure to suit the season of the year. As a rule however coodapa cultivation may be considered to commence late in june or during july, and continue till february; and after that it is rarely resorted to, save in second crop land or in submerged land that could not have been sown before. The early coodapa [q.v.] cultivation towards the end of june or during july is generally under the river channels [q.v.] or river-supplied tanks [q.v.]. The crops most extensively put down under these sources are pishaunam [q.v.] or tawny husked paddy and sannavary [q.v.] or fine paddy, which take six months to mature and yield the white or superior description of rice. These two kinds are only cultivable till about the end of august, after which the common descriptions which mature in a less period are sown. The mode of cultivating each description of paddy under Coodapa is the same, irrespective of the season at which put down. The land is first ploughed, with the water on it, from five to eight different times, either each time separately or twice at the same time, with an interval of a few days between each operation according to local usage. The number of times it is ploughed will depend on the soil in some measure, as the loamy soils work up far more speedily than the heavy. The interval between the ploughings is requisite to allow time for the grass and weeds to rot and be killed in some measure by being ploughed into and worked up with the slush. Upon the completion of the requisite ploughing, the banks are made up, the water is partly let off, and the beam-leveller is used to level the surface of the field and make it as smooth as practicable. The field is next flooded, and the seed, which will invariably have been previously steeped and closely packed in leaves, is sown broadcast over the field. The quantity of seed expended varies somewhat, but is generally about 2½ tooms [q.v.] or 80 maunicas [q.v.] per gorroo [q.v.]; equivalent to about 30 Madras measures or 40 seers [q.v.] per acre. The water is left on the whole field the first night, but is completely drawn off in the morning. Subsequent irrigation is regulated with reference to the position of the soil whether high or low-lying, and the nature of the soil whether porous or retentive of moisture. In either of the former cases the field will be flooded on the third, fourth, or fifth day, and again let off; in the latter cases from the sixth to the ninth day, and at varying intervals afterwards, depending very much on the same conditions up to about the fifteenth or twenty-fifth day, where the crop is regularly irrigated. After thirty or forty days, the latter most frequently, the crop is weeded, and any thin parts are transplanted with plants taken from where the paddy may be overthick. Again after another month it is weeded a second time if requisite. In some villages it is usual for the teethed leveller or bushes heavily weighted to be drawn over the young crop to submerge the weeds; this is done when the plant is a month old, and with a view of reducing the labour of weeding. After this treatment the paddy rises again, but the weeds and grasses are in some measure killed; what weeds may afterwards remain are removed by the hand at the close of the second month. Water is afterwards let on and off regularly according to the soil and season. A large series of forms of rice are cultivated under coodapa [q.v.]. Under Veligada the loamy and light sandy soils are ploughed with the first early rains and the operation is repeated at intervals until the land may have been ploughed some five or six times. The seed is then either sown broadcast and ploughed in twice, or else is drilled in with the gorroo [q.v.] and covered up and levelled with the goontaca [q.v.]. Should rain not fall within the second or third day, the goontaca is used once more. The seed is only drilled as a rule in villages where the gorroo happens to be kept for dry cultivation. The seed sown under veligada [q.v.] is usually 2 tooms or 64 maunicas per gorroo, equivalent to about 23·87 Madras measures per acre. For nearly two months paddy thus planted is dependent on rain. After one month the gorroo [q.v.] or teethed leveller is used to loosen the soil, and about the end of the second month, but sometimes earlier if the weeds are very thick, water is let on, and the whole is once well weeded, or this is done if heavy rain sets in. Whilst the crop is being weeded, the plants are thinned in parts and transplanted in places where the crop may have partially failed. After weeding, the crop is regularly irrigated as far as may be practicable, and a second weeding, if necessary, takes place during the third month. Weeding is a very much heavier business under veligada [q.v.] than coodapa [q.v.]. The period during which paddy can be put down under veligada is limited to the period of the early rains, say august and september. Only pedda sannavary, vauda sannavary, and calinga shumbah are regularly put down under veligada; sometimes, but very seldom, pishaunam and mosanam are thus cultivated as well. From the foregoing details it will be observed that the system of cultivation throughout the district is that of sowing the paddy broadcast under one or other method. The method of transplanting the seed [nautt nadavoo] prevails only in the extreme northern part of the district bordering on the kistna, and in the shreeharicote villages formerly appertaining to the chingleput district. The advantage which the transplanting system may be considered to have over the broadcast system is that the former admits of well-grown and vigorous young plants raised in highly manured beds being transplanted, which readily take root, and having the start are able to vanquish the weeds which at once spring up besides them. Under the broadcast system, the weeds sprout with the young paddy, and as the latter grows it has to contend for existence against the weeds, and the growth of the paddy is consequently more or less checked. The transplanting system may be regarded as particularly advantageous for the poorer descriptions of soil, inasmuch as a strong and healthy plant once transplanted in poor land is able to thrive better than seed sown in land deficient in strength, which affords the plant but slight chance of growing vigorously at first. As to the length of period for which irrigation water has to be taken the transplanting method stands midway between coodapa [q.v.] and veligada [q.v.]. Where pursued, it is the better class of paddies which are treated by the nursery process.—"*e*" In Kistna district there are three classes of rice:—poonausa [q.v.] or early crop, sown in may or june, and reaped in september; pedda, or great crop, sown intermediately from july to september, and cut between november and february; peira [q.v.] or late crop, sown in november and december, and gathered in february and march.—"*f*" In Chingleput district wet sowing is called shettcaul [q.v.], dry sowing is called pooldycaul [q.v.], and transplantation is called nautt nadavoo [q.v.]. In shettcaul and pooldycaul 3 mercauls [q.v.] of seed of 8 measures each are sown on an acre of land, and will generally produce 100 mercauls of paddy in return if the growth flourishes. The transplanting method requires 4 mercauls of seed per acre; this kind of cultivation is very common in the district. The chief descriptions of paddy are shumbah [q.v.], caur [q.v.] and manacuttay [q.v.]; of these shumbah is the best its rice being white in color, caur ranks next, the third and last is manacuttay; the rice of the two latter is somewhat red; there are different sub-heads under each. Of the shumbah kinds, Codan shumbah or hot weather shumbah is cultivated in the beginning of the cultivation year, viz., about may or june. In many places a second crop is raised about the month of december or january on lands on which a first crop of codan shumbah has been already raised. All the other kinds of shumbah are cultivated as a rule from the month of july onwards. Shirmany meaning small grain or Calavan meaning mixed shumbah and Chinna shumbah, are six and four month crops respectively, raised abundantly. Vauda shumbah and Shaday shumbah are raised in pooldy caul in great quantities; not being so readily liable to wither, their period is long. In places where there is not a large supply of water, three months' shumbah and two months' shumbah, are cultivated; these rarely yield a good crop. The raising of the first Caur crop generally commences about the month of may and june, and the second in december. The second crop is raised on the same fields on which the first crop has been already raised. Mutta or palm stem caur and Peroom or large caur are raised in large quantities. The various kinds of Mosanam are cultivated to a considerable extent from the month of july, the season for shumbah. Poombaulay is cultivated in the foreshores of tanks and pools just previous to the rainy season; and even if water after rainfall stands to a height of a half or three-fourths of a yard, it shoots up higher than the level of the water and yields a good outturn. Some of the species of caur are raised to a slight degree in certain villages in dry seed cultivation. Manacuttay, the third class, is cultivated on a small scale in april or may, in lands irrigated by wells, &c.; among these Pishiny is raised in pooldycaul on high level nunjah [q.v.] lands; this grain is even cultivated in dry lands when they are fairly moist.—"*g*" In the Madura district the times of ploughing [yair], sowing [viray], transplanting [nautt nadavoo], &c., vary very considerably in different seasons according as the rains are early or late, plentiful or the reverse, and also according as lands lie near to or far from sources of irrigation and are rapidly or slowly supplied with water. But as a rule the ploughing is done in june or july after the early rains have thoroughly softened the ground and the seed is sown in the nurseries [nauttangaul] at the end of july or beginning of august. After about thirty days the seedlings [nautt] are fit for transplanting, and in january the crop is ready for the sickle. The best farmers in Madura like light falls of rain [mazhay, monsoon] at intervals of about thirty days. In lands well supplied with water as soon as the january crop is got in, preparations are made for a second catch crop called Maushy coday, meaning

summer crop of february month, which is raised in the same mode as the first and comes to maturity about may. Or, if the season be unpropitious during january and february, the second sowing will be in march or april or may, and the second reaping in july or august. The catch crop will then be called the Audy coday. Sometimes there will be three crops of rice raised in succession in a period of 13 or 14 months. Rapidly-growing and therefore inferior kinds of rice are always set down for the second and third crops. Where the irrigational supplies are sufficient, the second crop may be of plantains [q.v.], sugar-cane [q.v.], betel [q.v.] vines, &c., or where the supplies are insufficient for the highest kind of crops, raggy [q.v.], cumboo [bajrah], cholum [q.v.], varagoo [q.v.], or rape-seed [rara sarsoon] may be cultivated immediately after the caulam [q.v.] or seasonal rice crop. The paddy is grown on almost every description of soil indifferently, the only essential being a constant supply of water; but the richer soils yield much larger crops than the poorer. The seed is sometimes sown broadcast, but as a rule it is sown in nurseries [nauttangaul] specially prepared. In the former case the expense of cultivation is light, but the produce is not very remunerative; in the latter, the crops are generally good. Sometimes the young plants raised in a nursery are transplanted into a second nursery and afterwards retransplanted into the field, and where this is done the yield is much larger than is ordinarily obtained. In this district the finest kinds of paddy are Shumbah and Milagy; these forms germinate in five days, are transplanted in 25 days, form the ear in 105 days, and are harvested in 45 days more, thus taking in all six months. It is observable that pishaunam rice is not now grown in the madura district, but at the beginning of the last century was extensively cultivated; pishaunam is however grown in both tanjore and tinnevelly.—"*h*" In the Tanjore district the coarser sorts of paddy are sown broadcast, but this mode of cultivation is very limited, being carried on only in a few places beyond the delta [conamoogam], and there on rain-fed land; in all cases of irrigated cultivation, young plants are raised in seed-beds [nattangaul] and transplanted [nautt nadavoo]. Caur [q.v.] is the inferior, and Pishaunam [q.v.] is the superior, paddy of the district; caur is referred to two kinds, Cadapoo [q.v.] or black paddy and Caur proper, and pishaunam is similarly spoken of as of two kinds, Shumbah or red paddy and Pishaunam proper. The dates of actual commencement and termination of agricultural operations vary in the different parts of the district. This is due to the first supply of freshes reaching the eastern portion of the delta later; not that a flood takes any number of days in travelling within the district, but because the early flood is almost wholly utilised westward, and the cultivators at the eastern end have to wait until the more copious and therefore uninterrupted series of freshes reach them. Thus in the further west of the delta the caur planting begins in may and the crop is harvested in september; the pishaunam cultivation there begins in september and the crop is harvested in january; then a few days before a third crop, a pulse [dholl] called vayalpayar or low land pulse [field gram], is sown and this is picked two months after or in march; this pulse requires no ploughing and grows chiefly with the aid of the moisture that remains in the fields and succeeds even if there be no rain afterwards. In the extreme east of the delta, on the other hand, where more than one crop is hardly ever cultivated, the cultivation generally begins in august and sometimes, as when freshes are later than usual, in september and the crop is harvested in march. Where only one crop is grown in the year it is usually one of seven months' duration from planting to reaping. The general mean may be taken broadly as four months, from july to october, for the caur species; and as six months, from september to february, for the pishaunam. Wherever two crops are raised, the second is usually one of the quicker-growing varieties of shumbah [q.v.]. Taking the delta as a whole, the proportion of cadapoo or black caur species to the entire paddy crop may be taken to be one-sixth. In some villages in the central part of the delta, one of the varieties of pishaunam [q.v.] called Ottadan [q.v.] is planted along with cadapoo [q.v.] proper; when the latter which grows quicker is reaped, the ends of the ottadan plant then only about half-grown are cut along with it, and the latter then shoots up all the more luxuriantly and comes to maturity at the usual season of the pishaunam harvest; in this case the seeds of the two varieties are mixed together, in the proportion of $\frac{3}{4}$ cadapoo and $\frac{1}{4}$ ottadan, before they are put down in the nursery, and the young plants of both which are hardly distinguishable are planted promiscuously. The caur species draws more water than the pishaunam; it will bear almost any amount of moisture without being injured. Allusion has been made to the pulse [dholl] or vayalpayar [field gram] grown as a third crop on paddy lands; more generally however a dry crop forms an auxiliary to only a single crop of paddy, being adopted as an alternative where, as often happens, the available supply of water is not sufficient for two paddy crops, or the mirassidars [q.v.] cannot afford the requisite labor; the dry crop is either the pulse above mentioned, gingelly [q.v.] or raggy [q.v.], and the latter two require ploughing but it is only raggy that is planted; this additional crop is raised either before or after the paddy season; in the first case it is sown or planted, as the case may be, with the aid of the summer shower or the first fresh when it happens to come earlier than usual, but cannot be relied on for beginning operations for the cultivation of a regular wet crop; in the second case, if the dry crop is gingelly [q.v.] or raggy [q.v.], the field is ploughed when there is yet moisture in it; the crop is then sown or planted in february and reaped in may, being matured entirely by the summer showers.—"*i*" In the Coimbatore district paddy may be roughly divided into three months Caur and five months Shumbah; the former is grown both as a first and second crop, the latter, save very occasionally, only as a second or single crop and in the cold weather. The best known varieties of these two sorts are tabulated below. Dry land paddy is also added, but is rare :—

Three months; Caur [q.v.].	Four to six months; Shumbah [q.v.].	Dry lsnd [poonjah].
Cooroovay	Shumbah	Shoornay vellay.
Annadaunam	Calingaroyan shumbah.	
Aroovathaum coday ...	Caurtigay shumbah.	
	Milagy or Shemmilagy.	

Either variety succeeds raggy or other so-called dry crop, or paddy. The treatment, season, and yield are different in each talook owing to the variety of water-supply and soil. Common features are as follows. First crop; caur; the ground is prepared in june and july in the usual way by swamping, cross-ploughing several times, green-manuring and smoothing with the beam; seed is generally sown broadcast at the rate of from 24 to 30 madras measures, or from 1 to $1\frac{1}{2}$ bushels per acre; in the fourth week the land is weeded and the plants thinned out if necessary, and bare places planted up; there is no subsequent weeding; water is let on as often as possible, and harvest takes place in september, october; the quantity of seed sown varies greatly; the estimates of seed are high, viz., 30 to 36 measures per acre transplanted, and from 24 to 60 measures for broadcast sowing; if the soil is rich and the plants good, four or five seedlings will form a bunch and be planted at from 6 to 8 inches apart. Second crop; by which is understood a crop following a first crop either of raggy or other dry grain or of paddy; this may be either cooroovay [q.v.] or shumbah [q.v.]; with good irrigation, shumbah is the rule as a second crop; this is usually transplanted from nurseries prepared in october, after the first crop is reaped in october, the land is again prepared by ploughing, green-manuring, treading and levelling, and the seedlings [nautt] rapidly transplanted in november-december; there is little difference between the second crop and the single crop paddy either in yield, kind or season; the quantity of seed required somewhat exceeds that for the first crop. The chief pest here for paddy is an insect called navay pootchy, whitish, and from half to one inch long; it bores into and feeds on the tender plant, which then produces only empty husks.—"*j*" In the South canara district land is thus classified according to its capacity for irrigation; byle [q.v.] or rich wet land, majal [q.v.] or middling wet land, bettoo [q.v.] or land watered only by the rainfall. On byle land of the best quality, three rice crops can be raised in the year; on the best majal land, two crops; bettoo land produces only a single crop. The zeneloo or carty is the earliest rice crop of the season, on whatever description of land it may be grown. The seed is usually first sown in nurseries, which are highly manured, and the plants are afterwards transplanted. In about two months after transplantation, the crop comes into ear, and about twenty-one days more is ready for reaping.—"*k*" In the Malabar district rice is sometimes sown broadcast, but is usually transplanted from nursery beds. The first or Cunny crop is sown in april and may, and cut in august and september. The second or Macaram or january reaped crop is sown in september and october, and reaped in january and february. These are the principal rice harvests, but there are intermediate crops in some places; and a third, known as poonjah [colpoonjah], is sown in february and reaped in april or may. The greater portion of land however bears only one crop. For detailed information see the heads Cunny, Colpoonjah, Macaram, Modan and Pulliyaul.—"*l*" A large part of the rice sold in the shops, and which is exported to europe has been husked by being first half-boiled, then dried in the sun, and finally husked by the ordinary pestle and mortar; this Par-boiled rice, as it is called in the trade, is an important article, but one which the higher caste hindoos are forbidden to eat since it may have been boiled by low caste persons. Husking without boiling is a tedious process, the more so since it is done entirely by hand labor; this is however facilitated by exposing the grain to the sun before treatment in the mortar. The mortar may be made of stone, but it is commonly an hour-glass-shaped log of wood about two feet in height with a central cavity excavated for half its depth and only very slightly greater in diameter than the pestle which is usually about 3 to 4 feet long and about 3 inches in thickness; the mortar is as a rule firmly fixed in the ground; the operation of husking, which may be almost daily witnessed, requires not only considerable agility but great exertion. Over by far the larger part of the country the rice for the family use is husked by the females of the family as it is wanted, the stock of unhusked grain being kept in granaries adjoining the house. The grain is sometimes first milled by hand. The mortar is then partly filled with grain and is beaten with the pounder until the chaff [boosam] is separated. The

rice is then winnowed by throwing it up into the air.—"*m*" Internally riceflour and water is used as a chemical antidote in poisoning by preparations of mercury [rasam], copper [taumram], zinc [tootnaug], silver [velly] and tin [tagaram], and by iodine; the conjee [q.v.] is a good demulcent and refrigerant drink in febrile and inflammatory diseases; it is rendered more palatable by being acidulated with lime-juice [lime] and sweetened with sugar [q.v.]; rice is of a less aperient quality than any other grain, and is therefore generally ordered as the safest and best food in bowel complaints; externally the rice-flour is used most commonly for poultices, and to protect burnt or excoriated surfaces; substituted for british linseed [alsee] meal, arrow-root [malabar arrowroot], and sago [q.v.]; gives to pharm. oryzæ farina, properties analogous to those of wheat [geung], officinal. Veidyans [q.v.] are particular as to the kind of rice they prescribe, supposing the rices of different crops to have very different effects. Composition of rice is in 100 parts:—water 12·8, albuminoids 7·3, starch 78·3, oil ·6, fibre ·4, ash ·6.—"*n*" Wild rice [nivvary] is gathered and eaten by the richer classes in the northern circar [q.v.] districts, who boil it in steam; it is white, palatable, and wholesome; coarse kind of confection made from it is sold in most bazaars. Ordinary rice forms the staple food of a very large proportion of the population; it is a valuable food abounding in starch, not destitute of albuminates and salts, easily grown, easily cooked and easily digested; it is deficient as above shown in nitrogenous aliment, being in this respect the lowest of the cereals [dhaunyam], hence it demands the addition of meat or fish or leguminous seeds [dholl], of milk or buttermilk [paul]; it is deficient in fat, and therefore requires butter, ghee [q.v.] or other fat to be added; salt is also ill-provided and must be supplied by other foods, hence a dietary consisting mainly of rice requires a more generous salt ration than one of wheat [geung] or millet [q.v.]; it is in fact generally insipid and needs the aid of condiments [chutney]. Madrassees say that the rice of n. india is dry and insipid, and causes them to be constipated; early sown rice is much more wholesome than late sown; rice should have been kept at least six months before it is used as food, otherwise indigestion and diarrhœa are likely to follow, nor does it boil well, the grains adhering together in lumps; the grains should be of average size, free from epiphytic spots and from holes made by insects; they should not break readily on pressure; there is some reason to suspect that the obscure disease called beribery [q.v] is attributable to diseased rice. Paddy is as above said partially boiled and then dried before it comes into the grain-market, except in the case of what is called table rice, used by bramins and europeans, which has not undergone this process. After purchase rice is prepared in the house for actual eating by slow boiling or steaming till the grain becomes soft, when the superfluous water is strained away and the rice allowed to cool; it should not be over-boiled into a pulpy mass, but the grains should be soft and not adhere to each other. Rice-flour is also in use for the preparation of cakes, &c.; for this purpose the rice is either steeped in water and then pounded in a mortar and the flour subsequently dried in the sun, or the grain itself is dried in the sun and then ground in a mill. Rice-cakes under the name of hoppers [q.v.] are in general use among most of the lower orders of europeans, east indians, and native christians; the rice-flour is mixed with water and allowed to ferment overnight; this process is frequently assisted by the use of toddy [q.v.] or the cocoanut [q.v.] tree sap; the next morning it is baked into cakes; frequently cocoanut milk is added to improve the flavor of the cakes; different kinds of sweet cakes are prepared from riceflour. Two pounds of cleaned rice weigh five pounds after boiling; the liquor [conjee] is either thrown away or is drunk as a beverage after the addition of a little common salt [ooppoo], or is given to stall-fed milch cows [pashoo]; throwing away of the water involves loss of some mineral matter, no more water should be used in cooking this grain than can be absorbed by it. The absence of gluten prevents the conversion of rice into bread, but it may be employed for preparing a kind of beer and a form of arrack [q.v.]. The stalk is the chief dry fodder [ghaus] of cattle [maud] throughout the year; the plant before it seeds is capable of conversion into hay, but it contains very little nutritious matter.—"*o*" Rice husk [boosam] contains a small amount of a pale yellowish-brown coloring matter, and when boiled in water the infusion may, by the use of various processes, be made to dye light shades [shauyam]. Rice straw, and more especially the lower portion of the stems and roots, left generally to enrich the soil; may be used as a paper material. Rice glue is made by mixing rice flour with cold water and then boiling the mixture; this conjee [q.v.] is used in the process of paper making, and also by weavers [nesavoo] in dressing and preparing thread [nool] for the loom [tarry], and generally used by mechanics whenever strong adhesion [pattoo] may be required. —**(2)** As indicated at head there are several hundred varieties and sub-varieties of paddy or oryza sativa; but they do not possess any very marked peculiarities, except such as are due to difference in climate, soil, and mode of cultivation [vellaumay]; some forms possess two and others three grains within the pericarp, thus showing a tendency to revert to an ancestral type; the best known wild variety is known as nivvary [q.v.], found about the lakes in the northern circars [q.v.]; hill-rice again is that which is raised in upland, arable lands, in malabar called modan [q.v.], smaller and less valuable than common rice. The following are some of the kinds known to the natives, with their derivations and a few particulars.——*Aroovathaum cottay* (அறுவதாங்கொட்டை - aruvathángottai, Tam.). From (aruvathu, tam. sixty + kottai, tam. seed). Two months growth to harvest, very quick. Coimbatore.——*Aryan* (ആര്യ്യൻ - áryyan, Mal.). From (áryam, mal. the mahrátta country). Four months. Malabar, named after the Mahratta country. For the varieties see sep. title.——***Aunacauyan*** (ആനക്കായൻ - ánakkáyan, Mal.). From (ána, mal. elephant + káya, mal. fruit); that is, large grain. Six months. Malabar.——*Aunacodam* (ആനക്കുടം - ánakkutam, Mal.). From (ána, mal. elephant + kutam, mal. anything round); large grain. Six months. Malabar.——*Aunacomban* (ആനക്കൊമ്പൻ - ánakkompan, Mal.; ஆனைக்கொம்பன் - ánaikkomban, Tam.). From (ána, mal. elephant + kompu, mal. tusk); from color. Five months; sown in Malabar in Cunny [mausam] or September-October, and reaped in Macaram or January-February; rice is white. Also in southern districts, cultivated in sandy or red soil [shevval munn]; ground prepared at end of poorataushy [mausam] or september, by ploughing and manuring [yeroo]; seedlings [nautt] transplanted in arpisy or october; regular watering and weeding once a month for the first three months; the crop attains a height of 3 feet and is of a brown color; cut six months after sowing.——*Bhogaul* (భోగాలు - bhógálu, Tel.). Means enjoyable. Indicating superiority. Paddy of N. circars. There are several varieties named after Balaraman, Dasharatan, Seetay, &c.——*Boondama* (బుడమబియ్యము - budamabiyyamu, Tel.). From (budama, tel. the plant, solanum verbascifolium, linn. + biyyamu, tel. rice); from small size. Four months. Kistna.——*Cadapoo* (கடப்பு - kadappu, Tam.). Means black. A species of Caur paddy.——*Calama* (കഴമ - kazhama, Mal.). From (kalama, san. rice growing in deep water). Five months. Malabar.——*Calinga shumbah* (కళింగశంబా - kalingashambá, Tel.; கலிங்கசம்பா - kalingasambá, Tam.). Introduced from calingam [q.v.], teloogoo country. Four to five months. Coromandel coast. Same as Vauda shumbah.——*Carim coora* (കരിങ്കൂര - karinkúra, Mal.). From (kari, mal. black + kúra, mal. a sharp-pointed grain). Six months. Malabar.——*Carippauly* (കരിപ്പാലി - karippáli, Mal.). Means black paula or milky paddy. Four months. Malabar. ——*Carootta caudan* (കറുത്തകാടൻ - karuttakátan, Mal.). From (karutta, mal. black + kátan, mal. wild paddy). Six months. Malabar.——*Carootta chaura* (കറുത്തചാര - karuttachára, Mal.). From (karutta, mal. black + chára, mal. striped paddy). Four months. Malabar.——*Carootainy* (കറുത്തേനി - karutténi, Mal.). From (karutta, mal. black + chíni, mal. foreign rice). Four months. Malabar.——*Cauday caloottan* (കാടക്കഴുത്തൻ - kátakkazhuttan, Mal.). From (káta, mal. quail + kazhuttu, mal. neck); from long and slender grain. Five to six months. Malabar. Cf. Quail-necked paddy.——*Caur* (கார் - kár, Tam.). Any paddy set down in the rainy season, but especially in S.W. monsoon [q.v.]. For different kinds see sep. title.——*Caurany* (കാരണി - kárani, Mal.). From (kár, mal. black + ani, mal. row); from appearance of ears. Five months. Malabar.——*Chambaun* (ചമ്പാൻ - champán, Mal.). Four to six months. Same as Shumbah.——*Cheera* (ചീര - chira, Mal.). Means cumin seed, from similar grain. Six months. Malabar. See sep. title.——*Chembily piriyan* (ചെമ്പിലിപിരിയൻ - chempilipiriyan, Mal.). From (chempu, mal. copper + piriyan, mal. twisted), from appearance of ears. Five to six months. Malabar. Rice white. ——*Chempaula* (ചെമ്പാല - chempála, Mal.). From (chem, mal. red + pála, mal. the milky grained paddy). Five months. Malabar. Rice white.——*Chendaula* (ചെന്താഴ - chentázha, Mal.). From (chem mal. red + tázha, mal. screw-pine, pandanus odoratissimus, linn. f.); from color of grain. Four months. Malabar.——*Chendaur many* (ചെന്താർമണി - chentármani, Mal.). From (chentár, mal. red flower, lotus, nelumbium speciosum, willd. + mani, mal. grain); from red grain. Four months. Malabar.——*Chennell* (ചെന്നെല്ല - chennellu, Mal.). From (chem, mal. red + nellu, mal. paddy). Four months. Malabar.——*Chittainy* (ചിറ്റേനി - chitténi, Mal.). From (chiru, mal. small + chíni, mal. chinese). Five months. Said to come from China. Malabar.——*Chornauly* (ചൂരണാലി - churanáli, Mal.). Four months. Malabar. See sep. title.—— *Codavilootala* (കൊടവിഴുതല - kotavizhutala, Mal.). From (kuta, mal. umbrella + vizhu, mal. to fall + tala, mal. head); from stalks in ears drooping like an umbrella. Nine months. Malabar. ——*Cokkan* (കൊക്കൻ - kokkan, Mal.). From (kokku, mal. crane), white paddy. Four months. Malabar.——*Colpoonjah* (കോൽപുഞ്ച - kólpuñcha, Mal.). From (kol, mal. to hold + puñcha, mal. land); land holding water. Paddy in lowlying lands bordering malabar backwater [cauyal]. The land reclaimed is protected by fences of wattle and mud. Seedlings [nautt] planted in Marcaram [mausam] or January or in Coombham or February. Crop cut in Maidom or April.——*Coly* (കോലി - kóli, Mal.). From (kól, mal. stick); from size of grain, long

and slender. Five months. Malabar.——*Coodivitt* (കുടിവിത്തു - kutivittu, Mal.). From (kuti, mal. house + vittu, mal. seed). Six months. Malabar rice for lower classes.——*Cooroovay* (குறுவை - kuruvai, Tam.). From (kuru, tam. short). Short crop of 2 or 3 months. Tanjore and Tinnevelly. See sep. title.——*Coottaudan* (കുട്ടാടൻ - kuttátan, Mal.). From (kuttanátu, mal. the low land near ambalappuzha). Ten months. Malabar. Black and white varieties as usual. See sep. title.——*Culloonday* (கல்லுண்டை - kallundai, Tam.). From (kal, tam. stone + undai, tam. ball); from hard round rice. Six and half months. South arcot.——*Cunny* (കന്നികൃഷി - kannikrishi, Mal.). From time of harvest. A principal paddy of W. coast. Soil most suitable, soft clayey soil [calimunn]; ground prepared, in macaram [mausam] or january, coombham or february and meenam or march; the land is ploughed three or four times in macaram or january and one or more times in coombham or february, so that the soil is broken and turned up into clods; in meenam or march dried cowdung, straw, &c., is deposited in heaps and burnt; at the time of sowing, the land is ploughed six or seven times and the earth pulverised; seed is sown either in the latter part of meenam or march, i.e., in raivaty nautt vaila [caurtey], or in the early part of maidom or april, i.e., in ashwaty nautt vaila [caurtey], seed may be sown in nursery or otherwise; if in nursery, sowing must be made in the latter part of meenam or march, so that the seedlings may be transplanted in yedavam or may; if the seed is sown broadcast, the weeds should be removed during the latter part of yedavam or may and early in mitoonam or june; cowdung [shauny] should be mixed with water in the openings on the embankments; a full grown plant attains the height of 3-4½ feet; if a plant thrives well, it will have three or four shoots from the stem; cut three to five months after sowing; average price, 38 to 45 imperial seers for 1 rupee——*Cuttaulay* (கற்றாழை - kattázhai, Tam.). From (kal, tam. stone + tázhai, tam. screw-pine, pandanus odoratissimus, linn.) Five months. Is the only variety of paddy sown broad-cast in Tanjore, and is grown chiefly in the upland parts. Tanjore.——*Eeshwara cora* (ఈశ్వరకోర - íshvarakóra, Tel.). Meaning shiva's tinay. A principal paddy of coromandel coast; soil most suitable, sandy and clay; ground prepared in aushweejam [mausam] or october and caurteecam or november; soil is moistened and then ploughed four or five times; the field is then levelled by a harrow [goontaca]; seed sown broadcast or by transplantation in aushweejam or october and caurteecam or november; after two months' growth, it is weeded and transplanted if necessary; full grown crop is 4 feet high; cut after five months; average price, 30 imperial seers for 1 rupee.——*Gaddavary* (గడ్డవరి - gaddavari, Tel.). From (gadda, tel. clod + vari, tel. paddy). Any paddy sown in wet-land, but without waiting for direct flow from irrigation source——*Gandool* (గండలు - gandulu, Tel.). Means large. Four months. Kurnool.——*Jeeracattary* (ജീരകത്താരി - chírakattari, Mal.). From (chírakam, mal. cumin seed, cuminum cyminum, linn. + ari, mal. rice); from fineness. Four months. Malabar.——*Kesary* (కేసరి - késari, Tel.). From (késara, san. gold); from color of paddy. A principal paddy of Coromandel coast. Cultivated in sandy and clay soil; ground prepared in pooshyam [mausam] or january and maugham or february; ploughed four or five times and levelled by a harrow [goontaca]; seed sown in pooshyam or january and maugham or february; no nursery; sown broadcast; usual watering and weeding; full grown crop 2 feet high; cut after four months; average price 28 imperial seers for 1 rupee.——*Krishna leelay* (കൃഷ്ണലീല - krishnalíla, Mal.). From (krishna, san. black + lílá, san. sport, semblance); from color of grain. Five months. Malabar.——*Macaram* (മകരകൃഷി - makarakrishi, Mal). From time of harvest. A principal paddy of W. coast. Soil most suitable, soft clayey; ground prepared soon after the first crop is gathered early in toolaum [mausam] or october; seed must be sown in nursery; should be transplanted before the 25th toolaum or october; until the seedlings strike root after transplantation, care must be taken to adjust water-supply, after this stage water may be allowed to stagnate as much as is required; full grown crop attains 4 to 4½ feet; cut three to five months after sowing, according to quality of seed; average price, 32 to 45 imperial seers for 1 rupee.——*Madangal* (மடங்கல் - madangal, Tam.). From (madangu, tam. to turn). A summer catch crop got in June and July; sown on the ground after shumbah [q.v.] has been reaped.——*Manacuttay* (மணக்கட்டை - manakkattai, Tam.). From (manam, tam. fragrance). Four months. The third sort of paddy cultivated in nunjah [q.v.] in Chingleput; has varieties white and black.——*Maunavaury* (மானாவாரி - mánavári, Tam.). Means sky rain. Three to five months. Any paddy grown without irrigation [pooldycaul, veligada]; these are rare. In southern districts, sown in maurgaly [mausam] or december, reaped in pungoony or march. Paddy white and rice red.——*Mayil calootlan* (മയിൽകഴുത്തൻ - mayilkazhuttan, Mal.). From (mayil, mal. peacock + kazhuttu, mal. neck); from color of grain. Five months. Malabar.——*Meshattary* (മേശത്താരി - méshattari, Mal.). From (mésha, mal. table + ari, mal. rice). Six months. Paddy small and white. Malabar.——*Milagy* (மிளகி - milagi, Tam.). From (milagu, tam. black pepper, piper nigrum, linn.). Six to seven months. Same as Milagoo shumbah.——*Modan* (മോടൻ - mótan, Mal.). From (métu, mal. high land). Four months. A hill paddy in Malabar. Caroottary modan is a black, and Veloottary modan is a white variety. Land is ploughed twice in carcatacam [mausam] or july, then once a month from chingom or august to coombham or february; ploughed again in maidom or april when seed is sown with ten times the quantity of manure [yeroo] in the shape of ashes [neeroo] and cattle-dung [shauny]; over sown bed plough is plied once more; weeded in yedavam or may; crop cut in chingom or august.——*Molagoliky* (మొలకులికి - molagoliki, Tel.). From (mola, tel. sprout + kuluku, tel. beauty). A principal paddy of Coromandel coast. Soil most suitable, black clay [calimunn]; ground prepared in july and august; by ploughing both in water and dry; seeds sown in august and september; first sown in nursery where there is good supply of water; transplanted after thirty or forty days' growth in nursery; must be watered well until it is ripe; grown to the height of 5 feet and appears white; cut after six months in the same way as pishaunam [q.v.]; average price, 28 imperial seers for 1 rupee.——*Moondagampaula* (മുണ്ടകമ്പാല - muntakampála, Mal.). From (muntam, mal. dwarf + pála, mal. milky paddy). Five months. A Malabar paddy. Carotta moondagampaula is black; Chonna moondagampaula from (chukanna, mal. red) is red; Velootta moondagampaula is white.——*Moondagan* (മുണ്ടകൻ - muntakan, Mal.). From (muntam, mal. dwarfish); from absence of tail to ear. Five months. A Malabar paddy. Of slow growth, yields best straw. Caroo moondagam is black; Chompan moondagam, from (chempu, mal. copper) is red; Cheroo moondagam, is small; Chonna moondagam from (chukanna, mal. red) is red.——*Mosanam* (மோசனம் - mósanam, Tam.). From (mó, tam. to smell). A principal paddy of southern districts. Soil most suitable, regar [q.v.] sand [manal]; ground prepared in september and october; ploughing dry [gaddavary, pooldy caul, veligada]; seed sown in october and november broadcast; the crop must be cleared of weeds when it is tender; it does not require much water; full grown crop appears somewhat red and yellow; grows to 3 feet; cut after three months; average price, 34 imperial seers for 1 rupee; consumed by the poor.——*Nariyan* (நரியன் - nariyan, Tam.). From (nari, tam. jackal); wild paddy. Five months. Madura.——*Nawara* (നവര - navara, Mal.; நவரை - navarai, Tam.). From (navati, san. ninety); ninety days' paddy. Three months. A Malabar paddy; sown in the month of yedavam [mausam], may-june, and reaped in carcatacam [mausam], july-august; rice light; possesses medical properties. Carootta nawara is black; Nawara mookkony is three-cornered; Veloota nawara is white. Distinguish from Nivvary [q.v.].——*Neela shumbah* (நீலச்சம்பா - nílaççambá, Tam.). Means black shumbah, from color of paddy. A principal paddy of southern districts. Soil most suitable, regar [q.v.] sand [manal]; ground prepared in august and september, by ploughing dry [pooldycaul]; seed sown in august and september; sometimes by nursery [nauttangaul], generally by gorroo [q.v.]; no irrigation necessary for two months, but during that time weeds must be removed, afterwards the crop must be watered well till ripe; full grown crop is 5 feet high and appears somewhat black; cut after six months; average price, 30 imperial seers for 1 rupee.——*Neervellay* (நீர்வெள்ளை - nírvellai, Tam.). From (nír, tam. water + vellai, tam. white). Eight months. Chingleput.——*Nivvary* (नीवार - nívára, San.). Wild rice. See sep. title.——*Noova* (നൂവ - núva, Mal.). Five months. Malabar. Usual black and white varieties.——*Nallavary* (నల్లవరి - nallavari, Tel.). Means black paddy; from color of grain. A principal paddy of Coromandel coast. Soil most suitable is red clay or black loam; ground prepared at all times of the year, by ploughing wet [coodapa] four or five times, and manuring [yeroo]; seed sown broadcast at all times of the year; watering and weeding necessary; plant green up to 2 or 2½ feet; cut after three months; average price from 32 to 40 imperial seers for 1 rupee; generally eaten by the poor.——*Orpooval* (ഒരുപൂവൽ - orupúval, Mal.). Means single crop. A principal paddy of W. coast. Soil most suitable is that where silt has accumulated [adaimunn, vandalmunn]; ground prepared for the first crop in maidom [mausam] or april and yedavam or may; for the second in chingom or august and cunny or september; depth prepared by ploughing the land four or five times to the depth of 3 or 4 inches; rarely green manuring [yeroo] and mixing the ashes of dried leaves and cowdung [shauny] with the soil; first crop is sown in maidom or april and yedavam or may; second crop in chingom or august and cunny or september; generally the seeds are sown in nursery [nauttangaul] and transplanted; occasional weeding and thinning out are the only treatments while under growth; full grown crop has a yellow appearance; cut after five months.——*Ottadan* (ஒட்டடன் - ottadan, Tam.). From (ottu, tam. to stick); from the rough hairy grain sticking to hands and clothes. One of the varieties of pishaunam [q.v.]. Six and half months. Tanjore.——*Paundy* (പാണ്ടി - pánti, Mal.). Means paundyan land, as introduced from tinnevelly. Five months. Malabar. Choora paundy means bad

small; Ora paundy means border; Tekkan paundy means south.——*Pedda kesary* (పెద్దకేసరి - peddakésari, Tel.). Means large kesary [q.v.] A principal paddy of Coromandel coast. Soil most suitable, red loam; ground prepared in december and january; ploughed in water; seed sown in december and january; treatment like pishaunam [q.v.]; full grown crop appears somewhat white, grows to 3½ or 4 feet; cut after four months; average price, 52 imperial seers for 1 rupee.——*Pishaunam* (పిశానము - pishánamu, Tel.; பிசானம் - pisánam, Tam.). From (pishanga, san. tawny); from color of husk. A principal paddy of Coromandel coast. Soil most suitable, black clay [calimunn]; ground prepared in august and september being ploughed in water; seed sown in july, august and september; sown broadcast; the crop requires careful watering while tender and has to be cleared of weeds; when the plant grows to a height of a foot free supply of water is required until the crop bears fruit; full grown crop looks white and bows down level to the ground when the ears are long and full; cut after six months; average price, 28 imperial seers for 1 rupee; generally consumed by well-to-do people. Pishaunam is generally a later crop, as caur [q.v.] is an earlier one; all varieties of pishaunam are finer, and all varieties of caur are coarser; pishaunam rice is white; it is principally grown in the deltaic tracts [conamoogam] of the pennair and the cauvery.——*Pishiny* (பிசினி - pisini, Tam.). From (pisin, tam. gum). This is raised with dry seed sowing [pooldy caul] on high level nunjah [q.v.] lands, and also in poonjah [q.v.] lands which have some moisture. No irrigation is required; like poonjah crops, moisture alone contributes to the growth. The out-turn is not great. Four months. Chingleput.——*Ponnauran* (പൊന്നാരൻ - ponnáran, Mal.). From (pon, mal. gold + ñáru, mal. seedling). Four months. Malabar.——*Poombaulay* (பூம்பாளை - púmbálai, Tam.). From (pú, tam. flower + pálai, tam. spathe); from color of grain. Eight months. Chingleput. This is cultivated in the fore shores of tanks and pools just previous to the rainy season; and even if water after rainfall stands to a height of a half or three fourths of yard, it shoots up higher than the level of the water and yields a good outturn.——*Potta* (പൊട്ട - potta, Mal.). Means high ground. So rice grown there. Four months. Malabar. Paddy dark.——*Potty kesary* (పొట్టికేసరి - pottikésari, Tel.). A short kesary. A principal paddy of Coromandel coast. Soil most suitable, red loam; ground prepared in january and february by ploughing in water; seed sown in january and february broadcast; treatment same as pishaunam [q.v.]; full grown crop appears somewhat white; grows to 3 feet; cut after three and half months; average price, 32 imperial seers for 1 rupee.——*Potty nullavary* (పొట్టినల్లవరి - pottinallavari, Tel.). A short nullavary [q.v.]. A principal paddy of Coromandel coast. Soil most suitable, red loam; ground prepared in december, january, february and march by ploughing in water; seed sown in december, january, february and march, broadcast; treatment like pishaunam [q.v.], but weeding is not particularly observed; grows to 2½ feet and appears somewhat black; cut after three months; average price, 36 imperial seers for 1 rupee; consumed by poor.——*Pulliyaul* (പള്ളിയാൽ - palliyál, Mal.). From (pallam, mal. low land + ñáru, mal. seedling). Three months. A Malabar rice. Quick growing; needs no water; land is ploughed two rounds in yedavam [mausam] or may and soil pulverized; in mitoonam or june again ploughed and harrowed; in carcatacam or july the process is repeated and manure applied; seedlings [nautt] are then planted; crop cut in cunny or september. Cheroo pulliyaul is a small variety.——*Quail-necked paddy* (காடைக்கழுத்தன் - kádaikkazhuttan, Tam.). Southern districts; cultivation wet; ground prepared in poorataushy [mausam] or september by ploughing five or six times and richly manuring [yeroo]; seedlings [nautt] transplanted in arpisy or october; requires regular watering for the first three months; cut after five months; average price 20 measures per rupee [canday caloottan].——*Rama baunam* (രാമബാണം - rámabánam, Mal.). From (ráma, san. the hero + bána, san. arrow); arrow-headed grain. Five months. Malabar.——*Sanna biyyam* (సన్నబియ్యము - sannabiyyamu, Tel.). From (sanna, tel. fine + biyyamu, tel. rice). Anantapore, Bellary and N. arcot. Capila sannabiyyam means brown; Garica sannabiyyam means bent grass, cynodon dactylon, pers., from stalks; Poolla sannabiyyam means whitish or reddish; Tella sannabiyyam means white.——*Sanna raushy* (సన్నరాశి - sannaráshi, Tel.). From (sanna, tel. fine + ráshi, tel. kind). Four months. Kurnool.——*Sannauloo* (సన్నాలు - sannálu, Tel.). Means fine grains. A Vizagapatam paddy. Caushy sannauloo means benares; Eetey sannauloo means lance, as fine as lance point; Gutty sannauloo means solid, from hard rice; Jaltaur sannauloo means gold lace, from color and fineness; Vanka sannauloo means curved, from grain; Yerra sannauloo means red, from color of grain.——*Sannavary* (సన్నవరి - sannavari, Tel.). From (sanna, tel. fine + vari, tel. paddy). A principal paddy of Coromandel coast. Cultivated in clay soil [calimunn]; ground prepared in shrauvanam [mausam] or august and bhaudrapadam or september; ploughing the soil and levelling by harrow [goontaca]; seed sown in shrauvanam or august and bhaudrapadam or september; no nursery; sown broadcast; usual watering and weeding; full-grown crop 2 feet high; cut after six months; average price, 28 imperial seers for one rupee.——*Sarooloo* (సరులు - sarulu, Tel.). Means garland. A Vizagapatam paddy. Auk sarooloo means seedling; Canaka sarooloo means gold, from appearance of ears; Mootakauk sarooloo means coarse; Mootya sarooloo means pearl, from roundness of rice; Raja sarooloo means king, coarse; Ratna sarooloo means precious stone, fine; Sannauk sarooloo means fine; Vankauk sarooloo means curved.——*Shirmany* (சிறுமணி - shirumani, Tam.). Means small grain. Six months.——*Shiva's neclace* (ஈசுரக்கோவை - ísurakkóvai, Tam.). From brown rice. Five to eight months.——*Shoornay vellay* (சுருணைவெள்ளை - shurunaivellai, Tam.). From (shurul, tam. to curl + vellai, tam. white). A rare paddy on dry land. Coimbatore.——*Shumbah* (సాంబావు - sambávu, Tel.; ചമ്പാൻ - champán, Mal.; சம்பா - shambá, Tam.). From (chempu, mal. copper); from color of grain. Four to six months. Superior kind of rice sown about July. Especially in Nellore, two Arcots, Chingleput, Tinnevelly, Madura, Coimbatore, and Malabar. Paddy white and rice red. The following are some of the different kinds :—Annadauna means cooked rice + gift, three to five months; Anna means food, good for food, five months; Aroopathaum means sixty days; Aunacomban means elephant tusk, from white and long rice, five months; Avaurampoo means cassia auriculata, linn. + flower, otherwise called gowry shumbah or red shumbah, five months; Bengal is imported seed; Calavan means mixed, six months; Calinga named from the country, four to six months; Camoogamboo means areca catechu, linn. + flower; from grains smelling like areca flowers; Caroom means dark; Cauday means quail; Caulaun means fungus, from smell; Caur means dark; Chinna means small, four months; Chinna bhogam means small and good; Choppoo, from (chukappu, mal. red), means red, eight months; Codan from (kódai, tam. hot season), means summer shumbah, cultivated in beginning of cultivation year, five months; Cooncooma means saffron, crocus sativus, linn., from color of grains; Coondrimany means retty seeds, abrus precatorius, linn.; Cooroom means short; Coothiray vauly means horse-tail, from appearance of ears; Coray means rush; Custoory means musk, two months; Cutty means lump, four months; Devaroyan from the ruler; Eerk from the rib of palm-leaf, grain long and slender, five months; Garica means bent grass, cynodon dactylon, pers., from stalks; Garoodan means brahminy-kite, from color of brahminy kite, red and yellow and rice white, five months; Goondoo means round, six months; Irpapoo means bassia longifolia, linn. + flower, from smell, five months; Jeeraca means seed of cuminum cyminum, linn., from size and fragrance, five to six months; Madhoora means sweet, seven months; Many means jewel; Milagoo means pepper, piper nigrum, linn., from appearance, six to seven months; Moottoo means pearl, paddy and rice grey, five months; Moplah meaning son-in-law, as being superior; Mullicay means jasmine, jasminum sambac, ait.; Mye means jet-black; Neela means black, six months; Oonda means ball, five months; Oosy means needle, from slender grain; Panamaram means palmyra, borassus flabelliformis, linn., three months; Paul meaning milky; Pedda means large; Periya means large, seven months; Poola means flowery; Poombaulay meaning flower spathe, from color of grain; Poonoogoo means civet, from smell; Sanna means small; Shaday means bushy, from appearance of ears, devaroyen first introduced it, four to seven months; Shem means red; Shem paulay means red palm flower spathe, from color of grain, four to five months; Shem pavala means red coral, from color of grain; Shirmany means small grain; Shiroo cooroombay means small + tender cocoanut or palmyra fruit, from fineness and color of grain; Tady means thick, eight months; Tirvarungam from (tiru, tam. sacred + arangam, tam. island), after shreerungam, six and a half to seven months; Totta means garden; Valiya means large, five months; Vauda means ship or originally imported; five months [paddy]; see below, separate title.——*Sookhdas* (سکھداس - sukhdás, Hind.). From (sukha, san. comfort + dá, san. to give). Also known as Irpa poo shumbah, from fragrance; used by Mahomedans in pilows [q.v.]. Five months. Superior.——*Tavala cunnan* (തവളക്കണ്ണൻ - tavalakkannan, Mal.). From (tavala, mal. frog + kannu, mal. eye). Four months. Malabar.——*Tekkan* (തെക്കൻ - tekkan, Mal.). Means southern. Four months. Malabar.——*Tillay* (தில்லை - tillai, Tam.). Means chidambaram. Six and half months. Tanjore.——*Tirvarungam* (திருவரங்கம் - tiruvarangam, Tam.). From Shreerungam originally. A principal paddy of southern districts. Soil most suitable, red loam; ground prepared in july and august; by ploughing the ground in water; seed sown in july and august; sown broadcast; carefully watered while plant is tender and weeds removed; after the plant grows to the height of a foot and a half, free supply of water is necessary until the crop is about to be reaped; full-grown crop has reddish appearance and grows to about 5 feet; cut after six and a half or seven months; average price, 30 imperial seers for 1 rupee.——*Tooyamully* (துய்யமல்லி - tuyyamalli, Tam.). From (tuyya, tam. pure + malli, tam. jasmine, jasminum sambac, ait.); from clear white grain. Four to six months. Coimbatore and Salem.——*Vankey biyyam* (వంకెబియ్యము - vankebiyyamu, Tel.). From (vanke, tel. hook + biyyamu, tel. rice). Four months. Kurnool.——*Vary*

shumbah (வரிசம்பா - varisambá, Tam.). From stripes or spots on paddy. A principal crop of southern districts. Cultivated in red or black loam; ground prepared at end of pungoony [mausam] or march and beginning of chittray or april; ploughed seven times and manured richly; seed sown at end of chittray or april; nursery sometimes used, sometimes not; no water is used till end of veiyaushy or may then fields are watered regularly and weeded once a month for three months from auny or june; full-grown crop about 3 feet high and of dim white color; cut after five months; average price, 20 measures per rupee.——*Vauda sannavary* (వాడసన్నవరి - vádasannavari, Tel.). From (váda, tel. ship + sannavari, tel. kind of paddy). Five to six months.——*Vauda shumbah* (வாடைசம்பா - vádaisambá, Tam.). Means ship shumbah. Otherwise calinga shumbah, from place whence introduced. A principal paddy of southern districts. Soil most suitable, regar [q.v.] sand [manal]; ground prepared in august and september by ploughing dry [gaddavary, pooldycaul, veligada]; seed sown in august and september; sown broad-cast; the same treatment as sannavary [q.v.]; full grown crop is 1 foot high and looks white; cut after five months; average price, 30 imperial seers for 1 rupee.——*Vaulaun* (வாலான் - válán, Tam.). From (vál, tam. tail); long-tailed grain.——*Velivary* (వెలివరి - velivari, Tel.). From (veli, contraction for veligada, tel. dry cultivation + vari, tel. paddy). Four months. Dry paddy cultivated to a very slight extent along different parts of the coast in low-lying land of the Nellore district. The land is manured [yeroo] and ploughed up two or three times, then twice more with the gorroo [q.v.], and a third time drilling the seed, and all is covered in. The seed is sown in August or early in September, and the crop harvested during December.——*Vellary* (വെള്ളരി - vellari, Mal.). From (vella, mal. white + ari, mal. rice). Four months. Malabar.——*Vellay* (வெள்ளை - vellai, Tam.). Meaning whiteness. Six months. Tinnevelly.——*Vellayauttan* (വെള്ളയാത്തൻ - vellayáttan, Mal.). From (vella, mal. white + akam, mal. inside). Five months. Malabar.——*Vellay milagy* (வெள்ளைமிளகி - vellaimilagi, Tam.). From (vellai, tam. white + milagu, tam. pepper, piper nigrum, linn.). White round grain.——*Yauradam* (యేరాడాలు - yáradálu, Tel.). From (eru, tel. to pick). Choice paddy.——*Yerra bakka* (ఎఱ్ఱబక్క - errabakka, Tel.). From (erra, tel. red + bakka, tel. lean). Four months. Kurnool.——(3) *Paddy bird* (बक - baka, san.). See sep. title.——*Paddy-field grass* (ಗದ್ದೆಮಡುವಿನಹುಲ್ಲು - gaddemaduvinahullu, Can.; దాస - dúsa, Tel.; தினை - tinai, Tam.). Can. from (gadde, can. paddy field + maduvu, can. hollow in a river + hullu, can. grass). Tam. from (tin, tam. to eat). Botanically Panicum [priyangoo] fluitans, retz., graminaceæ [vricsham, 156]. Clums 2–3 feet, creeping at the base; leaves long and smooth; mouths of the sheaths bearded and sub-ciliate; spike compound, partial ones alternate, adpressed; spikelets bifarious, elliptic; lower glume very short and truncated, upper obovate, rounded, a little shorter than the paleæ; lower flower neuter, one-valved; seed elliptic, acute, minutely wrinkled; moist rich soil; especially along banks of streams, ditches and edges of paddy fields.

PADDY BIRD (बक - baka, *San.*). Title from frequenting rice fields [paddy]. San. from (vak, san. to go crookedly). Ardeidæ family, cultirostres, grallatores, aves [pacshy, 46], of naturalists [jantoo]. Herons. Bill typically more slender than in storks [adjutant bird], very sharp, deeply cleft; legs long, scutellated; toes long, slender; outer toe only joined by web to middle one; hind toe long, on same plane as others; middle toe with inner edge of the claw dilated and pectinated; nostrils narrow, at basal extremity of a long furrow. Vary in size from that of stork [adjutant bird] to a rail [krishaungy]; most typical have long legs, long neck, and a considerable portion of tibia bare. For the most part solitary when feeding, but many roost together; habitually breed in society, majority on trees, a few among thick reeds. Eggs are from four to six in number, very pale blue or greenish. Young are helpless, and are fed by their parents till nearly full-grown. Sexes are alike or nearly so, the female being generally smaller, and with shorter crests or plumes. Usually watch for their prey, moving slowly about; and when unsuccessful, flying off to a fresh bit of water. They feed chiefly on fish [matsyam], crabs [nundoo], frogs [bhaicam]; a few on insects [poochy], which they seek for on land, among cattle [maud]. They rarely run; fly with ease, though not very fast. All have remarkable patches of dense down on breast and groins; these abound in a greasy powder which is secreted by the down, or rather consists of the abortive quill-shafts broken up; latter is used to render the feathers impervious to water, supplying the place partly of the oil-glands of other birds. The species best known to the natives are shown below.——*Black bill heron* (کلچیا - kilchiyá, Hind.; నల్లముక్కుకొంగ - nallamukkukonga, Tel.). Tel. from (nalla, tel. black + mukku, tel. bill + konga, tel. crane). Hind. also (kirchiyabaglá). Title otherwise Little egret. Herodias garzetta, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46] of naturalists. Alias Ardea orientalis; Herodias immaculata.——*Black heron* (کالا بگلا - kálábaglá, Hind. and Dec.). Hind. from (kálá, hind. black + baglá, hind. heron). Hind. also (nolbaglá). Title otherwise Black bittern. Ardetta flavicollis, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46], of naturalists. Alias Ardetta nigra, picta. Comes out to feed about sunset, and has low deep booming call, like the sound of a small drum [paray].——*Blind heron* (اندھا بگلا - andhábaglá, Hind. and Dec.; గుడ్డికొంగ - guddikonga, Tel.; കൊക്ക - kokka, Mal.; நொள்ளைமடையன் - nollaimadaiyan, Tam.). Title from oblique vision. Hind. from (andhá, hind. blind + baglá, hind. heron). Tel. from (guddi, tel. blind + konga, tel. crane). Mal. from (kottu, mal. to peck). Tam. from (nollai, tam. blindness + madaiyan, tam. fool). Hind. also (kánábaglá), meaning squint-eyed heron; (konchbaglá), meaning curlew heron. Tel. also (ralpuchake) from gond. Mal. also (koççа); (kuriyan). Tam. also (nárai), meaning grey. Title otherwise Madras paddy-bird, Pond heron. Ardeola leucoptera, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46], of naturalists. Alias Ardea leucoptera, malaccensis. Adult in full breeding plumage has head crested, with long occipital white plumes; head and neck greyish yellow; back with feathers decomposed, dark maroon; wings, rump and upper tail-coverts, tail, and all beneath white; bill blue at base, yellowish in middle and edges, black at tip; orbits greenish yellow; irides bright yellow; legs and feet dull green; length 18½ inches; non-breeding dress, head, neck and breast fulvous with brown stripes, darkest on head; upper plumage pale ashy brown, wings except uppermost tertials white, and lower parts from the breast white; thigh-coverts fulvous. Common in rice-fields, close in the wake of grazing cattle [maud].——*Blue heron* (کبود - kabúd, Hind.; నారాయణపక్షి - nárâyanapakshi, Tel.; നാരായണപക്ഷി - náráyanapakshi, Mal.; நாராயணன் - náráyanan, Tam.). Title from color of wings. Hind. from persian meaning blue. Tel. from (nára, san. water + ayana, san. abode + pakshi, san. bird); from being an aquatic bird and of blue color. Mal. like teloogoo. Tam. similar. Hind. also (sádákanka), meaning white + heron. Beng. also (anjan). Ardea cinerea, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46], of naturalists. Alias Ardea brag. Back and wings fine bluish-grey. A favourite quarry for the Bheiry [q.v.].——*Cattle heron* (گائی بگلا - gáibaglá, Hind.; స్వాతికొంగ - svátikonga, Tel.). Title from following cattle. Hind. from (gái, hind. cow + baglá, hind. heron). Tel. from (sváti, contraction for svátikárte, tel. a part of the rainy season + konga, tel. crane), from its appearance at that time. Hind. also (surkhiyábaglá), meaning red heron; (doriyábaglá), meaning striped heron. Title otherwise Cattle egret. Buphus coromandus, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46], of naturalists. Alias Ardea affinis, bubulcus, caboga, russata. In summer dress, whole head crested, neck and breast, rich golden buff, except chin and narrow median line on neck; dorsal plumes of the same hue, filamentose and decomposed, 8 or 9 inches long; elongated feathers of breast white at base, yellow at tip; rest of plumage pure white. Bill deep orange yellow; orbital region yellowish pink; irides pale yellow; legs whitish green on tibia and below knee; rest of tarsus blackish green, with a reddish tinge on toes, which are greenish beneath. Length 21 inches. In non-breeding dress plumage is entirely white. Attends cattle [maud] whilst grazing, picks up grasshoppers [tattoo kily] and larvæ disturbed by them.——*Green heron* (کانچ بگلا - kánchbaglá, Hind; هرا بگلا - harábaglá, Dec.; దోషికొంగ - dósikonga, Tel.; தோஷிக்கொக்கு - tósikkokku, Tam.). Title from color of wings. Hind. from (kánch, hind. glass + baglá, hind. heron). Dec. from (hará, hind. green + baglá, hind. heron). Tel. from (dóshí, san. wicked person + konga, tel. crane) [red heron]. Tam. from (dóshí, san. wicked + kokku, tam. stork). Hind. also (kánábaglá), meaning blind heron. Butorides javanica, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46], of naturalists. Feathers of back dull green, upper tail-coverts greenish; wing-coverts glossy green; legs pale yellow green, soles dark yellow; affects nullahs [q.v.] perching on boughs overhanging water.——*Night heron* (واک - wák, Ar., Pers., Hind. and Dec.; చింటొక్కు - chintokku, Tel.). Title from appearing after sunset. Ar. from its cry. Nycticorax griseus, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46], of naturalists. During day it roosts in groves, issuing forth after sunset; cry wak-wak.——*Pariah heron* (ڈھیربگلا - dherbaglá, Hind.; ಬಗಲ - bagala, Can.; మాలకొంగ - málakonga, Tel.). Hind. from (dher, hind. pariah + baglá, hind. heron). Tel. from (mála, tel. pariah + konga, tel. crane). Hind. also (turrabaglá), meaning tufted heron; (malangbaglá), meaning mendicant heron. Tel. also (peddatellakonga), meaning large + white + crane. Title otherwise Bengal paddy bird, Large egret. Herodias alba, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46], of naturalists. Alias Ardea flavirostris, egretta, modesta, syrmatophorus, torra. Plumage pure white; roosting on trees.——*Red heron* (لال بگلا - lálbaglá, Hind. and Dec.; ಬಕ - baka, Can.; దోశికొంగ - dósikonga, Tel.). Title from color. Hind. from (lál, hind. red + baglá, hind. heron). Tel. from (dóshí, san. wicked person + konga, tel. crane) [green heron]. Beng. also (khyribogla.) Title otherwise Chestnut bittern. Ardetta cinnamomea, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46], of naturalists.——*Snake heron* (ناری - nárí, Hind.; పాములనారిగాడు - pámulanárigádu, Tel.). Title from habit of protruding its head and long neck above grass. Tel. from (pámu, tel. snake + nárigádu, tel. proper name). Hind. also (lálkanka), meaning

red heron. Ardea purpurea, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46], of naturalists. Frequenting marshes. Rises with loud harsh cry, which it repeats as it flies along.——*Yellow heron* (جن بگلا - jinnbaglá, Hind.). Title from color. Hind. from (jinn, ar. a spirit + baglá, hind. heron). Hind. also (katbaglá), meaning wood heron. Ardetta sinensis, ardeidæ [paddy bird], cultirostres, grallatores [pacshy, 46], of naturalists. Alias Ardetta lepida, nebulosa.

PADOO (படு - padu, *Tam.*). To make, form; to fall, sink, die; to lie; to strike.——*Pada* (പട - pata, Mal.). From (padu, tam. to strike). War [paday].——*Padacootam* (പടക്കൂട്ടം - patakkúttam, Mal.). From (pata, mal. war + kúttam, mal. assembly). An assembly for war.——*Padaiyautchy* (படையாட்சி - padaiyáççi, tam.). From (padai, tam. ploughshare + ádchi, tam. rule). One of the higher divisions of the Pully [q.v.] caste. Employed in former times as soldiers. Some of them style themselves Naicks [q.v.]. They are now mostly cultivators. Numbers about 400,000; mostly in Tanjore and Trichinopoly [jauty].——*Padamara* (పడమర - padamara, Tel.). From (padu, tel. to fall, sink). Means west [padinyaur]. Prefix in place names; as Padamaty cumbum, meaning west cumbum.——*Padappam* (படப்பம் - padappam, Tam.). A populous centre, town surrounded by villages.——*Padavaid* (படவேடு - padavédu, Tam.). From (padai, tam. army + vídu, tel. town). Tam. also (nandapadavédu), meaning nundan, local ruler + place of that name. Village; North arcot dist.; Polore tal.; pop. 654; acres 11,899; lat. 12° 40′; long. 79° 09′; from Chittore S. 39 miles; from Polore N. 11 miles. Now almost deserted. Traditional capital of the Coorumba [q.v.] dynasty. Old city 16 miles in circumference. Shandavausal where fair was held and Pooshpagherry site of the flower market are 4 miles apart. Believed to have been entombed by a shower of dust and stones. Jungle has overgrown the whole ancient area. Two extensive ruined forts upon the plain built by Coorumbar. Another fort upon peak of Jawaudies overlooks city. Two temples, one to Renoocaumbaul, other to Ramasawmy. The destruction of this great city is ascribed to the curse of Hanooman [q.v.] when Ravanan [q.v.] was protected by the goddess of the place. A pool of water is called Rama teertam. The place is called Nunda padavaid after the Chola nundan [q.v.], son of Oottoonga rajah, who after the conquest of the Coorumbar [q.v.] by the Cholans [q.v.] was placed in Padavaid as ruler.——*Padaveed* (പടവീട് - patavítu, Mal.; படைவீடு - padaivídu, Tam.). From (pada, tam. army + vídu, tam. house). Soldiers' quarters; arsenal [magazine].——*Paday* (படை - padai, Tam.). From (padu, tam. to strike). Army [pada]. Also plough-share [caur].——*Padinyaur* (പടിഞ്ഞാറ് - patiññáru, Mal.). From (patu, mal. to sink + ñáyar, mal. sun). West [padamara]. Prefix in place names; as Padinyaurattara, meaning western village.——*Padinyaura covilagam* (പടിഞ്ഞാറ കോവിലകം - patiññárakóvilakam, Mal.). From (patiññár, mal. west + kóvilakam, mal. palace). Residence of the last junior rajah of Calicut [covilagam, zamorin]. See vol. I, 53.——*Padiyalandone* (படியளந்தோன் - padiyalandón, Tam.). From (padi, tam. step + alandón, tam. one who measured); from vishnoo as vaumanan having measured the three worlds [locam] by three steps. Vishnoo [trivicraman, vaumanan].——*Padoogay* (படுகை - padugai, Tam.). Land in the bed or on the banks of a river [aur] especially fit for rice [q.v.] cultivation. Ward of a town.——*Pady* (படி - padi, Tam.). From (padu, tam. to form). Step [padam].——*Paliport* (പള്ളിപ്പുറം - pallippuram, Mal.). From (palli, mal. church + puram, mal. outside); the village beyond the church. Mal. also (munambam), meaning point. Village, Port; Cochin state, Cochin tal.; pop. 1,283; lat. 10° 9′ N.; long. 76° 14′ E.; from Bombay S.E. 637 miles; from Cranganore S.S.W. 3 miles; from Ernacolum N.W. 12 miles; from Naracal N. 8 miles; from Cochin N.N.W. 13 miles. On Malabar coast. The seaport of Cranganore. Off this place is a mud-bank similar to those of Naracal and Alleppey. Chief place of a tract of country held in 1863 by an Englishman from the Travancore government. At one time property of Dutch. On a large island in the lake.——*Patla* (పట్ల - patla, Tel.). From (pattu, tel. to hold); holding. Place. Plural locative form. Suffix in place names; as Baupatla, meaning bramin's place.——*Patnaick* (പടനായക്കൻ - patanáyakkan, Mal.). From (pata, mal. army + náyakkan, mal. leader). Military officer in ancient Keralam [q.v.].——*Paud* (പാട - pátu, Mal.). From (petu, mal. to fall, lie). Situation. Rank of princes [padam].——*Paud* (పాడు - pádu, Tel.; പാട് - pátu, Mal.; பாடு - pádu, Tam.). From (padu, tam. to kill). Literally waste [haul, paul]. Village. Suffix in place names; as Calasapaud, meaning village of the waterpots.——*Paudair* (పాడేరు - páderu, Tel.). From (pádu, tel. waste + éru, tel. river).—"*a*" Division; Vizagapatam district; language partly Teloogoo and partly Khond; Boundaries:—E. Pottinghy division, S. Veeravilly and Golcondah division, W. Golcondah division, N. Mulkangherry division; physical aspect mountainous and rugged; soil fertile to some extent; agriculture is the chief industry; commerce, hill products, saffron [country saffron], tamarind [q.v.], piplee [long pepper], soap-nut [q.v.], myrobalans [q.v.], wax [mom], honey [shahad]. No irrigation.—"*b*" Deputy tahsildarry; Vizagapatam district. Pay Rs. 120.—"*c*" Village, Deputy tahsildar's station; Vizagapatam dist., Madgole zemindarry, Paudair magisterial division; lat. 18° 05′; long. 82° 42′; from Coraputt S. 48 miles; from Jeypore S.S.E. 52 miles; from Madras N.N.E. 370 miles; from Narsapatam N. 28 miles; from Parvatipore S.W. 68 miles; from Vizagapatam N.W. 48 miles; from Vizianagram W. 48 miles.——*Paudy* (പാടി - páti, Mal.; பாடி - pádi, Tam.). Village in a jungle tract [baudy, paud].——*Pauttom* (പാട്ടം - páttam, Mal.). See sep. title.——*Pulla* (பள்ள - palla, obl., Tam.). From (pallam, tam. low land). The corresponding terms are:—Tel. pully, Can. holeya, Mal. poolayan. A low caste employed in the cultivation of wet lands [nunjah], most commonly under the Vellaular [q.v.]. They are much upon the same footing as the Pariah [q.v.], but hold themselves superior to him, as they abstain from eating the flesh of the cow [pashoo]. They are the lowest of the right-hand caste [valangay]. They bury their dead [shavacaud] and have poojarries [q.v.] of their own castes. Their widows freely remarry. Divorces are common. They profess to be worshippers of Shiva [q.v.] or of Vishnoo [q.v.], but demon-worship is their real religion. Pullar are peculiar to the districts on the east coast south of the Coleroon. There is a Tamul proverb:—நெல்லு வகை எண்ணினும் பள்ள வகை எண்ணக்கூடாது—" though one may enumerate the various kinds of "rice [paddy], he cannot enumerate the varieties of the pulla "caste [jauty, pully]." See vol. I (35), (68); II, 226.——*Pullacherry* (பள்ளச்சேரி - pallaççéri, Tam.). Pully village [parcherry].——*Pulladam* (பல்லடம் - palladam, Tam.). See sep. title.——*Pullam* (పల్లము - pallamu, Tel.; പള്ളം - pallam, Mal.; பள்ளம் - pallam, Tam.). From (padu, tel. to fall). Low-lying ground.——*Pullava* (पल्लव - pallava, San.). From (pallam, tam. low land); people of the low-lying rice fields. The dynasty [raj] ruled at Conjeeveram from the 5th to 9th century. They are said to be the constructors of the monolithic raths [q.v.] at the Seven pagodas [q.v.] and the Booddhist [booddha] tope [q.v.] at Amravatty. Device a tiger [pooly]. Overthrown by Athonday [q.v.], the Chola [q.v.] king, who annexed the whole of their territories [charitram]. See vol. I (129).——*Pullavamulla* (पल्लवमल्ल - pallavamalla, San.). From (pallava, san. proper name + malla, san. wrestler). A Pullava king. See vol. I (130).——*Pullava rajah* (பல்லவராசா - pallavarásá, Tam.). One of the thirty-two gotrams [q.v.] of the true tamul-speaking Vellaular [q.v.] of Madura, Tanjore and Arcot. The name is borne as a title by the Chola vellaular inhabiting the valley of the Cauvery in Tanjore, who lay claim to the first rank; they found their claim to the title on the assertion that all their women are of royal race. The Tondiman [q.v.] of Poodoocottah, chief of the Culla [q.v.] tribe, has the title.——*Pullavaram* (பல்லாவரம் - pallávaram* Tam.). From (pallava, san. the dynasty + pura, san. city). Sanscrit name (pallavapura), meaning pullava city.—"*a*" Zemindarry; Chingleput dist., Sydapett tal.; pop. 1,597; acres 2,322; lat. 12° 58′; long. 80° 14′. Peshcush Rs. 1,430.—"*b*" Town, Cantonment, Railway station; Chingleput dist., Sydapett tal.; pop. 3,956; acres 902; lat. 12° 59′; long. 80° 13′; height 74 R.S.; from Sydapett S.W. 5 miles; from St. Thomas' mount S. 3 miles; from the sea W. 8 miles. Formerly known as Presidency cantonment, native troops being stationed for garrisoning Presidency town. The lines were constructed for four regiments. Now a European pensioners' depôt. As a range of hills stand between the sea and the station, the temperature is high. The place is however healthy and the water is good and abundant. There is a bungalow [q.v.] on each of the two peaks of the range, the height of which is between 400 and 500 feet. In the neighbourhood is the Puncha pandava mullay which contains ancient remains. The foot of the hill contains mud pots and troughs being sarchophaguses of Pullavas [q.v.] or other ancient native tribes.——*Pullicondah* (பள்ளிக்கொண்டை - pallikkondai, Tam.). From (palli, tam. member of the caste + konda, tel. hill). Sanscrit name (ádiranga), means the first rungasawmy. Town; North arcot dist., Vellore tal.; pop. 2,814; acres 525; lat. 12° 55′; long. 78° 59′; height 2,187 feet; from Chittore S.S.W. 24 miles; from Vellore W. 13 miles. On southern bank of Palaur, opposite confluence with Goodiyattam river. Upon southern side rises a granite [caroomcull] hill Beejauchellam. Head-quarters of the old Vellore talook. Temple of Runganaicksawmy. The idol is Runganautan, a name applied also to deities of Tirpaucadal or Madhyarungam and Shreerungam or Antyarungam. Of the three Pullicondah the most ancient, Shreerungam the most modern. Bramhotsavam [pundigay, 6a] festival about May. In January the god circumambulates the hill. Two birds are fed with rice [q.v.] and ghee [q.v.]. If both eat greedily famine comes. If both eat moderately year flourishing. If only one eats, bad days. A free-standing dolmen [coday cull] with no subterranean or kistvaen [paundicoozhy] character, surrounded by a double ring of stones. Trade in hands of Lubbays [q.v.]. Manufacture of gunny [q.v.] and coray [q.v.] mats [boriyah]. Keikkilar [q.v.] weave rough cloths.——*Pullicootam* (പള്ളിക്കൂടം - pallikkútam, Mal.). From (palli, mal. village + kúttam, mal. assembly). A village

school [pyall].——*Pulliyaul* (പള്ളിയാൽ - palliyál, Mal.). From (pallam, mal. lowland + ñáru, mal. seedling). A Malabar rice. Quick growing; needs no water; sown in April; two crops annually. Cheroopulliyaul is a small variety [paddy].——*Pully* (پلی - pallí, Hind.; పల్లె - palli, Tel.; പള്ളി - palli, Mal.; பள்ளி - palli, Tam.). From (pallam, tam. low land).—"*a*" Agricultural village. Suffix in place names [hully, milly, villy]. Also public building, palace.—"*b*" A tribe synonymous with Vunniyan [q.v.]; similar to the Pullar [q.v.], but more especially occupying the country districts. They are properly called Vanapully, and to be distinguished from the Meenpully who are fishermen. They eat animal food and drink spirituous liquors. Their women continue marriageable after the age of puberty. They cannot be divorced for any cause except adultery. The men are allowed a plurality of wives. They bury their dead [shavacaud]. They have no gooroo [q.v.], but the Punchaungy [q.v.] acts as their poorohit [q.v.] at births, marriages, and other celebrations. They wear the mark of Vishnoo's sect [naumam], and sometimes pray to Vencatramanan, but the proper god of the caste is Dharma rajah, who is worshipped by offerings of fruit, flowers, &c. They have temples of this god attended by poojarries [q.v.] of their own caste. They also worship the Shacties [q.v.] or destructive powers, and endeavour to avert their wrath by bloody sacrifices [baly, yanyam]. Deities of this sort worshipped by them are Mootyaulamman, Mauriyamman, and Poolauriyamman. They have hereditary chiefs called Yejmauns, who settle disputes with the assistance of an assembly of the people, when such matters are referred to them by the persons interested. The Pullies have many sub-divisions, none of which intermarry with each other, but all can eat in common. Numbers about a million and a quarter, mostly in southern Tamul districts. See vol. I (129); II, 230.——*Pulmanair* (பல்லமனேரி - pallamanéri, Tam.). See sep. title.——*Putcut* (పట్టుకట్టు - pattukattu, Tel.; பத்துக்கட்டு - pattukkattu, Tam.). From (pattu, tam. to hold + kattu, tam. to bind). A ryot's [q.v.] usual holding.——*Putnool* (பட்டுநூற்காரன் - pattunúrgáran, Tam.). From (pattu, tam. silk + núl, tam. thread + kára, san. doer). Tel. is Puttsauley. People that work in silk [puttoo], supposed to have come from places adjoining Surat near Bombay. They speak a Goozeratty [q.v.] dialect, often called here the Putnool language. They have settled in Tripatty, Arnee, Vellore, Trichinopoly, Combaconum, Tanjore, Madura, and other large towns. They are called Chetties [q.v.] or merchants by tamuls, presumably because they themselves retail the cloths which they weave without the intervention of middlemen. They have a fair skin and expressive features, and their women are beautiful but do not bear a very reputable character. They wear thread [poonool]. They never intermarry except in their own community. They profess to abstain from animal food. They rank among the higher castes. They acknowledge priests from among themselves as well as from among bramins. In religion they are divided into Smartas [q.v.], Veishnavites [q.v.], and Vyaupauries [q.v.], some among the Smartas being Lingayets [q.v.]. Those who can write employ the teloogoo characters in writing their language. The Putnoolcaurar were induced to settle in Madura by one of the earlier Naick [q.v.] kings. The Putnoolcaurar make cloth of a very rich, strong fabric, also turbans [q.v.] of a thin fabric of cotton [q.v.], and silk [puttoo]; also thin white muslins [q.v.] with silk borders; also plain green and colored striped muslins with silk borders. Numbers about 80,000 [jauty]. See vol. I (66); II, 230.——*Putt* (పట్టు - pattu, Tel.; പട്ടു - pattu, Mal.; பட்டு - pattu, Tam.). Tel. from (pattu, tel. to hold). Village. Suffix in placs names [putty].——*Puttaday* (பட்டடை - pattadai, Tam.). From (padu, tam. to lie + adai, tam. resort). A mechanic's shop [caurgah, panipoora].——*Puttay* (பட்டை - pattai, Tam.). From (padu, tam. to lie); layer. Anything flat and broad. Bark; one of the Dravidian terms for plant products added to the word-root [vricsham].——*Putticaud* (பட்டிக்காடு - pattikkádu, Tam.). From (patti, tam. cattle-fold + kádu, tam. forest). Scattered hamlet.——*Puttimaud* (பட்டிமாடு - pattimádu, Tam.). From (patti, tam. cattle-pen + mádu, tam. bull or cow). Stray cattle [bandela, inam, putty].——*Puttoo* (कीटज - kítaja, San.; ریشم - resham, Hind.; ಪಟ್ಟೆ - patte, Can.; పట్టు - pattu, Tel.; പട്ടു - pattu, Mal; பட்டு - pattu, Tam.). San. from (kíta, san. worm + jan, san. to be born). Hind. from persian. Dravid. from (padu, to form a layer). Silk. Produced by two families of Lepidopterous caterpillars, Bombycidæ and Saturnidæ. The family Bombycidæ comprises four genera; Bombyx, Ocinera, Theoahila, Trilocha. The genus Bombyx includes six species, forming the domesticated silk-worm or the mulberry silk-worm. The only south indian species of this genus is the Bombyx mori, linn., or the common silk-worm. The other south indian representative of the Bombycidæ is the Trilocha varians, walker. The family of Saturnidæ comprises two south indian genera, the Actias and the Antheræa. The genus Actias contains the south indian species Actias selene, mcleay; the genus Antheræa contains the south indian species Antheræa perrottei, guer men., and Antheræa mylitta, drury, the tusser silk moth. Of all these silk-worms the best known are Bombyx mori, linn., and Antheræa mylitta, drury. The worms pass through four different stages, a period of five days intervening between each. These stages are called by the natives the first, second, third and fourth fevers, each one lasting for a day. At the first fever the worm turns red, and ten days after the last attack it turns white; after this second change it again turns red on the following day, upon which it begins to spin. When the cocoons [peelah] are gathered they are boiled for some time; they are then dried in the sun and again soaked in boiling water, after which they are reeled. The principal plants upon which the indigenous silkworms feed are as follows:—Anogeissus latifolia, vekkauly; Bombax malabaricum, red cotton tree; Careya arborea, hindostany slow match; Carissa carandas, carondah; Eugenia jambolana, common jaumoon; Ficus religiosa, peepul; Ficus retusa, chinese banyan; Lagerstrœmia indica, china privet; Lagerstrœmia parviflora, loose strife; Odina wodier, wodier; Ricinus communis, castor oil; Shorea robusta, common saul; Tectona grandis, teak; Terminalia arjuna, arjoon; Terminalia catappa, country almond; Terminalia tomentosa, var., typica, black murdah; Zizyphus jujuba, bair. The manufacture of colored silk stuffs was originally introduced into India from China. They are mentioned in the Ramayanam [q.v.]. νῆμα σηρικόν or silk thread was imported from China into Barugaza and the marts of the Tamul country according to the Periplus. Raw silk in the Tamul country comes now chiefly from Bombay, Bangalore, and Collegaul in the Coimbatore district. That imported from Bombay is China produce and the best; the others are indigenous. In reeling or winding, silk is classified according to fineness of the thread, the several descriptions being fine, thin, thick, rough. Silk not classified is called mottapiry. The refuse or rubbish called boochkah [q.v.] is used for carpet-making [jamkhana]. The first three are largely used. The rough is in requisition for use in the manufacture of female silk cloths. In dyeing, the colors in use are white, red, yellow, amber color, black, blue, green, crimson. The dyeing materials used are mostly vegetable, but metal dyes are used for black. All the colors may be called fast colors. The following are the articles used for each dye:—white, fuller's earth [dhoby's earth]; red, fuller's earth, saffron [country saffron], alum [padicauram] powder, stick-lac [q.v.]; yellow, milk hedge [q.v.] ashes, choonam [q.v.], capilapody [kamela] dye powder, alum [padicauram], fuller's earth [dhoby's earth], sesamum [gingelly] oil; amber color or nimilay, the same articles as for yellow; black, iron [auhan] dross or oxide of iron, gallnut [mauchicoy] powder, sulphate of iron [annabhaidy], castor [aumanac] oil; blue, the same as for red silk, and in addition indigo [q.v.] and gallnut [mauchicoy]; green, the same as for yellow, and in addition saffron, peels of pomegranate [anaur], and gallnut; crimson, alum, seeds called vishtoo, crimson seeds [shauyam]. Coloring requires much practical skill. It consists chiefly in boiling water to a certain degree and mixing the powder or solution of the articles and steeping the silk. Dyers combine with dyeing a trade either in dyed silk or in articles used for dyeing or weaving [nesavoo]. It is not lawful for Mussalmans [q.v.] to wear pure silk, but they can wear silk mixed with cotton [q.v.]. Silk-worm's nests are said to be medicinally tonic, used with electuaries. The cocoon is Peelah. Reeled silk is Putnool, which gives its name to a caste. The silkworm is Puttoopoochy. For jungle silk see Tusser.——*Puttoocottah* (பட்டுக்கோட்டை - pattukkóttai, Tam.). See sep. title.——*Putty* (பட்டி - patti, Tam.). From (padu, tam. to lie). Cattle or sheep fold; land sufficient for cattle [mand] or sheep [aud] fold; small area; small corn-field; share; salt pan; small village. Common suffix to village names. Towards the west pully or pulley, and in Canarese tracts hully or hutty.

PADOUK (महाकुटज - mahákutaja, *San.*; ಹನಿ - hani, *Can.*; ఎర్రవేగిస - erravégisa, *Tel.*). Title from burmese. San. from (mahá, san. great + kutaja, san. holarrhena antidysenterica, wall). Tel. from (erra, tel. red + végisa, tel. pterocarpus marsupium, rox.); from color of wood. Can. also (hane). Title otherwise Andaman redwood, Burmese kino, Burmese rosewood, Rangoon kino. Botanically Pterocarpus [vengay] indicus, willd., leguminosæ [vricsham, 48]. Alias Pterocarpus dalbergioides, wallichii. Tree; leaflets about nine, alternate, ovate or oval with a sudden bluntish acumination; panicles axillary; bracts subulate, caducous; petals long-clawed, curled and waved on the margins; stamens united into a sheath, split down on the upper side only, flowers yellow. A large timber tree [maram]; long waving branches and clusters of yellow flowers, fragrant; yields a kino [q.v.]. The wood is not unlike mahogany, but is more heavy, red and coarse grained; that of the root is highly variegated, closer-grained and darker-colored; used for furniture, and by the burmese to make their musical instruments; also employed for light field beams, cheeks, axle cases, poles, waggon perches, and framing, &c.

PADRE (பாதிரி - páthiri, *Tam.*). Portuguese for father. A missionary or clergyman [mishammah]. Distinguish from pauthiry [q.v.] tree.

PAGODA (بتکده - butkadah, *Hind.*). Title from (bhagavatí, san. durgá, the auspicious deity). Hind. from (but, pers. idol + kadah, pers. place).—"*a*" Anglo-indian for a native temple [coil], the first noticed by Portuguese having been on the W.

coast to that goddess. An old saying is that a village [oor] without a temple is unfit for human habitation, and so every considerable village has them dedicated either to Vishnoo [q.v.] or Shiva [q.v.]. There is a Tamul proverb :—கோயிலையும் குளத்தையும் அடுத்து இருக்கவேண்டும்—"one "should reside near a temple [coil] and a tank [q.v.]." There is another:—கோயில் இல்லா ஊரிலே குடியிருக்கலாமா—"may one dwell in a village in which there is no temple?" In many temples no service [poojah] is performed except on festival occasions [pundigay]. In the more wealthy temples daily service is kept up, a regular establishment being entertained as follows :—Acharries [q.v.] or local preceptors ; Poojarries [q.v.] or officiating priests ; Musicians [mailam], generally of the barber [mungala] caste ; Dancing girls [devadausy] ; Condicaud or sweeper and peon, who also supplies flowers for service. In a larger number of cases, especially in pagodas situated upon hills, weekly service is performed on Saturdays or Mondays, according as the deity is Vishnoo or Shiva. Idols [shilay, vigraham] as a rule face the east or towards the rising sun. In a few temples, said to have been built by Janamejayan, they face towards the west. Cf. the temples of Isis and Osiris in Egypt Hanooman [q.v.] as a rule faces to the south in commemoration of his expeditious journey to Lunka or Ceylon. There are besides, village goddesses [graumadevatay], who are generally worshipped at the outskirts of the villages under various names, Sooncoolamma, Yellamma, Gungammah, Ramoolamma. Tuesday and Friday are their favourite days, on which vows are performed and sheep [and] or fowls [moorghy] sacrificed. All classes of people worship the goddesses, but the Bramins [q.v.] and others who do not eat flesh make the animal offerings through Shoodras [q.v.]. Almost all temples are endowed with lands [devadauyam], grants [inam] of former rulers. They are registered in the name of the deity or the officiating priest or the attendant servant. Vishnoo [q.v.] is worshipped under a variety of names, and the idol is generally an image formed according to the particular legend [mahautmyam, stala pooraunam] applicable. Thus Chennakeshwarasawmy, besides the chuckram [q.v.] and chunk [q.v.] in his two upper hands, holds the gadah or club in his left hand and exhibits the palm of the right hand uplifted to the worshipper as a symbol of encouragement and hope. Shree vencataishan stretches his right hand downwards , a symbol of his adoring shiva [q.v.]. Vengopaul is represented as playing upon a flute like a shepherd boy [krishnan], with his left leg carried over the lower part of the right leg. In a few places sacred shalagrams [q.v.] are worshipped, while in others a simple stone with perpendicular marks representing Vishnoo's feet is worshipped by the name of Ramasawmy. Shiva [q.v.] is generally worshipped in the form of a lingam [q.v.] or stone, generally rounded at the top but in some cases unworked. In Shiva temples the service is performed by Jangams [q.v.] and Tambalas, but abhishaicam [q.v.] or ablutions [snaunam] with vedic muntrams [q.v.] are performed by bramins [q.v.] alone [matam]. Friar jordanus, the quilon bishop of the fourteenth century, has the following :—"in this greater india [q.v.] many "sacrifice themselves to idols in this way; when they are sick, "or involved in any grave mischance, they vow themselves to "the idol if they should happen to be delivered; then when they "have recovered, they fatten themselves for one or two years "continually eating and drinking fat things, &c.; and when "another festival comes round, they cover themselves with "flowers and perfumes, and crown themselves with white "garlands, and go singing and playing before the idol when it "is carried through the land, like the image of the virgin mary "[maryam] here among us at the rogation tides, and those men "who are sacrificing themselves to the idol carry a sword with "two handles, like those knives which are used in currying "leather [chamrah]; and after they have shown off a great deal, "they put the sword to the back of the neck, cutting strongly "with a vigorous exertion of both hands, and so cut off their "own heads before the idol." Barbosa says that the king of quilacare or coliacaud [calicut], a city near cape comorin [q.v.], after reigning twelve years, always sacrificed himself to an idol in this way [mahamagham]. See vol. I (78).—"*b*" Ancient gold coin not now current. So called on account of impression of temple thereon. $22\frac{1}{2}$ double fanams = 1 pagoda [naunyam, 2 a.e.f]. Approximate actual value, 1 pagoda = $3\frac{1}{2}$ rupees. In the tamul countries called star pagoda, the value being $3\frac{1}{2}$ rupees; in teloogoo countries called kurruck pagoda, the value being 4 rupees. Same as San. dharanam; Hind. hoon. Pagodas differ in shape from all european coins; they have a convex side with prominent dots, and a flat side, which generally bears a figure, and in some three figures, of native deities; pagodas of masulipatam and pondicherry have nothing on the convex side but the dots; tippoo's pagodas have no figures on the flat side, but a legend. As to the figures, three principal types are conspicuous; the standing figure of vishnoo [q.v.], with or without his two wives; the seated figure of doorga [q.v.]; the effigies of shiva [q.v.] and parvaty [q.v.] seated. Of the first type are :—the Star pagoda of the East india company so called from the star impressed on the granulated reverse; Porto novo pagoda, believed to have been first coined by the Portuguese at Porto novo or Farangipett, and at Arcot under the Nivayat [q.v.] nawaubs [q.v.] of the Carnatic [q.v.]; Kurruck [q.v.] pagoda of Wallajah, having the three standing figures strongly marked and a plain granulated reverse. As to the second type; Doorga pagodas constituted the bulk of those current in the Ceded districts [q.v.] at the time they were brought under British administration; they are known by the names of Doorga, Goorramcondah, Hurpanhully old and new, Chitaldroog, &c. The third class having the figure of Shiva and Parvaty, someties called Oomamaheshwara pagodas, were coined at Ikkairy and afterwards at Bednore; they were current chiefly in Mysore. Accounts at madras down to 1818 were kept in pagodas, fanams [q.v.], and cash [q.v.]; viz., 80 cash = 1 single fanam, 42 single fanams = 1 pagoda; in the year named the rupee [q.v.] was made the standard coin; the pagoda was then reckoned as equivalent to $3\frac{1}{2}$ rupees. The following are different kinds of pagoda coins :—Ahmedy from ahmed, one of prophet's alams [q.v.]; coimbatore coin, $23\frac{151}{1024}$ to 100 star pagodas; canara coin, $21\frac{7}{8}$ to 100 star pagodas; cuddapah coin, 23 and 15 fanams to 100 star pagodas. Anandrye; gold, issued by anandrye [q.v.] of travancore; 100 equal to 21·708 madras mohurs [q.v.] of 15 rupees each, or 92·857 star pagodas. Bahandry, called after hyder ally, gold struck at mysore being a substitute for the ikkairy; ordinarily 97 to 100 star pagodas; madura coin 92 and $11\frac{1}{4}$ cash to 100 star pagodas; malabar coin $84\frac{28}{33}$ or $92\frac{1}{3}$ to 100 star pagodas; canara coin, $87\frac{1}{2}$ to 100 star pagodas; coimbatore coin $92\frac{151}{256}$ to 100 star pagodas; bellary coin 92 and 36 fanams and 45 cash to 100 star pagodas; arcot coin $92\frac{16}{27}$ to 100 star pagodas; salem coin $91\frac{77}{103}$ to 100 star pagodas. Bangalore; gold; bellary coin 92 and 27 fanams and 52 cash to 100 star pagodas; cuddapah coin 94 and 5 fanams 50 cash to 100 star pagodas; salem coin $94\frac{2}{17}$ to 100 star pagodas. Canteroy, from king canteroy narsa; bellary and cuddapah, rs. 2-14-8 sub-divided into 10 fanams of $4\frac{2}{3}$ annas each [canteroy]. Cully, from one kaliyoog [q.v.] rajah of w. coast; rs. 2-12-0; contains 10 fanams, each of ·212 rupees or 3 annas $4\frac{3}{4}$ pies, and = 80 cash. Ferokhee, from (farrukhí, hind. auspicious); coimbatore coin, $92\frac{151}{256}$ to 100 star pagodas; salem coin, $91\frac{29}{32}$ to 100 star pagodas. Gajapaty, having impression of elephant [q.v.], struck by prataupa roodran [q.v.], of cuttack. Ganda perandam, impression of the fabulous bird [gandaperandam]. Ghutty, from (ghatti, can. solid), same value as bahaudry; s. canara. Haley ikkairy, old ikkairy, struck by shivaroya of ikkairy; as distinguished from hosa ikkairy by poorniah in 1800. Hurpanhully, bellary coin, old, 102 and 29 fanams and 43 cash to 100 star pagodas; new, 109 and 3 fanams and 60 cash to 100 star pagodas. Ikkairy, from the place near seringapatam; coimbatore coin, 93 to 100 star pagodas; salem coin, $92\frac{8}{11}$ to 100 star pagodas; about 4 rupees contained 13 gold fanams; no gold pagodas were before hyder struck by the mysore rulers themselves, they were issued by the local rajah of ikkairy; these were adopted by hyder ally under the name of the bahaudry pagoda; the latter was followed by the sultauny hoon [q.v.] of tippoo. Jemsherry, canara coin, $93\frac{1}{2}$ to 100 star pagodas; bellary, coin, 98 and 21 fanams and 7 cash to 100 star pagodas. Kurruck, from (karukku, tam. bas-relief); arcot coin $90\frac{10}{11}$ to 100 star pagodas. Lutchmy narrain, from the impression of the god vishnoo and his wife. Mitta, from (mitta, tel.) means high relief; nellore, guntoor and other former nawaub's districts = rs. 3-15-$7\frac{1}{3}$ or 100 to 385 arcot rupees; it was divided into 52 fanams and each fanam into 80 cash. Mysore, struck by hyder; figure on one side of lutchmy [q.v.] and narsimhan [q.v.]. New veeroye, malabar = 2-13-$8\frac{1}{2}$; divided into 10 fanams of 4·57 annas each, or $3\frac{1}{2}$ fanam = 1 rupee; the fanam divided into 40 cash. Oomamaheshwara, from (umámahéshvara, san. shiva and párvatí); struck by krishna deva royel of vijianugger. Porto novo, about $17\frac{1}{4}$ carats [q.v.], or ·720 fine; the exchange used to be 120 porto novo pagodas for 100 star, or 1 porto novo pagoda = 36 fanams in government accounts, and $37\frac{1}{2}$ in the bazaar; malabar coin, $116\frac{1}{2}$ to 100 star pagodas; seringapatam, 120 and 13 fanam and 68 cash to 100 star pagodas; salem, tanjore, coimbatore, and madura coins 120 to 100 star pagodas; arcot coins, $123\frac{1}{3}$ to 100 star pagodas. Pulliputt, from place so called, in north arcot = rs. 2-10-0. Sawmy; otherwise three sawmy-pagoda; gold coin, bearing on one side the figure of the god chennakeshwarasawmy and on the other side, oobhaya nauchiyaur, his two wives bhoodevy and shreedevy; 10 per cent. better than star pagoda. Scott, from name of some european officer or adventurer; tanjore; $121\frac{1}{2}$ to 100 star pagodas. Shooly, from (shuzhi, tam. curve); otherwise chuckram [q.v.] of the south carnatic [q.v.]; = 1·165 rupees or 3 to a star pagoda; divided into 10 fanams, each = 1 anna 10·4 pies. Sowdaury, bellary, 108 and 19 fanams and 55 cash to 100 star pagodas. Star pagoda from star impression on the reverse coined at tirvaunmore near madras [naunyam, varauhan]; see vol. I, 617, foot note. St. thomas'; canara coin; $63\frac{7}{11}$ to 100 star pagodas. Sultauny, tippoo's coin, malabar coin, $84\frac{28}{33}$ to 100 star pagodas; arcot coin $92\frac{16}{27}$ to 100 star pagodas; coimbatore coin, $92\frac{151}{256}$ to 100 star pagodas; salem coin, $91\frac{77}{103}$ to 100 star pagodas. Vencatramana, from tripatty god; a chundragherry coinage.—"*c*" Goldsmith's weight 9 fanams = 1 pagoda; 10 pagodas = 1 pollum [niray, 3a b.c.] Approximate actual value 1 pagoda = 54 grains. In seed weight equal to 36 goonj [goomchy] seeds. As a jewel weight = 19 carats [q.v.]. Same as Varauhaniday. See vol. I, 609; II, 518.——*Pagoda tree* (खैराचांपा - khairáchámpá, Mahr.; काडचंपे - kádachampé, Conc.; گل آچین - guláchín, Hind., ದೇವಗಣಗಲು - dévaganagalu, Can.; ಗೋಸಂಪಿಗೆ - gósampige, Too.; వాడగన్నేరు - vádagannéru, Tel.; വെളുത്തരളി - veluttarali, Mal.; അലരിയ-

alariya, Singh.; ஈழத்தலரி - ízhattalari, Tam.). Title from being found about pagodas [q.v.]. Mahr. from (khairá, mahr. white sprinkled with red + champaka, san. michelia champaca, linn.). Conc. means wild champak. Can. from (déva, san. god + ganagalu, can. nerium odorum, sol.); from being found about temples. Too. from (gó, too. cow + champaka, san. michelia champaca, linn.). Tel. from (váda, tel. fragrance + gannéru, tel. nerium odorum, sol.). Mal. from (velutta, mal. white + arali, mal. nerium odorum, soland). Tam. from (ízham, tam. gold + alari, tam. nerium odorum, soland); flower like gannair [q.v.] and yellow within. Can. also (kádusampige), meaning forest + michelia champaca, linn.; from similar odour of flowers. Tel. also (adavigannéru), meaning forest + nerium odorum, sol. Mal. also (arali). Singh. also (kanéru). Tam. also (perungalli), meaning large + euphorbia tirucalli, linn., from leafless branches resembling milk hedge [q.v.]; (kallimandárai), meaning euphorbia tirucalli, linn. + bauhinia, from milky stem and flowers like ebony [q.v.]; (návillávalari), meaning tongue + having not + nerium odorum, soland, without filaments in flower. Title otherwise Gool-i-cheen, Milky bauhinia, Red jasmine, Spanish jasmine. Botanically Plumeria acutifolia, poir., apocynaceæ [vricsham, 87]. Alias Plumeria acuminata, obtusifolia. Flos convolutus of rumphius. Small size with crooked trunk and rough bark; branches swollen and leafy at the tips; leaves 8-12 inches; petiole 1-1½ inches, one-glandular at the top; flowers many, fragrant, pink externally, white within; follicles about 5 inches long, cylindric. Hardy tree; large, lanceolate, smooth leaves; corymbs of large, pure-white flowers, with interior of cup yellow; flowers during hot and rainy seasons; introduced into india by the portuguese from brazil; planted in churchyards of native christians, that it may deck the graves with its white deciduous flowers. Leaves made into poultice used medicinally to dispel swellings; milky sap rubefacient in rheumatic pains; root violent cathartic. No other common species here. Same title is also sometimes given to the Banyan [q.v.].

PAGOO (பகு - pagu, *Tam.*). To divide.——*Pagal* (பகல் - Tam.). From (pagu, tam. to separate). Break of dawn. So day light [ahas], as measure of time; 2 nairams or half daylights = 1 pagal [caulam, 1].——*Pagoothy* (പകുതി - pakuti, Mal.; பகுதி - paguthi, Tam.). From (pagu, tam. to divide). Portion [bhaugam]. Suffix in place names; as Keel pagoothy, meaning eastern portion. Pagoothy olay, from (óla, mal. palm leaf), is a deed of division of hereditary property [cawny] among relations [amshapatram].——*Pauthy* (പാതി - páti, Mal.; பாதி - páthi, Tam.). From (pagu, tam. to divide). Half. Portion. Suffix in place names; as Vadapauthy, meaning northern portion.——*Puggum* (పగ్గము - paggamu, Tel.). From (pagu, tam. to divide); a composite twisted cord. Rope. Linear measure. Used in measuring land. 16 veesams = 1 puggam [alavay, 1b]. Approximate actual value, 1 puggam = 132 feet. Godavery. There are other puggams. Compare jareeb. See vol. I 609; II, 511.——*Pungoo* (பங்கு - pangu, Tam.). From (pagu, tam. to divide). Share. Pungauly is a shareholder, especially of village lands. Pungoocauran is a co-sharer. Pungoo maulay is a list of shares. Pungoovaly, from (vazhi, tam. succession), is a village held by coparceners; the lands are distributed at various times according to the votes of the majority of the sharers, and are held in severalty for a given time under such distribution [caraiyeed].

PAGOOTHY (பகுதி - paguthi, *Tam.*). From (prakriti, san. root) [pra]. Root in grammar [lacshanam], thus defined in Nunnool:—"Indivisible words, or either nouns, verbs, particles, "or qualifying words, as adjectives and adverbs, which have "been arbitrarily set apart from time immemorial, and cannot "be divided or analysed, except into unmeaning sounds or "syllables." Regarding the connection of Dravidian roots among themselves the following twenty-four examples consist of the words which are cited by Maumidy vencayya in the Andhra deepacam [q.v.] as an example of pure Teloogoo words. They are taken without addition or rejection, and against them are set the roots which mean the same thing in Canarese and Tamul. It will be seen that with very few failures there are identical words with identical senses in each language.——*Child* (కొడుకు - koduku, Tel.; குழந்தை - kuzhandai, Tam.; Can. fails).——*Cold* (ಛಳಿ - chhali, Can.; చలి - tsali, Tel.; சளி - shali, tam.)——*Curd* (పెరుగు - perugu, Tel.; பெருகு - perugu, Tam.; Can. fails).——*Displeasure* (అలుక - aluka, Tel.; அலுப்பு - aluppu, Tam.; Can. fails).——*Earth* (ಪೊಡವಿ - podavi, Can.; పుడమి - pudami, Tel.; புடவி - pudavi, Tam.).——*Field* (ಮಡಿ - madi, Can.; మడి - madi, Tel.; மடி - madi, Tam.).——*Ghee* (ಬೆಣ್ಣೆ - benne, Can.; నెయ్యి - neyyi, Tel.; நெய் - ney, Tam.). The Canarese here means butter, which is almost the same thing.——*Gold color* (ಪಸುರು - pasuru, Can.; పసిడి - pasidi, Tel.; பசுப்பு - pasuppu, Tam.).——*Head* (ತಲೆ - tale, Can.; తల - tala, Tel.; தலை - talai, Tam.).——*Hot weather* (ಬೇಸಿಗೆ - bésige, Can.; వేసవి - vésavi, Tel.; வெசவி - vesavi, Tam.).——*Man* (ಮಗ - maga, Can.; మగవాడు - magavádu, Tel.; மகன் - magan, Tam.).——*Milk* (ಹಾಲು - hálu, Can.; పాలు - pálu, Tel.; பால் - pál, Tam.).——*Month* (నెల - nela, Tel.; நிலவு - nilavu, Tam.; Can. fails).——*Mortar* (ಒರಳು - oralu, Can.; రోలు - rólu, Tel.; உரல் - ural, Tam.).——*Net* (ಉಟ್ಟಿ - utti, Can.; ఉట్టి - utti, Tel.; உறி - uri, Tam.). This is the long net in households for holding pots or other utensils [oory]. Regarding the genitive case of the Tamul word see the letter R.——*Pestle* (ಒನಕೆ - onake, Can.; రోకలి - rókali, Tel.; உரோங்கல் - uróngal, Tam.).——*Pool* (ಮಡು - madu, Can.; మడుగు - madugu, Tel.; மடு - madu, Tam.).——*Temple* (ಗುಡಿ - gudi, Can.; గుడి - gudi, Tel.; குடி - kudi, Tam.). The Tamul word signifies any habitation; so did the others originally.——*Tiger* (ಹುಲಿ - huli, Can.; పులి - puli, Tel.; புலி - puli, Tam.).——*Village* (ಊರು - úru, Can.; ఊరు - úru, Tel.; ஊர் - úr, Tam.).——*Woman* (ఆడది - ádadi, Tel.; ஆடவள் - ádaval, Tam.; Can. fails).

PAH (பா - pá, *Tam.*). From (pávu, tam. to spread, to extend) [pauv]. Web or warp; so poetry. The character of Dravidian poetry may be seen especially from the Tamul. With the exception of commentaries and some modern works, the entire Tamul literature is in poetry. Alliteration is its essence as in the case of Welsh. The chief peculiarity of Tamul rhyme consists in fact in its seat being not at the end of the line but at the beginning, a natural result of alliteration. The rule in Tamul as in all the other Dravidian dialects is that the consonant which intervenes between the first two vowels in a line is the seat of rhyme. The agreement of these two consonants constitutes the minimum of rhyme which is admissible, but often the entire first foot of one line rhymes with the same foot in the second; sometimes the second feet in each line also rhyme; and the rhyme is sometimes taken up again further on in the verse according to fixed laws in each variety of metre. There are thirty kinds of feet, divisible into five classes, in Tamul poetry. In Latin a verse would be considered lame and devoid of harmony, if each word in it were a distinct foot; the feet of a verse therefore are so disposed that in scanning the words are run into each other and concatenated like the links of a chain. The cadence of the Tamul verse on the contrary requires that not only in singing, but even in reading, the close of each foot should be marked by a slight pause; so that to read a verse and to scan are one and the same thing. Hence although a Tamul foot may consist of several whole words yet no word can be divided as among the Romans so as to belong partly to one foot and partly to another. As a rule, every Tamul poem however secular its aim begins with an invocation. There are three treatises on this single point. Numerous rules are laid down. There are twenty-three fortunate words with which or their synonyms the poem and invocation should commence; certain letters are allotted to the twenty-seven constellations [nacshatram]; each caste [jauty, varnam] has its appropriate letters [varnamaulay]; certain feet are fortunate, others the reverse. When a poet wishes to injure an enemy, he begins with inauspicious letters; Cumban [q.v.] is reported to have caused the death of a king by combinations of this character. The difficulty in understanding Tamul poetry is much increased by the very complicated rules for euphonic changes. These changes are made not only in syllables of words, but in the beginnings and endings of words themselves; so that a whole line may be considered as forming a polysyllabic word of great length. Dravidian grammarians have bestowed more attention and care on euphonic permutations than on any other subject, and the permutations which the grammar [lacshanam] of Tamul requires or allows are at least twice as numerous, and more than twice as perplexing to beginners, as those of Sanscrit [q.v.]. In native manuscripts, words are not in any way divided. The difficulty is increased again by the use of peculiar or obsolete words. A Tamulian of average intelligence, who can read and write with ease the language as spoken, cannot understand classic poetry unless he has made it a special study; he cannot even divide the lines into their component words. Hence the Tamul classics have most elaborate commentaries. Each word presenting any difficulty is explained separately, and the general sense is given, with any grammatical remarks which may be required. Vailayya desican says as follows :—"Born as I am second of three brothers "whose poetry even the god [bramha] enthroned on the "lotus-flower [nelumbo] could not easily understand." The principal versifying styles in Tamul are Ammaunay, Antaudy, Ausryappah or agaval, Calambagam, Coommy, Covay, Oolah or maulah, Parany, Pillay tamul, Shind or keertanay, Taulauttooray, Venbah, Vroottam, Vunnam. Of these the Venbah or pure and Vroottam or expanded are the most used [bhaushay].——*Paun* (பாண் - pán, Tam.). Melody.——*Paunan* (പാണൻ - pánan, Mal.). From (pána, mal. melody). Pariah proper name [peyar]. Musicians actors and players on the west coast [jauty].——*Pautt* (பாட்டு - páttu, Tam.). Compare poem from valur. Song. See sep. title.——*Pauvalan* (பாவலன் - pávalan, Tam.). Poet. From (above + val, tam. powerful). The following is a list of the chief Tamul poets, ancient and modern :—Agastyan, Alvandar, Ativeeraramapandiyan, Avvay, Bhogan, Capilan, Caukkaypaudinyan, Conganan, Corakkan, Cullaudan, Cumban, Irattaiyar, Maunica vauchacan, Nakkeeran, Pavanandy, Poogazhendy, Sambandhan, Shattaimoony, Shekkilaun, Shendan, Shiva pracausha desican, Shiva vaucyan, Soondran, Tatwa bodhacar, Tirvulloovan, Tirtevar, Tolgauppyan, Veera maumoony. Each of these may be seen in the present volume under the corresponding heading. For other names see under Alwar, Aroopatt moover and Madura college. For Teloogoo poets, see Cavy.

PAHAUR (پہاڑ - pahár, *Hind.*). Hill [q.v.].——*Pahaury* (پہاڑی - pahárí, Hind.). Hill. Plant first term, often joining two genera. Ex., where transl. is of second term :—Cycas circinalis (pahárímadanmastkájhár), artabotrys odoratissimus, madmaunty; Jatropha curcas (paháríarand), ricinus communis, castor-oil; Thespesia populnea (pahárípípal), ficus religiosa, peepul. See gloss. paragraphs.

PAHLAVA (पह्लव - pahlava, *San.*). From (balkhavi), meaning pertaining to balkh. A northern or north-western nation often mentioned in Hindoo writings. πάκτυες of Herodotus. See vol. I (129).

PAID (پیٹھ - peth, *Hind.*; పేడు - pédu, *Tel.*; பேடு - pédu, *Tam.*). Village. Suffix in place names; as Vitpaid, meaning bow-shaped village [baid, paud].

PAL (पल - pal, *San.*). To move.——*Palabhay* (पलभा - palabhá, San.). From (above + bhá, san. shadow). The midday shadow [chauyay] of a gnomon [shunk], when the sun [sooryan] is in the equinoctial points [ayanam, craunty pautam, vishoo]. ——*Palam* (पल - pala, San.; പലം - palam, Mal.). From (pal, san. to move).—"*a*" A weight of gold or silver, the hundredth part of a toolaum [q.v.].—"*b*" Measure of solar time. 60 vipalams or indian seconds = 1 palam or indian minute; 60 palams = 1 dandam or indian hour [caulam, 6]. Approximate actual value, 1 palam or indian minute = 24 english seconds. Same as San. vighaticay [caulam, 4, 5], vinaudy [caulam, 1], vicalay [caulam, 6], Tel. vighadiya [caulam, 4, 5], Tam. vinaudy [caulam, 1].——*Palaus* (पलाश - palásha, San.). See sep. title. ——*Palingoo* (స్ఫటికము - sp'hatikamu, Tel.; පළිඟු - palingu, Singh.; பளிங்கு - palingu, Tam.). Title and Tam. from (paligha, san. glass vessel). A common term for mineral crystals [cull].——*Pollum* (पल - pala, San.; பலம் - palam, Tam.). From (pal, san. to move), as judged by motion on balance. Bazaar weight. 10 pagoda weight = 1 pollum; 8 pollums = 1 cutcha seer [niray, 2]. Approximate actual value, 1 pollum = 3 tolahs or rupee weights or 1¼ oz. avoir. Used throughout Presidency. In Coimbatore, 3 oz. 4⅘ drs.; in Madura 3 oz. 1¾ drs.; Tinnevelly, 2 oz. 4 drs.; in Malabar 4 oz. 1½ drs. and same as Nowtauk. Compare Arapow for the smaller values. See vol. I, 609; II, 506.

PAL (పల్లు - pallu, *Tel.*). Tooth.——*Palgorroo* (పలుగొర్రు - palugorru, Tel.). From (above + gorru, tel. harrow). A harrow [goontaca] used as a leveller [gorroo].

PALA (பல - pala, *Tam.*). Many.——*Pala bhogam* (பலபோகம் - palabógam, Tam.). From (above + bhóga, san. enjoyment). Tenure by which inhabitants hold lands in severalty, each responsible for revenue [teervay] of his own holding [aroothy caray, caray, samoodauyam, yecabhogam].——*Palavaisham* (பலவேசம் - palavésam, Tam.). From (above + vésha, san. disguise). A Maravan [q.v.] who made himself celebrated for his robberies during the latter part of the Mahomedan government of Seringapatam. Since his death he has been worshipped as one of the demons [moony] of the Shaunaur [q.v.] of Tinnevelly. Thousands of persons are called after his name.——*Palgoondram* (பல்குன்றம் - palgunram, Tam.). From (pala, tam. many + kunram, tam. hill). Ancient division of Tondaimundalam [q.v.]. The Calastry neighbourhood.——*Pulnaud* (పల్నాడు - palnádu, Tel.). See sep. title.

PALAM (फल - p'hala, *San.*). From (p'hal, san. to split). Fruit [pazham]. Consequence, one of the twelve Prameyams [q.v.] of the Nyauyam [q.v.] philosophy, or points about which correct knowledge is to be obtained. An equation. When applied to the sun [sooryan] or planets [graham], their anomalistic equation [mandapalam].——*Phal* (फल - p'hala, San.; پھل - phal, Hind.). Fruit.—"*a*" Plant first term. Ex., where transl. is of second term :—Artabotrys odoratissimus (p'halasampenga), michelia champaca; Citrus medica, var. medica proper, (p'halapúra), full; Feronia elephantum (p'halasugandhí), fragrant; Stereospermum suaveolens (p'haléruhá), born; fruit appearing with flower buds on the top; Zizyphus jujuba (p'halashaishira), dewy season. See gloss. paragraphs.—"*b*" Plant second term. Ex., where transl. is of first term :—Barringtonia acutangula, (samandarphal), sea; Corallocarpus epigæa (garajphal), thunder; Helecteris isora (jonkphallí), leech; Lagenaria vulgaris (káshíphal), benares; Myrica sapida (káíphal), pungent; Randia dumetorum (mendphal), intoxication; Rubus indicus (gauríphal), gowry, the goddess; Rubus lasiocarpus (gauríphal), gowry, the goddess; Trapa bispinosa (pāníphal), water. See gloss. paragraphs.——*Palanashtam* (फलनष्ट - p'halanashta, San.). From (above + nashta, san. loss). Loss of produce by unsuccessful cultivation [vellaumay].

PALAUS (पलाश - palásha, *San.*; कक्रा - kakrá, *Mahr.*; फलसा - p'halasá, *Conc.*; درخت پلاہ - darakhtipaláh, *Pers.*; پلاس - palás, *Hind.*; پلاس کاجھاڑ - paláskájhár, *Dec.*; ಮುತ್ತುಗ - muttaga, *Can.*; మోదుగ - móduga, *Tel.*; ପୋରାସୁ - porásu, *Oor.*; പലാശം - palásham, *Mal.*; කැල - kála, *Singh.*; புரசு - purasu, *Tam.*). Title from hindostany [pal]. San. from (pal, san. to go), useful. Mahr. from (kankara, mahr. gravel), useful in gravel. Conc. from sanscrit. Pers. from (darakht, pers. tree + palásha, san. the tree). Hind. from sanscrit. Dec. from (palásha, san. the tree + jhár, hind. tree). Can. from (muttu, can. pearl + mara, can. tree). Oor., Mal. and Tam. from sanscrit. San. also (kimshuka), meaning beautiful tree; (kamalásana), meaning seat of lutchmy; (tripatriká), meaning three petalled; (lákshataru), meaning lac-tree; from branches yielding lac [q.v.]. Hind. also (dhák). Tel. also (tellamóduga), meaning white + the tree; (togarumóduga), meaning red color + the tree. Mal. also (murukku); (chamata), meaning sacrificial fuel [samit], from twigs used to feed sacred fire; Singh. also (gaskála), meaning tree + butea frondosa, roxb.; (etkan); (kálukála), meaning black + the butea tree. Tam. also (murukku), meaning beautiful tree [common coral tree]. Gave its name to the battle-field of Plassey in bengal. Title otherwise Bastard teak [common coral tree], Bengal kino, Butea gum, Dhak tree, Gum lac tree, Lac tree, Modooga, Pismire tree, Porasam, Tisso flower. Botanically Butea frondosa, roxb., leguminosæ [vricsham, 48]. Alias Erythrina monosperma; Rudolphia frondosa. Middle-sized tree; leaves pinnately trifoliolate; leaflets large, roundish ovate, rather velvety beneath; corolla papilionaceous; racemes simple many flowered, lax; calyx segments short, slightly acute, several times shorter than the tube; corolla densely pubescent; vexillum ovate, acute, recurved; keel and alæ incurved; legume chestnut-colored, flat, thin, with a large solitary seed at the apex; seed is thin, flat, oval, or kidney-shaped, of a mahogany brown color, 1¼–1¾ inches in length, almost devoid of taste and smell. Flowers bright scarlet, in clusters, are produced before the leaves; in full flower in march and april; lac [q.v.] insects are frequently found on the small branches and petioles of the leaves; widely dispersed and common in dry forests. From fissures and wounds in the bark issues during the hot season a red juice, soon hardening into a ruby-colored, brittle, astringent gum [q.v.]; which however soon loses its color by exposure to the air; this is butea kino or bengal kino, gummi rubrum astringens of old druggists, otherwise butea gum; it is inodorous, soluble in water, the solution being of a deep red color, partially soluble in alcohol, giving a pale tincture; the salts of iron blacken all the solutions; it contains **73** per cent. of tannin and is sometimes substituted for true kino [common vengay] though not so efficient; occurs in the form of irregular shining fragments, seldom as large as a pea [calauyam], more or less mixed with adherent pieces of greyish bark, of an intense ruby color and astringent taste; its astringency is due to the presence of tannic and gallic acids; more common in bazaar than officinal kino [q.v.]. Leaves medicinally astringent, tonic and aphrodisiac; flowers astringent, depurative, diuretic, aphrodisiac; seeds, pounded with lemon [q.v.] applied to the skin act as a rubefacient; seeds act also as a vermifuge, and when made into a paste used for ringworm [dadroo]; decoction of seeds, to which a little nitre [shorah] added, prescribed in gravelly complaints; bark given in conjunction with ginger [q.v.] in snake-bites; gives to pharm. buteæ gummi, officinal; seeds, non-officinal. In veterinary practice two drachms of seed in powder given in gram [q.v.] daily, for horses [ghorah] with worms. Leaves used as fodder for buffaloes [khoolgah] and elephants [q.v.]. Flowers are offered in temples, and women intertwine them in their hair; expressed juice of fresh flowers and infusion of dried flowers yield a water color brighter than gamboge [q.v.]; also yield a lake [q.v.]; strong ropes made from fibre [naur] of roots, used immediately after bark has been stripped; the kino is one of the most useful kinds of gum for all purposes; the leaves form a substitute for platters. Wood somewhat resembles teak [q.v.] in appearance, and is used for gunpowder charcoal [adoopp kary]; also for building purposes and well curbs. Creeping palaus, so called in the vernaculars is Butea superba, roxb.; twining shrub with pinnated three foliolate leaves; leaflets roundish, velvety beneath; racemes simple, lax; pedicels about twice the length of the calyx; corolla papilionaceous; legumes flat, compressed, thin, clothed with rusty tomentum, with one solitary seed at the apex; calyx segments shortish, acuminate; vexillum ovate, acute; flowers large, bright scarlet; flowering in march; flowers and legumes larger than frondosa; scarcely differing from frondosa except in habit; sensible properties same as in frondosa.——*Black palaus* (कालापलाश - kálápalásha, Mahr.). Same as Nemmy. ——*Thorny palaus* (ముల్లుమోదుగ - mullumóduga, Tel.; முள்முருக்கம் - mulmurukkam, Tam.). Same as Thorny coral tree.

PALCONDAH (పాలకొండ - pálakonda, *Tel.* pálkonda *). From (pálu, tel. milk + konda, tel. hill); on account of pasture [paul].——**(1)** Talook, Vizagapatam district; area 502 square miles including agency tracts; population non-agency 208,821, agency 11,824; language Teloogoo. E. inland of district. Boundaries :—east, Chicacole talook; south, Cheepoorpully talook; west, Bobbily and Parvatipore talooks; north, Meranghy, Cooroopaum and Parlakimedy estates. Palcondah is on the eastern border of the district and adjoins the south-western portion of Ganjam. The northern portion forming Palcondah agency consists of a range of hills from which flow several streamlets. Excluding the hilly tract, it is plain and fertile and well watered by the Langoolya. The soils belong to regar [q.v.] and red ferruginous [sevval munn], the former 44 per cent. and

latter 56 per cent. of arable area. The regar soil contains regar clay, regar loam, and regar sand, in the proportion of 41, 52 and 7 per cent. respectively. The red series contain red loam and red sand [manal] in the proportion of 67 and 33 per cent. respectively. Agriculture [vellaumay] is chief industry. Indigo [q.v.] and sugar-cane [q.v.] are grown. Messrs Arbuthnot & Co. have rented the talook for many years. Exports are paddy [q.v.], jaggery [q.v.], indigo [q.v.] and oil-seeds [yennay]. Chief imports are piece-goods and salt [ooppoo]. The Naugauvaly which in its lower course is known as the Langoolya or Chicacole river of Ganjam, with its tributary the Swarnamookhy, is chief source of irrigation. The best irrigation is from the river channels [q.v.]. Places of archæological interest:—Audoorpett, Galavully, Siripooram. Principal trig. stations:—Naulcondah, Yerra cuntsaram. The leading places, &c., in the talook are the following.——*Honzaram* (హంసరామము - hondzarámu, Tel.). See sep. title.——*Langoolya* (లాంగూలియా - lángúliyá, Tel.). See sep. title.——*Muntena* (మంతెన - mantena, Tel.). From (mantanamu, tel. solitary abode). Proprietary estate, Village; pop. 1,017. Is a small fertile estate. Peshcush Rs. 7,220.——*Naulcondah* (నాలుకొండ - nálukonda, Tel.). From (nál, hind. horse-shoe + konda, tel. hill). Trig. station; lat. 18° 35′ 15·00″; long. 83° 51′ 58·39″; height 2,143 feet; from Palcondah E.S.E. 4 miles.——*Oongarauda* (ఉంగరాడ - ungaráda, Tel.). From (ungaramu, tel. ring + váda, tel. village). Proprietary estate, Village; pop. 1,589; lat. of village 18° 31′; long. 83° 47′; from Palcondah S. 6 miles; from Vizagapatam N.N.E. 63 miles. Peshcush Rs. 3,080.——*Palcondah* (పాలకొండ - pálakonda, Tel.). See below.——*Poolleta* (పుల్లేటి - pulleta, Tel.). From (pullu, tel. grass + eda, tel. place). Proprietary estate, Village; pop. 637; from Palcondah S. 10 miles; from Vizagapatam N. 58 miles. Peshcush Rs. 1,818.——*Rajaum* (రాజాము - rádzámu, Tel.). From (rájá, san. king + gám, hind. village). Village, District moonsif's station; pop. 4,687; lat. 18° 27′; long. 83° 42′; from Palcondah S.S.W. 12 miles; from Vizagapatam N.N.E. 56 miles. Famous for silver [velly] work and palankeens [q.v.]. Belongs to Bobbily rajah.——*Seetampett* (సీతంపేట - shítampéta, Tel.). See sep. title.——*Seetarampooram* (సీతారాంపురము - sítárámpuramu, Tel.). From (sítaráma, san. síta and ráma + pura, san. town). Village; pop. 1,429; lat. 18° 29′; long. 83° 46′; from Palcondah S. 9 miles; from Vizagapatam N.N.E. 60 miles. Fine temple built by Bobbily rajah. Good water-supply.——*Siripooram* (సిరిపురము - siripuramu, Tel.). From (siri, tel. wealth + pura, tan. town). Proprietary estate, Village; pop. 2,885; lat. of village 18° 23′; long. 83° 50′; from Palcondah S. 15 miles; from Vizagapatam N. 56 miles. Inscription of Orissa dynasty [raj] dated A.D. 1153. Large tank [q v.] on the bund [q.v.] of which are old stone images. Peshcush Rs. 8,800.——*Veeraghattam* (వీరఘట్టము - víraghattamu, Tel.). From (víra, san. warrior + ghatta, san. ford). Village; pop. 5,546; acres 2,088; lat. 18° 41′; long. 83° 39′; from Palcondah W. 12 miles; from Vizagapatam N.N.E. 72 miles. Trading place.——*Yerra cuntsaram* (ఎఱ్ఱకంసారం - yarrakantsarám, Tel.). From (erra, tel. red + kantsara, tel. brazier + gám, hind. village). Trig. station; lat. 18° 43′ 45·89″; long. 83° 40′ 48·83″; height 1,766 feet; from Palcondah N.W. 12 miles; from Veeraghattam N. 3 miles.——**(2)** Deputy tahsildarry; Vizagapatam district. Pay Rs. 100.——**(3)** Zemindarry; now forfeited to Government; Vizagapatam dist., Palcondah tal.; pop. 203,833. Ancient zemindarry granted by the rajah of Jeypore early in the sixteenth century. The founder was a Khond [q.v.]. When the East india company came into possession, the family was tributary to Vizianagram. In 1796 the estate was taken from the zemindar for rebellion and given to his son. Each succeeding zemindar gave the Company trouble, till in 1828 the Collector was obliged to take charge for a time. The new zemindar in 1832 broke out into open rebellion, which led to the forfeiture of the estate and the prolonged imprisonment of the male members of the family. For some years after this, the estate was managed by the Collector, but from 1846 till the present time it has been rented to Messrs. Arbuthnot & Co. of Madras, who now pay Rs. 126,500 per annum as rent.——**(4)** Town, Deputy tahsildar's head-quarters; Vizagapatam dist., Palcondah tal.; pop. 10,367; acres 1,519; lat. 18° 36′ 05″; long. 83° 48′; from; Coraputt E.S.E. 68 miles; from Madras N.N.E. 440 miles; from Narsapatam N.E 98 miles; from Parvatipore E. 24 miles; from Vizagapatam N.N.E. 68 miles; from Vizianagram N. 40 miles. 2½ miles from Langoolya. Connected by road with Parvatipore and the coast viâ Chicacole.——**(5)** Sanscrit name (shésháchala), meaning sheshan, the serpent + hill. Range of hills; Cuddapah dist., Poollampett, Sidhout, Royachoty, Cuddapah, Poolivendla, Cadiry tals.; lat. 13° 44′ to 14° 14′ N.; long. 78° 55′ to 79° 27′ E. The most extensive of the Cuddapah hill ranges. Average elevation 2,000 feet, highest point Booditaid 3,060 feet. A few miles to the north of Tripatty, the Sheshachellam hills take a sharp turn to the west, after about five miles they again turn almost at right angles to the north, and from this point are known as the Palcondahs. After taking the turn the hills enter Cuddapah district and run in one unbroken range of almost unvarying height in a north-westerly direction to the neighbourhood of Goolcheroo. Here they turn suddenly off to the west and continuing in that direction for about 60 miles, and forming the boundary between Poolivendla and Cadiry talooks, finish in the latter talook near the Bellary frontier in a number of rocky hills. They constitute a well-defined boundary between the main division and the sub-division, shutting in a table-land, the lowest point of which is 1,500 feet above the sea, to the west and south, and form low valleys on the north and east averaging about 50 feet above the sea level. The western side of the hills is precipitous and overlooks the Mysore plateau. The passes are few. The Naugapootla pass [ghaut], carrying the road from Mysore to Tripatty, passes over a portion of the hills about 20 miles from the pagoda [q.v.]. It stops short at the hills, and the pass is merely jungle pass. About 20 miles further to the north, the Cheyair finds a passage through the hills, and at Saunipoya, about 10 miles further on, there is a fine ghaut [q.v.] road which forms a feeder to the railway, joining it at the Rajampett station and crossing Cheyair near Baularauzpully. At Goolcheroo is the Soorya comauroola canama through which runs the road from Chittore to Cuddapah. This road has been recently built, but the pass has been used for traffic for centuries. There are the vestiges of an old road. About 20 miles west of Goolcheroo and near Vempully in Poolivendla talook the range affords a passage to the Paupughny. In Cadiry talook is the Coorly ghaut named after a village near its foot, and near this road a small river also finds a way through the hills and eventually joints the Chitrauvaty. There are two water-falls 10 miles from Cuddapah. Trig. station in lat. 14° 29′ 14·23″; long. 78° 02′ 37·77″; height 2,156 feet; from Boodanampully E. 3 miles; from Cadiry N.N.W. 28 miles.

PALGHAUT (പാലക്കാട് - pálakkátu, *Mal.* pálghat *). From (pála, mal. milk plant, alstonia scholaris, r. br. + kátu, mal. jungle) [paul]. Sanscrit name (sháradápattana), meaning saraswaty's city.——**(1)** Talook, Malabar district. Tahsildar's pay Rs. 200. Easternmost inland talook of the district; lies between 10° 25′ and 10° 56′ N. lat., 76° 27′ and 76° 54′ E. long. Area 613 square miles. Boundaries:—north, Valavanaud talook; east, Coimbatore and Pollachy talooks in Coimbatore district and Cochin state; south, native state of Cochin; west, Cochin state and Valavanaud talook. Formerly comprised talooks of Palghaut and Temmalapooram, amalgamated in 1861. Most striking feature is the Palghaut gap in which it lies, and for which see below. The extensive forests of the numerous projecting off-shoots of the main chain of the Western ghauts [q.v.] separating the talook from the Coimbatore district, are all private property, except the two Government forests Chenat nayar and Walayaur. Soil in general is black loam. Chief exports are various kinds of food grains [dhaunyam], timber [maram], tobacco [pogauk], Palghaut mats [boriyah] and coarse cloths manufactured in Vadacancherry, &c. Chief imports are tobacco, various kinds of cloth, spices, and cattle [maud]. Of the rivers, the most important are the Cullpauty locally called the Nelanuddy, the Cunnaudy, and the Collangode locally called the Gayatry nuddy. The first two uniting near Parly take the name of Ponnany or Bhaurata poya; and the last, the Collangode river, joins the Ponnany river a little farther on. The Cullpauty has its source at Chentaumaracoolam in the hills north of Walayaur, where the stream forms boundary between Malabar and Coimbatore districts. The other two rise in the north-western extremities of the Anamullays. Places of archæological interest:—Agattettara, Candattaur, Cautchancoorchy, Cauvacherry, Cauvalpaud, Chengalore, Chittalancherry, Choolanore, Codoomtirapully, Congaud, Coodallore, Coonicherry, Coottanore, Cooyalmannam, Cunnanorepauttola, Cunnaudy, Kilakoompooram, Madapully, Manyalore, Mauttore, Moondore, Mungalam, Munnalore, Palghaut, Panangauttiry, Poothoocherry, Poottore, Pullachaina, Pullattairy, Pullavore, Tadookkacherry, Taroor, Tenaury, Tirvaulattore, Tripauvalore, Tripoolamand, Vadacancherry, Vilayanore, Vuttacaud, Yedattara, Yerimayore. Principal trig. stations:—Aulatore, Carimala, Coorchimala. The leading places, &c., in the talook are the following.——*Aulatore* (ആലത്തൂർ - álattúr, Mal.). See sep. title.——*Canyicode* (കഞ്ഞിക്കോട് - kaññikkótu, Mal. kanyikód *). From (kaññi, mal. rice gruel + kótu, mal. place); a charity place. Village, Railway station; pop. 7,213; lat. 10° 48′; long. 76° 48′; height 376 feet; from Calicut E.S.E. 72 miles; from Palghaut E.N.E. 7 miles. Chuttram [q.v.] founded by a family residing in Tellicherry in Palghaut.——*Carimala* (കരിമല - karimala, Mal.). From (kari, mal. black + mala, mal. hill). Mal. also (ndayagiri), sun-rise mountain. Hill. Trig. station in lat. 10° 55′ 45·89″; long. 76° 42′ 05·30″; height 6,556 feet; from Palghaut N. 12 miles.——*Chenat nayar* (ചേനാട്ടുനായർ - chénáttunáyar, Mal.). See sep. title.——*Coderauyore* (കൊടുവായൂർ - kotuváyúr, Mal.). From (kotu, mal. severe + váyu, san. wind + úr, mal. village). Sanscrit name (kéralapura), meaning keralan's town. Village, Sub-registrar's office; pop. 15,402; acres 4,886; lat. 10° 41′; long. 76° 42′; from Calicut S.E. 70 miles; from Palghaut S. 5 miles. Weekly market.——*Collangode* (കൊല്ലങ്കോട് - kollankótu, Mal.). See sep. title.——*Congaud* (കോങ്ങാട് - kónnátu, Mal.). From (kón, mal. king + kátu, mal. forest). Village; pop. 8,113; acres 3,558; lat. 10° 51′; long. 76° 34′; from Calicut E.S.E. 57 miles; from Palghaut N.W. 10 miles. Weekly cattle market held on Mondays. Ancient temple at present in use. Many dolmens [codaycull] and menhirs [paundoo cull]. Pooram [pundigay, 5c]

festival celebrated for eight days in March-April, and fairs held on the occasion.——*Coorchimala* (കുറിച്ചിമല - kuriççimala, Mal.). From (kuriççi, mal. hill village + mala, mal. mountain). Hill, Trig. station; lat. 10° 47′ 10·15″; long. 76° 39′ 29·61″; height 479 feet; from Palghaut N.W. 2½ miles; from Yedattara E. 4½ miles.——*Cootchimala* (കുച്ചിമല - kuççimala, Mal.). From (kuççi, mal. brush-wood + mala, mal. mountain). Hill; lat. 10° 32′ long. 76° 53′; height 3,919 feet; from Calicut S.E. 86 miles; from Palghaut S.E. 20 miles. Well-defined pinnacle-shaped peak terminating the Collangode range.——*Cullpauty* (കല്പാത്തി - kalpátti, Mal.). See sep. title.——*Moothalamada* (മുതലമട - mutalamata, Mal.). From (mutala, mal. crocodile + mata, mal. cave). Village, Amshom, Cutcherry situated on the site of a ruined fort; pop. 5,924; lat. 10° 37′; long. 76° 49′; from Calicut S.E. 79 miles; from Palghaut S.E. 13 miles.——*Mungara* (മങ്കര - mankara, Mal.). From (man, mal. earth + kara, mal. village). Village; lat. 10° 46′; long. 76° 32′; from Calicut S.E. 57 miles; from Palghaut W. 10 miles. Railway station. ——*Olavacode* (ഒലവക്കോട്ട് - olavakkótu, Mal. olavakód *). From (ulavu, mal. custom + kótu, mal. corner); place where timber toll is collected. Village, Railway station opened in 1862, whence branch line to Palghaut; from Palghaut N. 3 miles. Timber depôts.——*Palghaut* (പാലക്കാട്ട് - pálakkátu, Mal.). See below.——*Parly* (പറളി - parali, Mal. parli *). Village, Railway station; pop. 7,432; lat. 10° 48′; long. 76° 35′; height 203 feet; from Calicut E.S.E. 60 miles; from Palghaut W.N.W. 7 miles. Large distillery.——*Paultoolly* (പാലത്തുള്ളി - pálattulli, Mal.). From (pála, mal. milk plant, alstonia scholaris, r. br. + tulli, mal. drop). Village; pop. 5,863; acres 943; lat. 10° 42′; long. 76° 45′; from Calicut S.E. 72 miles; from Palghaut S.S.E. 5 miles. Weekly cattle [maud] market held on Sundays. Chiefly inhabited by Chetties [q.v.]. Centre of cattle trade.——*Ponnany* (പൊന്നാനി - ponnáni, Mal.). See sep. title.——*Poothoonagaram* (പുതുനഗരം - putunagaram, Mal.). From (putu, mal. new + nagara, san. town); recent settlement formed by hyder's followers. Village in Codevauyore amshom; pop. 15,402; lat. 10° 41′; long. 76° 44′; from Calicut S.E. 72 miles; from Palghaut S.S.E. 6 miles. Weekly market. Most important Rowtan [q.v.] village in the talook. The Rowtar are descended from Mysore mussalman [q.v.] emigrants. Jumma musjid [q.v.]. ——*Temmalapooram* (തെമ്മലപ്പുറം - temmalappuram, Mal.). From (tenmala, mal. southern mountain + puram, mal. side). Village; lat. 10° 39′; long. 76° 32′; from Calicut S.E. 63 miles; from Palghaut S.W. 13 miles. Formerly gave its name to a talook.——*Tenmullay* (തെമ്മല - temmala, Mal.). See sep. title. ——*Vadacancherry* (വടക്കഞ്ചേരി - vatakkañchéri, Mal. vadakanchéri *). From (vatakkan, mal. northern + chéri, mal. village). Village; pop. 12,750; acres 1,727; lat. 10° 36′; long. 76° 32′; from Calicut S.E. 65 miles; from Palghaut S.W. 16 miles. A mile distant is very ancient shiva temple of Trivara. Tank called Bramhacoondam, where Bramha [q.v.] performed yaugams [q.v.]. On northern side of hill ranges separating the talook from the adjoining Cochin state; hill-bound on south and west. Chiefly inhabited by Mahomedans. Also Roman catholic church. Manufacture of coarse cloths. Trade in hill produce and timber. Travellers' bungalow [q.v.]. The hills near contain many cromlechs [paundoo cull].——*Vadamullay* (വടമല - vatamala, Mal.). See sep. title.——*Walayaur* (വാളയാർ - válayár, Mal.). See sep. title.——*Yelapully* (എലപ്പുള്ളി - elappalli, Mal.). From (ela, mal. small + palli, mal. village). Village; pop. 11,138; acres 5,966; lat. 10° 45′; long. 76° 47′; from Calicut E.S.E. 73 miles; from Palghaut E. 6 miles. Weekly market. Natural spring called Tenaury teertam. Frequented for Amavausyay [q.v.] in Carcatacam [mausam] or July and Toolaum or October. **——(2)** Town, Municipality, Railway station, Head-quarters of Head assistant collector, Sub-judge, Tahsildar and Moonsif, Telegraph office, Sub-registrar's office and Head-quarters of Assistant superintendent of Police; Malabar dist., Palghaut tal.; pop. 39,418; lat. 10° 46′; long. 76° 42′; height 259 feet; from Calicut S.E. 67 miles; from Cannanore S.E. 113 miles; from Madras W.S.W. 291 miles; from Malapooram E.S.E. 44 miles; from Manantoddy S.S.E. 81 miles; from Ponnany E. 48 miles; from Tellicherry S.E. 102 miles. In the Palghaut gap and on the north or right side of the Palaur. Being the key to Travancore and Malabar from the east, it was formerly of considerable strategic importance. In 1768, captured for the first time by the British, but retaken by Hyder a few months later; retaken by the British in 1783; restored to Tippoo sultan in 1784; September 21, 1790, taken by Colonel Stuart. From that time it was a basis of operations against Tippoo, which terminated in the storming of Seringapatam. The fort still stands, built by Hyder ally. Now used as the office of the Tahsildar. Sub-jail and Sub-registrar's offices are also located here. Palghaut is a busy entrepôt for exchange of produce between Malabar and the Eastern districts. The Bramin puttar [q.v.] exist in large numbers. Cullpauty shiva temple. A car festival celebrated in November. Special trade in Palghaut grass mats [boriyah], and centre of tobacco [pogauk] trade. The following are the travelling distances by road from Palghaut to different places:—

——(3) Hills; Malabar district, Palghaut talook.**——(4)** Valley; Malabar district, Palghaut talook. Also known as Palghautcherry valley and Palghaut gap. This valley breaks the line of western ghauts [q.v.], otherwise unbroken from the valley of the Tapty to Cape comorin, and joins by a comparatively low level the plains of the south and east side of the peninsula with the low and habitable country of the west coast. A good road has always been maintained between Ponnany on the coast and Coimbatore and Pulney inland. This road passes through Palghaut, where it bifurcates, one branch going to Coimbatore the other to Pulney. The highest point in the centre of the valley does not exceed 500 feet above the sea, and the ascent is very gradual. The gap is 25 miles broad at the narrowest part, nearly abreast of the town of Palghaut, and the length between the parallel walls of hills is about 35 to 40 miles. Bounded on the north by the Vadamullay range which separates it from the Noyil valley of Coimbatore, and on the south by the Tenmullay range. It contains the talooks of Palghaut of Malabar district and Chittoor of Cochin state. The valley comes within the influence of both monsoons [q.v.]. The population of the Tamul and Malayalam districts imperceptibly blends about Palghaut. There is a Mussalman [q.v.] population but chiefly Pataun [q.v.] and Rowtan [q.v.]. There are but very few resident Moplahs [q.v.]. The soil is generally light and sandy. The crops depend on the south-west monsoon [q.v.]; there is no general irrigation. The staple production is rice [q.v.]. The palmyra [q.v.] takes the place of the cocoanut [q.v.] of the coast. Jaggery [q.v.] is cheap, and exported largely. The valley is drained by the Ponnany river and its tributaries. The valley has belonged to Malabar from time immemorial. Its rajah was one of those who, with the zamorin [q.v.] and the Chiracal and Cochin rajahs, ruled the Malabar country from early times. The Malayalam descent by the female line prevails in the family [maroomakkatoyem], and the routine of succession to the rank of rajah, is similar to that existing in the zamorin's family. The aggressions of the zamorin [q.v.] were felt by the Palghaut rajah from early times. To the Cochin rajah he was obliged to cede the four deshoms [q.v.] of Chittoor, Nullapully, Tattamungalam and Nemmaura, in the valley. In 1764 he invited Hyder ally to support him against these rivals. A fort was built and garrisoned at Palghautcherry, the key of South malabar, and tribute paid by the Palghaut rajah; and gradually the whole country was reduced under mahomedan influence. A land assessment, till then supposed to have been unknown in Malabar, was introduced under the Mahomedan rule.

PALGOO (फल्गु - p'halgu, *San.*). Spring.——*Palgootsavam* (फल्गुत्सव - p'halgutsava, San.). From (p'halgu san. spring + utsava, san. festival). Same as Cauman pundigay.——*Pungoony* (பங்குனி - panguni, Tam.). From (p'halguni, san. eleventh and twelfth nakshatram); from full moon then. The month [mausam].——*Pungoony oottaram* (பங்குனியுத்திரம் - panguniyuttiram, Tam.). Same as Oottara phalgoony. See Oottaram.

PALISHA (പലിശ - palisha, *Mal.*). From (poli, mal. to increase). Interest. See below.**——(1)** *Palishamadak* (പലിശമടക്കം - palishamatakkam, Mal.). From (above + matakkam, mal. return). Equivalent to Otty [q.v.] in Nedoonganaud and Valavanaud talooks. See vol. II, 104.**——(2)** *Aracaulpalisha* (അരക്കാൽപലിശ - arakkálpalisha, Mal.). From (ara, mal. half +

kál, mal. quarter). $\frac{1}{8}$ fanam for every ten or $1\frac{1}{4}$ per cent.——*Arapalisha* (അരപ്പലിശ - arappalisha, Mal.). From (ara, mal. half). $\frac{1}{2}$ fanam for every ten or 5 per cent.——*Caulpalisha* (കാല്പലിശ - kálpalisha, Mal.). From (kál, mal. quarter). $\frac{1}{4}$ fanam for every ten or $2\frac{1}{2}$ per cent.——*Maugauny palisha* (മാകാണിപ്പലിശ - mákánippalisha, Mal.). From (mákáni, mal. one-sixteenth). $\frac{1}{16}$ fanam for every ten or $\frac{5}{8}$ per cent. [vriddhy].

PALK'S BAY (பாக்குக்குடாக்கடல் - pákkukkudákkadal, *Tam.*). Named by the Dutch after governor Palk. Greek *κόλπος ἀργαρικός*. Bay and straits; Tanjore dist.; lat. from 9° 17′ to 10° 16′; long. from 78° 56′ to 80° 12′. Between Ceylon and the peninsula, separating the northern part of Ceylon from the mainland. The strait [jalsand] is formed between Point calimere and Point pedro. It is 35 miles wide at its entrance. The gulf is bounded by Calimere point and the coast of Tanjore and Madura to the northward and westward; by Adam's bridge and its contiguous islands to the south; and by the north part of Ceylon with its islands to the east.

PALMYRA (ताल - tála, *San.*; ताटी - tátí, *Mahr.*; درخت تاڑی - darakhtitárí, *Pers.*; تاڑ - tár, *Hind.*; تاڑ کا جھاڑ - tárká-jhár, *Dec.*; لونتر - lontar, *Malay*; ತಾಳೆ - tále, *Can.*; తాడి - tádi, *Tel.*; ତାଳ - talo, *Oor.*; പന - pana, *Mal.*; තල් - tal, *Singh.*; பனை - panai, *Tam.*). Title from portuguese palmeira, generic term for palms. San. from (tal, san. to fix) [talipot]. Mahr. from sanscrit. Pers. from (darakht, pers. tree + tárí, pers. toddy). Hind. from sanscrit. Dec. from (tála, san. borassus flabelliformis, linn. + jhár, hind. tree). Can., &c., from sanscrit. Mal. from tamul. Singh. from sanscrit. Tam. from (pani, tam. to be agitated); from the rustle of leaves when blown upon by the wind. Can. also (pané), from tamul. Tel. also (pótutádi), meaning male + palmyra; (pentitádi), meaning female + palmyra; (karatálamu), meaning hand + palmyra; from resembling hand with fingers extended. Mal. also (ámpana), meaning male palm; (karimpana), meaning black palm. Title otherwise Brab, Char palm, Fan palm, Great fan palm, Indian wine palm, Noongh palm, Taul palm. Botanically Borassus flabelliformis, linn., palmaceæ [vricsham, 149]. Alias Lontarus domestica. Trunk, 30-100 feet, everywhere marked with old cicatrices of fallen leaves; fronds composed of several folded linear-lanceolate divisions united as far as the centre; flowers male and female on different trees; drupe sub-globular, flattened at the apex, filled with soft yellow pulp; nut three, perforated at the apex. A tall, branchless palm, with a stiff radiating head of fan-shaped leaves; it is straight like the date [kharjooram] and areca [q.v.], and unlike the cocoanut [q.v.] which always inclines; may have on a girth of $5\frac{1}{2}$ feet at bottom and $2\frac{1}{2}$ at top; next to caryota urens, linn. [bastard sago palm], the largest palm on the coast of the peninsula; enjoys, next to the date [kharjooram] palm, the widest geographical distribution; it is however nowhere wild in southern india, and, like the tamarind [q.v.], was originally introduced from africa; very abundant, especially in sandy tracts near sea; it begins to produce when twenty-five or, in favorable soil and circumstances, fifteen or sixteen years old; it is always diœcious, that is to say bearing male and female flowers on separate plants, one tree producing only barren or staminiferous flowers, another bearing the pistil and fruits; it flowers generally in the hot season or in the mouths of pungoony and chittray [mausam] or march and april; some trees flower also in cold season; the male flowers are minute, and are produced between scales closely set on a branched flower-stalk, each stalk is estimated to bear 90,000, and as there are usually seven of these on each tree, the male flowers on a single tree are probably 630,000 in number, but not one of these produces a fruit; the fruiting or female palms bear on each flowering stalk from ten to twenty fruits, about ten of these bunches are produced in a year, so that over 200 fruits are sometimes obtained from a single tree; the fruit is round, black, about the size of a large orange [q.v.], the interior consists of an insipid, gelatinous, pellucid kind of pulp, generally contains three good-sized nuts or seeds; the sap or juice is abundant and obtained by wounding the spathe; when collected before sunrise it is known as neerah [q.v.] in hindostany, and is drunk as a mild saccharine refreshing beverage [pathaneer], but soon after sunrise it undergoes a vinous fermentation and becomes converted into the intoxicating drink toddy [q.v.]; stem gives a gum [gond], black and has a shining fracture. The palmyra flourishes best as above indicated in inferior and especially sandy and arid ground, where scarcely anything else will grow, and where its long roots, penetrating to an immense depth, draw perennial supplies from hidden sources of nourishment; for cultivation the soil is ploughed in furrows and pits half foot deep are dug; seed sown in south in auvany [mausam] or august, on coromandel in caurteecam or november, on w. coast in mitoonam or june and carcatacam or july; while under growth weeds are cleared and adjacent ground is ploughed; the plant is dependent on rain [mazhay]; leaves are cut after eight or ten years according to nature of soil; fruits are cut and toddy [q.v.] is drawn in favorable circumstances after fifteen years; the leaves are dried and otherwise prepared before they are brought to store; price of the commodities vary with locality. For writing purposes the leaves are taken while tender, and the flat portions being cut into strips, and freed from the ribs and woody tendons are boiled and dried first in the shade and afterwards in the sun; the leaves are made smooth by being damped and then repeatedly drawn between two blocks of wood; see below. Fresh juice is medicinally useful in inflammatory affections and dropsy; juice fermented used in diabetes; ash of spadix given in bilious affections; a poultice prepared with toddy [q.v.] is a good substitute for yeast poultice; the neerah [q.v.] is refrigerant, nutritive, diuretic, stomachic, and alterative tonic; in a large dose, as a tumbler-full, it is laxative; patients laboring under phthisis pulmonalis, chronic dyspepsia, secondary syphilis, sopriosis, and some other skin diseases, undergo a course of neerah [q.v.] every year in the hot weather; substituted for british wine, beer, and yeast; in pharm. non-officinal; a fine downy substance is found at the base of the leaves used for stopping bleeding wounds. The germ of the nut pushed to the first stage of growth, when dried in the sun constitutes a palatable vegetable; the same sun-dried and reduced to powder forms a delicate flour; the fusiform roots of the young trees are an article of food by the poorer classes; the fruit, when young and green, is cut open, and the immature seeds are cut out of the fleshy part; each seed then forms a thin, soft, pulpy [noongh] shell filled with juice; these are sold by street hawkers; they are cool and refreshing, sometimes cut into small pieces, sugared and flavored with rose water [goolaub, panneer]; a certain proportion of the fruits ripen on the trees; their seeds then become hard and are of no use except for reproduction; the pulp inside the hard shell is the part in that case eaten. The sap or toddy of the palm has been above mentioned; arrack [q.v.], jaggery [q.v.], and vinegar [caudy] are made from it; arrack is usually distilled from the jaggery; the sugar [q.v.] is first broken up and put in water for four days to ferment; it is then boiled in an earthen pot, the vapour being caught in a bamboo tube which falls into another vessel, in which the liquor is cooled and condensed; this operation is repeated a second time when necessary; arrack is occasionally made from the toddy; see vol. I, 450 [arrack]. Leaves are used for thatching houses and making baskets [tokrah] and mats [boriyah]; they are also used for writing on with a style pointed with steel [cadjan, olay]; during the operation of writing the leaf is supported by the left-hand and the letters are cut or scratched upon its surface with the style, which is kept always in the same position, and the leaf is moved to the left-hand side by means of the thumb; to render the characters more legible, the engraved lines are occasionally filled by smearing the leaves with fresh cow-dung [shauny], which is tinged black by rubbing the lines over with cocoanut [q.v.] oil, or a mixture of oil and charcoal [adoopp kary] powder; all the sacred books of the hindoos, burmese, singhalese, &c., are still made of these olays [q.v.], some of them being highly ornamented; all old accounts [kanakk] in the village revenue department, and the majority of all grants of lands, leases, and accounts in shops, are still kept on these leaves; they used likewise to be sent as letters; palm-leaf books [grantam] are never much beyond 2 feet in length and 2 inches in breadth; they are said to last from one to four or five hundred years; small specimens of the leaves are also smoothed and flattened, the ends of the rays being cut off, then ornamented with mica [abruck], tinsel [caukkay pon], and peacock's [mayil] feathers, and made into ornamental fans; the leaves are also folded up so as to make light buckets for carrying water, or small temporary drinking vessels; they take a dye well; the fibres of the petioles of the leaves, palmyra naur [q.v.], are employed for making twine and small rope, they are about two feet in length. The centre of the stem is soft, but not often hollow; fibro-vascular bundles black, crowded in the outer portion of the stem; outer wood hard, heavy, and durable; the hollowed-out stems are used as water pipes [caurem]; and, split in half, for gutters and open water channels; the hard outer wood is used for posts, rafters, picottahs [q.v.], and other purposes; when of good age, the timber is very valuable for these purposes; the trunk is spiit into four for rafters, into eight for laths, these are dressed with an adze; from the structure of the fibres, the tree splits easily in the direction of its length, but supports a greater cross strain than any other wood; on the other hand iron nails rust rapidly in it; for house-building and various domestic purposes, the timber is the most generally used of the palm tribe; the trees have to attain a considerable age before they become fit for timber, as their wood becomes harder and blacker by age, and the harder and blacker it is the better; the wood near the circumference of old trees is very heavy and durable, the tree being endogenous; a cubic foot weighs 65 lb., and it is calculated to last eighty years. Small canoes are formed of this tree; two of the stems lashed to a couple of spars form the usual mode of crossing lakes and rivers in the circars [q.v.]; the root forms the head of the canoe, the smaller end is either elevated out of water by the form, or some six inches of the pith is left at that end; as this decays, a lump of clay supplies its place; formerly sea-going vessels were planked with this wood, but the iron fastenings were soon destroyed; boats planked with it were, till the middle of the nineteenth century, common on the godavery; the wood, known as porcupine wood [q.v.], is used in England for veneers and inlaying; in ceylon, it is used for rafters, pillars, and posts of native houses; in the sandy parts of Jaffna a hollow palmyra is inserted to form a well; the dark outside wood of

very old trees is used to some extent in Europe for umbrella handles, walking canes, paper rulers, fancy boxes, wafer stamps, and other articles; the whole stem of a tree is occasionally polished and used as a pillar in building; the timber of the female tree is the hardest and best, and that of the male tree is never used unless the tree be very old; the large carpenter beetle [zeerangy], xylocopa, delights in boring the wood, hard though it is. A special variety of this palm is particularly hard, close-grained, and dark-colored; it is generally brought from jaffna. The tamulians say that the palmyra will live and bear for 1,000 years; a tamul poem, the taula vilausam, enumerates 801 purposes to which it may be applied; the tamulians indeed regard it as only inferior in usefulness to the bamboo [q.v.] and the cocoanut [q.v.] palm [taur]. There is a Tamul proverb:—பனையின் நிழலும் நிழலோ பகைவர் உறவும் உறவோ?—"is the shadow of a palmyra tree a shade; is the acquaintance "of an enemy friendship?" There is another:—பனை விதை பெரிதாய் இருந்தும் நிழல் கொடுக்கமாட்டாது—"the "palmyra though from a large seed casts no shade." Nauladiyaur [q.v.] has a stanza:—கடையாயார் நட்பிற் கமுகனைய ரேனை இடையாயார் தெங்கினனையர்—தலையாயார் எண்ணரும் பெண்ணைபோன் றிட்டஞான் றிட்டதே தொன்மையுடையார் தொடர்பு—"in friendship those who are low "are like the areca palm; while those who are mediocre are like "the cocoanut palm; and the great who are at the top are like "the palmyra palm whose uses are difficult to reckon; the friend-"ship of those who have experience of the past when once made is "made for ever." The areca [q.v.] palm requires daily care; the cocoanut [q.v.] occasional care; and the palmyra no care after planting but its uses are countless.——**(1)** The vernacular identifications of the principal products of the palmyra palm are for convenience shown separately as follows.——*Arrack* (تاڑکے گڑکی شراب - tárkegurkísharáb, Hind.; പനഞ്ചാരായം - panañcháráyam, Mal.; பனங்கள்ளுச்சாராயம் - panangalluççáráyam, Tam.).——*Cabbage* (تاڑ کا کرد - tárkákrud, Hind.; പനഞ്ചോറു - panañchóru, Mal.; பனங்குருத்து - pananguruttu, Tam.). Tam. also (panangizhangu), meaning palmyra root, applied to young edible root.——*Fibre* (تاڑ کا نار - tárkánár, Hind.; പനനാർ - pananár, Mal.; பனநார் - pananár, Tam.).——*Fruit* (تاڑپھل - tárphal, Hind.; പനമ്പഴം - panampazham, Mal.; பனங்காய் - panangáy, Tam.).——*Gum* (பனம்பிசின் - panambisin, Tam.).——*Jaggery* (تاڑ کا گڑ - tárkágur, Hind.; പനവെല്ലം - panavellam, Mal.; பனங்கட்டி - panangatti, Tam.). Also called Panay vattoo, meaning palmyra + ball.——*Leaf* (تاڑ کا پتا - tárkápattá, Hind.; తాటాకు - tátiáku, Tel.; ഓല - óla, Mal.; பனையோலை - panaiyólai, Tam.).——*Matting* (பனம்பன்னாடை - panambannádai, Tam.). Fibrous web covering leaf rib.——*Nut* (تاڑکی گٹلی - tárkígutlí, Hind.; പനങ്കുരണ്ടി - panankuranti, Mal.; பனங்கொட்டை - panangottai, Tam.).——*Porcupine wood* (பனஞ்சேகுமரம் - panañjégumaram, Tam.). Outer portion of the trunk, from the resemblance of black and white fibres to the porcupine's quills [kharpoosht].——*Root* (گینگل - gengul, Hind.; പനങ്കുമ്പ് - panankúmpu, Mal.; பனங்கிழங்கு - panangizhangu, Tam.).——*Sago* (இளம்பனங்கிழங்குமாவு - ilambanangizhangumávu, Tam.). Tam. means tender palmyra root flour.——*Spathe* (பனம்பாளை - panambálai, Tam.). The fibrous covering of the inflorescence.——*Stem* (பனமரம் - panamaram, Tam.).——*Toddy* (تاڑی - tárí, Hind.; പനങ്കള്ള് - panankallu, Mal.; பனங்கள் - panangal, Tam.).——*Vinegar* (கள்ளுக்காடி - kallukkádi, Tam.).——**(2)** *Palmyra fish* (कवयी - kavayí, San.; تاڑکھول - tárkhaval, Hind.; గొరక - goraka, Tel.; କୋୟି - kóyi, Oor.; അണ്ടികള്ളി - antikalli, Mal.; කාවයියා - kávaiyá, Singh.; பனையேறி - panaiyéri, Tam.). Title from being sometimes found on the stem of palmyra trees near water's edge. San. from (kavi, san. intelligent) [cavy]. Hind. from (tár, hind. palmyra + khaval, hind. the fish, barbus ticto). Tel. means a missile. Oor. from sanscrit. Mal. from (anti, mal. nut + kalli, mal. thief). Singh. from sanscrit. Tam. from (panai, tam. palmyra, borassus flabelliformis, linn. + éru, tam. to ascend) [palmyra snake]. Oor. also (koryu). Tam. also (shennal), meaning red one. Title otherwise Climbing fish, Climbing perch, Kavay, Kay, Tree climber, Tree fish. Anabas scandens, labyrinthici, acanthopterygii, teleostei [matsyam, 30], of naturalists [jantoo]. Alias Amphiprion testudineus, scansor; Anabas spinosus, testudineus, trifoliatus; Anthias testudineus; Cojus cobojius; Lutjanus testudo, scandens; Perca scandens; Sparus testudineus, scandens. Cobojius from sanscrit. Fresh-water; lower jaw slightly longer; scales between lateral-line and the commencement of base of dorsal fin, over soft dorsal, caudal, anal, and base of pectoral; rifle-green, lightest on abdomen; during life there are usually four wide vertical body-bands, and a dark stripe from angle of mouth to preopercle; young have black blotch on side of base of tail, surrounded by light, sometimes yellow, ring; usually they have a black spot at end of opercle, and sometimes another at base of pectoral; extensively employed for stocking ponds, estuaries and fresh-waters; $8\frac{1}{2}$ inches in length; breeding season about june and july. The peculiar apparatus with which their gills are provided enables these fish to breathe as well out of the water as in it; the fishermen keep them for five or six days in an earthen pot or covered basket; if in a basket, it is necessary to keep it securely covered, as they can climb up the sides and escape with the greatest ease; they can travel a long distance on land, on occasions when the water they are living in becomes stagnant or dried up, and they can also, in common with several other indian fishes, remain in a semi-torpid condition under the mud for months together; hence they are often found after a heavy storm in places where they would the least be expected, and have frequently been supposed to fall from the clouds.——*Palmyra point* (பனைமரமுனை - panaimaramunai, Tam.). Otherwise called Point pedro. The north-east point of Ceylon, the high palmyra [q.v.] trees on which are conspicuous.——*Palmyra snake* (تاڑ کا سانپ - tárkásámp, Hind.; తాటికట్టెడ - tátikatteda, Tel.; പനയൻ - panayan, Mal.; பனையேறி - panaiyéri, Tam.). Title from the haunt. Hind. from (tár, hind. palmyra tree + sámp, hind. snake). Tel. from (tádi, tel. palmyra + katteda, tel. snake so called). Tam. from (panai, tam. palmyra + éru, tam. to ascend) [palmyra fish]. The term may be considered co-extensive with the family Dipsadidæ, ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 22], of naturalists [jantoo]. Not venomous. These are nocturnal tree-snakes, attain length of 6 or 7 feet, live on warm-blooded animals; some prey on birds [pacshy] only, others attack nothing but mammals [sastanam]. Coloration varied; green rarely forms the ground-color, brown and black prevail. The two species in Southern india are:—"*a*" Dipsas forsteni. Alias Triglyphodon forsteni. Brownish olive; lower parts yellow, with blackish spots along each side; a longitudinal median black band along the occiput and nape of neck; short black band along each side of the neck; another from eye to angle of mouth.—"*b*" Dipsas trigonata. Alias Coluber trigonalis; Dipsadomorphus trigonatus. Yellowish olive, with irregular white or yellow zigzag band along back, edged with black; crown of head with two dark bands edged with black, indistinct crown band from eye towards angle of mouth; belly white, with irregular series of brown dots along each side. Feeds on mice [shoondely].——*Palmyra swallow* (تاڑ ابابیل - tárabábíl, Hind. and Dec.; తాటిపిట్ట - tátipitta, Tel.). Title from resort and swallow-like flight. Hind. from (tár, hind. palmyra + abábíl, ar. swallow). Tel. from (tádu, tel. palmyra + pitta, tel. bird). Hind. also (tálchatak), meaning palm + sparrow. Title otherwise Ashy swallow shrike. Artamus fuscus, artaminæ, laniadæ [pingalam], dentirostres, insessores [pacshy, 19], of naturalists [jantoo]. Alias Ocypterus leucohynchos, rufiventer. General hue cinereous, or ashy-grey, purest on head, with tinge of rufous on back and scapulars; breast, abdomen, under wing-coverts, and under tailcoverts ashy-white, tinge of rufous on belly; quills and tail blackish ashy-grey, latter tipped narrowly with pale ashy; upper tail-coverts white beneath, showing white border next dark tail. Bill pale bluish, darker at the tip; legs slaty; irides dark brown. Length about 7 inches. Common in wooded districts, especially near the palmyra [q.v.] palm; small party may occasionally be seen; live entirely on insects [poochy]; flight is swallow-like [abaubil]. No other common species here.

PALO (پلو - palo, *Hind.*). Preparation of Goolancha [q.v.].

PAMIDY (పమిడి - pamidi, *Tel.*). A form of (paidi, tel. gold from pasi, tel. yellow). Gold. Plant first term. Ex.:— Cæsalpinia pulcherrima (pamiditangédu), golden cassia auriculata,

PAN (पण् - pan, *San.*). To barter, to stake.——*Panayam* (പണയം - panayam, Mal.). See sep. title.——*Paniny* (पाणिनि - pánini, San.). From (panin, san. proper name). Son of Panin. The celebrated ancient Sanscrit grammarian. The Paunineeyam grammar [lacshanam] is in eight books; it is, except to the initiated, in great confusion; yet it originally made an epoch in Indian literature. Paniny lived in the fourth century B. C.; born in the extreme north-west of India. See vol. I (57). Nunnool [q.v.] is quite independent.——*Pauny* (पाणि - páni, San.). From (pan, san. to deal in). Hand; also suffix in proper names, as Chuckrapauny or discus-handed vishnoo, Shoolapauny or the trident-handed shiva [peyar].——*Pundam* (പണ്ടം - pantam, Mal.). From (panya, san. article of trade). Articles.——*Pundaula* (പണ്ടശാല - pantála, Mal.). From (pantam, mal. articles + shálá, san. hall); once store-keeper in temples. Tribe in Malabar, of which the Rajah of Calicut is a member.——*Pundauram* (പണ്ടാരം - pantáram, Mal.). Treasury, government.——*Punnum* (பணம் - panam, Tam.). From (pan, san. to barter). Money. General term for coin, or other representative of property that passes current from hand to hand as a circulating medium [naunyam]. Same as Fanam.——*Punsawry* (پنساری - pansárí, Hind.). From (panya, san. ware + shálá, san. house). A druggist; a dealer in groceries, spices, herbs, &c.

PAN (பன் - pan, *Tam.*). Rush.——*Panrooty* (பன்ரொட்டி - panrotti, Tam. panruti *). From (pan, tam. rush grass used in mat-making + urattu, tam. uneven ground of dried mud).—"*a*" Deputy tahsildarry, South arcot district. Pay Rs. 70.—"*b*" Town, Deputy tahsildar's station, Railway station; South arcot dist., Cuddalore tal.; pop. 8,956; acres 725; lat. 11° 47′; long.

79° 36′; height 82 feet; from Chidambaram N.N.W. 27 miles; from Cuddalore W.N.W. 16 miles; from Madras S.S.W. 100 miles; from Tindivanam S.S.W. 31 miles; from Tricalore E.S.E. 26 miles; from Vriddhauchellam N.E. 23 miles; from the sea W. 16 miles. Large market town at junction of several roads. Centre for ground-nut [q.v.] trade of district. Old Shiva temple with fine gopooram [q.v.], and an old mosque [musjid].

PAN (பண் - pan, *Tam.*). To make, produce.——*Panikkan* (പണിക്കൻ - panikkar, Mal.). From (pani, mal. work + káran, mal. doer). Teacher of the use of arms in a family.——*Panipoora* (പണിപ്പുര - panippura, Mal.). From (pani, mal. work + pura, mal. house). A manufactory [caurgah, puttaday].——*Paniseyva* (பணிசெய்வ - paniseyva, Tam.). From (pani, tam. service + shey, tam. to do). Caste of conch-blowers to the tamul shoodras, corresponding to the teloogoo Dausaries [q.v.].——*Paniyan* (പണിയൻ - paniyan, obl.; പണിയൻ - paniyan, personal sing.; പണിയർ - paniyar, pers. pl., Mal.). From (pani, mal. work + an, mal. personal suffix). A rude tribe in Malabar. They dwell in small villages, each consisting of four or five huts, which are called Maudam [q.v.]. They are attached to Tumboorauns [q.v] or lords who give them daily subsistence, and exact daily labor. Disputes among them are settled by their masters, who must also furnish money to procure wives for their Paniyar. They take only one wife, but the marriage may be dissolved at either party's pleasure; all the children belong to the husband's master. This caste eat all kinds of animal food and carrion except beef, and may lawfully drink spirituous liquors [arrack]. They bury the dead without any particular ceremony [shavacaud]. The deity is called Cootty shauttan [q.v.], a juggler. They have no kind of priest. In Wynaud they wash river-lands and surface soils for gold [pon] See vol. II, 99.——*Punnay* (பண்ணை - pannai, Tam.). From (pan, tam. to produce). Lit. a farm establishment of laborers. A paddy field [vayal]. Punnaicaur is a watcher employed by the farmer; often used as general term for a pariah [q.v.] tribe man. Punnay choomay is a bundle of corn in the straw given to laborers in the time of harvest. Punnaiyaul is a laboring cultivator.

PANAY (பனை - panai, *Tam.*). From (pani, tam. to be agitated); from the rustle of leaves when blown upon by the wind. Same as Palmyra.——*Panayairy* (பனையேரி - panaiyéri, Tam.). Means palmyra + climber. The naturalists' fish family Percidæ [matsyam, 1].——*Pennay* (பெண்ணை - pennai, Tam.). Means palmyra. Old Tamul name for either the Pennair [q.v.] or the Ponniaur [q.v.].——*Punnauday* (பன்னாடை - pannádai, Tam.). From (panai, tam. palm + ádai, tam. texture). Fibrous netlike covering about the base of palmyra [q.v.] and cocoanut [q.v.] leaf stalks. Sometimes used for straining ghee [q.v.] and toddy [q.v.]; hence called neyyary or ghee-strainer.

PANAYAM (പണയം - panayam, *Mal.*). From (pan, san. to stake) [pan]. A simple mortgage of land, not necessarily with possession [adavoo]. If usufructuary, it is generally called Caripanayam or Coy panayam; if hypothecatory, Todpanayam or Choondy panayam. See vol. I, 128 and II, 104.——**(1)** *Panayam ola* (പണയോല - panayamóla, Mal.). From (above + óla, mal. cadjan). Otherwise Panayachaurtt. Mortgage-deed [adavoochit].——*Panayapaud* (പണയപ്പാട് - panayappátu, Mal.). From (above + pátu, mal. state). Article pledged or mortgaged.——**(2)** *Caripanayam* (കരിപണയം - karipanayam, Mal.). From (kari, mal. plough). Otherwise Coypanayam. Usufructuary form of mortgage, where the excess of the usufruct over the interest on the sum borrowed, if any, is to be returned to the mortgagor. No such return is made in Otty [q.v.].——*Choondy panayam* (ചൂണ്ടിപ്പണയം - chúntippanayam, Mal.). From (chúntu, mal. to point out). Hypothecatory form of simple mortgage. Same as Todpanayam.——*Oondarty panayam* (ഉണ്ടറുതി - untaruti, Mal.). From (un, mal. to eat + aruti, mal. end). A form of panayam, or simple mortgage, where the mortgagee has possession [caripanayam] and holds the estate till the usufruct or rents and profits repay the sum borrowed. The pauttom [q.v.] or rent is previously determined, and it is therefore known beforehand in how many years the debt will be liquidated, and the mortgagee is under no necessity of rendering to the proprietor an account of the produce of the estate. See vol. I, 128 and II, 104.——*Todpanayam* (തൊടുപണയം - totupanayam, Mal.). From (totu, mal. to touch). Mortgage of grounds without handing them over; same as Choondy panayam.

PANDAM (பந்தம் - pandam, *Tam.*). From (bandh, san. to bind) [bandah, bandhoo, bund]. Tie; torch [masaul].——*Pandacauval* (പന്തക്കാവൽ - pantakkával, Mal.). From (pantal, mal. shed + kával, mal. guard). A fee consisting of portion of crop given to a hired servant.——*Panda sairvay* (பந்தச்சேர்வை - pandaççérvai, Tam.). Means torch + worship. Solar [madhyamasowramaunam] festival [pundigay, 6d]. Celebrated in villages in honor of Vishnoo [q.v.] on a Saturday in Pooratausby [mausam], i.e., between 15th September and 15th October. Performance consists in affecting to be possessed by the spirit of a deity, and beating the body with a flaming torch [maryauday].——*Pandaul* (పందిలి - pandili, Tel.; പന്തൽ - pantal, Mal.; பந்தல் - pandal, Tam.). From (bandh, san. to bind). A shed [cotaur, cottye]. A temporary structure erected for a marriage ceremony [calyaunam]. A water pandaul is a place where water is given gratis to passers by [salivendla, tanneer pandaul], for which inams [q.v.] were assigned in former days. Plant first term. Ex., where transl. is of second term:—Cucumis melo, var. utilissimus (pandilidósa), cucumis sativus; Ipomæa bonanox (panditivankáya), solanum melongena. See gloss. paragraphs.——*Pandaul cucumber* (పందిలిదోస - pandilidósa, Tel.). Same as Country melon.——*Pundalore* (പന്തല്ലൂർ - pantalúr, Mal.). From (pandal, mal. shed + úr, mal. village).—"*a*" Hill; Malabar dist., Valavanaud tal.; lat. 11° 4′ N., long. 76° 13′ E; height 2,000 feet; from Calicut E.S.E. 30 miles; from Perindalaman N.N.W. 8 miles. Overlooking Malapooram. Covered for the most part with dense scrub jungle, but one or two semi-abandoned coffee [q.v.] gardens on its northern slopes. Race-course here for Europeans.—"*b*" village; Neilgherry dist., S.E. Wynaud tal.; lat. 11° 29′; long. 76° 23′. Was made head-quarter of the Head assistant collector, Neilgherries, in March 1889. Was of importance during early part of Wynaud gold mining speculations.

PANDANG (پندن - pandan, *Malay*). The screw-pine palm. Origin of generic name Pandanus.

PANDOO (पाण्डु - pándu, *San.*). From (pand, san. to move); mind-moving, attracting; applied to white color as being attractive; pale as of some northern race. The north-country king of Cooroos, reputed father of the five Pandavas, viz., Yoodhishtiran, Bheeman, Arjoonan, Nacoolan and Sahadevan. These in poetical language are said to have been the sons of gods; Yoodhishtiran being the son of dharman [q.v.] or justice; Bheeman of vayoo [q.v.] or the wind; Arjoonan of indran [q.v.] or the firmament; and the other two, who were twins, of the ashwiny [q.v.] comaurar, the twin physicians of the gods [deva]. These five brethren were famous for valour, but particularly Arjoonan [q.v.] who was the friend of Krishnan [q.v.]. Yoodhishtiran [q.v.] was also remarkable for truth and equity, and Bheeman [q.v.] for strength. The battle between them and Dooryodhanan [q.v.], and their conquest and possession of Cooroo cshetram, are circumstantially related in the Mahabhaurat [charitram, mahabhaurat]. See vol. I (1), (117).——*Pandava* (पाण्डव - pándava, San.). Son or descendant of king Pandoo. Has become confused with the Tamul word Paundy [q.v.] meaning a tamulian. See vol. I (79).——*Paundarungan* (पाण्डुरङ्ग - pánduranga, San.). From (above + ranga, san. color). Shiva [pundauram].——*Pundauram* (பண்டாரம் - pandáram, Tam.). See sep. title.

PANEER (پنیر - panír, *Hind.*). Cheese. Plant first term. Ex:—Guettarda speciosa (panírkáphúl), cheese flower. See gloss. paragraphs. Distinguish from Panneer.

PANTHY (پنتھی - panthí, *Hind.*). From (pant'há, san. a road) [pauthay]. The follower of any particular sect.

PANY (شبنم - shabnam, *Pers.*; اوس - os, *Hind.*; ಮಂಜು - manju, *Can.*; మంచు - mantsu, *Tel.*; മഞ്ഞ് - maññu, *Mal.*; பனி - pani, *Tam.*). Pers. from (shab, pers. night + nam, pers. wet). Hind. from (avashyá, san. fog). Dew. There is a Tamul proverb:—தையும் மாசியும் வையகத்து உறங்கு—"in tye "or january and maushy [mausam] or february sleep under "thatch;" because dew is then excessive [caulam]. And another:—பனிக்கண் திறந்தால் மழைக்கண் திறக்கும்—"if there be dew fall, there will be rain fall;" heavy fall of dew in dewy season is held to prognosticate good rainfall [mazhay] in the rainy season [caurtey, ritoo]. In agricultural economy dew serves to bring to perfection some of the dry grains [q.v.] and pulses [dholl]. Pany cutty is ice; also applied to frost or snow.——*Panipayar* (பனிப்பயறு - panippayaru, Tam.). From (above + payaru, tam. the pulse). A wild kind of pulse [dholl, vellaumay].——*Panneer* (పన్నీరు - panníru, Tel.). Rose water. Plant first term. Ex., where transl. is of second term:—Guettarda speciosa (pannírupuvvuchettu), flower tree; Rosa damascena (panníruchettu), tree. See gloss. paragraphs. Distinguish from Paneer.

PAPARKHAR (پاپڑکھار - paparkhár, *Hind*). From (pappar hind. cake so called + khár, hind. alkali). Country potash used in poppadams [q.v.]. See under Khar.

PAPAW (पोपया - pópayá, *Mahr.*; पोप्पायि - póppáyi, *Conc.*; عنبه هندی - anabahihindí, *Ar.* and *Pers.*; پپیا - papaya, *Malay*; *Hind.*; پپائی کا جھار - popáikájhár, *Dec.*; ಪಪ್ಪಾಯಿ - papaíyah, ಪರಂಗಿಮರ - parangimara, *Can.*; ಬಪ್ಪಂಗಾಯಿ - bappangáyi *Too.*; బొప్పాయి - boppáyi, *Tel.*; പപ്പായം - pappáyam, *Mal.*; පැපොල් - papol, *Singh.*; பப்பாளி - pappáli, *Tam.*). Title from malay. Mahr. and conc. from hindostany. Ar. from (anabah, ar. grape, vitis vinifera, linn. + hindí, ar. indian). Can. from (parangi, can. european + mara, can. tree). Mal. from hayti; Malay also (káliki). Can. also (pappangáyimara); (pangimara);

(goppenmara); (pappáyimara). Tel. also (madanaánapa), meaning pleasing + lagenaria vulgaris, ser.; (madhurnakamu). Mal. also (karmmós), meaning melon; (kappalam), meaning foreign fruit; (pappáyampázham), meaning papaw tree + spondias mangifera, willd. Tam. also (parangiyámanakku), foreign + castor-oil plant, ricinus communis, linn., from similar leaves; (pasalai), meaning green, from greenish fruit [indian spinach, small indian purslane]; (pappáyi). Title otherwise Foreign castor, Melon tree, Papaw mango, Papaya. Botanically Carica papaya, linn., passifloreæ [vricsham, 61]. Alias Papaya carica, communis, vulgaris. Tree, 20–30 feet, without branches; leaves alternate, palmate, seven-partite; segments oblong, acute, sinuated, the middle one trifid; fruit succulent, oblong, furrowed; calyx small, five-toothed; corolla tubular in the male and five-lobed in the female, divided nearly to the base into five segments; male flowers axillary in slightly-compound racemes or panicles, white female ones in short simple racemes, sometimes on a different tree; corolla longer than in the male, yellowish. Fast-growing, soft-wooded tree; native of tropical america; introduced; fruit formed by a large oblong gelong pepo suspended like the jack [q.v.] fruit; form of a pear [amrood], much larger than a cocoanut [q.v.]; ripens of a pale greenish yellow, resembling that of a fine orange-flesh melon [oorvauroo]; interior of fruit filled with small, olive-colored [zeitoon], shot-like seeds. The seeds contain an oil, papaya oil; caricin, an oil-like substance with a disagreeable taste and smell, soluble in ether and alcohol; an acid similar to palmitic acid, carica fat acid; a crystalline acid, papayic acid, insoluble in cold water, but soluble in hot water and alcohol; a resin acid, having an irritating and bitter taste, insoluble in water and ether, soluble in alcohol and alkalies; and a soft resin similar to that found in the fruit flesh of the female plant. The fruit secretes a milky viscid juice, which has the property of hastening the decay of muscular fibre, when the latter is exposed to its influence; the younger the fruit, the more milk it yields; when nitric acid [shorey ka tezaub], diluted with four parts of water, is added drop by drop to the milk expressed from very young fruit, at the centre of each drop a gelatinous pellicle is formed, divided by greyish streaks; at the same time the centre of the pellicles becomes opaque and of the color of the yolk of an egg, they enlarge as if by the prolongation of divergent fibres; the whole liquid assumes at first the appearance of an agate [akeek] with milky clouds and it seems as if organic membranes were forming under the eye of the observer; when the coagulum extends to the whole mass, the yellow spots again disappear; by agitation it becomes granular like soft cheese; the yellow color reappears on adding a few more drops of nitric acid [shorey ka tezaub]; after a few hours the yellow color turns to brown. Milky juice is medicinally anthelmintic; chiefly in round worms; substituted for british santonin [absinth]; seeds same as juice; gives to pharm. juice non-officinal. The fruit is best for eating during the summer; when ripe the interior is soft, yellow and sweetish, eaten by all classes and esteemed innocent and wholesome; when green it is used by natives in curry [q.v.], also pickled; the green fruit, when peeled, boiled, cut into small pieces, and served with sweet oil [zeitoon], vinegar [caudy], salt [ooppoo], and pepper [q.v.], serves as a palatable vegetable and is similar to squash [carcauroo] in taste; also made into tarts, when not easily distinguished from those made of apples [seb]; seeds have a water cress-like flavor [haleem]. Water impregnated with the juice makes meat washed in it tender; or another operation is to hang the flesh under the tree for two or three hours; another way is to wrap the meat in the leaves and then roast it; or a small portion may be boiled with the meat. Leaves employed by negroes in west indies to wash linen instead of soap [sanboon]. Tree is used for avenue-planting [shaulay]. No other common species here.——*Wild papaw* (కారుబొప్పాయి - káruboppáyi, Tel.). Tel. from (káru, tel. wild + boppáyi, tel. carica papaya, linn.). Tel. also (kódidzuttumánu), meaning cock + crest + tree; (karaka) [chebulic myrobalan]. Title otherwise Scarlet-flowered sterculia. Botanically Sterculia [cauvalam] colorata, roxb., sterculiaceæ [vricsham, 26]. Alias Erythropsis roxburghiana; Firmiana colorata. Leaves palmately five-lobed; segments acuminated; calyx cylindrical, clavate; carpels oblong, glabrous, long-stalked; calyx and carpels reddish-orange-colored; flowers large, red; flowering in the cold season. Large tree; forests of the plains, about foot of mountains throughout presidency; sheds its leaves in the cold weather, shortly afterwards covered with flowers, appearing as covered with numerous ramifications of red coral [moongah]. Bark used in rope-making; wood grey, very soft.

PAPEETA (پپیتہ - papítah, *Hind.*; கைப்பங்கொட்டைச் செடி - kaippangottaiççedi, *Tam.*). Title from spanish through hindostany. Tam. from (kaippu, tam. bitterness + kottai, tam. seed + shedi, tam. tree). Title otherwise St. ignatius' bean, Strychnine tree. Botanically Strychnos [mooshty] ignatii, bergius, loganiaceæ [vricsham, 89]. Alias Ignaziana philippinica. A branching tree, native of philippine islands; flowers white, smelling like jasmine [q.v.]; fruit large, pear-shaped [amrood]. Seeds are about an inch in length, their form is ovoid, but by mutual pressure it is rendered very irregular, and they are three to four or five-sided, bluntly angular or flattish, with a conspicuous hilum at one end; in the fresh state they are covered with silvery adpressed hairs; portions of a shaggy brown epidermis are here and there perceptible on those found in commerce; but in the majority the seed shows the dull grey granular surface of the albumen itself; notwithstanding the different outward appearance, the structure of papeeta beans accords with that of nux-vomica [poison nut]; only the radicle is longer, thicker, and frequently somewhat bent, and the cotyledons are more pointed; the horny brownish albumen is translucent, very hard, and difficult to split; the whole seed swells considerably by prolonged digestion in warm water, and has then a heavy, earthy smell; the beans are intensely bitter, and highly poisonous. Strychine is present in three times the quantity of that in nux-vomica nuts, but there is no brucine; medical uses same as nux-vomica [poison nut].

PAPPAH (பாப்பா - páppá, *Tam.*). From (pápa, tel. child). Non-bramin female proper name [peyar].

PAPPARAM (பப்பரம் - papparam, *Tam.*). From (babhru, san. a country, so called). Tamul name for the Goozerat country [bhoogolashastram, goorjaram].——*Pappara pooly* (பப்பரப் புளி - papparappuli, Tam.). Same as Baobab.

PAPPILY (रक्तवल्ली - raktavallí, *San.*; खांडवेल - khándavéla, *Mahr.*; ಪಾಪ್ಪುಲಿಗಿಡ - pápuligida, *Can.*; సురుగుడు - surugudu, *Tel.*; பப்பிளி - pappili, *Tam.*). Title from tamul. San. from (rakta, san. red + vallí, san. creeper); from red dye. Mahr. also (lókhandí), meaning hard [large jungle geranium]. Can. also (papli); (pampli); (paplichakke). Tel. also (suralatíga); (errachiratali); (yerrachicatti); (suratipattatiga). Tam. also (shurulbattaikkodi), meaning rolled + bark + creeper, from appearance of bark in the market; (vémbádai), meaning margosa + covering. Title otherwise Red creeper, Vembaudam bark creeper. Botanically Ventilago madraspatana, gærtn., rhamneæ [vricsham, 41]. Alias Ventilago denticulata. Large scandent shrub, reaches to top of highest trees in forests; the leaves are ovate, acuminate, coriaceous and shining flowers in slender spikes; fruit is samaroid, from 1½ to 2 inches long, and ⅜ inch broad; nut is about size of a pea [calauyam], girt at the base by remains of the calyx forming a disc; roots are from ½ to 1 inch in diameter, and rough with reddish loose scales. The bark occurs in very thin and light pieces, varying generally in length from ½ to 2½ inches, and in breadth from 1 to 6 lines; it is of a brown or reddish-brown color, odoriferous but almost tasteless; as sold in the bazaar, it contains a large quantity of small scaly pieces of its epidermis, which are still thinner, lighter and darker in color; the bark is collected extensively on northern slopes of neilgherries. Medicinal drug consists of the root-bark in scales made up of numerous papyraceous layers of a deep reddish-brown color, and in some of the older pieces, with a metallic lustre; this root-bark is medicinally carminative, stomachic, tonic and stimulant-diuretic; preparation is simple powder; doses, from thirty to ninety grains three or four times in the twenty-four hours; substituted for cascarilla, pimento [china pepper], calumba [q.v.] and cinchona [koinah]. Stem gives a gum [q.v.]; bark used for cordage; the root bark yields a red dye [shauyam], orange and chocolate with oldenlandia umbellata, linn. [chayroot], and black with galls [manchicoy]; chocolate often seen on borders of native cloths. Wood greyish-yellow, porous, soft. No other common species here.

PARA (पर - para, *San.*) [pra]. Distant, supreme, best, high, after, foreign, other. Enemy.——*Parabramh* (परब्रह्म - parabrahma, San.). From (above + brahma, san. the absolute). The supreme being [autmam, bramh]; a post-vedic term of the oopanishads [q.v.]. Since the time of Shuncarachàrry [shuncaran], the term has been specially used by the sheivas for Shiva [q.v.]. Sometimes this appears shorter as Paran [q.v.]. In modern books there is the assertion that Rama [q.v.], even Hanooman [q.v.], is Parabramh. The term Parashacty [q.v.] in the same works is applied to Seetay [q.v.]. Earlier books ascribe no shacty [q.v.] or feminine energy of any sort to Parabramh; but now the Parashacties are numerous [matam, paraupara vast, paty]. See vol. I (76).——*Paradesham* (परदेश - paradésha, San.). From (para, san. foreign + désha, san. region). Foreign land. Paradeshy is a foreigner or stranger, in common usage applied to a pilgrim or beggar.——*Paralocam* (परलोक - paralóka, San.). Means other world. Heaven. Going to paralocam is a euphemism common for dying [shivalocam, veicoontam].——*Param* (पर - para, San.). The east point of the compass. The duration of Bramha's [q.v.] life, consisting of a hundred of his years [calpam]. As measure of astronomical sidereal or star time, indian second; 60 soorams = 1 param; 60 params = 1 vighaticay or indian minute [caulam, 4, 5]; approximate actual value, 1 param = ·4 european second, or 24‴; same as vipalam [caulam, 6], caushta calay [caulam, 6]. See vol. I, 609.——*Parama hamsan* (परमहंस - paramahamsa, San.). From (parama, san. best + hamsa, san. an ascetic order so called). A religious man who has subdued all his senses [indriyam] by abstract meditation [yogam].——*Paramam* (परम - parama, San.). Extreme.——*Paraman* (परम - parama, San.). Shiva [q.v.] the supreme [paran]. Parama shivan or shiva the supreme is a common hindoo 2nd or pers. name [peyar].——*Paramatty* (ரமதி - paramathi, Tam.). From (paraman, tam. shiva + pathi, tam. place). Sanscrit name

(paraméshťhipura), meaning shiva, the supreme god + town.—"a" Deputy; tahsildarry, Salem district. Pay Rs. 70.—"b" Town, Deputy tahsildar's head-quarters; Salem dist., Namcull tal.; pop. 3,003; acres 2,623; lat. 11° 09′; long. 78° 04′; from Madras S.W. 199 miles; from Namcull S.W. 11 miles; from Ossoor S.S.E. 109 miles; from Salem S.S.W. 36 miles; from Tripatore S.S.W. 99 miles; from Yercaud S.S.W. 45 miles. Old Shiva temple with inscriptions and old Vishnoo temple. In the hamlet of Manrootty is an old Shiva temple with inscriptions. The Yidoomban coolam tank, really a dam across the Tirmany moottaur, is close.——*Paramaunoo* (परमाणु - paramánn, San.). Smallest atom. Thirty such atoms are supposed to form a mote in a sunbeam. The invisible base of aggregate bodies [bhootam]. The atomic bases of the puncha bhootam are as follows:—of earth, water; of water, fire; of fire, air; of air, ether; of ether, manyay.——*Paramaupamam* (परमापम - paramápama, San.). From (parama, san. extreme + apama, san. declination); the greatest declination. The inclination [natam] of a planet's [graham] orbit [cacsham] to the ecliptic [craunty mundalam]. Paramaupamacramam is the obliquity of the ecliptic which is constantly 24° by Hindoo siddhauntams [q.v.]. Paramaupama cramajyay is sine of a planet's greatest declination [cramam, craunty, jyotisham].——*Paramaurtam* (परमार्थ - paramárt'ha, San.). From (parama, san. great + art'ha, san. object). The great object or end of life [aram, samsauram], true wisdom or truth, knowledge of the real and universal nature of soul [autmam, nyaunam]. Paramaurtan is epithet of the Supreme being. Also a simpleton not experienced in worldly wisdom. Paramaurta gooroo katay is a story of gooroo noodle by Beschi [veeramaumoony].——*Paramautman* (परमात्मन् - paramátman, San.; பாமாத்துமா - paramáttumá, Tam.). From (parama, san. best + átma, san. soul). The soul of the world in opposition to Jeevautman [jeevam] the human soul [autmam]. For the discussion whether these are two or one, see Adweitam and Dweitam.——*Parameshty* (परमेष्ठी - paraméshťhí, San.). From (parama, san. supreme + st'ha, san. to stand). The supreme deity.——*Parameshwaran* (परमेश्वर - paraméshvara, San.; பாமேசுரன் - paramésuran, Tam.). From (parama, san. supreme + íshvara, san. lord). The heavenly lord, an epithet of the divine being. Also hindoo 2nd or pers. name [peyar].——*Paramparam* (परम्परा - parampará, San.). From (para, san. after + para, san. other). In succession, hereditary.——*Paran* (பரன் - paran, Tam.). Means distant with regard to time and space. He that is best. It corresponds with Bramh [q.v.], or Parabramh [q.v.] of the Oopanishad [q.v.]. In S. india the controversy is whether Vishnoo [q.v.] or Shiva [q.v.] is paran [paraman].——*Parasamayam* (பரசமயம் - parasamayam, Tam.). From (para, san. foreign + shamayam, tam. faith). Any religious system [samayam] except the six divisions of the Sheiva religion.——*Parashacty* (पराशक्ति - paráshakti, San.). From (para, san. supreme + shakti, san. power). Shacty, as the feminine power of the Paraupara vast [q.v.]. This shacty is represented as a woman in natural form with two hands, one of which she lets hang down, and in the other she holds a red water-lily [indian water lily]; while on another flower, called taumaray or lotus [nelumbo], she stands, and two of the same kind she has behind her ears; this flower is regarded as sacred. The color of her body is green. On her head she has a crown and on her brow three white streaks with a round spot [tilacam], the mark of all Sheivas. Her ears, with large holes in them, hang full of jewels. Round her neck she wears a string of pearls [moty], and another long one with various jewels hangs down to her breast. On her arms she has bracelets and rings after the fashion of the tamul women. Her garment is red. Round her waist she wears a golden belt with various jewels, and on her feet, silver rings; while a long garland hangs down from her shoulders. From this shacty [q.v.] Tamulians derive nine other shacties called Nava shacty; Ancaulamman, Bhadra cauly, Chamoondy, Doorga, Mauriyamman, Pidaury, Poodcalay, Poornay, Yellamma. Of these Poornay and Poodcalay are Ayenaur's [ayen] wives. Others say that the Parashacty has produced many thousands of other shacties. These shacties are evidently the village goddesses assimilated. The shacty is dignified with the name of Parvaty [q.v.] by orthodox followers of shiva [q.v.]; Lutchmy [q.v.] by those of Vishnoo [q.v.]. Some practise also a special shacty worship; see Vaumacharry [matam, paty]. See vol. I (77).——*Paraucrama tevan* (பராக்கிரமத்தேவன் - parákkiramattévan, Tam.). From (parákrama, san. valour + tévan, tam. title). Last of the second line of the Paundyan [q.v.] dynasty [raj]. Driven out in 1324 by Malik caufoor [q.v.]. See vol. I (123).——*Paraupara vast* (परापरवस्तु - paráparavastu, San.). From (para, san. distant + apara, san. near + vastu, san. thing). The being or existence which is itself the first and the last [parabramh]. The Tamulians in rare cases represent this as a material visible being. They then represent it with four arms. In two of its hands, which are lifted up, it holds weapons, viz., in the one the chunk [q.v.], and in the other the chuckram [q.v.], weapons of Vishnoo [q.v.]. With these however it is represented only by the Veishnavas. The Sheivas on the other hand represent the figure with a weapon and a device of Shiva [q.v.]. On its head it has a crown with the sun [sooryan] and the moon [chundran]. The color of its body is green. In its ears, and round its neck, hands and feet, it wears manifold decorations of pearls [moty], precious stones [ratnam], gold [pon] and silver [velly], like the gods. From its shoulder a cloth hangs down, and also a garland of various flowers; while both sides are covered with a cloth representing twelve worlds with various paintings in them. The remaining two of the fourteen worlds [locam] are on the breast, in the upper one of which is Bramha [q.v.], with four heads and four arms, having on his left hand his consort Saraswaty [q.v.], and on his right Devendran [q.v.], the king of the subordinate gods, standing as though he had something to report; while in the lower one, the world of the gods, there is Devendran, in a sitting posture, with four arms, and some gods standing before him, as though they were informing him of something. Further down on the body is the mountain Veicoontam [q.v.], where Vishnoo, having four arms, is sitting with his two wives, viz., Lutchmy [q.v.] on his right hand and Bhoomidevy [q.v.] on his left, and serpents [sheshan] are bending over his head. Then comes the mountain Keilausam [q.v.] on which Shiva likewise with four arms resides in a sitting posture, having on his right hand Nundikeshwaran [q.v.] with the head of an ox, standing, and on his left Parvaty [q.v.] his consort sitting; besides them, there are on both sides two Dwaura paulacans [q.v.] or door-keepers, while over Shiva to the right is Soobramanyan [q.v.], with a peacock [mayil] on which he rides, and to the left Vigneshwaran [q.v.] with an elephant's [q.v.] head. Through all these worlds and places passes the great mountain Mahameroo [q.v.], whose summit projects over the crown of the whole figure. At the bottom it is supported by eight elephants [ashtadic gajam] and eight serpents [ashta dicpaulacan], which rest on a tortoise [coormam], which is Vishnoo himself in his second incarnation [avatar]. But below the tortoise, there are still to be seen the feet of the figure representing the supreme being, to indicate that it is this which must support all in all. Round about the figure in the outer circle, there is a painting representing the seven great oceans [samoodram] and the seven great islands [dweepam]. This figure is only a painting found in some of the large pagodas [q.v.], nor does it receive adoration, [poojah] or offerings. See vol. I (79) [matam].——*Parauparay* (परापरा - parápará, San.) From (pará, san. distant + apará, san. near). Parvaty [q.v.]——*Parausharan* (பராசரன் - parásaran, Tam.). From (pará san. away + shrí, san. to kill). Destroyer. The sage so called. Hindoo 2nd or pers. name [peyar].——*Paropacaury* (പരോപകാരി - parópakári, Mal.). From (para, san. other + upakára, san. help). Vernacular newspaper.——*Parshoo* (परशु - parashu, San.). From (para, san. another, enemy + shrí, san. to hurt). A battle-axe, the weapon of Parshooraman [q.v.] Mazhoo [q.v.] is battle-axe of shiva [q.v.]——*Parshoorama mahautmyam* (परशुराममाहात्म्य - parashurámamáhátmya, San.). From (parashuráma, san. the hero, so called + máhátmya, san. greatness). Sanscrit work taken from the Bramhaunda pooraunam [q.v.]. This contains the early life of Parshooraman [q.v.], the quarrel of his father with the Cshatriyas [q.v.], the slaughter of the Cshatriyas, his proceeding to the west and there obtaining from the sea king and goddess of the sea as much land as he could cover by the flight of an arrow discharged from his bow. Having settled the country, he called in Bramins [q.v.] from the Aryavartam and located them there. As disputes arose among them he advised asking for a king from the Cholam [q.v.] country. The document omits any mention of the fishermen made Bramins, or of his displeasure against them. In some histories, the calling in of the Bramins from Hindostan is ascribed, not to Parshooraman, but to Mayoora vurman [keraloputty].——*Parshooraman* (परशुराम - parashuráma, San.). From (parashu, san. axe + ráma, san. name). Sixth avatar [q.v.] of Vishnoo [q.v.]. There are four legends, which may have historic bearings. Jamadagny was a rishy [q.v.], who with his wife Renoocay and his son Raman, lived in a hermitage in some place north of India. The wives of such sages were patyvratay [q.v.], preeminently chaste; and so cold that ice did not melt when held by their fingers. One day Jamadagny sent his wife to a river to fetch a block of ice, and, on her bringing it, it was found to be partly dissolved in her hands. In wrath he commanded his son to strike off her head, which he did with an axe or parshoo [q.v.]. Some pariah [q.v.] women interposed, and Raman struck off their heads likewise. Jamadagny repenting his rashness, meant to restore his dead wife; but in the hurry of the moment he joined her head to a Pariah's body, and the head of the Pariah to her body. Hence the Pariahs worship Renoocay as a goddess. Jamadagny again had with him the cow Caamadhain [q.v.], or cow of plenty, which a neighbouring chief with 100 arms coveted and on its being denied took by force. The rishy sent his son Raman, who in combat lopped off the arms one by one with his battle axe; whence the name Parshooraman. After this, making a third legend, Parshooraman exterminated all the Cshatriyas or soldier tribe, and gave their lands to Bramins. The Keraloputty [q.v.] and the Kerala mahautmyam [q.v.] add a fourth that Parshooraman demanded from the sea on their coast a further domain, which was granted to the extent that he could throw his battle axe. Standing north at Gocurnam near Goa he threw his axe forty yojanams [q.v.] or four hundred miles; and, to that extent on a parallel with Gocurnam the sea retreated. He placed fishermen on the recovered land and made them semi-Bramins. He returned to

Ahichatray on the Kistna, but thence afterwards brought a colony of pure Bramins, disgracing and displacing the former colony. The high land of the West coast presents unmistakeable traces of a plateau or terraced character, which is best displayed about Trivandrum and northwards past Cochin into the Malabar country. This terrace must be of late tertiary or postpliocene period, and it marks, like the long stretches of laterite [q.v.] and sandstones [manal cull] on the eastern side of the country, the last great elevation of Southern india, prior to which the Indian land rose almost directly from the sea by its Western ghauts [q.v.] and had an eastern shore line which is now indicated very well by the inner edge of the Tanjore, South arcot, Madras, Nellore, and Godavery belts of laterite [q.v.] and sand-stone [manal cull]. In S. india Renoocay has become Yellamma. Parshooraman is one of the ever-living saints or chiranjeevies [q.v.]. The present Malabar era [saca] is called after him; it is reckoned in cycles [chuckram] of a thousand years. According to many accounts Ramchendran [q.v.] and Parshooraman were contemporaries [matam]. See vol. I (74), (115).——*Parshooramasrishty* (परशुरामसृष्टि - parashurámasrishti, San.). From (srishti, san. creation). The creation of Parshooraman [q.v.], or the Malabar coast from Gocurnam to Cape comorin.——*Paurpatya* (ఀ పరపత్యము - párapatyamu, Tel.). From (para, san. other + pati, san. lord); lordship over others. Management. Paurpatyagar is under manager of a chuttram [q.v.] or temple. [coil, pagoda]. A clerk under a village accountant [curnum].

PARA (పర - para, *Tel.*; പറ - para, *Mal.*; பர - para, *Tam.*). From (para, tam. to be extended). Plain.——*Par* (பார் - pár, Tam.). Bank; pearl [chunk, moty] bank. There are numerous off the Tuticorin coast, all known by different names, as for instance:—Devy par, queen-bank; Mosal teev par, hare-island bank; Nullatunniteev par, fresh-water island bank; Odacaray par, ferry bank; Ooppootunniteev par, salt-water island bank; Pausy par, moss bank; Poondotta par, flower-garden bank; Poothoo par, new bank; Tolauyiram par, nine-hundred bank. ——*Paramacoody* (பரமக்குடி - paramakkudi, Tam. paramakudi *). From (parambu, tam. embankment + kudi, tam. village); on the veigay. Town, Telegraph office, seat of District moonsif; Madura dist., Ramnaud zemindarry; pop. 9,287; lat. 9° 33′; long. 78° 38′; from Madura S.E. 40 miles; from Ramnaud N.W. 20 miles; from the sea W. 22 miles. On southern bank of Veigay and on Ramnaud-Madura road. Large and spacious stone pavilion and chuttram [q.v.], where alms are daily distributed. Inhabitants mostly weavers. The ironsmiths are Mussalmans. Cloths, silks [puttoo], muslins [q.v.], silk carpets, vestures, turbans [puggry], women's silk and colored cloths are manufactured. Annual festival. Yams [anloo] thrive in great abundance. Weekly market on Thursday.——*Paramba* (പറമ്പ് - parampu, Mal.). High ground unsuited for rice [q.v.] cultivation. Also a garden of cocoanut [q.v.] and other trees which may contain a dwelling-house. The low slopes bordering ravines in Travancore. Suffix in place names; as Coottooparamba, meaning dancing ground.——*Parambil chaundy* (പറമ്പിൽചാണ്ടി - parambilchándi, Mal.). From (paramba, mal. garden + chándi, mal. alexander). A native cattanar, called Alexander de campo. First Native bishop of the Roman catholic faith, consecrated at Cadoottoortty, north-east of cottayam, which was then one of the chief strongholds of the Romo-syrian party [syrian].——*Paramboo* (பரம்பு - parambu, Tam.). Roller for consolidating soil [nolla]. ——*Parava* (பரவ - parava, obl., Tam.). From (paravai, tam. expanse, sea); seaman. A dark-skinned almost black race in the extreme south of the peninsula, living in villages along the sea coast and earning their bread as fishermen with nets, lines, and hooks. In 1532, Michael Vaz, afterwards Archbishop of Goa, assisted the Paravar fishermen against the Mahomedans, since which time they have been Roman catholics. Ten years after, Xavier lived among them. Then the Jesuit fathers of the Madura mission worked there, notably Beschi [veeramaumoony]. To be distinguished from Pariahs. See vol. I (68); II, 131.——*Paraval* (பரவல் - paraval, Tam.). From (paravu, tam. to spread). Overspreading. Paravalcaud is brushwood.——*Paravanaur* (பரவனாறு - paravanáru, Tam.). From (paravan, tam. fisherman + áru, tam. river). River; South arcot dist., Chidambaram and Cuddalore tals. Rises in lat. 11° 36′ N., and long. 79° 33′ E. and after a course of about 32 miles, generally north and parallel to the coast, enters the sea at Cuddalore in lat. 11° 43′ N., long. 79° 49′ E. Navigable for short distance by boats of 4 tons burthern throughout year. Connected with Vellaur by a canal, which, begun in 1856–57 and stopped at the time of the mutiny, was reopened as a famine work in 1878.——*Paravay* (பரவை - paravai, Tam.). From (paravu, tam. to spread). Expanse.——*Paravore* (പറവൂർ - paravúr, Mal.). From (para, mal. plain + úr, mal. village). Title otherwise Paroor.—"a" Talook, Travancore state, Cottayam division. Area 47 square miles. The most densely populated portion of the state. Population 61,966. Its extreme north and south points are 17 miles apart, and its extreme east and west points are 12 miles apart. Sub-divided into six praverties [q.v.] and containing eighty-nine caras [q.v.] or villages. At one time belonged to Cochin but in 1762 made over to Travancore. Bounded N., S. and W. by the Cochin state. E. by the Aulangaud talook. Soil is sandy. There are some backwaters. Cocoanut [q.v.] trees largely cultivated. Paddy [q.v.] cultivation. Periyaur waters a portion.—"b" Village, Port; Travancore state, Cottayam division, Paravore tal.; pop. 11,024; lat. 10° 9′; long. 76° 16′; from Alleppey N. 46 miles; from Cottayam N.N.W. 43 miles; from Madras W.S.W. 340 miles; from Nagarcoil N.N.W. 156 miles; from Quilon N.N.W. 88 miles; from Trivandrum N.N.W. 123 miles; from Bombay S.S.E. 640 miles; from Calicut S.S.E. 82 miles; from the sea E. 4 miles. Chief place of talook. Zillah [q.v.] and Moonsif's court. Formerly a large military station. Its decay dates from Tippoo's invasion. Most of its churches and pagodas [q.v.] were destroyed by him. Still a large mart. Large temple.——*Parla* (పర్ల - parla, Tel.). From (parra, tel. open plain). Locative plural. Suffix in place names; as Valaparla, meaning right-hand plain.——*Parony* (പറോണ്ണ - parónna, Mal.). From (paravan, mal. fisherman + úr, mal. village). Village, Sub-port attached to Taunore; Malabar dist., Ponnany tal.; pop. 4,243; lat. 10° 54′; long. 75° 56′; from Bettatt poothiyangaudy W.N.W. 3 miles; from Bombay S.S.E. 578 miles; from Calicut S.S E. 25 miles; from Cootye N.N.W. 4 miles; from Ponnany N.N.W. 8 miles; from Taunore S.S.E. 5¼ miles. Contiguous to Taunore. Residence in former days of Paravannore panikkar, a deshavauly [q.v.]. Small Moplah [q.v.] village lying by side of sea in Patchattiry amshom [q.v.].——*Parpanangaudy* (പരപ്പനങ്ങാടി - parappanannáti, Mal. parpanangádi *). Means bazaar in parapnaud. Town, Moonsif's court, Railway station, Port; Malabar dist., Yernaud tal.; pop. 5,219; lat. 11° 03′; long. 75° 54′; height 38 feet; from Bombay S.S.E. 564 miles; from Cadaloondy S.S.E. 4 miles; from Calicut S.S.E. 14 miles; from Munjery W. 18 miles; from Taunore N.N.W. 6 miles; from the sea E. ½ mile. Small port on open coast, between Taunore and Beypore, with trade in salt-fish and country produce. Palace of Cshatriya [q.v.] family of Parapnaud rajah at a short distance. In event of failure of heirs in Travancore family a girl may be adopted from this family to continue that line.——*Parroo* (పర్రు - parru, Tel.). From (parava, tel. flood). Swamp.——*Paumb* (பாம்பு - pámbu, Tam.). See sep. title.——*Paura* (పార - pára, Tel.). From (paratsu, tel. to spread). Spade; iron with a wooden handle.——*Paura* (പാറ - pára, Mal.). Rock. Suffix in place names; as Aunipaura, meaning nail-like rock.——*Pauray* (शिला - shilá, San.; كارڠ - karang, Malay; ಬಂಡೆ - bande, Can.; ಪಾಡೆ - páde, Too.; చట్టు - tsattu, Tel.; പാറ - pára, Mal.; பாறை - párai, Tam.). Title from tamul. San. from (shí, san. to sharpen). Tam. from (para, tam. to spread); layer or bed [par]. Rock. In geological writings this word is understood to mean any mineral substance occurring in large masses. Sand [manal] and clay [calimunn] in large quantities form rocks, as well as limestone [choonam cull] or granite [caroom cull]. Suffix in place names; as Manapauray, meaning sand rock. For fishes of this name see sep. title.

PARACA (పరక - paraka, *Tel.*). Corruption of (ara, tel. half + kálu, tel. quarter). An eighth part [ganitam].

PARADISE (فردوس - firdaus, *Ar.*). Greek παράδεισος. Prefix. ——*Paradise apple* (سيب فردوس - sebifirdaus, Hind.). Same as as Pummelow.——*Paradise fish* (ماهی فردوس - máhíifirdaus, Hind.). Title from shining colors. Same as Robaul.

PARANGHY (പറങ്കി - paranki, *Mal.*; பறங்கி - parangi, *Tam.*). From the mediæval term Franky. European [europe, faranghee, firangy, foreign, seema, vilauyaty]. Plant first term, often joining two genera. Ex., where transl. is of second term:—Anacardium occidentale (parankimávu), mangifera indica; Ananas sativus (parangihalasu), and (parangipelakáyi), artocarpus integrifolia, (parangittázhai), pandanus odoratissimus; Anona reticulata (parangiççakka), artocarpus integrifolia; Benincasa cerifera (parangikkáy), fruit; Boswellia serrata (p'harangisámbránichettu), incense + tree; Capsicum annuum (parangimunchi), (p'harangimenasinakāyi), and (parankimulaku)' piper nigrum; Carica papaya (parangimara); tree, (parangiyámanakku), ricinus communis; Cucurbita maxima (parangikkáy), fruit; Jatropha curcas (parangiharalu), ricinus communis; Parkinsonia aculeata (parangivél), acacia. See gloss. paragraphs.

PARAY (பறை - parai, *Tam.*). Drum. The drums used vary as to their size, construction, material, and manner of being carried. A damaroo [q.v.] is carried by a bull, a dunkah [q.v.] on a horse [ghorah], a nakkaura [q.v.] by an elephant [q.v.] or camel [ottagam], and a bhairy on a cart [bandy]. Other kinds of drums are carried by men, as the tappattay [q.v.], a small drum which hangs from the left shoulder and is beaten under the left arm from below with a stick in the right hand and from above with a small stick in the left hand. The tausha, a small semi-globular shaped drum, is worn in front round the neck below the chest and beaten with two small sticks. The dole [q.v.] is a big drum, which is also carried over the neck, but is beaten with the hand one side and a stick the other. The paray proper, which has the complimentary name of alancauram, is not carried when beaten, but lies on the ground between the feet of the drummer and is used at festivals, weddings, and funerals. It is beaten only by Vettiyauns who burn corpses and dig graves. The tappattay and tausha are in fashion among the

Pariahs [q.v.] and other low classes, though Mahomedans and Shoodras use them occasionally. The beaters of the other drums are mostly Shoodras. The Kotar [q.v.] and the Todahs [q.v.] on the Neilgherries also have the tappattay and tausha [sangeetam]. ——*Pariah* (मातङ्ग - mátanga, San.; دهیر - dher, Hind.; ಹೊಲೆಯ - holeya, Can.; మాల - mála, Tel.; പുലയൻ - pulayan, Mal.; பறையன் - paraiyan, Tam.). Title and Tam. from (parai, tam. drum); cf. maula. San. from (mata, san. will + ga, san. to go), self-willed; as being beyond caste pale [maudiga]. One of the great aboriginal tribes. Most of such tribes have general titles; that of the tamul Pariah is Shaumbaun [q.v.], which also means drummer. Poolaya [q.v.] is the term by which they are known in Shen tamul [q.v.].—"*a*" Pariahs are regarded by the mixed Dravidian population who have adopted the creed and thoughts of Hindooism as of very low grade, but they are anything but out-castes or men who have been expelled from other castes. In the Capardagiry inscription of Asoca [q.v.], which is engraved also on the rocks at Girnar in Cattywar and of Dhowlee in Cuttack, are the words:—"In all "the subjugated territories of king Priyadarshy and also in the "bordering countries, as Choda palaya or paraya, Satyapootra "Keralapootran, Tambapunny, &c." Here the Pariahs are named in the centre of the Dravidian group, with the Cholans, Keralans of malabar, and Singhalese. The Pariahs of the Tamul countries believe that they were once the most important race. Those of Tondaimundalam [q.v.] in South arcot consider themselves the real proprietors of the soil. The head Vettiyaur pariah at Trivalore in Tanjore carries the chowry [q.v.] or fan of the god Tyaugarajan [q.v.] or Shiva [q.v.]; and in Madras, at the festival of Yegauttaul, [q.v.] the sole mother, it is a Pariah who puts the talee [q.v.] or marriage cord around the neck of the goddess. The Comaty [q.v.] shopkeepers of Madras before contracting marriage, send an offering of betel [q.v.] to the Chucklers or shoemakers; and in Vizagapatam Bramins go through the ceremony of asking the consent of the Maulas [q.v.] to their marriage. At Mailcote, the chief seat of the followers of Ramaunoojacharry, the Holeyar [q.v.] have the right of entering the temple on three days in the year, specially set apart for them. At the bull games at Dindigul the Cullar [q.v.], or robber caste, can alone officiate as priests. There is a proverb:— பறையர் இடங்கை அல்ல அவர்கள் தமிழர்.—"the pariahs "are not left-hand [yidangay] they are tamulians." Compare the following from Athenæus:—"Berossus, in the first book of "his Babylonian history, says, that in the eleventh month, called "Loos, is celebrated in Babylon the feast of Sacea for five days, "in which it is the custom that the masters should obey their "domestics, one of whom is led round the house, clothed in a "royal garment, and him they call Zoganes."—"*b*" The Pariahs are not even the lowest of the aboriginal races. In the Tamul country there are ten castes who are lower in the social scale than the Pariah, and from these are excluded the Pullar [q.v.], who dispute precedence with the Pariah. As regards the question whether the Pariahs are Dravidian, see vol. I (32)—(36), and (69). The view taken in these pages is that they are distinctly Dravidian without fusion, as the Hindooized castes are Dravidian with fusion. They comprise a tenth of the population and are probably a race of almost unmixed blood. No other race in immediate contact with civilization is known which presents the characteristic to the same extent. They constitute indeed a well-defined distinct ancient race, independent of all others, and which has its own sub-divisions, its own peculiar usages, its own traditions, and its own jealousy of the encroachments of the castes which are above it and below it. Political revolutions have been the cause of their subversion by other kindred Dravidian tribes. The Pariahs call themselves the elder brothers of the Bramin [q.v.]. They have according to the Nyauna vettiyaun eighteen titles like the Vellaular [q.v.] and possess also the same insignia.—"*c*" Pariahs are wholly different in appearance from the leather-working race, the Chuckler or Maudiga [q.v.].—"*d*" Pariahs have their own spiritual pastors, called in tamul Vulloovar, Tauthar, Pundauram, Sanjeevy. Pariahs nominally worship Shiva, but really are devil-worshippers or else worship the female deities called Mauriyauttaul, Canly, Ponniyammah and Mandiammaul, in whose small temples they offer rice, flowers, turmeric [country saffron], &c. About 1 in 150 of the Pariahs have become Christians and these only marry among themselves. From the peculiar stand-point of Tamul literature, the Pariahs have often excelled in education. Avvaiyaur [avvay], a Pariah woman, is famed throughout the Tamul nation for her poetry. The Cooral [q.v.], the most popular poem ever produced in the Tamul country, was written by Tirvulloovar, the divine Vulloovar, a Pariah. It is read and admired by Tamul hindoos of every class and creed. Another Pariah poet, Capilan, author of the Agaval, was supposed to have been a brother of the author of the Cooral, and his works still hold a high place in public esteem.—"*e*" The Pariahs are by occupation usually the servants of the Shoodra agriculturists paid in kind. Those in the large towns in the employ of the Europeans in Southern india, are quick, intelligent, and active. The race is emigrating with great rapidity to the West indies, Mauritius, Cape colony, and the Burmese provinces, &c., where all sectarian or social distinctions are unknown. The Pariah clans are found in every village and town in the peninsula. They are settled in houses, their quarter being usually apart from other residents and outside the walls of fortified places, and called parcherry [q.v.] in the Tamul country. The mark for their signature is a staff, while that of the chuckler [q.v.] is a knife. Their original most distinctive occupation was beating the paray [q.v.] or tom-tom at funerals, but, as they multiplied, they were obliged to do indiscriminately all kinds of work. The Vetty, the village servant of the Tamul people, is a Pariah. They are still theoretically despised by all but a few of the lowest classes of natives. They are obliged to live apart from their employers in their parcherry [q.v.], and must never come near a Bramin [q.v.] or a Vellaular [q.v.] or indeed, any respectable man; but they are so numerous and so useful that they are gradually pushing their way into a better position. They are the principal supporters of the right-hand caste [valangay] in the periodical disputes between the two hands [yidangay], in which they always range themselves against the Pullar [q.v.]. Pariahs have their own washermen and their own barbers. They have also their own musicians of the Periya mailam [q.v.] class to perform on occasions of marriages among them. They eat carrion and even beef and may drink spirituous liquors. They will not eat with others. They bury their dead [shavacaud]. At their marriages no religious service takes place, but guests assemble, the priest sings songs to an accompaniment upon a drum, and some of the guests dance. When the auspicious moment arrives, the bridegroom ties the talee [q.v.] to the bride's neck, all his friends clap their hands loudly. With the exception of the minor section called Aroott cattautha, all Pariahs allow their widows to remarry, and all guard the chastity of their married women as jealously as do caste people. Indeed among the higher sections as they are called of the Pariahs, a married woman guilty of a proved act of adultery is doomed to perpetual concubinage or single life, so is also an unmarried woman, whose virginity has been violated or who has been guilty of a single act of incontinence. They are a most patient and industrious class and generally faithful to their masters; they rarely commit open robberies, and their thefts are restricted generally to their immediate wants.—"*f*" The Tamul literature of later days speaks of Pariahs with a kind of good-natured contempt. The following are Tamul proverbs:—எழுபது சென்றாலும் பறை ஏவினாற்றான் செய்யும்—"though seventy years old, a pariah "will do nothing unless he is prompted."—பறைப்பாட்டுக்கும் பறைப்பேச்சுக்கும் சுரைப்பூவிற்கும் மணம் இல்லை—"a pariah's song, his dialect, and a shooray [fakeer's bottle] "flower have no fragrance in them."—பனைமரத்திற்கு நிழல் இல்லை பறையனுக்குமுறை இல்லை—"a palmyra [q.v.] "tree casts no shade, a pariah has no rules."—பார்ப்பான் கறுப்பும் பறையன் சிவப்பும் ஆகாது—"a black bramin and "a fair pariah are not trustworthy."—"*g*" The numbers for the presidency, including those of all languages are some 3½ millions.—"*h*" There are very many sub-divisions of the Pariahs. Thus taking the pariahs of the southernmost districts alone:—Aliya pariah; from (ala, tam. term of address); from form of address to parents; address their fathers by title of alei and their mothers by that of ala, meaning father, mother; compare ayya-ammay pariah below; many of them are employed in dressing skins [chamrah] for exportation, &c. Amboo pariah; from (ambu, tam. arrow); proper profession is hunting with the bow and arrow; they act as shikarries [q.v.] and beaters to zemindars [q.v.] and others. Arippoocaura; from (arippu, tam. sifting + kára, san. doer); wash sand for gold [pon], where gold is procurable; they find very minute particles of the precious metal in the veigay in madura, but not in sufficient abundance to repay their exertions. Aroott cattautha pariah; from (aru, tam. to cut + kattu, tam. to tie + á, tam. negative particle); so called talee when once cut, not tied again by re-marriage; the observance because their widows are not allowed to remarry; the observance of this high caste custom causes them to be somewhat respected. Ayya-ammay pariah; from (aiyan, tam. father + ammai, tam. mother); from form of address to parents; are in the habit of addressing their fathers and mothers respectively by those two titles; cf. aliya pariah. Chunk pariah; from (shankha, san. shell); wear shells on the left arm and are thereby readily distinguished; they blow conches [chunk] at ceremonies and do various kinds of work. Coliya pariah; from (kóliya, tam. caste of weavers so called); weave cloths of a coarse description. Coody pariah; from (kudi, short for kudimagan, tam. barber); the barbers who shave pariahs. Cottagacaur pariah; from (kottagai, tam. shed); stable man; mostly rough riders and grooms. Doorchauly pariah; from (dur, san. prefix implying inferiority + játi, san. caste); eaters of frogs [bhaicam], mussels [chippy], jackals [q.v.], &c. Mooraja pariah; from (muraja, san. drum so called); play on a kind of tom-tom [q.v.]. Ooppa-raiya pariah; scavengers, remove night-soil, &c. Ottagacaur pariah; spinners of cotton [q.v.] thread [nool]; when work is slack, they till the soil and do other kinds of work. Peroom pariah; from (perum, tam. great); a better sort of pariahs, employed principally as gentlemen's servants, &c. Pola pariah; from (polam, tam. badness); make mats [boriyah], baskets [tokrah], &c., of bamboo [q.v.], rushes, osiers, and similar materials. Shoolagoo catty pariah; from (shulagu, tam. winnowing sieve + kattu, tam. to bind); live chiefly by winnowing paddy [q.v.] and other kinds of grain [dhaunyam]. Shozhiya pariah; from (shózham, tam. country so called); are generally hawkers of cheap wares. Tamul pariah; from (tamizh, tam.

tamul); are usually merchants and are regarded as men of some substance and respectability; these have three divisions, tungalaun, vella, and congoó, of which the first is the highest and the last not largely represented; the vella pariahs are those who do scavengering work, which the tungalauns refuse to do; both vella and congoo pariahs eat cows [pashoo] that have died a natural death, while tungalauns only eat such as have been slaughtered; the tungalauns profess to have once been a very respectable class and still wear the thread at weddings and funerals, while the other divisions never assume it; the tungalauns are sometime called mariahs. Tautha pariah; from (táthan, tam. vaishnava mendicant); often wander about as religious beggars of the veishnava sect and subsist entirely on alms given to them by all classes of people. Tavalay tinnoom pariah; from (tavalai, tam. frog + tin, tam. to eat); eat frogs [bhaicam], the local name of the doorchauly [q.v.] tribe. Tee pariah; from (tíyan, mal. toddy drawer); belong properly to malabar. Tonda pariah; from (tondu, tam. slavery); usually employed as cultivators and predial slaves; but some are petty traders, some artisans, some domestic servants, some horse-keepers [q.v], and the like. Toty pariah; from (tótti, tam. village servant so called); are to be found in every southern village; they are the village scavengers and messengers, and a certain number of them are paid for their services by government [inam]. Tungalaun pariah; from (tangalán, tám. honorary title of pariah); see tamul pariah above; the most numerous group, and, with the exception of the vulloovans [q.v.], the most respectable; they are usually employed as cultivators and predial slaves, but some of them are petty traders, some artisans, some domestic servants, some horsekeepers, and the like. Vadooga pariah; from (vadugu, tam. telugu language); belong properly to the teloogoo country and veishnava sect and are hippophagists; they are often employed as palankeen bearers [boy]. Valay pariah; from (valai, tam. net); live properly by netting birds and work of a similar nature. Vettiyaur pariah; from (vettimai, tam. work of a town servant); properly beat tom-toms and act as undertakers at funerals; they also attend as tom-tom beaters when other ceremonies are performed, and eke out a living by hawking goods and doing odd jobs of various kinds; some of them are to be found in every village, their services being indispensably necessary wherever hindoos live in numbers. Vulloovar pariah; from (valluvan, tam. pariah priest); are the most respectable, inasmuch as they act as gooroos [q.v.] or spiritual pastors to the others; tirvulloovar [q.v.], the celebrated tamul poet, belonged to this family. Yecauly pariah; from (égáli, tam. washerman); are washermen [dhoby, vunnaun] by profession.—"*i*" See vol. i (85); ii, 232, 236.—"*j*" As the term pariah has come to mean one rejected and condemned by society, it has been applied by anglo-indians to the ownerless village dogs [nye] of the villages [pie, pye].

PARGOO (పరుగు - parugu, *Tel.*). Means a run. As far as a man can run without stopping. Linear measure. 2,000 niloovoos = 1 pargoo; 4 pargoos = 1 aumada [alavay, 1b]. Approximate actual value, 1 pargoo = $2\frac{1}{2}$ miles. Varies. Same as San. crosham, Hind. coss, Can. hardaury. See vol. I, 609; II, 505.

PARI (परि - pári, *San.*) [pra]. Prefix meaning about, over.—*Palampore* (پلنگپوش - palangposh, Hind.). Hind. from (palang, hind. bed + púsh, pers. cover). Title corrupted through the analogy of Salampore; which see. Counterpane. Often erroneously applied to all varieties of printed cottons [chintz], including canopies, prayer cloths or mats [boriyah], handkerchiefs [roomaul], and cloths for male and female wear. These are manufactured in the district of Cuddalore, at Ponnairy, also at Sydapett in the outskirts of Madras, but especially in the town of Masulipatam; the last always of a superior kind, and in various sizes, $5\frac{1}{2}$ to 6 cubits in breadth, and 7 to 8 long, and are sold from 6 to 51 rupees, according to size. The Cuddalore, Ponnairy, and Sydapett fabrics are of ordinary quality and are sold at from 2 to 7 rupees each.——*Palang* (پلنگ - palang, Hind.). From (paryanka, san. bed). Bed.——*Palankeen* (پالکی - pálkí, Hind.; పల్లకి - pallakí, Tel.; பல்லக்கு - pallakku, Tam.). Title corr. from teloogoo. Tel. from (paryanka, san. bed) [palang]. Otherwise Palky. A long, low, closed carriage in which the occupant reclines at full length, and which is borne, by means of two projecting poles one at each end, on the shoulders of 4 or 6 men. Palankeens used to form one of the articles which Eastern rulers presented to their subjects, or gave them permission to use. Grants were sometimes made for their use. Double or treble sets of bearers generally attend it to render the burden as light as possible, and those who carry are relieved every five or ten minutes by fresh relays [anchey]. Good bearers are distinguished from bad by not stopping to change shoulders or for relay. When changes are avoided, they do 5 miles an hour without discomfort.——*Palky* (پالکی - pálkí, Mal.). Same as palankeen.——*Parichauracam* (परिचारक - paricháraka, San.). From (above + char, san. to move). Serving in a temple [coil, pagoda].——*Paridhy* (परिधि - paridhi, San.). From (pari, san. on all sides + dhá, san. to place). Properly the circumference of a circle [chuckram], but more generally an epicycle [cacsham, prauk chuckram]. Also applies to halos round sun [sooryan] and moon [chundran], much regarded in astrology [jyotisham].——*Paripoornam* (பரிப்பூரணம் - parippúranam, Tam.). From (above + púrna, san. full). Hindoo 2nd or pers. name. Common to both sexes [peyar]. Generally given to the last born when no more children are desired.——*Parishishtam* (परिशिष्ट - parishishta, San.). From (above + shish, san. to leave). Treatises supplementary to the sootrams [q.v.]. They are intended to convey to the multitude, in a popular form, general information regarding religion. They mark the transition from the Vedic [vedam] to the Pooraunic literature [pooraunam].——*Parivauram* (பரிவாரம் - parivāram, Tam.). From (above + vára, san. cover). Retinue.——*Parivraujacan* (परिव्राजक - parivrájaka, San.). From (above + vraj, san. to go). Mendicant, or one at the fourth stage [aushramam] of a Bramin's life.

PARNAM (पर्ण - parna, *San.*). From (pri, san. to fill, to protect); foliage a vesture and protection. Leaf. Plant second term, often joining two genera. Ex., where transl. is of first term:—Alpinia officinarum (éláparní), elettaria cardamomum; Desmodium gangeticum (shálaparní), shorea robusta; Flacourtia cataphracta (khadiraparní), acacia; Pterocarpus santalinus (tilaparní), sesamum indicum; Sanseviera roxburghiana (píluparní), salvadora persica; Teramnus labialis (máshaparní), phaseolus mungo, var. radiatus. See gloss. paragraphs.——*Parny* (पर्णी - parní, San.; بناس پتی - banáspattí, Hind.; ಪರ್ಣಿ - parni, Can.; పర్ణ - parna, Tel; പന്ന - panna, Mal.; நீர்வேம்பு - nírvémbu, Tam.). Title, &c., from sanscrit. Hind. from (ban, hind. forest + pattí, hind. leaf). Tam. from (nír, tam. water + vémbu, tam. margosa tree, melia azadirachta, linn.). Fern. Botanically the order of Filices [vricsham, 157]. That is to say the first branch of acotyledons, or acrogens, or cryptogamic plants, or plants with disguised flowering organs; the other branches being the Club-mosses or lycopodiaceæ [shookaram], the Horse-tails or equisetaceæ [ashwa vauly], the Mosses or musci [pausy], the Mushrooms and moulds or fungi [caulaun], the Lichens [cullpausy], and the Seaweeds or algæ [cadalpausy].——*Paun* (پان - pán, Hind.). From (parna, san. a leaf). Same as betel [q.v.]; given to guests after entertainment.——*Paundaun* (پاندان - pándán, Hind.). From (pán, hind. leaf + dán, pers. holder). Betel leaf box.——*Paun kah beerah* (پان کا بیڑا - pánkábírá, Hind.). The parcel of betel [q.v.] leaf, nut and quicklime [choonam], &c. [putty].——*Paunmalah* (पानमळा - pánamalá, Mahr.). From (pán, hind. betel + malá, mahr. plantation). Betel-vine garden.——*Paunsoopyaury* (پان سپیاری - pánsupiyárí, Hind.). From (pán, hind. betel + supiyárí, hind. areca nut). The total ingredients chewed in combination with the betel [q.v.]. Include betel-leaves [q.v.], areca nut [q.v.], catechu [q.v.], quicklime [choonam], aniseed [anise], bishop's weed seed [ajwaun], coriander seed [cassibor], cardamoms [q.v.] and cloves [lavangam]. These are folded up in a leaf. The compound offered along with otto of roses [attar] to visitors, intimates the termination of the visit. It is sometimes sent abroad to friends at festival time [charvanam, eed, putty].

PARPATAM (पर्पट - parpata, *San.*). So called from sound of bursting. Botanically the Mollugo genus, ficoideæ [vricsham, 66]. Inconspicuous annuals having dichotomously branched stems with verticillate leaves, rarely opposite and small inconspicuous flowers. The species best known to the natives are:—cerviana [hazaurdanah], spergula [tirye], stricta [wild tirye].——*Field parpatam* (क्षेत्रपर्पटी - kshétraparpatí, San.; کھیت پاپڑ - khetpápar, Hind.). San. from (kshétra, san. field + parpatí, san. oldenlandia). San. also (gandhabhadra), meaning fragrant bhadray. Botanically the Oldenlandia genus, rubiaceæ [vricsham, 71]. Slender erect or diffuse branched herbs; leaves small and narrow; flowers small, white or pink; capsule small, many-seeded; seeds angled or globose. The species best known to the natives are:—corymbosa [wild chay root], dichotoma [counterfeit chayroot], umbellata [chayroot]. Other s. indian species indigenous or naturalized are:—aspera, biflora, crystallina, heynii, nudicaulis, paniculata, shuteri, trinervia.

PARRAH (పర - para, *Tel.*; പറ - para, *Mal.*; பறை - parai, *Tam.*). From (paru, tam. to become bulky, to swell). See vol. I, 609; vol. II, 514, 516, 519.—"*a*" Measure of capacity on W. coast. 10 yidangazhies = 1 parrah; $2\frac{1}{2}$ parrahs = 1 mooda [alavay, 3d]. Approximate actual value, 1 parrah = 1,140 cubic inches, or say half a bushel. Pauttaparrah is a large measure used by jenmies [q.v.] in measuring pauttom [q.v.]. Compare Marcam.—"*b*" Measure of capacity of choonam [q.v.]. 5 mercauls = 1 parrah; 80 parrahs = 1 garce [alavay, 3a]. Approximate actual value, 1 parrah = 2 cubic feet 144 cubic inches. Compare Pootty of ganjam, Toom of nellore.—"*c*" A superficial measure on W. coast implying land requiring a parrah of seed. 10 yidangazhies = 1 parrah [alavay, 2d]. Approximate actual value, 1 parrah = $\frac{1}{8}$ acre.—"*d*" Superficial measure of N. circars [q.v.]. 16 parrahs = 1 veesam [alavay, 2b]. Approximate actual value, 1 parrah = 3,315 square feet. Compare Anna, Puddy or Nauzhy.

PARROT TREE (توت - tút, *Pers.*). From (tútí, hind. parrot). Same as Indian mulberry.

PARS (پارس - párs, *Pers.*). Persia.——*Parsee* (پارسی - pársí, Hind.). Community settled chiefly in Western india, and

especially in Surat and Bombay, the descendants of refugees from Persia. They have in a measure adopted Hindoo customs. They observe the Zoroastrian or fireworshipping religion. They have adopted Goozeratty [q.v.] as a language. They have a special aptitude for trade. Distinguishable by their hats which have a square front but towards the back of the head form a hollow.——*Pauraseecam* (पारसीक - párasíka, San.). Persian race. See vol. I (3).——*Persia* (پارس - párs, Pers.). The country. Compare:—Alhagi maurorum, persian manna; Carum carui, persian carraway; Melia azedarach, persian lilac; Prunus amygdalus, persian almond; Rosa centifolia, persian rose; Rosa damascena, persian rose; Salvadora persica, persian salvadora. See gloss. paragraphs.

PARTY (పర్తి - parti, *Tel.*). Village.——*Partiaul* (పర్తియాల - partiyála, Tel.). From (above + ella, tel. frontier). Village; Kistna dist., Nundigauma tal. This and a few other villages are those whence the celebrated Golcondah diamonds [vajram] were derived. The old workings are to be seen in every direction. Belongs to Nizam.

PARVAM (पर्व - parva, *San.*; பருவம் - paruvam, *Tam.*). From (prí, san. to fill). Knot or joint; joint of body, limb; a break or pause, division; a division of time; the days of conjunction [amavausyay] and opposition [powrnimay] of sun [sooryan] and moon [chundran]. Section of a book, especially in mahabhaurat [q.v.]; the latter goes by some descriptive name, as vana parvam, forest section; compare the third book of the iliad called by the greeks the bravery of diomede; or the volumes of herodotus called clio, euterpe, &c.; the bhaugavatam uses no titles but numerals; thus dashamam means the life of krishnan [q.v.] in 10th book of bhaugavatam [q.v.]; in many sanscrit works the chapter or books are denoted by fanciful names, oollausam, samoodram, dweepam, stabacam, meaning delight, sea, isle, nosegay and so forth. Means season specifically in tamul districts, the rains [mazhay] proper of the N.E. monsoon [peira]. In Madura in this sense called Caulam [caulam, caur, caurtey].——*Parvatam* (पर्वत - parvata, San.). From (parva, san. knot or joint); means having elevations. Mountain. In ceded districts [q.v.] commonly understood of Srisheflam. Female proper name among the lower castes [peyar]. Plant first term often joining two genera. Ex., where transl. is of second term:—Jatropha curcas (parvatéranda), ricinus communis; Leea hirta (parvatapadi), foot; Melia azedarach (parvatanimba), melia azadirachta. See gloss. paragraphs.——*Parvateeshan* (பார்வதீசன் - párvathísan, Tam.). From (párvatí, san. the mountain goddess, so called + ísha, san. lord). Epithet of Shiva, lord of Parvaty [q.v.]. Hindoo 2nd or pes. name [peyar].——*Parvateeya* (पार्वतीय - párvatíya, San.). Dwellers in mountains. A Sanscrit designation of the aborigines.——*Parvatipore* (పార్వతీపురము - párvatípuramu, Tel.). See sep. title.——*Parvaty* (पार्वती - párvatí, San.). From (parvata, san. mountain); as born of the Himalaya. Ἥρα of Greeks; Juno of Romans, Isis of Egyptians. The mountain goddess, daughter of Dacshan [q.v.], wife of Shiva [q.v.]. Parvaty is represented in S. india by the form of a woman with four arms and hands, two of which she lifts up, holding in the one a damarcam [q.v.] or small drum, and in the other a pausham [q.v.] or cord; and the remaining two she bends and keeps empty. On her head she wears a crown, and on her forehead Shiva's sign of sacred ashes [tirneer, vibhooty]. The color of her body is green. Her ears, neck, breast, arms, hands, and feet are adorned with jewels and ornaments; from her shoulders a garland hangs down; and a flower is her standing place. Of this description an image of her, cast of metal, may be seen in the pagodas [q.v.] by the side of Shiva; but she is also represented by other forms. Parvaty has no pagodas of her own, but she is always worshipped together with her husband in the Shiva pagodas; she has also separate small shrines within the Vishnoo pagodas, where she is adored under the form of an image of stone. In the former pagodas she is moreover daily worshipped together with her husband under the form of the lingam [q.v.]; and the offerings which she receives are of the same kind as those made to Shiva, only the forms of prayer are different. Her principal names are the following:—Abhiraumy or the beautiful one, Aghora shacty or the wife of aghoran, Akhilaunda naicky or the mistress of the universe, Ambicay, Ammah or mother, Caumacotatty, Caumautchy or with fascinating eyes, Chamoondy, Chitravully or the choice one, Cunniyammaul or the virgin, Devy or goddess, Doorga, Eeshwary or the mistress, Gowry or red one, Haranidattaval or she who is haran's left side, Cauly, Malaimadanday or the mountain lady, Mautah or mother, Meenautchy or the fish-ruler, Oomah the protector, Parameshwary or the heavenly mistress, Paraunparay or the most high, Saty or the virtuous wife, Shacty or energy, Shaumbhavy, Shivacaumy or shiva's beloved one, Soondary or the beautiful one. There are many books containing stories concerning Parvaty. Among those written more especially in her honor the following may be mentioned:—Abhiraumyauntaudy, a poem in which she is extolled as abhiraumy or the beautiful; Ambica maulay, a book containing 30 songs; Shivacauma sowndary, a collection of songs; Sowndarya lahary, a poem in which her beauty is extolled. All these books the children at school learn by heart. It will be seen that Parvaty, like her husband, has two characters, a pleasing and a terrible one. In the latter form she is identified in Southern india with Granmadevatays [q.v.] or village deities. The history of the development of the idea of feminine energy [shacty] deified may be clearly traced through the names given to this goddess. Ambicay, who at a later period is identified with the wife of Roodran [q.v.], is in the Vedas [q.v.] declared to be his sister. Oomah, the daughter of Himavat or the Himalaya, is the next form. Parvaty, the mountain-goddess, also the daughter of Himalaya, is now the common title. In her girlhood she had the epithet of Girijay, mountain-born; when older, she was termed Gowry, the bronze-colored one; and as married she became Parvaty. She appeared latest as Cauly [q.v.], the black goddess, and in this capacity was once propitiated by human sacrifices and invoked when the destruction of an enemy was sought. There is a legend at Conjeevaram that Parvaty once put her hands over Shiva's two eyes, and the consequence was universal darkness; she was sent down to Conjeeveram to do penance for this fault. The legend seems to show that the Bramins have a record of a total and preternatural darkness once on the earth. By the shactibhactans Parvaty is worshipped as Lalitay, Shyaumay, Tripoora soondary. See vol. I (78) [cauly, doorga, matam]. Parvaty is also a Hindoo proper name; applied to males and females; as a female name it is familiarly shortened into Pye, Pauty, Pautchy, Paurvo, Pauroo [peyar].——*Parvaty cozhnan* (பார்வதிக்கொழுநன் - párvathikkozhunan, Tam.). From (párvatí, san. the goddess + kozhunan, tam. husband). Shiva, as husband of parvaty.

PARVATIPORE (పార్వతీపురము - párvatípuramu, *Tel.*; parvatipur *); called after parvatamma of the belgaum zemindar's family [parvam]. Sanscrit name (párvatípura).——**(1)** Division; Vizagapatam district; area 799 square miles; population non-Agency 109,185, Agency 40,259; language Teloogoo in the plains; Ooriya and Khond in the Narraipatam agency. N. inland talook of district. Boundaries:—north, Royagada, Coraputt and Goonapore divisions; west, Bobbily and Saulore divisions; south, Palcondah division; east, Goonapore division. Physical aspect undulating with small rocky hills in the south. The north is occupied by lofty portions of the Eastern ghauts [q.v.]. Soil regar [q.v.], red ferruginous [sevval munn], white and gray calcareous [sookkaun munn] and arenaceous [manal] series. Brass [pittalay], bellmetal [cunts] and copper [taumram] vessels are made. Iron [auhan] is manufactured. Cloths of ordinary description are made. Gold [pon] and silver [velly] ornaments also manufactured. There is much trade in hill produce such as lac [q.v.], horns [sing], skins [chamrah], wax [mom], turmeric [country saffron], drugs and dyes [shauyám], &c. Irrigated by numerous tanks [q.v.]. Places of archæological interest:—Belgaum, Cooroopaum, Parvatipore. The leading places, &c., in the division are the following.——*Belgaum* (బెలగాము - belagámu, Tel.). See sep. title.——*Cooroopaum* (కురుపాము - kurupámu, Tel.). See sep. title.——*Langoolya* (లాంగూలియా - lánguliyá, Tel.). See sep. title.——*Lutchmipore* (లక్ష్మీపురము - lakshmípuramu, Tel.). See sep. title.——*Merangy* (మేరంగి - mérangi, Tel.). See sep. title.——*Mrityoonjayanagaram* (మృత్యుంజయనగరము - mrityunjayanagaramu, Tel.). Called after the zemindar of that name. Zemindarry village; pop. 1,541; lat. of village 18° 47′; long. 83° 25′; from Parvatipore W. 4 miles; from Vizagapatam N. 74 miles. The village was built by Mrityoonjayan, the present zemindar of Sangamvalsa. The founder of the family was a retainer of Ramchendra deo, successor of Vishwambhara deo of Jeypore, who made him zemindar of Sangamvalsa with the title of Nishanka bahaudur. These chiefs were dispossessed with the other hill zemindars by Vizianagram in 1769, and admitted to a towjee. In 1796 the estate was restored to the representative of the eldest branch, Nishanka vencannah. With Nishanka vencannah the permanent settlement was made, the assessment being Rs. 6,700. Vencannah was succeeded by his son Peddanna, owing to whose mental incapacity the estate was placed under the Court of Wards in 1820. He died in 1829 and shortly after his posthumous son Mrityoonjayan was recognised as his heir. The latter, on coming of age in May 1847, was put into possession of the estate. He left the old fort at Sangamvalsa, built a good tiled house about 2 miles to the east and called it with the surrounding houses Mrityoonjayanagaram after his own name. The chiefs belong to the Condarauz [q.v.] tribe.——*Narraipatam* (నారాయణపట్టణము - náráyanapattanamu, Tel.). From (náráyanudu, tel. proper name + pattana, san. town). Village; pop. 1,804; lat. 18° 52′; long. 83° 13′; from Parvatipore W. 18 miles; from Vizagapatam N. 80 miles. Hill, Place of pilgrimage of Juggernautsawmy; One of the original seats of the Jeypore maharajah. Had a guddee [q.v.] with 32 steps called after Vicramarcan under ground.——*Parvatipore* (పార్వతీపురము - párvatípuramu, Tel.). See below.——**(2)** Deputy tahsildarry; Vizagapatam district. Pay Rs. 100.——**(3)** Town, Head-quarters of Belgaum zemindar; Vizagapatam dist., Parvatipore division; pop. 10,053; lat. 18° 47′; long. 83° 28′; from Coraputt N.E. 45 miles; from Madras N. 438 miles; from Narsapatam N.E. 91 miles; from Vizianagram N. ... ; from Vizagapatam N. 74 miles;

45 miles. Named after the founder Parvatamma, of the Belgaum zemindar's family. The Belgaum zemindar, whose capital is at this place, belongs to the Condarauz caste. Veeravara toder mull taut rauz, Jugganath patro, paternal great grandfather of the present zemindar [q.v.], was Diwaun [q.v.] to Ramchendra deo of Jeypore. He was influential in keeping the Jeyporeans from joining the insurgents in 1794, and was afterwards confidentially employed in settling that part of the country which was apportioned amongst the representatives of the ancient families dispossessed by the Poosapauties [q.v.]. He had accumulated a good deal of money; the zemindars restored by the company had little or no capital, and the Patro [q.v.] took advantage of his position by making his own terms for the accommodation of these feudatories towards the payment of the public demands. In 1796, fourteen villages in the neighbourhood of the town of Parvatipore, taken from the contiguous hill zemindarries, were granted for life to the son, Soondra narayana patro, as an acknowledgment of his father's services; and at the permanent settlement, the lease was converted into zemindarry [q.v.] tenure at a peshcush [q.v.] of Rs. 10,500. In 1856, the zemindar borrowed Rs. 75,000, principal and interest, of the Merangy zemindar, and put him in possession of the estate for a term of twelve years. He died in July 1865 and was succeeded by his eldest son, Narayana ramchendra. This zemindar was in his turn succeeded by Dhananjayataut rauz who died in October 1888, leaving a widow empowered to adopt a son. The estate has been lately taken under the Court of Wards. Peshcush Rs. 10,332. A very important centre of trade between the hills and Central provinces on the one side and the plains on the other, being at the junction of the three roads from Palcondah, Central provinces, and Vizianagram.

PASANCARAY (பசங்கரை - pasangarai, *Tam.*). From (pasu, can. to divide + karai, tam. field); holding by shares. Equitable distribution, joint proprietary of lands of a village by coparceners. Cf. Aroothy caray, Samoodauyam. See vol. I, 112.

PASCHIMAM (पश्चिम - pashchima, *San.*). Means behind. The west point of the compass [ashta dic, tisay]. Paschimakhandam is coast of Malabar. Paschimaumboodhy is Arabian sea.

PASH (पश् - pash, *San.*). To bind.——*Pashoo* (गो - gó, San.; गाय - gáya, Mahr.; بقر - bakr, Ar.; گاو - gáú, Pers.; گائی - gái, Hind.; لامبو باتنه - lámbubátina, Malay; ಆಕಳು - ákalu, Can.; ಪೆತ್ತ - petta, Too.; ఆవు - ávu, Tel.; ଗାଈ - gáyi, Oor.; പൈ - pai, Mal.; ගෝ - gó, Singh.; பசு - pasu, Tam.). San. from (gam, san. to go) [go]. Malay from (lámbu, malay, kine + bátina, malay, female of animals). Tam. from (pash, san. to bind); as bound to a stake in sacrifice. Cow. There is a Tamul proverb:—அசைந்து தின்கிறது மாடு அசையாமல் தின்கிறது வீடு—"a cow eats moving; a house eats standing "still." For cattle generally see Maud. Pashoo also means an animal in general; also soul [autmam, paty].——*Pashoopaty* (पशुपति - pashupati, San.). From (pashu, san. soul + pati, san. a lord). Shiva. There is a special treatise on the Paushoopatam worship, which is one of the six orthodox forms of Sheivism [ootchamayam]. Distinguish from Poosapauty [q.v.].——*Pashoopaty pausham* (पशुपतिपाश - pashupatipásha, San.). From (pashu, san. soul + pati, san. lord + pásha, san. bondage). A technical expression among the Sheivas to indicate life [jeevam], the deity [eeshwaran], and illusive power [mauyay, paty].——*Pashoorogam* (पशुरोग - pashuróga, San.). See sep. title.——*Pausham* (पाश - pásha, San.). From (pash, san. to bind). The cord of Shiva [paty, shiva].——*Paushandy* (पाषण्डी - páshandí, San.). From (pásha, san. fetter + an, san. to sound); one who teaches false doctrines which lead to fetters of wordly existence. Heterodox hindoo; a jeina [q.v.] or booddhist [booddha]. A heretic also among the Jeinas.——*Paushaunam* (بارنگن - bárangan, Malay; పాషాణము - páshánamu, Tel.; പാഷാണം - páshánam, Mal.; පාසානම - pásánam, Singh.; பாடாணம் - pádánam, Tam.). Title from tamul. Tel., &c., from (pash, san. to bind). Malay also (wárangan). Mineral poison. Especially arsenic. Arsenic is a steel-grey metal with brilliant lustre, very brittle and tarnishes on exposure to the air; sublimes at a temperature below fusing point, and gives off colorless fumes with a garlic-like [lussoon] odour. Hakeems [q.v.] do not give arsenic internally, but veidyans [q.v.] have for many centuries given white oxide in very minute doses with aromatics to check obstinate intermittent fevers [jwaram]; also in glandular complaints, tendency to apoplexy, and leprous affections [cooshtam]. To render arsenic inert solutions of alkaline sulphurets, or of soap [sauboon], or vinegar [caudy] are used. Arsenic in small doses is a medicine in elephantiasis [cochin leg]. For realgar see Manoshilay. For yellow orpiment see Hartaul. According to natives paushaunam is either native or prepared, and thirty-two kinds are recognised in each. The following are some of the different kinds:—Gowry paushaunam, from (gaurí, san. yellowish) is golden colored arsenic; Parangy paushaunam, from (parangi, tam. portuguese) is sublimate of mercury [sowveeram]; Vellay paushaunam, from (vellai, tam. white) is arsenious acid [soofaid soombal]; Yely paushaunam, from (eli, tam. rat) is white arsenic or rat's bane.——*Paushoopatastram* (पाशुपतास्त्र - páshupatástra, San.). From (pashu, san. soul + pati, san. lord + astra, san. missile weapon). The bow of Shiva given to Arjoonan [q.v.].

PASHAPA (పచ్చెపువాడు - paççepuvádu, *Tel.*). From (paççemu, tel. swindling + vádu, tel. doer). A swindler [cuttiry].

PASHOO ROGAM (पशुरोग - pashuróga, *San.*) [pash]. Cattle disease. To rinderpest [vishajooram] and anthrax [pilavay] most of the mortality here is due. Pleuro-pneumonia is rare. As also foot-and-mouth disease [caulvyecomaury]. Among the Tamuls the best known cattle [maud] maladies are the following. ——*Alary* (அலரி - alari, Tam.). From (alar, tam. to spread). Rinderpest [vishajooram].——*Ammay* (मसूरिका - masúriká, San.; سيتلا - sítlá, Hind.; అమ్మవారు - ammavâru, Tel.; വസൂരി - vasúri, Mal.; அம்மை - ammai, Tam.). Title and Tam. from (ammá, tam. mother). San. from (masúra, san. lentil, vicia hirsuta, koch.); hence lentil-shaped eruption. Hind. from (shítala, san. coldness), from cool treatment or offerings; goddess of small-pox. Tel. from (amma, tel mother + váru, tel. title of respect). Mal. from sanscrit. A kind of small-pox.——*Ashay podaumay* (அசைபோடாமை - asaibódámai, Tam.). From (asaibódu, tam. to chew the cud). Loss of cud.——*Cadoopp noppy* (शूल - shúla, San.; كركرى - kurkurí, Hind.; కడుపునొప్పి - kadupunoppi, Tel.; வயிற்றுவலி - vayittuvali, Tam.). San. from (shúl, san. to be ill). Hind. from (kurakura, mahr. grumbling sound). Tel. from (kadupu, tel. belly + noppi, tel. pain). Tam. from (vayiru, tam. belly + vali, tam. pain). Gripes.——*Calitchal* (ग्रहणी - grahaní, San.; اسهال - ishál, Hind.; கழிச்சல் - kazhiççal, Tam.). San. from (grah, san. to seize); epithet of the small intestines, as retaining food and assisting digestion by discharge of bile. Hence affection of small intestines. Hind. from arabic, meaning loosening of the bowels. Tam. from (kazhi, tam. to pass out). Diarrhœa.——*Capaula shoolay* (कपालशूल - kapálashúla San.; دماغ کا ورم - damághkávaram, Hind.; கபாலசூலை - kabálasúlai, Tam.). San. from (kapála, san. skull + shúla, san. pain). Tam. means skull + pain. Inflammation of the brain.——*Caul canay* (காற்கணை - kárganai, Tam.). From (kál, tam. leg + kanai, tam. plumpness). Soreness of the hoofs.——*Caul noy* (கால்நோய் - kálnóy, Tam.). Tam. means foot + disease. Various diseases of the feet. ——*Caulvye comaury* (كومارى - komárí, Hind.; கால்வாய்க் கோமாரி - kálváykkómári, Tam.). Tam. means leg + mouth + cow + epidemic. Foot-and-mouth disease. See sep. title. ——*Caura calitchal* (காரக்கழிச்சல் - kárakkazhiççal, Tam.). Means pungent + diarrhœa. A sort of diarrhœa.——*Causam* (कास - kása, San.; نزلہ - nazlah, Hind.; காசம் - kásam, Tam.). San. from (kás, san. to cough). Hind. from (nazala, ar. defluxion). Bronchitis.——*Cautchal* (ज्वर - jvara, San.; تپ - tap, Hind.; காய்ச்சல் - káyççal, Tam.). Fever.——*Cautt novoo* (காற்று நோவு - káttunóvu, Tam.). Means wind + pain. Rinderpest. Same as Alary [vishajooram].——*Cautt rogam* (پيچش - pechish, Hind.; காட்டுரோகம் - kátturógam, Tam.). Title from tamul from (kádu, tam. forest + róga, san. disease); caused by eating the first growth of grass after rains. Hind. from (pechídan, pers. to twist). Dysentery.——*Codiroo janny* (हनुस्तम्भ - hanustambha, San.; دانت كيلى - dántkílí, Hind.; கொடிறுசன்னி - kodirusanni, Tam.). Title and Tam. means jaw + convulsion. San. from (hanu san. jaw + stambha, san. obstruction). Hind. from (dánt, hind. tooth + kílí, hind. key). Lock-jaw or tetanus. ——*Colly veengoo* (مونگا - múngá, Hind.; கொள்ளிவீங்கு - kollivíngu, Tam.). Means fire brand + swelling. Malignant sore-throat, generally fatal.——*Comaury* (கோமாரி - kómári, Tam.). From (gó, san. cow + mári, tam. epidemic). Same as Caulvyecomaury.——*Coodal vautam* (अन्त्रवृद्धि - antravriddhi, San.; روده - rodah, Hind.; குடல்வாதம் - kudalvátham, Tam.). Title from tamul means bowels + wind. San. from (antra, san. bowels + vriddhi, san. expansion). Hind. means a gut. Hernia. ——*Coodal yeritchal* (رودونكى جلن - rodonkíjalan. Hind.; குடலெரிச்சல் - kudaleriççal, Tam.). Means bowels + burning. Inflammation of the bowels.——*Coolay mootty* (குலைமுட்டி - kulaimutti, Tam.). Means liver + obstruction. Congestion of lungs and swelling of belly.——*Coondikye yeritchal* (گردے كى جلن - gurdekíjalan, Hind.; குண்டிக்காயெரிச்சல் - kundikkáyeriççal, Tam.). From (kundikkáy, tam. kidneys + eriççal, tam. burning). Inflammation of kidneys.——*Covaury* (கோவாரி - kóvári, Tam.). From (gó, san. cow + váru, tam. to kill in numbers). Rinderpest. Same as Alary.——*Cull adeippoo* (मूत्रकृच्छ्र - mútrakrichhra, San.; سنگ مثانہ - sangimasánah, Hind.; கல்லடைப்பு - kalladaippu, Tam.). Title from tamul means stone + obstruction. San. from (mútra, san. urine + krichhra, san. difficulty). Hind. from (sang, pers. stone + masánah, ar. bladder). Calculus.——*Cunnoy* (नेत्ररोग - nétraróga, San.; آشوب - áshúb, Hind.; కన్నునొప్పి - kannunoppi, Tel.; கண்ணோய் - kannóy, Tam.). Means eye + disease. Ophthalmia.—— *Jala bhaya rogam* (अलर्करोग - alarkaróga, San.; ديوانے كتے كا مرض -

dívánekuttekámarz, Hind.; சலபயரோகம் - shalabayarógam, Tam.). Title from tamul from (jala, san. water + bhaya, san. fear + róga, san. disease). San. from (alarka, san. mad dog + róga, san. disease). Hydrophobia.——*Jalaga rogam* (گیندوے - gendwe, Hind.; జలగరోగము - jalagarógamu, Tel.). From (jalaga, tel. leech + róga, san. disease). Disease in which leeches are bred in the stomach.——*Mahodaram* (महोदर - mahódara, San.; استسقا - istiská, Hind.; மகோதிரம் - magóthiram, Tam.). Title from sanscrit means great + belly. Hind. from (saká, ar. to drink). Dropsy.——*Mala bandham* (मलावरोध - malávaródha, San.; قبض - kabz, Hind.; மலபந்தம் - malabandam, Tam.). Title from tamul means excrement + binding. San. from (mala, san. excrement + avaródha, san. obstruction). Hind. from (kabaza, ar. to grasp). Constipation.——*Manday adappaun* (अङ्गविकृति - angavikriti, San.; سكته - saktah, Hind.; மண்டையடைப்பான் - mandaiyadaippán, Tam.). Title from tamul means head + obstruction. San. from (anga, san. limb + vikriti, san. change), from the collapse. Hind. from (sakata, ar. to become still). Apoplexy.——*Manjal caumalay* (कामला - kámalá, San.; يرقان - yarkán, Hind.; పచ్చకామాల - pattsakámála, Tel.; மஞ்சட்காமாலை - manjadgámálai, Tam.). Title from tamul from (mañjal, tam. yellow + kámálai, tam. jaundice). San. from (káma, san. brightness + lú, san. to cut). Tel. from (pattsa, tel. yellow + kámála, tel. jaundice). Jaundice.——*Mooch adappoo* (மூச்சடைப்பு - múççadaippu, Tam.). Means breath + obstruction. Choking.——*Mookk adappaun* (पीनस - pínasa, San.; زكام - zukám, Hind.; மூக்கடைப்பான் - múkkadaippán, Tam.). Title from tamul means nose + obstruction. San. from (apí, san. to pour out + násа, san. nose). Hind. from (zakama, ar. to fill). Catarrh.——*Moolay vedippoo* (முலைவெடிப்பு - mulaivedippu, Tam.). Means udder + crack. Sore teats.——*Moott adappaun* (استسقاء طبلی - istiskáitabalí, Hind.; முட்டடைப்பான் - muttadaippán, Tam.). Title from tamul from (muttu, tam. extremity + adaippán, tam. obstruction). Hind. from (istiská, ar. dropsy + tabalí, ar. skin). Tympanitis.——*Nenj adappaun* (நெஞ்சடைப்பான் - neñjadaippán, Tam.). Means chest + obstruction. Inflammation of the lungs.——*Oodainda comboo* (உடைந்தகொம்பு - udaindagombu, Tam.). Broken horn.——*Odoo vayoo* (वात - váta, San.; وجع مفاصل - vajimafásil, Hind.; ஓடுவாயு - óduváyu, Tam.). Title from tamul means running + wind. San. from (vá, san. to blow). Hind. from (vaja, ar. pain + mafásil, ar. joints). Rheumatism.——*Paursavayoo* (पक्षाघात - pakshágháta, San.; فالج - fálij, Hind.; పార్శ్వవాయువు - párshvaváyuvu, Tel.; பாரிசவாயு - párisaváyu, Tam.). Title from tamul means side + wind. San. from (paksha, san. side + ághâta, san. blow). Hind. from (falija, ar. to divide). Paralysis.——*Pilavay cautchal* (பிளவைக்காய்ச்சல் - pilavaikkáyççal, Tam.). Means cleft + fever. Anthrax fever.——*Racta calasha yeritchal* (کلیجے کی جلن - kalí jekijalan, Hind.; இரத்தக்கலச வெரிச்சல் - irattakkalasa verіççal, Tam.). Hind. means heart + burning. Tam. from (rakta, san. blood + kalasha, san. vessel + eriççal, tam. burning). Inflammation of the heart.——*Racta calitchal* (अतिसार - atisára, San.; இரத்தக்கழிச்சல் - irattakkazhiççal, Tam.). Title from tamul means blood + flux. San. from (ati, san. intensive prefix + sri, san. to move). Dysentery.——*Racta mootram* (रक्तमेह - raktaméha, San.; لهوکا پیشاب - lahúkápísháb, Hind.; இரத்தமூத்திரம் - irattamúttiram, Tam.). Title from tamul. San. from (rakta, san. blood + méha, san. urine). Hind. and Tam. means blood + urine. Hæmaturia.——*Shithamay coodal mandacutt* (சிதமைக்குடல் மந்தக்கட்டு - shithamaikkudalmandakkattu, Tam.). Tam. from (shithamai, tam. mucus + kudal, tam. bowels + mandam, tam. torpidity + kattu, tam. constriction). Fardel bound.——*Shoolookk* (موچ - moch, Hind.; சுளுக்கு - shulukku, Tam.). Sprains.——*Shory* (कण्डु - kandu, San.; گر - gar, Hind.; சொறி - shori, Tam.). Means itching. Mange.——*Tonday adappaun* (தொண்டையடைப்பான் - tondaiyadaippán, Tam.). Means throat + obstruction. Malignant sore-throat.——*Vayir ooppoosam* (अलसक - alasaka, San.; வயிறுப்புசம் - vayiruppusam, Tam.). Title from tamul means stomach + distension. San. from (alasa, san. inactivity + kri, san. to do). Tympanitis.——*Vayitt valy* (शूल - shúla, San.; پیٹ کا درد - petkádard, Hind.; வயிற்றுவலி - vayittuvali, Tam.). Means stomach + pain. Colic.——*Visha jooram* (விடசுரம் - vidasuram, Tam.). Means poison + fever. Rinderpest. See sep. title.——*Yeeral yeritchal* (معدے کی جلن - medekíjalan, Hind.; ஈரலெரிச்சல் - íraleriççal, Tam.). Hind. and Tam. means liver + burning. Inflammation of the liver.——*Yery cautchal* (எரிகாய்ச்சல் - erigáyççal, Tam.). Means burning fever. Inflammatory fever.——*Yirappay veekkam* (இரைப்பை வீக்கம் - iraippaivíkkam, Tam.). Tam. from (irai, tam. food + pai, tam. bag. + víkkam, tam. swelling). Distension of the rumen.

PASPAM (भस्म - bhasma, *San.*; భస్మము - bhasmamu, *Tel.*; ഭസ്മം - bhasmam, *Mal.*; பற்பம் - parbam, *Tam.*). From (bhas, san. to consume). Metallic ashes, any metallic oxide. The following are some principal Paspams.——*Caunta paspam* (कान्तभस्म - kántabhasma, San.; காந்தப்பற்பம் - kándapparbam, Tam.). From (kánta, san. loadstone). Medicinal powder made of loadstone [cauntam] by chemical process.——*Eeya paspam* (सीसभस्म - sísabhasma, San.; ஈயப்பற்பம் - íyapparbam, Tam.). From (íyam, tam. lead). Calcined lead [eeyam].——*Krishna paspam* (कृष्णभस्म - krishnabhasma, San.). From (krishna, san. black). Black sulphate of mercury [cajjaly, rasam], made by rubbing together and dissolving over the fire three parts of mercury with one of sulphur [gandhac]. Also called Rasaparparty, meaning mercury + incrustation. For the ordinary sulphate, which has 6 mercury to 1 sulphur, see Rasa paspam.——*Linga paspam* (இலிங்கப்பற்பம் - ilingapparbam, Tam.). From (ilingam, tam. cinnabar). Ashes of cinnabar [rasam, shangarf] used medicinally.——*Peeta paspam* (पीतभस्म - pítabhasma, San.). From (píta, san. yellow). Yellow preparation of mercury [rasam], prepared thus. Take of mercury and sulphur [gandhac] equal parts rub them together for seven days with the juice of Phyllanthus niruri [neeroory] and Heliotropium indicum [indian heliotrope]. Place the mixture in a covered crucible, and heat it in a sand bath for twelve hours. The result will be the yellow compound. Cf. the proportions in Rasa paspam.——*Racta paspam* (रक्तभस्म - raktabhasma, San.). From (rakta, san. red). Another name of Rasa sindooram [q.v.].——*Rasa paspam* (रसभस्म - rasabhasma, San.). Sulphate of mercury. See sep. title.——*Shweta paspam* (श्वेतभस्म - shvétabhasma, San.). From (shvéta san. white). Another name of Rascapoor.——*Swarna paspam* (स्वर्णभस्म - svarnabhasma, San.). Title and San. from (svarna, san. gold). Medicinal powder of gold, called ashes of gold [pon].——*Taulaca paspam* (तालकभस्म - tálakabhasma, San.). From (tálaka, san. orpiment). Roasted orpiment [hartaul].——*Taumra paspam* (ताम्रभस्म - támrabhasma, San.). From (támra, san. copper). Sulphide of copper [taumram.]——*Tootnaug paspam* (துத்தநாகப்பற்பம் - tuttanágapparbam, Tam.). Flowers of zinc [tootnaug].——*Vanga paspam* (वङ्गभस्म - vangabhasma, San.). From (vanga, san. tin). A greyish white powder consisting chemically of oxide of tin [tagaram] with some impurities.——*Velly paspam* (रौप्यभस्म - raupyabhasma, San.; வெள்ளிப்பற்பம் - vellipparbam, Tam.). Title and Tam. from (velli, tam. silver). San. from (rúpya, san. silver). San. also (rajatabhasma), meaning silver + ashes. Black oxide of silver. Argento oxidum of chemists. Prepared thus:—Purified silver leaves are mixed with twice their weight of cinnabar [shangarf] and heated in a subliming apparatus. This process is repeated fourteen times. The resulting compound is a fine greyish black powder with minute shining white particles intermixed. Medicinal properties analogous to those of the nitrate; milder, anthelmintic.

PAT (पत् - pat, *San.*). To fall, go; to fly.——*Patacam* (पतक - pataka, San.). From (pat, san. to fall). Arrangement, classification. An astronomical table.——*Patam* (पत्तन - pattana, San.; پٹن - patan, Hind.; ಪಟ್ಟಣ - pattana, Can.; పట్టణము - pattanamu, Tel.; പട്ടണം - pattanam, Mal.; பட்டணம் - pattanam, Tam.). From (pat, san. to go); trade resort. Town. Suffix in place names; as Bimlipatam, meaning bheema's town [putnam].——*Patanam* (पतन - patana, San.). Latitude, when referred to the stars [nacsbatram, vicshaipam]. Patanacaindram is argument of the latitude [caindram].——*Patanjaly* (पतञ्जलि - patañjali, San.). From (pat, san. to go + añjali, san. the joined hands); habitually clasping hands, pious. A saint; the teacher of the Yoga philosophy [yogam]. See vol. I (74).——*Patingah* (शलभ - shalabha, San.; पतंग - patanga, Mahr.; فراشه - faráshah, Ar.; پروانه - parwánah, Pers.; پتنگا - patingá, Hind. and Dec.; ನುಸಿ - nusi, Can.; పురి - puri, Too.; പാററ - pátta, Mal.; பொட்டு - pottu, Tam.). Title from hindostany. San. from (shal, san. to cover). Ar. from (farasha, ar. to expand). Pers. from (par, pers. wing + wánah, pers. possessive particle). Hind. from (patanga, san. moth). Mal. from (páru, mal. to fly). Mal. also (urappuzhu), meaning sheath worm. Moth. Co-extensive with the order lepidoptera, holometabola, insecta [poochy], of naturalists [jantoo]. For silkworms see Puttoo.——*Patita* (पतित - patita, San.). From (pat, san. to fall). Fallen. Any caste arisen from the unlawful intercourse of persons of differing castes [jauty] in Malayalam country. They are:—Caniyaun, astrologer; Coorpoo; Ilavan, cocoanut [q.v.] tree cultivator and distiller; Paravan, lime [choonam] burner; Paunan, tailor; Shaunaun, cultivator of the palmyra [q.v.]; Tolcooroppan, makes shields and other articles of leather [chamrah]; Vaulan, boatman; Vailan, sorcerer, removes rubbish from Bramin houses; Vilcoorooppan, bowmaker and painter.——*Patram* (पत्र - pattra, San.). From (pat, san. to fly), what enables to fly; wing of a bird [pacshy]. Feather. Leaf of a tree regarded as its plumage; leaf of a flower or petal. Leaf prepared for writing on; paper, letter, written document [dastavaiz, nauma, putricay] in law. Bandhacapatram is a mortgage deed. Cadan patram is a bond of debt. Vennilay cadam patram is a bond of debt without security. Jaumeen

patram is a bail or security bond. Adhicaura patram is a written authority or permission, power of attorney [adhicaura putricay, iktiaurnauma, mooctiaurnauma].——*Patringah* (हरियल - hariyala, Mahr.; ورور - varvar, Ar.; پترنگا - patrangá, Hind.; ಚಿನ್ನಪಸರಿಕ - chinnapasarika, Tel.; കോലിക്കിളി - kólikkili, Mal.). Title from hindostany. Mahr. means green. Hind. from (pat, hind. leaf + rang, hind. color). Tel. from (chinna, tel. small + pasarika, tel. bee-eater). Mal. from (kólu, mal. stick + kili, mal. bird). Hind. also (hariyál), meaning green colored; (banspattí), meaning bamboo leaf; (barápatrangá), meaning large + bee-eater. Tel. also (kommupasarika), meaning branch + bee-eater. Meropidæ family, fissirostres, insessores, aves [pacshy, 7], of naturalists [jantoo]; bee-eaters or flycatchers; green is predominant color of plumage, varied with blue, yellow, and chestnut; feed on insects [poochy], often on wasps and bees [tainee], they always capture them in the air; usually crush their insect prey when they seize it, killing it at once, and thus do not get stung; their skin also is remarkably thick. The common indian bee-eater is merops viridis; alias merops ferrugiceps, indicus, orientalis, torquatus; very common bird; has a loud rather pleasant rolling whistling note. The blue-tailed bee-eater is merops philippensis; alias merops javanicus, typicus. The chestnut-headed bee-eater is merops quinticolor; alias merops erythrocephalus, urica; found in malabar forests. The blue-necked bee-eater is nyctiornis athertoni; alias bucia nipalensis; merops cyanogularis; napophila meropina; nyctiornis amherstiana, cæruleus.——*Patsunn* (پاٹسن - pátsan, Hind.). From (pát, hind. leaf + san, hind. crotalaria juncea, linn.). Same as hemp bendy.——*Pattry* (पत्री - pattrí, San.). See sep. title.——*Patwarry* (پٹواری - patwárí, Hind.). From (patra, san. writing + kára, san. doer). A village accountant [curnum].——*Pautam* (पात - páta, San.). From (pat, san. to fall). Falling. The node of a planet's orbit [ayanaumsham, caesham, craunty pautam, dhroovam, graham, vishoo].——*Pautarny* (चित्राङ्ग - chitránga, San.; پاترنی - pátarní, Dec.; راما راما - ramaramá, Malay; ಪ್ರಾತ್ತಿಹುಲ - prátthula, Can.; పాంటె - pánte, Too.; సీతాకోకచిలుక - sítákókachiluka, Tel.; வண்ணாத்திப் பூச்சி - vannáttippúççi, Tam.). Title from deccany. San. from (chitra, san. variegated + anga, san. body). Malay from (rama, malay, the hero). Tel. from (sítá, san. ráma's wife + kóka, tel. female garment + chiluka, tel. parrot); from variegated color. Tam. from (vannátti, tam. washerwoman + púçç̧i, tam. insect); from the shaking of the tail as a washerwoman moves her back when washing clothes. Tam. also (tattárappúççi), meaning goldsmith insect; (tattán), meaning the dragon fly. Butterfly. Synonymous with the order lepidoptera, holometabola, insecta [poochy], of naturalists [jantoo].——*Pautaula garoodan* (ಪಾತಾಳಗರುಡ - pátálagaruda, Too.). From (pátála, san. nether regions + garuda, san. braminy kite); useful in snake-bites. Pautaulam is the region of snakes and garoodan [q.v.] is their enemy. Same as Mongoose snake root.——*Pautaulam* (पाताल - pátála, San.). From (páta, san. descent + tala, san. ground). One of the seven lower worlds [locam] and the best known; called also Yamalocam. Identical with the Greek Tartarus, as the abode of Titans or Raucshasans [q.v.]; Naracam [q.v.] is the proper term for hell as the abode of wicked men.——

—*Pudmam* (पद्म - padma, San.). From (pat, san. to go + ma, san. water); water-going plant. Lotus [nelumbo]. Pudma simhausanam is a lion-seat or throne supported by sculptured lotuses. Pudminy is a woman of the first or most excellent of the four classes into which the sex is distinguished; the others being:—chitriny wonderful, one endowed with various talents and excellencies; shankiny, resembling conch [chunk], middling class; hastiny, resembling elephant [q.v.], lowest class.——*Pudmanaubhan* (पद्मनाभ - padmanábha, San.). From (padma, san. lotus + nábhi, san. navel). Lotus-navelled. With the addition of sawmy, a name of Vishnoo in the Malayalam country. One of the titles of the Travancore rajah is the slave of Pudmanaubhan. Hindoo 2nd or pers. name [peyar].——*Pudmanaubhapooram* (പത്മനാഭപുരം - patmanábhapuram, Mal.). From (padmanábha, san. vishnu, the lotus navelled + pura, san. town). Mal. also (kalkulam), meaning stone + tank. Title otherwise Pulpanavaram.—"*a*" The southern division of Travancore, divided into five talooks. Population some 400,000.—"*b*" Town, Divisional head-quarters, Tahsildar's station; Travancore state, Pudmanaubhapooram division, Cullcoolam tal.; pop. 13,602. Former capital of province before removed to Trivandrum. Almost in ruins. Surrounded by strong fort of granite [caroom cull], and lies at foot of hills a mile east from main road. Old palace built after native style. Tradition says there is underground passage from palace to Tamrapurny river. Celebrated pagoda [q.v.] to Neelacunta sawmy.——*Pudmaraugam* (पद्मराग - padmarága, San.; حجر یمانی - hajariyamání, Ar.; یاقوت زرد - yákútizard, Pers.; ಪದ್ಮರಾಗ - padmarága, Can.; పద్మరాగము - padmarágamu, Tel.; പത്മരാഗം - patmarágam, Mal.; பதுமராகம் - pathumarágam, Tam.). San. from (padma, san. lotus + rága, san. color). Ar. mean stone of yemen. Pers. from (yákút, ar. garnet + zard, pers. yellow). Tel. also (támarakempu), meaning lotus + ruby. Jacinth. ὑάκινθος was according to the Periplus exported from Mouziris [cranganore] and Nelkunda [culladá]. According to Salmasius this was the Ruby [laul]. In Selinus it would seem to be meant for the Amethyst [martees].——*Pudmauvaty* (पद्मावती - padmávatí, San.). From (padma, san. lotus + vat, san. suffix of possession). Lutchmy [q.v.], as seated on a lotus-flower [alamail, nelumbo].——*Putnam* (पट्टण - pattana, San.; پٹن - patan, Hind.; పట్నము - patnamu, Tel.; പട്ടണം - pattanam, Mal.; பட்டணம் - pattanam, Tam.). Town. Suffix in place names [patam].——*Putnasawmy* (பட்டணச்சுவாமி - pattanaççuvámi, Tam.). From (pattana, san. town + svámí, san. master). Headman among some of the castes [jauty].——*Putricay* (पत्रिका - patriká, San.). From (patra, san. leaf). Document [caranam, dastavaiz]. Also a letter [tappaul] or newspaper [acbaur]. Adhicaura putricay is a written authority or permission; power of attorney [iktiaurnauma, mooctiaurnauma]. For jenmaputtricay or horoscope see sep. title.——*Puttah* (पट्ट - patta, San.; پٹا - pattá, Hind.; ಪಟ್ಟ - patta, Can.; పట్టా - pattá, Tel.; பட்டா - pattá, Tam.). From (patra, san. leaf). Originally a band of silk [puttoo], mark of royalty. So a title deed of lease, now written on paper [caugaz], but formerly engraved with a style on cadjan [q.v.] leaves [olay], given to a ryot [q.v.] by government, or zemindar [q.v.]. It specifies the particulars of his holding, the rent payable for it, the kists [q.v.] according to which the rent should be paid, the road cess, village cess, and other particulars such as restrictions as to mining rights, &c. Zemindars sometimes include Coody maraumut [amaunjy]. Puttah means also title to office. Puttah monigar is the recognized and appointed monigar [q.v.]. See vol. I, 112.——*Puttam* (पट्ट - patta, San.; பட்டம் - pattam, Tam.). From (patra, san. leaf). Same origin as Puttah. A head ornament symbolical of authority. In S. canara office of dignity in a family governed by the Aliya santauna [q.v.] law. It is indivisible, and whether the family be divided or not, the Puttam, no special arrangement having been made about it, descends to the eldest male of the surviving members of the family. Varauha mihiran [q.v.] has the following:—"That it may do "good, the king's puttam shall be 8 inches broad in the middle, "the queen's shall be 7 inches broad, and the prince's shall be "6 inches broad; the general's shall be 4 inches broad in the "middle; the prasaudaputtam worn by a person as a token of "royal favor shall be 2 inches broad; thus puttams are five in "number; if the puttam were made of pure gold, and twice "as long, with its sides half as broad as the dimension at the "middle, it would make the wearer happy; the king's puttam "shall have five points or crests; the queen's and the prince's "shall have three crests; the general's shall have a single crest "and the prasaudaputtam shall have no crest."——*Puttaubhiraman* (பட்டாபிராமன் - pattábiráman, Tam.). From (patta, san. plate of gold worn on forehead as an ornament and symbol of office + abhiráma, san. delightful). Rama at the coronation. Hindoo 2nd or pers. name [peyar].——*Puttimar* (പത്തേമാരി - pattamári, Mal.; பாட்டிமார் - páttimár, Tam.). From (patár, hind. tidings + márí, mahr. carrier). Sailing vessel common in coasting trade of W. coast. These vessels have a prow stem, the same length as the keel. The dimensions of the larger class are 76 feet in length, 21 feet in breadth, 11 feet 9 inches in depth, and about 200 tons burden. They are planked with teak [q.v.], upon jungle-wood frames, their bottoms are sheathed with inch-board, and a layer of choonam [q.v.] mixed with cocoanut [q.v.] oil and a portion of dammer [q.v.]. Some of the smaller class of about 60 tons burden, are sewed together with coir [q.v.]. The smaller class has one, and the larger class two masts, with the lateen sail, the foremast raking forward for the purpose of keeping the yard clear when it is raised or lowered. These vessels are navigated by Moplahs [q.v.] and other Mahomedans, and have a crew of ten or twelve men, and a tindal [q.v.].——*Puttolay* (பட்டோலை - pattólai, Tam.). From (patta, san. tablet + ólai, tam. palm leaf). An edict, a balance sheet [olay].——*Puttuck* (ಪಟಕ - pataka, Can.). From (patáka, san. banner); body of men under one flag [dhwajam]. A body of horse.——*Putty* (پٹی - pattí, Hind.). From (patra, san. leaf). A bandage. Tribute, such as nuzzer [q.v.], &c. A number of betel [q.v.] leaves folded up with areca-nuts [q.v.] in one of them [paunkabeerah, paun soopyaury].

PATAULAM (پٹالم - patálam, *Hind.*). Corruption of battalion [dandoo].

PATAUN (پٹھان - pathán, *Hind.*). From (fathán, ar. victor). Founder of the sect so called by the prophet. Same here as Afghaun. They have come to Madras principally from the Mahratta country. All are Soonnees [q.v.]. Numbers about 15,000. See vol. II, 233.

PATCHAC (پچک - pachak, *Hind.*). Malay word. Same as Costum.

PATHAKK (பதக்கு - pathakku, *Tam.*). Measure of capacity. 2 cooroonies = 1 pathakk; 2 pathakks = 1 toony [alavay, 3a]. Varies with the mercaul or cooroony.

PATHAM (பதம் - patham, *Tam.*). From (pathi, tam. to fix); properly fixed or disposed. Fit state.——*Padoonoo* (పదును - padunu, Tel.). From (patham, tam. fitness). A wetting, used

for rain [mazhay]; about an inch [q.v.] and a half [dookky]. ——*Pathaneer* (பதநீர் - pathanír, Tam.). From (above + nír, tam. water). Sweet toddy [q.v.] drawn in a pot lined with choonam [q.v.] to prevent fermentation [neerah].

PATHY (பதி - pathi, *Tam.*). Ten.——*Pathigam* (பதிகம் - pathigam, Tam.). From (pattu, tam. ten). Poem of praises to a deity, &c., commonly of ten verses.——*Pathin* (பதின் - pathin, Tam.). Change of (pattu, tam. ten) in combination.——*Pathinettaum perook* (பதினெட்டாம்பெருக்கு - pathinettám-berukku, Tam.). From (pathinettu, tam. eighteen + perukku, tam. rise). Solar [madhyama sowra maunam] festival [pundigay, 6d]. Festival in Cauvery delta to celebrate rising of river, on the eighteenth of the fourth solar month Audy [mausam] or about 1st August. Otherwise Audy perook or July freshes. Also Audy pathinett [maryauday].

PATNAVA (பட்டினவன் - pattinavan, *Tam.*). From (pattinam, tam. maritime village). A fishing caste on the Tanjore coast. Numbers about 22,000 [jauty]. See vol. I (69).

PATTOO (लेप - lépa, *San.*; గట్టు - gattsu, *Tel.*; பற்று - pattu, *Tam.*). Title from tamul, means catching. San. from (lip, san. to smear, to adhere to). Cement. Limes, concretes, septariæ, dolomites, magnesite, gypsum, &c., are used in manufacturing cements, and there is an abundant supply of these all over Southern india. The pure carbonates of lime cannot be used for out-door plastering [cauray] near the sea. The kankars [q.v.] or nodular limes are more durable though not so white. The septariæ are very common though the beds are not extensive; they accompany the strata of blue and white potters' clay and kaolin [q.v.]. The best hydraulic septariæ occur at Avady, Bangalore and Chingleput. A very fine natural hydraulic cement occurs on the banks of the Godavery and was extensively used in the construction of the Godavery and Kistna anicuts. A hydraulic limestone [choonam cull] occurs along with the blue slate [cull palagay] of Cuddapah, and the dolomites of the Ceded districts [q.v.] and the Northern circars [q.v.] make good cement. The following are native recipés:—Put into a dronam [q.v.] of water the raw leaves of the tindoocam [gaub] and of the capittam [wood apple], the flowers of the shaulmaly [silk cotton], the seeds of the sullaky [indian olibanum], the bark of the dhanvanam [arabian manna], and a small quantity of vacha [vashamboo]; heat the water on fire till it is reduced to one-eighth of its original quantity; remove the jar from fire; put into the calcam thus prepared goolgooloo [bdellium] and the juice of the shreevausacam [gandafiroza], and of sarjam [saul] and bhallautam [marking nut], coondoorcam [olibanum] and the fruit of the atasy [alsee] and of bilvam [bæl]; the cement thus formed is known as vajralaipam or adamant cement. In the construction of temples [coil, pagoda] and of the palaces of kings, of turrets, and in fixing the lingam [q.v.] or the image [shilay, vigraham] in the temple, in the construction of walls and wells, if the vegetable cement above referred to be melted and used, the structures will last for a crore [q.v.] of years. Form a mixture of shel-lac [lac], the resin [raul] of the plant, boswellia serrata, roxb. [indian olibanum], bdellium [q.v.], soot in the ceilings of houses, the fleshy part of the fruit of capittam [wood apple] and of bilvam [bael], the fruit of the naugabalah [orila], madhoocam [mohwah] and munjishtay [munjeet], the juice of the sarjam [saul] as well as vinegar [caudy] made from fruit [pazham], and put it in a jar of water, heat it till it is reduced to an eighth of its bulk; the resulting calcam is also known as vajralaipam and is an excellent one and can be used for the several purposes already mentioned. Form a mixture of the horns [sing] of the cow [maud], the buffalo [khoolgah], and the goat [aud] reduced to powder, the hair of the ass [gadhah], the skin of the buffalo [khoolgah], the milk of the cow [pashoo] and the juice of the nimbam [neem] and the capittam [wood apple] trees; throw the mixture in a jar of water and heat it, the resulting calcam is also an excellent animal cement. Melt together eight parts of lead [eeyam], two parts of bronze, and one part of brass [pittalay]; the result will be a strong metallic cement.

PATTRY (पत्त्री - pattrí, *San.*). From (pattra, san. knife) [pat]; from curved bill. Falcons. Falconinæ, falconidæ [bheroondam], raptores, aves [pacshy, 2], of naturalists [jantoo]. Bill short and curved throughout, toothed on tip; cere long and rounded; wings long and pointed; tail long and rounded; black eyed birds of prey. The species best known to the natives are shown below.——*Bheiry* (पत्त्री - pattrí, San.; بحرى - bahrí, Ar., Pers. and Hind.; بھیری - bhairí, Dec.; ಭೈರ - bhaira, Can.; భైరడేగ - bhéridéga, Tel.). Title from deccany. San. from (pattra, san. knife); knife-beaked bird. Ar. from (bahr, ar. sea); from resort. Pers., &c., from arabic. Tel. from (bhairi, hind. falcon + déga, tel. hawk). Male bird is hind. (bhairbaçça), meaning bheiry + young one. Title otherwise Peregrine falcon. Falco peregrinus, falconinæ [pattry], falconidæ [bheroondam], raptores [pacshy, 2], of naturalists. Alias Falco calidus, communis, micrurus. Adult, above deep bluish grey, feathers with dark markings; wings blackish brown, more or less spotted or barred with white on the inner web; tail grey, with some dark bands, and a pale tip; beneath chin pure white; bill bluish, black at tip, cere yellow; legs and feet yellow; length 16, wings 12½, tail 5¾; at each moult the feathers become more grey; abundant along the east coast; prefers the sea coast, strikes down teal, duck [varatam], &c.; does not breed in this country, but migrates to the north; still trained for falconry, trained to strike herons [paddy bird], storks [adjutant bird], cranes [saurasam], &c.; strikes only with talons, and chiefly with the hind claw.——*Laggar* (لگر - lagar, Hind.; ಗಿಡಗ - gidaga, Can.; లగుడు - lagudu, Tel.). Male bird is hind. (jaggar). Title otherwise Jugger. Falco jugger, falconinæ [pattry], falconidæ [bheroondam], raptores [pacshy, 2], of naturalists. Alias Falco luggur, themophilus; Adult, plumage above dusky ashy or slate color; head in some rufous, with faint brown streaks; male measures 16–17 inches; abundant in open cultivated districts; generally one standing alone among grain-fields; preys on small birds, even in the midst of a cantonment; trained to hunt crows [caurvam], paddy birds [q.v.], night herons [q.v.], partridges [teetar], and florikin [florican].——*Narzee* (نارزی - nárzí, Hind.; తొండలముత్సుగద్ద - tondalamuttsugadda, Tel.). Tel. from (tonda, tel. bloodsucker + muttsu, tel. thief + gadda, tel. kite); lizard-killing kite. Male bird is hind. (narzank). Tel. also (tondalamuttsugádu), meaning bloodsucker + thief + fellow; (tondaladótsugádu), meaning bloodsucker + rob + fellow. Title otherwise Kestril. Tinnunculus alaudarius, falconinæ [pattry], falconidæ [bheroondam], raptores [pacshy, 2], of naturalists. Alias Falco interstinctus, tinnunculus. Female and young male, above reddish, long dark stripes on head and neck, tail with numerous dark bars and a broader one at the end, white tipped; plumage beneath reddish ochraceous with numerous and close brown spots; adult male has fore-head yellowish; head, nape and tail fine ashy grey, latter with broad black band, former sometimes tinged black; beneath creamy or rusty with spots of brown; 13–14 inches; cold weather visitant; one of the earliest and does not leave till april; chief food lizards [chipkalee]. The lesser kestril is erythropus cenchris; alias falco tinnunculoides; on neilgherries, breeding on cliffs in may and june; seizes insects on the wing, and pulls off the elytra of beetles [zeerangy].——*Shahin* (شاهین - sháhín, Ar., Pers., Hind. and Dec.; ಡೇಗೆ - dége, Can.; డేగవదము - dzávadamu, Tel.; രാജാളി - rájáli, Mal.; வல்லூறு - vallúru, Tam.). Pers. from (sháh, pers. king). Tel. from (java, san. speed). Mal. from (rájá, san. king + kili, mal. bird). Tam. from (val, tam. powerful + úru, tam. killing). Male bird is hind. (kohí). Tam. also (irásáli), meaning king hawk. Title otherwise Royal falcon, Shaheen. Falco peregrinator, falconinæ [pattry], falconidæ [bheroondam], raptores [pacshy, 2], of naturalists. Alias Falco shaheen, sultaneus. Adult, head, nape, and cheek stripe almost black, almost without any markings; changes of plumage from the young bird consist in the head gradually becoming darker, the back becoming lighter; length 15, wing 10¾, tail 5¼; not common; destroys game, partridges [teetar], quails [batair], &c.; very partial to parroquets [totah]; breeds on steep and inaccessible cliffs; prized by the natives for hawking; taken for sale to hyderabad, where falconry is yet carried on; caught with bird-lime; varieties red, white, blue and black.——*Toormty* (ترمتی - turumtí, Hind.; చెట్వ - chetva, Tel.). Hind. from calmuc name of the hobby, falco subbuteo. Tel. is properly the female. Male bird is tel. (dzalakatte), (jelákante). Title otherwise Red-headed merlin. Hypotriorchis chicquera, falconinæ [pattry], falconidæ [bheroondam], raptores [pacshy, 2], of naturalists. Chicquera from Hindostany name for sparrow-hawk [baushah]. Adult, head, nape and cheek stripe, bright rufous; rest of plumage above fine pale grey; length of male 11–12 inches; affects chiefly open country over cultivation; often hunts in pairs; preys on small birds; four eggs of a yellowish brown color, mottled with brown spots; has a shrill angry scream; occasionally reclaimed, and flown at quail [batair], partridges [teetar], mynas [q.v.] but especially at the indian jay [q.v.].

PAU (पा - pá, *San.*). Protect.——*Palamcottah** (பாளையங்கோட்டை - pálaiyangóttai, Tam.). From (pálaiyam, tam. fortified village + kóttai, tam. fort). Tam. also (mangainagaram), meaning maiden + city.—"*a*" Deputy tahsildarry, Tinnevelly district. Pay Rs. 70.—"*b*" Town, Head-quarters of Deputy tahsildar, Municipality; Tinnevelly dist., Tinnevelly tal.; pop. 18,686; acres 2,080; lat. 8° 43′; long. 77° 46′; from Madras S. 443 miles by rail; from Shermadevy E.N.E. 12 miles; from Shreevillipoottore S. 54 miles; from Tinnevelly E. 4 miles; from Tuticorin by rail 36 miles. One mile from the Tamraporny in an extensive plain. At one time a strongly fortified town, but hardly any trace now remains of the fortifications. The fort was 3 furlongs square with 40 bastions, 4 gates, and 8 slopes for ascending the ramparts. In 1780 Schwartz baptized at Palamcottah the Bramin woman Clarinda, who erected there the first English church south of Trichinopoly, which in 1784 was put under Satyanautan, the first Hindoo-born minister of the Church of England. Church missionary society's institutions; where Rev. J. Hough, chaplain in 1816, and historian of Christianity in India, revived the Protestant mission. The following are the travelling distances by road from Palamcottah to different places:—

To	Viâ	Miles and Furlongs.	
Aryancauv ...	Tencaushy	48	2

—"*c*" Palamcottah base, east end is a trig. station in lat. 8° 43′ 24·07″, long. 77° 45′ 39·72″; from Palamcottah N.N.W. 3 miles; from Tinnevelly N.E. 4 miles. Palamcottah base, west end is a trig. station in lat. 8° 43′ 32·71″, long. 77° 46′ 10·11″; from Palamcottah N.W. 8 miles; from Tinnevelly N.W. 5 miles.——*Pali* (பாலி - páli, Tam.). Means a line, on account of the written character. Called Maugady in Ceylon. An Arya [q.v.] pracritic language. Sacred language of Booddhists [booddha], extinct in India; still extant in Burmah and Ceylon [bhaushay].——*Patniyammay* (பத்தினியம்மை - pattiniyammai, Tam.). From (patní, san. chaste wife + ammá, tam. mother). The faithful woman; Lutchmy [q.v.].——*Patny* (पत्नी - patní, San.). Faithful wife [paty vratay, suttee].——*Paty* (पति - pati, San.). From (pá, san. to protect). Master. Epithet of the supreme being; a superior or elder. Affix to proper names as Ganapaty, Sabhaupaty. Also applied to tutelary deities or regents [peyar]. In tamul sheiva siddhauntam one of the three unoriginated, eternal principles in the universe, the other two being pashoo [q.v.] or soul and pausham [q.v.] or cord, the natural or moral evil. The male energy, shacty [q.v.] being the female; these two the cause of all the endless modifications [mauyay] appearing in the evolution of nature. Often used in composition, as Senaupaty, a commander-in-chief.——*Paty vratay* (पतिव्रता - pativratá, San.). From (pati, san. husband + vrata, san. devotion). Chaste wife [patny, suttee].——*Paul* (پال - pál, Hind.). From (pá, san. to protect). A place of shelter from the sun made by extending a piece of cloth across a transverse pole [dandam]. Also a tent on same principle [derah].——*Paulak* (पालङ्की - pálankí, San.; سلق - silk, Ar.; چغندر - chughandar, Pers.; پالك - pálak, Hind.; چقندر - chukandar, Dec.). Title from hindostany. San. from (pála, san. nourisher + ank, san. to mark); requiring great care and attention for growth [true olibanum]. Ar. from greek. Hind. from sanscrit. Hind. also (pálang). Greek σεῦτλον, τεῦτλον, τεῦτλις. Title otherwise Bengal beet, Common beet, Country spinach, Indian beet, Red beet. Botanically Beta vulgaris, linn., salsolaceæ [vricsham, 108]. Alias Beta benghalensis. Stem 1–3 feet, erect, furrowed; lower leaves 1–10 inches, often trowel-shaped, base decurrent on the petiole, margin waved, upper short incurved; spikes 6–18 inches, slender; clusters remote; sepals with membranous margins. Cultivated; used as pot-herb [keeray]; several varieties vary more in form and in color than in flavor; for the table that of the deepest blood-color is used. No other common species here.——*Paulam* (പാലം - pálam, Mal.). From (páli, san. bridge). Bridge.——*Paulan* (पाल - pála, San.). From (pá, san. to protect). Protector. Suffix in proper names, as Gopaulan, Rajagopaulan [peyar].——*Pauleiyacaura* (பாளையக்காரன் - pálaiyakkáran, Tam.). From (pálaiyam, tam. camp + kára, san. doer). Tamul for Moottrauz [q.v.].——*Paupum* (पाप - pápa, San.). From (pá, san. to protect), what requires to be guarded against. Sin.——*Paupanausam* (பாவநாசம் - pávanásam, Tam.). From (pápa, san. sin + násha, san. destruction). Sanscrit name (pápanáshatírt'ha), meaning sin + destruction + sacred place. Village; Tinnevelly dist., Ambasamoodram tal.; lat. 8° 43′; long. 77° 25′; from Ambasamoodram W. 6 miles; from Tinnevelly W. 22 miles. At junction of Serviaur and Tamrapurny. Fall of 80 feet, known as Calyauny teertam, and a shrine. The fish are fed by Bramins. There is a water power spinning mill [aroovy].——*Paupicanama* (పాపికనమ - pápikanama, Tel.). From (pápí, san. sinner + kanama, tel. pass). Pass; Vizagapatam dist., Royagada tal., Parvatipore division. Goes through Neemgherry hills, between Bissemcuttack and Singapore [ghaut].——*Paupicondah* (పాపికొండ - pápikonda, Tel.). From (pápí, san. sinner + konda, tel. hill). Also called Bison range. Range of hills; Godavery dist., Bhadrachellam tal.; height 4,200 feet. Extends along the whole northern frontier of the district. Remarkable for scenery, abundance of large game and teak [q.v.] forests. The highest point is situated to the west of the gorge through which the Godavery passes.——*Paupughny* (పాపఘ్ని - pápaghni,* Tel.). From (pápa, san. sin + han, san. to destroy). Tel. also (gundéru), meaning rock + river. River; Cuddapah dist., Madanapully, Cadiry, Royachoty, Cuddapah, and Poolivendla tals. Rises in Mysore. After entering Madanapully talook in lat. 13° 39′ N., long. 78° 08′ E., flows through the Vyausasamoodram tank at Cundoocore, and thence north through the Palcondah hills at Vempully, where it is known as the Coondair. Thence it flows along a broad and sandy bed through Cuddapah talook into the Pennair at Camalaupooram in lat. 14° 36′ N. and long. 78° 44′ E. The river is sacred. The gorge is noted for its temple of Anjaneshwarasawmy. A girder bridge on the north-west line of the Madras railway, with 22 spans of 72 feet, crosses the river near Camalaupooram.——*Peepul* (पिप्पल - pippala, San.). See sep. title.——*Pinaucam* (पिनाक - pináka, San.). From (pá, san. to protect). Shiva's bow.——*Pinauca pauny* (पिनाकपाणि - pinákapáni, San.). From (pináka, san. bow + páni, san. hand). Shiva.——*Pinaugay* (பிநாகை - pinágai, Tam.). From (pináka, san. shiva's bow). Tamul way of writing the Southern pinaukiny or Ponniaur.——*Pinaukiny* (पिनाकिनी - pinákiní, San.). From (pináka, san. shiva's bow). Braminical name for the Pennair, both north and south [pennair, ponniaur].——*Pitah* (पिता - pitá, San.). From (pá, san. to protect). Father [pitry].——*Pitaumahan* (पितामह - pitámaha, San.). From (pitá, san. father + mahá, san. great). The grandfather [bandhoo]; name of Bramha [q.v.].——*Pitry* (पितृ - pitri, San.). From (pá, san. to protect). Father [pitah]. In plural are the manes of ancestors to whom Shrauddham [q.v.] is paid. Feralia of the Romans. Supposed to reside in a region above the moon [chundran] or in it. Pitraurjitam, from (arj, san. to acquire), is hereditary right. Pitrya dinam is a day of the pitries, or a lunation [chaundra mausam]. Pitrya maunam is the mode of calculating by pitrya dinams [maunam].——*Poligar* (ಪಾಳೆಗಾರ - pálegára, Can.; పాలెగాడు - pálegádu, Tel.; பாளையக்காரன் - pálaiyakkáran, Tam.). Means holder of a camp.—"*a*" Title given by the Vijianugger kings to the chiefs of the Teloogoo colonies planted in the neighbouring provinces for the purpose of controlling the original inhabitants. In Canarese country called Wodeyar [q.v.] or proprietors, and this title is borrowed by some Tamul zemindars [q.v.]. Poligars were known formerly as Main cauvalgars [q.v.] or superior guardians in contradistinction to the village watchmen or Stala cauvalgar [q.v.] or local guardians. These persons established many small principalities in secluded places, and by siding with the larger powers they retained their petty sovereignties. Towards the close of the eighteenth and beginning of the ninteenth century, the British government found it necessary to reduce several of the Poligar chiefs. In 1802–3 Cataboma naick, the dumb chief of Punchaulamcoorchy in Tinnevelly, thrice beat back British detachments, and was at last subdued by a small army with Europeans and guns.—"*b*" Also the name of a country breed of dogs [nye]. See vol. I (19).——*Poliput* (பாளையப்பட்டு - pálaiyappattu, Tam.). From (pálegádu, tel. poligar + pattu, tam. village). The tract held by a poligar.——*Pollem* (పాళెము - pálemu, Tel.). From (páli, san. row); military lines. North country usage. Camp, fortified village. Also the country of a Poligar [q.v.].——*Polliem* (പാളയം - pálayam, Mal.; பாளையம் - pálaiyam, Tam.). From (páli, san. row); military lines. Southern usage. Camp, fortified village. Also the country of a Poligar [inam]. Proper name, common to both sexes [peyar], where short for poligar.——*Polliett atchan* (പാലിയത്തച്ചൻ - pályattaççan, Mal.). From (pálayam, mal. camp + aççan, mal. father). The hereditary minister [muntry] of Cochin.——*Poomaun* (पुमान् - pumán, San.). From (pá, san. to protect). A man, a male [poorsham].

PAU (पा - pá, *San.*). Drink.——*Patro* (ପାତ୍ରୋ - patró, Oor.). From (pátra, san. a worthy person) [pautram]. The chief of a collection of Khond [q.v.] mittahs [paut].——*Paunay* (பானை - pánai, Tam.). From (pána, san. drinking). Pot. Oil measure. 4 chemboos = 1 paunay; 8 paunays = 1 pothy [alavay, 4a]. Approximate actual value, 1 paunay = 864 cubic inches. Trichinopoly. Same as Marcam. See vol. I, 609; II, 519.——*Paun doob* (پانڈوب - pándúb, Hind.; ನೀರ್ಕೊಗಿಲೆ - nírkógile, Can.;

మునుగుడుకోడి - munugudukódi, Tel.). Hind. from (páni, hind. water + dúb, hind. dive). Can. from (níru, can. water + kókila, san. cuckoo). Tel. from (munugu, tel. to dive + kódi, tel. fowl). Hind. also (pántirri), meaning swimmer in water; (churaká). Can. also (plava). Beng. also (dubari). Title otherwise Indian diver, Indian grebe. Podiceps philippensis, podicipidæ, mergitores, natatores [pacshy, 51], of naturalists [jantoo]. Alias Podiceps minor.——*Pauny* (پانی - pání, Hind.). From (pána, san. drink). Water [ab, neer]. Plant 1st term. Ex., where transl. is of second term:—Flacourtia cataphracta (pániáunla), phyllanthus emblica; Polygonum flaccidum (pánímirch), piper nigrum; Salix tetrasperma (pánijama), close to; Trapa bispinosa (pániphal), fruit; Vitex trifolia (pánikíshambálí), vitex negundo. See gloss. paragraphs.——*Paut* (పాత - páta, Tel.). From (pátra, san. worthy person). Title of a chief [patro].——*Pautram* (पात्र - pátra, San.). From (pá, san. to drink). Vessel. Also worthy person [patro, paut].——*Pautra saumaun* (పాత్రసామాను - pátrasámánu, Tel.). From (pátra, san. vessel + sámánu, tel. things). Plate, metal ware.——*Payashwany* (ಪಯಸ್ವಿನಿ - payasvini, Can.). From (payas, san. water + vin, san. suffix of possession). Mal. name (perumpuzha), meaning large + river. Known also at Chundragherry village as the Chundragherry, and elsewhere as the Noojicull. River; South canara dist., Cassergode and Ooppinangady tal. Rises in the Western ghauts near Sumpaujey in lat. 12° 26′; long. 75° 43′; and, after a westerly course of 65 miles, enters the sea two miles south of Cassergode in lat. 12° 29′ N., long. 75° 1′ E. When in flood, timber is floated from the ghauts [q.v.]. Except for about 15 miles above its mouth, not at other seasons navigable. A fort, situated on its left bank, commands the river. Forms northern boundary between the Malayalam and Tooloovam countries. No Nayar woman may cross it, it being unlucky for women to cross boundaries.——*Puckally* (پکهالی - pakhálí, Hind.). A waterman, one who carries water by means of a double bag borne by a bullock [maud] or buffalo [bheesty, khoolgah].——*Puckaul* (پکهال - pakhál, Hind.). From (payas, san. water + khalla, san. leather). Large leather bag for carrying water in, usually double, thrown over a bullock; also a leather bag used for raising water from wells, being attached to a rope passing through a pulley and drawn up by oxen passing up and down an inclined plane [capilay, mhote].——*Puneeala* (پانی آنولا - pániáunlá, Hind.). Means water + phyllanthus emblica, linn. Same as Indian plum.

PAUD (پاد - pád, *Hind.*). Means protecting. Throne [takht].——*Padshah* (پادشاہ - pádshah, Pers.). From (above + sháh, pers. lord). King. Equivalent to Arabic sultan [q.v.]. In composition forms a lacab; as Padshah begum, royal lady [ism]. Padshahy is royal. Padshah zaudah is a prince. Also written Pachah, Pashah, Bashaw.

PAUK (पूग - púga, *San.*; فوفل - faufal, *Ar.* and *Pers.*; سپاری - supárí, *Hind.*; ಅಡಿಕೆ - adike, *Can.*; వక్క - vakka, *Tel.*; അടക്ക - atakka, *Mal.*; பாக்கு - pákku, *Tam.*). San. from (pú, san. to purify). Tel. from (valka, san. areca palm). Mal. from (ata, mal. to be closed + káya, mal. fruit); from the kernel being covered up by husk. Tam. from sanscrit. San also (udvéga), meaning going swiftly. Areca-nut; product of Areca catechu, linn. [areca] boiled and dried for market; commonly called betel-nut [q.v.].——**(1)** *Paukmuttay* (பாக்குமட்டை - pákkumattai, Tam.). The lower part of leaf stalk which wraps round the areca tree.——*Pauk paulay* (سپاری کا پالا - supárikápálá, Hind.; പാള - pála, Mal.; பாக்குப்பாளை - pákkuppálai, Tam.). The flower sheath or spathe of the areca tree.——*Pauk vettilay* (பாக்குவெற்றிலை - pákkuvettilai, Tam.). Areca nut and betel [paun soopyaury].——*Pauk vetty* (பாக்குவெட்டி - pákkuvetti, Tam.). A pair of scissors for cutting or paring areca nuts in slices.——**(2)** *Alagoo pauk* (அலகுப்பாக்கு - alaguppákku, Tam.). From (alagu, tam. weapon blade). Areca nut sliced thin and boiled in the water in which its husk has been boiled, giving it reddish hue.——*Aurang pauk* (ஆரங்கம்பாக்கு - árangambákku, Tam.). From (árang, hind. factory). Areca nut sliced and boiled and rendered superior by being kept in godowns [q.v.].——*Coor sheevina pauk* (கூர்சீவினபாக்கு - kúrsívinappákku, Tam.). From (kúr, tam. apex + shívu, tam. to scrape). Scraped areca nut.——*Cottay pauk* (गुवाक - guváka, San.; گھوٹی سپاری - ghotísupárí, Hind.; ಅಡಕೆ - adike, Can.; పోకవక్క - pókavakka, Tel.; കൊട്ടടക്ക - kottatakka, Mal.; கொட்டைப்பாக்கு - kottaippákku, Tam.). Entire nut dried without boiling. Areca nut raw.——*Deshauwar pauk* (ದೇಶಾವರದಡಿಕೆ - déshávaradadike, Can.; தேசாவரம்பாக்கு - tésávarambákku, Tam.). From (déshávara, mahr. foreign country). Imported areca nut.——*Kali pauk* (കളിയടക്ക - kaliyatakka, Mal.; களிப்பாக்கு - kalippákku, Tam.). Mal. from (kali, mal. glutinous paste + atakka, mal. areca nut). Areca nut boiled and dried.——*Lavangachoor pauk* (ಲವಂಗಚೂರಡಿಕೆ - lavangachúradike, Can.; இலவங்கச்சூர்ப்பாக்கு - ilavangaccúrppákku, Tam.). Title and Tam. from (lavanga, san. clove + chúrú, can. piece). Areca nut broken into pieces the size of cloves [lavangam].——*Shaulyam pauk* (சாலியம்பாக்கு - sháliyambákku, Tam.). From (cháli, mal. to mix ingredients in fluid). Same as Alagoo pauk. Also called Shauya pauk or colored betel nut [charvanam].

PAUKYAM (பாக்கியம் - pákkiyam, *Tam.*). From (bhágya, san. good luck). Non-bramin proper name. Also taken by native Christians [peyar].——*Paukyanautan* (பாக்கியநாதன் - pákkiyanáthan, Tam.). From (above + nát'ha, san. lord). Hindoo 2nd or pers. name. Common among non-bramins. Also taken by native Christians [peyar].

PAUL (क्षीर - kshíra, *San.*; لبن - laban, *Ar.*; شیر - shír, *Pers.*; دودھ - dúdh, *Hind.*; ಹಾಲು - hálu, *Can.*; పాలు - pálu, *Tel.*; പാൽ - pál, *Mal.*; பால் - pál, *Tam.*). San. from (kshar, san. to flow) [cauram, khar]. Pers. from sanscrit. Milk [sheer]. Ass's, buffalo's, cow's, and goat's, are those used in native dietary. Ass's milk has a strong resemblance to human milk in color and consistence; used by veidyans [q.v.] in maniacal cases, leprous affections [cooshtam], and in black carpang [q.v.] or milk-rash of children; differs from cow's milk in cream being less abundant and more insipid, in containing less curd [tyre] but greater proportion of sugar [q.v.]. Buffalo [khoolgah] milk is inferior to cow's [pashoo] but abundant; has peculiar taste and smell, affords a great deal of coarse kind of butter, of which the natives make ghee [q.v.] and curd [tyre]; plentiful and cheap; veidyans consider it predisposing to catarrh, and tending to cloud the intellect; cow's milk is fully treated of by agastyan [q.v.] in his veidya einnoor; he considers it the most aperient of all milk, and tending to clear the intellect; milk of a white cow [pashoo] is of use in hypochondriacal cases; that of red one, for such as suffer from biliary derangements; that of a black one, particularly if it has also a dark colored udder, for those who are troubled with phlegm [sheetam]; that a cow which is of the color of gold, for all manner of disorders; if drunk in the morning it alleviates rheumatism; at noon it gives appetite, but if taken at bed-time it is good for every ailment of the body. Whey is a common drink in the hot weather; as also butter-milk or mor [q.v.]. Tyre [q.v.], a preparation of milk, from its slight acidity is gently aperient; made by adding to warm fresh milk a little butter-milk, and the whole allowed to stand all night; usually eaten with rice [q.v.]. Ghee is butter that has been clarified by boiling, and afterwards having some tyre, salt [ooppoo], or betel [q.v.] leaf added; constantly employed in making curries [q.v.]. What is called sugar of milk, is obtained from milk by evaporation and crystallization. Veidyans [q.v.] consider goat's [vellaud] milk as a powerful restorative, and order it in consumptive complaints; in padaurta chintaumany it is said that goat's milk ought to be administered in such cases as are accompanied with a deficiency of bile [pittam], and in certain bowel-complaints; that it is useful when the bowels are inclined to be over loose, and the appetite delicate; it resembles cow's milk, except in its greater consistence; it throws up abundance of cream, which can be converted into butter. Paul is a common plant first term, meaning either white or milky plant, and often joining two genera. Ex., where transl. is of second term:—Alstonia scholaris (pálagaruda), braminy kite; Argyreia speciosa (pálasamudra), ocean; Curcuma angustifolia (pálagunda), pot; Dregea volubilis (pálakúra), vegetable; Ehretia lævis (páladantamu), ivory; Ficus bengalensis (pálumaram), tree; Hemidesmus indicus (pálasugandhi), and (pálatsukkandéru), good smelling; Holostemma rheedii (pálagurugu), celosia argentia; Ichnocarpus frutescens (pálvalli), creeper; Ipomæa digitata (pálmódikka), and (pálmutakku), modecca palmata; Ipomæa pentaphylla (pálanélagummudu), ipomæa digitata; Leptadenia reticulata (pálatíga), creeper; Maranta ramosissima (pálagunda), pot; Oxystelma esculentum (pálakúra), vegetable; Vallaris heynei (pálamalle), jasminum sambac; Wrightia tinctoria (pálanili), indigofera tinctoria. See gloss. paragraphs. Paul is also a prefix in place names; as Paulore, meaning milk village.——**(1)** *Palair* (పాలేరు - páléru, Tel. pálér *). From (pálu, tel. milk + éru, tel. river).—"*a*" River; Kistna dist., Nundigauma tal. Tributary of Kistna. Nearly coincides with the boundary line between Nizam's and British dominions. Rises in the Nizam's territories, and passing west of Juggayapett, empties itself into the Kistna near Rauvairila, after a course of 15 miles in the talook S.E. Not navigable. Irrigates Takkellapaud village.—"*b*" River; Kurnool dist., Coilcoontla tal. Tributary of the Coondair; takes its rise on Moonimadoogoo hill and flowing over Ooppalapaud plateau descends into plains by a waterfall 50 feet high, 2 miles west of Owk and joins Coondair [aroovy].—"*c*" River; Nellore district, Canigherry and Cundoocore talooks. Rises in Canigherry talook near Pandava naugoolavaram in the Veligondas, flows first southerly then south-easterly through Canigherry and Cundoocore talooks and Choondy zemindarry, and empties itself into the sea near Paucala in the last talook. Runs during October, November and December. Not at all navigable. A causeway near Bitragoonta.——*Palaur* (பாலாறு - páláru, Tam. pálár *). From (pál, tam. milk + áru, tam. river).—"*a*" River; Sanscrit name (kshíranadí), means the same. Rises in Mysore in lat. 13° 21′ N., long. 78° 00′ E. Flows south-east for 55 miles through Mysore, when it crosses the frontier into the North arcot district, cutting off a small portion of Salem district and passing through Salem, N. arcot and Chingleput dists. the gorges of the Eastern ghauts [q.v.] in lat. 12° 40′, long. 78°

35′, about 85 miles from its source. Quitting the hills, it holds a course generally east for 87 miles, and passes by Vellore and Arcot to lat. 12° 48′, long. 79° 41′, where it crosses into Chingleput district, through which it continues its direction south-eastwards for 48 miles, to its fall into the Bay of Bengal, a few miles south at Sadras in lat. 12° 28′, long. 80° 12′. Total length about 230 miles. The chief tributaries are the Poyney and Cheyaur, the latter joining it at Tirppacoodal about 8 miles east of Conjeeveram. On its banks are the towns of Krishnapooram, Vaniyambaudy, Amboor, Goodiyattam, Vellore, Arcot, Wallajahbad and Chingleput. Sometimes it is not in flood for several years together. Owing to this together with the rapid fall the current is very strong. The entrance is contracted by a bar of sand, inside of which the river becomes of considerable width. Crossed by railway bridges at Mailputty in North arcot, 2,376 feet long, 18 spans, and between Chingleput and Madrantacam, 2,160 feet long, 18 spans. The waters are largely used for irrigation. Palaur anicut [q.v.] is thrown across near Arcot; for description see vol. I, 403. This river once flowed in present Corteliaur valley. The two alluvial valleys diverge, about 10 miles east of Arcot. A stream is even now connected with the Palaur, just at the fork, by which water is carried down the Corteliaur valley for many miles and eventually falls into that river; called the old Palaur. There is a Tamul proverb :— நாலு ஆறு கூடி ஒரு பாலாறு ஆயிற்று—"if four rivers "unite, the stream will be equal to the Palaur." Palaur beacon is a trig. station; Madrantacam talook; lat. 12° 26′ 48·83″; long. 80° 11′ 15·26″; from Madrantacam E.S.E. 18 miles; from Veppancherry S.E. 3 miles.—"*b*" River; Coimbatore dist., Pollachy tal. Descends from hills in frontiers of Dhully in Oodamalpett talook, and after passing through that talook enters the frontiers of Pollachy talook, and empties itself into the Auliyaur, a few miles below Anamullay village. It runs from May to February. Nowhere navigable. Not bridged.——*Palcole* (పాలకొల్లు - pálakollu, Tel. pálakol *). From (pálu, tel. milk + kollu, tel. pond). Sanscrit name (kshírāráma), milk garden. Town; Godavery dist., Narsapore tal.; pop. 8,657; acres 2,877; lat. 16° 31′; long. 81° 46′; from Cocanada S.W. 44 miles; from Narsapore N.N.E. 6 miles; from the sea N. 13 miles. On the Narsapore canal. First settlement of Dutch on this part of coast who opened factory in 1652. They founded indigo [q.v.] factories, iron-works, and extensive weaving [nesavoo] industries, and planted large orange [q.v.] and shaddock [pummelow] gardens. Ceded to English by treaty of Versailles in 1783, but Dutch remained in possession, paying a small quit-rent till 1804; formally restored to Holland in accordance with the Convention of the Allied Powers, 1814, on 31st March 1818; ceded to Great Britain under treaty of March 1824 on 1st June 1825. Seat of a Protestant mission. The oranges still retain the name of the Batavia orange [q.v.]. In the churchyard Dutch inscriptions, as old as 1662, are still legible. Very old temple of Rameshwarasawmy noted for a high tower over front gate.——*Palcondah* (పాలకొండ - pálakonda, Tel.). See sep. title. ——*Palghaut* (പാലക്കാട് - pálakkátu, Mal.). See sep. title.—— *Pauchamma* (పాచమ్మ - páchamma, Tel.). From (páchi, tel. milk + amma, tel. mother). Feeding mother or own mother. The village goddess worshipped by the Pullies [q.v.].——*Pauchonty* (പാച്ചോറ്റി - pácçótti, Mal.; பாலை - pálai, Tam.). Title from malayalam. Mal. from (pál, mal. milk + chori, mal. to shed) [lodh]. Tam. from (pál, tam. milk) [dita, edible paulay, eve's apple, ground paulay, monkey face paulay, nakchiknee silk cotton, nauga champak, paula indigo, paulay silk cotton, tellicherry bark]. Tam. also (páççottippálai), meaning milk + to shed + the plant. Title otherwise Indian gutta-percha, Malabar caoutchouc, Malabar paulay, Milk tree, Oval mohwah. Botanically Dichopsis elliptica, benth., sapotaceæ [vricsham, 82]. Alias Bassia elliptica; Isonandra acuminata. Large tree, 80–90 feet; the bark rusty, often whitish from the presence of numerous lichens [cull pausy]; tree runs to such a height without giving off branches that naked eye is unable to distinguish forms of leaves, and it is generally recognised by the fruit and flowers found fallen at the base; leaves fascicled at the extremities of the branches, somewhat coriaceous, dark green above, paler beneath, entire, long-petioled, oblong-obovate, tapering at the base, terminating in a sudden blunt acumination; flowers axillary, generally solitary, occasionally two to three together; calyx biserial, outer deeply three-cleft, segments broad, acute at the apex, leathery, valvate, inner of three distinct sepals attached to the base of the outer calyx, alternate with its divisions, smaller, longer, equal, acuminated at the apex, of dirty white color, imbricated in estivation; corolla deeply six-cleft, occasionally five-cleft, deciduous, tomentose at point of insertion at the stamens, color darkish red; stamens twelve to eighteen, usually sixteen, inserted into the throat of the corolla, shorter than the corolla, sessile, extrorse, two-celled, all perfect, alternate in two rows; ovary tomentose, superior six-celled, each cell with one ovule; style nearly three times the length of the ovary; stigma simple; fruit chartaceous, size of an almond [baudam]; seed exalbuminous, erect; flowers dullish red; flowering in february; anamullays and w. coast. When incisions are made in the bark, a substance exudes somewhat similar to caoutchouc [indian caoutchouc] and guttapercha [q.v.], but hitherto of no practical value; resembles bird-lime; when fresh, milky white [good]. Has a hardish, ornamentally veined wood, which takes a good polish; not unlike saul [q.v.] in the grain, but takes after the character of some of the harder kinds of cedar [deodar]; employed by planters for building. No other common species here. The following are other elastic giving plants of the presidency:—Achras sapota, sapodilla [foreign mohwah]; Alstonia scholaris [dita]; Calotropis gigantea, mudar [yercum]; Cryptostegia grandiflora, paulay silk cotton [q.v.]; Euphorbia antiquorum, square milk hedge [q.v.]; Euphorbia cattimandoo, cement plant [cuttimandoo]; Euphorbia nereifolia, leafy milk hedge [q.v.]; Euphorbia tirucalli, round milk hedge [q.v.]; Euphorbia tortilis, twisting milk hedge [q.v.]; Ficus bengalensis, banyan [q.v.].——*Pauladay* (பாலாடை - páladai, Tam.). Milk ladle for feeding infants. Plant second term. Ex., where transl. is of first term:—Euphorbia thymifolia (shittirappáladai), bright-colored; Indigofera pedicellata (shirubáladai), small. See gloss. paragraphs.——*Paulaul* (பாலாள் - pálál, Tam.). From (above + ál, tam. a person). The highest kind of priest among the Todahs [q.v.].——*Paulay* (பாலை - pálai, Tam.). From (pál, tam. white). Arid tract [desham]. For plants of this name see sep. title.——*Paultchy* (ಪಾಲ್ಚ್ಚಿ - pálççi, Can.). Milk house of Todahs. There is one paultchy in each mund [q.v.]. Besides the ordinary dairy, there is in some villages a larger paultchy, in which relics are kept and which is looked on as a shrine.—— **(2)** *Vedroo paul* (వెదురుపాలు - vedurupálu, Tel.). Bamboo milk [q.v.]. Same as Tabasheer [q.v.].——**(3)** The following are the different forms of milk.——*Ghee* (گھی - ghí, Hind.). Clarified butter, made by boiling butter for a few minutes when the watery part is dissipated. See sep. title.——*Mor* (तक्र - takra, San.; छाछ - chhách, Hind.; ಮಜ್ಜಿಗೆ - majjige, Can.; మజ్జిగ - majjiga, Tel.; മോര് - mór, Mal.; மோர் - mór, Tam.). Tel. also (tsalla), meaning cooling. Butter-milk. Sour milk produced while converting cream into butter. In conjunction with quick-lime [choonam], is used in preparing a stringy mixture, which native painters employ to give adhesion to colors [rangh]. As a drink, allays irritability of stomach in dyspeptic affections. In cases of incipient phthisis of great advantage.—— *Paneermayeh* (پنیرمایه - panírmáyah, Hind.; ಹೆಪ್ಪು - heppu, Can.; చేమిరి - chémiri, Tel.). Hind. from (panír, hind. cheese + máyah, pers. leaven). Rennet. An aqueous infusion of dried stomach of calf used to coagulate the casein of milk, preparatory to manufacture of cheese [paneer, paulcutty]. Contains a soluble ferment which acts directly on the milk. Here the stomach of the calf is not used, but that of kid substituted. In Arabian works on medicine rennet is described as deobstruent, attenuant and aphrodisiac. Preparing cheese by rennet is entirely confined to higher classes of mahomedans. Among Hindoos cheese-making is unknown, since the use of ordinary rennet is altogether contrary to their religion. Cheese to be saleable among them would have to be made with some vegetable rennet. The best known vegetable substitute for rennet is Paneerbund [asgand] or cheese-maker, withania coagulans, dun. This has been used from very early times. An ounce of the pounded capsules in a quart of water is a suitable strength for use; a table-spoonful of this decoction coagulates a gallon of warm milk in about half an hour. Other plants substituted for rennet are, Epicarpurus orientalis, bl. [stunted jack] and Leucas cephalotes, spr. [large toombay].——*Paulauday* (பாலாடை - páládai, Tam.). From (ádai, tam. scum). Cream, the butyraceous part of milk, which rises to surface on milk standing.—— *Paulcutty* (किलाट - kiláta, San.; پنیر - panír, Hind.; ಗಿಣ್ಣ - ginna, Can.; జున్ను - dzunnu, Tel.; പാലട - pálata, Mal.; பாற்கட்டி - párgatti, Tam.). Tel. from (tsundu, tel. to evaporate). Tam. from (pál, milk + katti, tam. clot). Tam. also (páládaikkatti), meaning milk + cream + clot. Cheese. Generally prepared by boiling milk [paul] till reduced to a thick mass, and sugar [q.v.] added. See Paneermayeh above.——*Tyre* (दधि - dadhi, San.; دهی dahí, Hind.; ಮೊಸರು - mosaru, Can.; పెరుగు - perugu, Tel.; തയിര് - tayir, Mal.; தயிர் - tayir, Tam.). Tel. from (péru, tel. to harden); Tam. corr. from sanscrit. Curdled milk. Generally prepared by adding a little butter-milk [mor] to boiled milk, and allowing the whole to stand a whole night. Other acids are used, such as dried mango [q.v.], tamarind [q.v.], lime-juice [lime], and even a piece of tarnished silver [velly], but none of these are so effective. The acid is in some places put into raw cold milk; by this process however a longer time is necessary to curdle the milk.——*Vennay* (வெண்ணெய் - venney, Tam.). From (vel, tam. white + ney, tam. ghee). Butter. Made by churning cream, and then kneading the product. The butter of this country is thin and poor, except on the hill ranges.

PAUL (పాలు - pálu, *Tel.*). From (pantsu, tel. to divide). Share.——*Paulcoonda* (పాలకుండ - pálakunda, Tel.). From (above + kunda, tel. an earthen pot). A grain fee allowed to ryots [q.v.] before the grain is measured.

PAULAY (పాల - pála, *Tel.*; പാല - pála, *Mal.*; பாலை - pálai, *Tam.*). Milky plant, from (pál, tam. milk) [paul]. Very common plant second term. See the cases below, and there are others.——*Coorg paulay* (കുടകപ്പാല - kutakappála, Mal.). Same as Tellicherry bark.——*Cotton paulay* (దూదిపాల - dúdipála,

Tel.). From milky plant + cotton-like fibres. Same as Nakchicknee silk cotton.——*Crow paulay* (కాకిపాల - kákipála, Tel.). Same as Carook vauly.——*Dog paulay* (కుక్కపాల - kukka-pála, Tel.). From milky plant useful in dog cure. Same as Indian ipecacuanha.——*Edible paulay* (तालवृन्त - tálavrinta, San.; खिरणी - khiraní, Mahr.; کهیرنی - khírní, Hind.; بواسا - buásá, Malay; ಹಾದರಿ - hádari, Can.; ಪಾಟಲಿ - pátali, Too.; പഴമുണ്ണിപ്പാല - pazhamúnippálai, Mal.; பாலை - pálai, Tam.). Title from fruit being edible, especially in malabar. San. from (tála, san. palmyra, borassus flabelliformis, linn. + vrinta, san. leaf). Mahr. from (kshíra, san. milk). Hind. like mahratta. Mal. from (pazham, mal. fruit + unnu, mal. to eat + pála, mal. milk plant). Tam. from (pál, tam. milk) [dita, eve's apple, ground paulay, monkey-face paulay, nakchiknee silk cotton, nauga champak, pauchonty, paula indigo, paulay silk cotton, tellicherry bark]. San. also (vasantadútí), meaning messenger ot spring; cf. mango. Hind. also (khírí), like mahratta, above. Can. also (pátali) [common bendy, jungle geranium, pauthiry, weaver's beam]; (némi). Mal. also (manilakkára), meaning manilla canthium. Title otherwise Khırny, Manilla cauray, Obtuse-leaved mimusops, Obtuse-leaved molsaree. Botanically Mimusops [csheericay] kauki, linn., sapotaceæ [vricsham, 82]. Alias Mimusops binectaria, obtusifolia. Tree; leaves alternate, obovate, very blunt, silvery or hoary beneath, crowded at the ends of the branches; flowers fascicled, hexandrous; fruit oval, drooping; flowers yellowish-white, tinged with rose; cultivated in malabar on account of fruit. Bark medicinally astringent; leaves ground and mixed with root of curcuma [country saffron] and ginger [q.v.] used as cataplasm for tumours; leaves boiled in gingelly [q.v.] oil and added to the pulverised barks are remedy in beribery [q.v.]; seeds yield an oil applied to the eyes in ophthalmia, and also internally as an anthelmintic. Fruit eaten; bark yields gum [gond].——*Fire-brand paulay* (కొరవిపాల - koravipála, Tel.). From boughs being used as torches. Same as Large jungle geranium.——*Fragrant paulay* (సుగంధిపాల - sugandhipála, Tel.). From milky plant and fragrant root. Same as Indian sarsaparilla,——*Golden paulay* (കനകപ്പാല - kanakappála, Mal.). Same as Country radish.——*Ground paulay* (काळाइंद्रजव - káláindrajava, Mahr.; دودهی - dúdhí, Hind.; ಕಾಡುಗಣಗಲು - káduganagalu, Can.; పుట్టజిల్లేడు - puttajillédu, Tel.; పాల్కుర్వన్ - pálkurvan, Oor.; നിലമ്പാല - nilampála, Mal.; வெட்பாலை - vedbálai, Tam.). Title from small size. Mahr. from (kálá, mahr. black + indrajava, mahr. seed of holarrhena antidysenterica, wall.). Hind. from (dúdh, hind. milk). Can. from (kádu, can. wild + ganagalu, can. the plant, nerium odorum, sol.). Tel. from (putta, tel. ant hill + jillédu, tel. calotropis gigantea, r. br.). Mal. from (nilam, mal. ground + pála, mal. milk plant). Tam. from (vel, tam. white + pálai, tam. milky plant). Tel. also (koyilamokiri); (pedda-pála), meaning large + milky plant; (tellapála), meaning white + milky plant. Oor. also (harido). Mal. also (nílampála), meaning blue milk plant. Tam. also (pálai), meaning milky plant [dita, edible paulay, eve's apple, monkey-face paulay, nakchiknee silk cotton, nauga champak, pauchonty, paula indigo, paulay silk cotton, tellicherry bark]. Title otherwise Downy oleander. Botanically Wrightia [veppaulay] tomentosa, rœm. & schult., apocynaceæ [vricsham, 87]. Alias Nerium tomentosum; Wrightia mollissima, pubescens, wallichii. Small tree; leaves oblong, acuminated, downy; corymbs terminal, small; tube of corolla longer than the calyx; corona fleshy, lacerated into obtuse segments; follicles distinct; branches downy; flowers with a white corolla and orange-colored corona. Milky juice from stem used to stop bleeding; bark of stem and root used in snake bites and stings of scorpions [tail]. Juice mixed with water forms a good yellow dye [shauyam]; gives a thick, scarlet-colored oil. Wood yellowish-white, moderately hard, close-grained.——*Ground paulay* (നിലപ്പാല - nilappála, Mal.). Same as Garrar and Madras absinth.——*High ground paulay* (మెట్టపాల - mettapála, Tel.). Same as Giant sweet potato.——*Hill paulay* (కొండపాల - kondapála, Tel.). Same as Somam.——*Jointed paulay* (ರೆಂಗ - renga, Can.; கணுப்பாலை - kanup-pálai, Tam.). Title from knotty timber. Tam. from (kanu, tam. joint + pálai, tam. mimusops hexandra, roxb.). Botanically Mimusops [csheericay] roxburghiana, wight, sapotaceæ [vricsham, 82]. Tree; leaves obovate, oval, obtuse at both ends; fascicles two to three-flowered; pedicels about thrice the length of the petioles; lobes of the calyx ovate-acute, about the length of the corolla, rusty-velvety; sterile stamens about the length of the filaments, broad-obovate, fimbriated on the margin; fruit globose, depressed above, about six-seeded; flowering in march and april. Timber coarse-grained, but strong, fibrous and durable.——*Kite paulay* (கருடப்பாலை - karudappálai, Tam.). From antidote to snake bite. Same as Paulay silk cotton.——*Monkey-face paulay* (राजादनी - rájádaní, San.; खिरणी - khiraní, Mahr.; کهیرنی - khírní, Hind.; పాలచెట్టు - pálachettu, Tel.; ଚରକୁଳି - char-kuli, Oor.; පලු - palu, Singh.; பாலை - pálai, Tam.). Title from appearance of flowers. San. from (rájá, san. king + ad, san. to eat); superior fruit [chironjee]. Mahr. from (kshíra, san. milk). Hind. from mahrattta. Tel. from (pálu, tel. milk + chettu, tel. tree). Tam. from (pál, tam. milk) [dita, edible paulay, eve's apple, ground paulay, nakchiknee silk cotton, nauga champak, pauchonty, paula indigo, paulay silk cotton, tellicherry bark]. Mahr. also (ráyaní), from sanscrit. Tel. also (nunni). Tam. also (kanup-pálai), meaning joint + the tree. Title otherwise Indian ape-face flower, Indian mimusops. Botanically Mimusops [csheericay] hexandra, roxb., sapotaceæ [vricsham, 82]. Alias Mimusops indica. Large tree; leaves alternate, cunei-form or obcordate, deeply emarginate, glabrous and shining on both surfaces; calyx six-cleft, with three-interior and three-exterior segments; corolla tube very short, interior segments six, the exterior twelve; pedicels one to six together, nearly as long as the smooth petioles, one-flowering; berry size and shape of an olive [zeitoon], yellow when ripe; flowers small, whitish. Handsome tree, with rigid branches and broad wedge-shaped leaves, often found planted in groves near mahomedan buildings. Bark which much resembles that of mimusops elengi [ilanjy] is used medicinally on account of its astringent properties; seeds yield an oil which is used as a demulcent, emollient, tonic and alterative. Fruit edible both fresh and dried. Oil from seeds; stem gives a gum [gond]. Wood very heavy, close, even-grained, hard, compact, durable, purplish color when fresh, turning to reddish-brown, susceptible of high polish; used for oil presses, building, and a variety of other purposes; excellent for rulers, handles of instruments, and all articles of turnery, and for cabinet purposes.——*Needle paulay* (दुग्धिका - dugdhiká, San.; दुधाणी - dudhání, Mahr.; دودهه لتا - dúdhlatá, Hind.; పాలకూర - pálakúra, Tel.; ଦୁଧିୟାଲତା - dudhiyalata, Oor.; ஊசிப்பாலை - úsippálai, Tam.). Title from narrow linear leaves. San. from (dugdha, san. milk), from milky sap. Mahr. from (dugdha, san. milk). Hind. from (dúdh, hind. milk + latá, hind. creeper). Tel. from (pála, tel. white + kúra, tel. pot herb). Oor. from hindostany. Tam. from (úsi, tam. needle + pálai, tam. milk plant), from narrow linear leaves; cf. ammayaur coondal. Tel. also (chirupála), meaning small + the plant; (nélapála), meaning ground + the plant; (pinnapála), meaning small + the plant; (dúdipála), meaning cotton + the plant [nakchikne silk cotton]; (sépachettu). Title otherwise Doodi-paula, Rosy milk-wort. Botanically Oxystelma esculentum, r. br., asclepiadeæ [vricsham, 88]. Alias Asclepias rosea; Oxystelma wallichii; Periploca esculenta. Twining under-shrub; leaves opposite linear-lanceolate; corolla ciliated at the margin; racemes inter-petiolar; follicles oblong, acuminated. Slender-stemmed, herbaceous, creeping plant; narrow linear leaves, about 5 inches long; saucer-formed flowers of size of eight-anna piece, white without and rose-colored and purple-veined within. Decoction of plant used medicinally as gargle; the milky sap in combination with turpentine [ganda firoza] prescribed for itch. Fruit eaten; cattle [maud] eat the plant. No other common species here.——*Night paulay* (मेरशिंगी - mérashingí, Mahr.; இராப்பாலை - iráppálai, Tam.). Title from flowering at night. Mahr. from (méra, mahr. hill-border + shingi, mahr. horned). Tam. from (irá, tam. night + pálai, tam. milky plant); from evening flower. Tam. also (pesalatti), meaning sallowness + fig tree. Title otherwise Arcuate trumpet flower. Botanically Dolichandrone [water ailanto] arcuata, clarke, bignoniaceæ [vricsham, 99]. Alias Spathodea arcuata. Arboreous; leaves unequally pinnate, four to five pairs, leaflets from ovate subacute to orbicular, unequal at the base; entire, softly pubescent when young, afterwards glabrous, racemes terminal, elongated, many-flowered; calyx cylindrical-oblique, pubescent externally; tube of the corolla slender, limb funnel-shaped, five-lobed, fimbriated on the margin; capsule acute, compressed, eight to twelve inches long by about one broad; flowering in september; flowers expand in evening and drop in morning. Gives strong wood, used by the turner.——*Pauchonty paulay* (പാച്ചോറ്റിപ്പാല - páççóntippála, Mal.). Same as Pauchonty.——*River paulay* (ஆற்றுப்பாலை - áttuppálai, Tam.). As growing near rivers. Same as Indian willow.——*Scented paulay* (సుగంధపాల - sugandhapála, Tel.). From milky plant and fragrant root. Same as Indian sarsaparilla.——*Sea-shore paulay* (वृद्धदारक - vriddhadáraka, San.; समुद्रपान - samudrapána, Mahr.; سمندر پات - samandarpát, Hind.; سمندر پتا - samandarpattá, Dec.; ಸಮುದ್ರಹಾಲಬಳ್ಳಿ - samudrahálaballi, Can.; సముద్రపాల - samudrapála, Tel.; സമുദ്രപ്പച്ച - samudrappaçça, Mal.; මහදුමුදු - mahadumudu, Singh.; கடற்பாலை - kadarbálai, Tam.). Title from place where found. San. from (vriddha, san. old age + drí, san. to split). Mahr. from (samudra, san. ocean + parna, san. leaf). Hind. from (samandar, hind. ocean + pát, hind. leaf). Dec. from (samandar, hind. ocean + pattá, hind. leaf). Can. from (samudra, san. ocean + hálu, can. milk + balli, can. creeper). Tel. from (samudra, san. ocean + pála, tel. milky plant). Mal. from (samudra, san. ocean + paçça, san. green). Tam. from (kadal, tam. sea + pálai, tam. milky plant). San. also (chhagalántri), meaning sheep + testicles; (chhagaládí), meaning sheep + bowels; (dírghaváluká), meaning long sand creeper; (rikshagandha), meaning bear + smell [giant sweet potato]; (ajántri), meaning goat + bowels; (samudrashósha), meaning ocean + drying; (samudrapatra), meaning ocean + leaf; (chhagalá), meaning she-goat; (chhagalánghri), meaning she-goat + knee. Mahr.

also (guggulí), meaning bdellium gum, from its fragrance; (samudrasókha), meaning ocean + drying up. Hind. also (samandar), meaning ocean; (samandarsokh), meaning ocean + dry; (samandarsof); (brishtarak); (chhotábishtarak). Can. also (samudraságe), meaning ocean + dyer. Tel. also (chandrapoda), (kokkita) [hill emetic nut]; (kokkiti) [indian medicago]; (kakkita); (pálasamudra), meaning paulay tree ocean; (samudrapattsa), meaning ocean + green. Mal. also (samudrappála), meaning ocean + paulay; (samudrayógam); meaning ocean + mixture; (samudrastókam), ocean creeper. Tam. also (shamuttirappaççai), meaning ocean + green leaf; (shamuttirappálai), meaning ocean + milky plant; (péymusuttai), meaning devil + ipomœa candicans; (shamuttirasógi), meaning ocean + drying. Title otherwise Broad-leaved bindweed, Elephant creeper, Goat's entrails, Goat's knee, Large sand binder, Ocean-dryer, Samandar, Sea green. Botanically Argyreia [ajauntry] speciosa, swt., convolvulaceæ [vricsham, 93]. Alias Convolvulus nervosus, speciosus; Ipomæa speciosa; Lettsomia nervosa. Large climber, tomentose; leaves cordate, acute, glabrous above, thickly nerved and like white velvet beneath, and silky silvery; sepals five; corolla campanulate; peduncles equal in length to the petioles, umbellately capitate; corolla nearly 2 inches long, deep rose-colored, hairy in the plicæ outside. The roots are long, woody and tough, covered with a dark brown bark; on transverse section they present a central porous woody column, and several concentric rings of woody fibre, between which are situated portions of parenchyma; in the woody portions of the root there are large laticiferous vessels which contain a yellowish latex; the vascular system consists of very large dotted vessels; in the parenchyme are numerous conglomerate raphides. Root medicinally alterative, tonic; mixed with vinegar [caudy] sap is rubbed over the body to reduce obesity; the upper side of leaves is used as a discutient; the under, or white side, as a maturant; leaf in pharm. non-officinal. Gives an oil.——*Seven-leaf paulay* (ఏడాకులపాల - édákulapála, Tel.). From leaves appearing in whorls of seven. Same as Dita.——*Small paulay* (குருப்பாலை - kuruppálai, Tam.). Same as Pootranjeeva.——*Thorny paulay* (కంటపాల - kantapála, Tel.). Same as Adjutant's hedge.——*White paulay* (తెల్లపాల - tellapála, Tel.). From milky plant and white wood. Same as Paula indigo.

PAUMB (పాము - pámu, *Tel.*; പാമ്പ് - pámbu, *Mal.*; பாம்பு - pámbu, *Tam.*). Title from tamul. Tam. from (para, tam. to spread) [para]; from its diffusive motion. The terms may be considered co-extensive with the family Colubridæ, ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 17], of naturalists [jantoo]. The Paumb family proper comprises the greater part of the non-venomous snakes, namely all those which do not present any striking character either in their general habit, in the shields of the head, in the dentition, or in any other part of their organization; the body is of moderate length compared with its circumference, flexible in every single part; the head well-proportioned in every dimension, and distinct from neck; the eye of moderate size, the nostril lateral; the cleft of the mouth in accordance with the length of the head; they have numerous teeth in the jaws and on the palate, but no fangs in front or in the middle of the maxillary; the sub-caudals are two-rowed, and the chin-shields symmetrically arranged, separated by a longitudinal mental groove. They are divided into four groups, thus:—Ground Colubrides or group Coronellina; containing genera Ablabes, Coronella, Cyclophis, Nymphophidium, Odontomus. True Colubrides or group Colubrina; containing genera Coluber, Compsosoma, Cynophis, Elaphis, Ptyas, Xenelaphis, Zamensis. Bush Colubrides or group Dryadina; containing genera Herpetoreas, Zaoccys. Fresh-water Colubrides or group Natricina; containing genera Atretium, Prymmeniodon, Tropidonotus, Xenochrophis. The following are the species in Southern india, arranged alphabetically:—"*a*" Ablabes humberti. Alias Calamaria sagittaria; Enicognathus humberti. Small, living on the ground. Reddish olive, darker on the sides, the lighter back separated from the dark-colored side by indistinct punctated line; black dots edged with yellow along the vertebral line; upper part of head brown; broad black or dark-brown collar, edged with yellow; belly white, each ventral shield with black dot on each side.—"*b*" Ablabes olivaceus. Dark greenish olive, paler below; small black dots along each side of the back, less distinct, along the middle of the side.—"*c*" Atretium schistosum [chitty paumb]. Alias Coluber schistosus; Tropidonotus mœstus et surgens, schistosus. Forms the transition from Tropidonotus or rain-snake [vaunapaumb] to the true fresh-water snakes [tunny paumb]; very fierce, prepares to attack by raising the head 3 or 4 inches. Upper parts uniform blackish olive; outer series of scales and lower parts uniform yellowish; young with purple stripe from the orbit, along anterior part of body.—"*d*" Compsosoma radiatum. Alias Coluber quadrifasciatus, radiatus; Compsosoma radiatum; Tropidonotus quinque. Narrow head with a long, anteriorly truncated snout. Light yellowish-bay above and behind, paler on the sides; black streak across extremity of the occipitals, extending downwards to throat; three black lines radiate from the eye; on each side of back broad longitudinal black band; lower parts uniform yellow; black longitudinal streaks along the abdomen; attains a length of 6 feet; it inhabits bushes, marshes and paddy-fields; equally nocturnal and diurnal, preying on rats [ely], birds [pacshy], lizards [chipkalee] and frogs [bhaicam].—"*e*" Coronella orientalis. Above greyish brown, neck with a very narrow white collar; belly white, with sub-quadrangular blackish spots.—"*f*" Cyclophis calamaria. Ground snakes, frequenting grassy plains rather than dry places. Greyish or brownish grey above; each scale on the sides with two indistinct, very small brown streaks on the base; scales on each side of the back are edged with black, black edges forming small irregular spots; lower parts entirely white.—"*g*" Cynophis helena [maigha recoola poda]. Alias Coluber helena; Cynophis bistrigatus; Heretodryas helena; Plagiodon helena. Reddish olive, with numerous black transverse bands across anterior of back; neck with pair of parallel longitudinal black bands above, and oblique black band on side; lower parts uniform white; feeds on field mice [varappoo shoondely] and rats [ely].—"*h*" Cynophis malabaricus. Alias Herpetodryas malabaricus. Light brownish olive, with black cross-bands; the first band is modified into a white, black-edged collar; broad brown band along the side of the tail and of the posterior part of the trunk; short black vertical streak below the eye; another oblique streak from behind the eye.—"*i*" Nymphophidium maculatum. Light brownish, with two dorsal series of rounded dark-brown spots; sides with very small brown spots; lower parts uniform whitish.—"*j*" Odontomus gracilis. White, with about thirty-eight broad, round, dark-brown cross-bands; first occupies the head, second the neck, both separated by a white collar; lower parts uniform white.—"*k*" Odontomus nympha [cutla paumb]. Alias Coluber nympha; Lycodon nympha; Odontomus nympha. Like Gracilis.—"*l*" Odontomus semifasciatus. Alias Hydrophobus semifasciatus. White, with fifty rounded, dark-brown bands, each about twice as broad as the intervals of the ground-color.—"*m*" Ptyas mucosus. Alias Coluber blumenbachii, dhumna, mucosus; Leptophis trifrenatus. The rat-snake [q.v.].—"*n*" Tropidonotus beddomii. Alias Spilotes vittatus. Brown above; transverse streaks of orange-color along each side of the back; narrow yellow cross bar behind occipitals; labials edged with black; yellowish, black-edged band from eye to angle of mouth; belly whitish, its sides and the sub-caudals dotted with brown.—"*o*" Tropidonotus monticola. Green above, with black bands across the trunk; lower parts are white; common in the Wynaud.—"*p*" Tropidonotus plumbi-color. Alias Xenodon viridis. Called by the Tamuls the Water-snake [tunny paumb]. Dirty greenish trunk; with ten or eleven narrow black cross bars; sides of throat dotted with black; belly more or less blackish; all these markings generally disappear with age, with exception of an oblique, more or less distinct blackish band on each side of the neck, upper parts being uniform dirty green, the lower whitish; frequently enters houses.—"*q*" Tropidonotus quincunciatus. Alias Coluber anastomosatus, braminus et umbratus, hippus, rectangulus; Hydrus piscator et palustris; Tropidonotus umbratus. Generally two oblique black streaks behind the eye; belly white; ground-color of upper parts generally greyish or brownish olive; one of the most widely spread species. Frequents the neighbourhood of fresh-waters, feeds on frogs [bhaicam], toads [bhaicam], and fishes [matsyam]; they do not overpower or kill their prey by throwing a coil of the body round it, but having seized it, they at once commence to swallow it; excellent swimmers; more frequently live near water than in it. See Neercorattay.—"*r*" Tropidonotus stolatus. Alias Amphiesma stolatum; Coluber stolatus. Greenish or brownish olive, two yellow or white longitudinal bands; lower parts white; anterior ventral shields have frequently a black dot on each side; head brown above; one of the most common of all snakes; of gentle habits, feeding on small frogs; readily recognized by the peculiar pattern of its coloration [vaunapaumb].—"*s*" Tropidonotus subminiatus. Alias Amphiesma subminiatum. Greenish above, uniform or with small indistinct black and reddish-white spots; round the eye whitish, with oblique triangular black spot below; belly white, with black dots on each side; young specimens with broad black collar edged with yellow behind.—"*t*" Zamenis fasciolatus. Alias Coluber fasciolatus, hebe, curvirostres; Coryphodon fasciolatus; Tyria fasciolata. Yellowish or brownish olive above, with white, brown and black variegated cross-bands; in old ones they may entirely disappear; lower parts uniform yellowish.—"*u*" Zemenis gracilis. Yellowish olive, with round brown spots edged with black, along anterior half of trunk; blackish streak across snout; crown of head with two brown, black-edged cross-bands; black spots on each side of the belly, which is uniform yellow.—"*v*" Zamenis ventrimaculatus. Alias Coluber diadema, ventrimaculatus. Yellowish olive, with narrow black cross bars on back; small black spots along each side; belly yellowish, irregular series of black dots along each side; black cross-band between eyes, oblique black streak below them, another oblique streak on temple, blackish spot in loreal region, black streak along median line of the neck.
——*Pambah* (പമ്പാനദി - pampánadi, Mal.). From (pámbu, mal. snake); from winding course. River; Travancore state, Quilon division, Chenganore, Tiroovalla and Ambalapoya talooks. One of finest rivers of Travancore. Formed by junction of Cullaur, Cakkadaur and Pambah proper, which rise in the Ranny mountains and unite short distance above Ranny. The united stream then course above this is south-westerly. The united stream then runs a devious course west for 25 miles; the latter part of the

course being north-westerly. It flows into the Vembanaud lake by two distinct mouths. It unites with the Coolacudda river about 20 miles above its mouth. Length, 90 miles. Navigable by boats for 52 miles from its mouth. Below the hills the banks lose their wildness and are capable of cultivation; sugar-cane [q.v.], areca-nut [q.v.] and cocoanut [q.v.] plantations being extensively formed. Principal tributary is Manimala.——*Pamoor* (పామూరు - pámúru, Tel.). From (pámu, tel. snake + úru, tel. village). Sanscrit name (sarpapurí), meaning snake village.—"*a*" Talook of Calastry zemindarry lying within Nellore district. Included in Government talooks of Cundoocore and Canigherry. Cundoocore talook contains seven villages which are bounded:—on the north by Shameerapollem and Pokore and the Choondy zemindarry; on the south by Choondy zemindarry; on the east by Choondy zemindarry; on the west by Choondy zemindarry and Cauvaly talook. Canigherry talook contains seventy-two villages which are bounded:—north by Canigherry talook, east Cundoocore and Cauvaly talooks, south Oodayagherry talook, and west Budwail talook in Cuddapah district and Cumbum talook in Kurnool district. Pamoor talook was given to Calastry about 150 years ago by the Nawaub. The talook is interspersed with hills denuded of verdure. Most part is rocky and on high ground. The Munnair passes through. Vegetation very sparse. Flanked on western side by Veligondas [q.v.]. Soil, regar [q.v.], clay [calimunn] and sand [manal]. In the portion belonging to Canigherry charcoal [adoopp kary] is manufactured and sold to blacksmiths. Tape called Navaur [q.v.] and curtains called purdahs [q.v.] are made. Country cloths and blankets also made. Three tanks in Cundoocore. In Canigherry fourteen. The talook is managed for the zemindar by a Tahsildar on Rs. 150 a month.—"*b*" Village; Nellore dist., Canigherry tal.; pop. 2,629; lat. 15° 06′; long. 79° 28′; from Canigherry S.S.W. 22 miles; from Nellore N.W. 58¼ miles. Chief village of the above. A decayed fort in the midst of which is Tahsildar's cutcherry [q.v.]. Two temples of Gopaulsawmy and Shiva. Fine tank. Festivals about February and May of each year. Sack cloth woven [gunny].——*Paumbaur* (பாம்பாறு - pámbáru, Tam.). From (pámbu, tam snake + áru, tam. river); from winding course.—"*a*" River; Trichinopoly dist., Poodoocottah territory; general direction W. to E.; length about 20 miles. Rises in Peroondoray cummye, Poodoocottah territory; flows into Bay of Bengal, after passing through Tanjore district.—"*b*" River; Madura dist., Periyacoolam tal. Rises in Upper pulneys near Kodaykarnal, and passing through Vadacaray and Taumaray coolam, joins Varauhanuddy near Periyacoolam at five miles from foot of ghauts. Has four small anicuts [q.v.].—"*c*" River; Salem dist., Tripatore tal. Perennial stream having rise in Jawaudy hills. Joined by streams from Yelagherry hills and from Krishnagherry talook, and flows south joining Ponniaur river in Ootancaray talook.——*Paumben* (பாம்பன் - pámban, Tam.). From (pámbu, tam. snake); from tortuous course of the channel. Sanscrit name (sarpanadí), meaning same.—"*a*" Town, Port, Sub-registrar's office, Government telegraph office, Deputy tahsildars station, Light-house, Place of pilgrimage; Madura dist., Ramnaud zemindarry; pop. 4,494; lat. 9° 17′; long. 79° 16′; from Dindigul E.S.E. 112 miles; from Kodaykarnal E.S.E. 135 miles; from Madras S.S.W. 270 miles; from Madura E.S.E. 87 miles; from Pillaymadam E. 10 miles; from Rameshwaram W. 7 miles; from Ramnaud E. 27 miles. On the W. extremity of Rameshwaram island; which is called Paumben island by the Tamuls. In the town is a fort built by the Dutch. The population, chiefly Lubbays [q.v.], are employed as pilots, divers, and in other sea-faring pursuits. The Ceylon government immigration depot is fixed here for half the year; and this, with the constant influx of pilgrims and the grain trade, gives the port an appearance of great activity. The place was formerly noted for pearl fishery [chunk, moty], and at an early period it was used as a refuge for the Ramnaud chiefs.—"*b*" Artificial channel known as the Pass, affording means of communication between India and Ceylon. It lies between the mainland of Madura district and Rameshwaram island, the first link in the chain of islets and rocks forming Adam's bridge [q.v.]. The formation is sandstone [manal cull]. Records in the temple of Rameshwaram relate that in the year 1480 a violent storm breached the isthmus, and that subsequent storms rendered the breach permanent. The passage was formerly impracticable for ships, being obstructed by two parallel ridges of rock about 140 yards apart. The more northerly of these ridges was the higher of the two and used to appear above water at high tide. The space between was occupied by a confused mass of rocks, lying for the most part parallel to the ridges and in horizontal strata. A survey of the passage was begun in 1822, and experiments in blasting and removing the rocks were undertaken in 1828. The first scientific marine survey was conducted in 1837. The charts made on this occasion still remain the standard authority. Operations for deepening and widening the channel were commenced in 1838. By 1844 the channel had been deepened to 8 feet of water at low spring tides, and two men of war were able to pass through. In 1854 the uniform depth was 10½ feet, and the passage was navigable for keeled vessels of 200 tons; the extension of the channel so as to be practicable for ocean steamers is forbidden by the shallow character of the neighbouring coast. Blasting and dredging operations have since been carried on regularly and the main channel through the larger reefs of rocks has been carried down to a minimum depth of 14 feet. Its length is 4,232 feet and its width 80 feet. A second channel to the south of the main channel, called Keelakaray passage, 2,100 feet long and 150 feet wide, has been dredged through a sandbank to the depth of 12 feet. The traffic is mostly of a coasting nature between Ceylon and the mainland, though there is some emigration by this route to British burmah and the Straits.—"*c*" Light on a sand hill about one mile east of northern Paumben channel. Lat. 9° 17′; long. 79° 16′. White, fixed. 14 miles range. Visible from all directions seaward. Circular masonry column. Guide to vessels making for the Paumben channel.——*Paumidy* (పామిడి - pámidi, Tel.). From (pámu, tel. serpent + eda, tel. place). The local god is bhogeshwaran or shiva, lord of serpents. Town and travellers' bungalow; Anantapore dist., Gooty tal.; pop. 6,120; acres 7,788; lat. 14° 57′; long. 77° 38′; from Anantapore N. 18 miles; from Gooty S.S.W. 12 miles. Occupied chiefly by weavers. Large dyeing [shauyam] works. Chintzes [q.v.], coarse cloths, and palampores [q.v.], manufactured. Trig station is in lat. 14° 57′ 49·86″; long. 77° 37′ 24·61″; height 1,680 feet; from Anantapore N. 20 miles; from Cottapully N. 5 miles; from Gooty S.S.W. 11 miles.——*Paupanna* (పాపన్న - pápanna, Tel.). From (pámu, tel. serpent + anna, tel. elder brother, titular affix). Hindoo 2nd or pers. name [peyar].——*Pauparauz* (పాపరాజు - páparádzu, Tel.). From (pámu, tel. serpent + rádzu, tel. king). Hindoo 2nd or pers. name [peyar].

PAUNDY (பாண்டி - pándi, *Tam.*). From (pandu, tam. antiquity); but (pán, tam. toddy) is also connected. πανδαίη of Megasthenes. Some very ancient Dravidian population of the Tamul country. The similarity of name with the Aryan pandavas [q.v.] is only accidental, but hence the introduction into S. india of an extraordinary number of Pooranic legends. Sandar bandi of Marco Polo is a corruption of Soondra paundyan of Madura; see vol. I (13), (116); II, 250. Paundy is suffix in place names [vaundy]. Also title of certain Christian fishermen and palankeen [q.v.] bearers at Cannanore, who came from Tinnevelly. Also name of a Malabar paddy [q.v.]; choora paundy means bad smell; ora paundy means border; tekkan paundy means south.——*Paundava beed* (పాండవబీడు - pándava-bídu, Tel.). From (pandu, tam. antiquity + bídu, tel. waste land); connected with the most ancient times. Waste land from time immemorial [anandi beed].——*Paundicoozhy* (பாண்டிக்குழி - pándikkuzhi, Tam.). From (pandu, tam. antiquity + kuzhi, tam. pit). Kistvaen or ancient grave, especially when sunk in the ground. Found both in lands that have been irrigated for hundreds of years and in now untrodden unhealthy jungles. The present population cannot be said to have any veneration for these remains. By the traditionary accounts of the people they are ascribed variously as follows. To a desire of obtaining shelter from a predicted shower of fire, about the beginning of the era [saca] of Shalivahanan [q.v.]; to certain pigmies that lived towards the end of the Dwauparyoog [q.v.], who constructed for themselves these dwellings underground; to the five Pandavas [mahabhaurat] as a refuge from the persecution of Dooryodhanan, which is evidently an imported tradition; to the votaries of the goddess named Neela mookary, who had offered to her monthly sacrifices therein; to the Veddahs [q.v.] and Coorumbar [q.v.], or hunters and savages, of former days, as places of protection for their wives and children from wild beasts; to certain men in the time of Rama [q.v.], who had monkey's tails, whence these pits are by some called Vauly coody [vauly]; to Raucshasans [q.v.], or evil beings, who constructed these places of safety for their wives and children; to a custom of very early times after the deluge, when men lived so long as to be a burden to themselves and their relatives, so that the latter put them in certain earthen shells with a supply of provisions and left them to die. Tradition states that great wealth has from time to time been carried away from some of these excavations. The Paundicoozhies were evidently intended for the reception either of cinerary remains or of bodies in a sitting posture, a mode of burial still observed by Lingadhauries [q.v.] and others. All are placed east and west. They vary in size, some of those buried in tumuli having a floor area of 8½ × 5½ feet and being as much as 6½ feet in depth. In some cases a rectangular stone slab like a couch or bed, and supported at the corners by pieces of stone like legs, has been found resting on the floor of the dolmen [coday cull]. The articles lodged in Paundicoozhies along with human bones are personal ornaments in the shape of beads, rings, &c., small pots for holding food or water, and various implements and weapons. Some of the beads are cornelian [akeek i soorkh] and have some show of patterns on them worked into the stone by grinding, and containing a hard white enamel which renders the patterns more distinct. The Paundicoozhy pottery, except the very large sepulchral vessels, has evidently been moulded on a wheel. In some cases the small articles of pottery have a fine polish of the kind at the present day communicated by rubbing the surface with Tanakk [q.v.] seeds of Gyrocarpus jacquini, roxb. Some articles are ornamented by stripes, alternately brown and red, of colored pigments and transparent varnish. No inscription has ever been found. Everywhere in Southern india a great resemblance may be observed in shape and size of the vessels found in these prehistoric graves, a fact indicative of a primitive state of civilization.

Paundicoozhies contain no implements belonging to the stone age. On the other hand articles made of iron are very common in them, and consist of bill-hooks or grass knives, swords, arrow-heads, &c. They contain in many cases human bones. No complete human skull has ever been found; but the fragments of skulls indicate that the people were dolichocephalic and had low, narrow, retreating foreheads. The Coorumbar [q.v.] of North arcot still construct Paundicoozhies upon a small scale when a Gowda [gownden] or head of a sect dies. It is clear that the tumulus, with its Paundicoozhy in the interior, and often with its enclosing concentric circles of stones [azhauram], was the prototype of the Booddhist [booddha] tope or dagoba with its rails, mound and relic casket [aursham, booddha, dagoba, mady moottaur tauzhy, maundavar coozhy, tope, vaulicoody].——*Paundoo cull* (பாண்டுக்கல் - pándukkal, Tam.). From (pandu, tam. antiquity + kal, tam. stone). General term for megalithic structures, standing free above ground. European menhir. Three or more stones placed upright, and over them a large flat stone placed so as to form a small rude chamber, is the usual dolmen [codaycull] form. To be distinguished from small buildings, formed with dressed stones and generally having one or two figures of Hindoo deities carved upon them. Paundoocullls are of a much ruder description, formed with unhewn stone and without any carving or inscriptions. The purposes of the ortholithic structures were sepulchral and sacrificial in connection with the worship of deceased ancestors or chiefs. Pillar stones marking boundaries are found everywhere. Most are dressed stones; some inscribed. Many have carvings of Hindoo figures. Occasionally pillar stones commemorate some exploit in the destruction of tigers [pooly], as they are carved with representations of the fight. These appear to be of somewhat modern date. Paundooculls seem mostly later than Paundicoozhies [aursham, codaycull, mausticull, paundicoozhy, raucshasagoondloo, topicull, veeracull].——*Paundyam* (பாண்டியம் - pándiyam, Tam.). Greek χώρα πανδιόνων. The people are called Pandæ in Pliny. Ancient tamul kingdom. Well-known to the Romans as the kingdom of king Paundyan, who sent ambassadors on two different occasions to Augustus cæsar. Nothing can be added to what is said at vol. I (116) to (121) [charitram].——*Paundyan* (பாண்டியன் - pándiyan, Tam,). Hindoo third name [peyar]. Any Pandyan king.——*Paundya rajaukkal* (பாண்டியராசாக்கள் - pándiyarásákkal, Tam.). From (pándiyam, tam. the kingdom + rájá, san. king). Tamul prose work sometimes attributed to the three most eminent of the professors of the Madura college [q.v.], Nakkeeran, Paranan, and Capilan. Agrees closely with Madura pooraunam [q.v.], and is therefore probably, as well as it, a branch from the sanscrit Halausya mahautmyam [q.v.]. Purports to be a history of Paundyan kings in thirteen books, chiefly of a legendary and sectarial character. It begins with Coolottoongan, in the year of kaly [q.v.] one thousand, and records anecdotes of the following princes, Anantagoonan, Caulabhooshanan, Rajendra paundyan, Rajeshwaran, Gambheeran, Vamshapradeepacan, Poorhootajit, Paundya vamsha patancan, Soondreshwaran, Paudashekharan, Varagoonan, Rajendran, Soogoonan, Chitraratan, Chitrabhooshanan, Chitradhwajan, Chitravurman, Chitrasenan, Chitravicraman, Oodantan, Rajachoodaumany, Rajashaurdoolan, Coolottoongan, Yodhanapraveeran, Rajacoonjaran, Rajabhayancaran, Oograsenan, Mahasenan, Shatroonjayan, Bheemaratan, Bheemaparaucraman, Prataupamartaundan, Vicramacoonjaran, Yooddhacootoohalan, Atoolavicraman, Atoolakeerty, Keerty vibhooshanan, Vamshashekharan, Vamshachoodaumany, or thirty-nine of the seventy-four princes, which tradition usually ascribes to Paundya dynasty [raj]. With the exception of the first three, of Varagoonan, and the last two, the notice of these princes is restricted to simple enumeration of their names, and the stories found in the accounts of the others are commonly miraculous legends, illustrating the power of the tutelary deities of the Paundyan kingdom, Parvaty [q.v.] and Shiva [q.v.], combined as Meenautchisoondreshwaran. The last five chapters are devoted to marvellous anecdotes of the college of Madura [madura college] founded by Vamshashekharan, for the cultivation of Tamul [q.v.]; the first professors of which forty-eight in number, it is said, were incarnations of the forty-eight letters of the Sanscrit alphabet [varnamaulay] and Soondreshwaran himself was the forty-ninth. The latter presented the college with a diamond [vajram] bench or desk [sangapalagay], which would give place to no heterodox or inferior productions. The professors becoming arrogant, Shiva appeared as Tripoorauntacaveeshwaran, or according to some accounts, Tirvulloovan [q.v.], the celebrated moral poet, and produced a work [cooral] which being laid on the desk with the books of the forty-eight professors thrust every one of them off and occupied the whole in solitary dignity.

PAUNO (పాణో - pánó, *Tel.*); Ooriya word. From (pánasi, tel. pariah). Also written Panoh. Hill Pariahs in the Parlakimedy and Goomsoor maliahs [q.v.]. Each Khond [q.v.] village has a Pariah [q.v.] low-caste hamlet attached to it [jauty]. Numbers about 35,000.

PAUR (பார் - pár, *Tam.*). To see.——*Pauppautty* (பாப்பாத்தி - páppátti, Tam.). From (pár, tam. to see). A Bramin woman. Pauppautty myna is braminy myna, which see.——*Paurppaur* (பார்ப்பான் - párppán, pers. sing.; பார்ப்பார் - párppár, pers. pl., Tam.). From (pár, tam. to see). Overseer. Honorific name for bramin [q.v.] caste [jauty]. Compare Adansonia digitata (páppárappuli), bramin's tamarind.

PAURAY (बांगडा - bángada, *Mahr.*; పర్ర - parra, *Tel.*; பாறை - párai, *Tam.*). Title from tamul [para]. Mahr. from (bága, mahr. curvature). Tam. means flat. Horse-mackerel, Scad. The genus Caranx, carangidæ, acanthopterygii, teleostei, pisces [matsyam, 16], of naturalists [jantoo]. The species best known to the natives are shown below. Cf. also Barber pauray, Thick skin pauray.——*Barber pauray* (அம்பட்டன்கத்தி - ambattangatti, Tam.). Title from being long and narrow like handle of the razor. Tam. from (ambattan, tam. barber + katti, tam. knife). Title otherwise Razor-fish of Tamuls. Cf. Notopterus kapirat [barber vaulay]. Mene maculata, coryphænidæ, acanthopterygii, teleostei [matsyam, 18], of naturalists [jantoo]. Alias Mene anna-carolina; Zeus ambata kuttee, maculatus. Ambata kuttee from tamul. Body ovoid, highest anteriorly; mouth oblique; lateral line sometimes ceases below end of dorsal fin, or on reaching upper caudal lobe may divide into two branches, the lower of which descends; deep blue along back, becoming silvery white on sides and abdomen; two to three rows of large spots along superior half of body above level of pectoral fin; sea; 8½ inches in length. No other common species here.——*Black-headed pauray* (నూనెపర్ర - núneparra, Tel.; ഉളിമ്പാറ - ulimpara, Mal.; கருமூஞ்சிப்பாறை - karumúñjippárai, Tam.). Tel. from (núne, tel. oil + parra, tel. caranx genus); from gloss of body [scorpion goby]. Mal. from (uli, mal. chisel + pára, mal. caranx genus). Tam. from (karumai, tam. blackness + múñji, tam. face + párai, tam. caranx genus). Tam. also (iruppárai), meaning dark + caranx genus. Caranx [pauray] ire, carangidæ, acanthopterygii, teleostei [matsyam, 16], of naturalists. Specific name perhaps from (irul, tam. darkness). Alias Carangoides præustus; Caranx melanostethos, præustus; Citula præusta; Selar ire. Dorsal and anal profiles about equally convex; snout slightly elevated; jaws of about equal length anteriorly, or lower slightly the longer; scales cover body except just in front of ventral fins; extend forwards on head to above eyes, cheeks and upper portion of opercle, none on the snout, preorbital, nor occipital crest; soft dorsal and anal fins have high scaly sheath; lateral line consists of about 102 scales, at first it is moderately curved, becoming straight below eighth dorsal ray, keeled scales do not commence until underneath the fifteenth ray, they are well developed but not strong; free portion of the tail rather longer than high; colors gray along back, becoming lighter on abdomen, whole glossed with purple and gold; head and chest occasionally brownish-black; no opercular spot; fins yellow, with black points, anterior portion of second dorsal black with white tip, rest of fin and of anal more or less dark; caudal sometimes with black tips and white edge; sea; upwards of a foot in length; in malabar mostly captured during cold months.——*Golden pauray* (कतलिकावलि - katalikávali, Mahr.; تنگپارا - tangpárá, Hind.; చెవులపర్ర - chevulaparra, Tel.; தங்கப்பாறை - tangappárai, Tam.). Title from sides of head and body. Hindostany from tamul. Tel. from (chevi, tel. ear + parra, tel. caranx genus). Tam. from (tangam, tam. gold + párai, tam. caranx genus) [gray pauray]. Title otherwise Cobbler fish, Cordonnier. Caranx [pauray] armatus, carangidæ, acanthopterygii, teleostei [matsyam, 16], of naturalists. Alias Carangoides armatus, citula; Caranx ciliaris, citula; Citula armata, ciliaria, plumbea; Olistus malabaricus, rüppellii; Sciæna armata. Body oval, dorsal and anal profiles about equally convex; lower jaw the longer, cleft of mouth commences opposite middle of eyes; scales a few on hind portion of head, round eyes, and on cheeks, also over body except chest and portion anterior to bases of pectoral and ventral fins; also form a groove for soft dorsal and anal fins; lateral-line consists of 104 scales, makes a long low curve becoming straight beneath middle of second dorsal, keeled plates developed in last half of horizontal portion of lateral-line, but are not large; free portion of tail hardly so high at its base as it is long; upper surface of head and back bluish-green, sides of head and body golden, with purple reflections; opercular spot moderately distinct; first dorsal blackish, second and anal yellowish, with darker edges; pectoral dark behind base; the young vertically banded; sea; 20 inches in length.——*Gray pauray* (தங்கப்பாறை - tangappárai, Tam.). Tam. from (tangam, tam. gold + párai, tam. caranx genus) [golden pauray]. Caranx [pauray] nigrescens, carangidæ, acanthopterygii, teleostei [matsyam, 16], of naturalists. Sea; dorsal profile slightly more convex than that of the abdomen; lower jaw very slightly longer, cleft of mouth commences anteriorly below level of eye, very slightly oblique; scales on cheeks, round eyes, upper portion of opercle and body, none on chest as high as base of pectoral fin; lateral-line contains 140 scales, at first forms very low long curve to below thirteenth dorsal ray, from whence it gradually becomes straight, length of base of arch equalling that of straight portion of fin; keeled scales, slightly developed, being only distinct in last eight scales; free portion of tail at its base nearly equals its length; colors dusky-grayish, innumerable fine black points, and generally glossed purple; well marked black opercular spot; fins nearly black, especially dorsal; madras

fishermen assert that it annually arrives from deep sea about march.——*Rama pauray*, (இராமப்பாரை - irámappárai, Tam.). Tam. from (ráma, san. pleasing + párai, tam. caranx genus); from color. Tam. also (námappárai), meaning the caste mark of the white clay [naumam, tirmunn] streak on forehead + caranx genus; from stripe. Caranx [pauray] leptolepis, carangidæ, acanthopterygii, teleostei [matsyam, 16], of naturalists. Alias Caranx bidii, mertensii; Letaspis leptolepis; Sclaroides leptolepis. Jaws about the same length, or lower slightly longer; scales over body, chest, cheeks, and superiorly on head to above middle of eye; lateral-line ninety-five scales, makes gentle curve, becoming straight from below first third of second dorsal fin; keeled scales begin gradually under last portion of second dorsal, longest are below commencement of free portion of tail; free portion of tail one-fourth higher at base than it is long; colors silvery, broad golden stripe from above eye to upper edge of tail, lower two-third of dorsal fin yellow, upper third dark; anal having outer third white, rest yellow; large deep black spot on shoulder, said to be sometimes absent; sea; 6¾ inches in length.——*Shark pauray* (करटाबांगडा - karatábángadá, Mahr.; సొరపర - soraparra, Tel.; கொமாரப்பாரை - komarappárai, Tam.). Title from appearance. Mahr. from (karatá, mahr. wretched + bángada, mahr. caranx genus). Tel. from (sora, tel. shark, carcharias genus + parra, tel. caranx genus). Tam. from (komari, tam. unchanging youthfulness + párai, tam. caranx genus). Mahr. also (gaura), meaning reddish white. Tel. also (varaga). Caranx [pauray] rottleri, carangidæ, acanthopterygii, teleostei [matsyam, 16], of naturalists. Alias Megalaspis rottleri; Scomber guara, rottleri, woragoo. Guara from mahratta; woragoo from teloogoo. Very gradual ascent from snout to first dorsal fin; cleft of mouth slightly oblique, lower jaw slightly longer; scales about seventy-eight rows, fifty-five of which are large plates; on the cheeks, upper edge of opercle, and top of head, only a narrow band in central line in front ventral fin, otherwise the chest in front is scaleless; also form low sheath over bases of soft dorsal and anal fins; lateral-line at first makes strong curve, becomes straight below middle of first dorsal fin where wide plates commence, most strongly keeled over free portion of tail which is strongly depressed; colors back glossy-green, abdomen silvery tinged with yellow; large black spot on upper and posterior portion of opercle; fins yellow, dorsal and anal tipped black; upper half of pectoral darker than lower; sea; 5 feet in length.——*Striped pauray* (మీసపర - mísaparra, Tel.; கண்ணிப்பாரை - kannippárai, Tam.). Tel. from (mísamu, tel. whiskers + parra, tel. caranx genus). Tam. from (kanni, tam. rope + párai, tam. caranx genus). Caranx [pauray] atropus, carangidæ, acanthopterygii, teleostei [matsyam, 16], of naturalists. Alias Brama atropus; Carangoides atropus; Caranx nigripes; Olistus atropus; Scomber mais-parah. Mais-parah from teloogoo. Body oval, strongly compressed, with crest on summit of head well developed; cleft of mouth commences anteriorly opposite centre of front edge of eye, and maxilla reaches to below middle of orbit; lower jaw longer; scales a few on cheeks and below eye, none on remainder of head; body scaled except on chest and from between bases of pectoral and ventral fins to head; they form rather high scaly sheath to second dorsal and anal fins; lateral-line consists of about seventy-five rows, curves to below fifth ray of dorsal fin, subsequent to which keeled scales commence; colors bluish-green along back, becoming silvery shot with purple on sides and beneath; well marked black opercular spot; ventrals deep black; the young are vertically banded and opercular spot indistinct or absent; sea; a foot in length.——*Thick skin pauray* (پارا - pára, Hind.; தோற்பாரை - tórbárai, Tam.). Hind. from tamul. Tam. from (tól, tam. skin + párai, tam. caranx genus); from thick skin. Chorinemus lysan, carangidæ, acanthopterygii, teleostei [matsyam, 16], of naturalists [jantoo]. Alias Chorinemus aculeatus, commersonianus, farkharii; Scomber akenparah, forsteri, lysan, madagascariensis; Scomberoides commersonianus. Body rather strongly compressed, profile over nape slightly concave; cleft of mouth deep; scales distinct and lanceolate; lateral-line has slight angular elevation soon after commencement; colors six to eight large, round, gray spots like finger marks on side, lateral-line sometimes going through two first, while others are all above it; summit of soft dorsal black; sea; attains a considerable size; no other common species here.——*Thief pauray* (கள்ளப்பாரை - kallappárai, Tam.). Title from cunning habits. Tam. from (kallam, tam. guile + párai, tam. caranx genus). Caranx [pauray] kalla, carangidæ, acanthopterygii, teleostei [matsyam, 16], of naturalists. Specific name from tamul meaning guile. Alias Caranx brevis, calla; Selar brevis, kalla. Abdominal profile more convex than that of back; lower jaw longer; scales over body, chest, and some on cheeks; well developed sheath to dorsal and anal fins; lateral-line having 80 scales, rather strongly curved anteriorly, but not ending abruptly; keeled plates begin at commencement of straight portion; free portion of tail longer than high; colors bluish-green above, shot with silver, sides and abdomen silvery, with nacreous reflections; distinct black spot on opercle; tail and caudal fin brilliant yellow, upper lobe tinged green; other fins white, excepting dorsal which has black upon it; sea; 8 inches in length.

PAURITHAM (பாரிதம் - páritham, *Tam.*). Barytes [cull].

PAURY (पारी - párí, *San.*). From (pára, san. shore). Sea [samoodram].——*Paurijautam* (पारिजात - párijáta, San.). From (above + já, san. to be born); produced at churning of ocean [coormam, samoodram]. Tree of paradise [calpacam]; tree of plenty. Cf. Common coral tree, Coral jasmine.

PAUSY (शैवल - shaivala, *San.*; शेवाळ - shévála, *Mahr.*; کنجال - kanjál, *Hind.*; ಪಾಚಿ - páchi, *Can.*; పాచి - páchi, *Tel.*; പായൽ - páyal, *Mal.*; பாசி - pási, *Tam.*). San. from (shí, san. to rest); from cooling property. Drav. from (pasumai, tam. greenness) [pye]. Otherwise Poolloory, as being parasitic on plants. Mosses, order Musci [vricsham, 160]. Or else green and mouldy formations on objects. Pausy uncompounded generally means moss [pauchy]. Also variegated glass beads or green earthen beads making necklace for children of lower orders.——**(1)** *Pauchimaun* (फसि - p'hasi, Mahr.; ತಿರಪು - tirapu, Can.; పాచిమాను - páchimánu, Tel.; ପଞ୍ଚି - panchi, Oor.; நமை - namai, Tam.). Title from teloogoo. Tel. from (páchi, tel. moss + mánu, tel. tree); perhaps from moss green color of wood. Tam. means itching; or probably connected with (nemi, san. wheel); from use of wood for cart wheel [nemmy]. Tel. also (bhúchakramu), meaning earth + wheel. Oor. also (pasi). Botanically Anogeissus [dhavam] acuminata, wall., combretaceæ [vricsham, 55]. Alias Conocarpus acuminata. Large tree; limb of calyx five-cleft; petals none; leaves without glands, nearly opposite, oval or oblong-lanceolate, entire, acute; when young, pubescent, adult ones glabrous; peduncles simple, with one head of flowers; flowers small, pale-greenish; abundant in circars [q.v.]; flowering in cold season. Leaf used in tanning [chamrah]. Wood grey, sometimes yellowish-grey with a greenish tinge, shining, in structure moderately hard; like vekkauly [q.v.], but not so good.——*Pauchipenta* (పాచిపెంట - páchipenta, Tel.). From (páchi, tel. moss + penta, tel. heap). Sanscrit name (práchinapura), meaning ancient city.—"*a*" Zemindarry; Vizagapatam dist., Saulore division; pop. 18,436. Feudatory of Jeypore. The founder of the family was a Naick [q.v.] under Jeypore, who was appointed to guard the ghaut [q.v.] and received the title of Dacshina cavauta yoovarauz, and some villages both above and below the pass. He built a fort at Taida, but his descendants moved down to Pauchipenta. The estate is sometimes called Taida or Taida pauchipenta. The family belong to the Condarauz [q.v.] caste. The Mahratta horse of Jaffer ally descended into the Chicacole circar [q.v.] ni 1754, by the treachery of the Pauchipenta zemindar, who was consequently imprisoned. At his death in 1789 a small Towjee [q.v.] was allowed to his son Mullappa rauz, who after battle of Pudmanaubham received a cowle [q.v.] for his patrimonial villages. He died in 1797, and the permanent settlement was made with Annama rauz, his only son. The zemindar is greatly in debt and the estate is being disintegrated. Peshcush Rs. 2,584.—"*b*" Village, Head-quarters of zemindar, Pass; Vizagapatam dist., Saulore division; pop. 4,962; lat. 18° 29′; long. 83° 09′; from Coraputt S.E. 33 miles; from Madras N. 411 miles; from Narsapatam N.N.E. 64 miles; from Parvatipore S.W. 29 miles; from Saulore W.S.W. 6 miles; from Vizagapatam N.N.W. 54 miles; from Vizianagram N.N.W. 31 miles. Old fort. A large weekly market of hill products. The pass [ghaut] carries the road from Saulore to Jeypore.——**(2)** *Autt pausy* (ஆற்றுப்பாசி - áttuppási, Tam.). From (áru, tam. river). River-weeds; especially Najas indica, cham., fluviales.——*Cadal pausy* (समुद्रशाक - samudrasháka, San.; دریاکا کنجال - daryákákanjál, Hind.; సముద్రపుపాచి - samudrapupáchi, Tel.; കടല്പായൽ - katalpáyal, Mal.; கடற்பாசி - kadarbási, Tam..). Sea-weed, order Algæ [vricsham, 163] of naturalists. Especially species of Gracilaria [agar-agar] and Laminaria. Almost all the plants of this class yield soda [sujjee khaur] and iodine on incineration. Gracilaria lichenoides, greville, is Ceylon moss or edible sea-weed. Gracilaria tenax is Malay Agar-agar.——*Cody pausy* (கொடிப்பாசி - kodippási, Tam.). From (kodi, tam. creeper). Moss creeping upon water; especially Hydrilla verticillata, rich., hydrocharidaceæ.——*Coondal pausy* (கூந்தற்பாசி - kúndarbási, Tam.). From (kúndal, tam. anything radiating like woman's hair). Trailing moss; especially Zannichellia indica.——*Coratty pausy* (गवेधु - gavédhu, San.; रानजोंधला - ránajóndhalá, Mahr.; వడ్లపూస - vadlapúsa, Tel.; കുരത്തിക്കൊണ്ട - kurattikkonda, Mal.; කිරිඳිමාන - kirindimáná, Singh.; குறத்திப்பாசி - kurattippási, Tam.). Title from tamul. San. from (gó, san. water + édh, san. to grow). Mahr. from (rána, mahr. wild + jóndhalá, mahr. sorghum valgare, pers.). Tel. from (vadlu, tel. paddy + púsa, tel. grain); from rice-like seeds. Mal. from (kuratti, mal. corava woman + konda, mal. tuft of hair). Tam. from (kuratti, tam. corava woman + pási, tam. greenish, variegated beads); from use as ornament by corava [q.v.] women. San. also (jargadi); (gavédhuka), meaning water-grower. Tel. also (golive); (kókilákshamu), meaning cuckoo + eye; (korimidi) [neermoolly]; (gilagaddi); (golimidi) [small chiretta]; (adavigódhuma), meaning forest wheat, triticum vulgare, vill. Mal. also (káppirikkonda), meaning negro + tuft of hair. Tam. also (nerbul), meaning paddy + grass; (nenmani), meaning paddy, oryza sativa, linn. + grain, from rice-like seeds; (púnáççippul), meaning earth + goddess + grass. Title otherwise Coix millet,

Coratty's hair, Cuckoo's eye, Job's tears, Negro's hair, Paddy grass, Wild millet, Wild wheat. Botanically Coix lachryma, linn., graminaceæ [vricsham, 156]. Alias Coix arundinacea; Lithagrostis lachryma. Annual grass, foot or more in height, native of india; culm branched, full of pith, half-terete above, obtuse; spikelets axillary, peduncled, not involucrate; fruit ovate; root annual; flowering in the rainy season; the hardened involucres are known as job's tears. Seeds oblong, globose, size of peas [calauyam]; coarse cereal [dhaunyam] with hill tribes taking the place of millets [q.v.]. Seeds used as beads [munkah]. Other species are:—barbata, gigantea. —*Cullpausy* (शिलावल्कल - shilávalkala, San.; بهق الحجر - bahakulhajar, Ar.; گل سنگ - gulisang, Pers.; پتھر کا پھول - pattharkáphúl, Hind. and Dec.; రాతిపాచి - rátipáchi, Tel.; കല്പായൽ - kalpáyal, Mal.; கற்பாசி - karbási, Tam.). San. from (shilá, san. rock + valkala, san. bark). Ar. from (bahak, ar. ringworm + hajar, ar. stone); from supposed curing properties. Pers. from (gul, pers. flower + sang, pers. stone). Hind. from (patthar, hind. stone + phúl, hind. flower). Tel. from (ráyi, tel. stone + páchi, tel. moss). Mal. from (kal, mal. stone). Tam. from (kal, tam. stone). Tam. also (marappási), meaning tree moss. Any lichen, order Lichenes [vricsham, 162], of naturalists. Order of flowerless or cryptogamic plants, occurring either as crust-like or leafy expansions or in small branching shrub like tufts, usually colored grey, yellow, or greenish-yellow; over stones, brick-walls, the bark of trees, &c. On the Coondah hills in the Neilgherries all the rocks are covered with lichens. In this country the relative proportion of lichens growing upon the leaves of trees or epiphyllous lichens is large, and gives a special character to tropical lichenology. One or two species of lichen growing upon rocks in S. india are used in medicine; especially Lichen rotundatus, rottl., used as a liniment. Parmelia perlata, ach., a yellow dye lichen, is found on Neilgherries. As a food such as Iceland moss, lichens not known here.—*Ilay pausy* (இலைப்பாசி - ilaippási, Tam.). From (ilai, tam. leaf). Large-leafed moss; especially Lemna obcordata.—*Moottay pausy* (முட்டைப்பாசி - muttaippási, Tam.). From (muttai, tam. egg). Aquatic plants with inflated appendages to root; especially Utricularia stellaris, linn. f., lentibularieæ.—*Neer pausy* (शेवल - shévala, San.; நீர்ப்பாசி - nírppási, Tam.). From (nír, tam. water). San. from (shí, san. to rest); from the cooling property. Duck-weed. Lemnaceæ family. —*Pazham pausy* (பழம்பாசி - pazhambási, Tam.). From (pazham, tam. fruit). Otherwise called Cottay pausy meaning seed + moss, Coray pausy meaning reed + moss, and Tott pausy meaning palm leaf + moss. Especially Sida humilis, willd., malvaceæ [vricsham, 25].—*Vailam pausy* (வேலம்பாசி - vélambási, Tam.). From (vél, tam. acacia). Also called Veppam pausy, meaning margosa + moss. Especially Chara corallina.—*Vazhookk pausy* (വഴുക്കുപ്പായൽ - vazhukkuppáyal, Mal.; வழுக்குப்பாசி - vazhukkuppási, Tam.). From (vazhukku, tam. slimy). Genus Vallisneria, order Hydrocharaceæ or floating water plants. Grow at the bottom generally of running waters. Possess cooling powers.

PAUTA (పాట - páta, *Tel.*). Old [haley, pazha]. Prefix in place names; as Pautapaud, old village.

PAUTALAM (पाटल - pátala, *San.*). Means pale-red rose color. Botanically the Stereospermum genus, bignoniaceæ [vricsham, 99]. Trees; leaves pinnate, terminated by a single leaflet; flowers white, often fragrant, and in terminal panicles; capsule cylindrical or almost square; seeds bony, scarcely winged. The species best known to the natives are:—chelonoides [pauthiry], xylocarpum [valencoorny].—*Paudalam* (பாடலம் - pádalam, Tam.). From (pátala, san. pale red); from the color. Name of Cheran's chestnut horse. See vol. I (126).—*Paudel* (पाडल - pádala, Mahr.). Same as Pauthiry. —*Pautalagandhy* (పాటలగంధి - pátalagandhi, Tel.). From (pátala, san. pale-red + gandha, san. smell). Same as Snake root.—*Pauthiry* (பாதிரி - páthiri, Tam.). See sep. title.

PAUTAM (पाठ - pát'ha, *San.*). From (pat'h, san. to read aloud). Lesson. Pautashaulay is a school [madrissa].

PAUTHAY (பாதை - páthai, *Tam.*). From (pat'ha, san. path) [panthy]. Road-path. Irooppoo pauthay is rail-road.

PAUTHIRY (पाटलि - pátali, *San.*; पाडल - pádala, *Mahr.*; پاڑل - pár, *Hind.*; ಪಾದರಿ - pádari, *Can.*; ನಜುದಿ - najudi, *Coorg*; తగడ - tagada, *Tel.*; ପାମ୍ପୁନିଆ - pamp'húniya, *Oor.*; പാതിരി - pátiri, *Mal.*; ලුනුමදල - lunumadalá, *Singh.*; பாதிரி - páthiri, *Tam.*). Title from tamul; no connection with paudry or padre [pautalam]. San. from (pátala, san. red), from flower [common bendy, edible paulay, jungle geranium, weaver's beam]. Mahr. from sanscrit. Mal. from sanscrit. Can. also (kalladi). Coorg also (mallali). Tel. also (kaligottu); (mokkavépa), meaning stump + margosa tree, melia azadirachta, linn.; (pádiri); (kaligóru); (pisúl); (pulakail). Tam. also (ponbáthiri), meaning gold + the tree; (vellaippáthiri), meaning white + the tree; (appu); (kánavirukkam), meaning forest tree. Title otherwise Paudel, Paural, Trumpet flower. Botanically Stereospermum [pautalam] chelonoides, dc., bignoniaceæ [vricsham, 99]. Alias Bignonia chelonoides; Heterophragma chelonoides. Trunk straight, of a great height and thickness; bark thick, scabrous, brown; branches very numerous, the inferior horizontal above, gradually becoming more and more erect to the top; leaves opposite, pinnate, with an odd one, about 20 inches long; leaflets opposite, short petioled, generally four pair, the interior smallest, obliquely oval, pointed, sometimes slightly notched about the margins, when young downy, afterwards smooth, about 4 inches long by two broad; petioles about 9 inches long, channelled, smooth; stipules none; panicles terminal, the larger ramifications decussate, the smaller or terminal two-forked, with a sessile flower in the cleft; peduncles and pedicels round, covered with oblong grey scabrous specks; bracts small, caducous; flowers pretty large, yellow, very fragrant; calyx five-notched; nectary, a yellow fleshy ring surrounding the base of the germ; filaments four, a fifth sterile one between the lower pair; anthers double, stigma two-cleft; silique very long, slender, twisted; receptacle of the seeds spongy, white, with alternate notches on the sides for the seeds to lodge in. A pagoda [q.v.] flower. Infusion of root and flowers, a cooling drink in fevers. Flowers make a scented water. Wood orange yellow; close, even-grained, elastic, durable, easily worked, gives smooth glossy surface; sapwood rather coarse-grained, brownish white color, not durable. There is a Tamul proverb:—பலா உத்தமம், மா மத்திமம், பாதிரி அதமம்—"the jack "[q.v.] tree, is the best, the mango [q.v.] is middling, the "pauthiry tree is indifferent." A similar species is suaveolens; a middle-sized tree with pinnate leaves and panicled inflorescence; flower dark, dull crimson, very fragrant, common; planted about gardens and temples; gum [gond] from the bark; root-bark is an ingredient in dashamoolam [q.v.]; ashes used as mordant [cauram]; has a wood similar to chelonoides, but rather redder.—*Flowering pauthiry* (பூம்பாதிரி - púmbáthiri, Tam.). Title from resemblance. Tam. from (pú, tam. flower + páthiri, tam. trumpet-flower tree, stereospermum chelonoides, dec.). Title otherwise Crispate trumpet flower. Botanically Dolichandrone [water ailanto] crispa, seem., bignoniaceæ [vricsham, 99]. Alias Bignonia crispa; Spathodea crispa. Arboreous; leaves unequally pinnate; leaflets one to three pair; branchlets and racemes pubescent and velvety; leaflets oval-oblong, acuminated at both ends, quite entire; raceme terminal, few-flowered; corolla tube slender, elongated; lobes much curled and crisped; flowers pure white, fragrant; capsule pod-like, elongated, obtusely-acuminated, pendulous; flowering in may and june. Tree of subalpine forests; white flowers open towards evening, fall off early next morning; timber good.

PAUTT (പാട്ട് - páttu, *Mal.*). From (pan, mal. melody) [pah]. Poetical dialect, song.—*Coratty pautt* (കുറത്തിപ്പാട്ട് - kurattippáttu, Mal.; குறத்திப்பாட்டு - kurattippáttu, Tam.). Coravar woman's song. Malayalam and Tamul poem.—*Oonjal pautt* (ഊഞ്ചൽപ്പാട്ട് - úñchalppáttu, Mal.). From (úñchal, mal. swing). Swing song.—*Taurautt pautt* (താരാട്ടുപാട്ട് - táráttupáttu, Mal.). From (taráttu, mal. caressing). Lullaby song.—*Toolla pautt* (തുള്ളപ്പാട്ട് - tullappáttu, Mal.). From (tullu, mal. to leap). Song with dance.

PAUTTOM (പാട്ടം - páttam, *Mal.*). From (pád, mal. chief) [padoo]. The chief's share. Not to be confounded with puttah [q.v.], or title deed. Rent. The fixed proportion agreed between Jenmy [q.v.] and cultivator [coodiyaun] on lease of any sort to be given to the Jenmy as his share or rent; this proportion is usually paid in kind for rice cultivation and in money for plantations. The amount is now very variable, though originally the whole of the net produce was paid to the proprietor deducting only estimated quantity of seed and an equal quantity for cultivation expenses. This last form remains as Veroompauttom, or the simplest form of Malabar leasehold, where the tenant has least rights or advantages [veroompauttom]. For a conspectus of Malabar tenures, see vol. II, 104; I, 112.—**(1)** *Pauttacauran* (പാട്ടക്കാരൻ - páttakkáran, Mal.). From (above + káran, mal. doer, personal suffix). Tenant but generally one on a simple lease without giving any Otty [q.v.] loan.—*Pauttachit* (പാട്ടച്ചീട്ട് - páttaççíttu, Mal.). From (above + chíttu, mal. receipt). Rent receipt.—*Pauttanell* (പാട്ടനെല്ല് - páttanellu, Mal.). From (above + nel, mal. paddy). The rent when paid in kind.—*Pauttaparamba* (പാട്ടപ്പറമ്പ - páttapparampu, Mal.). From (above + parambu, mal. garden). A garden let on lease.—*Pauttaparrah* (പാട്ടപ്പറ - páttappara, Mal.). From (above + para, mal. measure). A large measure [parrah] used in measuring rent or mitchauram [q.v.] to jenmy [q.v.].—*Pauttauly* (പാട്ടാളി - páttáli, Mal.). From (above + álu, mal. to own). One who collects rents, especially of a temple [coil, pagoda].—*Pauttavauram* (പാട്ടവാരം - páttavāram, Mal.). From (above + váram, mal. rent). The rent of trees is generally called pauttom; the rent of fields is called vauram [q.v.]; this is a combination of both.—**(2)** *Cauna pauttom* (കാണപ്പാട്ടം - kánappáttam, Mal.). See under Caunom.—*Chetpauttom* (ചെട്ടുപാട്ടം - chettupáttam,

Mal.). From (chettu, mal. to tap). Rent of cocoanuts [q.v.] or other palms [taur] for extracting toddy [q.v.].——*Cundapauttom* (കണ്ടപ്പാട്ടം - kandappáttam, Mal.). From (kán, mal. to see). Rent on fields after inspection. Used in south for Veroompauttom.——*Maroopauttom* (മറുപാട്ടം - marupáttam, Mal.). From (maru, mal. next). Counter-agreement, or covenant of lease by the tenant to the proprietor.——*Moonpauttom* (മുമ്പാട്ടം - munpáttam, Mal.). From (mun, mal. before). One year's rent paid in advance of a lease being effected, but no interest thereby claimable. The first step from Veroompauttom to Caunom [q.v.]. See vol. II, 104 [cuttacaunom].——*Nairppauttom* (നേർപ്പാട്ടം - nérppáttam, Mal.). From (nér, mal. just). A customary fixed rent on land. Is more generic than Cauna pauttom.——*Oobhayapauttom* (ഉഭയപ്പാട്ടം - ubhayappáttam, Mal.). From (ubhayam, mal. rice-field). Rent for rice fields, in South malabar only.——*Payitt pauttom* (പയറ്റുപാട്ടം - payattupáttam, Mal.). Pulse [dholl] rent. Rent levied on dry lands [poonjah] or gardens [tottam].——*Talapauttom* (തലപ്പാട്ടം - talappáttam, Mal.). The yearly rent due under Caunom tenure.——*Veroompauttom* (വെറുമ്പാട്ടം - verumpáttam, Mal.). From (verum, mal. empty). Plain rent. Simple rent which the renter gives without any further arrangement of paying money down to the jenmy. Veroompauttom lease is the simplest lease in Malabar, and on the other hand has least advantages for the tenant. It is generally so arranged as to leave only a bare subsistence to the tenant. The lease runs only for a single year, unless otherwise specified. At the end of the year the landlord is at liberty either to renew the lease or to let the land to another tenant; but he cannot under any circumstances disturb the tenant in his enjoyment until the year has expired. Where the lease is for a specified period, the tenant cannot be ejected during that period unless he endeavours to defraud the landlord or allows the rent to fall into arrears. In either of these cases however an action of ejectment will lie against the tenant. The tenant cannot transfer his tenancy without the consent of the landlord. No compensation [chamayam] is allowed for improvements, unless they were effected with the knowledge of the landlord. Next higher in the interests of the tenant in the scale of tenures above Veroompauttom is Caunom [q.v.].

PAUV (प्रोत - próta, *San.*; تانا - táná, *Hind.*; పడుగు - padugu, *Tel.*; പാവു - pávu, *Mal.*; பாவு - pávu, *Tam.*). Title from tamul. San. from (pra, san. forth + ve, san. to sew); as woven lengthwise. Tel. from (podugu, tel. length). Tam. from (pávu, tam. to spread). Warp thread [nesavoo].——*Paugal* (பாகல் - págal, Tam.). From (pávu, tam. to spread); creeper. Same as Carolah.——*Pauvauday* (பாவாடை - pávádai, Tam.). Means cloth carpet. Proper name. Common among the lower orders [pauvauday veeran, peyar].——*Pauvauday veeran* (பாவாடைவீரன் - pávádaivíran, Tam.). From (pávádai, tam. proper name + víra san. hero); probably from the cloth being spread before him when going out as mark of distinction. A deity whose image is placed in the temples [coil, pagoda] of Ancaulamman [q.v.].

PAUY (பாய் - páy, *Tam.*). To run, leap, flow.——*Pauchal* (பாய்ச்சல் - páyççal, Tam.). From (páy, tam. to flow). Irrigation; applied to the natural flow from an irrigation source as distinguished from Yiraipp, irrigation by baling and Yaittam or irrigation by picottah.——*Pautchay* (झिल्लिका - jhilliká, San.; झिल्ली - jhilli, Mahr.; صرصر - sarsar, Ar.; چرواشک - charwáshak, Pers.; جھینگر - jhíngur, Hind. and Dec.; چنگرک - chingarak, Malay; ಝಿಲ್ಲಿಕೆ - jhillike, Can.; చిమట - chimata, Tel.; മണ്ണട്ട - mannatta, Mal.; රැහියා - ráhiyá, Singh.; பாச்சை - pâççai, Tam.). Title from tamul. San. from (jhil, san. the sound made by the insect). Ar. means noisy. Hind. from sanscrit. Tel. from (chimmu, tel. to spring); from its motion. Mal. from (man, mal. ground + atta, mal. leech). Tam. from (páy, tam. to leap). Ar. also (sarrárullail), meaning night crier; (saddá), meaning noisy. Tam. also (shuvargózhi), meaning wall + fowl; (shilvandu), meaning beetle making shrill noise. Cricket. Term co-extensive with family gryllidæ, orthoptera, hemimetabola, insecta [poochy], of naturalists [jantoo].

PAVANANDY (பவணந்தி - pavanandi, *Tam.*). From (bhava, san. existence + nanda, san. joy). Author of Nunnool [q.v.], the son of Sanmaty of Shanagapooram, Jeina [q.v.] by religion. Wrote under patronage of one Gungan.

PAVETTA (काकछेदी - kákachhédí, *San.*; کنکرا - kankrá, *Hind.*; ಸೂಳೆಬೊಟ್ಟುಗಿಡ - súlebottugida, *Can.*; పావటె - pávate, *Too.*; పాపట - pápata, *Tel.*; പാവട്ട - pávatta, *Mal.*; පාවට්ටා - pávattá, *Singh.*; பாவட்டை - pávattai, *Tam.*). Title from malayalam. San. from (káka, san. crow + chhid, san. to cut). Can. from (súle, can. strumpet + bottu, can. forehead mark + gida, can. plant); from glossy leaves. Tam. from (pávu, tam. to leap + vattu, tam. ball); from bead-like fruits being used for shooting pellets by children in their pop-guns. San. also (tiryakp'hala), meaning going across + fruit; refers to shooting across by children. Can. also (pávate). Tel. also (tellapápata), meaning white + the tree; (núnepápata), meaning oil + the tree; from oily gloss of leaves. Mal. also (mallikamuti), meaning jasmine + head, alluding to white corymbs of flowers. Tam. also (karanaiççedi). Title otherwise Indian pavetta. Botanically Pavetta indica, linn., rubiaceæ [vricsham, 71]. Alias Ixora paniculata, pavetta; Pavetta alba. Generic name from malayalam. Shrub, 3–4 feet; calyx-tube ovate, limb four-toothed, teeth minute, acute; corolla hypocrateriform, lobes four or occasionally five, two to three times shorter than the tube, oval obtuse; leaves opposite, oval-oblong, acuminated, tapering at the base, petioled; corymbs terminal and from the upper axils, their primary ramifications opposite; stamens four or occasionally five; style twice the length of the corolla, glabrous; flowers white; drupe globose, crowned with the calyx, two-celled, cell one-seeded. Large, laurel-form, dark, glossy-green leaves, with white midrib; the leaves on the underside and the young shoots are either pubescent or glabrous; grows in dry jungles and about hedges; trusses of dirty-white fragrant flowers appearing in february; foliage is its principal point of beauty; the root is crooked, from 1 inch to ½ inch in diameter; the bark is grey, with a light brown papery epidermis, and seems to be the most active part; it has a sweetish aromatic taste followed by a bitterness. The root is medicinally aperient, pulverized and mixed with ginger [q.v.] and rice-water [conjee] is given in dropsy; boiled in water, a fomentation is made from the leaves for hæmorrhoid pains. The fruit is made into pickles; the leaves are used for manuring fields; handles for knives are made from the roots. Wood light-brown, hard, close-grained; timber very small. There is a Tamul proverb :—பாவட்டம் பூப்போல நரைத்தும் புத்தி இல்லை—" though as grey as a pavetta flower, he has no sense." A variety tomentosa is called Hill pavetta.——*Bramha's pavetta* (బొమ్మపాపట - bommapápata, Tel.). Same as Tirauna.

PAZHA (பழ - pazha, *Tam.*). Old [haley, pauta]. Pazhamullay is Vriddhauchellam, the old mountain; Pazhavailcaud is Poolicat, the old acacia forest.——*Palaya* (பழைய - pazhaiya, Tam.). Old [haley, pauta].——*Palayaur* (പഴയാർ - pazhayár, Mal.). From (pazhaya, mal. old + áru, mal. river). Sanscrit name (dantanadí), meaning tusk + river. When the Shiva [q.v.] temple at Sooshindram was built by Indran [q.v.], he directed his elephant [q.v.] Eirauvatam [q.v.] to cut with his tusk [dant] a river for its use. River; Travancore state, Pudmanaubhapooram division, Tovaula and Agasteeshwaram talook. Most southern river of Travancore. Rises in the secondary range of Sahyadry and derives much water from Tamrapurny, being united to it by canal. It flows south-east and south-south-east for 23 miles, passing Bhootapaundy, Cottaur and Sooshindram, and falls into sea through Manacoody estuary. Much used for cultivation. Irrigation by means of dams. Banks are low and the bed is sandy, and from twelve to thirty paces in breadth. It is shallow and unnavigable. One of its canals, the Poottanaur waters a space of seventeen miles along its borders. Length of the river is about 23 miles.——*Paul* (ಪಾಳು - pálu, Can.; പാഴ് - pázh, Mal.; பாழ் - pázh, Tam.). Waste land [beed, haul, paud].——*Payyangaudy* (പഴയങ്ങാടി - pazhayannáti, Mal.). From (pazhaya, mal. ancient + annáti, mal. bazaar). Moplah [q.v.] name of Maudye.——*Pazham* (பழம் - pazham, Tam.). See sep. title.——*Pazhamozhy* (ضرب الامثال - zarbulamsál, Hind.; பழமொழி - pazhamozhi, Tam.). From (above + mozhi, tam. word). Hind. from (zarb, ar. striking + masal, ar. expression). Proverb. The following are specimens of Tamul proverbs :—அழுகிற ஆணையும் சிரிக்கிற பெண்ணையும் நம்பக்கூடாது—" a weeping man and a " smiling woman are not to be trusted."—வேலை இல்லா ஊருக்கு ராஜா ஏன், பாம்பு இல்லா ஊருக்குக் கீரிப் பிள்ளை ஏன்—" what need is there of a king in a country " where there is no work, or of a mongoose [q.v.] where there " are no snakes [sarpam]?"—பொறுத்தார் அரசாள்வார் பொங்கினார் காடாள்வார்—" they who endure will reign as " kings, the irascible will wander through the jungles."—" சொல்லிச் செய்வார்நல்லோர், சொல்லாமற் செய்வார் பெரியோர் சொல்லியும்செய்யார் கடர்—" those who say " and do, are good; those who say not and do, are great; but " those who say and do not, are bad." The following are specimens of Hindostany proverbs :—زر زمین زن جھگڑے کی جڑ ھیں—" wealth, land, woman, are the roots of quarrel."—سچ اور جھوٹ میں چار انگل کا فرق ھی—" between truth and falsehood, the " distance is four fingers;" truth is seen, falsehood heard, and the distance between the eye and ear is four fingers.——*Pazhayacoor* (പഴയകൂറു - pazhayakúru, Mal.). From (above + kúr, mal. division). The section of Malabar syrian [q.v.] christians that remained faithful to Rome in the schism of 1657 [poottancoor].——*Pazhayanore* (പഴയന്നൂർ - pazhayannúr, Mal.). From (pazhaya, mal. ancient + úr, mal. village).—" *a* " River; Cochin state, Talapully tal. A small stream 9 miles long. Falls into Ponnany river.—" *b* " Village; Cochin state, Talapully tal.; pop. 4,529; lat. 10° 41′; long. 76° 27′; from Ernaculum N.N.E. 48 miles; from Trichore N.E. 16 miles; from Vadacancherry E.N.E. 11 miles. Has a famous temple dedicated to

Bhagavaty [q.v.], festival March-April.——*Poolicat* (پلیاگہات - paliyághát, Hind.; பழவேர்க்காடு - pazhavérkkádu, Tam. pulicat •). From (pazha, tam. old + vél, tam. babool, acacia arabica, willd. + kádu, tam. forest). Sanscrit name (pralaya-kávéri), meaning flood + the cauvery river. Greek name ποδούκη. Town, Port; Chingleput dist., Ponnairy tal.; pop. 5,392; acres 2,923; lat 13° 25′; long. 80° 23′; from Arcot N.E. 76 miles; from Ennore N. 12 miles; from Madras N. 24 miles; from Nellore S. 75 miles; from Ponnairy N.E. 10 miles; from Poody S. 29 miles; from Sydapett N.E. 28 miles. Mentioned in the Devauram [q.v.]. On Coromandel coast at southern extremity of an island in the inlet between the sea and lake of same name. The latter or backwater is connected with Madras by Cochrane's canal now Buckingham canal [q.v.]. Off the coast are the Poolicat shoals. From 1 to 2 miles off shore is the Poolicat anchorage, with 6 or 7 fathoms water. There is a lighthouse near the beach; lat. 13° 25′ 12·39″; long. 80° 22′ 06·86″; white; fixed; 14 miles range; visible from all directions seaward; masonry column, with black bands; to guide vessels clear of the Poolicat shoal; when the light bears W. ½ N., a vessel is to the northward of all dangers. The Dutch erected a factory here in 1609. This was their earliest settlement in Southern india. They built a fort and called it Geldria. In 1619 they gave the English a share in the pepper [q.v.] trade with Java and a British factory was established in 1621 by permission of the Dutch under the operation of the treaty concluded between King James I and the States-General, dated 7th July 1619. Factory withdrawn in consequence of the oppressions of the Dutch in 1622. Fort, factory and dependencies, viz., the Island of Iroocam and the villages of Avirivaukam, Canavandoray, and Vanjivaukam taken from the Dutch, 2nd July 1781. The Island of Iroocam is now attached to Nellore district. Restored to Holland in July 1785 under treaty with the States-General of 20th May 1784. Surrendered to the English on 16th July 1795. Restored to Holland on 31st March 1818 agreeably to the Convention of the allied powers in 1814. Restored to Great britain on 1st June 1825 under the treaty of March 1824. There is an old Dutch cemetery. Trade between this port and the Straits settlements, formerly considerable, has declined. Poolicat lake is about 37 miles in length by from 3 to 11 in breadth. It is under the influence of the tide. The water is constantly changed, yet brackish. The lake contains some large islands besides that on which the town is situate. The lake, throughout its whole length, forms the south-eastern limit of Nellore district. The Buckingham canal [q.v.] utilizes this lake nearly as far as Doogarauzpatam.——*Pulney* (பழனி - pazhani, Tam.). See sep. title.——*Pychee* (പഴശ്ശി - pazhashshi, Mal.). From (pazham, mal. fruit + shrí, san. prosperity). Amshom; Malabar dist., Cottayam tal.; pop. 5,724; lat. 11° 54′; long. 75° 38′; from Calicut N.N.W. 46 miles; from Tellicherry N.E. 12 miles; from the sea E. 17 miles. Seat of the Pychee rajah of Cottayam, who carried on warfare against the East india company for a long time and was finally killed in 1805, his whole estate being confiscated; small fort in ruins. See vol. I, 176; II, 143, 144.

PAZHAM (फल - p'hala, *San.*; میوہ - mewah, *Hind.*; ಹಣ್ಣು - hannu, *Can.*; పండు - pandu, *Tel.*; പഴം - pazham, *Mal.*; பழம் - pazham, *Tam.*). From (pazhu, tam. to ripen) [pazha]. Fruit in the popular, not scientific sense; and generally ripe fruit, raw fruit being coy [q.v.]. Vegetables of a superior nature are often unprocurable; under such circumstances advantage is taken of the infinite variety of fruits which Southern india supplies. Fresh or boiled fruits are often substituted for a vegetable ration; very many common fruits contain citric, tartaric, oxalic, malic or other organic acid in combination with alkalies or alkaline earths and are powerfully antiscorbutic in properties. Some are useful in the raw state, others require the addition of sugar and boiling or stewing to make them palatable. Some, as the plantain [q.v.], which contains about 27 per cent. of solid matter of equal nutritive value with rice [q.v.], are useful as proper foods. On the western coast plantains enter very largely into the dietary of the people. The green plantain is usually sliced and fried in ghee [q.v.] and salt [ooppoo] added and in this condition the plantain occupies the place of the potato [q.v.] in European dietaries. The freedom of the poorer classes of the native population of the country, under ordinary conditions, from scorbutic affections may be attributed to their constant use of acid and subacid fruits.——**(1)** The following are two key-lists of the principal edible fruits of southern india whether indigenous or introduced, taking the term as defined above; further information must be traced in the glossary paragraphs through the small type cross-references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of the plants in the dravidian languages.—"*a*" Achras sapota, sapodilla; Adansonia digitata, baobab; Ægle marmelos, bael; Alangium lamarckii, ancola; Anacardium occidentale, cashew; Ananas sativus, pine apple; Anona muricata, sour sop; Anona reticulata, bullock's heart; Anona squamosa, sweet sop; Artocarpus incisa, ratadel; Artocarpus integrifolia, bread-fruit; Artocarpus lakoocha, lakoocha; Averrhoa bilimbi, blimbing; Averrhoa carambola, coromandel gooseberry; Bauhinia vahlii, large mountain ebony; Borassus flabelliformis, palmyra; Canthium parviflorum, thorny webera; Capparis aphylla, common caper; Capparis zeylanica, ceylon caper; Carica papaya, papaw; Carissa carandas, carondah; Cephalandra indica, indian caper; Citrullus vulgaris, sweet water melon; Citrus aurantium, var. aurantium proper, sweet orange; Citrus aurantium, var. bergamia, bergamot orange; Citrus decumana, pummelow; Citrus japonica, cumquot; Citrus medica, var. acida, sour lime; Citrus medica, var. limetta, sweet lime; Citrus medica, var. limonum, lemon; Citrus medica, var. medica proper, citron; Cordia obliqua, large sebesten; Cucumis melo, common melon; Cucumis melo, var. momordica, mottled melon; Cucumis sativus, common cucumber; Cucumis trigonus, country cucumber; Cucurbita ovifera, vegetable marrow; Cucurbita pepo, common pumpkin; Cydonia vulgaris, quince; Dillenia indica, chaltah; Diospyros kaki, chinese date plum; Diospyros melanoxylon, coromandel ebony; Diospyros tomentosa, sweet gaub; Durio zibethinus, durian; Ehretia buxifolia, rough coorvitchy; Eriobotrya japonica, loquat; Eugenia aquea, red jaumoon; Eugenia jambolana, common jaumoon; Eugenia jambos, rose apple; Eugenia javanica, java jaumoon; Eugenia malaccensis, malacca jaumoon; Eugenia uniflora, barbadoes cherry; Feronia elephantum, wood apple; Ficus bengalensis, banyan; Ficus carica, european fig; Ficus racemosa, country fig; Ficus religiosa, peepul; Ficus repens, creeper fig; Flacourtia cataphracta, indian plum; Flacourtia inermis, tomi-tomi; Flacourtia montana, attack; Flacourtia ramontchi, var. sapida, ceylon plum; Flacourtia sepiaria, forest bair; Garcinia cambogia, malabar gamboge; Garcinia mangostana, mangosteen; Garcinia pedunculata, tickor; Garcinia xanthochymus, yellow mangosteen; Gardenia gummifera, decamallee; Garuga pinnata, garooga; Glycosmis pentaphylla, conjy; Grewia asiatica, falsah; Hibiscus esculentus, common bendy; Hibiscus sabdariffa, red-hemp bendy; Lagenaria vulgaris, bottle gourd; Loranthus longiflorus, gooloom; Luffa acutangula, common luffa; Luffa ægyptiaca, oil giving luffa; Lycopersicum esculentum, tomato; Maba buxifolia, neilgherry satinwood; Malpighia glabra, barbadoes cherry; Mangifera indica, mango; Memecylon edule, cassa; Mesua ferrea, nauga champak; Michelia champaca, champak; Mimusops elengi, ilanjy; Mimusops hexandra, monkey-face paulay; Mimusops kauki, edible paulay; Momordica charantia, balsam apple; Momordica dioica, balsam apple; Morus indica, indian mulberry; Musa paradisiaca, plantain; Nephelium lappaceum, rambutan; Nephelium litchi, litchy; Nephelium longana, longan; Ochrocarpus longifolius, soora poon; Olea dioica, indian olive; Olea europæa, olive; Pavetta indica, pavetta; Persea gratissima, alligator pear; Phœnix dactylifera, arabian date; Phœnix farinifera, small date; Phœnix sylvestris, wild date; Phyllanthus distichus, brazil cherry; Phyllanthus emblica, emblic myrobalan; Physalis peruviana, indian winter cherry; Pithecolobium dulce, corcapilly; Prosopis spicigera, shamee; Prunus amygdalus, almond; Prunus armeniaca, apricot; Prunus communis, bokhara plum; Prunus domestica, plum; Prunus persica, peach; Psidium guyava, guava; Psidium guyava, var. pomiferum, red guava; Psidium guyava, var. pyriferum, white guava; Punica granatum, pomegranate; Pyrus communis, pear; Pyrus malus, apple; Rhodomyrtus tomentosa, hill guava; Salvadora persica, large tooth-brush tree; Sandoricum indicum, malay red wood; Schleichera trijuga, ceylon oak; Shorea robusta, common saul; Solanum melongena, brinjaul; Solanum nigrum, indian hound's berry; Sonneratia acida, blatty; Spondias dulcis, otaheite apple; Spondias mangifera, hog plum; Sterculia balanghas, edible sterculia; Strychnos nux-vomica, poison nut; Tamarindus indica, tamarind; Terminalia citrina, citrine myrobalan; Trichosanthes anguina, common snake gourd; Trichosanthes dioica, palwal; Triphasia trifoliata, musk lime; Vitis vinifera, grape vine; Webera corymbosa, tirauna; Zizyphus jujuba, bair; Zizyphus vulgaris, sinjid.—"*b*" Alligator pear, persea; Almond, prunus; Ancola, alangium; Apple, pyrus; Apricot, prunus; Attack, flacourtia; Bael, ægle; Bair, flacourtia, zizyphus; Balsam apple, momordica; Banyan, ficus; Baobab, adansonia; Barbadoes cherry, eugenia, malpighia; Bendy, hibiscus; Blatty, sonneratia; Blimbing, averrhoa; Brazil cherry, phyllanthus; Bread fruit, artocarpus; Brinjaul, solanum; Bullock's heart, anona; Caper, capparis, cephalandra; Carondah, carissa; Cashew, anacardium; Cassa, memecylon; Chaltah, dillenia; Champak, mesua, michelia; Citron, citrus; Conjy, glycosmis; Coorvitchy, ehretia; Corcapilly, pithecolobium; Cucumber, cucumis; Cumquot, citrus; Date, phœnix; Date plum, diospyros; Decamallee, gardenia; Durian, durio; Ebony, diospyros; Falsah, grewia; Fig, ficus; Gamboge, garcinia; Garooga, garuga; Gaub, diospyros; Gooloom, loranthus; Gooseberry, averrhoa; Gourd, lagenaria; Guava, psidium, rhodomyrtus; Hog plum, spondias; Hounds' berry solanum; Ilanjy, mimusops; Jaumoon, eugenia; Lakoocha, artocarpus; Lemon, citrus; Lime, citrus; Litchy, nephelium; Longan, nephelium; Loquot, eriobotrya; Mango, mangifera; Mangosteen, garcinia; Melon, cucumis; Mountain ebony, bauhinia; Mulberry, morus; Musk lime, triphasia; Myrobalan, phyllanthus, terminalia; Oak, schleichera; Olive, olea; Orange, citrus; Otaheite apple, spondias; Palmyra, borassus; Palwal, trichosanthes; Papaw, carica; Paulay, mimusops; Peach, prunus; Pear, pyrus; Peepul, ficus; Pine apple, ananas; Plantain, musa; Plum, flacourtia, prunus; Poison nut, strychnos; Pomegranate, punica; Pummelow, citrus; Pumpkin, cucurbita; Quince, cydonia; Rambutan, nephelium; Ratadel, artocarpus; Red-wood, sandoricum; Rose

apple, eugenia; Sapodilla, achras; Satin-wood, maba; Saul, shorea; Sebesten, cordia; Shamee, prosopis; Sinjid, zizyphus; Snake gourd, trichosanthes; Soora poon, ochrocarpus; Sour sop, anona; Sweet sop, anona; Tamarind, tamarindus; Tickor, garcinia; Tiranna, webera; Tomato, lycopersicum; Tomi-tomi, flacourtia; Tooth-brush tree, salvadora; Vegetable marrow, cucurbita; Vine, vitis; Water melon, citrullus; Webera, canthium; Winter cherry, physalis; Wood apple, feronia.——(2) The following are the different kinds of fruit, scientifically distinguished, with examples.—"*a*" *Aspootam* (अस्फुट - asp'huta, San.). From (a, san. negative prefix + sp'hut, san. to burst). Achene, apocarpous, dry, indehiscent, usually one-seeded; clematis, ranunculus, rose [gool].—"*b*" *Pootam* (पुट - puta, San.). San. from (put, san. to fold). Follicle, apocarpous, dry, dehiscing by the ventral suture; star anise [q.v.].—"*c*" *Shimby* (शिम्बी - shimbí, San.; پھلی - phallí, Hind.). San. from (shi, san. to attenuate); thin cover. Legume, apocarpous, dry, dehiscing by both sutures; pea [calauyam], indigo [q.v.].—"*d*" *Ashty* (अष्ठि - asht'hi, San.; جوز - jauz, Ar.; تخم - tukhm, Pers.; گٹھلی - guthlí, Hind.). Nut, properly syncarpous, dry and indehiscent, the pericarp usually hard and bony; oak [belote].—"*e*" *Ashty palam* (अष्ठिफल - asht'hip'hala, San.). San. means nut fruit. Drupe, usually apocarpus, succulent, indehiscent, and one-seeded, with the inner layer of the pericarp stony; mango [q.v.], almond [baudam], jujube [bair].—"*f*" *Beeja palam* (बीजफल - bíjap'hala, San.; حب - habb, Ar.; دانه - dánah, Hind.). Berry, syncarpous, succulent, indehiscent, few or many-seeded; coffee [q.v.], cape gooseberry [indian winter cherry], physalis [takkauly], grape [angoor].—"*g*" *Beeja coshy* (बीजकोशी - bíjakóshí, San.; خریطه - kharítah, Ar.; بوندا - bondá, Hind.). Capsule, syncarpous, dry, dehiscent; cotton [q.v.], lily [indian water-lily], camellia [tea], rhododendron [neilgherry rhododendron], trumpet flower [pauthiry].

PEACOCK (मयूर - mayúra, *San.*) [mayil]. Prefix for variegated color. Compare:—Actiniopteris dichotoma, peacock fan; Adenanthera pavonina, peacock flower fence; Adiantum caudatum, peacock-tailed adiantum; Cæsalpinia pulcherrima, peacock flower; Chloris barbata, peacock crest grass; Michrochloa setacea, peacock grass; Poinciana regia, peacock's pride. See gloss. paragraphs.——*Peacock fish* (मयूरमत्स्य - mayúramatsya, San.; तदमास - tadamása, Mahr.; مورمچھی - mohrmaçɥhí, Hind.; மயில்மீன் - mayilmín, Tam.). Title from purple color of body and fins. San. from (mayúra, san. peacock + matsya, san. fish); beautiful fish. Mahr. means rainbow fish. Hind. from sanscrit. Tam. from (mayil, tam. peacock + mín, tam. fish). Tam. also (iyamangólá), meaning god of death + flying fish, exocætus pœcilopterus. The genus Histiophorus, xiphiidæ [macaram], acanthopterygii, teleostei, pisces [matsyam, 13], of naturalists [jantoo]. This fish is a beautiful sight in water. In calm weather, it lies sunning itself on the surface. Caught in deep water with hook and line, and when near the surface, is spread. The species best known to the natives are as follows:—"*a*" Histiophorus gladius, xiphiidæ [macaram], acanthopterygii, teleostei [matsyam, 13], of naturalists. Title otherwise Purple-finned sailor fish. Snout produced and longer than remainder of head; stomach elongated, intestines very short not exceeding length of fish; air-vessel in last third of abdominal cavity, consisting of two distinct lateral portions, each of which are sub-divided internally into numerous cavities; colors body bluish-gray, dull white underneath; dorsal fin-bright; prussian-blue with darker spots; other fins dusky; common in cold season off madras, arriving about october and continuing until march.—"*b*" Histiophorus immaculatus, xiphiidæ [macaram], acanthopterygii, teleostei [matsyam, 13], of naturalists. Lateral-line at first makes very strong curve, but becomes straight above hind extremity of pectoral fin; colors gray, dorsal and ventral blackish; sea; 5 feet 9 inches in length.

PEDDA (పెద్ద - pedda, *Tel.*). Great; elder [hey, pen, per].——*Peddacaulwa* (పెద్దకాలవ - peddakálava, Tel.). Any large channel [q.v.].——*Peddacaup* (పెద్దకాపు - peddakápu, Tel.). From (above + kápu, tel. person of that caste). Headman of a village [inam]. Sanscrit, graumadhipaty, pradhaunan; Tamul, ambalacauran, graumattaun, monigar, yejmaun; Canarese, gowda; Malayalam, adhicaury, praverticauran; Teloogoo, naidoo, pedda reddy, reddy. See vol. I, 112.——*Pedda kimedy* (పెద్దకిమిడి - peddakimedi, Tel. peddakimedi *). From (pedda, tel. large + kimedi, tel. place so called). Sanscrit name (vijayanagara), meaning victory + city. Also called Vizianagram; which distinguish from that in Vizagapatam. Zemindarry, Village; Ganjam dist., Berhampore tahsildar's range; pop. 31,853; sq. miles 592; lat. of village 19° 18′; long. 84° 30′; from Berhampore W. 22 miles; from Chetterpore W.S.W. 36 miles. The southern part of the estate is well-watered and fertile. The western portion is jungly and thinly populated. North of Parlakimedy, Soorangy and Cheekaty and south of Chinna kimedy. The rajah claims descent from the ancient kings of Orissa, being a younger branch of Parlakimedy family. For origin of estate see Kimedy. He holds the Government sunnud [q.v.], for the Pedda kimedy maliahs [q.v.] a strip of country lying between the Parlakimedy and Goomsoor maliahs, which are attached to the zemindarry [q.v.], and cover an area of 377 square miles. A fort was formerly at Vijianugger. The present residence is at Digoopoody. Contains one hundred and ninety-four villages, divided into the five Mittahs [q.v.] of Kara, Adoopauda, Gopalpore, Kara khaury and Nowpada. Peshcush Rs. 23,307. Annual revenue Rs. 1,72,000. Contains trig. stations, Bodagherry [q.v.], Dhobahdhobny [q.v.], Ryegodo [q.v.].——*Peddammavauroo* (పెద్దమ్మవారు - peddammaváru, Tel.). From (above + ammaváru, tel. small-pox goddess). Small-pox. Same as Ammay [veidyan].——*Peddanna* (పెద్దన్న - peddanna, Tel.). From (above + anna, tel. brother). Hindoo 2nd or pers. name [peyar].——*Peddapoory* (పెద్దాపురి - peddápuri, Tel.). From (above + puri, san. town). A superior sort of soft sugar [q.v.], made originally at Peddapore, near Rajahmundry.——*Peddapore* (పెద్దాపురము - peddápuramu, Tel.). See sep. title.——*Peddatally* (పెద్దతల్లి - peddatalli, Tel.). From (above + talli, tel. mother). A mother's elder sister; or the wife of a father's elder brother [bandhoo].——*Peddatandry* (పెద్దతండ్రి - peddatandri, Tel.). From (above + tandri, tel. father). A father's elder brother; or the husband of a mother's elder sister [bandhoo].——*Pettipoly* (పెట్టపోలి - pettapóli, Tel.). From (pedda, tel. great + palli, tel. village). Native name of Nizampatam adopted by British.

PEDDAPORE (పెద్దాపురము - peddápuramu, *Tel.* peddápuram *). From (pedda, tel. great + pura, san. town) [pedda].——(1) Talook, Godavery district. Tahsildar's pay Rs. 150. Area 993 square miles. Population 137,688. Language Teloogoo. E. centre of district. Bounded:—north by Vizagapatam district; south by Rajahmundry and Ramchendrapooram talooks; east by Cocanada, Pittapore, and Toony divisions; west by Rajahmundry talook. Physical aspect rocky except under the Yelair where it is alluvial. Greater part hilly and jungly. Trade consists chiefly in jaggery [q.v.], chillies [q.v.], turmeric [country saffron], tamarinds [q.v.], cotton [q.v.], gingelly [q.v.], oil seed [yennay], and soap-nuts [q.v.] of which large quantities are produced. These are carried to Cocanada both for consumption and exportation. A kind of fine silk [puttoo] cloth and turbans [puggry] are made here. Irrigated by the Yelair and channels [q.v.] branching from it, and various tanks [q.v.]. Camping ground at Juggampett. Zemindarries:—Borrampollem, Dontamore, Juggampett, Kirlampoody, Royavaram, Veeravaram. Places of archæological interest:—Gungapollem, Jaddangy, Peddapore, Tallore, Tripatty. Principal trig. station:—Yailangye. The leading places, &c., in the talook are the following.——*Gungapollem* (గంగపాలెం - gangapálem, Tel.). From (ganga, tel. ganges + pálemu, tel. fortified village). Village; lat. 17° 25′; long. 82° 05′; from Cocanada N.N.W. 35 miles; from Peddapore N.N.W. 24 miles. In the hills. Cave temple with image of Veerabhadran [q.v.]. Near it is a mantapam [q.v.] and a well. Uninhabited.——*Jaddangy* (జడ్డంగి - dzaddangi, Tel.). From (dzaddu, tel. sickness + angu, tel. beauty). Zemindarry, Village; pop. 508; lat. of village 17° 29′; long. 82° 12′; from Cocanada N.N.W. 37 miles; from Peddapore N. 28 miles. Estate, like that of Totapully, formerly held on feudal tenure from the Zemindar of Peddapore, on whose behalf it was bound to provide an armed force to assist the zemindar to repel incursions from the hills. It was not brought under the Permanent settlement like other parts of the district. In a hill west of the village is a cave containing a lingam [q.v.].——*Juggampett* (జగ్గమ్మపేట - jaggammapéta, Tel. jaggammapet *). From (jaggamma, tel. proper name + péta, tel. suburb). Zemindarry town; pop. 3,632; lat. 17° 10′; long. 82° 06′; from Cocanada N.W. 19 miles; from Peddapore N.W. 8 miles. Peshcush Rs. 33,062.——*Kilrampoody* (కిర్లంపూడి - kirlampúdi, Tel. kirlampúdi *). From (kirli, tel. wrestling + púdi, tel. village). Zemindarry, Village; pop. 3,992; lat. of village 17° 12′; long. 82° 13′; from Cocanada N.N.W. 18 miles; from Peddapore N.N.E. 9 miles. Peshcush Rs. 23,282.——*Lingampurty* (లింగంపర్తి - lingamparti, Tel.). From (linga, san. symbol of shiva + parti, tel. place). Village; pop. 2,888; acres 3,251; lat. 17° 17′; long. 82° 09′; from Cocanada N.N.W. 24 miles; from Peddapore N. 14 miles. Has got Timmarajan tank of about a square mile in extent. This irrigates seven villages. Double crop assessment.——*Peddapore* (పెద్దాపురము - peddápuramu, Tel.). See below.——*Royavaram* (రాయవరం - ráyavaram, Tel.). From (ráya, tel. king + pura, san. town). Zemindarry village; lat. 17° 10′; long. 82° 16′; from Cocanada N. 16 miles; from Peddapore N.N.E. 9 miles. Peshcush Rs. 1,998.——*Tripatty* (తిరుపతి - tirupati, Tel.). From (tiru, tam. holy + pathi, tam. village). Village; pop. 1,414; lat. 17° 09′; long. 82° 11′; from Cocanada N. 15 miles; from Peddapore N. 5 miles. Twenty inscriptions, dating from A.D. 1400 to 1644. The temple belongs to the proprietor of the Veeravaram estate.——*Veeravaram* (వీరవరము - víravaramu, Tel. viravaram *). From (víra, san. hero + pura, san. town). Sanscrit name (vírapura), meaning hero + town. Zemindarry, Village; pop. 3,095; lat. of village 17° 10′; long. 82° 11′; from Cocanada N.N.W. 16 miles; from Peddapore N. 6 miles. Peshcush Rs. 26,876.——*Yailangye* (ఏలంగాయి - élangáyi, Tel.). Trig. station; lat. 17° 03′ 23·09″; long. 82° 06′ 23·09″; height 345 feet; from Condapully N.E. 1½ miles.——*Yelair* (ఏలేరు - éléru, Tel.). See

sep. title.——*Yeleshwaram* (ఏలేశ్వరము - éléshvaramu, Tel.). See sep. title.——**(2)** Town, Talook and District moonsif's head-quarters; Godavery dist., Peddapore tal.; pop. 13,658; acres 9,595; lat. 17° 04′; long. 82° 10′; from Cocanada N.N.W. 11 miles; from Coonavaram E.S.E. 66 miles; from Ellore E.N.E. 72 miles; from Madras N.N.E. 299 miles; from Narsapore N.N.E. 53 miles; from Rajahmundry E.N.E. 25 miles. Former head-quarters of a zemindarry now dismembered. Part of the family now hold Cotaum estate. Fort of eighteen towers in a dilapidated condition. Growing in commercial importance for jaggery [q.v.] trade.

PEELA (పీల - píla, *Tel.*). Thin or narrow.——*Peelair* (పీలేరు - píléru, Tel. pílér *). From (píla, tel. thin + éru, tel. river). Sanscrit name (piñchhánadí), meaning tail + river.—"*a*" Deputy tahsildarry, Cuddapah district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station; Cuddapah dist., Voilpaud tal.; pop. 1,781; acres 1,437; lat. 13° 40′; long. 78° 59′; from Cuddapah S. 57 miles; from Madanapully E.N.E. 30 miles; from Madras W.N.W. 96 miles; from Sidhout S. 56 miles; from Voilpaud E. 21 miles.

PEEPUL (अश्वत्थ - ashvatt'ha, *San.*; पिंपळ - pimpala, *Mahr.*; پیپل - pípal, *Hind.*; دم پیپل - dumpippal, *Dec.*; ಅರಳಿ - arali, *Can.*; ಅತ್ತಸ - attasa, *Too.*; రాగిచెట్టు - rágichettu, *Tel.*; ଜରି - jari, *Oor.*; അരയാൽ - arayál, *Mal.*; බෝ - bó, *Singh.*; அரசு - arsu, *Tam.*). Title from hindostany [pau]. San. from (ashva, san. horse + st'ha, san. to stand); from the legend that badavaugny in the form of a mare resides in this tree [ashwattam]. Mahr. and Hind. from (pippala, san. the tree). Dec. from (dum, hind. tail + pippala, san. the tree). Can. from (aralu, can. to expand). Tel. from (rága, san. redness + chettu, tel. tree); from light red of tender leaves. Mal. from (arayan, mal. king + ál, mal. the banyan tree, ficus bengalensis, linn.). Tam. from (arasan, tam. king). San. also (bódhidruma), meaning knowledge tree; (chaladala), meaning having leaves in perpetual motion; (pippala), meaning protecting; (kuñjaráshana), meaning elephant's food; cf. indian olibanum; (vriksharája), meaning king of trees; (vishála), meaning broad; (shrívriksha), meaning holy tree; (gajapatra), meaning elephant's leaf; (guru), meaning heavy or adorable. Hind. also (anípípal), meaning pointed peepul, from tapering leaf. Can. also (arase), meaning king; (rangimara), meaning dyeing + tree; (rágimara); (basari). Tel. also (rávi), meaning red; (kallarávi), meaning eye + ficus religiosa, linn. Singh. also (bódhi), meaning tree of knowledge. Tam. also (náráyanam), from vishnoo's abode in it. Title otherwise Arasoo, Ashwattam, Bo tree, Holy fig, Indian aspen, Indian poplar, Poplar-leaved fig, Rauvy, Sacred fig, Vishnoo's tree, Wisdom tree. Botanically Ficus [atty] religiosa, linn., moraceæ [vricsham, 121]. Alias Urostigma religiosum. Large tree; leaves long-petioled, ovate, cordate, narrow acuminate, acumen one-third the length of the leaf, entire, or repandly undulated towards the apex; fruit-receptacles axillary, paired, sessile, depressed, size of a small cherry [q.v.], appearing in the hot season and ripening in the rainy season. Has strong resemblance in wood and foliage to poplar, especially aspen, and its leaves with their long footstalks quiver similarly; this trembling is attributed to spirits agitating each leaf. Held very sacred [poonyoshadhy]; frequently met with near pagodas [q.v.], houses and other buildings; vishnoo [q.v.] was born among the branches; siddhaurtan [q.v.] became booddha [q.v.] while seated under this tree at gayay in behar, and the identical tree is believed still to exist; the bo-tree now growing at anooraudhapoora in ceylon is said to be a branch of that at gayay. The seeds medicinally cooling and alterative; prescribed in electuary and in powder; leaves and young shoots purgative; an infusion of the bark internally in scabies; ripe fruit is laxative; a paste of powdered bark is absorbent in inflammatory swellings. Leaves and branches are good elephant [q.v.] fodder; young leaf buds and fruit eaten by men in famine times. Birds are fond of fruit, and drop the seeds in cracks of buildings, where they vegetate, occasioning great damage if not removed in time; silk-worms eat the leaves [puttoo]. Commonly planted along road-sides [shaulay]; birdlime is made from the glutinous juice from the stem, fibre [naur] from bark; leaf forms one of the ingredients in certain dyes [shauyam]. Wood white, light and very perishable, rather coarse-grained and brittle and not durable; only fit for fuel, and bad even for that; one however of the nine kinds of wood [samit] used in burnt offerings [homam].——*Flowering peepul* (பூவரசு - púvarasu, Tam.). Same as Portia.——*Hill peepul* (لتا دومر - latádumr, Hind.; కొండరావి - kondarávi, Tel.). Title from habitat. Hind. from (latá, san. creeper + udumbara, san. fig tree, ficus glomerata, miq.). Tel. from (konda, tel. hill + rávi, tel. ficus religiosa, linn.). Botanically Ficus [atty] vagans, r., moraceæ [vricsham, 121]. Shrubby, scandent, rooting to other trees; leaves long-petioled, cordate, villous beneath; fruit-receptacles axillary, paired or solitary, long peduncled, nearly globular, size of a nutmeg [jautikye].——*Wild peepul* (प्लक्ष - plaksha, San.; काडपिंपळु - kádapimpalu, Conc.; جنگلی پیپل - janglípípal, Hind. and Dec.; ಕಾಡುಅಶ್ವತ್ಥ - káduashvatt'ha, Can.; ಕಾಡುಅತ್ತಸ - kádu-attasa, Too.; കല്ലരയാൽ - kallarayál, Mal.). Title from habitat. San. from (plush, san. to burn). Conc. from (káda, conc. forest + pimpala, conc. the peepul tree). Hind. from (janglí, hind. wild + pippala, san. ficus religiosa, linn.). Can. from (kádu, can. wild + ashvatt'ha, san. the peepul tree). Too. from (kátu, too. wild + attasa, too. the peepul tree). Mal. from (kal, mal. stone + arayál, mal. peepul tree, ficus religiosa, linn.). Conc. also (kádaashvatt'hu), meaning wild peepul tree. Botanically Ficus [atty] arnottiana, miq., moraceæ [vricsham, 121]. Alias Urostigma arnottianum. Tree or shrub; leaves 3–8 inches; nerves ten to fifteen pairs, reticulations lucid, minute; petiole 2–6 inches; stipules ovate-lanceolate, ½–1 inch, caducous, reddish-brown when dried; male flowers few, near the mouth of the receptacles, sessile; sepals three, loose, inflated, broadly acuminate, much larger than the single small ovate-rotund subsessile anther; gall and female flower undistinguishable except by contents of ovary, sessile or pedicelled; perianth lax, toothed, completely investing the ovary; style elongate; stigma flat.

PEER (پیر - pír, *Pers.*). Old. A respectful address amongst Mahomedans. Taken as alam; as Peer khan, alam + alaumat [ism]. Common title for those who by miracles and an ascetic life have established a reputation for sanctity. After the death of such saints and divines, it is usual for their followers to erect a shrine over their graves [durgah] and to light them up on Thursdays [shamba]. All fakeers [q.v.] have originated from Chaurpeer or four spiritual guides, and Chowda khanwaudey or fourteen households, the following being the connection. The first peer was Hazrat moortezah ally [ally]; he invested with the caliphate or deputyship the second peer Cauja hassan basry; the latter constituted as his deputies the third peer Cauja habeeb e ajmy and the fourth peer Abd ool wauhid bin zaeede coofy. See vol. I (96). From the third peer have descended nine households. From the fourth peer have sprung five households.——**(1)** Descendants of the Chaurpeer met with in this country are as follows.—"*a*" Cawdiriya, alias Baunwah, sprung from Syed abdool cawder jeelauny [q.v.], surnamed Peer e dastgheer [q.v.]; his disciples [mooreed] assuming his name call themselves Cawdiriya; their dress is white, green, or colored with red ochre [cauvy].—"*b*" Chishtiya, followers of Cauja bunda nawauz [q.v.], the long-ringletted. These fakeers [q.v.] specially cultivate vocal music; they dress as they please.—"*c*" Shoottauriya, descendants of Shah abdoollah shoottar e nauk; their dress is similar to Cawdiriya.—"*d*" Tabacautiya or Madauriya. These are followers of Zinda shah madaur [q.v.]. They generally wear a puggry [q.v.], jauma [q.v.], doputta [q.v.], all black; also a loonghee [q.v.] and a black neck-cloth.—"*e*" Malang fakeers are descendants of Jamman juttee, a follower of Zinda shah madaur. They resemble the gosain [q.v.], and wander in deserts or on mountains and visit the shrines of reputed saints. Wherever they sit down they burn dhony or smoke fire and sometimes rub its ashes over their bodies.—"*f*" Rafayee or Goorzmaur originated from Syed ahmed cabeer; they strike the point of an iron club or goorz against their breasts or into their eyes, and strike blows at their backs with a sword.—"*g*" Jalaulya or followers of Syed jalaul ood deen bokhaury; their dress generally consists of a cloth of wool or thread of various colors on the head, a goloobund, loonghee [q.v.], or lungooty [q.v.]; in the hand they carry a sontah or club.—"*h*" Soohaugiya, descended from Moosa soohaug whose name they bear, are generally musicians.—"*i*" Nakshbundiya are followers of Cauja baha ood deen nakshbund. They carry a lighted lamp [chiraugh] in their hands, and go about at night singing religious verses; bystanders drop pice [q.v.] into their lamps; they are exorcists.——**(2)** *Peeraun* (پیران - pírán, Hind.). An assignment of land for the support of tomb of a saint [durgah].——*Peeraun e peer* (پیران پیر - piránipír, Hind.). Saint of saints; epithet of Sheikh abdool cawder [q.v.] jeelauny [q.v.].——*Peer e dustgheer* (پیر دستگیر - píridastgír, Hind.). Otherwise Abdool cawder [q.v.] jeelauny; esteemed the chief among walees and was a great performer of miracles. The disciples [mooreed] and followers of his household are very numerous. The tomb is at Bagdad. He was born 1078, died 1175. Fautihas [q.v.] are offered in his name every Mahomedan month [maheena], especially the fourth [dastgheer].——*Peermaid* (പീരുമേട് - pírumétu, Mal.). From (pír, hind. saint + métu, mal. plateau), once residence of a mahomedan saint. Plateau, Hill station; Travancore state, Cottayam division; Chungacherry tal.; lat. 9° 33′; long. 77° 01′; height 3,000 feet. Europeans resort here for health. Centre of coffee [q.v.] planting industry. Connected with low countries on Travancore and British sides by good roads [hill-station].——*Peer o moorshid* (پیرومرشد - pírwamurshid, Pers.). Saint and teacher. A respectful salutation.

PEERK (பீர்க்கு - pírkku, *Tam.*). From (pír, tam. pale green). Same as Luffa.

PEETAM (पीत - píta, *San.*). Yellow.——*Peelah* (پیلا - pílá, Hind.). Yellow. Plant first term, often joining two genera. Ex., where transl. is of second term:—Argemone mexicana (píládhatúrá), datura; Celosia cristata (pílámurghá), cock; Cochlospermum gossypium (pílíkapás), gossypium herbaceum; Euphorbia tortilis (pílísendh), euphorbia tirucalli; Michelia nilagirica (píláchampá), michelia champaca; Thalictrum foliolosum (pílíjarí), root; Thevetia nereifolia (píláganer), nerium odorum, (pílephúlkáganer), flower + nerium odorum; Wedelia

calendulacea (pílábhangrá), eclipta alba. See gloss. paragraphs. ——*Peetaumbaran* (पीताम्बर - pítámbara, San.). From (above + ambara, san. cloth). Vishnoo [q.v.].——*Peet saul* (پیتسال - pítasála, Hind.). Means yellow shorea. Same as Common vengay.

PEHIMBIA (പെഹെംബിയ - pehembiya, *Singh.*; காட்டுப்பூவரசு - káttuppúvarasu, *Tam.*). Title from singhalese. Tam. from (kádu, tam. forest + púvarasu, tam. thespesia populnea, linn.). Title otherwise Fern-leaved thespesia, Wild thespesia. Botanically Filicium decipiens, thw., burseraceæ [vricsham, 35]. Alias Pteridophyllum decipiens; Rhus decipiens. Leaves unequally pinnated; rachis interruptedly winged; wings tapering at the base, truncated at the apex; leaflets narrow-oblong, tapering at the base quite entire; panicles axillary, shorter than the leaves; branches angled, spreading horizontally; ovary ovate; styles shortly three-cleft at the apex; flowers greenish white. Very elegant fern-leaved tree, bright green compound leaves. Timber is strong and valuable. No other common species here.

PEI (ಪೈ - pai, *Can.*). Means excellence. A Concany title. Hindoo third name [peyar].

PEIDASH (پیدایش - paidáish, *Hind.*). From persian, meaning to become public. Produce.

PEIDY (పైడి - paidi, *Tel.*). Gold. Plant first term. Ex., where transl. is of second term:—Cassia sophera (paiditangédu), cassia auriculata; Ficus glomerata (paidichettu), tree; Gossypium barbadense, var. acuminatum (paidipatti), gossypium herbaceum. See gloss. paragraphs.

PEIMASH (پیمایش - paimáish, *Hind.*). From (paímúdan, pers. to measure). The survey of lands; generally applied to the old native surveys.——*Kole peimash* (കോൽപൈമാശി - kólpaimáshi, Mal.). From (kól, mal. measuring rod). Old survey in Malabar at beginning of century by actual measurement in cawnies [q.v.] and goolies [q.v.]. All other Peimashes in that district had been merely inspections without measurement. The result of the Kole peimash was embodied in what are known in the district as the Hindoovy or Mahratta accounts. It refers to wet lands alone.——*Nokpeimash* (നോക്കിപ്പൈമാശി - nókkippaimáshi, Mal.). From (nókku, mal. to see). Measurement by inspection, usual under native governments.——*Peimashy compass* (پیمایشی کمپاس - paimáyashíkampás, Hind.). Native term for Trigonometrical survey. See vol. I, 112.

PEIRA (పయర - payara, *Tel.*). Means soft. Cool zephyr wind. The crops cultivated on Coromandel coast [q.v.] under the north-east monsoon [q.v.]; same as Parvam [q.v.] in Tamul districts; sown in November and reaped in March or April.

PEN (పెను - penu, *Tel.*). Large [hey, pedda, per].——*Penjera* (పెంజెర - penjera, Tel.). From (penu, tel. large + jerri, tel. a centipede). The Daboia snake [chain viper]. The natives recognize the following; they cannot be scientifically distinguished:—Pedda penjera, large daboia; Pooly penjera, tiger daboia; Potta penjera, big-belly daboia; Racta penjera, red daboia; Tootch penjera, small daboia.——*Pennagaram* (பெண்ணாகரம் - pennágaram, Tam.). From (penu, tel. large + nagara, san. town).—"*a*" Deputy tahsildarry, Salem district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station, Subdivisional head-quarters; Salem dist., Dharmapoory tal.; pop. 2,230; acres 192; lat. 12° 08′; long. 77° 56′; from Dharmapoory S.W. 18 miles; from Madras W.S.W. 172 miles; from Namcull N.N.W. 66 miles; from Oossoor S. 42 miles; from Salem N.N.W. 37 miles; from Tripatore S.W. 52 miles; from Yercaud N.W. 33 miles. To the south-west is Ponautchy bett and on the west and north-west are Gootroyen hills and the Melagherries, while Pikkily mullay lies to the north-east. Owing to its situation in a hollow and to its proximity to the jungles, it is unhealthy; and has been for many years in a declining state. Old Shiva [q.v.] temple. The fort, now in ruins, was a border fortress a hundred years ago, and, like Palcode, is often mentioned in the history of the wars with Mysore. On the glacis is the tomb of Captain Turing, who died in 1793. Two miles south is a Vishnoo [q.v.] temple with inscription. Trade chiefly in timber, jungle produce, and grain.——*Pennair* (ಪೆಂನೊಳೆಯು - pennoleyu, Can.; పెన్నేరు - pennéru, Tel.; பெண்ணையாறு - pennaiyáru, Tam. pennér*). From (penu, tel. great + éru, tel. river). Tam. also (pennai), meaning palmyra river; name common to northern and southern rivers; this may be the real indigenous derivation of title. Compare pauny or toddy as originating paundy the kingdom and porny the river. Greek name τύνδις ποταμός. TYNNA in capitals taken as an error for ΠΥΝΝΑ. But it must be mentioned that τύνδις was formerly identified with the Kistna [q.v.]. Sanscrit name (pinákiní), meaning shiva with his bow called pinaucam; from a tradition that water was raised by a shaft from shiva's bow at the site of its source; title always Pinaukiny in Mysore. Sanscrit name also (uttarapinákiní), meaning northern pinaukiny, as distinguished from (dakshinapinákiní), the southern pennair [ponniaur]. The northern pennair rises, in lat. 13° 38′; long. 77° 43′ in the Chenna keshava hill N.W. of Nundidroog. It derives its earliest supply from a square stone tank in the centre of the ruined fort of Chundradroog. The tank overflows in the rainy season, and the redundant water, falling into a deep cleft in the rock, issues in a stream from the side of the mountain about 200 yards lower down. This source fails during the dry season. The stream flowing to the north-west for 30 miles through Colaur district then crosses the northern boundary of the territory of Mysore, and takes a northerly course for 95 miles to Ooderpidroog in Anantapore district, where it makes an abrupt turn to the east. Passing by the town of Tadpatry, it is joined by the Chitrauvaty and the two pass through the narrow gorge of Gundicote into Cuddapah district. It there passes through the talooks Jummalmadoogoo, Proddootore, Cuddapah and Sidhout. It receives at Camalaupooram the Coondair, which has its source in the mountains on the north-east; about one mile from this village, and close to Appayyapully, it is also joined by the Paupughny coming from the southward. At Audinimmoypully, 10 miles from Cuddapah, the Kurnool-Cuddapah canal is conveyed across the river by an aqueduct. The river enters Nellore district through a gorge in the Eastern ghauts [q.v.] at Somashila or Someshwaram in Atmacore talook 285 miles from its source. It flows in an irregular easterly direction through Atmacore and Nellore talooks for 70 miles, dividing the district into two unequal portions, being joined by the Boggair on its left bank at Colagotla and by the Beerapair at Sangam. It falls into the sea by several mouths at Ootcore, in lat. 14° 36′, long. 80° 13′, 15 miles, below Nellore town. Total length 355 miles. Area of drainage basin [nadee] 20,500 square miles. Principal tributaries are the Paupughny, Chitrauvaty and Cheyair on the right and Coondaur on the left. Receives its first supply during July, August and September when the south-west monsoon [q.v.] falls in the western districts. Runs mostly in October and November. In flood for about sixty days in the year. For nine months annually the bed is in most places nearly dry. During the north-east monsoon [q.v.] however the volume of water at Nellore town is 800 yards wide and 30 feet deep. The bed is sandy in the lower part of the course. Higher up it is rocky with deep pools well stocked with fish, which are swept down by the inundations to the tanks fed by the river. The stream is useless for navigation, being liable to sudden freshes, one of which carried away an important railway bridge in 1874. There is a Tamul proverb:—வெண்ணெய் உருக்கிறதற்குள்ளே பெண்ணை ஆற்றிலே தண்ணீர் வருகிறது—"ere butter can melt, freshes appear in the pennair." The water however is largely utilized for purposes of irrigation. In Colaur district in Mysore it is estimated that about 85 per cent. of the total drainage is intercepted by means of tanks [q.v.] and minor channels [q.v.]. The Kurnool canal has been constructed to connect the North pennair with the Kistna river. An anicut at Nellore erected in 1855 and repaired in 1866 has two main artificial channels to Kistnapatam and to Sarwapully in Goodoor talook. There is another and more recent irrigation anicut at Sangam, 20 miles to the west of Nellore, to irrigate lands on the northern bank of the river [aur]. Another anicut [q.v.] designed at Somashila. For accounts of Irrigation works see vol. I, 398 and 402. An arc of slightly raised ground may be observed to extend from Iskapully, having Nellore for its centre and touching the old coast line again near Goodoor; the Pennair has gradually reclaimed from the sea the whole area included within this semi-circle. Pennair beacon is a Trig. station in lat. 14° 34′ 58·24″; long. 80° 14′ 0·90″; from Moodivartypollem N.E. 6 miles; from Nellore N.E. 17 miles; from the sea W. ¼ mile. ——*Pennamurry* (పెన్నమర్రి - pennamarri, Tel.). From (penu, tel. great + marri, tel. banyan tree, ficus bengalensis, linn.). One of the old talooks of North arcot district.——*Penoo* (పెను - penu, Tel.). Great [pedda, per]. Prefix in place names; as Penoocondah, meaning great hill.——*Penoocondah* (పెనుకొండ - penukonda, Tel.). See sep. title.——*Ponniaur* (ಪೆಂನೊಳೆಯು - pennoleyu, Can.; పెన్నేరు - pennéru, Tel.; பெண்ணையாறு - pennaiyáru, Tam. ponniár*). Title meaning gold river by corruption [pon]. Can. and tel. mean large river. Tam. really from (pennai, tam. a palmyra tree + áru, tam. river). In old tamul the river is simply pennay. Sanscrit name (dakshinapinákiní), means south + pinaukiny, river of that name; also (pápaghni), meaning sin-destroyer [pennair]. Otherwise Cheyyaur or Yenautt cheyyaur meaning from yenaud or trichinopoly and tanjore. Also called Southern pennair. River; Salem and South arcot districts. Rises in Chenna keshava hill, east of Nundidroog, in lat. 13° 24′; long. 77° 44′; close to where the Northern pennair rises. Receiving the redundant water of series of tanks [q.v.] at that place, it flows circuitously, but generally south, for 55 miles, through Bangalore district to Mootanhully, where it crosses the south-eastern frontier of Mysore into the Carnatic [q.v.], through which it holds a south-easterly course of 190 miles, and falls into the Bay of Bengal, in lat. 11° 45′, long. 79° 51′ a mile north of Fort St. David. For some distance it forms the boundary between Cuddalore and Villoopooram talooks. It is sacred and its banks are studded with Shiva temples. Total length, 245 miles; area of drainage basin [nadee], 6,200 square miles. Gold [pon] is found in its sands, in its passage through the Carnatic [q.v.].

PEN (പെൺ - pen, *Mal.*; பெண் - pen, *Tam.*). Female.——*Pennaul* (பெண்ணாள் - pennál, Tam.). From (above + ál, tam. person). Laboring women of a village employed in transplanting, cutting, gathering, sifting, winnowing the crops, &c. Pennaul ary is the sheaf distributed to them as perquisite.——*Penvazhy* (പെൺവഴി - penvazhi, Mal.). From (above + vazhi, mal. way). The female line in questions of descent of rights or property [maroomakkatoyem]. Cf. Aunvazhy and Makkatoyem.

PENANG (ڤيناڠ - pinàng, *Malay*). Means areca palm. Title otherwise Prince of wales island, Pulo-penang. Island in lat. 5° 25′ N.; long. 100° 19′ E. Granted by king of Qedah to Captain Light in 1785 as marriage portion of king's daughter whom he married; but subsequently sold to the British in 1800. See vol. I, 31.——*Penang lawyer* (ڤيناڠ ليار - pinángliyar, Malay). Malay means wild areca catechu, linn. Botanically Licuala acutifida, mart., palmaceæ [vricsham, 149]. A small fan-leaved palm [taur], native of penang; stems dressed and polished give walking-sticks.——*Penang palm* (ڤيناڠ - pináng, Malay). Areca. Varieties in malay are :—(pinángbulan), moon areca; (pinángrándah), lowly areca; and (pinángwangi), fragrant areca.

PENCHALCONDAH (పెంచెలుకొండ - penchelukonda, *Tel.*). From (penutsu, tel. intertwined + konda, tel. hill); from the idol represented by two pieces of stone worked as twining round each other. Hill; Nellore dist., Raupore tal.; lat. 14° 17′; long. 79° 28′; height 3,635 feet; from Nellore W.S.W. 39 miles; from Raupore N.W. 9 miles. Over the village of Calavoy on the south bank of the Pennair. Marked by ripple marks or indentations denoting the line of an ancient sea beach. The loftiest hill in the district forming part of the Veligondas. Vishnoo [q.v.] temple in Penchalcona or the valley at the foot of the hill a little elevated. Worship celebrated every Saturday, and at the annual festival in May and June. Pilgrims come from Nellore, Cuddapah, and Kurnool. Umbrellas of paper and pith are presented at the shrine. The Candlair takes its rise here as a waterfall [aroovy]. The summit of the hill commands a view of much of the Cuddapah district. During the festival people ascend and cross over the hill to the other side as an act of devotion. Sanitarium [hill-station] for Nellore might be made here.

PENOOCONDAH (పెనుకొండ - penukonda,* *Tel.*). From (penu, tel. great + konda, tel. hill) [pen].——**(1)** Talook. Anantapore district. Tahsildar's pay Rs. 150. Area 647 square miles. Population 80,272. Language Teloogoo. S. centre of district. Boundaries :—north Dharmavaram talook, east Cadiry talook of Cuddapah, west Pauvoogada talook of Mysore, south Hindoopore talook. A hilly talook, and part quite unfit for cultivation. The principal ranges of hills are those near Penoocondah and those on the eastern frontier of the district near Bookkapatam and Vengalamcheroo. There is no black soil in the talook; mixed and gravelly soils predominate. The principal crops raised are cholum [q.v.], and horse-gram [q.v.], and on the irrigated land rice [q.v.], sugar-cane [q.v.], and to a limited extent, raggy [q.v.]. The produce is sent for sale to the markets at Hindoopore and Madaksira. Agricultural tract traversed by Hindoopore extension railway. The river Pennair flows along the western frontier of the talook, past the town of Roddam, and the Chitrauvaty goes through the east of the talook and passes close to Bookkapatam, where it is dammed up by a strong bund [q.v.] connecting two low ranges of hills so as to form the Bookkapatam tank. There are in the talook 173 tanks [q.v.], 70 river channels [q.v.], 115 spring channels [q.v.], and 2,703 wells. Seven tanks [q.v.] irrigate an area of more than 300 acres. The largest are those at Bookkapatam, Calipy, Cholmary and Roddam. Camping grounds are at Goottoor, Penoocondah. Places of archæological interest :—Bookkapatam, Calipy, Cuppalabunda, Dooddebunda, Goottoor, Moonimadoogoo, Nelacottah, Nulloor, Paumdoorty, Pedapully, Penoocondah, Roddam, Yerramunchy. Principal trig. stations :—Bommasamoodram, Mullapacondah. The leading places, &c., in the talook are the following.——*Bommasamoodram* (బొమ్మసముద్రము - bommasamudramu, Tel.). From (bommayya, tel. proper name + samudra, san. ocean). Trig. station; lat. 14° 00′ 00·00″; long. 77° 33′ 00·00″; from Anantapore S. 46 miles; from Nangalore W.S.W. 1½ miles; from Penoocondah S.W. 8 miles.——*Bookkapatam* (బుక్కపట్నము - bukkapatnamu, Tel.). See sep. title.——*Calipy* (కలిపి - kalipi, Tel.). Village; pop. 1,461; acres 5,812; lat. 13° 59; long. 77° 29′; from Anantapore S.S.W. 48 miles; from Penoocondah W.S.W. 12 miles. Contains a tank, and three temples. Two of these in ruins. On the Pennair.——*Chitrauvaty* (చిత్రావతి - chitrávati, Tel.). See sep. title.——*Cholmary* (చోళేమర్రి - chólémarri, Tel.). From (chóla, tel. the chola ruler + madi, tel. field). Village; pop. 817; acres 4,313; lat. 14° 03′; long. 77° 30′; from Anantapore S.S.W. 44 miles; from Penoocondah W.S.W. 9 miles. Contains a tank.——*Cottacheroo* (కొత్తచెరువు - kottacheruvu, Tel.). From (kotta, tel. new + cheruvu, tel. tank). Sanscrit name (anantaságara), meaning boundless ocean. Village; pop. 3,794; acres 3,754; lat. 14° 11′; long. 77° 49′; from Anantapore S.S.E. 35 miles; from Penoocondah E.N.E. 14 miles. Situated at the western end of Bookkapatam tank. Has a car festival [bookkapatam].——*Cottacote* (కొత్తకోట - kottakóta, Tel.). From (kotta, tel. new + kóta, tel. fort). Village; pop. 1,787; acres 26,739; lat. 14° 14′; long. 77° 59′; from Anantapore S.E. 37 miles; from Penoocondah E.N.E. 25 miles. Surrounded by wooded hills.——*Goottoor* (గుత్తూరు - guttúru, Tel.). From (gutta, tel. hill + úru, tel. village). Village; pop. 1,885; acres 4,877; lat. 14° 11′; long. 77° 41′; from Anantapore S. 34 miles; from Penoocondah N.N.E. 8 miles. On Hindoopore extension railway line and on Bangalore high road. Glass bangles [gauzoo] are made.——*Moonimadoogoo* (మునిమడుగు - munimadugu, Tel.). From (muni, san. sage + madugu, tel. pool). Village; pop. 1,373; acres 9,731; lat. 14° 11′; long. 77° 42′; from Anantapore S. 34 miles; from Dharmavaram S.S.W. 17 miles; from Penoocondah N. 8 miles. Has a diamond [vajram] mine not now worked.——*Mullapacondah* (మల్లప్పకొండ - mallappakonda, Tel.). From (mallappa, tel. proper name + konda, tel. hill). Trig. station; lat. 14° 15′ 05·57″; long. 77° 51′ 38·65″; height 3,092 feet; from Anantapore S.S.E. 33 miles; from Mylasamoodram E. 3 miles; from Penoocondah N.E. 20 miles.——*Nulloor* (నల్లూరు - nallúru, Tel.). From (nalla, can. good + úru, can. village). Village; pop. 669; acres 3,802; lat. 14° 03′; long. 77° 29′; from Anantapore S.S.W. 45 miles; from Penoocondah W.S.W. 10 miles. Contains a tank and a channel dug from Pennair.——*Paumdoorty* (పాముదుర్తి - pámudurti, Tel.). From (pámu, tel. snake + durti, tel. village). Village; pop. 3,396; acres 8,839; lat. 14° 16′; long. 78° 01′; from Anantapore S.E. 37 miles; from Penoocondah E.N.E. 28 miles. Fine breed of cattle [maud] in this town and some of the neighbouring villages. Ruined poligar [q.v.] fort. The poligar was deprived of office by Sir Thomas Munro. His descendant is the village headman [peddacaup].——*Pedapully* (పెదపల్లె - pedapalle, Tel.). From (peda, tel. hinder + palle, tel. village). Village; pop. 1,040; acres 8,902; lat. 14° 04′; long. 77° 49′; from Anantapore S.S.E. 43 miles; from Penoocondah E. 13 miles. Chitrauvaty enters Penoocondah talook at this place.——*Pennair* (పెన్నేరు - pennéru, Tel.). See sep. title.——*Penoocondah* (పెనుకొండ - penukonda, Tel.). See below.——*Roddam* (రొద్దము - roddamu, Tel.). See sep. title.——*Sidrampore* (సిద్దరాంపురము - siddarámpuramu, Tel.). From (siddharáma, san. proper name + pura, san. town). Village; pop. 1,892; acres 9,598; lat. 14° 17′; long. 77° 56′; from Anantapore S.E. 33 miles; from Penoocondah N.E. 24 miles. Among wooded hills.——*Talamarla* (తలమర్ల - talamarla, Tel.). From (tala, tel. head + mára, san. killing); murder village; pop. 2,043; acres 11,146; lat. 14° 12′; long. 77° 46′; from Anantapore S.S.E. 33 miles; from Penoocondah N.E. 12 miles. Tradition ascribes the name of the village to a sanyausy [q.v.], who having been officially tortured expired with a curse against the life of any official who halted there. No Hindoo official will stay in the village.——*Vengalamcheroo* (వెంగలమ్మచెరువు - vengalammacheruvu, Tel.). From (vengalamma, tel. proper name + cheruvu, tel. tank). Village; pop. 1,407; acres 11,225; lat. 14° 09′; long. 77° 54′; from Anantapore S.S.E. 39 miles; from Penoocondah E.N.E. 18 miles. Among wooded hills.——**(2)** Town, fort, mountain, divisional and talook head-quarters; Anantapore dist., Penoocondah tal.; pop. 6,363; acres 16,209; lat. 14° 05′; long. 77° 38′; from Anantapore S. 41 miles; from Bellary S.S.E. 86 miles; from Gooty S. 71 miles; from Madras W.N.W. 195 miles. On the Hindoopore extension railway. Formerly the capital of a powerful Hindoo dynasty. Numerous large wells, temples, and ruins attest its former greatness. After the defeat of the Hindoos in 1564 at Talicote [q.v.], they fled to this place from Vijianugger [q.v.], but were afterwards dispossessed by Hyder ally's dependents, who converted some of the finest temples into mosques [musjid]. The town is strongly fortified and commands the passes up to the Mysore plateau. The hill has a bungalow [q.v.] on the summit. The old palace, formerly known as the Gunga mahaul [q.v.], is used for the District moonsif's court. Outside the fort are a Mahomedan suburb and some new public cutcherries [q.v.]. A Mahomedan festival called Baba oors [q.v.] is held in March or April, at which Mahomedans from long distances attend. Good grapes [angoor] are grown in the fort. There are two Jeina [q.v.] temples in the town, in one of which worship is still performed. In a recess at the north gateway of the fort is a colossal figure of Hanooman [q.v.].

PENTA (పెంట - penta, *Tel.*). Mound. Rubbish. Suffix in place names; as Wonipenta, meaning mound in the forest.——*Pentacote* (పెంటకోట - pentakóta, Tel.). From (penta, tel. heap + kóta, san. fort). Village, Port; Vizagapatam dist., Sarwasiddhy tal.; pop. 1,737; lat. 17° 17′; long. 82° 39′; from Madras N.E. 320 miles; from Ooppauda N.E. 23 miles; from Vizagapatam S.W. 52 miles; from Wattauda S.W. 19 miles; from Yellamanchily S.S.W. 24 miles. At the mouth of a considerable stream, and at the extremity of a road to the interior. A bar closes the mouth of the river during fine season and a wide stretch of marsh and sand impedes the landing of goods. Temple built 600 years ago and an old fort. The manufacture of salt [ooppoo] has been discontinued.——*Pentapaud* (పెంటపాడు - pentapádu, Tel.). From (penta, tel. rubbish + pádu, tel. village).—"*a*" Deputy tahsildarry, Godavery district. Pay Rs. 70.—"*b*" Government agrahauram, Village, Deputy tahsildar's head-quarters; Godavery dist., Tanookoo tal.; pop. 985;

acres 1,567; lat. 16° 46′; long. 81° 33′; from Cocanada W.S.W. 48 miles; from Coonavaram S.S.E. 57 miles; from Ellore E.N.E. 27 miles; from Madras N.N.E. 264 miles; from Narsapore N.N.W. 25 miles; from Rajahmundry S.W. 23 miles; from Tanookoo W. 12 miles. Ruined temple. Large weekly fair.

PEPPER (पिप्पली - pippalí, *San.*). Title from sanscrit through arabic. San. from (prí, san. to nourish). Greek πέπερι. Botanically the Piper genus, piperaceæ [vricsham, 125]. Climbing shrubs with alternate stalked leaves. The species best known to the natives are:—betel [betel pepper], chaba [chaab pepper], cubeba [cubeb pepper], longum [long pepper], nigrum [black pepper]. Other s. indian species indigenous or naturalized are:—arborescens, argyrophyllum, attenuatum, sylvestre, trioicum, wightii.——**(1)** *Pepper nangay* (மிளகுநங்கை - milagunangai, Tam.). Same as Common nangay.——*Pepper rat* (मरीचमूषिक - maríchamúsnika, San.; ಮೆಣಸೆಲಿ - menaseli, Can.; മുളകെലി - mulakeli, Mal.; மிளகெலி - milageli, Tam.). Title from its attacks on pepper vine. San. from (**marícha**, san. pepper, piper nigrum, linn. + múshika san. **rat**). Can. from (menasu, can. pepper + ili, can. rat). Mal. from (mulaku, mal. pepper + eli, mal. rat). Tam. from (milagu, tam. pepper + eli, tam. rat). Title otherwise Long-tailed spiny mouse. Platacanthomys lasiurus, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. Is a genus distinct from ordinary rats [ely] and mice [shoondely]. These at first sight resemble dormice. General color a somewhat light rufescent brown; under fur paler. On the forehead and crown, where the hair is very full, the color is more rufescent; whiskers chiefly black; lower parts dull or subdued white. The hairs on the tail darker than the body color, infuscated, except at the tip of the tail, where they are dull white, forming a conspicuous pale tail tip. Found in the hill ranges of Western ghauts, of South malabar, and also in Cochin and Travancore. The hill-people call them the pepper-rat, from their destroying large quantities of ripe pepper. Anjely [wild jack] and jack fruit [common jack] are also subject to their ravages. Large numbers of the Caryota palm [bastard sago palm] are found in the hills, and toddy [q.v.] is collected from them; these rats or dormice often eat through the covering of the pot as suspended and get in.——**(2)** *Betel pepper* (नागवल्ली - nágavallí, San.; पानवेल - pánavéla, Mahr.; पान - pána, Conc.; تنبول - tambol, Ar. and Pers.; پان - pán, Hind. and Dec.; سرح - sirih, Malay; ವಿಳ್ಳೆದೆಲೆ - villedele, Can.; ಬಚ್ಚಿರೆ - baççire, Too.; తమలపాకు - tamalapáku, Tel.; ପାନ - pánno, Oor.; വെററില - vettila, Mal.; බුලත් - bulat, Singh.; வெற்றிலை - vettilai, Tam.). Title from malayalam through portuguese. San. from (náka, san. heaven + vallí, san. creeper); heavenly creeper, supposed to be introduced into earth by arjoonan [snake-like mountain ebony]. Mahr. from (pána, mahr. betel + véla, mahr. creeper). Conc. from (parna, san. leaf). Ar. from (támbúlí, san. the plant). Hind. like mahratta. Can. from (ville, can. betel + ele, can. leaf). Tel. from (tamalamu, tel. chewing betel nuts + áku, tel. leaf). Mal. from (verum, mal. mere + ila, mal. leaf). Tam. from (vettu, tam. bare + ilai, tam. leaf). San. also (támbúlí), meaning causing exhaustion; (bhujangavallí), meaning serpent creeper; (parna), meaning leaf; (támbúlavallí), meaning betel vine. Conc. also (p'hodipána). Hind. also (nágbel), meaning serpent creeper. Can. also (vílyadaballi), meaning betel + creeper; (eleballi), meaning leaf creeper; (vílya). Tel. also (kamméráku), meaning burning + leaf, from the taste of leaf. Greek φύλλον μαλάβαθρον [malabathrum]. Title otherwise Betel-leaf vine, Betel vine, Malabar leaf, Paan vine, Tambool, Vettilay. Botanically Piper [pepper] betel, linn., piperaceæ [vricsham, 125]. Alias Chavica betel. Chavica is properly sanscrit for chaab pepper. Shrubby, scandent, rooting, branches striated; leaves membranaceous, or the adult ones coriaceous, shining above, glabrous on both sides; the inferior ones ovate, broadly cordate, equal-sided; slightly unequally cordate, or rounded at the base, five to six-nerved; catkins peduncled; male ones long, slender, patulous or deflexed; female deflexed, shorter, long-peduncled. Similar in habit of growth to the piper nigrum, linn. [black pepper]; stems shrubby, much branched running along the ground, or climbing to a great height, throwing out roots from the joints; leaves 4 to 7 inches long, glabrous; bears no nut; cultivated. Ludovicodi varthema says:—"this betel resembles the leaves of the sour "orange [q.v.], and they are constantly eating it; when they "eat the said leaves, they eat with them a certain fruit which "is called coffolo, and the tree of the said coffolo is called arecha "[areca], and is formed like the stem of the date [kharjooram] "tree, and produces its fruit in the same manner; and they "also eat with the said leaves a certain lime made from oyster "shells [chippy], which they call cionama [choonam]." The betel vine is planted in rows, requires a moist situation and a rather rich soil; hilly places not favorable; ground prepared in south in auny [mausam] or june, on coromandel in cheitram or april and veishaukham or may, on w. coast in toolaum or october, coombham or february, maidom or april and carcatacam or july; trenches are cut and the part between two trenches is levelled and worked up; seed sown in south in auvany or august, on coromandel in cheitram or april and veishaukham or may; on w. coast the cuttings are planted in toolaum or october; coombham or february and carcatacam or july; cuttings are transplanted on the ridge prepared, in which agatty seeds have been previously sown to raise agatty [west-indian sesban] trees for the vine to creep upon; while under growth the vine spreads over the agatty plant and is irrigated with water from the trenches, weeding also proceeds; the leaves are nipped when tender, say after one year; average price in south 14 lbs. per rupee, on coromandel and w. coast 1 bundle per 6 pies, in the winter can be had at half or less; the leaves should not be plucked indiscriminately at all seasons, as this is apt to destroy the plant. Warm juice of leaves is a valuable stomachic; given with musk [custoory] in hysteria; in catarrhal and pulmonary affections, leaves warmed and smeared with oil are applied over chest, acting as rubefacient; similar for liver; in pharm., nonofficinal. Betel leaf wrapped round areca nut [q.v.] and lime [choonam] constitutes the narcotic [mookhadiraut] masticatory [charvanam] of this country; for brevity usually called betel [q.v.], consumed as largely as tobacco [pogauk]; sometimes camphor [q.v.] and other drugs are added; it acts as a carminative and antacid tonic; chewed by natives, especially after meals; presented to guests and visitors, and sometimes sent to friends and relations, especially at family festivals, inclosed in gold or silver paper or leaf. The hindostany term paun [q.v.] is familiar; and the mixed package is called paunsoopyaury [charvanam, paunsoopyaury]. The greater and lesser galangals [q.v.] are often erroneously considered to be the roots of this plant.——*Black pepper* (मरीच - marícha, San.; मिरि - miri, Mahr.; فلفل اسود - filfiliaswad, Ar.; پلپل گرد - pilpiligird, Pers.; کالی مرچ - kálímirch, Hind.; کالی مرچی - kálímirchí, Dec.; لدا - lada, Malay; ಒಳ್ಳೆಮೆಣಸು - ollemenasu, Can.; ಎಡ್ಡೆಮುಂಚಿ - eddemunchi, Too.; మిరియాలు - miriyálu, Tel.; കുരുമുളക - kurumulaku, Mal.; කළුමිරිස් - kalumiris, Singh.; மிளகு - milagu, Tam.). San. from (mri, san. to die); causing immense pain to the tip of the tongue. Mahr. from sanscrit. Ar. from (filfil, ar. pepper + aswad, ar. black). Pers. from (pilpil, pers. pepper + gird, ar. round). Hind. from (kálí, hind. black + mirch, hind. pepper). Dec. from hindostany. Can. from (olle, can. good + menasu, can. pepper). Too. from (edde, too. superior + munchi, too. pepper). Tel. from sanscrit. Mal. from (kuru, mal. seed + mulaku, mal. pepper); properly berry. Singh. from (kalu, singh. black + miris, singh. pepper). San. also (tíkshna), meaning pungent; (úshana), meaning pungent; (rúksha), meaning very pungent; (véllaja), meaning produced on the sea coast; (kólaka), meaning occurring in clusters; (krishna), meaning black; (dhármavartana), meaning produced in dharmavartanam perhaps malabar dharmapatam; (maliná), meaning black; (shyámá), meaning black [shaumay]. Pers. also (pilpilisiyáh), meaning black pepper. Hind. also (golmirch), meaning round pepper; (choka); (chokamirch); (mirch) [shrubby chilly]. Malay also (chabe); (chabai); (ladaitam); (máricha). Can. also (menasu), means pepper; (menasinakálu), meaning pepper + black. Too. also (munchi). Tel. also (savyamu); (paluk). Mal. also (mulaku). Singh. also (gammiris), meaning village + pepper. Tam. also (shevviyam), meaning the root; (milaguvalli), meaning pepper creeper; (kalinai), meaning strong. Greek πέπερι στρόγγυλον and πέπερι μέλαν. Latin piper. The greek, latin and english name is from the sanscrit for Long pepper; transferred by foreign traders to present article. Title otherwise Aromatic pepper, Miriyaul, Pepper vine, Pungent pepper, Round pepper, White pepper. Botanically Piper [pepper] nigrum, linn., piperaceæ [vricsham, 125]. Alias Piper aromaticum. Stem shrubby, climbing, rooting, round; leaves coriaceous, glabrous, pale glaucous beneath, adult ones revolute on the margins, the lower ones roundish-ovate, about equal-sided, slightly cordate or truncated at the base, seven to nine-nerved, upper ones ovate-elliptic or elliptic, usually unequal-sided, acutely acuminate, seven to five-nerved; catkins hermaphrodite or female, filiform, pendulous, shortly peduncled, shorter than the leaves; berries globose, red when ripe; floriferous calycule in the hermaphrodite, four-lobed. An epiphytal plant, climbing and clinging to rough bark trees, having heart-shaped leaves about the size of ivy leaves, very green and glossy, paler beneath; and producing flowers in spikes, followed from third to seventh year by berries like currants; they are at first green, then red, but after being gathered and dried become black; indigenous to travancore and malabar; cultivated all along malabar coast; wild among the northern circar [q.v.] hills; in malabar flowers in may and june, and the fruits become fit for gathering at the commencement of the following year. The immature fruit is globular, about $\frac{1}{5}$ of an inch in diameter, much wrinkled, and of a brown-black color, on one side are the remains of the peduncle, and on the other of the style and stigmas; the pericarp is closely adherent to the seed; the latter consists of a thin reddish-brown testa and a copious albumen, the exterior portion of which is horny and the interior farinaceous; the embryo is undeveloped. The mature seed, known as white pepper, is less acrid than black, as the pericarp has been removed, it is also rather smaller and of a grey color, striated from base to apex by about a dozen light stripes; the transverse section of a grain of black pepper exhibits a soft, yellowish epidermis covering the outer pericarp; this is formed of a closely-packed yellow layer of large, mostly radially arranged, thick-walled cells, each containing in its small cavity a mass of dark-brown resin [raul]; the middle layer of the pericarp consists of soft,

tangentially-extended parenchyme, containing an abundance of extremely small starch granules and drops of oil; the shrinking of this loose middle layer is the chief cause of the deep wrinkles on the surface of the berry; the next inner layer of the pericarp exhibits towards its circumference, tangentially arranged soft parenchyme, the cells of which possess either spiral striation or spiral fibres, but towards the interior, loose parenchyme free from starch and containing very large oil cells; the testa is formed in the first place of a row of small yellow thick-walled cells; next to them follows the true testa, as a dense, dark-brown layer of lignified cells, the individual outlines of which are undistinguishable; the albumen of the seed consists of angular, radially arranged, large celled parenchyme; most of its cells are colorless and loaded with starch; others contain a soft, yellow, amorphous mass; if thin slices are kept under glycerine for some time, these masses are lowly transformed into needle-shaped crystals of piperin. Black pepper is the berry dried on mats in the sun, with the pulp; the ash of black pepper should not exceed 5·5 per cent.; white pepper is prepared from the black by removing the dark outer layer of pericarp, by rubbing and washing, thereby making it smoother and depriving it of a part of its pungency, made whiter by chlorine; pepper contains an acrid resin [raul], volatile oil [yennay], piperin, gum [gond], malic and tartaric acids, &c.; the color being due to the volatile oil, and the pungent taste to the resin; berries of embelia ribes, burm. [byebarang], are used in adulteration; root also has a peculiar and slightly warm taste. The trees commonly planted for support are:—Areca palm, areca catechu, linn. [areca]; Moochee wood tree, erythrina indica, lam. [common coral tree]; Mango tree, mangifera indica, linn. [mango]; Jack tree, artocarpus integrifolia, willd. [common jack]; Moringa tree, moringa pterygosperma, gærtn. [moringa]. The vines which cling round the two last thrive best. Pepper was for ages the staple article of export to europe from india, and it was with it that vasco de gama loaded his ships on his first voyage; now of little importance compared to others, such as sugar [q.v.], coffee [q.v.], cotton [q.v.], and indigo [q.v.]; still it is largely exported. The pepper vine grows best on sides of narrow valleys where the soil is rich and moist, producing lofty trees by which a constant favorable coolness is maintained; the vine first runs along the ground and propagates itself by striking out root into the soil; cultivators then tie up the end of the vine lying on the ground to the nearest tree, on the bark of which the stems put out roots so far as they have been tied, the shoots above that hanging down; the plant is capable of growing to 20 feet, but for convenience is usually kept low; in places where no vines occur naturally, the plant is propagated by planting slips near the roots of the trees on which it is to climb; after it has been planted, it requires no great trouble or attention, the cultivator having little more to do than to collect the produce in the proper season; when the fruit is intended for black pepper, it is not allowed to ripen, but is collected green; that which is intended for white pepper is left to ripen thoroughly. The longer it remains after being plucked, the more valuable it becomes for medicinal purposes; an infusion of the seeds is an antidote to arsenic [paushaunam]; the juice of the leaves boiled in oil applied externally in scabies; the distilled oil has very little acrimony; a tincture made in rectified spirit is extremely hot and fiery; gives to pharm. piper nigrum, crystalline principle, piperine; stimulant, carminative, antiperiodic, externally applied rubefacient; officinal; also in british pharm.; root also is stimulant, tonic and cordial; in veterinary practice 2 drachms of pepper with 4 of common salt [ooppoo] mixed in the evening gram [q.v.], is given for horses exposed to the open air in rain or cold season. Both black and white pepper are used as well-known condiments [chutney].——*Chaab pepper* (चविका - chaviká, San.; चवक - chavaka, Mahr.; چاب - cháb, Hind.). Title from sanscrit through hindostany. San. from (chav, san. to eat). Mahr. and hind. from sanscrit. San. also (chavya), meaning fit to be eaten. Hind. also (gajphal), meaning the fruit of piper chaba. Title otherwise Chavica, Gajpal. Botanically Piper [pepper] chaba, hunter, piperaceæ [vricsham, 125]. Specific from hindostany. Alias Chavica officinarum; Piper officinarum. Chavica from sanscrit. Branches flexuous, terete, hard, finely striate when dry, pale; leaves 5–7 by $2\frac{1}{2}$–$3\frac{1}{2}$ inches, rather shining above, pale when dry, base very variable, nerves three to six pair above the three to five basal; nervules arching; petiole $\frac{1}{4}$–$\frac{1}{2}$ inch; fruiting spikes 1–2 inches long, $\frac{1}{2}$ inch diameter, broadest at the base, obtuse, forming a fleshy cone of innumerable fruits $\frac{1}{8}$ inch diameter. Native of moluccas, cultivated here. Fruit is medicinally stimulant, anticatarrhal, carminative, expectorant; in pharm. non-officinal.——*Cool pepper* (చలవమిరియాలు - tsalavamiriyálu, Tel.). Same as Cubeb pepper.——*Cubeb pepper* (सुगन्धमरीच - sugandhamarícha, San.; कबाबचिनी - kabábachiní, Mahr.; गंधमेणसु - gandhamenasu, Conc.; كبابه - kabábah, Ar.; كباب چينى - kabábchíní, Pers., Hind. and Dec.; كامو كومس - kámukus, Malay; ಬಾಲಮೆಣಸು - bálamenasu, Can.; ಗಂಧಮುಂಚಿ - gandhamunchi, Too.; చలవమిరియాలు - tsalavamiriyálu, Tel.; വാൽമുളക - válmulaku, Mal.; වල්ගම්මිරිස් - valgámiris, Singh.; வால்மிளகு - válmilagu, Tam.). Title from arabic. San. from (sugandha, san. fragrant + marícha, san. pepper, piper nigrum, linn.). Mahr. from persian. Conc. from (gandha, san. fragrant + menasu, can. pepper). Pers. from (kabába, pers. cubeb + chíní, pers. chinese) [china pepper]. Hind. from persian. Malay means like vapour. Can. from (bála, can. tail + menasu, can. pepper). Too. from (gandha, san. smelling + munchi, too. pepper). Tel. from (tsalava, tel. coolness + miriyálu, tel. pepper); from cool sensation in the mouth after eating them. Mal. from (vál, mal. tail + mulaku, mal. pepper). Singh. means creeping pepper. Tam. from (vál, tam. tail + milagu, tam. pepper). San. also (kankóla); (katukóla), meaning pungent pepper. Ar. also (habbularús), meaning bridegroom's berry. Hind. also (dumkímirchí), meaning tail pepper. Malay also (ladabárekor), meaning tailed pepper; (timukus). Can. also (gandhamenasu), meaning scented + pepper. Too. also (chínamunchi), meaning chinese pepper. Tel. also (tókamiriyálu), meaning tail + pepper, piper nigrum, linn. Mal. also (chínimulaku), meaning foreign pepper. Singh. also (válmolavú), from tamul. Tam. also (takkólam), meaning useful pepper. Greek μυρτίδανον. Title otherwise Cabob cheeny of bengal, Cabob pepper, Chinese pepper, Cool pepper, Fragrant pepper, Java pepper, Seetal cheeny of madras, Tailed pepper. Botanically Piper [pepper] cubeba, linn., piperaceæ [vricsham, 125]. Specific from arabic. Alias Cubeba officinalis. Shrubby, creeping; leaves petioled, ovate-lanceolate, scarcely triple-nerved; aments leaf-opposed, on peduncles longer than the petioles; berries pedicelled. The fruits are elevated on a kind of stalk, formed from the contraction of the base of the fruit itself, so that they are not really but only apparently stalked; the dry berries are spherical, wrinkled, of a brown color, and are easily distinguished from black pepper [q.v.] by the pedicel at their base, beneath the pericarp is a nut which contains the seed; the albumen is white and oily; as the fruit is gathered when immature, the drug usually consists of little else than the pericarp. Shrub is native of the eastern archipelago. The cubebs of the shops contain:—a volatile oil [yennay], nearly solid; resin [raul], resembling balsam copaiba; a quantity of another colored resin [raul]; a colored gummy matter. An essential oil [attar] is obtained by distillation with water. Cubebs are medicinally stimulant to the mucous membranes, particularly to that of the genito-urinary system; substituted for british copaiba, gives to pharm. cubeba, crystalline principle, cubebin, stimulant; preparation, oleum cubebæ, tinctura cubebæ; officinal; used in veterinary practice. Cubebs used as masticatory [charvanam] with betel [q.v.] leaf; a gum resin [googal] is prepared.——*Curry pepper* (ഉപ്പേരിമുളക - uppérimulaku, Mal.). Title from use. Same as Caffree chilly.——*Elephant long pepper* (गजपिप्पली - gajapippalí, San.; थोरपिंपळी - t'hórápimpalí, Mahr.; گج پپلی - gajpiplí, Hind.; هتی پپلی - hattípiplí, Dec.; ದೊಡ್ಡಹಿಪ್ಪಲಿ - doddahippali, Can.; ఏనుగపిప్పలి - énugapippali, Tel.; അത്തിത്തിപ്പലി - attittippali, Mal.; ගජතිප්පිලි - gajatippili, Singh.; ஆனைத்திப்பிலி - ánaittippili, Tam.). Title from size; cf. elephant creeper. San. from (gaja, san. elephant + pippalí, san. long pepper, piper longum, linn.). Mahr. from (t'hóra, mahr. large + pimpalí, mahr. long pepper, piper longum, linn.). Hind. from sanscrit. Dec. from (hattí, hind. elephant + piplí, hind. long pepper, piper longum, linn.). Can. from (dodda, can. large + hippali, can. long pepper). Tel. from (énuga, tel. elephant + pippali, tel. long pepper). Mal. from (atti, mal. elephant + tippali, mal. long pepper). Singh. from (gaja, san. elephant + tippili, singh. long pepper, piper longum, linn.). Tam. from (ánai, tam. elephant + tippili, tam. long pepper). San. also (vashira), meaning powerful, from pungent seeds; (karipippalí), meaning elephant long pepper; (kapivallí), meaning monkey creeper, from the hairy appearance; (kólavallí), meaning hog creeper, perhaps from bristles with which the germ is replete; (shréyasí), meaning excellent. Hind. also (barípiplí), meaning large piplee. Mal. also (ánattippali), meaning elephant or large long pepper. Singh. also (gajakaná), meaning elephant + long pepper, piper longum, linn. Tam. also (attittippili), meaning elephant + long pepper. Title otherwise Aunay tiplee, Hog creeper, Monkey creeper. Botanically Scindapsus officinalis, schott., araceæ [vricsham, 152]. Alias Pothos officinalis. Pothos from singhalese, see pothos scandens, linn. [elephant creeper]. Perennial, epiphytic, stems rooting; leaves alternate, sub-bifarious, oblong-cordate, entire, smooth on both sides; petioles sheathing, channelled; peduncles terminal, solitary, smooth, erect when in flower; spathe sub-cylindric, greenish without, pale yellow within; apex filiform; spadix sub-cylindric, equalling the spathes, pale greenish, dotted with the dark-colored stigmas; berries seeded, arillate at the base; flowering in july-august; grows in moist forests. Dried fruit is stimulant, diaphoretic and anthelmintic; in pharm. non-officinal. Other common species are:—peepla, specific from hindostany; pertusus, or indian ivy.——*Europe pepper* (പറങ്കിമുളക - parankimulaku, Mal.). Same as Common chilly.——*Foreign pepper* (കപ്പൽമുളക - kappalmulaku, Mal.). Same as Shrubby chilly.——*Forest pepper* (ಕಾಡುಮೆಣಸು - kádumenasu, Can.). Same as Toddaly.——*Ground pepper* (నేలపిప్పలి - nélapippali, Tel.). Same as Wild long pepper.——*Jamaica pepper* (كباب چينى - kabábchíní, Hind.). Same as China pepper.——*Long pepper* (पिप्पली - pippalí, San.; पिंपळी - pimpalí, Mahr.; हिप्लि - hipli, Conc.; دارفلفل - dárfilfil, Ar.;

فلفلدراز - filfilidaráz, Pers.; پپلی - piplí, Hind. and Dec.; چبی جاوز - chabaijawá, Malay; ಹಿಪ್ಪಲಿಬಳ್ಳಿ - hippaliballi, Can.; ಇಪ್ಪಲಿ - ippali, Too.; ಪಿಪ್ಪಲಿ - pippali, Tel.; തിപ്പലി - tippali, Mal.; තිප්පිලි - tippili, Singh.; திப்பிலி - tippili, Tam.). Title from form of seed. San. from (prí, san. to nourish). Mahr. and conc. from sanscrit. Ar. from (dár, ar. wood + filfil, ar. pepper, piper nigrum, linn.). Pers. from (filfil, ar. pepper + daráz, pers. long). Hind. from sanscrit. Malay meaning pepper of java. Can. from (hippili, can. long pepper + balli, can. creeper). Tel. from sanscrit. Mal. from sanscrit. Singh. from sanscrit. Tam. from sanscrit. San. also (trikaná), meaning three-grained; (krishná), meaning black; (mágadhí), meaning produced in magadham [needle jasmine]; (upakulyá), meaning growing near river; (shaundí), meaning effective; (kólá), meaning occurring in groups; (grant'hika), meaning having knot, is the root; (krishnapippalí), meaning black long pepper; (chapalá), meaning hot [cow gram]; (vaidéhí), meaning produced in videham; (kaná), meaning small; (úshaná), meaning sickening or heating. Pers. also (pípal). Hind. also (pipluján). Dec. also (piplámol), referring to root; (gajpipal), meaning elephant long pepper. Malay also (chabaichanggek). Can. also (tippili); (kuna); (yippali). Tel. also (módi). Mal. also (káttutippali), meaning wild long pepper. Tam. also (kalini), meaning strong; (shamilági), meaning digestive pepper. Greek πέπερι μακρὸν, Latin piper longum. Title otherwise Elephant pepper, Hiplee, Piplee, Tiplee. Botanically Piper [pepper] longum, linn., piperaceæ [vricsham, 125]. Alias Chavica roxburghii. Stem somewhat shrubby, the sterile ones decumbent, the floriferous ones ascending, dichotomously branched, at first slightly downy, afterwards glabrous; inferior leaves long-petioled, ovate, roundish, broadly cordate, acute or obtuse, seven-nerved; upper ones short-petioled; top ones sessile, embracing the stems, oblong, unequally cordate, five-nerved, all thick, membranaceous; petioles and nerves beneath, especially near the base, finely downy, afterwards glabrous; male catkins filiform, cylindrical, with the peduncle as long as the leaves; female ones thicker, less than half that length, about the length of the peduncle. Plant cultivated and wild in moist forests; the root is woody and perennial, stems numerous creeping, branches bearing the fruit erect; the berries are lodged in a pulpy matter; they are at first green, becoming red when ripe; dried in the sun, they change to a dark-grey color; the taste of the berries is pungent, though rather faint; contain a volatile oil [yennay] an acrid resin [raul] and piperine; met with in entire spikes about an inch long, possessing a darkish brown or gray color; the female spikes dried form the long pepper of the shops. The plant is readily propagated by cuttings; the stems are annual, but the roots live several years, and when cultivated usually yield three or four crops, after which they become exhausted and require to be renewed by fresh planting; the fruit is hottest in its immature state, and is therefore gathered whilst green and dried in the sun. The medicinal effects of long pepper are analogous to those of black pepper [q.v.] but weaker; in pharm. non-officinal; veidyans [q.v.] use it in infusion, mixed with honey [shahad]; substituted for british peppermint [poodeenah] and clove [lavangam] oils; the root and thickest part of the stems cut into small slices and dried are much consumed for medical purposes; the root possesses the virtues of the berry, but in a weaker degree. Chiefly used as a condiment [chutney].——*Monkey pepper* (मर्कटापिप्पली - markatapippalí, San.). Title from hairy leaf and spikes like long pepper. Same as Indian burr.——*Monk's pepper* (سفید سنبهالو - sufiedsambhálú, Hind.). From (sufed, hind. white + sambhálú, hind. notchy). Same as Water notchy.——*Red pepper* (ಕೆಂಪುಮೆಣಸು - kempumenasu, Can.). Title from red fruit and hot, biting taste like pepper. Same as Common chilly.——*Round pepper* (सूर्यावर्त्ता - súryávarttá, San.; سوبلی - súballí, Hind.; లింగమిరియము - lingamiriyamu, Tel.). Title from round small fruit. San. from (súrya, san. sun + ávrit, san. to turn to). Tel. from (linga, tel. round + miriyamu, tel. pepper, piper nigrum, linn.). Title otherwise Dyers' litmus, Dyers' turnsole, Folded croton. Botanically Crozophora plicata, müller, euphorbiaceæ [vricsham, 118]. Alias Croton plicatum, tinctorium. Small annual, hoary; stems and branches round, dichotomous; leaves alternate, waved, toothed, broadly cordate, tapering to a stalk; flowers small, greenish white; male ones above the females; capsules scabrous. A cloth moistened with the juice of the green capsules become blue on exposure to the open air; useful in leprosy [cooshtam], dry plant being made into a decoction [kwautam] to which is added a little mustard [rayaun]; gives a dye [shauyam]. No other common species here.——*Scented pepper* (ಗಂಧಮೆಣಸು - gandhamenasu, Can.). Title from fragrance of pepper. Same as Cubeb pepper.——*Tailed pepper* (తోకమిరియాలు - tókamiriyálu, Tel.). Same as Cubeb pepper.——*Tree pepper* (ಮರಮೆಣಸು - maramenasu, Can.). Same as China pepper.——*Water long pepper* (నీరుపిప్పలి - nírupippali, Tel.; പൊന്നത്തു - ponnattu, Mal.). Title from habitat. Tel. from (níru, tel. water + pippali, tel. long pepper, piper longum, linn.). Mal. from (ponnu, mal. to float). Title otherwise Neer piplee, Pongaty. Botanically Sphenoclea zeylanica, gærtn., campanulaceæ [vricsham, 76]. Alias Gærtnera pongati; Pongatium indicum; Rapania herbacea; Sphenoclea pongatium; Pongati, pongatium from malayalam. Annual, herbaceous, erect, branched, glabrous; leaves alternate, exstipulate, lanceolate, entire, smooth; terminal or leaf-opposed, peduncled, cylindric; bracts three or three-partite, under the flowers very small, white; common in rice [q.v.] fields, flowering nearly all the year. No other common species here.——*Water pepper* (پانی مرچ - pánímirch, Hind.). Title from habitat. Hind. from (páni, hind. water + mirch, hind. piper nigrum, linn.). Title otherwise Ciderage, Culrage, Lake-weed, Red-knees, Smart-weed. Botanically Polygonum [water gannair] flaccidum, roxb., polygonaceæ [vricsham, 110]. Everywhere scattered more or less with brown, sessile, pellucid glands; ochreæ narrow, bristly-ciliate; leaves lanceolate, acuminate, ciliolate, glabrous; spikes one to three, erect, interrupted at the base; bracts somewhat contiguous, narrow, horizontally truncated, ciliated; pedicels at length exserted, organs enclosed; achenium granular, striated, somewhat shining; in moist places; flowering in the rains.——*White pepper* (வெள்ளைமிளகு - vellaimilagu, Tam.). Special preparation of black pepper [q.v.] berries.——*Wild long pepper* (वशिर - vashira, San.; بهوئی آکرا - bhuíákrá, Hind.; تاں - tán, Dec.; ಕರೆಹಿಪ್ಪಲಿ - karehippali, Can.; బొక్కెన - bokkena, Tel.; കാട്ടുതിപ്പലി - káttutippali, Mal.; பொடுதலை - poduthalai, Tam.). Title from habitat and resemblance of fruit. San. from (vash, san. to subdue), powerful. Hind. from (bhuí, hind. ground + ákrá, hind. a kind of grass, vicia hirsuta, koch.). Can. from (kare, can. bank + hippali, can. long pepper); creeping plant and fruits resemble long pepper. Mal. from (kátu, mal. forest + tippali, mal. long pepper, piper longum, linn.). Tam. from (podugu, tam. small + talai, tam. head); from small fruits. San. also (ankóta), meaning sharp and useful plant [alanjy]. Can. also (nelahippali), meaning ground + long pepper. Tel. also (nélapippali), meaning ground + long pepper, piper longum, linn. Mal. also (ánakkozhuppu), meaning elephant's fat; (valiyaittikkanni), meaning large parasitical plant. Tam. also (talaibódam), by inversion. Title otherwise Creeping vervain. Botanically Lippia nodiflora, rich., verbenaceæ [vricsham, 102]. Alias Blairia nodiflora; Verbena capitata, nodiflora; Zapania nodiflora. Annual, creeping; stem roughish, with adpressed biacuminate hairs, herbaceous, filiform, ramous, procumbent, rooting at the joints; leaves cuneate-spathulate, entire at the base, above rounded, obtuse or sub-acute, equally and sharply serrated, obsoletely veined, flat; peduncles axillary, solitary, filiform, exserted; capitula ovoid and at length cylindrical; calyx two-parted, slightly bicarinate; carinæ puberulous; flowers small, white. Is a native of southern italy and sicily, as well as india. Tender stalks and leaves toasted, are in infusion a bitter tonic. No other common species here.

PER (పెద్ద - pedda, *Tel.*; പെരു - peru, *Mal.*; பெரு - peru, *Tam.*). Great [hey, pedda, pen]. Prefix in place names; as Pernugger meaning great town. In each of the languages, plant first term, often joining two genera. Ex., where transl. is of second term:—Agave vivipara (peddakalabanda), aloe indica; Ailanthus excelsa (peyyápa), hardwickia binata; Albizzia procera (peddapaççeru), dalbergia paniculata; Amomum subulatum (peddaélaki), elettaria cardamomum; Andrographis affinis (peddavému), melia azadirachta; Barleria cristata (peddagóranta), lawsonia alba; Celastrus paniculatus (peddachinta), tamarindus indica; Cleome viscosa (peddavámints), gynandropsis pentaphylla; Cordia obliqua (periyamari), indigofera tinctoria; Fœniculum vulgare (peddajílakarra), cuminum cyminum; Fourcroya gigantea (perundázhai), pandanus odoratissimus; Gomphrena globosa (peddagóranta), lawsonia alba; Lawsonia alba (peddapattsagóranta), barleria prionitis; Leucæna glauca (periyatagarai), cassia tora; Limnanthemum indicum (perunákáshatámara), pistia stratiotes; Melanthesopsis patens (perunírúri), phyllanthus niruri, var. genuinus; Miliusa velutina (peddachilakaduddaga), polyalthia suberosa; Pedalium murex (peddapalléru), tribulus terrestris; Peucedanum graveolens (peddasadápa), ruta graveolens, var. angustifolia; Phragmites roxburghii (peddarellu), saccharum spontaneum; Pimpinella anisum (peruñjíragam), cuminum cyminum; Plumeria acutifolia (perungalli), euphorbia tirucalli; Saccopetalum tomentosum (peddachilakaduddaga), polyalthia suberosa; Salvadora oleoides (peddavaragógu), toddalia aculeata; Salvadora persica (perinkláva), varagógu), toddalia aculeata; Securinega leucopyrus (peddakanda), memecylon edule, var. typica; Tacca pinnatifida (peddakanda), amorphophallus campanulatus; (periyagarunai), dracontium polyphyllum; Tragia involucrata (peddadúlagondi), mucuna pruriens; Zizyphus jujuba (perintutali), scutia indica. See gloss. paragraphs.——*Paranginaud* (ಪರಂಗಿನಾಡು - paranginádu, can. Can.). From (pér, can. great + ranga, can. vishnu + nádu, can. tract); from the god rungasawmy worshipped by the badagas [q.v.], and his temple located on the peak of that name within the arrondissement. Division, Neilgherries; area 138 square miles; pop. 18,116, exclusive of Coonoor and Wellington. Eastern division of the plateau. Contains settlement of Coonoor and Kotagherry and military depôt of Wellington. Separated from Todanaud on the west by the Moodcaud stream and Orange valley and the north-east spur of Dodabetta range. On the west and south it is divided from Merkoonaud by the southern spur of the same range and the Kartairy river.——*Peermund* (ಪೆರಮಂಡು - péramandu, Can.). From (per, can. large + mandu, can. a fold). Village; Neilgherry dist., Coondah division; acres 4; lat. 11° 13′; long. 76° 37′; from Ootacamund S.S.W. 15 miles.

private bungalow [q.v.] here.——*Perambalore* (பெரம்பலூர் - perambalúr, Tam.). See sep. title.——*Peraroolaulan* (பேரருளாளன் - pérarulálan, Tam.). From (above + arul, tam. mercy + álan, tam. one who commands). The most gracious god; Vigneshwaran [q.v.].——*Peraul* (പേരാൽ - perál, Mal.). From (above + ál, mal. the banyan). A banyan [q.v.] tree.——*Pergadey* (ಪೆರ್ಗಡೆ - pergade, Can.). Means chief [heggadey]. Title to Bunts. Hindoo third name [peyar].——*Perimpadapp* (പെരിമ്പടപ്പ് - perimpatappu, Mal.). From (peru, mal. large + patappu, mal. population). Ancient name of Cochin province. A title of the Zamorin [q.v.], Cochin dynasty [raj].——*Perincaura* (പെരിങ്കാര - perinkára, Mal.). Means large cauray [q.v.]. Same as Roodrauck.——*Perindalman* (പെരിന്തൽമണ്ണ - perintalmannu, Mal.). From (peru, mal. large + talam, mal. flat + man, mal. earth). Town, Talook head-quarters, Moonsif's station, Sub-jail, Sub-registrar's office; Malabar dist., Valavanaud tal.; pop. 6,502; acres 1,253; lat. 10° 58′; long. 76° 17′; from Calicut E.S.E. 37 miles; from Cannanore S.E. 84 miles; from Madras W.S.W. 312 miles; from Malapooram E.S.E. 14 miles; from Manantoddy S.S.E. 59 miles; from Palghaut W.N.W. 31 miles; from Ponnany E.N.E. 24 miles; from Tellicherry S.E. 73 miles. Chiefly Moplah [q.v.]. Six miles off is Mungada, seat of Valavanaud rajah [q.v.], who enjoys a Malikhana [q.v.] of Rs. 13,400 from Government. Weekly market; moosaufer khana [q.v.]; travellers' bungalow [q.v.].——*Peringollan* (പെരിങ്കൊല്ലൻ - perinkollan, obl.; പെരിങ്കൊല്ലൻ - perinkollan, pers. sing.; പെരിങ്കൊല്ലർ - perinkollar, pers. pl., Mal.). From (above + kollan, mal. blacksmith). Caste-title. Blacksmith [jauty].——*Periya* (പെരിയ - periya, Mal.; பெரிய - periya, Tam.). Great.——*Periyacoolam* (பெரியகுளம் - periyakulam, Tam.). See sep. title.——*Periyammah* (பெரியம்மா - periyammá, Tam.). Means great goddess.——*Periyasawmy* (பெரியசாமி - periyasámi, Tam.). From (above + svámí, san. lord). Hindoo 2nd or pers. name [peyar].——*Periya tirvady* (பெரியதிருவடி - periyathiruvadi, Tam.). From (above + tiru, tam. sacred + adi, tam. foot). Hanooman [q.v.].——*Periyaun* (பெரியான் - periyán, Tam.). Pariah proper name. Feminine form is Periyaul [peyar].——*Periyaur* (പെരിയാറ് - periyáru, Mal.). From (periya, mal. large + áru, mal. river). Sanskrit name (brihannada), meaning same. Greek ψευδόστομος ποταμός. River; Travancore state, Cottayam division, Todoopoya, Mooatpoya, Coonnat naud, Aulangaud and Paravore talooks. Largest river in Travancore. Rises in the highest parts of Sahyaparvatam or the Western ghauts [q.v.] in lat. 9° 24′ N. and long. 77° 22′ E. in Todoopoya talook. Flows through Todoopoya, Coonnatnaud and through some parts of Paravore. It forms many small cascades in its earlier course, and when it has descended from the higher hills also it hurls itself over several falls of some size. Many large and beautiful islands are also formed in its winding course. After it has reached the plain country, it is called the Alwye. On reaching Alwye, it separates into two branches. The northern proceeds to Paliport. The southern branch after leaving Veerapoly again separates into two streams; one of these is speedily lost in the estuary to which it flows through numerous channels; the other continuing in a southerly direction, falls into the lake south of Tripoontora in lat. 9° 55′; long. 76° 24′. At Alwye the river passes over a bed of mica [abruck] which makes the waters peculiarly healthy. Its mouth, called by seamen Cranganore or Ayicottah river, flows between the south-west boundary of the territory of Cochin and north-west boundary of Travancore. Length 142 miles, only 60 of which are navigable. The principal tributaries are the Minla, Sherdhonay, Peringacootay, Moodrapully, Candanapara, Yedamulla. With the exception of the last 35 miles of its course the river passes through a complete wild, the populated tracts not extending beyond the town of Mullyattore. Sugar-cane [q.v.] plantations on both banks. It is not materially beneficial in irrigating the country on its borders. Much teak wood [teak], floated down to the coast. A work known as the Periyaur project is in hand for diverting the course of this stream from west to east, viz., across the water-shed of the ghauts [q.v.] into the Veigay river, in Madura district. See vol. I, 408.——*Permacoil* (பெருமுக்கல் - perumukkal, Tam.). Meaning great triad of rocks. Also taken from (peru, tam. great + mukkal, tam. travail); great travail, where seetay bore twins. Sanskrit name (válmíkyáshrama), means valmeeky the sage + hermitage. Hill, Place of pilgrimage; South arcot dist., Tindivanam tal.; pop. 2,117; acres 1639; lat. 12° 12′; long. 79° 47′; from Cuddalore N.N.W. 32 miles; from Tindivanam E.S.E. 6 miles; from the sea W. 15 miles. Small fort on a rocky hill. The summit is 400 by 200 yards in extent, and the ascent on all sides is difficult. Strongly fortified during eighteenth century. In 1761, captured by Sir Eyre Coote; in 1780 besieged unsuccessfully by Hyder ally; captured by Hyder in 1782; regained by the British in 1783. It was then dismantled, but remained a post of observation till 1790, when it was taken by Tippoo sultan. A few ruins indicate the position of the fortifications. There are two other villages ending with Mookkal very near to this village, viz., Palamookkal and Nalmookkal. It is said that Seetay, wife of Rama, travailed in all these three villages and finally bore twins in this village. Trig. station in. lat. 12° 11′ 54·14″; long. 79° 46′ 40·50″; height 437 feet; from Permacoil S. ¼ mile; from Tindivanam E.S.E. 6 miles; from the sea W. 15 miles.——*Permaul* (പെരുമാൾ - perumál, Mal.; பெருமாள் - perumál, Tam.). From (above + ál, mal. man), great man. Chief, especially of the old Dravidian dynasties [raj]. Used on W. coast for a viceroy from Cheram [q.v.]. But it is mentioned in the Keraloputty [q.v.] that there were two other Permauls besides the Chera permaul; viz., Chola permaul of Chola mundalam, and Paundy or Coolashekhara permaul of Paundy mundalam [q.v.]. Veishnava title. Hindoo proper name. Suffix in proper names, as Numbermaul, Teppermaul, Varauhapermaul [peyar].——*Permaul tirnaul* (பெருமாள் திருநாள் - perumáldirunál, Tam.). Means vishnoo's sacred day. Same as Vishnoo deepam.——*Perook* (பெருக்கு - perukku, Tam.). From (perugu, tam. to everflow). Flood [vellam]. Also multiplication in arithmetic [ganitam]. Perkkaulan, ruler of flood is a man of the vellaula [q.v.] caste [jauty]. For Audy perook or Pathinettaum perook see Pathinettaum perook.——*Peroom* (പെരും - perum, Mal.; பெரும் - perum, Tam.). Great. Prefix in place names; as Peroombaid, meaning great village. Peroongaut tariss is land left waste for upwards of fifteen years.——*Peroomay* (பெருமை - perumai, Tam.). Greatness. A favorite theme with the tamul moralists. See the following specimens from the Cooral:—பணியுமா மென்றும் பெருமை சிறுமையணியுமாந் தன்னை வியந்து—"the great will always "humble himself; but the mean will exalt himself in self-"admiration." பெருமை பெருமித மின்மை சிறுமை பெருமித மூர்ந்து விடல்—"freedom from conceit is great-"ness, obstinacy therein is meanness."—அற்ற மறைக்கும் பெருமை சிறுமைதான் குற்றமே கூறி விடும்—"the "great hide the faults of others; the base only divulge them."—பெருமைக்கு மேனைச் சிறுமைக்குந் தத்தங் கருமமே கட்டளைக் கல்—"a man's deeds are the touch-stone of his "greatness and littleness."—ஒழுக்கத்தி னெய்துவர் மேன்மை யிழுக்கத்தி னெய்துவ ரெய்தாப் பழி—"from "propriety of conduct men obtain greatness; from impropriety "comes insufferable disgrace."—நிறையுடைமை நீங்காமை வேண்டிற் பொறையுடைமை போற்றி யொழுகப்படும்—"if you desire that greatness should never leave you preserve "in your conduct the exercise of patience."—அழுக்கற் றகன்றாரு மில்லை யஃதில்லார் பெருக்கத்திற் றீர்ந்தாரு மில்—"never have the envious become great; never have those "who are free from it been without greatness."—வெள்ளத் தனைய மலர்நீட்ட மாந்தர்தம் முள்ளத் தனைய துயர்வு—"the stalks of water-flowers are proportionate to the depth of "water; so is men's greatness proportionate to their minds."—இலக்க முடம்பிடும்பைக் கென்று கலக்கத்தைக் கையாறாக் கொள்ளாதா மேல்—"the great will not regard trouble "as trouble, knowing that the body is but the butt of trouble."——*Peroondoray* (பெருந்துறை - perundurai,* Tam.). From (perum, tam. large + turai, tam. ford).—"*a*" Deputy tahsildarry, Coimbatore district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's and Sub-registrar's station, Railway station; Coimbatore dist., Erode tal.; pop. 6,404; acres 10,878; lat. 11° 17′; long. 77° 38′; height 853 feet; from Coimbatore E.N.E. 46 miles; from Erode W.S.W. 11 miles; from Madras S.W. 224 miles; from Ootacamund E. 59 miles; from Pollachy N.E. 58 miles; from Suttimungalam S.E. 28 miles. Railway station is 4 miles distant. Originally talook head-quarters. Old Vishnoo temple. Market.——*Peroor* (பேரூர் - pérúr, Tam. perúr*). From (pér, tam. large + úr, tam. village). Tam. also (mérççithambaram), meaning west chidambaram. Sanskrit name (ádipurí), meaning ancient + town. Village, Place of pilgrimage; Coimbatore dist., Coimbatore tal.; pop. 484; acres 1,602; lat. 10° 59′; long. 76° 57′; from Coimbatore W.S.W. 3 miles. On the Noyil. One of the seven Congoo [q.v.] shivaulyams. Richly carved temple about 200 years old, built round a small but far older shrine dating from days of Cholas [q.v.]. Dhwaja stambham [q.v.] outside temple is a fine monolith [laut]. The temple is one of the few that Tippoo respected both in its buildings and lands. In the vicinity of the temple, and in the streets, and by the roadsides are stone figures, &c., some evidently of great age. There are several veeraculls [q.v.], the sculpture of which resembles that on sculptured dolmens [coday cull] on the Neilgherries. Salt [ooppoo] and saltpetre [shorah] are produced by lixiviation.——*Peroovazhy* (பெருவழி - peruvazhi, Tam.). From (peru, tam. great + vazhi, tam. way). Tam. also (vazhuthikkál), meaning paundyan king + way. Ancient name for Atchancoil pass from Tinnevelly to Travancore, western boundary of Paundies [q.v.] at one time. In later times less frequented, and the principal pass now is at Aryancauv [ghaut]. See vol. I (119).——*Peroovely* (பெருவெளி - peruveli, Tam.). Means the great open plain. In philosophy applied to the ethereal expanse as the abode of the supreme deity. The sphere of pure intelligence in adweitam [q.v.]; also the all-pervading spirit or intelligence itself [bramh, parabramh].——*Perraus*

(పెర్రాజు - perrádzu, Tel.). From (above + rádzu, tel. king). Hindoo 2nd or pers. name [peyar].——*Perr neer* (பெருநீர் - perunír, Tam.). From (perugu, tam. to overflow + nír, tam. water). Water allowed to flow without limitation during the rainy season [caur].——*Pragada* (ప్రగడ - pragada, Tel.). From (peru, tel. chief + kada, tel. person). Prime minister [muntry, pradhauny, peshwah, vizier].

PERAMBALORE (பெரம்பலூர் - perambalúr, * *Tam.*). From (peru, tam. great + puli, tam. tiger + úr, tam. village) [per]. Sanscrit name (brihadvyághrapura), meaning great + tiger + town; cf. cooroombalore below.——**(1)** Talook, Trichinopoly district. Tahsildar's pay Rs. 175. Area 674 square miles. Greatest length from N. to S. 42 miles; greatest breadth W. to E. 21 miles. Centre of district. Bounded N. by Vellaur which separates it from Salem and South arcot districts; E. by Oodayarpolliem talook; S. by Trichinopoly talook; and W. by Moosiry talook. Twenty-two villages of Ariyalore zemindarry are in the talook. Population 195,006. Language Tamul. The general aspect is flat, the north-western portion being more rugged and hilly than the rest. The only important hills are the Putchamullays, which separate it from Moosiry and run for a short distance into the talook. From the Putchamullays along the banks of the Vellaur and stretching up as far as the Oodayarpolliem talook, there is a continued plain of black cotton [regar] soil, in which there are large tracts of stiff black clay [calimunn]. In the southern portion bordering on Trichinopoly, the country is rocky and the soil generally poor. Perambalore is one of the Candaurambam [q.v.], or upland talooks, and possesses little irrigated land. Varagoo [q.v.], raggy [q.v.], cumboo [bajrah], and cotton [q.v.] are cultivated. Indigo [q.v.], carpets [cumbly, jamkhana] and cotton [q.v.], are the only industries. Two affluents of the Vellaur irrigate a small portion. The most important tanks [q.v.] are Aroombavore, Attiyore and Ogalore. There is a camping ground at Tooramungalam on the trunk road to Madras. Places of archæological interest:—Aroombavore, Audootoray, Calookkanuttom, Ootatoor, Perambalore, Periyammapolliem, Ranjengoody, Venganore, Vengoolam, Volcondapooram. The leading places, &c., in the talook are the following.——*Aroombavore* (அரும்பாவூர் - arumbávúr, Tam.). From (arumai, tam. excellence + pávu, tam. yarn + úr, tam. village). Greek ἀρεμβούρ. Village; pop. 3,869; acres 4,318; lat. 11° 23′; long. 78° 48′; from Perambalore N.W. 14 miles; from Trichinopoly N. 39 miles. Temple and inscriptions of the Vijianugger and Madura naick [q.v.] dynasties [raj].——*Audootoray* (ஆடுதுறை-áduthurai, Tam.). From (ádu, tam. sheep + turai, tam. ford). Village; pop 1,226; acres 155; lat. 11° 24′; long. 79° 07′; from Perambalore N.E. 17 miles; from Trichinopoly N.N.E. 47 miles. Old Shiva temple with inscriptions of Chola [q.v.] and Vijianugger [q.v.] dynasties [raj].——*Cooroombalore* (குரும்பலூர் - kurumbalúr, Tam.). From (kuru, tam. small + puli, tam. tiger + úr, tam. village). Sanscrit name (kharavavyághrapura), meaning small + tiger + town; cf. perambalore at head. Village; pop. 5,767; acres 7,406; lat. 11° 14′; long. 78° 52′; from Perambalore W. 4 miles; from Trichinopoly N.N.E. 30 miles. Gave its name to a talook abolished in 1817-18. Brass [pittalay] and zinc [tootnaug] ware made in adjacent village of Polliem.——*Maroothiyaur* (மருதையார் - maruthaiyár, Tam.). See sep. title.——*Ootatoor* (ஊட்டத்தூர் - úttattúr, Tam.). See sep. title.——*Perambalore* (பெரம்பலூர் - perambalúr, Tam.). See below.——*Putchamullay* (பச்சைமலை - paççaimalai, Tam.). See sep. title.——*Ranjengoody* (இரஞ்சங்குடி - irañjangudi, Tam.). From (irañjan, tam. proper name + kudi, tam. agricultural village). Village, Hill; pop. 1,331; lat. 11° 21′; long. 79° 00′; from Perambalore N.E. 10 miles; from Trichinopoly N.N.E. 40 miles. Ruins of a fort on a low rocky hill. Belonged to the Carnatic [q.v.] family. Shiva temple once existed. Centre of cattle [maud] breeding.——*Vellaur* (வெள்ளாறு - vellâru, Tam.). See sep. title.——*Volcondapooram* (வாலிகண்டப்புரம் - váligandappuram, Tam.). See sep. title.——**(2)** Town, Talook head-quarters; Trichinopoly dist., Perambalore tal.; pop. 3,714; acres 3,584; lat. 11° 14′; long. 78° 56′; from Ariyalore W.N.W. 16 miles; from Madras S.W. 160 miles; from Moosiry N.E. 35 miles; from Shreerungam N.N.E. 28 miles; from Trichinopoly N.N.E. 31 miles. Almost in centre of talook, on trunk road to Madras. Old Shiva temple.

PERGUNNAH (پرگنہ - parganah, *Hind.*). From persian. N. indian sub-division of a zillah [q.v.] answering to the S. indian talook [q.v.].

PERIYACOOLAM (பெரியகுளம் - periyagulam, *Tam.* periyakulam *). From (periya, tam. large + kulam, tam. tank) [per]. Sanscrit name (champakavana), meaning champak tree, michelia champaca, linn. + forest. Known as Pundry naud, one of the thirteen Codoon tamul nauds of Paundyan [q.v.] kingdom in the Madura stala pooraunam [q.v.], and Chatoor acarauthy [q.v.], &c.——**(1)** Talook, Madura district, Tahsildar's pay Rs. 150. Area 1,628 square miles. Population 263,253. Language Tamul. W. of district. Bounded on the north Pulney hills, east Dindigul and Tirmungalam talooks, south Travancore hills, west Travancore and Pulney hills. A valley surrounded by hills. Soil mostly red loam. Rough cumblies [q.v.] are woven in five or six villages. Chiefly agriculture. Tanks [q.v.] and channels [q.v.] are fed by Munjalaur, Shoorooly, Tainiyaur, Varauhanuddy, and Veigay rivers, and a very few rain-fed tanks. Camping grounds on road side near Periyacoolam, Allinagaram, Veerpaundy, Oottamapolliem, and Cumbum villages. Places of archæological interest:—Chinnammanore, Coollapooram, Cumbum, Devadaunaputty, Goodalore, Hanoomantaputty, Marcayancottay, Oottamapolliem, Tencaray, Vadacaray, Veerpaundy. The leading places, &c., in the talook are the following.——*Allinagaram* (அல்லிநகரம் - allinagaram, Tam.). From (alli, tam. the lily, nymphæa lotus, linn. + nagara, san. city). Village; pop. 4,926; acres 9,960; lat. 10° 02′; long 77° 31′; from Madura W. 44 miles; from Periyacoolam S.S.W. 8 miles. Anicut [q.v.] across the Tainy river [tainiyaur].——*Andiputty* (ஆண்டிப்பட்டி - ándippatti, Tam.). See sep. title.——*Bodinaickanore* (போடிநாயக்கனூர் - pódináyakkanúr. Tam.). See sep. title.——*Chinnammanore* (சின்னம்மனூர் - shinnammanúr, Tam. chinnammanúr *). From (shinna, tam. small + amman, tam. goddess + úr, tam. village). Village; pop. 6,107; acres 4,179; lat. 9° 51′; long. 77° 26′; from Dindigul S.W. 53 miles; from Kodaykarnal S.S.W. 28 miles; from Madras S.W. 294 miles; from Madura W. 50 miles; from Periyacoolam S.S.W. 22 miles; from Rameshwaram W.N.W. 134 miles; from Ramnaud W.N.W. 102 miles. Ruined Vishnoo temple and ancient Shiva temple with inscriptions. Anicut [q.v.] across the Shoorooly.——*Combay* (கொம்பை - kómbai, Tam.). Means tender cocoanut [q.v.] in shell. Village; pop. 5,692; acres 10,962; lat. 9° 51′; long. 77° 21′; from Madura W.S.W. 57 miles; from Periyacoolam S.W. 25 miles. Residence of an ex-zemindar receiving Malikhana [q.v.] allowance. Originally one of the seventy-two polliems of Madura. Noted for its breed of dogs [nye, poligar].——*Cottay peak* (கோட்டை - kóttai, Tam.). See sep. title.——*Cumbum* (கம்பம் - kambam, Tam.). Means pillar. Village, Valley; pop. 3,941; acres 6,091; lat. 9° 45′; long. 77° 20′; from Madura W. 59 miles; from Periyacoolam S.S.W. 31 miles. Old Shiva temple with Malayalam inscriptions. Ancient Vishnoo temple. Fort was stormed by Vishwanauta naick, first of the Naick [q.v.] dynasty [raj], in sixteenth century. The valley is a fertile tract between the Travancore hills and the Pulneys, watered by a feeder of the Veigay. The pleasantest part of the district next to the Pulneys. Cool winds sweep down it from the direction of the Malabar coast and it is well wooded and watered [hill-station].——*Devadaunaputty* (தேவதானப்பட்டி - tévathánappatti, Tam.). From (déva, san. deity + dána, san. gift + patti, tam. village). Village; pop. 6,389; acres 8,579; lat. 10° 09′; long. 77° 41′; from Madura N.W. 35 miles; from Periyacoolam E.N.E. 7 miles. Polliem [q.v.] resumed by Hyder ally in eighteenth century. Now a Government village. Ruined fort. A temple called Caumautchy amman coil [q.v.]; inner door never opened. Festival in March.——*Goodalore* (கூடலூர் - kúdalúr, Tam.). From (kúdal, tam. junction + úr, tam. village); on the travancore frontier. Village; Mail goodalore, pop. 3,432; Keel goodalore, 2,966; total 6,398; acres total 20,807; lat. 9° 41′; long. 77° 17′; from Madura W.S.W. 62 miles; from Periyacoolam S.S.W. 36 miles. At the extreme south-western corner of the district, near Travancore territory. Old Shiva temple with several inscriptions.——*Guntamanaickanore* (கண்டமநாயக்கனூர் - kandamanáyakkanúr, Tam.). See sep. title.——*Munjalaur* (மஞ்சளாறு - mañjaláru, Tam.). See sep. title.——*Ooppaurputty* (உப்பாரப்பட்டி - uppárappatti, Tam.). From (uppára, can. salt maker + patti, tam. village). Village; pop. 1,206; acres 2,283; lat. 9° 57′; long. 77° 28′; from Madura W. 48 miles; from Periyacoolam S.S.W. 15 miles. Anicut [q.v.] across the Shoorooly.——*Oottamapolliem* (உத்தமபாளையம் - uttamappálaiyam, Tam.). See sep. title.——*Oottamapooram* (உத்தமப்புரம் - uttamappuram, Tam.). From (uttama, san. best, epithet of a pándiyan + pura, san. town). Town; pop. 4,486; acres 6,766; lat. 9° 44′; long 77° 20′; from Madura W.S.W. 58 miles; from Periyacoolam S.W. 32 miles.——*Palliyamparavay* (பள்ளியம்பரவை - palliyambaravai, Tam.). From (palliyan, tam. one of that caste + paravai, tam. a flat field). Lat. 9° 45′; long. 77° 22′; from Madura W.S.W. 55 miles; from Periyacoolam S.S.W. 29 miles. Anicut across the Shoorooly by name Palliyamparavay.——*Paumbaur* (பாம்பாறு - pámbáru, Tam.). See sep. title.——*Periyacoolam* (பெரியகுளம் - periyagulam, Tam.). See below.——*Periyaur* (பெரியாறு - periyáru, Tam.). See sep. title.——*Seeliyamputty* (சீலையம்பட்டி - shílaiyambatti, Tam.). From (shílaiyan, tam. proper name + patti, tam. village). Village; pop. 1,757; acres 2,796; lat. 9° 52′; long. 77° 26′; from Madura W. 50 miles; from Periyacoolam S.S.W. 19 miles. Anicut across the Shoorooly.——*Shooroolìyaur* (சுருளியாறு - shuruliyáru, Tam.). See sep. title.——*Tainiyaur* (தேனியாறு - téniyáru, Tam.). See sep. title.——*Tevauram* (தேவாரம் - tévâram, Tam.). From (té, tam. god + váram, tam. doorway). Sanscrit name (dévárha), meaning god deserving. Zemindarry, Village; pop. 10,041; acres 13,161; lat. 9° 54′; long. 77° 19′; from Madura W. 57 miles; from Periyacoolam S.W. 23 miles. Zemindarry [q.v.] pays peshcush [q.v.]

of Rs. 1,101. One of the twenty-four polliems resumed by Tippoo sultan in 1788.——*Varauhanuddy* (வராகநதி - varáganathi, Tam.). See sep. title.——*Varshanaud mullay* (வரிசைநாட்டுமலை - varisainátttumalai, Tam.). See sep. title.——*Veerpaundy* (வீரப்பாண்டி - vírappándi, Tam.). Called after veera paundyan. Village; pop. 3,148; acres 6,467; lat. 9° 58′; long. 77° 29′; from Madura W.N.W. 44 miles; from Periyacoolam S. 13 miles. Anicuts across the Shoorooly. West is a Shiva temple with inscriptions.——*Veigay* (வைகை - vaigai, Tam.). See sep. title.——*Yerachakkanaickanore* (எரசக்கநாயக்கனூர் - erasakkanáyakkanúr, Tam.). From a man of that name. Zemindarry, Village; pop. 6,058; acres 28,217; lat. 9° 48′; long. 77° 26′; from Madura W.S.W. 49 miles; from Periyacoolam S.S.W. 24 miles. Zemindarry [q.v.] pays a peshcush [q.v.] of Rs. 2,061. One of the twenty-four polliems resumed by Tippoo sultan in 1788.——**(2)** Town, Municipal town, Head-quarters of talook and Sub-registrar; Madura dist., Periyacoolam tal.; pop. 16,363; acres 7,685; lat. 10° 07′; long. 77° 35′; from Dindigul S.W. 33 miles; from Kodaykarnal S.S.E. 8 miles; from Madras S.S.W. 278 miles; from Madura W. 40 miles; from Rameshwaram W.N.W. 132 miles; from Ramnaud W.N.W. 102 miles. Consists of three hamlets, Keicoolancoolam, Tencaray and Vadacaray; on both banks of the Varauhanuddy. Ancient Shiva temple with a tasdik [q.v.] allowance of Rs. 3,182 annually; inscriptions around the Garbhagriham [q.v.]. Vishnoo temple in the middle of the town with a tasdik allowance of Rs. 582. A mile west there is a perpetual spring called Chidambara teertam. Near Shiva temple a large tank called Periyacoolam from which the town derives the name.

PESH (پیش - pesh, *Hind.*). From persian. Respected, foremost, front.——*Peshcar* (پیشکار - peshkár, Hind.; పేష్కారు - péshkáru, Tel.). From (above + kár, pers. business). A revenue officer placed in charge of a division of a zemindarry [q.v.] talook [q.v.] and invested with the same authority as a Tahsildar [q.v.].——*Peshcubz* (پیش قبض - peshkabz, Hind.). From (above + kabz, pers. grip). Dagger, the blade of which has a straight thick back, whilst the edge curves inwardly from a broad base to a very sharp point.——*Peshcush* (پیشکش - peshkash, Hind.). From (above + kash, pers. drawn). Literally first fruits. Rent to the Government paid by the proprietor of a permanently-settled estate.——*Peshgy* (پیشگی - peshgí, Hind.). From persian. Advance of money.——*Peshwah* (پیشوا - peshwá, Hind.; பேசுவாய் - pésuváy, Tam.). From (above + affix denoting agent). Title of prime minister of the old Mahratta [q.v.] kingdom. See vol. I (166) [muntry, pradhauny, pragada, vizier].——*Pishwauz* (پشواز - pishwáz, Hind.). From (pesh, pers. front + váz, pers. opening). Mahomedan dress reaching to the ankle, usually of colored muslin [q.v.]. The upper portion to the waist is similar to the full dress jauma [q.v.]., the lower portion being as much frilled as the waistband will carry. The lower part of the skirt is trimmed with bands and flounces of gold lace [kinaury], and silver and gold tissue; the upper portion being also richly ornamented. Worn by Mahomedan brides, and by Mahomedan ladies on occasions of household festivals. The invariable costume of Mahomedan dancing women [cunchany].

PETT (پیٹھ - peth, *Hind.*; ಪೇಟೆ - péte, *Can.*; పేట - péta, *Tel.*; പേട്ട - pétta, *Mal.*; பேட்டை - péttai, *Tam.*). Originally bazaar [q.v.] or trading town contiguous to a fortress [cottay, kila], sometimes separately fortified. Some have since themselves become towns, as Ranipett, Laulapett.

PEY (పెయ్య - peyya, *Tel.*). Female. Plant first term. Ex.:—Grewia orientalis (peyyarégu), female jujube [female bair].

PEY (பேய் - péy, *Tam.*). Devil. The subject of devil-worship is fully treated at vol. I (71) and (80). Devil-worship is the foundation of the Tamulian religion. Compare Statius Theb. iii, 661; primos in orbe deos fecit timor. When a person is believed to be possessed of a devil, he is brought to the pagoda [q.v.] of a Graumadevatay [q.v.], where the devil is cast out with ceremonies. Among the books that treat of devils, those best known are Vetaula katay containing stories about familiar spirits, and Neelinautacam the play of the demoness Neely. There is a Tamul proverb:—பேய்க்கூத்தும் ஆமணக்கும் ஆள்போனால் ஆள்தெரியாது—"a devil dance is a garden "of castor-oil plants [aumanac]; if one gets in he is not seen "again;" in each case he is lost. And another:—பேய்க்கு வேப்பிலைபோல—"as repugnant as neem leaves are to "devils;" margosa leaves are used by exorcists. See vol. I (81). Plant first term often joining two genera, showing inferiority or wild growth. Ex., where transl. is of second term:—Lycopersicum esculentum (péyttakkáli), physalis; Rhamnus wightii (péyppúlá), phyllanthus multiflorus; Sponia wightii (péymunnai), premna; Wedelia calendulacea (péykkayyanni), eclipta alba. See gloss. paragraphs.——*Peyalwar* (பேயாழ்வார் - péyázhvár, Tam.). Means mad sage. For more information see under Alwar.——*Peycoil* (பேய்க்கோயில் - péykkóyil, Tam.). Devil temple. Some are small mean tomb-like buildings with an image at the further end. The majority are simply pyramidal heaps of earth adorned with streaks of choonam and red ochre; this is both the temple and the image; a smaller heap in front is the altar; these are generally built under trees.——*Peyodaudy* (பேயோடாடி - péyódádi, Tam.). The dancer with the devil; a name applied to Shiva [q.v.] who once danced with Bhadracauly [q.v.].——*Peytair* (பேய்த்தேர் - péyttér, Tam.). Means devil chariot. The mirage or vapour of the noonday sun [sooryan], said to be the chariot of devils.

PEYAR (பெயர் - peyar, *Tam.*). Name [naumam].——*Augoopeyar* (ஆகுபெயர் - águbeyar, Tam.). Means made + name. Trope. Such words in Tamul are formed from words connected with the six common-places:—measurement or numbering, the container for the thing contained, cause for the effect, effect for cause, the work for the author, the author for the work. The name of one thing is put for another on account of a supposed resemblance between the two things. Thus:—Caul for leg, measure for the thing; Agam for mind, container for the thing contained; Tirvauchacam, for the book so called, cause for the effect; Alancauram for the chapter on rhetoric, effect for the cause; Tolgauppyan, work for the author; Tirvulloovan for cooral, author for the work; Togay, plumage for woman, from the resemblance of the hair on the head; and Woly, light for knowledge.——*Shirappoo peyar* (சிறப்புப்பெயர் - shirappuppeyar, Tam.). Proper name. The method of forming these among the Dravidians will be seen from page (104) of vol. I and appendix XXXIV of vol. II. A difficulty in ascertaining the exact form of such names arises from the doubt whether they should appear with a neuter termination, or a masculine or feminine termination. The following rules may be taken as holding good for ordinary conversational purposes. Pure dravidian names will follow the sex of the person; as Carooppan, Carooppy. The same will be the case in names derived from the sanscrit, if the name or the last part of it when compound is the name of a person in the sanscrit; as Abhirauman, Abhiraumy. In names from the sanscrit, if the name or the last part of it when compound is the name of a thing in the sanscrit, the dravidian name will appear in the neuter; as Camalam. As a rule, the names of individuals among hill tribes are not hindoo; they severally signify some peculiarity; as:—Cunnan the eyed one, Pottan the blind one, Tadiyan the fat one, for men; Madhooram the sweet one, Ponnan the fair one, Chakra the sugar one, for females. A special language of a highly artificial and conventional character is used of the royal person, property and actions; ordinary terms being forbidden. The palace occupied by the prince is called bhajanapooram, worship building; the royal food, nectar; a birth, an incarnation; and a birthday, a holy day; a death, leaving the country or going to the heaven of vishnoo namely veicoontam; travelling, yeroonelly or procession; and the word pully, church, or tiroo, sacred, is applied to almost everything connected with the king. For Mahomedan proper names see Alam and Ism [maryauday].

PHAUNSY (پھانسی - phánsi, *Hind.*). A noose. Phaunsigar is a strangler, thug [q.v.].

PHIN (ಫಿನ್ - phin, *Can.*). Todah [q.v.] name for the stone circles on the Neilgherries [aursham, azhauram].

PHOOL (पुष्प - pushpa, *San.*; پھول - phúl, *Hind.*; ಹೂವು - húvu, *Can.*; పువ్వు - puvvu, *Tel.*; പൂവ് - púvu, *Mal.*; பூ - pú, *Tam.*). Title from hindostany. San. from (push, san. to increase). Hind. from (p'hul, san. to unfold). Flower [poo, pooshpam]. Of edible flowers, some are eaten by themselves plain or mixed with sugar [q.v.], others are added to vegetables of a different nature and made into curries [q.v.] and stews; they are chiefly used during festivals [pundigay], when a deviation from the usual mode of living is observed.——**(1)** The following are two key-lists of the principal flowers of s. india edible or used as offerings to gods; further information must be traced in the glossary paragraphs through the small type cross-references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of the plants in the dravidian languages.—"*a*" Acacia arabica, babool; Acacia concinna, soap-pod wattle; Ægle marmelos, bael; Bassia longifolia, common mohwah; Bauhinia acuminata, white mountain ebony; Cæsalpinia pulcherrima, gold mohur tree; Calophyllum inophyllum, common poon; Chrysanthemum indicum, indian chamomile; Eragrostis cynosuroides, darbhay; Graptophyllum hortense, face plant; Guettarda speciosa, indian zebra wood; Hibiscus rosa-sinensis, china rose bendy; Ixora coccinea, flame of the woods; Jasminum angustifolium, wild jasmine; Jasminum auriculatum, needle jasmine; Jasminum grandiflorum, common jasmine; Jasminum sambac, arabian jasmine; Lagerstrœmia flos-reginæ, adambo; Lagerstrœmia indica, china privet; Lawsonia alba, henna plant; Mangifera indica, mango; Melia azadirachta, margosa; Mesua ferrea, nauga champak; Methonica superba, wild bachnaug; Michelia champaca, champak; Millingtonia hortensis, indian cork; Mimusops elengi, ilanjy; Morinda umbellata, small ach root; Moringa pterygosperma, indian horse radish; Murraya exotica, andaman satin wood; Musa paradisiaca, plantain; Nelumbium speciosum, sacred lotus; Nerium odorum, oleander; Nyctanthes arbor-tristis, coral jasmine;

Nymphæa odorata, purple indian water-lily; Ocimum sanctum, holy basil; Origanum marjorana, marjoram; Pandanus odoratissimus, screw-pine; Pavonia odorata, peramootty; Rosa centifolia, cabbage rose; Saraca indica, bengal ashocam; Stereospermum chelonoides, pauthiry; Strychnos potatorum, clearing nut; Tabernæmontana coronaria, adam's apple; Vitis quadrangularis, pirunday.—"*b*" Achroot, morinda; Adambo, lagerstrœmia; Ashocam, saraca; Babool, acacia; Bachnaug, methonica; Bael, ægle; Basil, ocimum; Bendy, hibiscus; Chamomile, chrysanthemum; Champak, mesua, michelia; Clearing nut, strychnos; Cork, millingtonia; Darbhay, eragrostis; Face plant, graptophyllum; Flame of the woods, ixora; Gold mohur, cæsalpinia; Henna, lawsonia; Horse radish, moringa; Ilanjy, mimusops; Jasmine, jasminum, nyctanthes; Lotus, nelumbium; Mango, mangifera; Margosa, melia; Marjoram, origanum; Mohwah, bassia; Mountain ebony, bauhinia; Oleander, nerium; Pauthiry, stereospermum; Peramootty, pavonia; Piraunday, vitis; Plantain, musa; Poon, calophyllum; Privet, lagerstrœmia; Rose, rosa; Satin-wood, murraya; Screw-pine, pandanus; Water-lily, nymphæa; Wattle, acacia; Zebra wood, guettarda. ——**(2)** The following are Varauha mihiran's remarks on omens [shacoonam] of fruits and flowers:—"judging from "the growth of the fruits and flowers of trees and plants "we may determine beforehand what articles can be had "cheap and in abundance and what crops [vellaumay] will "thrive; if the saulam [saul] tree should bear fruits and "flowers, kalama [q.v.] or white rice [q.v.] will grow in "abundance; if the red ashocam [bengal ashocam] should bear "fruits and flowers red paddy [q.v.] will grow; if the csheericay "[q.v.] should bear fruits and flowers white paddy [q.v.] will "grow, and if the black ashocam [q.v.] should bear fruits and "flowers black rice will grow; the growth of the nyagrodham or "banyan [q.v.] tree indicates the growth of barley [jow]; the "growth of tindoocam [gaub] indicates the growth of the shashtyacam [nawara] rice; and the growth of the ashwattam "[peepul] indicates the growth of all crops [dhaunyam, vellaumay]; the growth of the jamboo or rose-apple tree [rose-"apple] indicates the growth of the gingelly [q v.] and black "gram [q.v.]; the growth of shireesham [sirissa] indicates the "growth of the cangoo [tinay]; the growth of madhoocam "[mohwah] indicates the growth of wheat [geung] and the "growth of the saptaparnam [dita] indicates the growth of the "barley [jow]; the growth of atimooctacam or mountain "ebony [q.v.] and that of coondam or cassia [soovarnacam] "indicate the growth of carpausam or cotton [q.v.]; the growth "of asanam [black murdah] indicates the growth of sarshapam "or mustard [rayaun]; the growth of badary or jujube tree "[bair] indicates the growth of cooloottam [madras horse-"gram], and the growth of chirabilvam [karanj] indicates the "growth of the moodgam [green gram]; if the atasy or flax "[alsee], vaitasam or rattan [q.v.] and palaus [q.v.] trees "should bear blossoms, kodravam [khoda] will thrive; if "tilacam [peacock gingelly] should bear blossoms, couch-shells "[chunk], pearls [moty] and silver [velly] can be had in "abundance and if ingoodam [chironjee] should bear blossoms, "shanam [sunn] or hemp will thrive; the growth of hasti-"carnam or castor-oil tree [aumanac] shows that elephants "[q.v.] will thrive; that of ashwa carnam [saul] shows that "horses [ghorah] will thrive; that of trumpet flower [pauthiry] "shows that cows [pashoo] will thrive and the growth of "plantains [q.v.] shows that goats [vellaud] and sheep [aud] "will thrive; if the champak [q.v.] should bear blossoms, gold "[pon] can be had in abundance; if the bandhoojeevacam [jungle "geranium] should bear blossoms corals [moongah] can be had "in abundance, if cooravacam [nail dye] should bear blossoms, "diamonds [vajram] can be had in abundance and if nundicau-"vartam [adam's apple] should bear blossoms, cat's eye gem "[lahsanyah] can be had in abundance; the growth of the "sindhoovauram [notchy] indicates that pearls [moty] can be "had in abundance; that of coosambah or safflower [bastard "saffron] indicates that cooncoomam [saffron] can be had in "abundance, that of the red lotus [nelumbo] indicates that "rulers will prosper and that of the blue lotus indicates "that ministers will prosper; if soovarnapooshpam or globe "amaranth [jaffer goondy] should blossom, merchants will "prosper; if the lotus should blossom, the bramins will prosper, "if the white water-lily [indian waterlily] should blossom, "priests will prosper and if sowgandhicam or blue lotus should "blossom the commanders of armies will prosper and if the "arcam [yercum] plant should blossom, gold [pon] will become "cheap; if the mango [q.v.] should thrive well, there will be "prosperity in the land; if bhallautam or marking-nut [q.v.] "should thrive, there will be fear in the land; if the peeloo "[coomby] tree should thrive there will be health in the land; "if khadiram [catechu] and shamee [q.v.] should thrive, there "will be famine in the land; and if the arjoonam [white "murdah] tree should thrive there will be good rain [mazhay]; "if pichoomandam or neem [q.v.] tree and naugam [nauga "champak] should bear blossoms, there will be prosperity in the "land; if capittam [wood apple] should bear blossoms, there "will be storm; if nichoolam or hijjal [indian oak] should bear "blossoms there will be drought and if cootajam [tellicherry "bark] should bear blossoms there will be disease in the land; "if doorvay or bent grass [hurrially] or the coosham [q.v.] grass "should blossom, sugar-cane [q.v.] will thrive; if kovidauram "[variegated mountain ebony] should blossom there will be fear "from destructive fires; and if shyaumalatay [indian sarsaparilla] "should blossom, dancing-girls will prosper; there will be good "rain in those countries where trees, shrubs and creepers grow "luxuriantly with glossy leaves uninjured by worms, but if the "leaves are otherwise there will be little rain [mazhay]."——**(3)** *Phoolcaury* (پهولکاری - phúlkárí, Hind.). From (phúl, hind. flower + kárí, hind. workmanship). Means a tissued flower. Punjauby word. A peasant woman's Chudder [q.v.] or outer garment worked with sprigs of embroidery [casheeda].

PHOONT (پهونت - phúnt, *Hind.*). Means bursting. Same as Mottled melon.

PICOTTAH (उत्तोलन - uttólana, *San.*; ایتم - etam, *Hind.*; ಯಾತ - yáta, *Can.*; ఏతము - étamu, *Tel.*; ഏത്തം - éttam, *Mal.*; ஏற்றம் - éttam, *Tam.*). Title from portuguese. San. from (ut, san. prefix, meaning up + tul, san. to weigh). Hind. from dravidian from (éttu, to raise). The Shadoof of the nile and the old english Swape or swaypole. Contrivance for drawing water from well or low level. A fixed piece of wood generally the trunk of a large tree is forked at the top. In the cleft a palmyra [q.v.] tree is fixed with a pin to form a swipe, and steps are cut on the palmyra [q.v.], by which the person working the machine may mount and descend. To the upper part is fixed a bamboo [yaitcole], at the end of which hangs a bucket [yaittachaul] made of iron plates rivetted together or formed of a hollow stump of a palmyra. A man ascends the ladder to the top of the swipe, supporting himself by a bamboo [q.v.] screen erected by the side of the swipe, while another man below plunges the bucket into the water, after which the one above descends and by his weight draws up the water raised by the bucket. By prepared furrows the water is distributed where wanted [mhote, yaittam]. They are not without danger. There is a Tamul proverb:—இயமன் ஒருவனைக் கொல்வான், ஏற்றம் மூவரைக் கொல்லும்—"yaman kills one, a picottah kills "three;" as there are often three, one to raise bucket, and two on sway-pole.

PIDAUGA (പിടാക - pidáka, *Mal.*). District. Division of a talook [q.v.] in Travancore, like Amshom [q.v.] in Malabar.

PIDAURY (பிடாரி - pidári, *Tam.*). Corruption of (vishahárí, san. poison-remover). A common form of the village goddess. She is represented in a sitting posture, fire issuing from her whole body, to indicate her great wrath. On her head she wears a crown; in her erect locks, various ornaments; on her forehead, the mark of Shiva [q.v.]; in the large holes of her ears, bulky jewels; and behind her ears, two flowers. She has four arms and hands, holding in them, respectively, a drum [damaroo] with a snake [paumb], a trident [shoolam], the skull of Bramha [q.v.], and a goad [ancoosham]. Her throne is an altar. Her pagodas are numerous and of different sizes, containing besides the image of Pidaury one of Vigneshwaran [q.v.]; and the entrance is guarded by two door-keepers of terrible appearance called Moonnadiyaur. In the larger pagodas many more images of stone, representing her eighteen generals with their soldiers, as well as images of metal, are found. The image of stone is never removed, and to it drink offerings and meat offerings with incense are made once a week by the priest [poojarry]; whilst on the altar before the pagoda [q.v.], common people lay various other offerings, which the priest receives. The festival celebrated in her honor lasts seven or nine days, and is, on the whole, like those of the other Graumadevatays [q.v.]. See vol. I (78). There is a Tamul proverb:—அண்டாத பிடாரி ஆருக்கு அடங்குவாள்—"whom will the unapproachable demoness "obey" [matam].——*Pidauran* (പിടാരൻ - pitáran, Mal.). A very small class of Bramins in the north of Malabar. They drink liquor and sometimes exorcise devils [jauty].——*Pishauram* (പിഷാരം - pisháram, Mal.). From (pisháran, mal. the caste so called). Ambalavausy's house [mana].

PIG PLANT (கடம்பு - kadambu, *Tam.*). Title from strong smell. Tam. commonly applied to anthocephalus cadamba [common cadamba]. Botanically Siegesbeckia orientalis, linn., compositæ [vricsham, 74]. A much branched, erect herb, 1-3 feet high, with opposite, broadly triangular or ovate, coarsely toothed, more or less scabrous leaves; flowers yellow, the ray-florets are strap-shaped and pistil bearing, those of the disk tubular and perfect; the exterior scales of the involucre are twice the length of the inner; the achenes are without pappus, and are half inclosed by the chaffy scales of the receptacle. Known in china as a remedy for ague, rheumatism, and renal colic.

PILA (பிள - pila, *Tam.*). To crack.——*Pilavay* (பிளவை - pilavai, Tam.). From (pila, tam. to crack). Anthrax in cattle [pashoo rogam]. Otherwise splenic apoplexy, black-quarter, congestive fever, malignant sore-throat, inflammatory fever, &c. It is communicable in this country not only to healthy cattle [maud] but to man. The characteristic symptom, which frequently appears first at night, is the formation of puffy, crackling swellings under the skin, generally of the loins or extremities; or mucous membrane of the tongue or fauces, the disease when occupying the last position being often termed

malignant sore-throat. Temperature is raised, respiration and circulation are hurried. Death supervenes in from two to nine hours.

PILAH (பிலா - pilá, *Tam.*). Same as Jack.——*Cootty pilah* (குட்டிப்பிலா - kuttippilá, Tam.). Same as Stunted jack.——*Pelandoray* (பெலாந்துரை - peländurai, Tam.). From (pilá, tam. jack tree, artocarpus integrifolia, willd. + turai, tam. ford). South arcot dist., Vriddhauchellam tal.; pop. 1,437; acres 2,178; lat. 11° 25′; long. 79° 19′; from Vriddhauchellam S.S.W. 8 miles. A river-fed system of tanks [q.v.]. See vol. I, 404.

PILKYA (खञ्जन - khañjana, *San.*; پلکیا - pilkiyá, *Hind.*). San. from (khanj, san. to limp). Wagtails and pipits. Motacillinæ, sylviadæ [calacuntam], dentirostres, insessores, aves [pacshy, 23], of naturalists [jantoo]. The species best known to the natives are shown below.——*Indian titlark* (رجل - rújal, Hind.; గుర్రపుమారిజిత్త - gurrapumárijitta, Tel.). Tel. from (gurramu, tel. horse + mári, tel. personal suffix + jitta, tel. bird). Hind. also (chacharí). Corydalla rufula, motacillinæ [pilkya], sylviadæ [calacuntam], dentirostres, insessores [pacshy, 23], of naturalists. Alias Anthus agilis, malaiensis; Cichlops ubiquitarius. Runs rapidly on the ground, and when raised does not fly far. Song mere repetition of one note.——*Khanjan* (खञ्जन - khañjana, San.; زعرة - zuarah Ar.; دم جنبانك - dumjumbának, Pers.; کھنجن - khanjan, Hind.; ممولا - mamolá, Dec.; త్సకలత్సరలగాడు - tsákalatsáralagádu, Tel.; വാലാട്ടി - válátti, Mal.; சூத்தாட்டியுள்ளான் - shúttáttiyullán, Tam.). San. from (khañja, san. lame). Ar. from (zuara, ar. to frighten); for it is never seen unless scared. Pers. from (dum, pers. tail + jumbának, pers. one who wags). Hind. from sanscrit. Tel. from (tsákala, tel. the caste + tsára, tel. stripe + gádu, tel. personal suffix). Mal. from (vál, mal. tail + áttu, mal. to shake). Tam. means rump + shake + snipe [oollaun]. Ar. also (hazzázuzzanab), meaning wagger of tail; (savah). Pers. also (dumícha). Hind. also (bhúinmamolá), meaning earth wagtail. Title otherwise Pied wagtail. Motacilla maderaspatana, motacillinæ [pilkya], sylviadæ [calacuntam], dentirostres, insessores [pacshy, 23], of naturalists. Alias Motacilla picata, variegata. A water wagtail; found on banks of rivers. Male is occasionally caged for its song.——*Khorassan sparrow* (خراسانی چڑی - khurásáníchurí, Hind.; లిక్కుజిత్త - likkujitta, Tel.). Tel. from (likki, tel. small sickle + jitta, tel. bird). Hind. also (masarichi), meaning mosquito-killer. Title otherwise Blind bird, Indian tree-pipit. Pipastes agilis, motacillinæ [pilkya], sylviadæ [calacuntam], dentirostres, insessores [pacshy, 23], of naturalists. Alias Anthus arboreus, maculatus. Very similar to its European congener. Said to kill mosquitoes [q.v.].

PILL (புல்லு - pullu, *Tam.*). Grass; one of the five Dravidian terms for generic terms for plants [vricsham].——*Pillangrovy* (ಪಿಲ್ಲಂಗೋವಿ - pillangóvi, Can.; పిల్లనగ్రోవి - pillanagróvi, Tel.; பில்லாங்குழல் - pillánguzhal, Tam.). Tel. from (pillu, tel. reed + króvi, tel. tube). Tam. from (pul, tam. grass + kuzhal, tam. pipe). Flageolet. Same as Algoja [sangeetam].——*Pilloory* (کچلے کا ملنگ - kuchlekámalang, Hind.; کچلے کی سوکن - kuchlekísaukan, Dec.; పుల్లురివి - pullurivi, Tel.; புல்லுருவி - pulluruvi, Tam.). Title from tamul. Hind. from (kuchlá, hind. nux vomica, strychnos nux vomica, linn. + malang, hind. companion); from being a parasite on nux vomica. Dec. from (kuchlá, hind. nux vomica + saukan, hind. rival wife); probably from growing on that plant. Tel. from tamul. Tam. from (pul, tam. grass + uruvu, tam. to pierce through); a parasite. Title otherwise Misseltoe. Botanically Viscum monoicum, roxb., loranthaceæ [vricsham]. Monoicous, branches opposite and dichotomous, jointed, round and smooth; leaves opposite, subsessile, lanceolar, three to five-nerved; flowers axillary and at the divisions of the branchlets, sessile, usually three together, the centre one of which is generally male and the lateral ones female; berry long; flowering about the beginning of the hot season. Other common species are:—angulatum, attenuatum, capitellatum, grossum, moniliforme, orbiculatum, orientale, ramosissimum, wallichianum.——*Poollary* (புல்வரி - pulvari, Tam.). See sep. title.

PILLY (పిల్లి - pilli, *Tel.*). Cat. Plant first term, from hairy growth of plant or fruit. Ex., where transl. is of second term:—Asparagopsis floribunda (pillitíga), creeper; Crotalaria biflora (pillivattachettu), testicle + plant; Mucuna pruriens (pilliadugu), foot; Phaseolus trilobus (pillipesara), phaseolus mungo; Pistacia lentiscus (pillikandlaguggilamu), eye + dammer. See gloss. paragraphs.

PILOW (پلاؤ - puláu, *Hind.*). Persian. A dish, in origin purely Mahomedan, consisting of meat, or fowl [moorghy], boiled along with rice [q.v.] and highly seasoned with cinnamon [q.v.], cardamoms [q.v.], mace [jauty patry] and ghee [q.v.].

PILPAY (پیلپای - pílpái, *Hind.*). From (védapriya, san. knowledge-lover). Author of Punchatantram [bidpay].

PIN (பின் - pin, *Tam.*). After.——*Pillaiyaur* (பிள்ளையார் - pillaiyár, Tam.). Honorific plural form. Literally the noble child. The most common name of Vigneshwaran [q.v.] in the Tamul country [ganapaty, ganesh].——*Pillaiyaur chatoorty* (ಪಿಳ್ಳಾರಿಚೌತಿ - pillárichauti, Can.; பிள்ளையார்ச்சதுர்த்தி - pillaiyárççathurtti, Tam.). Means ganesh, the son-god + fourth. Otherwise Pillaiyaur nomboo. Sanscrit is Vinauyaca chatoorty; Teloogoo Vinauya-a chowty. Lunar [chaundramaunam] festival [pundigay, 3a], subject to intercalation [adhicam]. On the fourth day of the increasing moon [shooclapacsham] of the sixth lunar month Bhaudrapadam [mausam] between 20th August and 19th September. Celebrated in houses and in Shiva [q.v.] pagodas [q.v.] in honor of Ganesh [q.v.] for the purpose of getting understanding. Hindoos observe a demi-fast [oopavausam]. Clay images of the deity, riding upon the back of a rat [ely] are made, duly consecrated and worshipped in houses and families; they are afterwards thrown into a river or tank [maryauday]. See vol. I (93).——*Pillamaur* (പിള്ളമാർ - pillamár, Mal.). Title for accountants [curnum, kanakkan].——*Pillay* (പിള്ള - pilla, Mal.; பிள்ளை - pillai, Tam.). Means child. Title added to the names of persons engaged in agriculture [vellaumay] and to tamul shoodra curnums [q.v.]. It belongs properly to the Yiday [q.v.] or great pastoral race of the Tamul country. The Vulloova [q.v.] priests of the Pariah [q.v.] also call themselves Pillay. Also largely assumed by Native christians [peyar]. Pillay is also affix to names of small animals and birds; compare Pitta. Ex., where transl. is of first term:—Halicore dugong (nírupille), water; Herpestes mungo (kírippillai), mongoose, herpestes genus; Sciurus palmarum (anirbillai), squirrel, sciurus genus. See gloss. paragraphs.——*Pillay tamul* (பிள்ளைத்தமிழ் - pillaittamizh, Tam.). From (pillai, tam. child + tamizh, tam. the language). Poem celebrating different stages in the infancy and childhood of a hero, in ten parts. There are two celebrated compositions bearing this title, one in praise of Meenautchy [q.v.] the goddess at Madura by Comaragooroopara deshican, and the other reciting the childhood of Scandan [soobramanyan] by Maurgasahauya devan. The ten prescribed points are:—putting on the arm-rings, with magical rites; first voluntary movement of the child compared to the motion of herbs by the breeze; lulling the child in the cradle with songs [pautt]; the first clapping of its hands; kissing; extending its hands and calling to be taken; showing the moon to the infant; amusement of a small drum; making in play small houses; drawing small carriages.——*Pillaytyaugar* (பிள்ளைத்தியாகர் - pillaittiyágar, Tam.). From (pillai, tam. child + tyaj, san. to give). Shiva, the child giver. There is a legend connected with Shirtondan, one of the sixty-three devotees [aroopatt moover] of shiva [q.v.]. To try his piety and hospitality, Shiva appeared to him in the form of a mendicant guest and when invited to food insisted on having the flesh of his son cooked for him; on this being done Shiva gave him back his child restored to life.——*Pinj* (பிஞ்சு - piñju, Tam.). Newly-formed fruit; one of the Dravidian terms for plant products added to the word-root [vricsham].——*Pinna* (చిన్న - pinna, Tel). Small. Plant first term, often joining two genera. Ex., where transl. is of second term:—Hydrocotyle asiatica (pinnaélaki), elettaria cardamomum; Salvadora persica (pinnavaragógu), toddalia aculeata. See gloss. paragraphs.

PINAH (پینار - pinánár, *Hind.*). Fabric made in Philippines from fibres of the pine-apple leaf [ananas]; very soft, and transparent, and generally has a slight tinge of pale yellow.

PINAR (പിണർ - pinar, *Mal.*). Stiff.——*Penarvully* (दीर्घपत्रा - dírghapatrá, San.; പിണർവള്ളി - pinarvalli, Mal.). San. from (dírgha, san. long + patra, san. leaf) [plantain, poison nut]. Mal. from (pinar, mal. stiff + valli, mal. creeper). San. also (kuntalí), meaning produced in coontalam; (tiktaka), meaning bitter; (pindavallí), meaning ball creeper. Title otherwise Bandolier fruit tree. Portuguese name given to fruit from resemblance to leather cases called bandoleers, each containing a charge of powder, of which every musketeer anciently wore twelve suspended by a shoulder belt. Botanically Zanonia indica, linn., cucurbitaceæ [vricsham, 62]. Leaves 6 to 8 by 3 to 4 inches, usually acute; petiole one inch; male flowers very small, pedicels ⅛ to ¼ inch; female flowers, including the ovary, ½ inch; ovary early becoming one-celled by the separation of the three fleshy placentas; seeds much compressed, hardly $\frac{1}{10}$th inch thick; capsule large, like a candle extinguisher. In malabar a bath by boiling leaves for boils, and an antispasmodic liniment by pounding leaves with milk and butter; in ceylon the plant is used as a febrifuge.

PINDAM (पिण्ड - pinda, *San.*). From (pind, san. to accumulate).—"*a*" Sum total in arithmetic [ganitam]. The $\frac{1}{24}$th part of the quadrant [paudam] of a circle [chuckram]; equal to 3° 45′, the constant ratio of the Hindoo trigonometrical tables.—"*b*" Plant first term, meaning round. Ex., where transl. is of second term:—Daucus carota (pindamúlam), root; Dioscorea globosa (pindálu), esculent root; Ipomæa batatas (pindálú), esculent root; Lagenaria vulgaris (pindap'hala), fruit; Manihot utilissima (pindálú), esculent root. See gloss. paragraphs.—"*c*" A ball of rice [q.v.] or meat, especially that which is offered at obsequial ceremonies or Shrauddhams [q.v.] to deceased parents and progenitors [pitry].——*Poondy oil* (പിണ്ഡിണ്ണ - pindienna, Mal.). Product of Malabar nutmeg.

PINDARRY (پنڈارا - pindárá, *Hind.*; ಪಿಂಡಾರಿ - pindári, *Can.*). From (pendhú, mahr. a drink from millet). See vol. I (158); II, 59. Originally freebooters attached to Mahratta [q.v.] armies, who took to plunder when the latter ceased to spread. They fought no pitched battles, and always retreated before a regular army [dandoo]. They were put down by Marquis of Hastings [jauty].

PINDY (పిండి - pindi, *Tel.*). From (pishta, san. flour from pish, san. to grind). Flour. Plant first term, from being covered with powdery dust or from reducing rocks to powder. Ex., where transl. is of second term:—Ærua lanata (pindidonda), cephalandra indica; Ficus asperrima (pindichettu), plant. See gloss. paragraphs.

PINEY (धूप - dhúpa, *San.*; धुंपारूकु - dhumpárúku, *Conc.*; شجر سندروس - shajarisandrús, *Ar.*; درخت چندرس - darakhtichandras, *Pers.*; چندرس کا پیڑ - chandraskáper, *Hind*; چندرس کا جھاڑ - chandraskájhár, *Dec.*; ಧೂಪದಮರ - dhúpadamara, *Can.*; ತಂಡೊಳಿಗೆದಮರ - tandóligedamara, *Too.*; తెల్లదమ్మరుమాను - telladammarumánu, *Tel.*; പയൻമരം - payanmaram, *Mal.*; හල් - hal, *Singh.*; வெள்ளைக்குந்துருக்கம் - vellaikkundurukkam, *Tam.*). Title from malayalam. San. means incense. Ar. from (shajar, ar. tree + sandrús, ar. sandarach). Pers., &c., from arabic. Can. from (dhúpa, can. incense + mara, can. tree). Tel. from (tella, tel. white + dammaru, tel. dammer + mánu, tel. tree). Mal. from (paya, mal. resin + maram, mal. tree); from copious resin exuding from the tree. Tam. from (vellai, tam. white + kundurukkam, tam. olibanum tree, boswellia serrata, roxb.). Hind. also (sufeddámarkáper), meaning white dammer tree; (kahrubá), meaning amber, from resemblance [karbah]. Dec. also (rál), meaning resin [raul]. Can. also (ráladamara); (paini); (mandadhúpa), meaning slow incense; (pene). Tel. also (tellaguggilapuchettu), meaning white + dammer + tree; (dhúpadammaruchettu), meaning incense + dammer + tree. Mal. also (vellakkunturukkam), meaning white olibanum. Tam. also (kundurukkam) [indian olibanum, white dammer]; (vellaikkungiliyam), meaning white googal; (túbamaram), meaning incense tree; (shadakula). Title otherwise Doopada tree, Gum piney, Indian copal, Indian gum anime, Piney dammer, Piney tallow, Piney varnish tree, Vateria copal, White dammer. Botanically Vateria indica, linn., dipterocarpeæ [vricsham, 24]. Alias Elæocarpus copalliferus; Vateria malabarica. Large handsome tree; bark whitish; foliage dense; young shoots and all tender parts, except the leaves, covered with fine stellate pubescence; leaves alternate, petioled, oblong, entire, slightly cordate at the base, shortly pointed or obtuse at the apex, coriaceous and smooth, petioles 1 inch in length; stipules oblong; flowers rather remote, on large terminal panicles; bracts ovate, pointed; filaments forty to fifty, very short; anthers not auricled at the base, terminating in a single long bristle at the apex; style a little longer than the stamens; stigmas acute; capsule oblong, obtuse, coriaceous fleshy; seed solitary; native of malabar. The resin [raul], when recent and soft, is called piney varnish; when hardened, piney dammer [q.v.], otherwise white dammer [q.v.], indian copal or indian gum anime [q.v.]. The resin is found from pale green to a deeper amber color with all the intermediate shades; it is a true resin and occurs in large lumps emitting an agreeable balsamic odour when fresh; it is easily distinguished from all other indian resins by its superior hardness, its color, and amber-like [karbah] appearance; piney resin resembles the american copal [q.v.] but differs most advantageously from it by being at once soluble in turpentine [carpoora teilam] and drying oils [yennay], without the necessity of the preliminary destructive fusion required by that resin, a process which tends greatly to impair its color when used as a varnish [rangh]; the solution of the piney resin in turpentine is turbid and milky, but by the addition of powdered charcoal [adoopp kary] and subsequently filtering, it yields a solution transparent and colorless as water, and gives a varnish which dries with a purity and whiteness not to be surpassed; piney resin yields, on destructive distillation, a plurescent oil, of agreeable odour but not differing essentially from that obtained from cheaper resins; piney resin burns with a clear steady light, giving off a pleasant smell and but little smoke. The resin is procured by cutting a notch in the tree, sloping inwards and downwards; this is soon filled with the juice which hardens by exposure to the air. An oil [yennay] again is prepared by cleaning the seeds, then roasting and grinding them into a mass; to five seers of seed twelve seers of water are added, and the whole is boiled until the oil rises to the surface; on removing the oil, stirring the contents of the vessel and allowing it to stand until the following day, a further portion of oil will be found on the surface; this is known as piney tallow, or vegetable butter of canara; it has the properties of tallow, and is of a nature betwixt wax [mom] and oil [yennay], a concrete inflammable substance; on cooling this forms a solid cake, generally white, sometimes yellow; greasy to touch, with a degree of waxiness, has rather an agreeable odour. Plant gives to pharm. the white dammer [q.v.]; non-officinal, like pine resin; under the influence of gentle heat this resin [raul] combines with wax [mom] and oil [yennay] and forms an excellent resinous ointment; substituted for british burgundy pitch; piney tallow also is highly valued as a local application in chronic rheumatism and some other painful affections. The bark, bitter and astringent, retards fermentation; beads are made of the resin, which resemble amber beads [karbah], even to being electrical when excited by rubbing; the resin is on the malabar coast also made into candles, while burning these diffuse an agreeable fragrance, give a fine clear light with little smoke, and consume the wick so as not to require snuffing; a spirit varnish is prepared by reducing to powder about six parts of piney dammer and one of camphor [q.v.], and then adding hot alcohol sufficient to dissolve the mixed powder; the varnish thus prepared is good for varnishing pictures, but before being used requires to be gently heated to evaporate the camphor, which otherwise would produce a roughness on the picture in consequence of its subsequent evaporations; the oil or tallow is suitable for lubrication of wheels and axles of railway carriages, equally applicable to manufacture of soap [sauboon] and candles, also used in lamps. Sap-wood white with a tinge of red; heart-wood grey, rough; wood used in ship-building, being proof against attacks of teredo navalis. Observe that the Pinnay tree, which is quite another thing, is the Calophyllum angustifolium, roxb. For other varnishes compare:—Ailanthus glandulosa, false varnish, japan varnish; Holigarna longifolia, malabar black varnish; Melanorrhæa usitata, black varnish, burmese varnish, martaban varnish; Rhus succedanea, japanese varnish; Semecarpus anacardium, singhalese varnish, indian varnish, sylhet varnish. See gloss. paragraphs. For Dammers generally see that head.

PINJ (पिञ्ज - piñj, *San.*). To shine.——*Pingalam* (पिंगल - pingala, San.). Title from shining color of some species. Laniadæ family, dentirostres, insessores, aves [pacshy, 19], of naturalists [jantoo]. Shrikes. Bill strong, short, moderate length, notched or toothed at tip; gape rather wide; tarsus short, strong, usually with large scutæ in front and on the toes. Divided into several sub-families:—Lanianæ, true shrikes; many kill small birds and mammals, as mice [shoondely] and shrews [musk rat]; some impale their victims on thorns; flight is direct, moderately rapid, with repeated strokes of the wings [latorah]. Malaconotinæ, wood shrikes; feeding on insects which they pick off leaves and branches; usually have a rather pleasing song whilst thus employed [hill latorah]. Campephaginæ, cuckoo shrikes [aukroy, sahely]. Dicrurinæ, drongo shrikes [king crow]. Artaminæ, swallow shrikes [palmyra swallow].——*Pingalan* (पिङ्गल - pingala, San.). Coobairan [q.v.].——*Pingam* (पिङ्ग - pinga, San.). From (piñj, san. to shine). Reddish brown.——*Pinjam* (पिञ्ज - piñja, San.). Cotton [q.v.].——*Pinjarry* (پنجارا - pinjárá, Hind.; பிஞ்சாரி - piñjári, Tam.). From (piñja, san. cotton). Lubbays [q.v.]. Cotton-cleaners [doodeycoolam, jauty]. Distinguish from Brinjarry.——*Punj* (कर्पास - kárpasa, San.; روئی - rúí, Hind.; ಹತ್ತಿ - hatti, Can.; ప్రత్తి - patti, Tel.; പരുത്തി - parutti, Mal.; பஞ்சு - pañju, Tam.). From (piñj, san. to shine); from shining wool. Cotton [indian cotton].——*Punjy* (ಪಂಜಿ - panji, Can.). From (piñj, san. to shine). Means cotton. Pariah proper name [peyar].

PINNAY (பின்னை - pinnai, *Tam.*). Same as Common poon. Distinguish from Piney.——*Shiroopinnay* (சிறுபின்னை - shirubinnai, Tam.). Same as Small poon.

PINTADO (پنٹیڈو - pintado, *Port.*). Title from portuguese means spotted cloth. A painted cloth, chintz [q.v.].

PIPLEE (پپلی - piplí, *Hind.*). Means nourishing. Same as Long pepper, and origin of term Pepper [q.v.].——*Piplee mor* (پپلاموڑ - piplámor, Hind.). From (above + múla, san. root). Root of piper longum, linn. [long pepper]. Otherwise Papriemor.

PIRA (பிற - pira, *Tam.*). To be born.——*Pair* (പേറ - péru, Mal.). From (peru, tam. to beget). The vernacular for the sanscrit Jenm [q.v.].——*Piraisoody* (பிறைசூடி - piraisúdi, Tam.). From (pirai, tam. moon + shúdu, tam. to wear). Shiva [q.v.]. Cf. Chundrashekharan.——*Pirapp* (പിറപ്പ - pirappu, Mal.). Birth [jenmam, samsauram]. Tye pirapp or birth of Tye, the tenth tamul solar month [mausam]; see Pongal. For Varshapirapp or birth of the year see New year.——*Piray* (பிறை - pirai, Tam.). From (pira, tam. to be born). Properly the new moon [amavausyay]. Valar piray is the crescent moon [shoocla pacsham]; and Tey piray is the decrescent moon [krishna pacsham]. For more information see Pacshan.

PIRANDAY (अस्थिसंहार - ast'hisamhára, *San.*; चौधारीखांडवेल - chaudháríkhándavéla, *Mahr.*; संदबाळ्ळि - sandaballi, *Conc.*; ہڈ جوڑا - hadjorá, *Hind.*; نلیر - naller, *Dec.*; ಮಂಗರವಳ್ಳಿ - mangaravalli, *Can.*; ಸಂದುಬೂರು - sandubúru, *Too.*; నల్లేరు - nalléru, *Tel.*; ചങ്ങലംപിരണ്ട - channalampiranta, *Mal.*; වැල්හිරස්ස - valhírassa, *Singh.*; பிரண்டை - pirandai, *Tam.*). Title from tamul. San. from (ast'hi, san. bone + samhára, san. drawing together); bone-maker. Mahr. from (chaudhárí, mahr.

quadrangularis + khándavéla, mahr. the creeper, ventilago madraspatana, gærtn.). Hind. from (had, hind. bone + jorá, hind. one who sets); from use of beds of stems in spine affections. Can. from (mangu, can. blackness + balli, can. creeper). Too. from (sandu, too. joint + búru, too. creeper). Mal. from (channala, mal. chain + piranta, mal. the creeper). Singh. from (val, singh. creeper + hírassa, singh. the plant). Tam. from (pural, tam. to roll); low rolling creeper. San. also (vajravallí), meaning adamantine creeper; (kandalatá), meaning bulbous root + creeper; (ast'hishrinkhalá), meaning bone + chain; (ast'hisandháua), meaning bone joining. Hind. also (hárjorá), meaning flesh-joiner; (harsankar), meaning bone + joiner. Can. also (mángaruli); (sanduballi), meaning joint + creeper. Mal. also (piranta), meaning rolling. Singh. also (hírassa). Title otherwise Adamant creeper, Bone-setter, Square-stalked wild grape. Botanically Vitis [draucshay] quadrangularis, wall., ampelideæ [vricsham, 42]. Alias Cissus bifida, quadrangularis. Climbing; glabrous; stem four-angled, winged; stipules lunate, entire; leaves alternate, cordate-ovate, serrulated, short-petioled; umbels shortly peduncled; stamens four; petals four, distinct; fruit globose, size of a large pea [calauyam], very acrid, one-celled, one-seeded; flowers small, white; cultivated; berries very acrid. The fresh stem is deep or pale green in color, four-angled, winged and jointed, each joint varying in length from 2–4 inches; very acrid in taste. Leaves and young shoots dried and powdered are given in bowel-affections. Same when young and tender are eaten. Gives fibre [naur]. ——*Bristly piranday* (هرمل - harmal, Hind.; బర్రెబచ్చలి - barrebattsali, Tel.; புளிப்பிரண்டை - pulippirandai, Tam.). Title from character of stems. Hind. from syriac [harmal]. Tel. from (barre, tel. buffalo + battsali, tel. basella cordifolia, lam.). Tam. from (puli, tam. sour + pirandai, tam. vitis quadrangularis, wall.). Tel. also (pullabattsali), meaning sour + basella cordifolia, lam. Tam. also (puliyárilaikkizhangu), meaning oxalis corniculata, linn. + leaf + thick root. Title otherwise Hairy wild vine. Botanically Vitis [draucshay] setosa, wall., ampelideæ [vricsham, 42]. Cissus acida, setosa. Climbing; clothed with scattered glandular bristly hairs, but otherwise glabrous; stem herbaceous; leaves succulent, trifoliate, without a common petiole; leaflets stalked, roundish-ovate or obovate, obtuse with numerous sharp serratures, cymes peduncled with divaricating branches; petals four, distinct; stamens four; style conspicuous; berries red, ovoid, hairy, one-seeded; flowers in the rainy season. Acrid in all its parts, leaves toasted and oiled are applied to indolent tumours to bring them to suppuration.

PISANG (پسڠ - pisang, *Malay*). Same as Plantain.

PISHAUCH (पिशाच - pishácha, *San.*). From (pishita, san. flesh + ash, san. to eat).—"*a*" An evil spirit haunting the places where dead bodies are buried or burnt [shavacaud, shoodcaud], and occasionally animating them; or even possessing living bodies [bhootam, pey].—"*b*" Also a sandstorm. These are common at the end of March and beginning of April. They show themselves between eleven and twelve at noon, increasing daily both in strength and number, and moving from west to east in varying directions all over the country. They carry dust and light articles along with them [munnmaury mazhay]. See vol. II, 5.

PISH-PASH (پاش پاش - páshpásh, *Hind.*). Hind. means broken to bits. Indian dish for invalids; fresh meat cooked amongst rice.

PISIN (பிசின் - pisin, *Tam.*). From (pasai, tam. moisture). Gum [gond]; one of the Dravidian terms for plant products added to the word-root [vricsham].

PISTAH (پسته - pistah, *Pers.*). Title otherwise Turpentine trees. Botanically the Pistacia genus, anacardiaceæ [vricsham, 45]. Small trees with pinnate leaves; the fruits are dry egg-shaped drupes, containing a one-seeded stone. The species best known to the natives are:—integerrima [kakrasinghy], lentiscus [mastic], terebinthus [turpentine pistah], vera [edible pistah]. ——*Edible pistah* (شجرفستق - shajarifustuk, Ar.; درخت پسته - darakhtipistah, Pers.; پستہ کا پیڑ - pistekáper, Hind.; پستے کا جھاڑ - pistekájhár, Dec.). Title from nuts which are eaten. Ar. from persian. Pers. from (darakht, ar. tree + pistah, pers. pistachio). Hind. from (pistah, pers. pistachio + per, hind. tree). Dec. from hindostany. Ar. also (shajaribuzghanj). Pers. also (darakhtibuzghand). Title otherwise Jacob's nut tree, Pistachio nut tree. Botanically Pistacia [pistah] vera, linn., anacardiaceæ [vricsham, 45]. Pistacia from (fustuk, arabic). The fruit, a drupe, is dry, oval, oblong, oblique, wrinkled, of ashy green color, the nut bony, glabrous, white, with a spongy stain at the base; the almond pale green, covered with white or brownish perisperm; the odour of the pericarp is resinous, and slightly balsamic, its taste bitter and resinous. The so-called galls [mauchicoy] from margins of leaves are when fresh bright pink on one side and yellowish white on the other; they vary much in shape and size, some being perfectly fig-shaped [atty] and others almost spherical, the majority are ovoid; the largest are an inch in length; some are no larger than a pea [calauyam]; the taste acidulous, very astringent and slightly terebinthinous; caused by presence of an aphis; these were the nuts sent by jacob into egypt. Nuts are medicinally warm, and used in general debility; oil from the kernels is demulcent and restorative; the bark is tonic. Nuts fried in butter are eaten; sometimes simply dried like almonds [baudam]; sometimes made into articles of confectionery.——*Turpentine pistah* (بطم - batm, Ar.; سقز - sukkar, Pers.). Ar. also (katingirúmí). Pers. also (khinjak); (zangbárí). Hebrew alah. Greek τέρμινθος, τερέβινθος. Title otherwise Cabool mastic, Chian turpentine, Cyprian turpentine, Scio turpentine, Terebinth tree. Botanically Pistácia [pistah] terebinthus, linn., anacardiaceæ [vricsham, 45]. Deciduous tree, 20 feet high; leaves pinnate, with an odd one; leaflets about seven, ovate-lanceolate, rounded at the base, acute mucronate; flowers apetalous, flowering in june and july. The galls [mauchicoy] from margins of leaves are very small sacs, three or four of which communicate together; they are of a pink color, and have a terebinthinate and astringent taste. By pressing kernels is got the original oil of turpentine, τερεβίνθινον ἔλαιον, a mixture of essential and fat oils; of thick consistence; yellowish white color, pellucid and tenacious; its odour is strong, peculiar, and agreeable, its flavor slightly bitter; by keeping it loses its essential oil [attar] and becomes hard; much the same as true mastic [q.v.], but the color is rather deeper, and it wants the fine perfume of the latter article. This turpentine is employed as a masticatory [charvanam] to sweeten the breath, and preserve the teeth. For common pine turpentine see Carpoora teilam.

PITACAM (पिटक - pitaka, *San.*). From (pit, san. to heap together). Basket, granary, collection. A division of the sacred books of the Booddhists [booddha]; in which there are three pitacams, Sootram, Vinayam, and Abhidharmam; compiled many years after the death of Booddha who himself left no writings.

PITAH (پیٹنار - pitánár, *Hind.*). Title from portuguese. Fibre of the American aloe.

PITCHAY (பிச்சை - piççai, *Tam.*). From (bhiksh, san. to beg). Alms. Hindoo 2nd or pers. name [peyar]. Applied to males and females among the lower orders. Cala pitchay are alms given at the threshing-floor [calam]. The tamuls are in favor of alms-giving, but do not class alms-taking as a virtue, as the bramins do. See the following from Cooral:—வறியார்க்கொன் றீவதே யீகைமற் றெல்லாங் குறியெதிர்ப் பை நீர துடைத்து—"to give to the destitute is true charity; "all other gifts have the nature of what is done for a measured "return."—ஈத லிசைபட வாழ்த லதுவல்ல தூதிய மில்லை யுயிர்க்கு—"give to the poor and live with praise; there is "no greater profit to man than that."—இகழ்ந்தெள்ளா தீவாரைக் காணின் மகிழ்ந்துள்ள முள்ளு ளுவப்ப துடைத்து—"beggars rejoice exceedingly when they behold "those who bestow with kindness and courtesy."—இரவென்னு மேமாப்பி றோணி கரவென்னும் பார்தாக்கப் பக்கு விடும்—"the unsafe raft of begging will split when it "strikes on the rock of refusal."—தெண்ணீ ரடுபுற்கை யாயினுந் தாடந்த துண்ணலி னூங்கினிய தில்—"even thin "gruel is ambrosia to him who has obtained it by labor."——*Pitchayyan* (பிச்சைய்யன் - piççaiyyan, Tam.). From (above + aiyyan, tam. master). Familiarly Pitchoo. Hindoo 2nd or pers. name [peyar].——*Pitchoogoonty* (బిచ్చుగుంట - pittsugunti, Tel.). From (bittsamu, tel. alms + konu, tel. to take). A class of vagrants in Kurnool and Nellore. Numbers about 7,000 [jauty].——*Pitchoomany* (பிச்சுமணி - piççumani, Tam.). From (above + mani, tam. gem.). Familiarly Pitchoo. Hindoo 2nd or pers. name. Common to both sexes [peyar].

PITTA (పిట్ట - pitta, *Tel.*). Any small bird [cooroovy]. Compare Pillay.—"*a*" Very common bird second term. Ex., where transl. is of first term:—Alauda gulgula (bharatapitta), singer; Ammomanes phœnicura (dóvapitta), road; Artamus fuscus, (tátipitta), palmyra; Caprimulgus indicus (kappapitta), frog; Chætornis striatus (gaddipitta), grass; Coracias indica (pálapitta), milk-producing; Galerida cristata (dzuttupitta), crest; Hierococcyx varius (kátipitta), wild; Iora zeylonica (pattsapitta), green; Leucocerca albofrontata (dásaripitta), veishnava mendicant, from stripes; Mirafra cantillans (agnipitta), fire, and (bharatapitta), singer; Otocompsa jocosa (turakapikilipitta), mussalman + pycnonotus hæmorhous; Pericrocotus peregrinus (kunkumapitta), red powder worn by women on the forehead; Petrocossyphus cyaneus (podakaççipipitta), spot + quarrel; Ploceus baya (pasupupitta), yellow; Polyphasia nigra (chinnakátipitta), small + forest, hierococcyx varius; Pomatorrhinus horsfieldii (dásaripitta), veishnava mendicant, from stripes, and (námálapitta), stripe; Pratincola indica (adavikampapitta), jungle + bush; Scolopax gallinago (ullangipitta) lapwing, actitis genus; Strix javanica (tsávupitta), death; Tchitrea paradisi (tókapikilipitta), tail + pycnonotus hæmorhous; Tephrodornis pondiceriana (úlapitta), whistle; Turnix dussumierii (peddadábapitta), large + turnix genus; Upupa nigripennis (kondapitta), crest. See gloss. paragraphs.—"*b*" Plant first term, meaning small. Ex.:—Ehretia buxifolia (pittapisinika), bird satin wood; Ficus tomentosa (pittamarri), bird banyan. See gloss. paragraphs.

PITTAM (पित्त - pitta, *San.*). Gall or bile. The bile of the buffalo [khoolgah], wild boar [jungly soor], goat [velland]

peacock [mayil], and rohitacam [rohitam] fish are used in medicine, single or mixed, as laxatives, and chiefly in place of water to soak powders intended to be made into pills. Pittam is one of the three vital humours of the body [veidyan], and from it are derived forty human diseases. Such as the following:—drowsiness, constant singing and dancing, biting with the teeth like a dog, crying out and calling out as if in a great fury, pain over the whole body, constant drinking without being able to quench the thirst, decoloration of the face and body, an inclination to put everything into the mouth, constant chattering of nonsense, constant singing, red urine, constant sleepiness, &c. [veidyan]. Pittam is not infrequently a plant first term. Ex., where transl. is of second term:—Naregamia alata (pittamári), killer; Tinospora cordifolia (pittaghní), killer. See gloss. paragraphs.——*Pitpapra* (شاهترج - sháhtraj, Ar.; شاهترہ - sháhtrah, Pers.; پت پاپڑا - pitpáprá, Hind.; شاترا - shátrá, Dec.; ಕಾಡುಸಬ್ಬಸಿಗೆ - kádusabbasige, Can.; చాతరాశి - chátaráshi, Tel.; துரா - turá, Tam.). Title from hindostany. Ar. from persian. Pers. from (sháh, pers. king + tara, pers. garden herb). Hind. from (pit, hind. bile + páprá, hind. plant, gardenia latifolia, linn.). Dec. from persian. Can. from (kádu, can. jungle + sabbasige, can. peucedanum graveolens, benth.). Tam. from (tura, tam. to expel), medicinal. Ar. also (bakalatulmalik), meaning king of pot-herbs. Greek καπνὸς. Title otherwise Earth smoke, Fumiterre, Fumitory, King of herbs. Botanically Fumaria parviflora, lamk., fumariaceæ [vricsham, 9]. Alias Fumaria vaillantii. Annual; smooth; leaves linear, channelled; bracteas at first as long as the flower, afterwards as short as the fructiferous pedicel; petals four, the lower one distinct, linear, the three upper united, the middle one spurred downwards; sepals minute; fruit globose, slightly pointed; flowers very small, pale rose-colored, tipped with dark purple; generally found in paddy-fields. The whole plant except the root is medicinally alterative tonic, diaphoretic and febrifuge; the plant contains fumaric acid and fumarine; its physiological action is due to the latter. Decoction; take of the leaves and thin branches, three ounces; water one pint and-a-half; boil on a very slow fire till the liquid is reduced to one pint, and strain when cool. Dose, from two to three ounces, three times a day. Substituted for sassafras, jamaica sarsaparilla [sarsaparilla china root], guaiacum wood, mezereon root and pulv. jacobi vera. No other common species here.——*Pittalay* (पित्तल - pittala, San.; برنج - biranj, Pers.; پیتل - pítal, Hind.; پتل - pittal, Dec.; كنيڠن - kuníngan, Malay; ಹಿತ್ತಾಳೆ - hittále, Can.; పిత్తళే - pittale, Too.; ఇత్తడి - ittadi, Tel.; പിച്ചള - piççala, Mal.; பித்தளை - pittalai, Tam.). Title from tamul. San. from (pitta, san. bile); from increasing bile. Hind. and dec. from sanscrit. Malay from (kuning, malay, yellow). Tam. from sanscrit. Malay also (támbagakuning), meaning yellow copper; (loyang). Brass. Aurichalcum of chemists. Factitious metal, made of copper [taumram] and zinc [tootnaug]. Is in greater request than copper among the natives. Pittalay cumby is brass wire. Pittalay raikk is brass leaf. Pittalay saumaun is brass ware.

PITTAPORE (పిఠాపురము - pit'hápuramu, *Tel.*). From (pít'ha, san. throne seat + pura, san. town); as rajah's capital.——**(1)** Division, Godavery. Area 192 square miles. Zemindarry tract. Population 83,824. Language Teloogoo. E. coast of district. Bounded by:—N. Toony division and Peddapore talook, S. Cocanada division, E. Bay of Bengal, W. Peddapore talook. No mountains, traversed by Yelair. Black-cotton soil [regar]. Manufacture of bell metal [cunts] vessels. No commerce. Irrigation by Yelair and a few tanks. Camping grounds; Gollaprole, Dharmavaram. Zemindarries:—Gollaprole, Mullavaram, Pittapore. Principal trig. stations:—Gorasa, Iskapully, Vizianagram, Wontimauvidy beacon. The leading places, &c., in the division are the following.——*Ameenbaudah* (అమీనబాదా - amínbádá, Tel.). From (amin, hind. proper name + bárá, hind. locality). Zemindarry village; pop. 798; lat. of village 17° 05′; long. 82° 22′; from Cocanada N.N.E. 12 miles; from Pittapore E.S.E. 6 miles; from the sea W. 1½ miles. Peshcush Rs. 673.——*Condavaram* (కొండవరము - kondavaramu, Tel.). From (konda, tel. mountain + pura, san. town). Village; pop. 1,539; lat. 17° 06′; long. 82° 19′; from Cocanada N.N.E. 11 miles; from Coonavaram E.S.E. 74 miles; from Ellore E.N.E. 81 miles; from Madras N.N.E. 300 miles; from Narsapore N.E. 60 miles; from Pittapore E.S.E. 2 miles; from Rajahmundry E.N.E. 35 miles; from the sea W. 6 miles. Scene of a battle in December 1758 between English and French.——*Dharmavaram* (ధర్మవరము - dharmavaramu, Tel.). From (dharma, san. piety + pura, san. town). Zemindarry village; lat. of village 17° 14′; long. 82° 16′; from Cocanada N. 20 miles; from Pittapore N.N.W. 8 miles; from the sea W. 19 miles. Peshcush Rs. 2,402.——*Gollaprole* (గొల్లప్రోలు - gollaprólu, Tel.). From (golla, tel. shepherd caste + prólu, tel. town). Zemindarry village; pop. 5,381; lat. of village 17° 10′; long. 82° 20′; from Cocanada N.N.E. 15 miles; from Pittapore N.E. 4 miles; from the sea W. 8 miles. Peshcush Rs. 11,567. Encamping ground.——*Gorasa* (గోరస - gorasa, Tel.). Means hoof. Trig. station; lat. 17° 04′ 55·01″; long. 82° 19′ 32·71″; from Comauragherry N. 1⅞ miles.——*Iskapully* (ఇసుకపల్లె - isukapalle, Tel.). From (isuka, tel. sand + palle, tel. village). Trig. station; lat. 17° 07′ 36·15″; long. 82° 21′ 27·69″; from Naugoolapully W. 1½ miles.——*Mullavaram* (మల్లవరము - mallavaramu, Tel.). From (mallaya, tel. proper name + pura, san. town). Zemindarry village; pop. 1,320; lat. of village 17° 10′; long. 82° 23′; from Cocanada N.N.E. 18 miles: from Pittapore N.E. 7 miles; from the sea W. 6 miles. Peshcush Rs. 947.——*Naugoolapully* (నాగులపల్లి - nágulapalli, Tel.). From (nága, san. snake + palli, tel. village). Village; pop. 2,613; lat. 17° 07′; long. 82° 22′; from Cocanada N.N.E. 14 miles; from Pittapore E.N.E. 6 miles; from the sea W. 4 miles.——*Ooppauda* (ఉప్పాడ - uppáda, Tel.). From (uppu, tel. salt + váda, tel. village). Zemindarry village, Port; pop. 3,611; lat. of village 17° 04′; long. 82° 23′; from Cocanada N.N.E. 11 miles; from Madras N.N.E. 300 miles; from Pentacote S.W. 24 miles; from Pittapore E.S.E. 7 miles. Fine muslins [q.v.] are manufactured. Peshcush Rs. 673.——*Pittapore* (పిఠాపురము - pit'hápuramu, Tel.). See below.——*Vizianagram* (విజయనగరము - vijayanagaramu, Tel.). From (vijaya, san. victory + nagara, san. city). Trig. station; lat. 17° 11′ 53·64″; long. 82° 24′ 18·45″; from Mullavaram N. 3 miles.——*Wontimauvidy beacon* (ఒంటిమావిడి ontimávidi, Tel.). From (onti, tel. single + mávidi, tel. mango, mangifera indica, linn.). Trig. station; lat. 17° 12′ 00·00″; long. 82° 32′ 00·00″; from Tondangy S. 2 miles.——**(2)** Deputy tahsildarry, Godavery district. Pay Rs. 100.——**(3)** Zemindarry; Town, Head-quarters of Deputy tahsildar, and of the Pittapore zemindarry, Place of pilgrimage; Godavery dist., Pittapore division; pop. 13,731; lat. of town 17° 07′; long. 82° 17′; from Cocanada N. 12 miles; from Coonavaram E.S.E. 72 miles; from Ellore E.N.E. 78 miles; from Madras N.N.E. 312 miles; from Narsapore N.E. 59 miles; from Rajahmundry E.N.E. 32 miles; from the sea W. 8 miles. Peshcush Rs. 2,48,937. For an account of the zemindarry, see vol. I, 57. The town is the residence of the Rajah. Possesses sculptured buildings and other objects of interest. Inscription of A.D. 584. Booddhist [booddha] remains have been found.

PIT VIPER (رنگاری سانپ - rangarísámp, *Hind.*; ہرا سانپ - harásámp, *Dec.*; ನೇತ್ರಕನ್ನಡಿ - nétrakannáde, *Can.*; బొద్రుపాము - bodrupámu, *Tel.*; கண்குத்திப்பாம்பு - kanguttippámbu, *Tam.*). Title from the depression between eye and nostrils. Hind. from (rang, hind. color + árí, pers. bringing + sámp, hind. snake). Dec. from (hará, hind. green + sámp, hind. snake). Can. from (nétra, san. eye + kannádi, can. glass). Tel. from (boddu, tel. ledge + pámu, tel. snake). Tam. from (kan, tam. eye + kuttu, tam. to strike at + pámbu, tam. snake) [whip snake]. Terms co-extensive with family Crotalidæ, ophidii viperiformes, ophidia [sarpam], reptilia [sarpy, 29], of naturalists [jantoo]. The family of Crotalidæ or Pit vipers as represented in Southern india are not so dangerous as their American congeners, though all are venomous. They are distinguished by the pit or depression between the eye and the nostrils in the loreal region; the triangular broad head and the short thick body. The Halys is the only genus that has any vestige of the caudal appendage which has given to some of the American crotalidæ the name rattle-snake; and in this species it is reduced to a simple horny spine at the end of the tail. Many of the Pit vipers are arboreal snakes, and in color resemble the foliage or branches of the trees in which they live. There are four South indian genera:—Halys, Hypnale, Peltopelor, Trimeresurus. The following are the species, alphabetically arranged:—"*a*" Halys elliotti. Alias Trigonocephalus elliotti.—"*b*" Hypnale nepa. The Carawilla. Alias Coluber nepa; Cophias hypnale; Hypnale carawala; Trigonocephalus hypnale, zara [carawilla].—"*c*" Peltopelor macrolepis. Alias Trimeresurus macrolepis. Recognized by the very large scales with which the head and body are covered; uniform green; dark olive-green in adults; bright grass-green in young ones; yellow line along the outer series of scales; lower parts pale green.—"*d*" Trimeresurus anamallensis. Upper side of the head marbled with black in adults, uniform greenish in young; black or brown band from back edge of eye to angle of the mouth. Belly yellowish green, with numerous yellow and black spots along its side; tail black, with yellow and green spots. Tree snake; in general sluggish, not attempting to move out of the way, as they very closely resemble the branch on which they rest, frequently not perceived until they prepare to dart. The bite of large specimens is dangerous and has occasionally proved fatal. When roused these snakes are extremely fierce, striking at everything within their reach. Frogs [bhaicam], mammals [sastanam], and birds [pacshy] form their food.—"*e*" Trimeresurus gramineus. Alias Coluber gramineus; Trimeresurus elegans, viridis; Vipera gramineus, viridis. Grass-green above, lighter on the sides; tail sometimes cinnamon-red; yellow or brick-red line runs from behind the eye along the outer series of scales. Lower parts pale greenish. Common, hanging from branches of trees, or concealed under the dense foliage. It feeds on small birds and frogs.—"*f*" Trimeresurus strigatus. Alias Trigonocephalus neelgherriensis. Brown, with series of large irregular darker spots; horse shoe-like white marking on the neck, sometimes rather indistinct; lips yellowish; indistinct brown band from eye to side of neck; lower jaw with black spots; belly marbled with black; extremity of the tail white in young [viriyan].

PIY (పియ్యి - piyyi, *Tel.*; பீ - pí, *Tam.*). Dung. Plant first term often joining two genera; from smell. Ex., where transl. is of second term:—Acacia farnesiana (piyyitumma), acacia; Clerodendron inerme (pínárisangu), smelling + azima tetracantha; Daucus carota (pítikanda), amorphophallus campanulatus; Physalis minima (pínottánotiyan), physalis; Sterculia fœtida (pínárimaram), smelling + tree. See gloss. paragraphs.—— *Piy maram* (गोलदडा - góladadá, Mahr.; گلدار - guldár, Dec.; ಕಾವಿಲಿಮರ - kávilimara, Can.; രമണപ്പൂ - ramanappú, Mal.; பீமரம் - pímaram, Tam.). Title from tamul. Mahr. from hindostany. Dec. from (gul, pers. flower + dár, pers. holder), meaning spotted; on the bombay ghauts. Mal. from (ramana, san. delighting + pú, mal. flower). Tam. from (pí, tam. dung + maram, tam. tree). Tam. also (kamille); (kávilli), from canarese; used by kadar [q.v.] on the anamullays. Title otherwise Dung tree. Botanically Sterculia [cauvalam] guttata, roxb., sterculiaceæ [vricsham, 26]. Tree, 70 feet; leaves between broadly and oblong ovate, entire, obtuse, or with sudden acumination, prominently nerved and veined beneath; young leaves densely pubescent; racemes somewhat fascicled; pedicels short; calyx deeply five-cleft, tomentose; segments lanceolate, distinct; flowers yellow; flowering in december. Bright red capsules, very common; root is aromatic. Bark yields cordage [naur]; that of the young parts made into a kind of clothing on w. coast; for which purpose taken off in strips, beaten, washed, and dried in the sun. Timber not used.

PIYAUZ (पलाण्डु - palándu, *San.*; कांदा - kándá, *Mahr.*; पियावु - piyávu, *Conc.*; بصل - basl, *Ar.*; پیاز - piyáz, *Pers.*, *Hind.* and *Dec.*; بونگ میرا - buvangmerah, *Malay*; ಈರುಳ್ಳಿ - írulli, *Can.*; ನೀರುಳ್ಳಿ - nírulli, *Too.*; ఎఱ్ఱగడ్డ - erragadda, *Tel.*; ପିୟାଜ - píyájó, *Oor.*; ചുവന്നുള്ളി - chuvannulli, *Mal.*; ලූනු - lúnu, *Singh.*; வெங்காயம் - vengáyam, *Tam.*). Title from hindostany. San. from (pala, san. flesh + anda, san. ball). Mahr. from (kanda, san. bulbous root). Malay from (bavang, malay, an onion + merah, malay, red). Can. from tamul. Too. from (níru, too. water + ulli, too. garlic). Tel. from (erra, tel. red + gadda, tel. root). Mal. from (chuvanna, mal. red + ulli, mal. onion). Tam. from (ven, tam. white + káyam, tam. pungency). San. also (ugragandha), meaning strong smelling [vashamboo]; (ugranámá), meaning named oogra; (latárka), meaning creeper + shining, is green onion; (sukandaka), meaning having good root. Dec. also (piyáj). Malay also (bavang); (brambang). Can. also (nírulli); (ulligadde). Tel. also (ulli), meaning mean; (nírulli), meaning water + onion; (tellaulli), meaning white + onion; (erraulli), meaning red + onion. Mal. also (venkáyam); (írulli), moist onion. Tam. also (írulli), meaning moisture + garlic, allium sativum, linn.; (íravengáyam), meaning moisture + onion. Greek κρόμμυον. Latin cepa. Title otherwise Onion, Water garlic. Botanically Allium cepa, linn., liliaceæ [vricsham, 136]. Alias Allium esculentum; Cepa vulgaris; Porrum cepa. Biennial, bulbous-rooted plant, with a swelling stem, leafy at the base, tapering fistular leaves, a reflex spathe, a large globose umbel, usually not bulbiferous; lobes of the perianth obtuse and hooded, not half as long as the stamens; bulb simple, not made of cloves as in garlic [lussoon], and in common variety solitary; flowers, small, white or greenish, purplish-white with a green keel. Cultivated in black loam, or sandy soil, dry; in south in chittray [mausam] or april for caur [q.v.] crop and in arpisy or october for pishaunam [q.v.] crop; on coromandel in caurteecam or november and margashiram or december; ground divided into small squares with banks; bulbs of the previous year preserved as seed have sprouts at this season and are dibbled in in rows and hand watered, manure [yeroo] is used; from each bulb a tuft of grass-like blades grows to nearly a foot; when crop is full grown upper part is dry while lower part still green; dug up after three months; the plant is stripped from the bulbs and the latter aired on ground; ready at once for market; average price 48 imperial seers for one rupee. As medicine, stimulant, diuretic and expectorant; in veterinary practice is a good cooling diet with tyre [q.v.] and boiled rice [q.v.]. As food, produce flatulency and occasion thirst; mussalmans [q.v.] never cook curry [q.v.] without onions; bramins [q.v.] do not eat them regarding as similar to mutton. Bombay onions are large and mild. The leek is Allium porrum, linn.; very scarcely cultivated here. Garlic is Allium sativum, linn. [lussoon]. Compare also:—Urginía indica (káttulli), jungle onion; Crinum revolutum (narivengáyam), fox onion; see gloss. paragraphs.

PLANTAIN (कदली - kadalí, *San.*; केळ - kéla, *Mahr.*; केळि - kéli, *Conc.*; شجرةالموز - shajaratulmauz, *Ar.*; درخت موز - darakhtimauz, *Pers.*; کیلے کا پیڑ - kelekáper, *Hind.*; موز کا جھاڑ - mauzkájhár, *Dec.*; پسنگ - pisang, *Malay*; ಬಾಳೆ - bále, *Can.*; ಬಾರೆ - báre, *Too.*; అరటి - arati, *Tel.*; କଦଳୀ - kodilo, *Oor.*; വാഴ - vázha, *Mal.*; කෙසෙල් - kehel, *Singh.*; வாழை - vázhai, *Tam.*). Title from the latin plantago through portuguese. San. from (ka, san. water + dala, san. leaf); from watery sheaths of the stem. Mahr. and conc. from sanscrit. Ar. from (shajar, ar. tree + mauz, ar. plantain). Pers. from (darakht, pers. tree + mauz, pers. plantain). Hind. from (kadalí, san. the plant + per, hind. tree). Dec. from (mauz, ar. plantain + jhár, hind. tree). Oor. from sanscrit. Mal. from tamul. Tam. from (vázh, tam. to prosper); regarded as an emblem of fertility and prosperity. San. also (rambhá), meaning delightening; (vanalakshmí), meaning forest lutchmy; (dírghapatrá), meaning long-leaved [penarvully, poison nut]; (vrishapushpá), meaning sprinkling flower, perhaps from flowers shedding water; (bálakapriyá), meaning child favorite [bair]; (bhánup'halá), meaning having fruits radiating from stem like sun-rays; (guchhadantiká), meaning cluster of flowers + tooth; (guchhap'halá), meaning bunch of fruits; (hastivishání), meaning elephant's tusk, fruits likened to it; (sukumárá), meaning beautiful; (sup'halá), meaning good fruit; (sakritp'halá), meaning bearing fruit once; (kásht'hílá), meaning having small seed; (alabú); (móchá), meaning abandoning, from the falling off of sheaths; (úrustambhá), meaning thigh + pillar; (rájéshta), meaning king beloved; (amshumatp'halá), meaning sun fruit; (vanabhúshá), meaning forest ornament. Ar. also (talh), meaning plantain tree. Hind. also (rámkelá), meaning rama's plantain. Malay also (banana). Tel. also (tatachhadamu); (anati); (ananti); (anti); (bontarati), meaning large + the tree; (kommarati), meaning horn + the tree; (chakrakélíarati), meaning sugar or sweet plantain; (nallaarati), meaning black + plantain tree. Singh. also (kesel); (ánavālu); (ratukehal), meaning red plantain. Tam. also (arambai); (arésigam), meaning not purgative; (púvanvázhai), meaning flower + plantain; (námavázhai), meaning striped plantain. Title otherwise Adam's fig, Banana, Fig of india, Fig of paradise, Forbidden fruit, Pisang, Vauzhay. Has been thought by some to be the tree of life of the garden of eden; and by others, who distinguish between the two, the tree of knowledge of good and evil. The grape [angoor], shaddock [pummelow], cherry [q.v.], apple [seb], and many other fruits [pazham], have also been thought to be the forbidden fruit [q.v.]. Some say it was this tree from whose leaves adam and eve made themselves aprons. Botanically Musa paradisiaca, linn., musaceæ [vricsham, 142]. Alias Musa cliffortiana, mensaria, sapientum. Musa from arabic, meaning taste. Herbaceous; stem simple, thickly clothed with the sheathing petioles of the leaves; leaves forming a tuft on the apex of the stem; spike of flowers compound, rising from the apex of the stem, each division enclosed in a large spathe with male flowers at the base, female or hermaphrodite ones at the upper end; perianth with six superior divisions, five of which are grown together into a tube, slit at the back, the sixth is small and concave; style short; fruit oblong, fleshy, obscurely three to five-cornered, with numerous seeds buried in pulp; flowers yellowish whitish. The long, vertical, sheathing leaf-stalks overlap one another, forming soft stems, 4–15 or more feet high; from the top of the sheath broad leaves expand 6–10 feet in length; fruit is produced in a large bunch from the top of the sheathing stem; a bunch of plantains may contain as many as a hundred fruits, each bunch from 4–9 inches long and 3–5 inches in circumference; fruit itself is about six inches long, ripens of a pale straw color, and is not fit to be eaten till it can be removed from the bunch without the slightest effort; the fruit gives 37 per cent. of dry matter; the composition of the ash of the plantain bears a close resemblance to that of potato [q.v.]; both contain much alkaline matter [cauram], potash [jharka namak] and soda [munn cauram] salts; and there is nearly the same percentage of phosphoric acid and magnesia [caunta munn]. Original habitat probably the valley of the euphrates; more easily cultivated and more prolific than even the potato [q.v.]; cultivated nearer coast than inland, in garden soil rich in decayed vegetable matter; ground prepared in south in chittray [mausam] or april, on coromandel in cheitram or april and veishaukham or may, on w. coast in toolaum or october, vrishchicam or november and dhanoo or december; first the ground is ploughed four or five times, then hand-hoed two or three times; manure [yeroo] then applied; tubers put down in south in audy or july, on coromandel in veishaukham or may, on w. coast in vrishchicam or november, dhanoo or december, and macaram or january; tubers are deposited in pits exposing only about 3–4 inches above ground; while under growth land is watered once in ten days, and plants pruned; heaps of mud are raised against stem to serve as a prop; green leaves, ashes, and dried cowdung applied as manure [yeroo]; in full-grown crop, leaves become yellow; ripe fruits in a bunch bend downwards from the top; ten months after sowing the leaves and fruits are cut with knives close to the stem; the fruits are placed in pots filled with margosa [neem] or other leaves and allowed to remain so for three or four days; then they become ripe; brought to market as soon as ripe. Tender leaves used medicinally for dressing blistered surfaces; fresh plantain leaf forms shade for eyes in ophthalmia; unripe fruit cooling and astringent, useful in diabetes; juice of unripe fruit and lymph of stamens are slightly astringent; powdered and dried leaf stop bleeding in nose; root is anthelmintic; sap of fresh stem allays thirst in cholera; leaves quoted in pharm. non-officinal. The fruit contains every element of animal food mixed with fragrant principles; almost the only tropical fruit without stone or core of any sort, and which can be eaten unaided by any instrument without inconvenience; it may well have been the primæval food of man; in green state, sliced and

made into curry [q.v.], when it eats not unlike potatoes [q.v.]; the ripe fruit is served either raw, stewed or fried; sometimes roasted in ashes and used as bread; vinegar [caudy] is manufactured from it; the preserved fruit, which resembles dried figs [atty], is a nourishing and antiscorbutic article of diet for long voyages; in this state it will keep for a long time; a meal is prepared from the fruit by stripping off the skins, slicing the core, and, when thoroughly dried in the sun, powdering and sifting it; plantain meal is more digestive and strengthening than arrowroot [malabar arrowroot], and thus more suitable for children and invalids; its flavor is also preferable; mahomedans eat it with milk [q.v.] and sugar [q.v.]; the natives also use the extremities of the flower shoots, the heart of the stem, and that portion of it from which the roots proceed in their curries. The stems laden with branches of fruit are invariably placed at the entrance of houses during marriage or other festivals as emblematic of plenty and fruitfulness; stem yields a fine white silky fibre [naur] of considerable length, lighter than hemp [kinnab], flax [alsee] and aloe [q.v.] fibre, by one-fourth or one-fifth and possessing considerable strength; the outer layers of the sheathing foot-stalks yield the thickest and strongest fibres; some tough kinds of paper [caugaz] have been made from the fibres; the leaves form a substitute for platters; skins are used by chucklers [q.v.] in dyeing [shauyam] leather [chamrah] black; ashes used as mordant [caunam]. Many varieties of fruit, differing in size and shape. The kind popularly known as the guindy plantain, poovauzhay in tamul, is considered the best, and is round, small sized, with a very thin rind, luscious, sweet, and of a most delicate flavor; a good bunch may contain over a thousand fruits; this kind is used entirely as a table fruit, being considered too valuable for cooking purposes. The rustauly is the sort generally sold as table plantains, though not of such good quality as the former. A large plantain, known in tamul as mondan is one of the commonest cooking fruits of the presidency. The cadaly, cultivated in the Tinnevelly and Malabar districts, is considered sacred and used chiefly as offerings to the gods. East indian plantains and West indian bananas are mere varieties of the same plant; the banana tree is marked with purple spots, fruit shorter and rounder, softer pulp, more delicate taste. There is a Tamul proverb:—வாழ்கிற வீட்டுக்கு வாழைவைத்துப் பார்—"ascertain the future of a family by putting down "plantain trees;" it is said that plantains naturally put forth their bunches to the north; should the fruit appear otherwise, it is considered ominous to the homestead. And another:—வாழைக்குக்கொத்து வழுதலைக்குத்தண்ணீர்—"the hoe "for plantain and water for brinjaul." There is a Teloogoo proverb:—వంకాయరుచి తోటవాడెరుగును, అరటిపాయరుచి రాజెరుగును—"the gardener knows the taste of brinjaul, the king "knows the taste of plantain;" brinjauls [q.v.] should be cooked and eaten fresh from the garden; plantains when used in an unripe state as vegetable, should be kept a few days. And another:—జ్ఞాతిగోడు అరటికఱువదలవు—"the stain of plantain, "the grumbling of cousins, never cease."——*Demon plantain* (रानकेळी - ránakelí, Mahr.; پسنگوتن - pisangutan, Malay; பேயன்வாழை - péyanvázhai, Tam.). Title from tamul. Mahr. from (rána, mahr. wild + kélí, mahr. plantain, musa paradisiaca, linn.). Malay means wild plantain. Tam. from (péy, tam. wild + vázhai, tam. plantain), from habitat and resemblance. Malay also (koffo). Title otherwise Manilla hemp. Botanically Musa textilis, nees., musaceæ [vricsham, 142]. Introduced; fibre [naur] lately much employed for cordage of various kinds.——*Liquorice plantain* (குன்றிமணிச்செடி - kunrimaniççedi, Tam.). Title from seed. Same as Indian shot. ——*Stone plantain* (கல்வாழை - kalvázhai, Tam.). Same as Wild plantain.——*Wild plantain* (राणकेळ - ránakéla, Mahr.; रानकेलि - ránakéli, Conc.; ಕಾಡುಬಾಳೆ - kádubále, Can.; ಕಲ್ಲುಬಾರೆ - kallubáre, Too.; అడవిఅరటి - adaviarati, Tel.; കല്ലുവാഴ - kalluvázha, Mal.; கல்வாழை - kalvázhai, Tam.). Title from habitat. Mahr. from (rána, mahr. wild + kéla, mahr. plantain tree, musa paradisiaca, linn.). Conc. from mahratta. Can. from (kádu, can. wild + bále, can. plantain). Too. from (kallu, too. stone + báre, can. plantain). Tel. from (adavi, tel. forest + arati, tel. plantain tree). Mal. from (kal, mal. stone + vázha, mal. plantain), from small stone-like seeds imbedded in pulp. Tam. from (kal, tam. stone + vázhai, tam. plantain). Mal. also (káttuvázha), meaning wild plantain. Tam. also (káttuvázhai), meaning forest + plantain. Title otherwise Stone plantain. Botanically Musa superba, roxb., musaceæ [vricsham, 142]. Stem short, conical, thickly covered with the spongy petioles of decayed not sheathing leaves; leaves petioled, linear, rounded at both ends, cuspidate; spadix drooping; spathes broad, oblong, obtuse, sub-cordate at the base, many-flowered, hermaphrodite ones persistent; gives fibre [naur].

PLAUTCHY (பிலாச்சை - piláççai, *Tam.*). From (plava, san. frog + matsya, san. fish), frog fish; from ugly appearance. Title otherwise Coffer fish, Trunk fish. The genus Ostracion, sclerodermi, plectognathi, teleostei, pisces [matsyam, 44], of naturalists [jantoo]. The species best known to the natives are Bony plautchy, Bull plautchy. Cf. also Prickly plautchy, which is another genus.——*Bony plautchy* (கற்பிலாச்சை - karbiláççai, Tam.). Title from bony plates on back. Tam. from (kal, tam. stone + piláççai, tam. sea frog, ostracion genus). Ostracion [plautchy] turritus, sclerodermi, plectognathi, teleostei [matsyam, 44], of naturalists. Alias Chameau marin; Lactophrys camelinus; Ostracion dromadaire, gibbosus; Tetrosomus turritus. Body about as wide as high, being of a triangular shape, the apex being above. Olive brown, with three badly marked dark bands in the lower one-third of the body, and a fourth just behind the base of the dorsal fin. A light blue spot in the centre of each scute. Fins straw-colored, the caudal with two dark vertical bands, one at its base, the other at its outer extremity. The young have several dark blotches and bands over various parts of the body, and a ridge extends from the orbit to the upper part of the bridge over the tail. Sea; at least 9 inches.——*Bull plautchy* (மாட்டுப்பிலாச்சை - máttuppiláççai, Tam.). Title from appearance of head. Tam. from (mádu, tam. bull or cow + piláççai, tam. ostracion genus). Title otherwise Coffer fish, Thorned trunk fish. Ostracion [plautchy] cornutus, sclerodermi, plectognathi, teleostei [matsyam, 44], of naturalists. Alias Lactophris cornutus; Ostracion arcus, valentini; Ostracium cornutum. Colors carapace of a light brown, with round blue spots all over it in moderate numbers, about one on each scute, some, however, being destitute of any. Caudal blue spotted. Sea.——*Prickly plautchy* (முள்ளம்பிலாச்சை - mullambiláççai, Tam.). Title from erectile spines. Tam. from (mul, tam. thorn + piláççai, tam. sea frog, ostracion genus). Title otherwise Globe fish, Prickly globe fish, Sea-hedge hog, Urchin fish. Diodon hystrix, gymnodontes, plectognathi, teleostei [matsyam, 45], of naturalists [jantoo]. Alias Diodon atringa, brachiatus, plumieri, punctatus; Holocanthus hystrix; Hystrix piscis; Paradiodon hystrix; Reversus indicus. Body covered with coarse spines, which are longest on the sides of the body behind the pectoral fin; they are dilated at their bases. The whole of the fish except the ventral surface of a light brown covered with round blue or brown spots, rarely above one to the base of a single spine. The fins similarly spotted. Sea; attains a large size. Diodon pilosus is hairy urchin fish.

PO (போ - pó, *Tam.*). To go.——*Poke* (പോക്ക - pókku, Mal.; போக்கு - pókku, Tam.). From (pó, mal. to go). Going; way [caday poke, poramboke].——*Pokevaravoo* (പോക്കുവരവു - pókkuvaravu, Mal.). From (pókku, tam. going + varavu, mal. coming). Transfer of registry of lands.——*Pokkachit* (പുക്കശീട്ടു - pukkashíttu, Mal.). From (pukku, mal. to receive + shíttu, mal. note). A receipt.

PODE (పోడు - pódu, *Tel.*). Bushy land.——*Podalacore* (పొదలకూరు - podalakúru, Tel.). From (poda, tel. bush + úru, tel. village). Village; Nellore dist., Raupore tal.; pop. 1,795; acres 9,089; lat. 14° 24′; long. 79° 36′; from Nellore W.S.W. 17 miles; from Raupore N.E. 18 miles. Here five roads from Raupore, Manoobole, Nellore, Somashila, and Sangam meet. Ancient temple dedicated to Ganesh [q.v.]. Annual festival in February. Walls of the old fort may be traced by mounds of earth. Has large tank. Paddy [q.v.] cultivation. The greater part of the population are weavers who manufacture roomauls [q.v.] and cloths.——*Pode caud* (போடுகாடு - pódugádu, Tam.). Nomadic cultivation [cautcaud, coomry, ponacaud].——*Podily* (పొదిలె - podile, Tel.). See sep. title.

PODILY (పొదిలె - podile, *Tel.* podili *). From (poda, tel. bush) [pode]. Sanscrit name (prit'hulápurí), meaning pritoola, the village goddess + town.——**(1)** Zemindarry, Deputy tahsildar's division, Nellore; pay Rs. 120. The Podily division consists of hundred and twenty-three villages, all Vencatagherry zemindarry, of which eighty-six village belong to Podily zemindarry talook, and thirty-seven to Cotcherlacote zemindarry talook. N. inland part of district. It is bounded on north by Darshy division, on south by Canigherry talook, on west by Cumbum and Marcapore talooks of Kurnool district, and on east by Ongole talook. The country is generally hilly and dry. In some villages pots [chatty] are made and rough cloths are woven. Trade in grain, ghee [q.v.] and rough cloths to a limited extent. Money is laid out on interest. The people are generally uneducated. Bellary-Kistna railway passes through north of the division. There are stations at Royavaram and Toorlapaud. Places of archæological interest:—Badgoolair, Boodamacauyalpaud, Caljoovvalpaud, Coonchepulley, Dondlair, Eegalpaud, Gaurladinney, Goorraulmadoogoo, Kellampully, Mungalacoontla, Paumoolpaud, Pauta gaurlapett, Pedda auricutla, Podily, Ramlaveed, Tarloopaud, Vaugimadoogoo, Vedraulpaud. The leading places, &c., in the division are the following. ——*Coochipoody* (కూచిపూడి - kúchipúdi, Tel.). From (kúchi, tel. long + púdi, tel. village). Village; pop. 916; lat. 15° 28′; long. 79° 42′; from Nellore N.N.W. 73 miles; from Ongole W.S.W. 26 miles; from Podily S.S.E. 10 miles. To the west, at about 1½ miles, is a hill called Andhracondah, on which is a small temple of Andhra rameshwara sawmy. The stone from the hill is made into wheels, mortars and pillars and sold in neighbouring villages.——*Eegalpaud* (ఈగలపాడు - ígalapádu, Tel.). From (íga, tel. fly + pádu, tel. village). Village; lat. 15° 44′; long. 79° 38′;

from Nellore N.N.W. 91 miles; from Ongole W.N.W. 39 miles; from Podily N.N.W. 9 miles. Inscription of A.D. 1523. ——*Gaurladinney* (గారెలదిన్నె - gáreladinne, Tel.). From (gáre, tel. bramble + dinne, tel. a mound). Zemindarry, Village; pop. 736; lat. 15° 39′; long. 79° 26′; from Nellore N.W. 91 miles; from Ongole W.N.W. 45 miles; from Podily W. 16 miles. On the Veligonda hill in this village is a temple of Shree veligonda roya sawmy, where an annual festival in the month of Phaulgoonam [mausam] or march takes place. On bank of Mooshy.——*Mooshy* (ముశి - mushi, Tel.). See sep. title. ——*Nimmavaram* (నిమ్మవరము - nimmavarmu, Tel.). From (nimma, tel. lime tree, citrus medica, linn., var. limonum, brandis + pura, san. town). Village; pop. 375; lat. 15° 37′; long. 79° 42′; from Nellore N.N.W. 83 miles; from Ongole W.N.W. 27 miles; from Podily E.N.E. 3 miles. Mats [boriyah] made by people called Pitchoogoonties [q.v.].——*Paumoolpaud* (పాములపాడు - pámulapádu, Tel.). From (pámu, tel. snake + pádu, tel. village). Village; lat. 15° 43′; long. 79° 41′; from Nellore N.N.W. 90 miles; from Ongole W.N.W. 31 miles; from Podily N. 8 miles. Inscription of A.D. 1551. ——*Pedda auricutla* (పెద్దఅరికట్ల - peddaárikatla, Tel.). From (pedda, tel. large + árikatlu, tel. obstacle). Village; pop. 2,070; lat. 15° 31′; long. 79° 34′; from Nellore N.N.W. 79 miles; from Ongole W. 34 miles; from Podily S.S.W. 8 miles. Old temple built by Janamejayan.——*Podily* (పొదిలె - podile, Tel.). See below.——(2) Village, Head-quarters of Deputy tahsildar and Ex-officio Sub-registrar; Nellore dist., Podily division; pop. 4,412; lat. 15° 36′; long. 79° 39′; from Madras N.N.W. 176 miles; from Naidoopett N. 116 miles; from Nellore N.N.W. 81 miles; from Ongole W.N.W. 29 miles. Chief village of one of the northern divisions of Vencatagherry zemindarry. Festival of Nirmaleshwarasawmy celebrated on Shivarautry [pundigay, 6a] in Maugham [mausam] or February. Lies on trunk road from Ongole to Cumbum. Connected by road with Darshy and Canigherry. At 6 miles to the south is Podily hill, on which is a temple of Lutchmy narsimhasawmy. The idol [shilay, vigraham] is worshipped every Saturday, and an annual marriage festival takes place there in Phaulgoonam [mausam] or March. Podily is head-quarters of a zemindarry [q.v.] tahsildar [q.v.]. Two tanks [q.v.]. Principal crops are paddy [q.v.], sadza [bajrah], zonna [cholum], oil seeds [yennay], cotton [q.v.], corra [tinay], aroogoo [varagoo], and green gram [q.v.]. The soil is stony, here and there brackish [calar, sowdoo]. There are modas [q.v.] on which saltpetre [shorah] is annually manufactured in the dry season. The climate is good.

PODWAUL (പൊതുവാൾ - potuvál, sing.; പൊതുവാന്മാർ - potuvánmár, pl., *Mal.*). From (potu, mal. common + ál, mal. man). Half bramins [ambalavausy] in Malabar [jauty]. For Agapodwaul, the sub-division, see sep. title.

POGADA (పొగడ - pogada, *Tel.*). From (pravála, san. coral); applied to tree from coral-like fruit. Gum of mimusops elengi, linn. [ilanjy].

POGAUK (ताम्रकूट - támrakúta, *San.*; तंबाखू - tambákhú, *Mahr.*; धुरापान - dhurápána, *Conc.*; تنباك - tambák, *Ar.*; تنباكو - tambákú, *Pers.* and *Hind.*; تماكو - tamákú, *Dec.*; تمبكو - tambaku, *Malay*; ಹೊಗೆಸೊಪ್ಪು - hogésoppu, *Can.*; ಪುಗೆರೆ - pugere, *Too.*; పొగాకు - pogáku, *Tel.*; ଧୂମ - dhúma, *Oor.*; പുകയില - pukayila, *Mal.*; දුංකොළ - dunkola, *Singh.*; புகையிலை - pugaiyilai, *Tam.*). Title from teloogoo, means smoke leaf [pogay]. San. from (támra, san. copper color + kúta, san. head), appears to be sanscritized form of tobacco. Mahr. from hindostany. Ar., Pers., Hind., Dec. from sanscrit. Can. from (hoge, can. smoke + soppu, can. leaf). Too. from tamul. Tel. from (poga, tel. smoke + áku, tel. leaf). Mal. from tamul. Tam. from (pugai, tam. smoke + ilai, tam. leaf); from use of leaf. San. also (dhúmrapatra), meaning having black-red leaves; (dhúmapatra), meaning smoke-leaf. Hind. also (bajjarbhang), meaning slow + bhang. Can. also (hogetoppalu), meaning smoke + leaf. Mal. also (pukala), by corruption; (kalañjam). Title otherwise Slow bhang, Smoke-leaf, Tobacco. The native american name for the herb is Cohiba; for the burning brand, Tabaco. The older writers, when alluding to the plant, generally used the word Petun, the indian name in common use in brazil, mexico, and florida; from this word is derived the name of a plant of the same order as tobacco, the Petunia. Nicot, ambassador at the portuguese court to catherine de'medici and the grand prior of france, caused the plant to be scientifically examined and described, and nicotiana is the scientific name now universally applied. Botanically Nicotiana tabacum, linn., solanaceæ [vricsham, 94]. Herbaceous, pubescent, glutinous, stem erect, tapering, branched above; leaves oblong-lanceolate, acuminate, sessile, lower ones decurrent, half stem-clasping; flowers pedicelled, bracteate; segments of the oblong calyx lanceolate, acute, unequal; corolla outwardly downy, throat somewhat inflated, segments of the much-spreading limb acute; capsule the length of the calyx, or slightly longer. Native of america, cultivated; root long and fibrous, stem 4–6 feet high, erect; leaves very large, pale green; flowers panicled; delicately pink flowers; recent leaves possess very little odour or taste; when well cured, they are of a yellowish green color; the dried leaves are narcotic; the active principle is nicotine, which is present in quantity varying from 1·5 to 8 per cent. Attempts have been made of late years to introduce foreign species, but defects do not lie in the plant, so much as in the curing of the leaf; the plant was originally introduced into india about the end of the sixteenth century in the reign of jehaungeer or his predecessor; it is possible that it may have been introduced from the new world by the portuguese. The soils most suitable for cultivation, generally speaking, are alluvial lands [adaimunn, vandalmunn], black loam, deserted village sites and backyards of houses; in the south for the first cultivation which begins in arpisy [mausam] or october and caurtigay or november, the ground is prepared during the months of auvany or august and poorataushy or september, and for the second cultivation which commences in the month of tye or january, the ground is prepared in the month of caurtigay or november and the early part of maurgaly or december; on coromandel the ground is prepared in aushweejam or october and caurteecam or november; on w. coast in chingom or august; the ground is well ploughed up and richly manured; seed sown in south for the first cultivation in latter part of auvany or august and in poorataushy or september and for the second cultivation in arpisy or october and in the beginning of caurtigay or november, on coromandel first sown in nursery in aushweejam or october and caurteecam or november and transplantation takes place two months after sowing, on w. coast sown in the end of mitoonam or june; sown in nursery in all cases; the seed germinates on the seventh or eighth day after sowing; till transplanted, watered on every alternate day; every exertion is made to remove the weeds; in sixty days transplanted out; then watered once in every third or fourth day till cut; when plants are 2 feet high they are topped and trimmed; flowers are nipped except of those left for seed; maturity indicated by golden color on stems and by ends of leaves becoming red and dried up; when the plants become ripe, the average size of the leaf is 25–30 inches in length and 5–7 inches in breadth; cut three or four months after transplantation; the whole plant is cut with a knife just a little above the root then gathered and stacked; the next day the ground is spread over with palmyra [q.v.] leaves and straw of varagoo [q.v.] or panicum miliaceum, linn.; on this the plants are stacked and covered with straw and palm leaves [olay], and pressed with stones for five or six days, when the weights, straw, &c., are removed, and the tobacco plants are taken up and hung in the shade by their stalks till the stalks become dry when they are placed in a small close room and covered as before with palm-leaves and straw, and pressed down by weights; the leaves are stripped off the stalks and tied into bundles; these are again stacked in bundles, and have weights placed over them, after being covered with straw, &c.; the bundles are re-arranged once in three or four days for some two or three weeks, when the tobacco is considered cured and fit for use, and is removed. When the tobacco stalks have been cut down, the stumps left in the soil soon throw out fresh shoots; the tobacco from the second crop is greatly inferior to the first in quantity and quality. The plants throughout their growth are subject to attacks from insects of the caterpillar [cumbly poochy] kind. Tobacco is chiefly grown now in the alluvial soils of the godavery, trichinopoly and madura districts; the trichinopoly and madura or dindigul tobaccos are very much alike both in appearance and quality, but the lunka [q.v.] tobacco grown in delta [conamoogam] of the godavery differs materially from both; as a rule, the trichinopoly and dindigul leaf has a stronger taste and flavor than the lunka, but the latter, although tasting milder, have a more marked effect on the nervous system and contain more nicotine. A cigar is the roll pointed at the extremities; a cheroot [q.v.] is the roll truncated; snuffs [naus] are preparations of the leaf powdered and fermented dry or moist. Plant gives to pharm. dried leaves, tabaci folia, powerful sedative and antispasmodic, in over-doses an acronarcotic poison; preparation, enema tabaci, officinal; veidyans [q.v.] use tobacco to excite vomiting; in veterinary practice tobacco smoke injected for flatulent colic. Tobacco smoked, acts as a sedative, soothing nervous irritability and allaying appetite for food [mookhadiraut]; in excess it weakens the heart's action, produces nervous tremors and impairs vision; by the multitude of the working and poorer classes it is chewed in the form of leaf, or smoked in the shape of a small coarsely made cheroot; many of the better classes also smoke or chew tobacco, while men of sedentary habits, engaged in office work, consume brown snuff, of which the best quality is made from godavery tobacco in masulipatam. From seed is expressed a clear, limpid, colorless oil, used in painting [rangh]. Cauda tobacco, from (káda, tel. stalk), or (kámbu, tam. stalk) is tobacco with a part of its stem. Corvay tobacco, from (kórva, tel. series), or (kovai, tam. anything strung), is tobacco strung on a line.——*Wild pogauk* (देवनळ - dévanala, Mahr.; काडधुरापान - kádadhurápána, Conc.; ಕಾಡಹೊಗೆಸೊಪ್ಪುಗಿಡ - kádahogesoppugida, Can.; ಕಾಟುಪುಗೆರಿ - kátupugeri, Too.; అడవిపొగాకు - adavipogáku, Tel.; കാട്ടുപുകയില - káttupukayila, Mal.; රස්නි - rasni, Singh.; காட்டுப்புகையிலை - káttuppugaiyilai, Tam.). Mahr. from (déva, san. god + nala, mahr. reed). The rest mean wild tobacco, nicotiana tabacum, linn. Title otherwise Wild tobacco. Botanically Lobelia nicotianæfolia, heyn., campanulaceæ

[vricsham, 76]. Alias Rapuntium nicotianæfolium. Stem erect; leaves subsessile, oblong, lanceolate, denticulate, narrowed at the base, acuminated; racemes many-flowered; bracts leafy; pedicels slightly longer than the bract, bi-bracteolate in the middle; sepals lanceolate serrated; corolla pubescent, lateral lobes long-linear, centre ones lanceolate; two lower anthers penicillate at the apex; flowers purple. The leaves resemble those of the tobacco; they are finally serrated and covered with simple hairs; the lower part of the stem is woody, an inch and-a-half or more in diameter, and almost solid; the upper portion is a hollow tube ending in a crowded head of flower spikes; the latter are about a foot in length, and when the plant is in fruit, are thickly set with globular capsules about the size of a pea [calauyam], to which a portion of the dry flower is often adherent; the capsules are two-celled, each cell containing a fleshy placenta; the seeds are numerous and very small, one-fiftieth of an inch in length, oval, flattened, of a light brown color, and marked with delicate lines; several small tubercles surround the site of the placental attachment; the whole plant when dry is studded with small spots of resinous exudation, and is hot and acrid to the taste; the leaves and aërial parts of the fresh plant exude a white latex when broken. Dry herb, when handled extremely acrid, dust irritating the throat and nostrils like tobacco; infusion of leaves is antispasmodic; quoted in pharm., but not officinal. There is also the species Inflata. Laggera aurita, schultz., is sometimes also called Wild tobacco.

POGAY (புகை - pugai, *Tam.*). From (pugu, tam. to penetrate). Smoke, the sign of Agny the regent of the south [ashtadic]. Pogay chooroot is a cigar roll, see Cheroot. Pogay coodoo is a chimney or a balloon [dhoomam, dhoopam].——*Pogaivary* (புகைவரி - pugavari, Tam.). From (above + vari, tam. tax). Tax on houses.——*Pogauk* (పొగాకు - pogáku, Tel.). See sep. title.

POINT GODAVERY (గోదావరిమొన - gódávarimona, *Tel.*). Greek καλλιγικὸν ἄκρον. Point; Godavery dist., Amalaupooram tal.; lat. 16° 46′; long. 82° 23′; from Amalaupooram N.E. 26 miles; from Cocanada S.S.E. 15 miles. Low narrow sand bank extending several miles north and south, and west of which is the estuary of the great northern branch of the Godavery. Opposite are shoals and low islands, caused by the accumulation of silt [adaimunn].

POISON (विष - visha, *San.*). Prefix.——*Poison ball* (நஞ்சுண்டான் - nañjundán, Tam.). Same as Fire-work plant.——*Poison berry* (गरलफल - garalap'hala, San.). Title from taste. Same as Indian berry.——*Poison fruit* (കരളിക്കായ - karalikkáya, Mal.). Same as Common emetic nut.——*Poison nut* (विषमुष्टि - vishamushti, San.; कुचला - kuchalá, Mahr.; कार्यारूकु - káryárúku, Conc.; خانق الكلب - khánikulkalb, Ar.; قاتل الكلب - kátilulkalb, Pers.; كچله - kuchlah, Hind.; كچلا - kuchlá, Dec.; ನಂಜಿನಕೊರಡು - nanjinakoradu, Can.; ಕಾಯೆರು - káyeru, Too.; ముష్టి - mushti, Tel.; കാഞ്ഞിരം - káñiram, Mal.; ගොඩකදුරු - godakaduru, Singh.; எட்டி - etti, Tam.). Title from character of nut. San. from (visha, san. poison + mushti, san. handful). Ar. from (khánik, ar. bane + kalb, ar. dog). Pers. from (kátil, pers. killer + kalb, ar. dog). Can. from (nanju, can. poison + koradu, can. pollard). Tel. from sanscrit. Mal. from (káraskara, san. the plant). Singh. from (goda, singh. land + kaduru, singh. poisonous tree). Tam. from (edu, tam. to vomit). San. also (kupílu), meaning inferior + salvadora persica, linn.; (kulaka), meaning chief of a family; (káraskara), meaning killing + doing; (kákasp'húrja), meaning crow's diospyros; (markatatinduka), meaning monkey's diospyros embryopteris, pers.; (vishatinduka), meaning poisonous diospyros; (dírghapatra), meaning long-leaved [penarvully, plantain]; (kákánda), meaning crow's ball; (kákapílu), meaning crow's salvadora persica, linn.; (kákatinduka), meaning crow's diospyros. Ar. also (izárákí). Pers. also (fulúsmáhí), meaning fish scales. Can. also (kásarkanamara). Tel. also (musidi). Tam. also (kákodi); (káñjirai), meaning fruit + killer; (kiruttinabánam), meaning krishna's arrow. Greek στρύχνος. Title otherwise Caunjiray, Coochlah, Dog bane, False angostura bark tree, Krishna's arrow, Mechel, Methel, Mooshty, Nuxmechil, Nux vomica, Strychnine tree, Vomit nut, Yetty. Botanically Strychnos [mooshty], nux vomica, linn., loganiaceæ [vricsham, 89]. Alias Caniram vomiquier. Caniram from malayalam. Tree, middling-sized; leaves short-petioled, opposite, smooth, shining, three to five-nerved, oval; calyx five-parted, permanent; corolla tubular, funnel-shaped; flowers small, greenish white; filaments, scarcely any, inserted over the bottom of the divisions of the corolla; style the length of the tube of the corolla; fruit round, smooth, very variable in size, orange-colored when ripe, many-seeded, pulpy. Trunk short, often crooked, but thick; branches covered with smooth ash-colored bark; native of coromandel; common in dry forests. Fruit when ripe is about the size of an apple [seb], is covered with a shell of an orange color, and contains a pulp in which from three to five seeds are immersed; these seeds are round, flattish, about three-quarters of an inch in diameter, have a weak, nauseous, balsamic smell, an intense bitter taste, and contain a virulent poison; nux vomica is the seed removed from the pulp and shell; it contains a peculiar principle, strychnine, which, like morphia, possesses alkaline properties; strychnine is not restricted to the fruit but also occurs in the wood and bark; an empyreumatic oil is prepared from the fresh nut. The wood occurs in the shops in pieces of variable length, and from ½ to 1 inch or more in diameter; it is covered by a thin light brown bark, which on one side of the stem is rougher than on the other, and is marked by numerous small light-colored elliptic corky warts; a transverse section shows numerous very fine medullary rays; touched with nitric acid [shorey ka tezaub] the section is stained a dull orange red. The seeds were first introduced into medicine by the arabs; they have not been described by sanscrit writers; the nut, when finely pounded and mixed with margosa [neem] oil, is medicinally tonic and astringent, given in minute doses; a decoction of the leaves is employed in paralysis and rheumatic swelling; the bark forms the principal ingredient in the chief of the medicated oils commonly in use among the natives as local applications to leprous, syphilitic, and other obstinate eruptions; officinal in pharm.; the nux vomica seed is in overdoses a virulent poison, death taking place by tetanus; in veterinary practice the nut when burnt but not to ashes and powdered, is used to cover long standing ulcers. The seeds are exported for the manufacture of strychnine, as also of the tincture and extract; seeds produce a sort of intoxication, for which they are habitually taken by some natives as an aphrodisiac; those who do so gradually become so far accustomed to the poison that they often come to one seed daily, which is cut into small pieces and chewed with a packet of betel [q.v.] leaf; pulp of the fruit is quite harmless and the favorite fruit of many birds; seeds employed in the distillation of country spirits to render them more intoxicating. Wood very bitter, light-brown color streaked with white, impervious to the attack of white-ants [q.v.]; hard, durable and stiff. Parasitic plants of the loranthaceæ growing on the plant acquire its poisonous properties. There is a Tamul proverb :—கடல்நீர் நிறைந்து ஆவது என்ன, காஞ்சிரை பழுத்து ஆவது என்ன?—"what "benefit arises from the water of the ocean, what good comes "from the ripening of the caunjiray fruit?" And another :—எட்டிமரமானாலும் வைத்த மரத்தை வெட்டாதே—"cut not down the tree you planted though it is the yetty." And another :—எட்டி பழுத்து என்ன, ஈயாதார் வாழ்ந்து என்ன—"what if the fruit of the yetty tree ripens; of what "use is the prosperity of the niggardly?" And another :—எட்டிமரமானாலும் பச்சென்று இருக்கவேண்டும்—"though a poisonous tree, it should be green." Compare :—Diospyros sylvatica (naliakákamushti), black crow poison nut; Olax scandens (bápanamushti), bramin poison nut; Strychnos colubrina (tígamushti), creeper poison nut; Tiliacora racemosa (tígamushti), creeper poison nut. See gloss. paragraphs.——*Poison root* (विष - visha, San.). Same as Bachnaug.

POKRY (پوكرى - pokrí, *Hind.*). A villain. Term of abuse.

POLAM (పొలము - polamu, *Tel.*; புலம் - pulam, *Tam.*). From (poli, tam. to thrive), as arable land. A field [hola]; especially for growing dry grain [q.v.].——*Poolaya* (പുലയ - pulaya, Mal.). From (above + an, mal. personal term). Low class in Malabar connected with rice cultivation. The Holeyar [q.v.] of Coorg and Canara, Pariahs [q.v.] and Pullar [q.v.] of Tinnevelly. But the Poolayar are in a far lower condition than the Pariahs. Of this tribe the most debased are now found on the strip of land between Alleppey and Cochin, where they are entirely isolated between the sea and the backwater. In the neighbourhood of Trivandrum, Poolayar are accustomed to boast of having once had a chieftain or rajah of their own, who resided in a fort not far off. The two great divisions of this caste, are the Eastern and Western poolayar. The former are found principally about Chungacherry and at Mullpully and other hilly parts. The Western poolayar prevail near Cottayam. The whole caste is divided into illams [q.v.]. Men and women belonging to the same illam cannot intermarry; they are considered to be the descendants of one family, therefore brethren, and such marriages are regarded as incestuous. Their dwellings are huts formed of sticks cut out of the woods, with walls of reed or mud, and thatched with grass or cocoanut [q.v] leaf, situated by the sides of the rice [q.v.] swamps, or on mounds in their centre. The work of the Poolayar lies almost exclusively in the rice fields. Their food is chiefly rice [q.v.]. The worship practised by the Poolayar is that of demons and evil spirits [pey], or of deceased ancestors [janty]. See vol. I (35), (110); II, 99. The ancient historical capital of Ceylon went by the name of Poolastinagaram, and the Periplus Maris Erythræi calls Ceylon παλαισίμουνδον. A small division of Pariahs are called Poolaya pariah [q.v.].

POLE (پول - pol, *Hind.*; పోలు - pólu, *Tel.*). Corruption of (prólu, *Tel.*). Town. Suffix in place names; as Pallapole [prole, vole, wail].

POLLACHY (பொள்ளாச்சி - polláççi, *Tam.* polláchi*). From (porul, tam. wealth + ádchi, tam. possession) [porool].——(1) Talook, Coimbatore district. Tahsildar's pay Rs. 175. Area 710 square miles. Population 183,669. Language Tamil. Bounded S.W. of district under shadow of Anamullays.

N. by Coimbatore and Pulladam talooks; E. by Oodamalpett and Pulladam talooks; W. by Anamullays, Cochin state and Palghaut talook, Malabar district; S. by Travancore state, from which it is separated by Anamullays. Diversified by undulations. The hills are in several ranges; as Cootchimullay on west, Toonacadav on south-west, and the Ponautchy on south. From these flow streams, the chief Auliyaur. Climate healthy. Forests abundant. Teak [q.v.] from Toonacadav by way of Beypore. At end of last century a vast teak forest extended between Pollachy and Palghaut, and troops traversing it had actually to cut their way through. Soils good, near hills. Red loam forms 39 per cent. and red sand 54 per cent. of the surveyed area, while black-cotton soil [regar] of a superior description, chiefly on the extreme east of the talooks, occupies 7 per cent. Red soils near Anamullay are extremely fertile, and produce very fine cholum crops. Dry crops are cholum [q.v.], shaumay [q.v.], cumboo [bajrah], raggy [q.v.], horse-gram [q.v.], tinay [q.v.], castor [aumanac], gingelly [q.v.], chillies [q.v.], tobacco [pogauk], tovray [dholl]. Garden crops are cholum, raggy, chillies, and tobacco. Wet crops are paddy [q.v.], gingelly [q.v.] seed and sugar-cane [q.v.]. Tobacco is fairly good. Chillies are among the best in the district and noted for pungency. Coffee [q.v.] is grown to a small extent at Ponautchy on the Anamullays, and cardamoms [q.v.] are procured to some extent by the Kadar [q.v.]. Forest products are honey [shahad], wax [mom], shellac [q.v.], paula indigo [q.v.], wild ginger [caurallam], turmeric [country saffron], cardamoms [q.v.], horns [sing] and ivory [dant]. Cloth is woven to some extent. The talook is irrigated chiefly by jungle streams and by tanks fed by them. The chief jungle streams are the Auliyaur, Ooppaur and Palaur. Camping grounds:—Anamullays, Cotaumputty, Gomungalam, Kinatcadavoo, Pollachy. Zemindarries:—Avalappamputty, Cotaumputty, Negamam, Ootcooly, Poravipolliem, Ramaputnam, Shamattore. Places of archæological interest:—Anamullay, Autchiputty, Cotore, Garoodancottay, Kinatcadavoo, Marchanaickenpolliem, Nautcullpolliem, Ootcooly, Periyacazhattay, Pollachy. Principal trig. station:—Kinatcadavoo. The leading places, &c., in the talook are the following.——*Anamoody* (ஆனைமுடி - áṇaimudi, Tam.). See sep. title.——*Anamullay* (ஆனைமலை - ánaimalai, Tam.). See sep. title.——*Auliyaur* (ஆளியாறு - áliyáru, Tam.). See sep. title.——*Avalappamputty* (ஆவலப்பம்பட்டி - ávalappambatti, Tam. avalappampati *). Means avalappan's village. Village; pop. 897; acres 8,916; lat. 10° 42′; long. 77° 10′; from Coimbatore S.S.E. 22 miles; from Pollachy E.N.E. 8 miles. Poliput. Peshcush Rs. 4,200.——*Cotaumputty* (கோட்டாம்பட்டி - kóttámbatti, Tam. kótámpati *). From (kóttán, tam. screech owl + patti, tam. hamlet). Village; pop. 1,118; acres 1,681; lat. 10° 37′; long. 77° 03′; from Coimbatore S. 27 miles, from Pollachy S.S.W. 3 miles. Poliput. Peshcush Rs. 1,860.——*Cotore* (கோட்டூர் - kóttúr, Tam. kótúr *). From (kódu, tam. ridge + úr, tam. village). Village; pop. 8,226; acres 10,697; lat. 10° 33′; long. 77° 02′ from Coimbatore S. 31 miles; from Pollachy S.S.W. 8 miles. At foot of a pass in Anamullays.——*Kinatcadavoo* (கிணத்துக்கடவு - kinattukkadavu, Tam.). From (kinaru, tam. well + kadavu, tam. a tree, gyrocarpus jacquini, roxb.). Village; pop. 3,681; acres 6,687; lat. 10° 49′; long. 77° 04′; from Coimbatore S.S.E. 13 miles; from Pollachy N. 11 miles. Temple with copper-plate grants. Weekly-market. Trig. station; lat. 10° 49′ 17·13″; long. 77° 03′ 35·85″; height 1,212 feet; from Kinatcadavoo N.W. ¼ mile; from Pollachy N. 12 miles.——*Negamam* * (நெகமம் - negamam, Tam.). From (nigama, san. city). Village; pop. 3,230; acres 3,976; lat. 10° 45′; long. 77° 09′; from Coimbatore S.S.E. 20 miles; from Pollachay N.E. 9 miles. Poliput. Peshcush Rs. 2,480.——*Palaur* (பாலாறு - páláru, Tam.). See sep. title.——*Pollachy* (பொள்ளாச்சி - polláççi, Tam.). See below.——*Poravipolliem* (பொரவிப்பாளையம் - poravippálaiyam, Tam. poravipálaiyam *). From (puravu, tam. hill tract + pálaiyam, tam. fortified village). Village; pop. 3,526; acres 12,375; lat. 10° 44′; long. 77° 01′; from Coimbatore S. 18 miles; from Pollachy N. 6 miles. Poliput. Peshcush Rs. 2,804.——*Ramaputnam* (இராமப்பட்டணம் - irámappattanam, Tam. rámapatnam *). From (ráma, san. the god + pattana, san. town). Village; pop. 3,265; acres 7,750; lat. 10° 42′; long. 76° 58′; from Coimbatore S. 20 miles; from Pollachy N.W. 7 miles. Poliput. Peshcush Rs. 1,436.——*Shamattore* (சமத்தூர் - shamattúr, Tam. samatúr *). From (shamattu, tam. power + úr, tam. village). Village; pop. 2,202; acres 5,337; lat. 10° 36′; long. 77° 04′; from Coimbatore S. 27 miles; from Pollachy S. 3 miles. Poliput. Peshcush Rs. 1,683.——*Vettacauranpoothore* (வேட்டக்காரன்புதூர் - véttakkáranbuthúr, Tam. vétakáranpudur *). From (véttaikkáran, tam. hunter + puthu, tam. new + úr, tam. village). Village; pop. 7,725; acres 12,787; lat. 10° 34′; long. 76° 58′; from Coimbatore S. 30 miles; from Pollachy S.W. 9 miles. Formerly a hamlet of Anamullay, but now distinct.——*Wodayacolam* (ஒடையக்குளம் - odaiyakkulam, Tam. odayákulam *). From (udaiyán, tam. one of the udaiya caste + kulam, tam. tank). Village; pop. 3,996; acres 8,166; lat. 10° 34′; long. 76° 57′; from Coimbatore S. 30 miles; from Pollachy S.W. 9 miles.——**(2)** Town, Divisional and talook head-quarters; Coimbatore dist., Pollachy tal.; pop. 5,805; acres 2,612; lat. 10° 39′; long. 77° 03′; from Coimbatore S. 24 miles; from Erode S.W. 68 miles; from Madras S.W. 275 miles; from Ootacamund S.S.E. 55 miles; from Suttimungalam S.S.W. 61 miles. Dolmens [codaycull], rude stone circles [azhauram], &c., are found. One and-a-half miles east-south-east is a circle of very large boulders. Roman coins found of Augustus and Tiberius. Large weekly fair on Thursday. Has been always a place of trade.

POLORE (போளூர் - pólúr, *Tam.* pólúr *). From (póli, tel. proper name + úru, tel. village) [poly].——**(1)** Talook, North arcot district. Tahsildar's pay Rs. 150. Area 596 square miles. In the south-west corner of the district. Population 131,380. Language Tamul. S. of district. Triangular in shape. Length of each side about 30 miles. N. apex touches Vellore talook; N.E. side borders on Arnee jagheer and a portion of Wandiwash; southern on Trinomallee talook, South arcot; north-western on Tripatore talook, Salem district. The N. and W. parts are hilly, being occupied by the Jawaudies. The chief eminences are Carnautighur and Padavaid droog. There are isolated hills near Polore in the centre, and Chetput in the extreme south-east corner. The rest of the talook is tolerably flat, and here the climate is salubrious; in the hilly portions fever is very prevalent. The forests are considerable in hilly tracts. Soils are black and red clay mixed with sand or gravel, and near the hills a rich loam is found. The talook is fertile and good crops of rice [q.v.], cumboo [bajrah], raggy [q.v.] and varagoo [q.v.] are raised. Besides the ordinary minerals of the district, magnetic iron [cauntam] ore occurs in small nodules near Pottaray. At Caundapolliem garnets [tamrah] are found of little value. Manufactures are weaving and shoe-making. The chief weaving centres are Mansoorabad and Maumbut, where superior cloth is turned out and exported mostly to Bangalore. Coarse cloth are made at Alliyabad, Mahadevamungalam, Palancoil, and Shingauravaudy. Cumblies [q.v.] are woven at Autvaumbaudy and Cauraputt, the latter village producing the fine kind. Shoe-making is in the hands of the Lubbays [q.v.] of Chetput, their shoes are sold all over this district as well as South arcot. This industry is however failing. Jungle produce is collected by the Iroolar [q.v.] and Malayaulies [q.v.]. The principal rivers are Cheyaur and affluents, Bheemanuddy, Camandalanuddy or Padavaid, Mricandanuddy and Munjalaur; all rising in Jawaudies. The number of spring and river channels [q.v.] is small. Chief tanks [q.v.] Alliyabad and Polore. Places of archæological interest:—Cadalaudy, Carnautighur, Cauppalore, Chetput, Mahadevamungalam, Mailauttvambaudy, Modaiyore, Padavaid, Paudagam, Polore, Pulliputt, Tirmaley, Tutchambaudy, Yelattore. Principal trig. stations:—Carnautighur, Narsingapooram. The leading places, &c., in the talook are the following.——*Alliyabad* (علی آباد - aliábád, Hind.; அலியாபாத் - aliyábád, Tam.). From (alí, hind. proper name + ábád, pers. city). Tam. also (kalambúr), meaning threshing floor + water + village. Village; pop. 5,096; acres 3,284; lat. 12° 38′; long. 79° 16′; from Chittore S.S.E. 41 miles; from Polore N.E. 11 miles. Tank [q.v.], fed by channel [q.v.] from the Padavaid. Built by Chola [q.v.] rajah.——*Carnautighur* (கருநாடகக்கிரி - karunádagakkiri, Tam.). See sep. title.——*Cauraputt* (காரப்பட்டு - kárappattu, Tam.). From (kárai, tam. thorny werbera, canthium parviflorum, lam. + pattu, tam. village). Village; pop. 3,652; acres 3,562; lat. 12° 23′; long. 78° 59′; from Chittore S. 59 miles; from Polore S.W. 16 miles.——*Chengam* (செங்கமம் - shengamam, Tam.). See sep. title.——*Chetput* (சேத்தப்பட்டு - shéttuppattu, Tam.). See sep. title.——*Cheyaur* (செய்யாறு - sheyyáru, Tam.). See sep. title.——*Mansoorabad droog* (மன்சூராபாத்துருக்கம் - mansurábátturukkam, Tam.). From (mansúr, hind. mahomedan proper name + ábád, hind. city + durga, san. fort). Village, Hill; pop. 1,179; acres 1,187; lat. 12° 24′; long. 79° 16′; from Chittore S. 57 miles; from Polore S.E. 10 miles. A hill fort in ruins.——*Maumbut* (மாம்பட்டு - mámbattu, Tam.). From (má, tam. mango tree, mangifera indica, linn. + pattu, tam. village). Village; pop. 1,387; acres 1,275; lat. 12° 31′; long. 79° 08′; from Chittore S. 49 miles; from Polore W. 2 miles. Weaving centre.——*Mricanda nuddy* (மிருக்கண்டநதி - mirukkandanathi, Tam.). From (mrikanda, san. the sage + nadí, san. river). River. Affluent of Cheyaur. Rises in Jawaudy hills and joins the Cheyaur near Yelattore.——*Mundacolattore* (மண்டக்கொளத்தூர் - mandakkolattúr, Tam.). From (manda, tam. large + kolam, tam. tank + úr, tam. village). Village; pop. 1,579; acres 2,273; lat. 12° 32′; long. 79° 15′; from Chittore S. 48 miles; from Polore E. 5 miles. Large Bramin population.——*Munjalaur* (மஞ்சளாறு - mañjaláru, Tam.). From (mañjal, tam. country saffron, curcuma longa, roxb. + áru, tam. river). Sanscrit name (haridránadí), meaning the same. River. Streamlet rising in Jawaudy hills, empties into Polore tank.——*Nacshatra coil* (நக்சத்திரக்கோவில் - naççattirakkóvil, Tam.). From (nakshatra, san. star + kóvil tam. temple); from kritticay [q.v.] star [nacshatram]. Hill; lat. 12° 28′; long. 79° 06′; from Chittore S. 51 miles; from Polore S.W. 5 miles. Temple of Soobramanya sawmy, only second in importance to Padavaid. Penances performed consist

in going round the hill several times.——*Narsingapooram* (நாசிங்கப்புரம் - narasingappuram, Tam.). From (narasimha, san. vishnu, the man-lion god + pura, san. town). Trig. station; lat. 12° 31′ 09·57″; long. 79° 18′ 43·07″; height 967 feet.——*Padavaid* (படவேடு - padavédu, Tam.). See sep. title.——*Paudagam* (பாடகம் - pádagam, Tam.). From (pádu, tam. waste + agam, tam. place). Village; pop. 1,253; acres 3,300; lat. 12° 26′; long. 79° 14′; from Chittore S. 55 miles; from Polore S.E. 8 miles. Remains of a palace.——*Polore* (போளூர் - pólúr, Tam.). See below.——*Sampatgherry* (சம்பத்துக்கிரி - shambattukkiri, Tam.). From (sampat, san. wealth + giri, san. hill). Hill.——*Tirmaley* (திருமலை - tirumalai, Tam.). From (tiru, tam. holy + malai, tam. hill). Village, Hill; pop. 633; acres 2,045; lat. 12° 34′; long. 79° 15′; from Chittore S. 46 miles; from Polore E.N.E. 6 miles. Granite [caroomcull] hill with Jeina [q.v.] relics. Jeina families in village. The temples on and below the hill still belong to them. On the hill is a rude Jeina figure, 16½ feet high, cut on the face of a cliff near the summit. It is not surrounded with the usual spiral branches of leaves. Upon its left is a long inscription in archaic characters. Close to the lower temple are rock chambers. Jeina figures stood in these, but were destroyed during Hyder's invasion. Upon the walls are frescoes, of naugams [q.v.], monks, white-hooded nuns and others. Close to village are two large stone circles [azhauram].——**(2)** Town, Talook head-quarters; North arcot dist., Polore tal.; pop. 7,743; acres 2,997; lat. 12° 31′; long. 79° 10′; from Arnee S.W. 16 miles; from Chittore S. 49 miles; from Madras W.S.W. 89 miles; from Ranipett S.S.W. 32 miles; from Tripatty S.S.W. 80 miles; from Vellore S. 29 miles. Two miles from north bank of Cheyaur and east of Sampatgherry and Vasoor hills. Between these is built the bund of the tank, which receives the Munjalaur. The Sampatgherry is topped by a temple. The road to Trinomallee passes through main bazaar. Small ruined fort. Five miles from town magnetic [cauntam] ore occurs in small nodules.

POLORE (పోలూరు - pólúru, *Tel.*). From (póru, tel. combat + úru, tel. village). Tel. also (mannárupólúru), meaning battle place of enemies. Sanscrit (malláripura), meaning krishnan, the wrestler-foe + town.——**(1)** Zemindarry, Deputy tahsildar's division, Nellore; pay Rs. 120. Area 355 square miles. Territory of the zemindar of Vencatagherry. S. inland part of district. Bounded north and west by Vencatagherry division, east by Kotah division of Goodoor talook, and south by the North arcot district. Extends from Ramapore on the extreme east to the Swarnamookhy, a distance of 32 miles, and from Goodoor village on the north to Calastry zemindarry in south. The history of the talook can be traced as far back as the year 1596, when Bungauroo yautsama naidoo, the twenty-second Zemindar of Vencatagherry, who had obtained the title of Rajah bahaudur from the court of Hyderabad, having suddenly died, his three young sons and an adopted Bramin boy Rama row were summoned to Hyderabad, and the ancestral property was equally divided among them, the eldest taking the talook of Vencatagherry, the second the talook of Sagatore, and the adopted son the talook of Polore. But the adoptive son Rama row leaving no issue at his death Polore returned to the eldest branch of the family. The division is a plain country intersected by the Caulingy and the Swarnamookhy. The soil is good and fertile. The special industry is in indigo [q.v.]. Almost every five villages has a vat. Handkerchiefs [roomaul] and ordinary cloths manufactured in several large villages. In some parts Appalacauram [q.v.] is dug and sent to Madras. In Naidoopett cooncoomam, a red powder from turmeric [country saffron] and limes [q.v.], is largely manufactured and sent to Madras. Lac [q.v.] bangles with ornamental work. The natural products are paddy [q.v.] and dry grains [q.v.]. Much paddy exported to Madras. Water is plentiful and salubrious. Principal trig. station:—Auneypoody. The leading places, &c., in the division are the following.——*Aunepoody* (ఆనెపూడి - ánepúdi, Tel.). From (áne, can. elephant + púdi, tel. village). Village; pop. 211; lat. 13° 50′; long. 80° 03′; from Nellore S. 43 miles; from Polore N 8 miles; from Raupore S.E. 44 miles. Trig. station in lat. 13° 48′ 24·40″; long. 80° 02′ 04·56″; height 135 feet; from Aunepoody S.W. 2 miles; from Polore N. 7 miles.——*Aurore* (ఆరూరు - árúru, Tel.). From (áru, tel. six + úru, tel. village). Village; pop. 686; lat. 13° 55′; long. 80° 06′; from Nellore S. 37 miles; from Polore N.N.E. 15 miles; from Raupore E.S.E. 40 miles. Four tanks.——*Body lingampaud* (బోడిలింగంపాడు - bódilingampádu, Tel.). From (bódi, tel. bare + lingampádu, tel. lingam town). Village, Head-quarters of Salt inspector; pop. 349; lat. 13° 44′; long. 80° 02′; from Nellore S. 49 miles; from Polore N. 2 miles; from Raupore S.E. 44 miles. On backwater. Salt manufactured. Port half a mile distant. Fuel and grain largely exported to Madras. Zemindar [q.v.] collects tolls on the channel [q.v.] leading to the port [toray].——*Caulingy* (కాళింగనది - kálinganadi, Tel.). See sep. title.——*Cotta polore* (కొత్తపోలూరు - kottapólúru, Tel.). From (kotta, tel. new + pólúru, tel. place so called). Village; pop. 2,648; lat. 13° 44′; long. 80° 4′; from Nellore S. 50 miles; from Polore N.N.E. 2 miles; from Raupore S.E. 46 miles. Ruins of a fort. Rich paddy [q.v.] lands.——*Mullam* (మల్లం - mallam, Tel.). Means oil vessel. Village; pop. 1,757; lat. 13° 58′; long. 80° 09′; from Nellore S.S.E. 35 miles; from Polore N.N.E. 19 miles; from Raupore E.S.E. 42 miles. Once in possession of Chola kings. Temple dedicated to Sawminautasawmy, highly sculptured and with gopooram [q.v.] built entirely of black granite [caroom cull]. Also an old temple of Marcandeyan. Festival in August and September. Rich paddy lands.——*Naidoopett* (నాయుడుపేట - náyudipéta, Tel.). See sep. title.——*Polore* (పోలూరు - pólúru, Tel.). See below.——*Poody* (పూడి - púdi, Tel.). See sep. title.——*Sooloorpett* (సూళ్ళూరుపేట - sūlúrupéta, Tel.). See sep. title.——*Swarnamookhy* (స్వర్ణముఖి - svarṇamukhi, Tel.). See sep. title.——*Tadda* (తడ - tada, Tel.). See sep. title.——**(2)** Village; Nellore dist., Polore division; lat. 13° 43′; long. 80° 02′; from Madras N.N.W. 48 miles; from Naidoopett S.S.E. 15 miles; from Nellore S. 52 miles; from Ongole S. 124 miles; from Raupore S.E. 47 miles. The same as Munnaurpolore. The division goes by this name; but the head-quarter of the division is Sooloorpett 1 mile distant. Famous temple. Remains of ancient fort. For the Shree codanda ramasawmy festival held in Cheitram [mausam] or April, and which lasts nine days, many people collect. Another festival of nine days, in Jyeshtam [mausam] or June in honor of Mullary krishna sawmy. The Caulingy nuddy flows to the left.

POLY (பொலி - poli, *Tam.*). Field bank.——*Polairamma* (పోలేరమ్మ - póléramma, Tel.). From (poliméra, tel. boundary + amma, tel. goddess). Village deity. Said to produce small-pox [ammay] and cholera [vaunty bhaidy], and as such worshipped when these epidemics prevail.——*Polavaram* (పోలవరము - pólavaramu, Tel.). From (pólayya, tel. proper name + pura, san. town).—"*a*" Deputy tahsildarry, Godavery district. Pay Rs. 100.—"*b*" Zemindarry, Village, Deputy tahsildar's head-quarters; Godavery dist., Yernagoodem tal.; pop. 3,552; lat. of village 17° 15′; long. 81° 41′; from Cocanada W.N.W. 44 miles; from Coonavaram S.E. 33 miles; from Ellore N.E. 51 miles; from Madras N.N.E 298 miles; from Narsapore N. 55 miles; from Rajahmundry N.N.W. 19 miles; from Tullapoody N.N.W. 9 miles. Peshcush Rs. 6,710. The Zemindarry was one of the most ancient in the Northern circars [q.v.], and belonged together with those of Gootaula and Cottapully to a family of Reddies [q.v.]. Between 1785 and 1790 there were serious disturbances. In 1800 Polavaram fort was captured and destroyed by a British force. Two old temples. Temple of Mahanundeshwarasawmy said to have been built by Booddha [q.v.]. Remains of a ruined fort north of the village.——*Polore* (போளூர் - pólúr, Tam.). See sep. title.

POMFRET (حلوا ماهی - halwámáhí, *Hind.*; చందువాయి - tsanduváyi, *Tel.*; ആവോലി - ávóli, *Mal.*; வவ்வால்மீன் - vavválmín, *Tam.*). Title from portuguese meaning vine-leaf; from broad compressed shape. Hind. from (halwá, hind. sweet electuary + máhí, hind. fish); from its softness. Tel. from (chennu, tel. beautiful + váyi, tel. face). Tam. from (vavvál, tam. bat + mín, tam. fish). Tel. also (tsandanapuchépa), meaning sandal + fish. Mal. also (assalmín), meaning best fish. Title otherwise Pamphlet. Stromateus genus, stromateidæ, acanthopterygii, teleostei, pisces [matsyam, 17], of naturalists [jantoo]. Common on coromandel coast; light nourishing diet; after whiting [indian whiting] and sole [indian sole], the safest for sick persons; greatly compressed and oval, 8–10 inches long, not much less in breadth. The species best known to the natives are shown below.——*Bat-faced pomfret* (चान्दवा - chándavá, Mahr.; سفید حلوا ماهی - sufedhalwámáhí, Hind.; అటుకోయ - atukoyá, Tel.; വെള്ളാവോലി - vellávóli, Mal.; முகம்வவ்வால் - mugamvavvál, Tam.). Hind. from (sufed, hind. white + halwámáhí, hind. pomfret, stromateus genus). Mal. from (vella, mal. white + ávóli, mal. pomfret, stromateus genus). Tam. from (mukha, san. face + vavvál, tam. bat). Title otherwise White pomfret. Stromateus [pomfret] sinensis, stromateidæ, acanthopterygii, teleostei [matsyam, 17], of naturalists. Alias Stromateus albus, atoo koia, atous, candidus. Atoo koia from teloogoo. Lower jaw longer, especially in young; scales small and very deciduous, especially in immature, in adult they cover the vertical fins; colors upper surface of head and body as far as the lateral-line of a deep neutral-tint, rest of body with mixture of brownish-grey, having metallic reflections, becoming lighter and silvery towards abdomen; dotted all over with brown, larger spots having silvery point in centre; fins silvery-gray, marginal half blackish; cavity of mouth and tongue pale bluish-gray with brown dots, silvery in centre; iris reddish-silver or copper colored, minutely dotted brown; young are gray, the head covered with irregularly star-shaped spots, and fins nearly black, especially at edges; sea; most esteemed for eating; in malabar common during the south-west monsoon [q.v.]; should be cooked when quite fresh; young are common round coasts and ascend estuaries.——*Black pomfret* (सरगा - saragá, Mahr.; ବାଲ - bál, Oor.; నల్లచందువాయి - nallatsanduváyi, Tel.; കാരാവോലി - kárávóli, Mal.; கறுப்புவவ்வால் - karuppuvavvál, Tam.). Tel. from (nalla, tel. black + tsanduváyi, tel. pomfret, stromateus genus). Mal. from (kár, mal. black + ávóli, mal. pomfret, stromateus genus). Tam. from (karuppu, tam. blackness + vavvál, tam. bat). Stromateus [pomfret] niger, stromateidæ, acanthop-

terygii, teleostei [matsyam, 17], of naturalists. Alias Apolectus stromateus; Stromateus nalasandawah, paru: Nalasundawah from teloogoo: Lower jaw longer; scales small, and extended over vertical fins; lateral-line gently curves downwards, and in last fourth passes straight to centre of caudal, in form of raised keeled line with lateral shields as perceived in genus caranx [pauray] colors deep brown or grayish-brown with blue reflections; cheeks, opercles, and abdomen pale-neutral or brownish-neutral; dorsal and anal greyish-brown, stained black towards margins; pectoral and caudal brownish, edged with black; iris brownish-blue; in the young it is gray; dorsal and anal fins black, and tail yellow, with three brown cross bands; sea; two feet in length, excellent eating; the people of tranquebar dislike it, because a species of parasite similar to a wood-louse is often found in its mouth; appears in malabar about the same time as the sinensis; it comes in shoals, and disappears as suddenly as it arrives.——*White pomfret* (सरगा - saragá, Mahr.; سفیدحلوا ماهی - sufedhalwámáhí, Hind.; తెల్లచందువాయి - tellatsanduváyi, Tel.; വെള്ളാവോലി - vellávóli, Mal.; வெள்ளைவவ்வால் - vellaivavvál, Tam.). Hind. from (sufed, hind. white + halwámáhí, hind. pomfret, stromateus genus). Tel. from (tella, tel. white + tsanduváyi, tel. pomfret, stromateus genus). Mal. from (vella, mal. white + ávóli, mal. pomfret, stromateus genus). Tam. from (vellai, tam. white + vavvál, tam. bat). Tel. also (súditsanduváyi), meaning needle + pomfret, stromateus genus. Title otherwise Silver pomfret, when immature; Grey pomfret, when adult. Stromateus [pomfret] cinereus, stromateidæ, acanthopterygii, teleostei [matsyam, 17], of naturalists. Alias Stromateoides cinereus; Stromateus argenteus, candidus, griseus, securifer, sudisandawah, tellasandawah. Sudisandawah and Tellasandawah from teloogoo. Snout projecting over mouth; scales small and deciduous; colors upper surface of head and back as low as lateral-line of grayish neutral-tint with purplish reflections, sides of head and body silvery-gray, fading to white on abdomen, and everywhere covered with minute black dots; dark spot on upper portion of opercle; dorsal and anal gray minutely dotted with black, outer half being darker; caudal and pectoral yellowish white, also minutely dotted black, outer half being darker; iris silvery; young are much darker, vertical fins being nearly black; the occiput in the adult is striated almost horizontally, but the commencement of these furrows is apparent in the immature; the larger specimens, gray pomfrets, are considered superior to the immature silver pomfrets for eating; sea; a foot in length.

PON (सुवर्ण - suvarana, *San.*; सोनें - sóném, *Mahr.*; ذهب - zahab, *Ar.*; زر - zar, *Pers.*; سونا - soná, *Hind.* and *Dec.*; أمس - ámas, *Malay*; ಚಿನ್ನ - chinna, *Can.*; ಬಂಗಾರ - bangara, *Too.*; బంగారు - bangáru, *Tel.*; പൊൻ - pon, *Mal.*; රන් - ran, *Singh.*; பொன் - pon, *Tam.*). Title from tamul. San. from (su, san. good + varna, san. color). Mahr. from sanscrit. Hind. from sanscrit. Mal. from (pol, mal. to shine). Tam. conventionally restricted to alloyed pagoda [q.v.], gold, pure, malleable gold being called tungam [q.v.]; pon meant originally any metal [loham].—"*a*" Gold. Aurum of chemists. More generally found native than any other metal. It is the most tough and ductile, as well as the most malleable of all metals [loham], more elastic than lead [eeyam] or tin [tagaram], but less so than iron [auhan] or even copper [taumram]; hammering renders it brittle, but it resumes its ductility on being slowly heated; it is not sonorous, and is the heaviest of all bodies, platina [goorootwam] excepted; for its fusion it requires a low degree of white-heat, somewhat greater than that in which silver [velly] melts. Gold mingles in fusion with all metals; it amalgamates very readily with mercury [rasam], and is remarkably disposed to unite with iron; every metal except copper debases the color of gold; that gives it a red hue, and a greater degree of firmness than when very pure; hence the combination is employed in making coins [naunyam], and different articles of plate, &c. The alloy with silver is made with difficulty, and forms the green gold [pashoom pon] of jewellers. Proper quantities of copper [taumram] filings, nitre [shorah], prepared tootty [q.v.], borax [vengauram], and hepatic aloes [q.v.], fused together by a skilful artist give a compound which much resembles gold. While gold is indestructible by the common operations of fire, it is altogether exempted from rusting. The solution in aqua regia [swarna dravacam] is a strong poison. For distribution and mining, see vol. I, 309; II, 33. Gold is the national metal of S. india, in spite of its present scarcity there. In jewelry the beaten gold of S. india is celebrated. The workmen elaborate an extensive surface of ornament out of a trifling quantity of metal, beating it almost to the thinness of tissue paper, without weakening the effect of solidity. Gold ornaments are made at Vizianagram, Vizagapatam and Tanjore, in mythological designs; in these the ornamentation consists of figures of the Pooraunic gods in high relief [jalee], either beaten out from the surface, or affixed to it, whether by soldering, or wedging, or screwing them on. The gold jewelry of Trichinopoly contains, among other things, rose chains, ear pattern necklaces and bracelets. The jewelry of Trichinopoly is very similar to that of the Punjaub. Gold or silver thread [sarigay] is made by twisting the flattened wire, called Badlah, around silk thread [calaubat]. In gold or silver tissues the flattened wire instead of being twisted round silk thread, is itself used; the warp or the weft, as the case may be, being of very fine silk thread. For tinsel see Caukkay pon.—"*b*" The Pon is specifically an ancient small gold coin, equal to 9 or 10 fanams [q.v.], the origin of the mahomedan Hoon [q.v.] through the canarese, and the english Pagoda [q.v.]. Whenever a sum of money is mentioned in ancient Tamul records, the denomination is Pon. In the Harichendrapooraunam when the minister sells his prince to a Poolayan [q.v.] or outcaste, the price set upon him is 10,000 pons. In Tanjore the revenue accounts were kept up to a comparatively recent period in pons, panams [fanam], and cashes [q.v.]. The normal coin was a piece equal to the modern half pagoda, the pagoda itself being the double pon. The following was the table:—2 goonj = 1 doogoolam; 2 doogoolams = 1 chavalam; 2 chavalams = 1 dharnam; 2 dharnams = 1 honn; 2 honns = 1 varauhan.—"*c*" Pon is also a plant first term, often joining two genera. Ex., where transl. is of second term:—Argemone mexicana (ponnummattam), datura; Cassia occidentalis (ponnáviram), cassia auriculata; Mallotus philippensis (ponnakam), holding; Putranjiva roxburghii (ponkólam), body; Sapindus trifoliatus (ponnángottaimaram), seed + tree; Wedelia calendulacea (ponnirakkayyanni), color + eclipta alba. See gloss. paragraphs.——(1) *Pon arippoo* (பொன்னரிப்பு - ponnarippu, Tam.). From (above + ari, tam. to sift). Sifting gold out of other substances.——*Ponmalay* (பொன்மலை - ponmalai, Tam.). Means the gold mountain. Tamul name for Meroo [q.v.].——*Pon moolaum* (பொன்முலாம் - ponmulám, Tam.). From (above + mulamma, ar. plating). Gilt.——*Ponnair* (பொன்னேர் - ponnér, Tam.). From (above + ér, tam. plough). Golden plough. Ploughing for the first time in the season on an auspicious day with appropriate ceremonies [yair].——*Ponnairy* (பொன்னேரி - ponnéri, Tam.). See sep. title.——*Ponnam* (பொன்னம் - ponnam, Tam.). Lutchmy [q.v.], as of gold color.——*Ponnambalam* (பொன்னம்பலம் - ponnambalam, Tam.). Means golden hall. Proper name. Common among non-bramins. Compare Canacasabhay [peyar].——*Ponnamber* (பொன்னம்பர் - ponnambar, Tam.). Means gold or yellow amber; see Karbah.——*Ponnan* (பொன்னன் - ponnan, Tam.). Means golden man. Epithet of Arghan, the deity. Non-bramin proper name. Feminine form is Ponny [peyar].——*Ponnany*. (പൊന്നാനി - ponnáni, Mal.). See sep. title.——*Ponnappan* (பொன்னப்பன் - ponnappan, Tam.). From (above + appan, tam. father). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Ponnilakkam* (பொன்னிலக்கம் - ponnilakkam, Tam.). From (ilakkam, tam. number). Money numbers [nellilakkam].——*Ponnoo* (பொன்னு - ponnu, Tam.). Applied to males and females. Hindoo 2nd or pers. name. Compare Bungaur, Canacam, Tungam [peyar].——*Ponnoosawmy* (பொன்னுசாமி - ponnusámi, Tam.). From (above + svámí, san. master, titular affix). Hindoo 2nd or pers. name. Common among non-bramins. Familiarly Ponnoo [peyar].——*Ponnore* (పొన్నూరు - ponnúru, Tel.). From (ponnu, tel. gold + úru, tel. village). Sanscrit name (svarnapurí), meaning gold + city.—"*a*" Deputy tahsildarry, Kistna district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station; Kistna dist., Baupatla tal.; pop. 2,604; acres 2,439; lat. 16° 04′; long. 80° 35′; from Baupatla N.N.E. 13 miles; from Bezwada S. 30 miles; from Guntoor S.S.E. 15 miles; from Masulipatam W. 38 miles; from Vinoocondah E. 52 miles; from the sea N. 15 miles. Large Vishnoo [q.v.] temple with inscriptions. Important festival at full moon [powrnimay] about beginning of May.——*Pon paulam* (బంగారుకడ్డి - bangárukhaddi, Tel.; பொற்பாளம் - porbálam, Tam.). Title and Tam. from (pon, tam. gold + pálam, tam. bar). Tel. from (bangáru, tel. gold + khaddi, tel. bar). Bars of gold, bullion.——*Ponpoya* (പൊന്പുഴ - ponpuzha, Mal.). From (pon, mal. gold + puzha, mal. river). River; Malabar dist., Yernaud tal. One of main branches of Beypore river. Rises in Coondahs and joins Beypore river west of Nelambore, where it is spanned by an iron bridge. Gold [pon] dust from bed by washing.——*Pon raikk* (सुवर्णपत्र - suvarnapatra, San.; ورق الذهب - varakuzzahab, Ar.; ورق طلا - varakitilá, Pers.; سنهری ورق - sunehrívarak, Hind.; سنهری تگٹ - sunehrítagat, Dec.; ಬಂಗಾರದರೇಕು - bangáradaréku, Can.; కుందనపురేకు - kundanapuréku, Tel.; തങ്കരേഖ - tankarékha, Mal.; தங்கரேக்கு - tangarékku, Tam.). Ar. from (varak, ar. leaf + zahab, ar. gold). Pers. from (varak, ar. leaf + tilá, ar. gold). Hind. from (soná, hind. gold + varak, ar. leaf). Dec. from (soná, hind. gold + tagat, hind. leaf.). Tel. from (kundanamu, tel. pure gold + réku, tel. plate). Mal. from (tankam, mal. gold + réku, tel. plate). Gold leaf. Prescribed by native practitioners in consumptive complaints and in cases of general debility, as tonic, cordial and restorative. The metal is first beaten into leaf free from any amalgam. It is then heated and rubbed with mercury [rasam] some thirteen or fourteen times, when it is said to lose its metallic character, and becomes reduced to a reddish powder. In this condition it is prescribed. Used by moochees [q.v.] for ornamenting fans, umbrellas, images, &c.——*Ponrungan* (பொன்ரங்கன் - ponrangan, Tam.). From (above + ranga, san. vishnu). Hindoo

2nd or pers. name. Common among non-bramins [peyar].——*Pon sarigay* (سنہری کناری - sunehríkinárí, Hind.; బంగారుజరి - bangárudzari, Tel.; பொற்சரிகை - porcharigai, Tam.). Hind. from (soná, hind. gold + kinárí, hind. lace). Tel. from (bangáru, tel. gold + zar, hind. lace). Tam. from (above + sarit, san. thread). Gold lace [kinaury, sarigay].——*Poongam* (புங்கம் - pungam, Tam.). From (pon, tam. gold + agam, tam. inside); from yellow wood. Same as Karanj. Gives generic term Pongamia thereto. The oil is known as Poongam oil. Bead poongam, in tamul (manippungam), from use of tough nuts as beads [munkah] and necklaces [maulay], is same as Soapnut.——*Poongoo* (പുന്നു - punnu, Mal.; புங்கு - pungu, Tam.). Means gold-holding, from yellow color of wood. Plant name common to:—Calophyllum bracteatum, Calophyllum tomentosum, Dalbergia lanceolaria, Pongamia glabra. See gloss. paragraphs.——*Pottaumaray* (பொற்றாமரை - pottámarai, Tam.). From (above + támarai, tam. lotus). A sacred tank at the temple in Madura.——**(2)** *Caroom pon* (கரும்பொன் - karumbon, Tam.). From (karum, tam. black). Iron [auhan].——*Pashoom pon* (பசும்பொன் - pasumbon, Tam.). From (pasum, tam. green). Gold of a greenish yellow color.——*Shem pon* (செம்பொன் - shembon, Tam.). From (shem, tam. red). A kind of gold red in color.——*Ven pon* (வெண்பொன் - venbon, Tam.). From (ven, tam. white). Silver [velly].

PONAM (പുനം - punam, *Mal.*; புனம் - punam, *Tam.*). From (pun, tam. inferior). Jungle; high ground not fit for rice [q.v.].——*Perambaudy* (പെരമ്പാടി - perampáti, Mal.). From (perambu, mal. cane, calamus rotang, linn. + átu, mal. country). Village, Pass; Malabar district, Wynaud talook. The ghaut [q.v.] leads from Tellicherry and Cannanore, through Coorg, to Seringapatam and Mysore.——*Peramboo* (பிரம்பு - pirambu, Tam.). From (punam, tam. hilly tract). Same as Rattan.——*Ponacaud* (പുനക്കാട് - punakkátu, Mal.). From (above + kátu, mal. forest). A jungle, chiefly highland, overrun with underwood, &c. So jungle cultivation [cautcaud, podecaud]. This is made after long intervals with particular kinds of grain sown in holes dug with a spade. The Coomry [q.v.] of Canara.——*Ponamvauram* (പുനംവാരം - punamváram, Mal.). From (above + váram, mal. rent). Landlord's share of the produce of jungle cultivation.

PONDICHERRY (پلچری - pulcharí, *Hind.*; புதுச்சேரி - puthuççéri, *Tam.*). From (puthu, tam. new + shéri, tam. village) [poothoo]. Tam. also (puthuvai), meaning new place; also (pándi), from the french corruption pondy. French territory, Town. Lies embraced by Cuddalore talook of South arcot district; lat. 11° 56′ N.; long. 79° 52′ E.; from Chidambaram N.N.E. 38 miles; from Cuddalore N.N.E. 15 miles; from Madras S.S.W. 84 miles; from Mercaunum S.S.W. 20 miles; from Tindivanam S.S.E. 23 miles; from Tricalore E. 42 miles; from Vriddhauchellam N.E. 44 miles. Chief settlement of the French possessions in the East indies [india] and the residence of the Governor. Situated at the mouth of a small river, south-east of a long flat hill. The settlement forms part of the delta [conamoogam] of the Ponniaur, and a great portion of its surface is alluvial. Many artesian wells have been sunk, and excellent drinking water is obtainable. The hills known as the Montagnes Rouges form a natural girdle to the country about Pondicherry. The coast board of the settlement is about five miles, and its breadth from three to four miles. The climate is healthy. The territory is divided into three districts:—the district of Pondicherry, properly so called, containing besides the town eleven villages; the district of Villenoor containing forty-five villages; the district of Bahoor containing thirty-six villages. These ninety-two villages are not all contiguous to each other, several being separated by English villages. The total superficies of the three districts is estimated at 69,000 acres which, in consequence of the parcelment, is scattered over a space of about 173,000 acres. The first French settlement was made here in 1674, under Francois Martin. In 1693, captured by the Dutch; restored at the peace of Ryswick in 1699; besieged by the English unsuccessfully in 1748; captured by Sir Eyre Coote in 1761; restored, 1763; captured by Sir Hector Munro in 1778; restored, 1785; captured by Colonel Braithwaite in 1793; finally restored, 1816. Down to the middle of last century Pondicherry was the finest city in India. It now extends along the sea coast about a mile and a quarter, and is about three quarters of a mile in breadth. The town is regularly built and is divided into two parts, the White town and the Black town, separated by a canal. Compare Madras city. The White town is by the seaside. Its streets, lined with trees, are regularly laid out and cut each other at right angles, and the houses are well built. The town has no port, but an open roadstead; which being to windward for nine months of the year, having less surf and possessing a river, is superior to that at Madras. In consequence of the small depth of water on the bar and the violence of the surf, landing can be effected only by a sort of rafts or flat-bottomed boats, constructed for the purpose. Light in square near the beach; lat. 11° 56′; long. 79° 53′; white, fixed, 14 miles; visible from all directions seaward; masonry column, painted light yellow; a guide to the anchorage. In the fair-weather season, from January to October, the common anchorage in the road is abreast the town, in seven or eight fathoms, about three-quarters of a mile from it. Small ships moor in about six fathoms, but during stormy weather anchor well out in twelve or fourteen fathoms. The coast is flat and sandy. In 1879 railway communication was opened with the South indian system. The soil in the territory is composed in part of argillaceous earth, more or less mixed with sand; and in part of very light sandy earth. Principal crops are rice [q.v.], indigo [q.v.], and cocoanuts [q.v.]. Betel [q.v.], tobacco [pogauk], sugar-cane [q.v.], cotton [q.v.], and oil-seeds [yennay] are grown to a small extent. There are spinning, weaving [nesavoo], dyeing [shauyam], and tanning [chamrah] industries. Weaving has of late years languished in consequence of European competition. Pondicherry is a free port. Customs duties are, however, levied on imported arrack [q.v.] and rum manufactured to the east of the Cape of Good Hope or in the Antilles. Tobacco [pogauk] and snuff [nans] are also liable to import duty. For particulars regarding the convention regarding the sale, &c., of salt between the British and French government, see vol. I, 7. The importation of salt [ooppoo], ganjah [q.v.] and bhang [q.v.] are strictly prohibited. Betel [q.v.] and tobacco [pogauk] are monopolies. The revenue from them is raised by leasing plantations to farmers. The chief public buildings are Government house, two pagodas, the new bazaar, clock-tower, light-house, barracks, military hospital, and town hall. There is also an exceedingly neat iron screw pile pier. The supply of drinking water is unrivalled for purity in any other town in Southern india. A colonial college and 172 other schools, attended by nearly 5,000 children, provide for the educational wants of the territory; and a public library of 12,000 volumes, a Catholic mission, two orphanages, and two refuges are among its institutions. The principal places of worship are Church of the Jesuits and the larger but less showy Church of the Capuchins. The buildings of the former Jesuit's college are now occupied as dwelling-houses by the bishop and clergy. The Jinjee or Ariancooppam is the only river. It is navigable during four months in the year for small flat bottom boats. A canal from the Jinjee traverses nearly the whole of the territory of Villenoor. The Coodooveiyaur is, after Ariancooppam, the only water-course in the territory deserving notice. There are sixty artificial tanks [q.v.]. The two most considerable are in the districts of Villenoor and Bahoor. The first covers 1,852 acres, of which one-third is in the English territory, and the second 1,730 acres. There are eleven principal springs. The French monetary system is in force for official purposes, though the real monetary unit is the rupee [q.v.], which is worth 2·40 francs. It is sub-divided into 8 fanams, each fanam [q.v.] being equal to 2 annas [q.v.]. The following are the travelling distances by road from Pondicherry to different places:—

The following are the villages within the territory with their direction and distance from the light-house.——*Arautchicooppam* (ஆராச்சிக்குப்பம் - áráççikkuppam, Tam.). From (áráyççi, tam. examination + kuppam, tam. village). Lat. 11° 47′; long. 79° 48′; from Pond. S.S.W. 13 miles.——*Ariancooppam* (அரியாங்குப்பம் - ariyánguppam, Tam.). From (ariñan, tam. sage, epithet of shiva or vishnu + kuppam, tam. village). Lat. 11° 54′; long. 79° 51′; from Pond. S.S.W. 4 miles.——*Bahoor* (பாகூர் - págúr, Tam). See sep. title.——*Caltramputtu* (கல்த்திராம்பட்டு - kalttirámbattu, Tam.). Acres 389; lat. 11° 58′; long. 79° 45′; from Pond. W. 9 miles.——*Camalam*

(கமலம் - kamalam, Tam.). Means lotus. Acres 430; lat. 11° 57′; long. 79° 41′; from Pond. W. 14 miles.——*Candiancooppam* (கண்டியாங்குப்பம் - kandiyánguppam, Tam.). From (kandiyan, tam. lyrist + kuppam, tam. village). Lat. 11° 56′; long. 79° 46′; from Pond. W. 8 miles.——*Caradicooppam* (கரடிக்குப்பம் - karadikkuppam, Tam.). From (karadi, tam. bear + kuppam, tam. village). Lat. 11° 59′; long. 79° 51′; from Pond. N.W. 4 miles.——*Caulaputt* (காலாப்பட்டு - káláppattu, Tam.). From (kálá, tam. sturgeon fish + pattu, tam. village). Lat. 12° 02′; long. 79° 54′; from Pond. N.N.E. 7 miles.——*Cautpolliem* (காட்டுப்பாளையம் - káttuppálaiyam, Tam.). From (kádu, tam. forest + pálaiyam, tam. fortified village). Lat. 11° 51′; long. 79° 51′; from Pond. S.S.W. 6 miles.——*Condalancooppam* (கொண்டலாங்குப்பம் - kondalánguppam, Tam.). From (kondalán, tam. vishnu, the cloud-colored deity + kuppam, tam. village). Acres 1,083; lat. 12° 02′; long. 79° 44′; from Pond. N.W. 13 miles.——*Cooppam* (குப்பம் - kuppam, Tam.). Means hamlet. Lat. 12° 00′; long. 79° 45′; from Pond. W.N.W. 9 miles.——*Cooppanchauvady* (குப்பன் சாவடி - kuppansávadi, Tam.). From (kuppan, tam. proper name + shávadi, tam. choultry). Lat. 11° 46′; long. 79° 49′; from Pond. S.S.W. 12 miles.——*Corcaday* (கோர்க்கடை - kórkkadai, Tam.). From (kól, tam. beauty + kadai, tam. place). Lat. 11° 52′; long. 79° 48′; from Pond. S.W. 7 miles.——*Cottacooppam* (கோட்டக்குப்பம் - kóttakkuppum, Tam.). From (kóttam, tam. rice field + kuppam, tam. village). Acres 2,361; lat. 11° 58′; long. 79° 53′; from Pond. N. 2 miles.——*Cundamungalam* (கண்டமங்கலம் - kandamangalam, Tam.). From (kandan, tam. a chola king + mangala, san. prosperity). Acres 720; lat. 11° 55′; long. 79° 44′; from Pond. W. 10 miles.——*Cunganauncooppam* (கங்கணாங்குப்பம் - kangananguppam, Tam.). Acres 218; lat. 11° 47′; long. 79° 49′; from Pond. S.S.W. 12 miles.——*Cungaraumpolliem* (கங்கராம்பாளையம் - kangarámbálaiyam, Tam.). From (kangaráman, tam. proper name + pálaiyam, tam. fortified village). Acres 1,674; lat. 11° 54′; long. 79° 39′; from Pond. W. 15 miles.——*Ghory* (கோரி - kóri, Tam.). Means a tombstone. Lat. 11° 58′; long. 79° 50′; from Pond. W.N.W. 4 miles.——*Mailalanjiputt polliem* (மேலழிஞ்சிப் பட்டுப்பாளையம் - mélazhiñjippattuppálaiyam, Tam.). From (mél, tam. west + azhiñjippattu, tam. village so called + pálaiyam, tam. fortified village). Acres 347; lat. 11° 50′; long. 79° 49′; from Pond. S.W. 8 miles.——*Mandagaputt* (மண்டகப் பட்டு - mandagappattu, Tam.). From (mandabam, tam. a public resting place + pattu, tam. village). Acres 1,453; lat. 11° 52′; long. 79° 43′; from Pond. W.S.W. 11 miles.——*Maroothaud* (மருதாடு - maruthádu, Tam.). From (marutham, tam. cultivated land + ádu, tam. sheep). Acres 395; lat. 11° 47′; long. 79° 46′; from Pond. S.W. 13 miles.——*Matharapaukum* (மதுரைப்பாக்கம் - mathuraippákkam, Tam.). From (mathurai, tam. sweet liquor + pákkam, tam. village). Lat. 12° 00′; long. 79° 39′; from Pond. W.N.W. 16 miles.——*Mauncooppam* (மாங் குப்பம் - mánguppam, Tam.). From (má, tam. mango tree, mangifera indica, linn. + kuppam, tam. hamlet). Acres 146; lat. 11° 55′; long. 79° 40′; from Pond. W. 15 miles.——*Moongilputt* (மூங்கிற்பட்டு - múngirbattu, Tam.). From (múngil, tam. bamboo, bambusa arundinacea, willd. + pattu, tam. village). Acres 955; lat. 11° 58′; long. 79° 39′; from Pond. W. 15 miles.——*Moottiaulpett* (முத்தியால்ப்பேட்டை - muttiyálppéttai, Tam.). From (mutyálu, tel. proper name + péttai, tam. suburb). Lat. 11° 57′; long. 79° 53′; from Pond. N. 2 miles.——*Mortaundichauvady* (மொரட்டாண்டிச்சாவடி - morattándiççávadi, Tam.). From (muradu, tam. rudeness + ándi, tam. religious mendicant + shávadi, tam. choultry). Lat. 11° 59′; long. 79° 50′; from Pond. N.W. 4 miles.——*Nernayaputt* (நெர்நயப்பட்டு - nernayappattu, Tam.). Lat. 11° 50′; long. 79° 48′; from Pond. S.W. 9 miles.——*Nullatore* (நல்லாத் தூர் - nallátthúr, Tam.). From (nalla, tam. good + áru, tam. river + úr, tam. village). Acres 1,147; lat. 11° 52′; long. 79° 46′; from Pond. S.W. 9 miles.——*Oolgaray* (உழவக்கரை - uzhavakkarai, Tam.). From (uzhavan, tam. ploughman + karai, tam. bank). Lat. 11° 56′; long. 79° 50′; from Pond. W. 3 miles.——*Oonnaumalay chetty chauvady* (உண்ணாமலைச் செட்டிச்சாவடி - unnámalaiççettiççávadi, Tam.). From (unnámalaiççetti, tam. proper name + shávadi, tam. choultry). Lat. 11° 46′; long. 79° 48′; from Pond. S.S.W. 13 miles.——*Ootchimode* (உச்சிமேடு - uççimédu, Tam.). From (uççi, tam. top of a mountain + médu, tam. rising ground). Acres 217; lat. 11° 47′; long. 79° 50′; from Pond. S.S.W. 12 miles.——*Parangany* (பரங்கணி - parangani, Tam.). From (paran, tam. god + kani, tam. agricultural district). Acres 2,235; lat. 12° 03′; long. 79° 45′; from Pond. N.W. 12 miles.——*Parausy reddipolliem* (பாராசிரெட்டிப்பாளையம் - parásirettippálaiyam, Tam.). From (parásiretti, tam. proper name + pálaiyam, tam. fortified village). Acres 713; lat. 11° 51′; long. 79° 39′; from Pond. W.S.W. 17 miles.——*Paukkam* (பாக்கம் - pákkam, Tam.). Means maritime village. Acres 1,678; lat. 11° 51′; long. 79° 44′; from Pond. S.W. 12 miles.——*Paupanchauvady* (பாப்பான்சாவடி - páppánsávadi, Tam.). From (párppán, tam. bramin + shávadi, tam. choultry). Lat. 12° 00′; long. 79° 49′; from Pond. N.W. 6 miles.——*Perambay* (பெரம்பை - perambai, Tam.). From (pirambu, tam. cane). Acres 756; lat. 11° 56′; long. 79° 48′; from Pond. W. 5 miles.——*Pillaychauvady* (பிள்ளைச்சாவடி - pillaiççávadi, Tam.). From (pillai, tam. one of the caste + shávadi, tam. choultry). Lat. 12° 00′; long. 79° 55′; from Pond. N.N.E. 5 miles.——*Pootoray* (பூத்துறை - pútturai, Tam.). From (pú, tam. flower + turai, tam. ford). Acres 3,804; lat. 11° 58′; long. 79° 49′; from Pond. W.N.W. 5 miles.——*Poottooputt* (புத்துப்பட்டு - puttuppattu, Tam.). From (puttu, tam. hole of snakes, ants, rats, &c. + pattu, tam. village). Acres 1,451; lat. 11° 52′; long. 79° 42′; from Pond. W.S.W. 13 miles.——*Rambaukam* (இராம்பாக்கம் - irámbákkam, Tam.). From (ráma, san. the hero + pákkam, tam. village). Acres 1,020; lat. 11° 50′; long. 79° 39′; from Pond. W.S.W. 17 miles.——*Reddichauvady* (இரெட்டிச்சாவடி - irettiççávadi, Tam.). From (reddi, tel. one of that caste + shávadi, tam. choultry). Lat. 11° 50′; long. 79° 50′; from Pond. S.S.W. 7 miles.——*Shirvandaud* (சிருவந்தாடு - shiruvandádu, Tam.). Acres 928; lat. 11° 52′; long. 79° 39′; from Pond. W.S.W. 16 miles.——*Shorapore* (சொரப்பூர் - shorappúr, Tam.). From (shurappu, tam. abundance + úr, tam. village). Acres 906; lat. 11° 51′; long. 79° 42′; from Pond. W.S.W. 15 miles.——*Shornavore* (சொர்ணவூர் - shornávúr, Tam.). From (shornam, tam. proper name + úr, tam. village). Acres 2,307; lat. 11° 49′; long. 79° 41′; from Pond. W.S.W. 16 miles.——*Tennal* (தென்னல் - tennal, Tam.). From (tennal, tam. south wind). Acres 1,451; lat. 11° 54′; long. 79° 46′; from Pond. W.S.W. 8 miles.——*Tircanore* (திர்க்கனூர் - tirkkanúr, Tam.). Lat. 11° 59′; long. 79° 41′; from Pond. W.N.W. 14 miles.——*Valdavore* (வழுதாவூர் - vazhuthávúr, Tam.). From (vazhuthi, tam. epithet of a pándyan king + úr, tam. village). Acres 1,373; lat. 11° 59′; long. 79° 45′; from Pond. W.N.W. 9 miles.——*Vattacaray* (வட்டக்கரை - vattakkarai, Tam.). From (vattam, tam. circle + karai, tam. bank). Lat. 11° 58′; long. 79° 53′; from Pond. N. 2 miles.——*Vaunore* (வானூர் - vánúr, Tam.). From (ván, tam. rain + úr, tam. village). Acres 3,231; lat. 12° 01′; long. 79° 47′; from Pond. N.W. 8 miles.——*Villenoor* (வில்லியனூர் - villiyanúr, Tam.). From (villiyan, tam. a bowman + úr, tam. village). Lat. 11° 54′; long. 79° 48′; from Pond. W.S.W. 5 miles.——*Yembalam* (ஏம்பலம் - émbalam, Tam.). Lat. 11° 52′; long. 79° 46′; from Pond. S.W. 9 miles.

PONDRAUCA (పొండ్రాక - pondráka, *Tel.*). Village, Port; Kistna dist., in the former Krittivenn zemindarry, Bunder tal.; lat. 16° 21′; long. 81° 18′; from Guntoor E. 54 miles; from Masulipatam N.E. 15 miles; from Yinoocondah E.N.E 102 miles. On Golcondah coast [q.v.]. Salt [ooppoo] manufactured.

PONGAL (పొంగలి - pongali, *Tel.*; பொங்கல் - pongal, *Tam.*). From (pongu, tam. to boil). Because new rice is boiled in milk [paul] and sugar [q.v.] and distributed. Cf. Harvest home. Otherwise Macarasancraunty, Maha sancraunty, Mautt pongal, Peroom pongal, Sancraunty, Tye pirapp, Tye pongal. The greatest of the unsectarian festivals of the Tamulians, probably for past harvest. Solar [madhyama sowra maunam] festival [pundigay, 6d]. It is celebrated when the sun [sooryan] enters Capricorn [macaram] to take northward course [oottarauyanam] on the first day of the tenth solar month Tye [mausam] about the 11th of January, and lasts three days. Sufficiently described at vol. 1 (93) [maryauday].

PONNAIRY (پونير - ponner, *Hind.*; பொன்னேரி - ponnéri, *Tam.*). From (pon, tam. beauty + éri, tam. tank) [pon].——(1) Talook, Chingleput district. Tahsildar's pay Rs. 150. Area 347 square miles. Population 122,418. Language Tamul and Teloogoo. N. of district. Bounded E. by Bay of Bengal, N. by Polore division of Nellore district, W. by Vencatagherry and Calastry zemindarries and Trivellore talook, and S. by Sydapett talook. Consists of an almost unbroken flat of paddy [q.v.] fields and desert plain, while its eastern and northern borders are covered with salt swamps and low-lying sandy tracts. The high road from Madras to Calcutta traverses the talook. Average rainfall 35 inches. The soil is much less fertile than that of Trivellore and Sydapett and in the majority of villages it falls under the lowest classification. Casuarina [chowkmaram] planting is carried on, although not so extensively as in Sydapett talook. Red handkerchiefs [roomaul] and Mussalman [q.v.] cloths are woven at Poolicat. The fame of the Arnee muslins [q.v.] has departed. The Corteliaur flows through the southern portion and the Aranyanuddy through the centre. The largest tank is that at Cholavaram. About 23,084 acres of dry land are cultivated, 4,491 being entered as topes, and 32,067 acres as wet. In the former are 10,767 acres, or 46·64 per cent., under paddy [q.v.], representing the old Maunavaury [q.v.] lands of the talook, and ordinary dry land irrigated at the cost of the cultivator. Petty Zemindarries:—Agaram, Alinjivaukam, Arivadoray, Aroovaukam, Aumore, Canacambaukam, Caroongooly, Caunjivauyal, Chinnacauvanam, Codoor, Colattore, Coloor, Coommungalam, Covantaungal, Devaranjery, Giridhanapooram,

Iroolaputt, Juggannautapooram, Keelmathalambaid, Keerapaukam, Krishnaupooram, Lingasamoodram, Lutchmeepooram, Madimey, Mathiravaid, Nedoovarambaukam, Ooppalam, Oracaud, Panapaukam, Paricaputt, Paudyanullore, Peroovoyil, Pŏnnairy, Poolicoolam, Poottaharam, Pullambaukam, Shellapillaiyaurcooppam, Shembiyamanaly, Shennivaukam, Shittarasore, Shivapooram, Tatchoor, Tautharasore, Tirvencatapooram, Tirvyepaudy, Vembaukam, Yelimbaid. Places of archæological interest:—Arnee, Arvattoray, Aundaurcooppam, Cholavaram, Mailore, Minjoor, Nauyar, Panjutty, Ponnairy, Poolicat, Tirpaulaivanam, Tirvellavauyal, Yermaivettipolliem. Principal trig. stations:—Rettambaid, Yerauncherry. The leading places, &c., in the talook are the following.——*Arnee* (ஆரணி - árani, Tam.). See sep. title.——*Attiputt* (அத்திப்பட்டு - attippattu, Tam.). From (atti, tam. fig tree, ficus racemosa, linn. + pattu, tam. village). Village; pop. 1,293; acres 2,260; lat. 13° 16′; long. 80° 21′; from Ponnairy S.E. 8 miles; from Sydapett N. 17 miles; from the sea W. 3 miles. Salt-producing centre.——*Aumore* (ஆமூர் - ámúr, Tam.). From (ámá, tam. wild ox + úr, tam. village). Zemindarry, Village; pop. 628; acres 1,091; lat. of village 13° 18′; long. 80° 15′; from Ponnairy S. 3 miles; from Sydapett N. 19 miles; from the sea W. 11 miles. Peshcush Rs. 2,618.——*Cholavaram* (சோழவரம் - shózhavaram, Tam.). See sep. title.——*Cochrane canal* (கொக்ரோன் வாய்க்கால் - kokkarénváykkál, Tam.). See sep. title.——*Coromandel* (கரு மணல் - karumanal, Tam.). See sep. title.——*Corteliaur* (கொர்த்தலையாறு - korttalaiyáru, Tam.). See sep. title.——*Goommidipoondy* (கும்மிடிப்பூண்டி - kummidippúndi, Tam.). From (gummadi, tel. cucurbita maxima, duch. + púndi, tam. village). Village; pop. 1,145; acres 915; lat. 13° 24′; long. 80° 11′; from Ponnairy N.W. 7 miles; from Sydapett N.W. 27 miles; from the sea W. 14 miles. A road side village at 30th mile of great northern trunk road from Madras to Nellore. Spacious choultry [q.v.] and tank [q.v.] built and endowed by a wealthy native of Madras. Travellers' bungalow [q.v.]. Frequented for snipe [oollaun].——*Keelmathalambaid* (கீழ்மத லம்பேடு - kízhmathalambédu, Tam.). From (kízh, tam. east + mathalambédu, tam. place so called). Zemindarry, Village; pop. 1,232; acres 1,103; lat. of village 13° 21′; long. 80° 12′; from Ponnairy N.W. 4 miles; from Sydapett N.W. 23 miles; from the sea W. 14 miles. Peshcush Rs. 1,468.——*Panapaukam* (பனப்பாக்கம் - panappákkam, Tam.). From (panai, tam. a palmyra, borassus flabelliformis, linn. + pákkam, tam. village). Zemindarry, Village; pop. 671; acres 1,419; lat. of village 13° 23′; long. 80° 12′; from Ponnairy N.W. 5 miles; from Sydapett N. 25 miles; from the sea W. 13 miles. Peshcush Rs. 1,336.——*Peroovoyil* (பெருவாயல் - peruváyal, Tam.). From (peru, tam. big + váyil, tam. entrance). Zemindarry, Village; pop. 753; acres 1,160; lat. of village 13° 21′; long. 80° 13′; from Ponnairy W. 4 miles; from Sydapett N.W. 23 miles; from the sea W. 13 miles. Peshcush Rs. 1,655.——*Ponnairy* (பொன்னேரி - ponnéri, Tam.). See below.——*Poolicat* (பழவேர்க்காடு - pazhavérkkádu, Tam.). See sep. title.——*Poothoovoyil* (புதுவாயில் - puthuváyil, Tam. puduváyil *). From (puthu, tam. new + váyil, tam. gate). Shrotriem [q.v.] village; pop. 814; acres 1,233; lat. of village 13° 20′; long. 80° 13′; from Ponnairy W. 3 miles; from Sydapett N. 22 miles; from the sea W. 13 miles.——*Rettambaid* (இரெட்டம்பேடு - irettambédu, Tam.). From (irattai, tam. double + pédu, tam. village). Trig. station; lat. 13° 26′ 05·04″; long. 80° 12′ 39·30″; height 63 feet; from Ponnairy N. 7 miles; from Sheganiem S.W. 1 mile; from the sea W. 11 miles.——*Tirvyepaudy* (திரு வாய்ப்பாடி - tiruváyppádi, Tam.). From (tiru, tam. holy + váy, tam. word + pádi, tam. village). Zemindarry, Village; pop. 576; acres 66; lat. of village 13° 21′; long. 80° 15′; from Ponnairy N. ¼ mile; from Sydapett N. 22 miles; from the sea W. 10 miles. Peshcush Rs. 63. Hamlet of Ponnairy. Shiva temple with inscriptions.——*Vulloor* (வல்லூர் - vallúr, Tam.). From (val, tam. hillock + úr, tam. village). Village; pop. 3,643; acres 4,927; lat. 13° 16′; long. 80° 21′; from Ponnairy S.E. 8 miles; from Sydapett N. 17 miles; from the sea W. 4 miles. Centre of large salt-producing tract. Tank is fed by the Corteliaur.——*Yerauncherry* (எராஞ்சேரி - eráñjéri, Tam.). From (éra, tam. high + shéri, tam. village). Trig. station; lat. 13° 12′ 45·54″; long. 80° 19′ 43·67″; from Ponnairy S.E. 10 miles; from Vellivauyal S. 1 mile; from the sea W. 4 miles.——*Yermaivettipolliem* (எருமைவெட்டிப்பாளையம் - erumaivettippálaiyam, Tam.). From (erumai, tam. a buffalo + vetti, tam. way + pálaiyam, tam. fortified village). Village; pop. 423; acres 1,291; lat. 13° 15′; long. 80° 11′; from Ponnairy S.W. 8 miles; from Sydapett N.W. 16 miles; from the sea W. 14 miles. Two old Shiva and Vishnoo temples; the latter with an inscription of the Vijianugger dynasty dated A.D. 1517. On the cliffs to the north-east rude stone implements have been found.——**(2)** Zemindarry; Chingleput district, Ponnairy talook. Peshcush Rs. 262.——**(3)** Village, Talook headquarters; Chingleput dist., Ponnairy tál.; pop. 717; acres 337; lat. 13° 20′; long. 80° 15′; from Chingleput N. 45 miles; from Conjeeveram N.E. 47 miles; from Madras N. 19 miles; from St. Thomas' mount N. 23 miles; from Sydapett N. 21 miles; from the sea W. 10 miles. On the right or S. bank of Narrainavaram river. Comprises Coommungalam, Ponnairy and Tirvyepaudy all zameen [q.v.] villages. Shiva and Vishnoo temples. Dyeing [shauyam] of cloths and manufacture of palampores [q.v.].

PONNANY (പൊന്നാനി - ponnáni, *Mal.* ponáni *). From (pon, mal. gold + nánayam, mal. coin) [pon]. The Araby cash [q.v.] was first circulated here by Arab and Persian merchants.——**(1)** Talook, Malabar district. Tahsildar's pay Rs. 225. Area 482 square miles. Southernmost talook of the district. Extreme length from north to south along the coast 64 miles, width from 3 to 20 miles. S. coast of district. Boundaries:—north, Yernaud talook; east, Valavanaud talook and native state of Cochin; south, native state of Cochin; west, Arabian sea. Formerly comprised three talooks of Bettatnaud, Cootnaud, and Chowghaut, which were amalgamated in 1861. Soil along the coast poor and sandy; open sea-board fringed with cocoanut [q.v.] trees. No granite on coast, but in the interior the formation is gneissic, traversed by granite [caroom cull] veins. The most striking feature is the series of backwaters [canyal] lying zigzag along coast and affording with the connecting artificial canals inland water communication. They extend southwards from Tiroor to Ponnany, Chowghaut and Cochin and thence into Cochin and Travancore states. Total length from Tiroor to Cochin is 93 miles, of which 77 lie in the talook. The talook is also intersected by the Ponnany and minor streams. Timber from the Anamullays and Munnarcaud forests is floated down river during rainy season to the timber depôts at Ponnany. Has two large shallow lakes; the Viyyattil lake three miles east of Ponnany and Trichore lake, about the same distance east of Chetwye, and eight miles from Chowghaut. They respectively connected with the backwaters communicating with the sea at Velliangode and Chetwye. Protected by strong artificial dams from tidal influence, the beds of both are to a considerable extent cultivated with paddy [q.v.] after the monsoon [q.v.]. The Viyyattil lake lies entirely in this talook, while the greater portion of Trichore lake belongs to Cochin state. Staple produce cocoanuts [q.v.]. Paddy [q.v.] is largely cultivated. Places of archæological interest:—Alangode, Anantavore, Annakara, Atchipooram, Autavanaud, Cauttiparootty, Chamravuttam, Chekkode, Chetwye, Chowghaut, Claury, Codacull, Comauranullore, Cummaunam, Cuppore, Gooroovayore, Keralaudheeshwarapooram, Mailmoory, Moollacherry, Nauglacherry, Nirmaroottore, Olore, Paroothore, Pullipooram, Punniyore, Soocapooram, Tanalore, Taunore, Tirnavoya, Tirvanjicoolam, Toliyore, Tricaniyore, Triprangode, Trittaula, Vadakoombram, Vairore. Principal trig. station:—Coornaud. The leading places, &c., in the talook are the following.——*Andattode* (അണ്ടത്തോട് - antattótu, Mal.). Means a frequented canal. Village; pop. 6,028; lat. 10° 41′; long. 76° 01′; from Calicut S.S.E. 41 miles; from Ponnany S.S.E. 8 miles; from the sea E. ¾ mile. Amshom [q.v.] cutcherry [q.v.], market on Tuesdays. Ponnany-Cochin canal is half-a-furlong east. Temple called Vettakkormagan cshetram.——*Anjoor* (അഞ്ചൂർ - añchúr, Mal.). From (añchu, mal. five + úr, mal. village). Village; pop. 7,620. Syrian christian village.——*Attacooy* (അട്ടക്കുഴി - attakkuzhi, Mal.). From (atta, mal. leech + kuzhi, mal. hollow). Village, Port; pop. 4,563.——*Autavanaud* (ആതവനാട് - átavanátu, Mal.). From (átapa, san. heat + nátu, san. country). Village; pop. 9,884; lat. 10° 54′; long. 76° 5′; from Calicut S.E. 30 miles; from Ponnany N.E. 11 miles; from the sea E. 10 miles. Residence of Alwancherry tumbraukkal [q.v.], or chief of Numboories [q.v.].——*Bettatnaud* (വെട്ടത്തുനാട - vettattunátu, Mal.). See sep. title.——*Bettatt poothiyangaudy* (വെട്ടത്തുപുതി യങ്ങാടി - vettattuputiyannáti, Mal.). See sep. title.——*Chaulicherry* (ചാലിശ്ശേരി - chálishshéri, Mal.). From (cháli, mal. rice + shéri, mal. village). Pop. 891. Small village and bazaar [q.v.] on the borders of Cuppore and Cottatchira amshoms [q.v.], about 6 miles south of Trittaula. Syrian [q.v.] christians have a small church. Trade in areca-nuts [q.v.]. Weekly market on Thursdays.——*Chetwye* (ചേററു വായ - chéttaváya, Mal.). See sep. title.——*Chowghaut* (ചാവക്കാട - chávakkátu, Mal.). See sep. title.——*Codacull* (കൊടക്കൽ - kotakkal, Mal.). Means umbrella stone; from the archæological relics. Village; pop. 5,393; lat. 10° 59′; long. 76° 04′; from Calicut S.E. 24 miles; from Ponnany N.E. 14 miles; from the sea E. 10 miles. Rock-cut burying places half a mile distant. Small village of native Christians, and German mission church. Weaving establishment under the mission.——*Coornaud* (കുറനാട് - kurnátu, Mal.). From (kuru, mal. small + nátu, mal. country). Trig. station; lat. 10° 47′ 32·64″; long. 76° 08′ 36·50″; height 354 feet; from Mailattore W. 2 miles; from Ponnany E. 12 miles; from the sea E. 13 miles.——*Cootnaud* (കുററനാട് - kúttanátu, Mal.). From (kúttan, mal. large + nátu, mal. country). Village; lat. 10° 45′; long. 76° 09′; from Calicut S.S.E. 40 miles; from Ponnany E.S.E. 12 miles; from the sea E. 11 miles. Formerly gave its name to a talook, now comprised in Ponnany talook.——*Coottingal* (കൂട്ടിങ്ങൽ - kúttinnal, Mal.). Means junction place;

from the market on Wednesdays. Pop. 2,646; lat. 10° 35′; long. 76° 04′; from Calicut S.S.E. 48 miles; from Ponnany S.S.E. 14 miles; from the sea E. 1¼ miles. In Paulayore amshom by the side of the canal from Ponnany to Cochin, about 17 miles south of the former. District moonsif's court. Syro-Roman catholic church, called Paulayore church, one of the seven original churches of Malabar. St. Thomas the Apostle preached here.——*Coottipooram* (കുറ്റിപ്പുറം - kuttippuram, Mal. kuttipuram *). From (kutti, mal. boundary + puram, mal. beyond). Village, Railway station, a market every Sunday; pop. 2,646; lat. 10° 51′; long. 76° 05′; height 47 feet; from Calicut S.S.E. 83 miles; from Ponnany E.N.E. 9 miles; from the sea E. 9 miles.——*Cootye* (കൂട്ടഴി - kúttazhi, Mal.). From (kúttu, mal. junction + azhi, mal. river mouth). Here the backwaters from Tiroor and Ponnany unite and communicate with sea, or have done so. Village, Sub-port attached to the Ponnany port; pop. 5,069; lat. 10° 51′; long. 75° 57′; from Bettatt poothiyangaudy S.W. 3 miles; from Bombay S.S.E. 580 miles; from Calicut S.S.E. 29 miles; from Ponnany N.N.W. 4 miles. Large Mahomedan village, by the side of the sea.——*Cottapady* (കോട്ടപ്പടി - kóttappati, Mal.). From (kótta, mal. fort + pati, mal. gate). Deshom [q.v.] partly lying in Vayilattore and partly in Gooroovayore amshom [q.v.]. Close to seat of the old Poonnattore rajah, whose family still remain. Syrian [q.v.] christians. Trade in cocoanut [q.v.] oil and rearing of country pigs [soor] by Christians. These animals are transported to Neilgherries, &c.——*Gooroovayore* (ഗുരുവായൂര് - guruváyúr, Mal.). From tradition that temple was founded by brihaspaty [q.v.] and the god of wind [vayoo]. Sanscrit name (gurupavanapura), meaning brihaspaty + vayoo + town; also (vátálaya), meaning wind + abode. Village, Place of pilgrimage and renowned Hindoo temple; pop. 7,423; lat. 10° 35′; long. 76° 05′; from Calicut S.S.E. 46 miles; from Ponnany S.S.E. 14 miles; from the sea E. 3 miles. Inhabitants chiefly Numboory bramins [q.v.] and Nayars [q.v.]. Large temples, destroyed by Tippoo in 1784, and restored by the Zamorin [q.v.] in 1794.——*Parony* (പരോന്ന - parónna, Mal.). See sep. title.——*Ponnany* (പൊന്നാനി - ponnáni, Mal.). See below.——*Taunore* (താനൂര് - tánúr, * Mal.). From (tánni, mal. tree, terminalia belerica, roxb. + úr, mal. village). Village, Railway station, Port, a Moplah town, Sub-registrar's office, Moosaufer khana and Travellers' bungalow; lat. 10° 58′; long. 75° 55′; height 26 feet; from Bombay S.S.E. 570 miles; from Calicut S.S.E. 20 miles; from Mangalore S.S.E. 146 miles; from Parony N.N.W. 5 miles; from Parpanangaudy S.S.E. 7 miles; from Pónnany N.N.W. 14 miles. At the mouth of a small river, 2 miles west of the railway station. It was a small kingdom at the arrival of the Portuguese, in partial subjection to the Zamorin [q.v.]. In 1782, the British army, acting against the forces of Hyder ally, took refuge here from a storm of five days' continuance, which dispersed the boats, spoiled the provisions, and damaged the ammunition of the expedition. Formerly prosperous, but now much decayed.——*Tirnavoya* (തിരുനാവായ - tirunáváya. Mal.). See sep. title.——*Tiroor* (തിരൂര് - tirúr, Mal.). See sep. title.——*Tripriaur* (തൃപ്രയാര് - tripraýár, Mal.). From (tri, mal. holy + pura, san. town + áru, mal. river). Village, Place of pilgrimage; pop. 1,965. Is on the western side of the canal from Tiroor to Cochin. Temple belonging to Cochin state.——*Trittaula* (തൃത്താല - trittála, Mal.). From (tri, mal. holy + tála, san. palm tree, borassus flabelliformis, linn.); lat. 10° 48′; long. 76° 11′; from Calicut S.S.E. 39 miles; from Ponnany E. 14 miles; from the sea E. 15 miles. Small village in Cootnaud amshom by the side of Ponnany river on the road from Ponnany to Palghaut. Travellers' bungalow [q.v.]. Weekly market. About four miles south are the ruins of Cootnaud fort.——*Valappaud* (വലപ്പാട് - valappátu, Mal.). From (vala, mal. net + pátu, mal. village). Pop. 4,563; lat. 10° 24′; long. 76° 10′; from Coottingal S.S.E. 14 miles; from Calicut S.S.E. 62 miles; from Ponnany S.S.E. 29 miles; from the sea E. 2 miles. Syrian christians. In Pullipooram amshom. Market on Thursdays.——*Velliangode* (വെളിയങ്കോട് - veliyankótu, Mal.). From (veliyan, mal. open + kótu, mal. place). Village, Port; lat. 10° 44′; long. 75° 59′; from Bombay S.S.E. 590 miles; from Calicut S.S.E. 36 miles; from Chowghaut N.N.W. 12 miles; from Ponnany S. 4 miles. At the mouth of the river of the same name. A small port of call for coasting craft loading with cocoanuts [q.v.] and other country produce. Chiefly Moplahs [q.v.].——*Yedappaul* (എടപ്പാള് - etappál, Mal.). From (eta, mal. middle + pázh, mal. empty space). Large trading village; pop. 7,538; lat. 10° 48′; long. 76° 02′; from Calicut S.S.E. 34 miles; from Ponnany E. 5 miles; from the sea E. 5 miles. Chiefly Moplahs [q.v.]. The ancient Chovoor [q.v.] is close to this. Ancient Shoocapooram temple to Dacshinamoorty [q.v.] or Shiva. No yaugams [q.v.] by Numboories are recognized as such until they are registered at this pagoda [q.v.]. This registration takes place once in twelve years. The Shreecovil, Garbhagriham [q.v.] or shrine of the temple [coil, pagoda] is a massive laterite [q.v.] structure. About 6 miles north-east is an ancient temple attached to the Numboory [q.v.] bramin colony of Punniyore [q.v.], of Chiracal talook; presiding deity Varauha moorty, the third incarnation [avatar] of Vishnoo [q.v.].——*Yedatirootty* (എടത്തുരുത്തി - etatturutti, Mal.). From (eta, mal. middle + turutti, mal. island). Pop. 10,409; lat 10° 23′; long. 76° 12′; from Valappaud S.E. 3 miles; from Calicut S.S.E. 64 miles; from Ponnany S.S.E. 32 miles; from the sea E. 4 miles. Syrian christians.——*Yenamacull* (ഏനാമാക്കല് - énámákkal, Mal.). See sep. title.——**(2)** Town, Port, Divisional and talook head-quarters, Moonsif's court, Telegraph office, Sub-registrar's office; Malabar dist., Ponnany tal.; pop. 13,143; lat. 10° 47′; long. 75° 58′; from Bangalore S.W. 186 miles; from Bombay S.E. 586 miles; from Cootye S.S.E. 4 miles; from Calicut S.S.E. 33 miles; from Mangalore S.S.E. 160 miles; from Madras W.S.W. 330 miles; from Cannanore S.S.E. 82 miles; from Malapooram S.W. 20 miles; from Manantoddy S.S.W. 68 miles; from Tellicherry S.S.E. 71 miles; from Velliangode N. 4 miles. At the mouth of Ponnany river. Here Moplah seaport, most important between Cochin and Calicut, possessing water communication with railway station at Tiroor and with Cochin and Travancore. Nearest port to Pálghaut gap. Once proposed as terminus of Madras railway. Moplah [q.v.] tangal [q.v.] or Makhdoom [q.v.] or high priest has head-quarters here. Also centre of Mussalman education on the west coast, possessing a religious college which confers degrees. The proficients are called Moosaliyaurs [q.v.]; the Makhdoom [q.v.] gives the degrees. Here the English retired from Cochin in 1662, and Colonels Macleod and Humberstone repulsed Tippoo and Lally in 1782. When Colonel Hartley in 1790 made his celebrated descent upon the west coast, the inhabitants of Ponnany gave in their adhesion readily. The population is supported by fishing and by trade; having numerous puttimars [q.v.] which ply to Surat, Arabia, Bombay, Madras, and even as far as Bengal, exporting principally pepper [q.v.], betel [q.v.], rice [q.v.], cocoanuts [q.v.], iron [auhan], and very fine timber sent down the river from the ghauts [q.v.]. The trade in salt [ooppoo] was once extensive. The imports are wheat [geung], sugar-cane [q.v.], molasses [jaggery], oil-seeds [yennay], groceries and spices. Contains Cootnaud district moonsif's court, Travellers' bungalow. About half mile south-east at Tricauv, an ancient Hindoo temple to Doorga bhagavaty [q.v.]. Tippoo plundered the temple, broke the idol [shilay, vigraham] into pieces, and used the Shreecovil as his powder magazine [q.v.].——**(3)** River; Malabar dist., Palghaut, Ponnany, Valavanaud tals. Otherwise Bhauratapoya or river where the pandavas bathed. Named from the town situate on the south side of its estuary. Rises in the Anamullays in Coimbatore district in the vicinity of some tanks in lat. 10° 19′; long. 77° 6′. Flowing north-west, through the Palghaut gap, it crosses the east boundary of Malabar about 55 miles from its source in lat. 10° 42′, long. 76° 45′. Then turning west, it flows by Palghaut, and continuing to hold the same direction for 25 miles in lat. 10° 45′, long. 76° 31′ it becomes the boundary between Cochin and Malabar and continues so for 23 miles to lat. 10° 47′, long. 76° 14′, where it enters the district, and flows westward through it for 25 miles, to its fall into the Arabian sea at Ponnany town in lat. 10° 47′, long. 75° 58′. During its course it flows for about 70 miles parallel to the south-west line of the Madras railway. The Walayaur and Varattaur join the Cauriyaur, 5 miles east of Palghaut. The stream so formed is again joined by the Palaur, about 2 miles north of Palghaut, and the united river then falls into the Ponnany at Yedattara. About 15 miles lower down at Wottapollem, the Ponnany receives with other less significant tributaries the Meengara, Collangode, and the Aulatore river with its tributaries. From December to May these rivers are dry. During six months of the monsoon [q.v.] they have water and are subject to heavy freshes. The river is navigable for canoes as high as Palghaut 63 miles from the sea. It can be navigated only by small craft, on account of a bar with small depth of water at the mouth as shoal water inside, but is useful during the monsoons, when it floats down to the coast great quantities of fine timber. It is the longest river which discharges into the Arabian ocean in Malabar proper. The main stream is about 156 miles long, and the lengths of its three chief tributaries before they join the main stream are respectively about 60, 50 and 46 miles. But the volume of water discharged from the large area drained by this river and its tributaries is probably not so great and is certainly not so constant as that discharged either by the Belliapatam or by the Beypore river.

PONNAUK (पिण्याक - pinyáka, *San.*; کهل - khal, *Hind.*; గానుగపిండి - gánugapindi, *Tel.*; പിണ്ണാക്ക് - pinnákku, *Mal.*; பிண்ணாக்கு - pinnákku, *Tam.*). San. from (pish, san. to grind). Tel. from (gánuga, tel. oil mill + pindi, tel. flour). Mal. and Tam. from sanscrit. Oil cake. Otherwise Oil-seed cake. The solid compressed mass remaining after the expression of oil [yennay] from the many oil-yielding seeds, nuts, &c. It retains after the most perfect treatment by pressure, a considerable portion of oil with practically the whole of the albuminous matter, sugar, mucilage and starchy components of the seed, thus forming a concentrated nutritious food for cattle [maud] and sheep [aud].—" a" The following is a key-list of the chief oil cakes of S. india:—Arachis hypogæa, ground-nut; Bassia longifolia, common mohwah; Brassica campestris, subsp. napus, rape; Carthamus tinctorius, safflower, seed cake; Cocos nucifera, cocoanut; Gossypium herbaceum, indian cotton; Guizotia abyssinica,

ramtil; Linum usitatissimum, flax; Papaver somniferum, opium poppy; Sesamum indicum, gingelly.—"*b*" Compare :—Corchorus olitorius (pinnákkuççedi); Melochia corchorifolia (pinnákkupúndu); each meaning oil-cake plant from greens being cooked as vegetable with sesamum [gingelly] oil cake.

POO (പൂ - pú, *Mal.*; பூ - pú, *Tam.*). Flower [phool].—"*a*" Plant first term, in sense of conspicuous bright flowers or soft wood, often joining two genera. Ex., where transl. is of second term :—Canna indica (púvázhai), musa paradisiaca; Dolichandrone crispa (púmbáthiri), stereospermum chelonoides; Givotia rottleriformis (púttarali), nerium odorum; Nephelium longana (púvatti), ficus glomerata; Randia dumetorum (púngárai), canthium parviflorum; Schleichera trijuga (púvatti), ficus glomerata; Thespesia populnea (púpparutti), gossypium herbaceum, (púvarasu), ficus religiosa. See gloss. paragraphs.—"*b*" Plant second term. Ex., where transl. is of first term :—Barringtonia racemosa (samudrapú), ocean; Eugenia caryophyllata (karayámbú), black + to become; Heliotropium indicum (nakkipú), to lick; Lagerstrœmia flos-reginæ (katalpú), sea; Lagerstrœmia indica (shínappú), china; Lantana indica (arippú), small, (nátapú), fragrance; Passiflora leschenaultii (shimikkippú), ear ornament; Pergularia minor (tongippú), to hang; Sterculia guttata (ramanappú), delighting; Vinca rosea (shudugáttuppú), place of cremation; Webera corymbosa (kuppippú), bottle. See gloss. paragraphs.—"*c*" Fish first term.; showing bright colors. Ex., where transl. is of second term :—Barbus chrysopoma (púngálá), sturgeon, polynemus genus; Barbus sarana (púngálá), sturgeon, polynemus genus; Barbus tor (púmíngendai), fish + carp, barbus genus; Chanos salmoneus (púmínu), fish; Gobius giuris (púván), flowery; Ophiocephalu smarulius (púchépa), fish and (púvirál), ophiocephalus genus; Ophiocephalus striatus (púchépa), fish; Silundia sykesii (púnattai), snail. See gloss. paragraphs.——*Poogil* (പുകിൽ - pukil, Mal.). From (pú, mal. to flower). Harvest. Poogil vivaram is crop-account.——*Poolah* (பூலா - púlá, Tam.). See sep. title.——*Poolay* (பூளை - púlai, Tam.). See sep. title.——*Poonamallee* *(پھولمری - phúlmarí, Hind.; பூந்தமல்லி - púndamalli, Tam.). From (pú, tam. flower + iru, tam. to be + malli, tam. the jasmine creeper, jasminum sambac, ait.); from large cultivation of jasmine [q.v.] flowers with which the madras market is supplied. Sanscrit name (pushpakavallí), meaning flower + vully, the goddess.—"*a*" Deputy tahsildarry, Sydapett talook, Chingleput. Pay Rs. 70.—"*b*" Town, Cantonment, Head-quarters of Cantonment joint magistrate, District moonsif, Deputy tahsildar and Sub-registrar; Chingleput dist., Sydapett tal.; pop. 7,468; acres 1,250; lat. 13° 03′; long. 80° 10′; from Chingleput N. 26 miles; from Conjeeveram E. 31 miles; from Madras W. 13 miles; from St. Thomas' Mount W. 6 miles; from Sydapett W.N.W. 7 miles; from the sea W. 11 miles. On high western trunk road. Salubrious and well drained. Granted in jagheer [q.v.] to the Company on 26th September 1750 by Anwar ood deen khan, revenue with customs 34,840 pagodas [q.v.]. Confirmed by way of inam [q.v.] or free gift by a sunnud [q.v.] from the Moghul [q.v.] on 12th August 1765. Now cantonment for European recruits and invalids. Contains barracks for 500 men. 400 yards east of cantonment is old fort now used principally for godowns [q.v.] for stores and for a hospital. It is a Mahomedan work, 175 yards long, 142 broad, surrounded by a rampart 18 feet high, and was of considerable use during the wars of the Carnatic [q.v.]. Old Shiva temple with three modern Tamul inscriptions, two dated A.D. 1770 and 1778. Rude stone implements were found four miles south-west by west of the town at Palanjore river.——*Pooncadal varnan* (பூங்கடல்வண்ணன் - púngadalvannan, Tam.). From (above + kadal, tam. sea + varna, san. color). The sea-colored Ayenaur [ayen].——*Pooneer* (பூநீறு - púníru, Tam.). Tam. means flowering ashes. Very light white-colored, saline efflorescence on ground [sujjeekhaur, sowdoo] containing a great proportion of carbonate of soda; from this as well as from oovar munn [q.v.] or dhoby's earth [q.v.], soda is prepared; it is employed in making glass [gauzoo], in dyeing [shauyam] blue and scarlet, and also by the chucklers [q.v.] in dyeing leather [chamrah] red and in tanning [chamrah]. Cf. Paulasowdoo, which is something similar.——*Poongaud* (பூங்காடு - púngádu, Tam.). From (above + kádu, tam. forest). Tender forest. Poongaut tariss is land left waste for upwards of five years.——*Poosany* (பூசணி - púsani, Tam.). From (above + shanai, tam. to grow luxuriantly); grows luxuriantly and puts forth many flowers which do not fruit. Cucurbita maxima. Plant second term. Ex., where transl. is of first term :—Cucumis melo, var. utilissimus (kaliyánappúsani), marriage; Cucurbita ovifera (shímaippúsani), foreign; Ipomæa digitata (nilappúsani), ground. See gloss. paragraphs.——*Pooval* (പൂവൽ - púval, Mal.). A crop.——*Poovana* (பூவெண்ணெய்ச்செடி - púvenneyççedi, Tam.). Tam. from (pú, tam. flower + enney, tam. oil + shedi, tam. plant); from fragrant oil. Botanically Sarcostigma kleinii, w. & a., olacineæ [vricsham, 38]. Climbing shrub, branched; leaves alternate, short-petioled, oblong-oval, acuminate, coriaceous, glabrous; racemes usually paired axillary, very long, interrupted; flowers forming numerous sessile fascicles, without pedicels; fruit an oval somewhat flattened nut, about an inch long and half an inch broad; malabar coast. Oil has a very peculiar but not disagreeable odour; medicinal also burnt in lamps. No other species here.——*Poovauly* (பூவாளி - púváli, Tam.). From (above + váli, tam. arrow). Manmatan [q.v.].

POO (पू - pú, *San.*). Purify.——*Pavanan* (पवन - pavana, San.). From (pú, san. to purify). Wind [vayoo] personified.——*Pavitram* (पवित्र - pavitra, San.). From (pú, san. to purify). Sacred thread [jandiram, jaunwah, poonool].——*Poonya bhoomy* (पुण्यभूमि - punyabhúmi, San.). From (punya, san. holy + bhúmi, san. earth). The holy land of Aryavartam in N. india.——*Poonyacaulam* (पुण्यकाल - punyakála, San.). Auspicious time. Any day held sacred on account of the conjunction [sangamam] of certain stars [nacshatram, dacshinauyana poonya caulam, oottarauyana poonya caulam, pundigay 6d, vishoo poonya caulam].——*Poonyagherry* (పుణ్యగిరి - punyagiri, Tel.). From (punya, san. holy + giri, san. hill). Sanscrit name (kótilingatírt'ha), meaning crore + phallic emblem + place of sacred waters. Hill; Vizagapatam dist., Srungavarapoocote division. Cascades on hill, with petrifactive properties, into which bones of dead are thrown. On Shivarautry [pundigay, 6a] a festival. In valley a goddess Dhaura gungamma.——*Poonyam* (पुण्य - punya, San.). From (pú, san. to purify). Sacred religious merit.——*Poonya prauny* (पुण्यप्राणी - punyapráni, San.). From (punya, san. sacred + práni, san. animal). Title otherwise Poonya jantoo. Sacred animal. Various animals are regarded as the vauhans [q.v.] or vehicles upon which the gods and goddesses travel. Thus Indran [q.v.] rides upon the elephant [q.v.] eirauvatam [q.v.], Shiva [q.v.] on the bull nundy [q.v.], Yaman [q.v.] on a buffalo [khoolgah], Doorga [q.v.] on a lion [simham] or tiger [pooly], Agny [q.v.] on a ram [aud], Vayoo [q.v.] on an antelope [jinka], Cauma devan [manmatan] on a parrot [totah], Ganesh [q.v.] on a rat [ely], and Shashty [q.v.] on a cat [poonay]. Veerabhadran [q.v.], the emanation of Shiva which destroyed Dacshan's [q.v.] sacrifice rode on a dog [nye]. The jackal [q.v.] is regarded as a representative of Doorga [q.v.], who in this form assisted in preserving Krishnan [q.v.], on the night of his birth, from Cumsan's anger. Monkeys [bandar], as representatives of Hanooman [q.v.], are very commonly worshipped. The dog, though worshipped by some, is regarded as unclean by others. Amongst birds, the goose [hamsam] is a vehicle of Bramha [q.v.], the peacock [mayil] that of Caurtikeyan [q.v.], and the vulture [gidh] that of Shany [q.v.]. The Braminy kite [q.v.] is said to be a form of Doorga [q.v.]. The Khanjanam, or wag-tail [pilkya], represents Vishnoo [q.v.], because the mark on its throat resembles the shalagram [q.v.]. The owl [ooloocam] is worshipped at the festivals of Caurtikeyan [q.v.], Bramha [q.v.], and Lutchmy [q.v.]. Garoodan [q.v.], the vehicle of Vishnoo [q.v.], and Jatauyoo [q.v.] and Sampauty [q.v.], the vultures who assisted Rama [q.v.], are note-worthy. The cow [pashoo], though not regarded as the vehicle of any deity, is the object of particular worship. Bramha is said to have created cows and Bramins at the same time; the Bramin to officiate at worship [poojah], and the cow to provide milk [paul], ghee [q.v.], &c., as offerings. Cow-dung [shanny] also is necessary for various purifying ceremonies. Regular worship of the cow takes place yearly, at which similar ceremonies are performed to those which are employed at the worship of images of the deities; the horns and bodies of the cows are at these times painted, and they are bathed in rivers. By some the cow is worshipped daily. The sacrifice of animals as being the most valuable offering has always attended their worship. A chapter of the Eitareyabramhanam [q.v.] on the sacrifice of animals shows how, next to man, the horse [ghorah] was the supreme sacrifice offered to the gods; how the cow afterwards took the place of the horse, the sheep [shemmariyaud] of the cow, the goat [vellaud] of the sheep; and at last vegetable products were substituted for animals. The historical aspect of animal worship has been discussed in the foot-note on the History of Hindoo religion at volume I (72) [matam, yanyam].——*Poonya stalam* (पुण्यस्थल - punyast'hala, San.). From (punya, san. sacred + st'hala, san. place). Sacred place [cshetram, stalam]. The seven sacred Indian cities, a visit to which confers eternal happiness, are :—Ayodhyay or oudh, the city of rama; Matooray or muttra, the city of krishnan; Maya or booddhagayay, the city of illusion; Caushy or benares, the city of shiva as vishweshwaran; Canjy or conjeeveram; Avanticay or oojjein; Dwarca or dwanravaty. But Gocurnam near mangalore, Rameshwaram, and Somnaut putnam, all having celebrated temples [coil, pagoda] of shiva, are also sacred cities. All rivers [aur] are sacred [teertam]. The place of junction of two rivers is sacred and is called Sangam [q.v.].——*Poonyoshadhy* (पुण्योषधि - punyóshadhi, San.). From (punya, san. sacred + óshadhi, san. plant). Sacred plant. Various trees are held sacred as being representative of, or under the special care of, the different deities. It is a meritorious act to plant and water them, and their withered branches are not allowed to be burnt. The same ceremonies are observed at the planting of these trees, or, when they have been taken care of for some time, at their consecration, as are observed at the setting up of an image [shilay, vigraham] of a deity. The following are the names of the sacred trees in Southern india :—Ashwattam or peepul [q.v.], ficus religiosa, sacred to vishnoo; Vatam or banyan [q.v.], ficus bengalensis, also sacred to vishnoo; Vilvam or bael [q.v.], ægle marmelos, sacred to shiva; Vacoolam or ilanjy [q.v.],

mimusops elengi; Hareetakee or chebulic myrobalan [q.v.], terminalia chebula; Aumalaky or emblic myrobalan [q.v.], phyllanthus emblica; Nimbam or neem [q.v.], melia azadirachta; Toolsy [q.v.], ocimum gratissimum or sanctum. The last-named is very commonly worshipped by the followers of vishnoo; and the plant is carefully tended as his representative; every morning the ground near it is cleaned with cow-dung [shauny] and water, and at night a lamp is hung near it; during the two hottest months of the year, a vessel of water is hung over it so that it can constantly receive moisture; when the plant dies, it is cast into the river, as an idol which has been worshipped would be when the worship is concluded; when a person is dying, it is a common custom to plant a spring of toolsy [q.v.] near his head. In addition to these trees should be mentioned the Doorvay grass or Hurrially [q.v.], cynodon dactylon, pers. and Coosham [q.v.] grass or eragrostis cynosuroides, retz., which form part of the offerings made to the gods; as do all the leaves or flowers [phool] of most of the trees previously mentioned. The historical aspect of tree-worship has been discussed at vol. I (71).

POOCHY (कीट - kíta, *San.*; کیڑا - kírá, *Hind.*; ಹುಳ - hula, *Can.*; పురుగు - purugu, *Tel.*; പുഴു - puzhu, *Mal.*; பூச்சி - púçci, *Tam.*). San. from (kít, san. to color). Hind. from sanscrit. Mal. from (puru, mal. small). Any irsect.——**(1)** Insects, invertebrate articulated animals, the Arthropoda of european naturalists, are divided into four divisions. Thus:—"*a*" Crustacea; respiration by means of gills, or by the general surface of the body; two pairs of antennæ; locomotive appendages more than eight, borne by the segments of the thorax, and usually of the abdomen also; examples are crabs [nundoo], lobsters, shrimps [iraul], wood-lice, etc.—"*b*" Arachnida; respiration by pulmonary vesicles, by tracheæ, or by the general surface of the body; head and thorax united; antennæ absent; legs eight; abdomen without locomotive appendages; examples are spiders [makree] and scorpions [tail].—"*c*" Myriopoda; respiration by tracheæ; head distinct; the remainder of the body composed of nearly similar segments; one pair of antennæ; legs numerous; examples are centipedes [kankhajoor] and millepedes.—"*d*" Insecta proper; respiration by tracheæ; head, thorax, and abdomen distinct; one pair of antennæ; three pairs of legs borne by the thorax; abdomen without limbs; the adult form with a few exceptions winged; examples are beetles [zeerangy], bees [tainee], wasps, flies [makkhee], butterflies [pautarny], locusts [tiddah], cockroaches [jhingoor], earwigs, dragon-flies [pautarny], ant-lions, may-flies, bugs [moott poochy]. Insecta proper divide again into the following three sub-classes:—"i" Ametabola; young not passing through a metamorphosis, and differing from the adult in size only; imago destitute of wings; eyes simple, sometimes wanting. "ii" Hemimetabola; metamorphosis incomplete; the larva differing from the imago chiefly in the absence of wings, and in size; pupa usually active, or, if quiescent, capable of movement. "iii" Holometabola; metamorphosis complete; the larva, pupa, and imago differing greatly from one another in external appearance; the larva vermiform, and the pupa quiescent.——**(2)** The word poochy, which would include a wood-louse, comprises examples at any rate from each of these divisions. The following are some of the commonest so-called poochies.——*Cumbly poochy* (کملی کیڑا - kamlíkírá, Dec.; رینگ - riyang, Malay; ಕಂಬಳಿಹುಳ - kambalihula, Can.; ಕಂಬೊಲಿಪುರಿ - kambolipuri, Too.; కంబళిపురుగు - kambalipurugu, Tel.; കമ്പിളിപ്പുഴു - kampilippuzhu, Mal.; கம்பளிப் பூச்சி - kambalippúçci, Tam.). Means blanket worm from being hairy. Tam. also (musukkattaippúçci), meaning mulberry worm [puttoo]. Caterpillar.——*Minminy poochy* (खद्योत - khadyóta, San.; काजवा - kájavá, Mahr.; حباحب - hubáhib, Ar.; کرم شب تاب - kirmishabtáb, Pers.; جگنو - jugnú, Hind.; جگنہ - jignah, Dec.; اپی اپی - apiapi, Malay; ಮಿಣಿಚೇಹುಳ - minichéhula, Can.; ಮಿಂಚುಪುರಿ - minchupuri, Too.; మిణుగురుపురుగు - minugurupurugu, Tel.; മിന്നാമിനുങ്ങ് - minnáminunnu, Mal.; කනමැදිරියා - kanamadiriya, Singh.; மின்மினிப்பூச்சி - minminippúçci, Tam.). Title from tamul. San. from (kha, san. sky + dyóta, san. light). Pers. from (kirm, pers. worm + shab, pers. night + táb pers. shining). Malay from (api, malay, fire). Can. from (minuku, can. glitter + hula, can. insect). Too. from (minchu, too. lightning + puri, too. insect). Tel. from (minuguru, tel. spark + purugu, tel. insect). Mal. from (minnu, mal. to gleam). Tam. from (minmin, tam. to glitter + púçci, tam. insect). Malay also (kálibkálib). Tam. also (minnambúçci), by corruption. Fire-fly, small luminous beetle. Belongs to the families elateridæ and lampyriedæ, coleoptera, holometabola, insecta, of naturalists. The lower part of the body has an apparatus for emitting phosphorescent light. Usually emitted in flashes at intervals of a second. The female is the glow-worm. The fire-flies assemble around particular trees.——*Moottpoochy* (मत्कुण - matkuna, San.; فسافس - fusáfus, Ar.; سرخک - surkhak, Pers.; کھٹمل - khatmal, Hind.; مکھون - makhún, Dec.; کپندنگ - kapinding, Malay; ತಗಣಿ - tagani, Can.; ತಗುಳೆ - tagule, Too.; నల్లి - nalli, Tel.; മൂട്ട - mútta, Mal.; மூட்டுப்பூச்சி - múttuppúçci, Tam.). Title from tamul. Pers. from (surkh, pers. red). Dec. from sanscrit. Tel. from (nalla, tel. blood); from its feeding on the blood of man. Tam. from (múttu, tam. joint + púçci, tam. insect). Malay also (pijad); (pinding). Tam. also (mugattuppúçci), meaning ridge insect; (múttai), short form. Bug. Belongs to family cimicidæ, hemiptera hemimetabola, insecta of naturalists. Coffee [q.v.] bugs are brown, white, and black. The brown or scaly bug, Lecanium coffeæ, is the most injurious; male of a light pinkish brown and slightly hairy; the females when young yellow, marked with grey or light brown, when old light brown with dark margin; they affect cold and damp localities, 3,000 feet in height. The white or mealy bug is Pseudococcus adonidum; male of a dirty brown, slightly hairy and minute, being much smaller than the female; female oval, brownish purple and covered with a white mealy powder. The black bug is Lecanium nigrum, of which the female only is known; in color from yellowish grey deep brown, almost black in age and of a shield-like shape; it gives rise to a glutinous saccharine substance called honey dew. The green bug is seen on leaves; it is inoffensive if unmolested but if irritated exhales an offensive odour. Of the aquatic species, Belostoma indicum attains a size of nearly three inches.——*Shilandy poochy* (लूता - lútá, San.; कोष्टी - kóshtí, Mahr.; عنکبوت - ankabút, Ar.; کارتنہ - kártanah, Pers.; مکڑی - makrí, Hind. and Dec.; لبالبا - labalaba, Malay; ಜೇಡಹುಳ - jédahula, Can.; ಜಾಡಪುರಿ - jádapuri, Too.; సాలెపురుగు - sálepurugu, Tel.; എട്ടുകാലി - ettukáli, Mal.; මකුළුවා - makuluvá, Singh.; சிலந்திப்பூச்சி - shilandippúçci, Tam.). Title from tamul. San. from (lú, san. to cut). Mahr. applied to a caste whose occupation is spinning and weaving. Hind. from (markata, san. spider). Can. from (jéda, can. weaver + hula, can. insect). Tel. from (sále, tel. weaver + purugu, tel. insect). Mal. from (ettu, mal. eight + kálu, mal. leg). Singh. from (markata, san. spider). Tam. from (shilambu, tam. to rush + púçci, tam. insect). Malay also (lálaba). Spider. Belongs to class arachnida, sub-kingdom articulata. Breathe atmospheric air, have no antennæ, have four pairs of legs attached to fore parts of the body, and undergo no metamorphosis like that of insects. Mandibles furnished with a curved claw perforated at the extremity, like a poison fang. A gland furnishes a certain colorless fluid which is injected into the object wounded by the claw. The fluid is poisonous. All spin nets.——*Telloopoochy* (पिसू - pisú, Mahr.; برغوث - burghús, Ar.; پشہ - pashshah, Pers.; پسو - pissú, Hind. and Dec.; کتوانجنگ - kutuanjing, Malay; ಚಿಕ್ಕಾಡಿ - chikkádi, Can.; ನಲ್ಲು - nallu, Too.; మిన్నల్లి - minnalli, Tel.; ചെള്ള് - chellu, Mal.; தெள்ளுப்பூச்சி - tellappúçci, Tam.). Title from tamul. Ar. from ethiopic meaning to spring. Hind. from persian. Malay from (kutu, malay, louse + anjing, malay, dog). Can. from (chikku, can. to scratch + adi, can. foot). Tel. from (midiyu, tel. to hop + nalli, tel. bug). Mal. from (chel, mal. sharp). Tam. from (telgu, tam. to spring up + púçci, tam. insect). Pers. also (shabgaz), meaning night-bitter. Flea. Co-extensive with family pulicidæ, aphaniptera, holometabola, insecta, of naturalists. Breed in rocky ground. Branches of Euphorbia tirucalli [round milk-hedge] in a room disperse them. Pastilles containing sulphate of copper [toottam] when burned have same effect.——**(3)** For fishes see Matsyam; for batrachians see Bhaicam; for reptiles see Sarpy; for birds see Pacshy; for mammals see Sastanam; a general conspectus of the fauna [jantoo] of s. india was given in vol. II, appendix IV.

POODEENAH (पुदिना - pudíná, *Mahr.*; نعنع الہند - nanaulhind, *Ar.*; پودینہ - púdínah, *Pers.*; پودینا - pudíná, *Hind.* and *Dec.*; పుదీనా - pudíná, *Tel.*; പുതിയിനാ - putiyiná, *Mal.*; ඔදුතලන් - odutalan, *Singh.*; புதினா - puthíná, *Tam.*). Mahr. from hindostany. Ar. from (nana, ar. mint + hind, ar. india). Hind., &c., from persian. Ar. also (fútanjihind), meaning indian mint; (habakulhind), meaning indian mint; (nanaihindí), meaning indian mint. Tel. also (ígaengilikúra), meaning fly + spittle + potherb. Tam. also (íyeççirgírai), meaning fly + saliva + vegetable; said to spring from deposits of flies; (odnthalám). Title otherwise Mint. Botanically the Mentha genus, labiatæ [vricsham, 103]. Herbaceous plants with flowers in dense whorls, arranged in terminal or axillary heads or spikes. Arvensis is common mint, corn mint, field mint; stem 1–2 feet; leaves 1–2 inches, obtusely or acutely serrate; bracts acute, shorter than the flowers; calyx hoary; corolla hairy without and within; leaves carminative, stomachic, antispasmodic and emmenagogue; substituted for british oleum menthæ piperitæ; leaves used in food; gives oil [yennay]. Piperita is peppermint or brandy mint; greek μίνθη; perennial, deciduous herbaceous plant, 2 feet high; spikes oblique, blunt, interrupted at base; leaves ovate-oblong, acute, serrate, stalked, smooth; calyx quite smooth at base; flowers purple, flowering in august and september; herbaceous plant; much resembles common mint; oil is colorless or faint greenish-yellow; has a peculiar odour and a pleasant, cooling flavor; gives to pharm. the oil, oleum menthæ piperitæ; valuable carminative, stomachic, and antispasmodic; preparations; aqua menthæ piperitæ, spiritus menthæ piperitæ, officinal; used for culinary and confectionery purposes. Pulegium is pennyroyal; greek γλήχων; expectorant. Sativa is marsh mint, indian peppermint, in use by hakeems [q.v.].

Viridis is garden mint, spear mint or mackerel mint; perennial, deciduous, herbaceous plant, 2 feet high; spikes cylindrical interrupted; leaves lanceolate, sub-sessile, cuneate at the base, finely serrated, smooth on each side; teeth of calyx somewhat hairy; flowers purple, flowering in august; different variety from the english; stimulant in cholera; gives to pharm. the oil, oleum menthæ viridis; properties similar to peppermint, but less powerful; preparation; aqua menthæ viridis, officinal; more largely used for culinary purposes under the name of mint than peppermint, as its flavor is preferable; gives a volatile oil [yennay]. Compare also:—Anisomeles malabarica, cat mint; Ocimum basilicum, wild mint; see gloss. paragraphs.

POODEIYAN (పొడలపాము - podalapámu, *Tel.*; புடையன் - pudaiyan, *Tam.*). Tel. from (poda, tel. wart + pámu, tel. snake). Tam. from (pudai, tam. to swell). Wart snake. The terms may be considered co-extensive with the family Acrochordidæ, ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 26] of naturalists [jantoo]. See Paumb. The only representative here is Chersydrus granulatus. Alias Acrochordus fasciatus, granulatus; Chersydrus annulatus, fasciatus; Hydrus granulatus. Brownish black, with whitish cross-bands on sides and abdomen; head with some small yellowish spots. In the young the bands are more clearly defined, and extend on to the back where they are generally interrupted. Aquatic species. Found in the rivers and on the eastern coast sometimes three or four miles distant from the shore. Not venomons. The following varieties are recognized by the Tamulians —*Black wart snake* (నల్లపొడ - nallapoda, Tel.; கரும்புடையன் - karumbudaiyan, Tam.).—*Red wart snake* (ఎఱ్ఱపొడ - errapoda, Tel.; செம்புடையன் - shembudaiyan, Tam.).—*Small wart snake* (చిన్నపొడ - chinnapoda, Tel.; சிறுபுடையன் - shirubudaiyan, Tam.).

POODOOCOTTAH (புதுக்கோட்டை - puthukkóttai, *Tam.* pudukóta *). From (puthu, tam. new + kóttai, tam. fort), means new fort [poothoo].—**(1)** Native state, Trichinopoly district. For general and historical accounts, see vol. I, 40; II, 118. Divided into three talooks; Alangoody, Coolatore and Trimayam. Places of archæological interest:—Coodoomiyamullay, Nauradamullay, Peraiyore, Tirgocurnam, Tirvarangoolam and Trimayam. The leading places, &c., in the territory are the following.—*Agnyaur* (அக்கினியாறு - akkiniyáru Tam.). See sep. title.—*Alangoody* (ஆலங்குடி - álangudi, Tam.). From (álam, tam. banyan tree, ficus bengalensis, linn. + kudi, tam. village). Sanscrit name (rudrapura), means town of roodran. Village, Head-quarters of a Tahsildar; pop. 588; lat. 10° 21′; long. 79° 01′; from Poodoocottah E. 12 miles; from Trichinopoly S.E. 36 miles. Gives its name to a talook. On road to Puttoocottah. Natural springs which irrigate rice [paddy]. Weekly market on Thursday.—*Annavausal* (அன்னவாசல் - annavásal, Tam.) From (anna, san. food + vásal, tam. entrance); a place where charity is dispensed. Town; pop. 2,598; lat. 10° 28′; long. 78° 44′; from Coolatore S.W. 8 miles; from Iloppore S.E. 6 miles; from Poodoocottah W. 10 miles; from Trichinopoly S. 25 miles. On declivity on road to Viraulimullay. Chiefly Mussalmans [q.v.]. Weekly market on Thursday.—*Arimbalam* (அரிம்பலம் - arimbalam, Tam.). From (arumai, tam. rareness + p'hala, san. fruit); place of rare merit as a holy place. Town; pop. 3,907; lat. 10° 15′; long. 78° 56′; from Poothooputty S E. 41 miles; from Poodoocottah S.S.E. 10 miles; from Trichinopoly S.S.E. 41 miles. On the road to Arantaungy. Nautcottay chetty [q.v.] town. Shiya temple. Feeding chuttram [q.v.] maintained by Chetties [q.v.]. Mutt [q.v.] for caste travellers with a fine tank in front.—*Auvore* (ஆவூர் - ávúr Tam.). From (á, tam. cattle + úr, tam. village). Village; lat. 10° 39′; long. 78° 43′; from Poodoocottah N.N.W. 21 miles; from Trichinopoly S. 12 miles. On Trichinopoly-Poodoocottah road. Station of Jesuits of Madura mission.—*Carambacoody* (காரம்பக்குடி - karambakkudi, Tam.). See sep. title.—*Cavinaud* (கவிநாடு - kavinádu, Tam.). From (kavi, san. poet + nádu, tam. country). Also called (kapilanádu), country of capilan [q.v.]. Village; pop. 8,226 Tank called Cavinaud cummye, bund 5 miles long. Surplus discharges into Goondair to S. of Poodoocottah.—*Coodoomiya mullay* (குடுமியாமலை - kudumiyámalai, Tam.). From (kudimiyán, tam. possessor of hair tuft + malai, tam. mountain). Sanscrit name (shikhánát'ha), means hair-tuft + lord; epithet of a jeina deity. Hill; lat 10° 25′; long. 78° 42′; from Poodoocottah W.N.W. 11 miles; from Trichinopoly S. 27 miles; from Annavausal W. 4 miles. Bare of vegetation. At foot temple to Shiva. Coronations of rajahs formerly here. Treasure buried in vaults. Monkeys [bandar] abound.—*Coolatore* (குளத்தூர் - kulattúr, Tam.). From (kulam, tam. tank + úr, tam. village). Village; pop. 1,930; lat. 10° 33′; long. 78° 49′; height 375 feet; from Poodoocottah N. 12 miles; from Trichinopoly S. 18 miles. Gives name to a talook. On road to Trichinopoly. Originally seat of branch of Tondiman [q.v.] family. Tank, surplus of which forms Agniyaur.—*Keeranore* (கீரனூர் - kíranúr, Tam.). From (kíra, san. parrot + úr, tam. village). Sanscrit name (shukapurí), means shoocan, name of a sage, also parrot + town. Village, Head-quarters of the Tahsildar of Coolatore talook; pop. 1,953; lat. 10° 34′; long. 78° 49′; from Ariyalore S.S.W. 44 miles; from Coolatore N. 1 mile; from Madras S.S.W. 198 miles; from Moosiry S.E. 35 miles; from Poodoocottah N. 14 miles; from Shreerungam S.S.E. 20 miles; from Trichinopoly S. 18 miles. On road from Trichinopoly to Poodoocottah. Shiva temple. Largely inhabited by Cullar [q.v.]. Weekly fair on Mondays.—*Kilanelly* (கீழாநிலை - kízhánilai, Tam.). See sep. title.—*Nauradamullay* (நாரதமலை - nárathamalai, Tam.). From (nárada, san. the sage + malai, tam. mountain). Sanscrit name (náradaparvata), means same. Village, Hill; lat. 10° 30′; long. 78° 49′; from Coolitalay S.E 38 miles; from Poodoocottah N. 10 miles; from Trichinopoly S.S.E. 22 miles. A little to west of road to Trichinopoly. Rock-cut Booddhist [booddha] temples and carvings. Near is a Mauriyamman [q.v.] temple called Telinga mahamye [q.v.]. Large concourse of people during annual feast. Spring on the hill in which a small temple cut on the rock is submerged. Near the Mauriyamman temple is a never-failing spring called Aucausha oorny [q.v.].—*Paumbaur* (பாம்பாறு - pámbáru, Tam.). See sep. title.—*Peraiyore* (பேரையூர் - péraiyúr, Tam.). From (pér, tam. great + ai, tam. beauty + ur, tam. village). Sanscrit name (bhúchandakshétra), meaning earth + shiva, the fierce + sacred place. Village; pop. 843; lat. 10° 21′; long. 78° 48′; from Poodoocottah west 5 miles; from Trichinopoly S. 32 miles; from Trimayam N. 8 miles. On S. bank of Vellaur. Fine pagoda [q.v.] on low flat rock, with spring. Scene of battle between Tanjore rajah and Tondiman [q.v.] in early part of eighteenth century.—*Ponnamarauvathy* (பொன்னமராவதி - ponnamarávathi, Tam.). From (ponnan, tam. the name of a chief + amaran, tam. the name of another chief + pathi, tam. place). Town; pop. 6,298; lat. 10° 17′; long. 78° 34′; from Poodoocottah W.S.W. 20 miles; from Trichinopoly S.S.W. 38 miles. Near S.W. frontier. Principally occupied by Nautcottay chetties [q.v.]. Shiva temple. Colored mats [boriyah] of palmyra [q.v.] leaf form chief home industry of Chetty [q.v.] women. Large tank.—*Poodoocottah* (புதுக்கோட்டை - puthukkóttai, Tam.). See below.—*Poothooputty* (புதுப்பட்டி - puthuppatti, Tam.). From (puthu, tam. new + patti, tam. village). Village, Head-quarters of the Deputy tahsildar of Kilanelly; lat. 10° 11′; long. 78° 57′; from Poodoocottah S. 15 miles; from Trichinopoly S.S.E. 45 miles. On road to Arantaungy. Plantains [q.v.] luxuriant. Shiva temple. Market on Wednesdays.—*Royapooram* (இராயப்புரம் - iráyappuram, Tam.). From (ráyadu, tel. king + pura, san. town). Town; from Trimayam S.E. 10 miles. A large Nautcottay chetty [q.v.] town. Shiva temple. Chetties have built palatial houses.—*Tercolambore* (தெருக்கொளம்பூர் - terukkolambúr, Tam.). From (teru, tam. street + kulam, tam. tank + úr, tam. village). Village; lat. 10° 12′; long. 78° 33′; from Poodoocottah W. 24 miles; from Trichinopoly S. 44 miles. Near confines of Shivagunga. Inhabited mostly by Cullar [q.v.] and Chetties [q.v.]. The general boundary runs adjacent to this.—*Tirgocurnam* (திருக்கோகரணம் - tirukkógaranam, Tam.). From (tiru, tam. holy + gókarna, san. cow's ear, the local name of shiva). Sanscrit name (gókarnakshétra), means gocurnan, the local shiva + sacred place. Town; lat. 10° 23′; long. 78° 51′; from Alangoody 11 miles west; from Poodoocottah north-west 1¼ miles; from Trichinopoly S. 30 miles. Suburb of Poodoocottah on road to Trichinopoly. Pagoda [q.v.] where Tondiman occasionally resorts for public worship; to Shiva as Gocurna sawmy, but more generally known after goddess Shree brihannayaky from whom rajah takes title of Shree brihadambah doss, servant of shree brihadambah. Annual feasts.—*Tirvappore* (திருவப்பூர் - tiruvappúr, Tam.). From (tiru, tam. holy + wáyppu, tam. success + úr, tam. village). Town; lat. 14° 23′; long. 78° 50′; from Alangoody W. 13 miles; from Poodoocottah west 1½ miles; from Trichinopoly S.S.E. 32 miles. Suburb of Poodoocottah; chiefly inhabited by weavers. Cotton [q.v.] and silk [puttoo] fabrics of superior texture manufactured. Scene of battle between Saitoopaties [q.v.] of Ramnaud and Tondiman [q.v.] in middle of eighteenth century.—*Tirvarangoolam* (திருவரங்குளம் - tiruvarangulam, Tam.). From (tiru, tam. holy + aran, tam. shiva + kulam, tam. tank). Sanscrit name (ranganát'hapura), means vishnoo + town. Village; pop. 625; lat. 10° 21′; long. 78° 55′; from Alangoody W. 7 miles; from Poodoocottah S.E. 4 miles; from Trichinopoly S.S.E. 35 miles. On confines of a wood on road to Alangoody. Remarkably high Shiva temple built by chola king, whose figure is sculptured on the stone pillars. At annual car festival, Pariahs [q.v.] claim priority of breaking cocoanuts [q.v.] on the wheels of the car [rath].—*Trimayam* (திருமயம் - tirumayam, Tam.). From (tiru, tam, holy + maiyyam, tam. centre). Sanscrit name (ádirangam), means first + place of vishnoo. Village, Head-quarters of Tahsildar; lat. 10° 15′; long. 78° 48′; from Ariyalore S.S.W. 65 miles; from Madras S.S.W. 218 miles; from Moosiry S. 53 miles; from Poodoocottah S.S.W. 10 miles; from Shreerungam S. 43 miles; from Trichinopoly S. 40 miles. On road to Madura. Rich well conducted chuttram [q.v.] founded by Nautcottay chetties. Well preserved fort. Curious old chain armour, &c., was discovered here. Ancient Vishnoo [q.v.] temple built by a Paundyan [q.v.] king; described as Audy rungam, that is to say, the original rungam existing prior to Shreerungam on the Cauvery at Trichinopoly. In ancient times fort was one of strongholds of Saitoopaties of Ramnaud. It was a gift to Tondiman from Ramnaud.—*Vellaur* (வெள்ளாறு -

vellâru, Tam.). See sep. title.——*Viraulimullay* (விராலிமலை - virâlimalai, Tam.). From (viráli, tam. a plant, dodonæa viscosa, linn. + malai, tam. mountain). Town; pop. 1,860; lat. 10° 36′; long. 78° 35′; from Coolatore W.N.W. 17 miles; from Poodoocottah N.W. 23 miles; from Trichinopoly S.W. 19 miles. Headquarters of a Deputy tahsildar. On the trunk road from Trichinopoly to Madura. Formerly part of polliem [q.v.] of Lakky naick. Temple to Soobramanyasawmy. Camping station for troops. A spacious chuttram [q.v.] supported by Tondiman [q.v.]. Travellers' bungalow [q.v.].——**(2)** Town; Trichinopoly district, Poodoocottah territory; pop. 16,885; lat. 10° 23′; long. 78° 52′; from Ariyalore S.S.W. 53 miles; from Madras S.S.W. 208 miles; from Moosiry S.S.E. 45 miles; from Shreerungam S.S.E. 32 miles; from Trichinopoly S.S.E. 30 miles. Seat of Poodoocottah rajahs. Palace occupies a large square in centre of town. E. of palace a tank called Pullavancoolam, or Shivagunga, with mantapam [q.v.] in çentre. Residency bungalow [q.v.]. Travellers' bungalow. Lutheran mission. In the valley of the Vellaur. A thick belt of almost impenetrable jungle formed the natural defence of the town in bygone days. Fair on Fridays.

POOGAZH (புகழ் - pugazh, *Tam.*). Praise. Ancient name of Warriore [q.v.]. See vol. I (125).——*Poogazhendy* (புகழேந்தி - pugazhéndi, Tam.). From (above + éndu, tam. to support). Tamul poet contemporary with Cumban and Ottacoottan, but at court of king Varagoona paundyan at Madura. Called the tiger of poets [pauvalan]. Wrote Nalavenbah [q.v.].

POOJ (पूज् - púj, *San.*). To adore.——*Poojah* (पूजा - pújá, San.; பூசை - púsai, Tam.). From (púj, san. to worship). Adoration of the deity; also the respect paid to superiors [matam]. In the Shiva pagodas [coil, pagoda] poojah is performed by bramins throughout the year every day thrice, viz., in the morning, at noon, and in the evening; and this is called Nitya poojah, the continual or daily offering. Among the thirty-two mistakes that may occur in worship is the visiting of the temple at the improper time. The daily offering consists in three things:—Abhishaicam [q.v.], holy anointing; Dhoopam [q.v.], incense; Neivedyam, food offering, oblation. These are done together as forming the three acts of every poojah. For the first, the Abhishaicam, the priest takes honey, sugar, cocoanut-water, milk, &c. [punchaumritam], with which he anoints the lingam. The second, Dhoopam, is made of odorous wood and sambrauny [q.v.], or frankincense [q.v.], which he kindles in a censer and so offers to the lingam [q.v.]. The third, Neivedyam, is an oblation of various articles of food, which are afterwards divided among the bramins and servants of the pagodas [q.v.].——*Poojarry* (پوجاری - pújári, Hind.; பூசாரி - púsári, Tam.). From (púja, san. worship + áchári, san. instructor). A priest among the Shoodras in small temples [gooroocal, numby]. See vol. I (82). Hindoo third name [peyar].——*Poojaurambham* (पूजारम्भ - pújárambha, San.). From (pújá, san. worship + árabh, san. to begin). Beginning of ceremonial worship [saraswaty poojaurambham].

POOL (पुल् - pal, *San.*). To be high.——*Poolastyan* (पुलस्त्य - pulastya, San.). From (pul, san. to be lofty). One of the seven great rishies [q.v.] who escaped from the deluge [pralayam]. In the Tamul version of the Oottara ramayanam, he is stated to have been the progenitor of the Yacshans [q.v.]. Otherwise one of the nine Bramhaudicans, the father of Coobairan [q.v.] and Ravanan [q.v.]. Also one of the stars in the constellation [nacshatram] of the maharicsham [q.v.]. For Poolastinagaram see under Poolayan.——*Poolikeshy* (ಪುಲಿಕೇಶಿ - pulikéshi, Can.). From (pula, san. extensive + késha, san. hair of head). There were two kings of this name in the Chalookya [q.v.] dynasty [raj]. Poolikeshy the first was the most powerful of the early kingdom before it was divided into eastern and western by his grandsons. Established a dynasty [raj] in western india, making Vautaupy capital. It was owing to this fact that early grants trace the genealogy of the chalookya kings from his name. About Poolikeshy the second see Satyaushrayan [charitram]. See vol. I (139).——*Poolinda* (पुलिंद - pulinda, San.). From (pul, san. to be high); as frequenting hill jungles. A barbarian.

POOL (புள் - pul, *Tam.*). Palmyra.——*Poollalore* (புள்ளலூர் - pullalúr, Tam.). From (above + úr, tam. village). Title in old books always Polilore. Village; Chingleput dist., Conjeeveram tal.; pop. 1,271; acres 2,132; lat. 12° 59′; long. 79° 46′; from Conjeeveram N. 9 miles; from Sydapett W. 35 miles. Remarkable as the scene of the most grievous disaster which has as yet befallen the British arms in India. On the 10th September 1780, Colonel Baillie, who was marching from Madras to effect a junction with Sir Hector Munro at Conjeeveram, was here totally routed and his whole force either cut to pieces or captured by the united armies of Hyder ally and Tippoo sultan. The palmyra [q.v.] trees still bear evidence of the fierceness of the cannonade. Another battle took place on the same ground between Sir Eyre Coote and Hyder in the following year, in which the former was so far victorious that he occupied the posts taken up by the enemy; Hyder however claimed it as a drawn battle.

POOLA (പുല - pula, *Mal.*). From (pul, tam. low). Pollution.——*Poolasambandham* (പുലസംബന്ധം - pulasambandham, Mal.). From (above + sambandha, san. relationship). Community of pollution or separation, as opposed to community of property [moothal sambandham].

POOLAH (कृष्णकाम्बोजी - krishnakámbójí, *San.*; काक्केसप्पु - kákkésappu, *Conc.*; کالے مدھ کا پیڑ - kálemadhkáper, *Hind.*; کالے مدھ کا جھاڑ - kálemadhkájhár, *Dec.*; ಸಣ್ಣಕಾಗೆಸೊಪ್ಪು - sannakágesoppu, *Can.*; ಕಾಕೆಸೊಪ್ಪು - kákesoppu, *Too.*; పురుగుడు - purugudu, *Tel.*; കാട്ടുനീരൂരി - káttunírúri, *Mal.*; වල්කයිල - valkayila, *Singh.*; பூலா - púlá, *Tam.*). Title from tamul [poo]. San. from (krishna, san. black + kámbójí, san. abrus precatorius, linn.). Hind. from (kálá, hind. black + madhú, san. honey + per, hind. tree); from sweet juice. Dec. from hindostany. Can. from (sanna, can. small + káge, can. crow + soppu, can. leaf). Mal. from (kátu, mal. wild + nírúri, mal. phyllanthus niruri, mull., var. genuinus). Tam. from (pú, tam. flower, hence redness); from red dye of bark [poolah coral tree, red-cotton tree, silk cotton, white poolah]. Hind. also (kámuní), meaning solanum nigrum, linn. Tel. also (nallapagadapuchettu), meaning black + breynia rhamnoides, muller, var. genuina; (nallapurugudu), meaning black + the plant; (pulugudu); (nallapulugudu), meaning black + the plant; (núgubenda), meaning downiness + hibiscus esculentus, linn. Tam. also (karuppuppilláñji), meaning black + the plant; (pilláñji), corruption of (púláñjedi); (nírppúlá), meaning water + the plant; (mélanelli), meaning upward + phyllanthus emblica, linn.; from climbing habit. Title otherwise Black honey shrub, Downy bendy, Many-flowered kizhanelly, Wild neeroory. Botanically Phyllanthus [aumlacam] multiflorus, willd., euphorbiaceæ [vricsham, 118]. Alias Anisonema multiflora; Kirganelia multiflora. Kirganelia, from (kízhánelli, tam. phyllanthus niruri, müller var. genuinus). Shrubby; primary branches virgate, young shoots pubescent; floriferous branchlets angular; leaves nearly oval, obtuse, bifarious; flowers axillary, aggregated, several males and usually one-female; male flowers purplish; berries eight to twelve-seeded, dark, purple, or black, soft and pulpy, sweet-tasted. Flowering nearly all year; common near water; climbing if it has the support of bushes; berries give a syrup called black honey [q.v.]. The root is sweetish-tasted; medicinally alterative and attenuant and given in decoction. Bark used for dyeing [shauyam] a reddish brown; the thin branches form a tooth-brush, the ends being beaten so as to make them soft. No other common species here.——**(1)** *Poolah root* (பூலாக்கிழங்கு - púlákkizhangu, Tam.). Plant name common to:—Curcuma zedoaria; Manihot utilissima. See gloss. paragraphs.——**(2)** *Demon poolah* (பேய்ப்பூலா - péyppúlá, Tam.). Same as Red rohitacam.——*Red poolah* (சிகப்புப்பூலா - shigappuppúlá, Tam.). Same as Poolah coral tree.——*White poolah* (कृष्णपाक - krishnapáka, San.; سفید مدھ کا پیڑ - sufedmadhkáper, Hind.; سفید مدھ کا جھاڑ - sufedmadhkájhár, Dec.; ಕರಿಯಹೂಲಿ - kariyahúli, Can.; తెల్లపురుగుడు - tellapurugudu, Tel.; പെരിങ്ക്ലാവ് - perinklávu, Mal.; வெள்ளைப்பூலாஞ்சி - vellaippúláñji, Tam.). Title from color of fruit and similarity to poolah. San. from (krishna, san. black + páka, san. syrup) [carondah]. Hind. from (sufed, hind. white + madhu, san. honey + per, hind. tree); from syrup of fruit. Dec. from hindostany. Can. from (kariya, can. black + húli, can. the plant, ougeinia dalbergioides, benth.). Tel. from (tella, tel. white + purugudu, tel. phyllanthus multiflorus, willd.). Mal. from (peru, mal. large + kalávu, mal. the plant, memecylon edule, roxb., var. typica). Tam. from (vellai, tam. white + pilláñji, tam, phyllanthus multiflorus, willd.). San. also (apriyadruma), meaning not liked tree; (shvétakámbóji), meaning white abrus precatorius, linn., perhaps from whitish-colored small round fruit. Hind. also (sufedmahmúdah), meaning white scammony. Can. also (karehúla), meaning black + the plant, phyllanthus multiflorus, willd.; (karesúla), meaning black + the plant, phyllanthus multiflorus, willd.; (gudapála), meaning jaggery + protector; (helamágalichéra), meaning earth + the plant. Tel. also (sálemunta), meaning weaver + pot; (tsallamunta), meaning cool + pot; (mékaráyi), meaning goat + rubbing. Tam. also (varadbúlá), meaning to grow dry + the plant; (púlá) [poolah, poolah coral tree, red-cotton tree, silk cotton]; (irubúlai), meaning dark poolah. Title otherwise Cool pot, White goomchy, White honey shrub. Botanically Securinega leucopyrus, müll., euphorbiaceæ [vricsham, 118]. Alias Cicca leucopyrus; Fluggea leucopyrus; Phyllanthus leucopyrus. Tree; branchlets spinescent at the apex, glabrous; leaves obovate, obtuse or retuse, acute or cuneate, narrowed at the base, paler below; calycine segments broadish hyaline at the margin, and usually deeply lacinulate; male flowers very numerous; capsule depresso-globose; branches of the styles narrow, entire. Common; small round whitish-colored fruit, bitter to taste; root medicinally mild astringent; fruit, eaten; syrup prepared from the fruit is considered equal to honey [shahad]; wood pink, hard, close-grained. Another species is Obovata.

POOLAMBAN (புலம்பன் - pulamban, *Tam.*). From (pulambu, tam. to roar); as lord of a roaring tract near the sea. Chief of a maritime tract [neydal].

POOLAY (பூளை - púlai, *Tam.*). From (pú, tam. flower), from soft downy leaves and flowers [poo]. Botanically the Ærua genus, amarantaceæ [vricsham, 106]. Woolly herbs or undershrubs; leaves alternate or opposite; flowers minute, in dense terminal or axillary spikes; have a more or less white tomentose appearance. The species best known to the natives are shown below. Other s. indian species indigenous or naturalized are:—monsonia, scandens.——*Large poolay* (کلکاجهار - kulkájhár, Hind.; పెద్దపిండికొండ - peddapindikonda, Tel.; பெரியபூளை - periyabúlai, Tam.). Tel. from (pedda, tel. large + pindikonda, tel. ærua lanata, juss.). Tam. from (periya, tam. big + púlai, tam. ærua). Tel. also (pindikonda), meaning flour + hill; hill plant with downy leaves. Title otherwise Javanese ærua. Botanically Ærua [poolay] javanica, juss., amarantaceæ [vricsham, 106]. Ærua from arabic. Alias Illecebrum javanicum. Herbaceous; stem rigid, one cubit, erect or ascending, tomentose, hoary; leaves short-petioled, obovate-lanceolate, tomentose; spikes alternate, very flexuose, solitary, sessile, woolly, upper ones fifteen to twenty, arranged as a large lax panicle; flowers white; bracts glabrous, whitish; utricle oblong, green; flowering all the year. Flowers have refreshing smell, and placed under pillow relieve nervous irritation and headache, inducing sleep; root is diuretic.——*Small poolay* (कापूरमधुरा - kápúramadhurá, Mahr.; चिरपुट्ल - chiraputla, Conc.; کلکاجهار - kulkájhár, Hind.; ಬಿಳೆಸೂಲಿ - bilésúlí, Can.; పిండిదొండ - pindidonda, Tel.; ചെറുപൂള - cherupúla, Mal.; சிறுபூளை - shirubúlai, Tam.). Mahr. from (kápúra, mahr. camphor + madhura, san. sweet); from silvery-looking leaves and white sweet-scented flowers. Can. from (bili, can. white + súle, can. pain); ash-colored plant and root used in headache. Tel. from (pindi, tel. flour + donda, tel. cephalandra indica, naud.). Mal. from tamul. Tam. from (shiru, tam. small + púlai, tam. ærua). Can. also (bilihindisoppu), meaning white + to wring + leaf; (biléhuligida), meaning white + sour + plant. Tel. also (pindikonda), meaning flour + hill; (chinnapindikonda), meaning small + the plant. Tam. also (kanbúlai), meaning eye + ærua, small plant; (uzhiñai), meaning strength giving; a garland of this plant was to be worn by soldiers in storming a fort. Title otherwise Woolly ærua, Woolly caper. Botanically Ærua [poolay] lanata, juss., amarantaceæ [vricsham, 106]. Alias Achyranthes lanata, villosa; Ærua floribunda, tondalo; Illecebrum lanatum, linn. Ærua from arabic. Stem herbaceous, suffruticose below, ascending, much branched, somewhat tomentose; leaves alternate, short petioled, obovate, mucronulate, pubescent on both sides; spikes solitary or biternate, sessile, ovate, woolly; flowers hoary white; calyx twice as long as the apiculated bracts; sepals keeled, two outer ones lanceolate with whitish nerves, inner ones sub-spathulate, greenish-nerved; utricles roundish, compressed, green; seed reniform, shining, black. Common weed; has woolly silvery looking leaves and oval heads of white flowers. Flowering tops are medicinally officinal, roots used in headache. Leaves mixed with others used as greens [keeray]; famine-food.——*Thornless poolay* (മുള്ളില്ലാപ്പൂള - mullilláppúla, Mal.). Same as Silk-cotton tree.——*Thorny poolay* (മുള്ളൻപൂള - mullanpúla, Mal.). Same as Red-cotton tree.

POOLDY (புழுதி - puzhuthi, *Tam.*). Soil of fields prepared for seed [viray]. Pooldycaul is cultivation by dry ploughing and sowing; pooldycaud is a dry-ploughed field; pooldynautt is seedling [nautt] standing on dry ground; pooldy viray is sowing a dry field just before rains for the seed to remain in dust till rain [mazhay, monsoon] comes. For wet ploughing and sowing see Shettcaul.——*Chikat pooldy* (சிகத்துப்புழுதி - shigattuppuzhuthi, Tam.). Wet lands ploughed, but not sown. See sep. title.

POOLIVENDLA (పులివెందల - pulivendala, *Tel.* pulivendla *). From (puli, tel. tiger + mandala, san. region) [pooly]. Sanscrit name (vyághrapurí), meaning tiger + town.——**(1)** Talook, Cuddapah district. Tahsildar's pay Rs. 175. Area 701 square miles, length from east to west 40 miles, breadth from north to south about 24 miles. Population 105,842. Language Teloogoo. Lies along W. boundary of district, and abuts upon Tadpatry talook, Anantapore district. Bounded N. by Jummalmadoogoo talook from which it is separated by the Bhauncote and Pedda gungamma mala hills; E. by Cuddapah and Royachoty talooks from which it is partly separated by the Paupughny; S. by Cadiry talook from which it is separated by the Sheshachellam range; W. by Tadpatry talook of Anantapore. The talook includes a small tract lying along right bank of the Paupughny, and south of the gorge through which the stream cleaves the Sheshachellam range. This is naturally a portion of Royachoty talook, but has been artificially annexed to Poolivendla. Apart from this detached section, the talook presents a compact area, almost a parallelogram in form. Before the subjugation of the Ceded districts [q.v.] in 1800, the talook was given up to the rule of several small poligars [q.v.]. Apart from the two ranges of hills above mentioned, the country is dotted and intersected by isolated hills, and low ranges striking at various angles from the main hill ranges. Soils may be classified under black, red and grey. The first includes about 75 per cent. of the whole arable lands [sheygaul], although the quality of the cotton soil [regar] varies greatly over different parts, from a rich loam [pasalay munn] of great depth to a mixed and stony soil [desham, munn]. The better qualities of the black lands, near the villages of Balpañore, Cassanore, and Lomada, and generally over the westernmost division, are very productive. The second and third kinds are found mostly in the vicinity of the hills. Crops of cotton [q.v.] and seeds and grain are however raised constantly on such soil. The sole industry is agriculture. Along the eastern limits the waters of the Paupughny are carried by an elaborate system of irrigating channels [q.v.], renewed after every fresh, over large areas on either bank. The Chitrauvaty just touches the extreme north-west boundary of the talook. Artificial works for the storage of water are of little service, and there are no large tanks [q.v.]; those that were formerly available are rapidly becoming useless by the process of silting up, while in others the looseness and porousness of the soil defeat all efforts to make them efficient reservoirs. Cultivation under wells is general, and in favored situations, such as the eastern portion of the talook where water lies at no great depth, the soils so cultivated become most productive; but westwards wells become deeper, and therefore scarcer. Places of archæological interest:—Chinna coodaula, Commanootla, Lopatnootla, Maddoolapaud, Maurellamadaka, Mopore, Nullacheroopully, Paurnapully, Poolivendla, Vaimla, Vempully, Yerrabulla. The leading places, &c., in the talook are the following.——*Balpanore* (బలపనూరు - balapanúru, Tel.). From (balapamu, tel. soap-stone + úru, tel. village). Village; pop. 4,054; acres 9,168; lat. 14° 32′; long. 78° 14′; from Cuddapah W. 42 miles; from Poolivendla N.N.W. 8 miles.——*Bauhoodah nuddy* (బాహుదానది - báhudanadi, Tel.). See sep. title.——*Bhauncote* (భానుకోట - bhánukóta, Tel.). See sep. title.——*Casanore* (కసనూరు - kasanúru, Tel.). From (kashamu, tel. fountain + úru, tel. village). Village; pop. 3,782; acres 7,770; lat. 14° 37′; long. 78° 12′; from Cuddapah W.N.W. 45 miles; from Poolivendla N.N.W. 14 miles. Richest village in talook; has endowed choultry [q.v.].——*Chitrauvaty* (చిత్రావతి - chitrávati, Tel.). See sep. title.——*Comauracaulwa* (కొమారకాలువ - komárakálava, Tel.). From (komaru, tel. pleasant + kálava, tel. stream). Village; pop. 1,137; acres 4,772; lat. 14° 17′; long. 78° 31′; from Cuddapah W.S.W. 27 miles; from Poolivendla E.S.E. 19 miles. On a peak of the Palcondahs.——*Commanootla* (కొమ్మనూతల - kommanútala, Tel.). From (komma, tel. branch + núyi, tel. well). Village; pop. 1,652; acres 11,178, lat. 14° 31′; long. 78° 03′; from Cuddapah W. 54 miles; from Poolivendla W.N.W. 16 miles. Former seat of a petty poligar [q.v.], a cauvalgar [q.v.] under Vijianugger government. Family extinct. Ruins of fort. Old temple of Tirvencatanauta sawmy.——*Lomada* (లోమడ - lómada, Tel.). From (ló, tel. inside + mada, tel. channel). Village; pop. 1,352; acres 6,379; lat. 14° 36′; long. 78° 16′; from Cuddapah W. 41 miles; from Poolivendla N. 12 miles.——*Lopatnootla* (లోపటనూతల - lópatanútala, Tel.). From (lópata, tel. inside + núyi, tel. well) Village; pop. 627; acres 6,120; lat. 14° 30′; long. 78° 08′; from Cuddapah W. 49 miles; from Poolivendla W.N.W. 10 miles. Seat of a petty poligar [q.v.], a cauvalgar [q.v.] under Vijianugger government. Family extinct. Old fort.——*Nullacheroopully* (నల్లచెరువుపల్లి - nallacheruvupalli, Tel.). From (nalla, tel. black + cheruvu, tel. tank + palli, tel. village). Village; pop. 1,721; acres 8,192; lat. 14° 29′ 00″; long. 78° 24′; from Cuddapah W. 31 miles; from Poolivendla E.N.E. 10 miles. Temple of Bheiraveshwarasawmy situated near hamlet of Mopore, enlarged and beautified by a Vijianugger sovereign in A.D. 1544. Monastery of ascetic jogies [q.v.].——*Palcondah* (పాలకొండ - pálakonda, Tel.). See sep. title.——*Paupughny* (పాపఘ్ని - pápaghni, Tel.). See sep. title.——*Paurnapully* (పార్నపల్లి - párnapalli, Tel.). From (párna, san. leafy + palli, tel. village); from its foliage. Village; pop. 1,476; acres 2,719; lat. 14° 34′; long. 78° 01′; from Cuddapah W. 57 miles; from Poolivendla W.N.W. 20 miles. Vijianugger inscription of A.D. 1476. Old Poligar [q.v.] fort partly in ruins. Two miles south-east is the hermitage of Canwa in hills, where are two old Shiva and Vishnoo temples.——*Poolivendla* (పులివెందల - pulivendala, Tel.). See below.——*Vaimla* (వేముల - vémula, Tel.). From (vému, tel. margosa tree, melia azadirachta, linn.). Village; pop. 1,577; acres 5,686; lat. 14° 22′; long. 78° 22′; from Cuddapah W.S.W. 34 miles; from Poolivendla E.S.E. 8 miles. Head-quarters of the Vaimla poligar, who acquired a brief notoriety by resistance to Col. Munro in 1800. He was soon subjugated, and his family is now almost extinct. The fort is about five miles from the village close to Meedipentla. a position commanding one of the more passable roads leading southwards across the hills into Cadiry and Mysore.——*Vempully* (వేంపల్లి - vémpalli, Tel.). From (vému, tel. margosa tree, melia azadirachta, linn. + palli, tel. village). Village; pop. 5,638; acres 11,292; lat. 14° 22′; long. 78° 30′; from Cuddapah S.W. 25 miles; from Poolivendla E.S.E. 16 miles. On the Paupughny. Large and wealthy village. Centre of trade. On a hill opposite the village is a temple of Vrishabhauchaleshwara sawmy. Opposite the hill there is a cave containing a Lingam [q.v.] and an image of Parvaty [q.v.].——**(2)** Village, Talook head-quarters; Cuddapah dist., Poolivendla tal.; pop. 1,784; acres 1,644; lat. 14° 26′; long. 78° 16′; from Cuddapah W. 40 miles; from Madanapully N.N.W. 63 miles; from Madras W.N.W. 166 miles; from Sidhout W. 50 miles. Considered unhealthy. Poligar hill-fort in ruins. 1½ miles west is an old

temple of Runganauta sawmy. The image of the deity is declared to have been self-created in another yoog [q.v.].

POOLLAMPETT (పుల్లంపేట - pullampéta, *Tel.* pullampet *). From (pullamma, tel. proper name + péta, tel. suburb); said to have been founded by poollamma, a female relative of the chitwail rajah.——(1) Talook, Cuddapah district. Tahsildar's pay Rs. 200. Area 979 square miles. Greatest length from north to south 46 miles, breadth from east to west 30 miles. Population 149,109. Language Teloogoo. S.E of district. Bounded north by Sidhout talook, east by Raupore and Vencatagherry in Nellore district, south by Chundragherry talook of North arcot district, west by Voilpaud and Royachoty talooks. To the east and west intersected by hill ranges. Cultivation is principally carried on in two valleys. Of these, the Cheyair valley, which formerly constituted the petty kingdom of Chitwail, is most fertile and productive. There are two forests, the Sheshachellaparvatam on the hills of the same name and the Cundacharloo connected with the ghauts [q.v.] of Raupore. The former comprises about 5,000 and the latter 2,000 acres. Red soil is predominant. Principal manufactures are indigo [q.v.] and fine cloth in Naugayapett and Poollampett. At Hoblampett a considerable trade is carried on in dyeing [shauyam] cotton thread [nool] red. At Poollampett fine mats [boriyah] of colored grass are manufactured. The greater number of the channels [q.v.] are led from the Cheyair, which brings down the drainage waters of the high table-lands of Royachoty and Voilpaud. Camping grounds, Chitwail, Codoor and Poollampett. Places of archæological interest:—Attiraula, Gandlore, Lepauka, Mundapully, Nundalore, Penagalore, Tungatore, Wobaly. Principal trig. stations:—Cunclacondah, Yecoolasaury. The leading places, &c., in the talook are the following.——*Attiraula* (అత్తిరాల - attirála, Tel.). From (atti, tel. fig, ficus racemôsa, linn. + ráyi, tel. stone). Village, Place of pilgrimage; pop. 83; acres 88; lat. 14° 14′; long. 79° 13′; from Cuddapah S.E. 29 miles; from Poollampett N. 8 miles. On the route from Cuddapah to Madras, 2 miles north-north-east of Rajampett railway station, and on the right bank of the Cheyair. Of great sanctity. Deserted temple of Parshooraman [q.v.]. Car festival [ratotsavam] three days before and after Shivarautry [pundigay, 6a].——*Bullipully* (బల్లిపల్లె - ballipalle, Tel.). From (balli, tel. lizard + palli, tel. village). Village, Hamlet of Shetticoonta; pop. 5,668; lat. 13° 47′; long. 79° 28′; from Cuddapah S.E. 63 miles; from Poollampett S.S.E. 28 miles. Forest timber depôt.——*Cheyair* (చెయ్యేరు - cheyyéru, Tel.). See sep. title.——*Chinna orampaud* (చిన్నఓరంపాడు - chinnaórampádu, Tel.). From (chinna, tel. small + óra, tel. border + pádu, tel. village). Village, Railway station; pop. 4,943; acres 7,900; lat. 14° 04′; long. 79° 19′; height 618 feet; from Cuddapah S.E. 42 miles; from Poollampett S.E. 6 miles. On the route from Cuddapah to Madras.——*Chitwail* (చిట్వేలు - chittivélu, Tel.). See sep. title.——*Codoor* (కోడూరు - kódúru, Tel. kódúr *). From (kódi, tel. a fowl + úru, tel. village). Village, Railway station; pop. 6,557; acres 18,895; lat. 13° 58′; long. 79° 24′; height 643 feet; from Cuddapah S.E. 51 miles; from Poollampett S.E. 15 miles. Former Forest head-quarters.——*Condore* (కొండూరు - kondúru, Tel.). From (konda, tel. hill + úru, tel. village). Village; pop. 1,281; acres 15,068; lat. 14° 19′; long. 79° 20′; from Cuddapah S.E. 34 miles; from Poollampett N.E. 14 miles.——*Cunclacondah* (కనికలకొండ - kanikalakonda, Tel.). From (kanika, tel. quartz stone + konda, tel. hill). Hill; Trig. station; lat. 14° 17′ 43·05″; long. 79° 11′ 19·44″; height 2,040; from Cuddapah S.E. 26 miles; from Poollampett N.N.W. 12 miles.——*Eegalsaricondah* (ఈగలసరికొండ - ígalasarikonda, Tel.). From (íga, tel. fly + tsari, tel. a precipice + konda, tel. hill). Hill; lat. 14° 01′ 25·75″; long. 79° 28′ 50·09″; from Cuddapah S.E. 52 miles; from Poollampett E.S.E. 17 miles.——*Goonjana* (గుంజన - gunjana, Tel.). See sep. title.——*Hoblampett* (ఓబులంపేట - óbulampéta, Tel.). From (óbulamma, tel. proper name + péta, tel. suburb). Village, Hamlet of Rungayapully; pop. 698; lat. 14° 23′; long. 79° 15′; from Cuddapah S.E. 27 miles; from Poollampett N.N.E. 18 miles. Considerable trade in dyeing [shauyam] cotton [q.v.] thread [nool] red. At confluence of Cheyair and Pennair.——*Naugavaram* (నాగవరము - nágavaramu, Tel.). From (nága, san. snake + púra, san. town). Village; pop. 2,412; acres 8,185; lat. 14° 03′; long. 79° 24′; from Cuddapah S.E. 47 miles; from Poollampett S.E. 12 miles.——*Nundalore* (నందలూరు - nandalúru, Tel. nandalúr *). From (nandi, san. bull + úru, tel. village). Village, Railway station, Head-quarters of District moonsif; pop. 2,588; acres 3,975; lat. 14° 16′; long. 79° 10′; height 475 feet; from Cuddapah S.E. 25 miles; from Poollampett N.W. 11 miles. Old temple.——*Ootcore* (ఊటుకూరు - útukúru, Tel.). From (úta, tel. spring + úru, tel. village). Village; pop. 2,838; acres 4,044; lat. 14° 11′; long. 79° 14′; from Cuddapah S.E. 32 miles; from Poollampett N.N.W. 4 miles. Agricultural village with large tank.——*Palcondah* (పాలకొండ - pálakonda, Tel.). See sep. title.——*Pedda orampaud* (పెద్దఓరంపాడు - peddaórampádu,* Tel.). From (pedda, tel. great + órampádu, tel. the village). Village; pop. 3,363; acres 14,412; lat. 14° 06′; long. 79° 19′; from Cuddapah S.E. 41 miles; from Poollampett E.S.E. 5 miles. ——*Poly* (పోలి - póli, Tel). From (poli, tel. sacrifice). Village; pop. 7,786 including Rajampett; acres 13,446, including Rajampett; lat. 14° 13′; long. 79° 13′; from Cuddapah S.E. 30 miles; from Poollampett N.N.W. 6 miles. Hill in the neighbourhood produces good building stone [cull].——*Poollampett* (పుల్లంపేట - pullampéta, Tel.). See below.——*Rajampett* (రాజంపేట - rájampéta, Tel. rájampet *). From (rájamma, tel. proper name + péta, tel. suburb). Village, Railway station; pop. see Poly above; acres 4,890; lat. 14° 12′; long. 79° 13′; height 462 feet; from Cuddapah S.E. 30 miles; from Poollampet N.N.W. 6 miles. Important centre of trade.——*Raullamadoogoo canama* (రాళ్లమడుగుకనమ - rállamadugukanama, Tel.). See sep. title.——*Raupore canama* (రాపూరుకనమ - rápúrukanama, Tel.). See sep. title.——*Reddipully* (రెడ్డిపల్లి - reddipalli, Tel. reddipalle *). From (reddi, tel. headman of a village + palli, tel. village). Village, Railway station; pop. 2,014; acres 4,834; lat. 14° 06′; long. 79° 16′; height 561 feet; from Cuddapah S.E. 39 miles; from Poollampett S.S.E. 3 miles.——*Sheshachellam* (శేషాచలము - shéshácbalamu, Tel.). See sep. title.——*Shetticoonta* (శెట్టికుంట - shettikunta, Tel.). From (shetti, tel. merchant + kunta, tel. pond). Village; pop. 5,668; acres 68,837; lat. 13° 52′; long. 79° 26′; from Cuddapah S.E. 58 miles; from Poollampett S.S.E. 22 miles. Peddapaud, a hamlet, is a Railway station.——*Veligonda* (వెలిగొండ - veligonda, Tel.). See sep. title.——*Yecoolasaury* (ఏకులసిరి - ékulasári, Tel.). From (éku, tel. cleaned cotton + siri, tel. wealth). Trig. station; lat. 14° 01′ 25·75″; long. 79° 28′ 50·09″; from Bommavaram E.S.E. 7 miles.——*Yerragoontlacota* (ఎర్రగుంట్లకోట - erraguntlakóta, Tel.). From (erra, tel. red + gunta, tel. tank + kóta, san. fort). Village; pop. 2,812; acres 41,583; lat. 13° 58′; long. 79° 19′; from Cuddapah S.E. 47 miles; from Poollampett S. 11 miles——(2) Village, Talook head-quarters; Cuddapah dist., Poollampett tal.; pop. 2,207; acres 2,822; lat. 14° 08′; long 79° 15′; from Cuddapah S.E. 36 miles; from Madanapully N.E. 62 miles; from Madras N.W. 101 miles; from Sidhout S.E. 29 miles. Indigo [q.v.] and cloth of fine texture are manufactures.

POOLLARY (పుల్లరి - pullari, *Tel.*; புல்வரி - pulvari, *Tam.*). Tel. from (pullu, tel. grass + ari, tel. tax). Tam. from (pul, tam. grass + vari, tam. a tax) [pill]. Tax on grazing [maita]. There have been many kinds all over the country.——*Alaga poollary* (అలాగాపుల్లరి - alagápullari, Tel.). From (alag, hind. separate + above). The proportion of the muctah poollary charged on cattle-owners not being occupiers of land on puttah [q.v.].——*Chowty poollary* (சௌதாய்ப்புல்வரி - shauthâyp-pulvari, Tam.). From (chauthá, hind. one-fourth + above). Tax levied for grazing equal to one-fourth full assessment [teervay] of the land when used for cultivation. Trijye was one-third.——*Feisal poollary* (பைசல்புல்வரி - paisalbulvari, Tam.). From (faisal, ar. settlement + above). Fixed grazing assessment. Same as Muctah poollary.——*Muctah poollary* (మక్తాపుల్లరి - maktápullari, Tel.). From (makta, ar. assessment + above). A money assessment levied on the total common pasturage [maita] of a village and modified with reference to occupation out of the waste land for cultivation.——*Paravay poollary* (பரவைப்புல்வரி - paravaippulvari, Tam.). From (paravai, tam. expanse + above). A tax paid to graze cattle [maud] on large tract.——*Yennika poollary* (ఎన్నికపుల్లరి - ennikapullari, Tel.). From (ennu, tel. to count + above). Pasture tax by capitation on the cattle [maud] of a village.

POOLLY (புள்ளி - pulli, *Tam.*). Means spot. Mammal first term. Ex.:—Axis maculatus (pullimán), spotted deer; Felis rubiginosa (pullippúnai), spotted cat. See gloss. paragraphs.

POOLY (व्याघ्र - vyághra, *San.*; वाघ - vágha, *Mahr.*; ببر - babar, *Pers.*; باگھ - bágh, *Hind.*; باگ - bág, *Dec.*; اریمونڠڬل - árimautunggal, *Malay*; ಹುಲಿ - huli, *Can.*; బలిపె - balipe, *Too.*; పెద్దపులి - peddapuli, *Tel.*; ବାଘ - bágho, *Oor.*; കടുവാ - katuvá, *Mal.*; ව‍ග - vag, *Singh.*; புலி - puli, *Tam.*). Title from tamul. San. from (vi, san. intensive prefix + ághrá, san. to smell). Mahr. and Hind. from sanscrit. Malay from (árimau, malay, tiger + tunggal, malay, one); solitary tiger. Tel. from (pedda, tel. large + puli, tel. tiger). Mal. from (katu, mal. fierce + váya, mal. mouth). Singh. from sanscrit. Tam. from (pul, tam. low); from its crouching habit. Pers. also (sher). Hind. also (pátáyatbágh), meaning striped tiger. Can. also (hebbuli), meaning great + tiger. Mal. also (variyanpuli), meaning striped tiger; (perimpuli), meaning large tiger. Title otherwise Tiger, Royal tiger. Felis [marjauram] tigris, felidæ [deeptaucsham] digitigrada, carnivora, mammalia [sastanam, 9], of naturalists [jantoo]. The tiger is a large heavy bodied cat [poonay], much developed in the fore-quarters, with short, close hair of a bright rufous ground tint from every shade of pale yellow ochre to burnt sienna, with black stripes arranged irregularly and seldom in two individuals alike the stripes being also irregular in form, from single streaks to loops and broad bands. The males have prolonged hairs extending from the ears round the cheeks, forming a ruff. The pupil of the tiger's eye is round, and not vertical. The plan of measuring is to measure the animal as it lies on the ground, taking the tape from the tip

of the nose to the end of the tail. One that is ten feet by this measurement is large. 12 feet is maximum. The tiger breeds in the forest and mountain tracts, and comes into the open country when the grain is on the ground. Naturally a cowardly animal, and always retreats from opposition, until wounded or provoked. When a tiger takes to killing man, it always perseveres. In general, very old tigers, whose teeth are blunted or gone, are man-eaters [q.v.]. The tiger is often successfully killed on foot; occasionally it is shot by night from a platform on a tree. There is a Tamul proverb :—ஆனைக்கும் புலிக்கும் நெருப்பைக்கண்டால் பயம்—"the elephant [q.v.] and "tiger are afraid of fire;" which is a fact. The tiger's favorite food is deer [mrigam], antelope [jinka], and wild hog [jungle soor]. When these abound, it does not attack domestic cattle [maud]. Tiger's fat is made into oil [yennay], and being mixed with gorochanay [q.v.] or ox gall and custoory [q.v.] or musk is used as an application in cases of rheumatic pain. Tiger skins are considered sacred and used as seats by bramin [q.v.] ascetics [yogy], when they are engaged in prayer. The tiger is the emblem of power. The natives say that an additional lobe is added to a tiger's liver every year; that his flesh possesses many medicinal qualities; that his claws arranged together so as to form a circle, and hung round a child's neck, preserves it from the effect of the evil eye [cunnoor]; that the whiskers constitute a deadly poison, which for this reason are carefully burnt off the instant the animal is killed. Several of the lower castes [jauty] eat his flesh. The tiger is not found in Ceylon. Pooly is a not uncommon plant first term, from thorns or leaves resembling tiger's foot-print. Ex., where transl. is of second term:—Cæsalpinia sepiaria (pulittadukki), and (pulittodakki), to prevent; Helmia dæmona (pulidumpa), root; Ipomæa pestigridis (puliççóvadi), foot mark; Pterolobium indicum (pulitodugu), jacket. See gloss. paragraphs.——*Cazhoothay pooly* (तरक्ष - taraksha, San.; तरस - tarasa, Mahr.; ضبع - zaba, Ar.; كفتار - kaftár, Pers.; ترس - taras, Hind.; ಕಿರುಬ - kiraba, Can.; ಕತ್ತೆಕಿರುಬ - kattekiruba, Coorg; ನಾಯಿಪಿಲಿ - náyipili, *Too.*; కొర్నగండు - kornagandu, Tel.; ଗଦ୍ଦୁଆବାଘ - godduabágho, Oor.; കഴുതപ്പുലി - kazhutappuli, Mal.; கழுதைப்புலி - kazhuthaippuli, Tam.). Title from tamul. San. from (tara, san. crossing + kshí, san. to kill); as annoying on the road. Mahr. from sanscrit. Ar. from (zabaa, ar. to stretch the arms). Hind. from sanscrit. Too. from (náyi, too. dog + pili, too. tiger). Oor. means like tiger. Mal. from (kazhuta, mal. ass + puli, mal. tiger). Tam. from (kazhuthai, tam. ass + puli, tam. tiger); from the resemblance to the ass [gadhah] in head, ears and tail. Ar. also (ummirimál), meaning mother of sandy tracts. Hind. also (hundár), meaning wolf; (lakarbágh), meaning tree + tiger. Tel. also (dummalagondi); corrupted into dummergundy [q.v.] as a term of abuse. Tam. also (kazhuthaikkudatti), meaning ass + hyæna. Title otherwise Hyæna, Strand wolf. Hyæna striata, hyænidæ, digitigrada, carnivora, mammalia [sastanam, 10], of naturalists [jantoo]. Alias Canis hyæna, Hyæna vulgaris. The hyæna, though somewhat resembling the dog [nye] in outward appearance, connects the cat [poonay] with the civet [poonoogoopoonay]. The differences between the Felidæ and the Hyænidæ, setting aside minor details, are in the teeth, and the possession by the latter of a caudal pouch. The tongue is rough, with a circular collection of retroflected spines. The hind legs are much shorter than the front, and the feet have only four toes with blunt worn claws, not retractile, but like those of the dog. The hair is coarse and bristly, and usually prolonged into a sort of crest or mane along the neck and shoulders, and to a slighter degree down the back; the tail is bushy. Of a pale yellowish gray color, with transverse tawny stripes; neck and back maned. Rare in forest districts, and abundant in open country, especially where ravines offer holes and caverns. Nocturnal. The call of hyæna is a disagreeable cry. Destructive to dogs [nye] and constantly carries off pariah dogs [q.v.] from the outskirts of villages. The hyæna is found wherever the wolf [konye] is absent. The bone of this animal rubbed into a paste and mixed with gorochanay [q.v.] and custoory [q.v.] is used to alleviate rheumatic pains. The head is sometimes buried in cattle-sheds to prevent cattle-disease [pashoo rogam]. Its incisors are tied round the loins of a woman in labor to lessen her pains. Its nasal bone is believed to possess the power of digesting food; for this purpose however it must be removed before the animal is dead.——*Poolivendla* (పులివెందల - pulivendala, Tel.). See sep. title.

POOLY (புளி - puli, *Tam.*). Sour. Plant first term often joining two genera. Ex., where transl. is of second term:—Anona muricata (pulippalá), artocarpus integrifolia; Averrhoa bilimbi (puliççakkáy), fruit; Bauhinia malabarica (pulichinta), tamarindus indica; Buchanania angustifolia (pulimá), mangifera indica; Cinnamomum iners (pulippilá), artocarpus integrifolia; Crotalaria juncea (pulivaññi), reed; Garcinia morella (puliñchakka), artocarpus integrifolia; Hibiscus cannabinus (pulimañji), fibre of sanseviera roxburghiana; Oxalis corniculata (pulichinta), tamarindus indica; Pterolobium indicum (puliyindu), mimosa rubicaulis; Vitis carnosa (pulinaralai), vitis lanata; Vitis setosa (pulippirandai), vitis quadrangularis; Webera corymbosa (puliyáyini), artocarpus hirsuta. See gloss. paragraphs. Compare also Tamarind.——*Karipoolipp* (अङ्गाराम्ल - angárámla, San.; బొగ్గుపులుసు - boggupulusu, Tel.; கரிப்புளிப்பு - karippulippu, Tam.). San. from (angára, san. charcoal + ámla, san. sour). Tel. from (boggu, tel. charcoal + pulusu, tel. acid). Tam. from (kari, tam. carbon + pulippu, tam. sour). Carbonic acid. Composed of 1 of carbon and 2 of oxygen [vayoo].——*Poolipp* (புளிப்பு - pulippu, Tam.). Acid [tezaub].——*Poolitchay* (புளிச்சை - puliççai, Tam.). Same as Hemp bendy.

POON (पुन्नाग - punnága, *San.*; പുന്ന - punna, *Mal.*). Title from sanscrit through malayalam. San. from (pums, san. male + nága, san. tree so called, mesua ferrea, linn.). Title otherwise American calaba, Pinnay; the last not connected with piney dammer [q.v.]. Botanically the Calophyllum genus, guttiferæ [vricsham, 22]. Large trees with shining leaves marked by numerous parallel transverse veins, and having racemes of flowers; fruit contains one seed. The species best known to the natives are shown below. Includes also species from the following genera:—cassia, desmodium, ochrocarpus, pseudarthria, rhizophora, sterculia.——*Bastard poon* (فرنگی بادام - farangíbádám, Hind.; جنگلی بادم - janglíbádam, Dec.; ಭಾತಾಳ - bhátála, Can.; ಪಿನಾರಿ - pínári, Too.; గుఱ్ఱపుబాదంచెట్టు - gurrapubádamchettu, Tel.; പൊട്ടക്കാവളം - pottakkávalam, Mal.; තෙලඹු - telambu, Singh.; பிநாறி - pínári, Tam.). Title from use and likeness. Hind. from (farangí, hind. foreign + bádam, hind. almond, prunus amygdalus, baill.). Dec. from (janglí, hind. wild + bádam, hind. almond). Too. means disagreeable odour. Tel. from (gurramu, tel. horse + bádamchettu, tel. almond). Mal. from (potta, mal. worthless + kávalam, mal. sterculia balanghas, linn.). Singh. means poon oil. Tam. from (pí, tam. ordure + náru, tam. to smell); from fetid flowers. Can. also (pénári). Mal. also (pínári), meaning dirty + smelling. Tam. also (kuthiraippidukkan), meaning horse + testicle, from fruit like horse testicle; (púthagarappánbattaimaram), meaning devil + skin disease so called + bark + tree; from use. Title otherwise Deodar of Western india, Devil carpang tree, Fœtid sterculia, Fœtid tree, Horse-almond, Horse testicle. Giving Sterculia oil, Sterculia seeds. Botanically Sterculia [cauvalam] fœtida, l., sterculiaceæ [vricsham, 26]. Tree; leaves compound, peltate; leaflets seven to nine, oblong-lanceolate, acuminated, young ones slightly pubescent; flowers panicled; calyx deeply divided, segments lanceolate, slightly velvety within; carpels oblong, many-seeded; flowers brownish; tinged with red at the base, very fetid. Stately tree with a smooth stem rising to a considerable height without branches; every part has disagreeable smell when bruised; capsules size of man's fist, containing ten to fifteen seeds, black and oblong, about one inch in length, and about the same in circumference; the kernel is generally grey and sweetish in taste; the oil obtained by boiling seeds in water is of a pale yellow color, inodorous, with a faintly sweetish taste; the seeds afford as much as 40 per cent. of fixed oil [yennay] which contains a large quantity of stearic acid. Leaves and bark are medicinally aperient, repellent, diuretic, and diaphoretic; seeds are oily, and if swallowed incautiously bring on nausea and vertigo; decoction of the capsule is mucilaginous and astringent, the seeds and oil are medicinally similar to catapang [q.v.]. Seeds roasted and eaten like chestnuts. Used as avenue tree [shaulay], only objectionable from the fetor of the flowers and the falling of the leaves. Wood light, tough, open grained, yellowish white, easily worked, not liable to split or warp; harder and firmer than sterculia villosa, roxb. [odul], which it resembles in structure and appearance; furnishes some of the smaller poon spars for masts of ships.——*Bracteate poon* (کوچك چمپا - kochakchampá, Hind.). Botanically Calophyllum [poon] bracteatum, thw., guttiferæ [vricsham, 22]. Large tree, closely resembling tomentosum [malabar poon]; leaves dimorphic, the fully developed 3–8 inches long, tapering to the obtuse base, highly polished, golden brown when dry; petiole ¼—½ inch; abnormal or undeveloped leaves 1–2 by ⅙—⅓ inch, sub-sessile, linear-lanceolate or linear, pubescent, resembling bracts; racemes in the axils of and shorter than the normal leaves, few flowered; flowers ⅓ inch diameter; pedicels with an oblong bract ¼ inch long at the base; sepals four; petals four; fruit ¾ inch long, oblong. Found on west coast. Wood coarse-grained, ornamental.——*Common poon* (पुन्नाग - punnága, San.; नागचांपा - nágachámpá, Mahr.; ऊंडी - undí, Conc.; سلطان چمپا - sultánchampá, Hind.; سرفن - surfan, Dec.; بنتنگور - bintanggur, Malay; ಸುರಹೊನ್ನೆ - surahonne, Can.; ಪೊನ್ನೆ - ponne, Too.; పొన్న - ponna, Tel.; ପୁନଙ୍ଗ - punang, Oor.; പുന്ന - punna, Mal.; දොඹ - domba, Singh.; பின்னை - pinnai, Tam.). San. from (pums, san. male + nága, san. the tree so called, mesua ferrea, linn.) [kamela, soora poon]; distinguished or beautiful mesua. Mahr. from (nága, san. snake + chámpá, mahr. champak tree). Hind. from (sultán, ar. royal + champaka, san. michelia champaca, linn.). Can. from (sura, san. celestial + honne, can. poon tree). Tel. from sanscrit. Mal. from (pon, mal. gold + akam, mal. within) [kamela, malabar poon, wild mohwah], by corruption. Tam. from (pon, tam. gold), beautiful tree with reddish brown wood [small chaltah], by corruption.

San. also (naméru), meaning worship tree; (pañchakésara), meaning five + filament; (tungakásara), meaning tall + mesua ferrea, linn. Mahr. also (surangí), meaning good + color [soora poon]. Hind. also (undí); (surpan). Malay also (bítangur). Can. also (vúma); (pinekai); (ponnó) [kamela, soora poon]. Tel. also (púna); (púnás). Mal. also (ponnakam), meaning gold holding. Singh. also (teldomba), meaning oil + calophyllum. Title otherwise Alexandrian laurel, Balsám poon, Bintagor, Dilo oil plant, Domba nut, Laurel nut, Mest wood tree, Oondee, Pinnay-oil plant, St. mary's wood, Sultan champak, Sweet-scented calophyllum, Tamana-oil plant. Botanically Calophyllum [poon] inophyllum, linn., guttiferæ [vricsham, 22]. Alias Balsamaria inophyllum; Calophyllum bintagor. Bintagor from malay. Tree, 50 feet, of rather crooked growth, branches terete; leaves dark-green elliptical or oboval, obtuse or retuse, furnished with numerous parallel slender nerves; racemes longer than the leaves, from the upper axils, or disposed in a terminal panicle; sepals four; drooping racemes of flowers white, very fragrant; followed by globular smooth yellow one-seeded fruit one inch in diameter; kernels of nuts bitterish when ripe, unctuous taste; flowers twice a year, and attains a great age; common in malabar, but largely planted elsewhere, particularly near the coast; one of the most beautiful trees in the world; found in many gardens. The fruit is ovoid or round, and greenish-yellow when ripe; it varies in size; on old trees it is often as large as a bantam's egg; the pulp surrounding the nut dries up when the seed is mature, and the previously smooth skin covering it becomes brown or black and much wrinkled; endocarp is hard, woody, white, as thick as shell of a filbert [findak]; within it is an inner endocarp, soft, and corky, of a red color, thicker than the woody shell towards the apex of the fruit, but gradually becoming very thin towards the base, the inner surface of this layer is highly polished; the seed is of the same shape as the nut, it is very oily and has a rancid taste, it consists of two hemispherical cotyledons very closely united. Fresh seeds, when shelled and subjected to pressure, yield a dark green oil [yennay] of a peculiar fragrant odour; the oil has an odour of tonquin beans if the seeds are small and young; but smells like old and rancid ghee [q.v.], if they are large and well matured; the oil is bitter in both cases. Leaves used by ancient romans for laurel wreaths of monarchs and heroes; flower here offered to shiva [q.v.] and vishnoo [q.v.]. The seeds and oil are medicinally stimulant to the mucous membrane and skin; used externally only; the watery paste of the kernel of the seeds may be resorted to in the absence of the oil; the best way of using the oil is floating on water, or as an emulsion with mucilage. Doses; if the oil is greenish brown, from fifteen to twenty minims; and if pale and greenish-yellow, from twenty to thirty minims; three or four times in the twenty-four hours. The oil substituted for copaiba and cubebs [cubeb pepper]. From bark exudes a black resin [raul], powdering to green, which resembles myrrh [q.v.], and is useful application to indolent ulcers; resembles the bourbon tacamahaca; the gum [gond] from the wounded branches, being mixed with strips of the bark and leaves, is steeped in water, and the oil which rises to the surface is used as an application to sore eyes; the oil is in pharm. non-officinal. Oil is also a lamp oil [q.v.] in travancore; oil used for caulking vessels. Wood reddish-brown, moderately hard, close-grained; used for masts, spars, railway sleepers, machinery, also for cabinet-work.——*Lowly poon* (నేలపొన్న - nélaponna, Tel.). Same as Nubian senna.——*Malabar poon* (नागणि - nágani, Mahr.; ಶಿರುಪೊನ್ನೆಮರ - shiruponnemara, Can.; പുന്ന - punna, Mal.; කීන - kína, Singh.; புன்கு - pungu, Tam.). Title from habitat. Can. means small poon. Mal. from (pon, mal. old + akam, mal. within) [common poon, kamela, wild mohwah]. Tam. like malayalam [caunooga, karanj]. Can. also (bobbi). Botanically Calophyllum [poon] tomentosum, wight, guttiferæ [vricsham, 22]. Alias Calophyllum elatum. Large straight tree with numerous longitudinal cracks down the bark; young shoots, panicles, and outer sepals ferruginous; leaves elliptic, acuminate, attenuated at the base, very shining; panicles terminal and from the upper axils, large, many-flowered; sepals four, two outer ones sub-rotund, small, two inner ones petaloid; petals four; fruit ovoid, pointed, about the size of a thrush's [shauricay] egg; flowers in january and february; grows abundantly in most moist ghaut [q.v.] forests or sholahs [q.v.] on western coast from canara down to cape comorin, and in similar forests on the lower pulneys, anamullays; never found in dry deciduous forests; never been planted. Gives a black, opaque gum [gond], feebly astringent, and very soluble in cold water; the solution is brownish-yellow, exhibiting a strong blue florescence. Oil [yennay] from seeds. Yields the poon spars of commerce; in the ghaut forests of south canara they are floated down rivers to the coast; wood is scarcely known except as a spar, being only occasionally used for building and bridge work by planters, reddish, coarse-grained but ornamental.——*Narrow-leaved poon* (باریك پتے کا چنپا - báríkpattekáchampá, Hind.). Botanically Calophyllum [poon] angustifolium, roxb., guttiferæ [vricsham, 22]. A splendid tree from 100 to 150 feet high, with fine straight stem; leaves short-petioled, lanceolate, somewhat obtusely pointed; flowers in axillary fascicles; pedicels with a cup-shaped apex. In demand for ship spars, &c., and has become very scarce and costly; it may be procured from 100 feet to 130 feet long, squaring 3 feet at the butt; it is very tough and elastic, but easy to saw and work up; it is used for all building purposes, but is not capable of enduring exposure or moisture long.——*Salt poon* (ఉప్పుపొన్న - uppuponna, Tel.). Title from habitat and resemblance. Same as White candel mangrove.——*Seven-leafed poon* (ఏడాకులపొన్న - édákulaponna, Tel.). Same as Dita.——*Small poon* (ಕಿರಿಹೊನ್ನೆಮರ - kirihonnemara, Can.; ಶಿರಿಪೊನ್ನೆ - shiriponne, Too.; ചെറുപുന്ന - cherupunna, Mál.; ගුරුකීන - gurukína, Singh.; சிறுபின்னை - shirubinnai, Tam.). Title from general size. Can. from (kiri, can. small + honnemara, can. the poon tree). Too. from (shiru, too. small + ponne, too. calophyllum inophyllum, l.). Mal. from (cheru, mal. small + punna, mal. calophyllum inophyllum, linn.). Singh. from (guru, san. heavy + kína, singh. calophyllum tomentosum, wight). Tam. from (shiru, tam. small + pinnai, tam. calophyllum inophyllum, linn.). Can. also (bubbimara); (kalponne); (kaiponne). Title otherwise Calaba tree, False poon, Keena-nut tree, Santamaria tree, Shiroopinnay, True east india tacamahaca resin tree. Botanically Calophyllum [poon] wightianum, wall., guttiferæ [vricsham, 22]. Alias Calophyllum apetalum, calaba, calabioides, decipiens, inophyllum, var. wall., spurium. Tree; leaves cuneate-obovate, obtuse, or emarginate; young branches square; racemes lax, as long as the leaves, axillary near the ends of the branches; sepals two; petals two; drupe oblong, one-celled; petals white; western coast mountains; common near banks of rivers. Resin [raul] is yellow, translucent, adhesive, of acrid taste, and pleasant aromatic smell. The gum [gond] occurs in large translucent irregular lumps of a yellowish color; it is of horny texture, somewhat brittle, without odour; the taste is soapy; when placed in water it gradually softens, and finally disintegrates into a fine granular matter which floats in the form of flaky particles of a dirty white color, and numerous oil globules which gradually collect upon the surface; the water dissolves a small portion and becomes slightly viscid. Oil used as medicine in leprosy [cooshtam] and cutaneous affections, and in infusion mixed with honey [shahad] in scabies and rheumatism. Fruit when ripe is red and sweet; eaten by natives. Oil [yennay] is used in lamps. Timber red, very hard and heavy, valuable for engineering purposes.——*Soora poon* (सुरंगी - surangí, Mahr.; ناگیسر - nágesar, Hind.; ಪೊನ್ನೆ - ponne, Can.; సురపొన్న - suraponna, Tel.; சுரபுன்னை - shurabunnai, Tam.). Title from teloogoo. Mahr. from (su, san. good + ranga, san. color) [common poon]; properly pterocarpus santalinus, linn. [red sanders]. Hind. from (nágakésara, san. mesua ferrea, linn.) [nauga champak]. Can. from (ponnu, can. gold) [common poon, kamela]. Tel. from (sura, san. divine + ponna, tel. calophyllum inophyllum, linn.). Tam. from (sura, san. divine + punnai, tam. calophyllum inophyllum, linn.). Hind. also (nágchampá). Can. also (wandi); (taringi); (punnága), meaning male + mesua ferrea, linn. [common poon, kamela]; (wúndi); (suringi); (gardúndi). Title otherwise Fragrant poon, Long-leaved poon, Red naugaisar, Woondy. Botanically Ochrocarpus longifolius, benth. and hook. f., guttiferæ [vricsham, 22]. Alias Calophyllum longifolium; Calysaccion longifolium; Mammea longifolia. Small tree, straight stem with opposite branches at nearly right angles, leaves bright copper-colored while young, and when mature dark green and leathery; flowers are white, followed by an obliquely ovoid fruit tipped by hard-pointed style; fruit size of an acorn and resembles one; encloses a large stone, between which and the rind is a soft pulpy juice; flower-buds are about the size of cloves [lavangam], and of a red color. Habitat, malabar and western ghauts. Medicinal properties very similar to mesua ferrea [nauga champak]; the flowers are medicinally stimulant and carminative; a very weak substitute for spirit. ammon. arom., lavender and peppermint. Pulpy juice, of rose water-like [goolaub] flavor, is not accounted edible; globular flower buds are used for dyeing [shauyam] silk [puttoo]; emit fragrance like violets [banafshah], used as perfume; wood used in house-building. No other common species here.——*Straight-leafed poon* (కోలాకుపొన్న - kólákuponna, Tel.). Same as Indian medicago.——*Three-leaf poon* (ముయ్యాకుపొన్న - muyyákuponna, Tel.). Title from trifoliate leaf. Tel. from (múdu, tel. three + áku, tel. leaf + ponna, tel. calophyllum inophyllum, linn.). Tel. also (náyákuponna), meaning four + leaf + calophyllum inophyllum, linn. Botanically Pseudarthria viscida, w. & a., leguminosæ [vricsham, 48]. Alias Desmodium viscidum; Glycine viscida; Hedysarum viscidum; Rhynchosia viscida. Diffuse, prostrate; leaves pinnately trifoliolate; lateral leaflets obliquely ovate, terminal one, rhomboid-ovate, pubescent above, when old villous underneath; racemes filiform, elongated; legumes three to four-seeded; flowers purple, in threes from each bract, on longish pedicels, jointed close under the calyx; flowering nearly all the year. No other species here.

POON (பூண் - pún, *Tam.*). To wear.——*Poonarchy* (புணர்ச்சி - punarççi, Tam.). From (punar, tam. to join). Syntax. The mode of collocating words in Dravidian languages follows the logical order, more so than even in Latin or Greek. The leading principles are the following:—the cause precedes the effect; that which qualifies precedes that which is qualified; the similitude precedes that which is similar and the comparative that which is compared; the secondary clause precedes the primary one; the noun precedes the preposition; the verb ends the sentence. See vol. I (52); II, 205, 209. Neither the

Nunnool nor the other Tamul grammars treat of syntax as a separate subject, but connect it with etymology [bhaushay, lacshanam].——*Poonool* (பூணூல் - púnúl, Tam.). From (above + núl, tam. thread). Three-fold cotton [q.v.] string, suspended from the left shoulder to the right side, and put on for the first time, with ceremony [oopanayanam], when a young Bramin [q.v.] or other twice-born person is seven or nine years old [dwijan, jandiram, jaunwah]. See vol. I (99).

POONAR (पुनर् - punar, *San.*). Again.——*Poonarjenmam* (पुनर्जन्म - punarjanma, San.). From (above + janma, san. birth). Transmigration [samsauram].——*Poonausa* (పునాస - punása, Tel.). From (punarvasu, san. the seventh asterism). The season of the south-west monsoon [q.v.] on Golcondah coast [q.v.], which comes late, about June-July; otherwise Moodroo [q.v.]. For N.E. monsoon on Golcondah coast, see Peira. For tamul seasons see Caur and Mausam.

POONAY (मार्जार - márjára, *San.*; मांजर - máñjara, *Mahr.*; سنور - sinnaur, *Ar.*; گربه - gurbah, *Pers.*; بلی - billí, *Hind.*; کوچنگ - kuching, *Malay*; ಬೆಕ್ಕು - bekku, *Can.*; పుచ్చె - puççe, *Too.*; పిల్లి - pilli, *Tel.*; ବିରାଡି - birádi, *Oor.*; പൂച്ച - púçça, *Mal.*; බළලා - balalá, *Singh.*; பூனை - púnai; *Tam.*). San. from (márj, san. to cleanse); from constantly cleaning itself. Mahr. from sanscrit. Tel. and Singh. from (bidála, san. cat). Tam. from (púsu, tam. to wash); from constantly cleaning itself. Ar. also (abúkharásh), meaning father of scratches. Title otherwise Cat. Felis [marjauram] domestica, felidæ [deeptaucsham], digitigrada, carnivora, mammalia [sastanam, 9], of naturalists [jantoo]. Natives do not keep cats to any great extent in their houses. The cat is considered the devil's help-mate and an animal of ill omen. A penitent cat means a sanctimonious hypocrite. It is believed that when the cat cleans itself behind its ears with its wet paw, it presages rain [mazhay]. Flying lemurs [devaunga] are often called Flying cats. There is a Tamul proverb:—ஆனைக்கவடும் பூனைத் திருடும்—"the deceit of an elephant [q.v.] and the thievishness "of a cat." And another:—மார்ச் சாலநியாயத்தீர்ப்பு—"cat's judgment;" i.e., a partial judgment. And another:—பித்திகாமார்ச்சால நியாயத் தீர்ப்பு—"cat-upon-a-wall "judgment;" i.e., a dubious judgment. There is a Teloogoo proverb:—మార్జాలాభ్యంజనం—"anointing a cat;" i.e., injuring by indirect means, as a cat is said to scratch itself to death when oil is put over its head.——*Meencolly poonay* (خفیه باگ - khufyahbágh, Hind.; باگدسا - bághdásá, Dec.; ಮೀನುಗುಲಿಬೆಕ್ಕು - mínugulibekku, Can.; മീൻകൊല്ലിപ്പൂച്ച - mínkollippúçça, Mal.; හඳුන්දිව - handúndiva, Singh.; மீன்கொல்லிப்பூனை - míngollippúnai, Tam.). Hind. from (khufyah, ar. concealed + bágh, hind. tiger), tiger-like. Dec. from (bágh, hind. tiger + dásá, hind. like). Can. from (mínu, san. fish + guli, can. an affix of nouns from kollu, tam. to kill + bekku, can. cat). Mal. from (mín, mal. fish + kol, mal. to kill + púçça, mal. cat). Tam. from (mín, tam. fish + kollu, tam. to kill + púnai, tam. cat). Title otherwise Fishing tiger cat. Felis [marjauram] viverrina, felidæ [deeptaucsham], digitigrada, carnivora, mammalia [sastanam, 9], of naturalists [jantoo]. Alias Felis celidogaster, himalayanus, viverriceps; Viverrina bennettii. Of a mouse gray color, more or less deep, and sometimes tinged with tawny, with large dark spots more or less numerous, oblong on the back and neck, and in lines, more or less rounded elsewhere, and broken or coalescing; cheeks white; a black face stripe; beneath dull white; chest with five or six dark bands; belly spotted; tail with six or seven dark bands and a black tip; feet unspotted; whiskers either entirely white, or with a white tip. The nasal bones are somewhat attenuated, causing a narrowness of visage which has suggested the names viverrina and viverriceps. In old animals the bony orbital rings are complete. Common in Travancore extending up the Malabar coast as far as Mangalore. An Indian species not here found is Felis marmorata or marbled tiger-cat.——*Poolly poonay* (चित्रमार्जार - chitramárjára, San.; ابلق بلا - ablakbillá, Hind.; ಚುಕ್ಕೆಬೆಕ್ಕು - chukkebekku, Can.; నామాలపిల్లి - námálapilli, Tel.; പുള്ളിപ്പൂച്ച - pullippúçça, Mal.; කලදියා - kuladiya, Singh.; வரிப்பூனை - varippúnai, Tam.). San. from (chitra, san. variegated + márjára, san. cat). Hind. from (ablak, hind. piebald + billá, hind. cat). Can. from (chukke, can. spot + bekku, can. cat). Tel. from (námamu, tel. stripe + pilli, tel. cat). Mal. from (pulli, mal. spot + púçça, mal. cat). Tam. from (vari, tam. stripe + púnai, tam. cat). Title otherwise Rusty-spotted cat. Felis [marjauram] rubiginosa, felidæ [deeptaucsham], digitigrada, carnivora, mammalia [sastanam, 9], of naturalists [jantoo]. Alias Felis jerdoni; Leopardus sumatrensis; Viverriceps rubiginosa.—"*a*" Greenish gray, with a faint rufous tinge; beneath and inside of limbs white; a white superciliary streak, extending on the side of the nose; two dark face streaks; top of head and nape with four narrow dark brown stripes, becoming interrupted posteriorly, and passing into a series of rusty-colored spots on the back and sides, somewhat longitudinal on the back, but roundish on the sides; tail short, more rufous than the body, and uniform in color, or very indistinctly spotted, the tip not dark; the lower surface and inside of the limbs with large dark brown spots; feet rufous-gray above, black on the soles; ears small; whiskers long, white; fur short and very soft. This cat varies somewhat both in the ground-color of the fur and the character of the spots. Procured in the vicinity of Nellore and Madras. This cat frequents grass in the dry beds of tanks, brush-wood, and occasionally drains in the open country and near villages, and is not a denizen of the jungles.—"*b*" Akin is the Spotted wild cat. Felis torquata of naturalists. Ground-color of the fur cat-gray, more or less fulvescent, or pale grayish fulvous; with numerous small black roundish spots; on the head, nape and shoulders, the spots are smaller, and tend to form longitudinal lines on the occiput and nape; some distinct cross bands on the limbs, with one or two black streaks within the arm; cheek striped as usual; the breast spotted, but the belly almost free from spots, tail short, with a well defined series of dark rings and a black tip, ears externally dull rufous, with a very small dusky pencil-tuft; cheek stripes as usual; paws blackish underneath.——*Poonoogoo poonay* (गन्धमार्जार - gandhamárjára, San.; سنورالزباد - sinnaurúzzabád, Ar.; گربه زباد - gurbahizabád, Pers.; مشک بلی - mushkbillí, Hind.; رسه - rase, Malay; ಪುನುಗಿನಬೆಕ್ಕು - punuginabekku, Can.; ಪುನುಂಗುಪುಚ್ಚೆ - punungupuççe, Too.; పునుగుపిల్లి - punugupilli, Tel.; ଶାଳିଆପୋତ୍ନି - sáliyápotni, Oor.; മെരുക - meruku, Mal.; ගඳමාගෝ - gandhamriga, Singh.; புனுகுப்பூனை - punuguppúnai, Tam.). San. from (gandha, san. fragrance + márjára, san. cat). Ar. from (sinnaur, ar. cat + zabád, ar. musk). Pers. from (gurbah, pers. cat + zabád, pers. musk). Hind. from (mushk, pers. musk + billí, hind. cat). Can. from (punugu, can. civet + bekku, can. cat). Tel. from (punugu, tel. civet + pilli, tel. cat). Mal. from (mriga, san. animal). Singh. means fragrant animal. Tam. from (punugu, tam. civet + púnai, tam. cat). Title otherwise Civet cat. Viverra civettina, viverrinæ, viverridæ, digitigrada, carnivora, mammalia [sastanam, 11], of naturalists [jantoo]. The civets proper are animals of more or less elongated form, with the muzzle produced, and a long and generally tapering tail. The tongue is rough from rigid papillæ directed backwards; and most of them have a large glandular pouch between the anus and the genital organs, secreting an odorous substance called civet. The pupils contract circularly. They are nocturnal in their habits; and, according to their genus, are more or less carnivorous in their habits.—"*a*" The species above-mentioned is specially called the Malabar civet cat, being found on the Malabar coast, from the latitude of Honore to Cape comorin, and very possibly it extends further north. Its hair is long, coarse, and of a dusky or brownish grey, and marked with interrupted transverse bands or spots in rows, two obliquely transverse black lines on the neck; the snout, throat, and neck are white; the tail tinged with black. From the shoulders along the back a mane or crest of lengthened hair. This species closely resembles the African civet; only that in the latter the mane begins on the occiput.—"*b*" Allied is the Lesser civet cat. Viverricula malaccensis of naturalists. Alias Genetta rasse; Viverra bengalensis, gunda, indica, malaccensis, pallida, rasse. Tawny gray or grayish brown, with several longitudinal lines or streaks on the back and croup; the side spotted more or less in rows; some transverse bands on the sides of the neck, and also a few indistinct lines; abdomen without spots; head darker, with a black stripe from the ear to the shoulder; tail long, with eight or nine complete dark rings. The native civet of commerce is extracted from this species kept in confinement.—"*c*" Indian allied species not here found are:—Prionodon gracilis or malayan linsang, Prionodon maculosus or spotted linsang, Prionodon pardicolor or tiger-civet or linsang, Viverra megaspila, Viverra zibetha or large civet cat.——*Shiringy poonay* (शार्दूलबिडाल - shárdúlabidála, San.; वाघट - vághata, Mahr.; چیتا بلا - chítábillá, Hind.; اریمو اکر - árimauakar, Malay; ಹುಲಿಬೆಕ್ಕು - hulibekku, Can.; ఆకుచిరుత - ákuchiruta, Tel.; കാട്ടൻപൂച്ച - kátanpúçça, Mal.; சிவிங்கிப்பூனை - shivingippúnai, Tam.). San. from (shárdúla, san. leopard + bidála, san. cat). Mahr. from (vyághra, san. tiger). Hind. from (chítá, hind. cheetah + billá, hind cat). Malay from (árimau, malay, tiger + ákar, malay, climbing plant). Can. from (buli, can. tiger + bekku, can. cat). Tel. from (áku, tel. leaf + chiruta, tel. leopard), meaning thin. Mal. from (kátan, mal. wild + púçça, mal. cat). Tam. from (shivingi, tam. pard + púnai, tam. cat). Title otherwise Leopard cat. Felis [marjauram], bengalensis, felidæ [deeptaucsham], digitigrada carnivora, mammalia [sastanam, 9], of naturalists [jantoo]. Alias Felis ogilbii, chinensis, herschellii, javanensis, jerdoni, minuta, nepalensis, pardochrous, sumatrensis, tenasserimensis, undata, wagati; Leopardus ellioti. Wagati from mahratta. Ground hue varying from fulvous gray or to bright tawny yellow, occasionally pale yellowish gray; lower parts yellowish, rarely greenish-ashy, or brownish gray; forehead, and in a pure white; four longitudinal spots on the vertex to the shoulders, line with these four lines run from the centre ones narrower, and these two the outer one broader, the centre ones narrower, and these two last are continued almost uninterruptedly to the tail; the others pass into larger bold, irregular, unequal, longitudinal spots on

the shoulders, back, and sides, generally arranged in five or six distinct rows, decreasing and becoming round on the belly; two narrow lines run from the eye along the upper lip to a dark transverse throat band; and two similar transverse bands run across the breast, with a row of spots between; tail spotted above, indistinctly ringed towards the tip; the inside of the arm has two broad bands, and the soles of all the feet are dark brown; there is generally a small white superciliary line. A variable species. Most abundant in Wynaud, and the forest tract along the Western ghauts; rare on the east coast.

POOND (பூண்டு - púndu, *Tam.*). Plant, applied generally to medicinal plants.——*Poodimadaca* (పూడిమడక - púdimadaka, Tel.). From (púdi, tel. village + madaka, tel. plough). Village, Port; Vizagapatam dist., Sarwasiddhy tal.; pop. 1,589; lat. 17° 30′; long. 83° 02′; from Vizagapatam S.W. 23 miles; from Yellamanchily E. 9 miles. Was a port for exportation till 1884 when it was abolished. Has a conspicuous land mark called the pillar rock.——*Poody* (పూడి - púdi, Tel.). Means village. Village, Port; Nellore dist., Polore division; pop. 758; lat. 13° 51′; long. 80° 16′; from Armegam S.S.E. 3 miles; from Madras N. 51 miles; from Nellore S.S.E. 44 miles; from Polore N.E. 18 miles; from Poolicat N. 29 miles; from Raupore E.S.E. 52 miles. Near point Poody, the southernmost port of Nellore district. Boats are made and repaired.——*Poondy* (పూండి - púndí,* Tel.; பூண்டி - púndi, Tam.). From (púndu, tam. shrub).—"*a*" Shrubbery or garden; village. Pariah proper name [peyar].—"*b*" Village, Port; Tekkaly zemindarry; pop. 980; lat. 18° 40′; long. 84° 29′; from Barwah S.W. 17 miles; from Chetterpore S.W. 59 miles; from Chicacole N.E. 43 miles; from Madras N.E. 467 miles; from Nowpada N.E. 11 miles. Small port on Orissa coast at mouth of Mahendratanaya, having several rocks projecting seaward from north-east ¾ east. Port is marked by a white obelisk [laut], 50 feet high on a hillock, 19 feet above the sea. A few yards east is flagstaff, 75 feet high, and north at same distance is travellers' bungalow [q.v.]. Anchorage is with the obelisk bearing north-west by west. Under Sea customs superintendent of Calingapatam. Road to Kimedy and Central provinces.

POONGANORE (పుంగనూరు - punganúru, *Tel.* punganúr *). From (pungamma, tel. a woman who constructed the tank + úru, tel. village).——**(1)** Zemindarry, North arcot. Area 648 square miles. Population 92,023. Language Teloogoo. Above ghauts, north-west of district. Bounded west by Mysore; north by Madanapully talook of Cuddapah; east by Chundragherry and Chittore talooks; and south by Pulmanair talook. One of the Cuddapah polliems [q.v.]. The family settled in the country in thirteenth century. The founder, Seetappa gownivaur, orginally settled at Varigapully in Chittore talook. In A.D. 1249 he founded Sangattore and built the fort there. In 1479 the head of the family, Timmayya gownivaur, founded the present town of Colaur and built its fort. His son Immady timmayya gownivaur drove away Adil shah when he attacked Penoocondah. Krishna deva royel for this act granted him the district of Aunecull near Oossoor without tribute, and gave title of Royel. He built Jangamcottah and Hoscote 25 miles west of Colaur and later fortified Aunecull. His sway extended over Aunecull, Colaur, Jangamcottah, Hoscote and Soogatore, which at his death were divided by his two sons. The elder, Chikkayya timmayya, from whom the present Zemindar is descended, took Colaur and Soogatore. He later built the fort of Poonganore. In 1642 the country was taken by the Mahrattas, in 1713 by the Cuddapah nawaub and, afterwards by Hyder. The family was restored by the British in 1799. In 1841, the present zemindar, then eleven years old, succeeded. He was installed in 1847 and received a permanent sunnud [q.v.] in 1861. The present peshcush [q.v.] is Rs. 66,821. Natural features are those of Mysore plateau. The south-eastern portion is drained by Cowndinyanuddy, which passes through Pulmanair into Goodiyattam; the waters of the north-west flow northwards, uniting eventually, with the Bauhoodah river of Cuddapah. The finest jungle is in the east. Paricondah jungles on the west and Basavapooram on the south afford extensive pasture grounds leased out by zemindar. The soil is light loam [pasalay munn]. Granite [caroomcull] is obtained throughout, and lime [choonam] at Paulamanda, Poonganore, Suddam. Iron sand [irooppoo manal] is collected in most hill streams, but chiefly near Auvoolapully, Cundore, and Chembacore. The metal is sold in Sowdapully fair. Excellent breed of cows [maud, pashoo]. Weaving of coarse cloths and cumblies [q.v.]. The former by Pariahs, and the latter by Coorumbar [q.v.]. There are also a few braziers. Exports are chiefly tamarinds [q.v.], sugar [q.v.], jaggery [q.v.], gram [q.v.], and jungle produce in the shape of tanning barks [chamrah]. Imports are almost confined to salt [ooppoo] and fine cloths. Places of archæological interest:—Auvoolapully, Baulasamoodram, Bheemagaunipulley, Chadalla, Chintamaucoolapully, Cottacote, Cundore, Goottapulley, Modgalapully, Peddacoorapully, Poojagaunipulley, Poonganore, Ramasamoodram, Somala, Sowdapully, Yedapanjoney. Principal trig. stations:—Auvoolapully-droog, Chintamaucoolapully. The leading places, &c., in the zemindarry are the following.——*Auvoolapully droog* (ఆవులపల్లిదుర్గము - ávulapallidurgamu, Tel.). From (ávu, tel. cow + palli, tel. village + durga, san. fort). Trig. station; lat. 13° 23′ 23·90″; long. 78° 55′ 06·08″; height 3,829 feet; from Auvoolapully E.S.E. 4 miles; from Poonganore E. 21 miles.——*Chintamaucoolapully* (చింతామాకులపల్లి - chintamákulapalli, Tel.). From (chintamánu, tel. tamarind tree, tamarindus indica, linn. + palli, tel. village). Trig. station; lat. 13° 35′ 38·90″; long. 78° 51′ 24·08″; from Chintamaucoolapully S. ¾ mile; from Poonganore N.E. 23 miles.——*Cowndinyanuddy* (కౌండిన్యనది - kaundinyanadi, Tel.). See sep. title.——*Peddacoorapully* (పెద్దకూరప్పల్లి - peddakurappalli, Tel.). From (peddakurappa, tel. proper name + palli, tel. village). Chinnacoorappa his brother founded another village. Village; pop. 108; lat. 13° 23′; long. 78° 28′; from Chittore W.N.W. 47 miles; from Poonganore N.N.W. 10 miles. Inscriptions of Vijianugger dynasty. Temple on hill to Vauleeshwarasawmy. Annual festival in November or December.——*Poonganore* (పుంగనూరు - punganúru, Tel.). See below.——*Royelpett* (రాయల్పేట - ráyalpéta, Tel.). From (ráyalu, tel. king + péta, tel. suburb). Village; pop. 975; lat. 13° 20′; long. 78° 46′; from Chittore W.N.W. 26 miles; from Poonganore E.S.E. 11 miles. Weekly market. Trade in tamarind [q.v.] fruit. Jaggery [q.v.] manufactured.——*Sowdapully* (చౌడపల్లి - chaudépalli, Tel.). From (chaudéshvari, tel. durgá, the goddess of barren salt marsh + palli, tel. village). Village; pop. 1,546; lat. 13° 26′; long. 78° 44′; from Chittore W. 31 miles; from Poonganore E.N.E. 10 miles. On elevated ground. Ancient temple with fine carvings. Annual festival in April or May. Weekly fair. Commerce by Comaties [q.v.]. Iron ore [auhan]. Coarse cumblies [q.v.] manufactured.——**(2)** Sub-Magistracy, North arcot district. Pay Rs. 100.——**(3)** Town, Head-quarters of Zemindarry and Deputy tahsildar; North arcot dist., Poonganore zemindarry; pop. 5,565; lat. 13° 22′; long. 78° 37′; from Arnee N.W. 68 miles; from Chittore W.N.W. 37 miles; from Madras W. 117 miles; from Ranipett W.N.W. 59 miles; from Tripatty W.S.W. 60 miles; from Vellore N.W. 49 miles. Zemindar's palace, ancient building, in which accommodation for European travellers is set apart. In front is courtyard, containing dens in which wild beasts are confined, and a museum with a collection of curiosities, the most remarkable being life-sized models representing various native castes. Old fort. Ruins of a large Roman catholic chapel bearing date 1780. Climate suited to cultivation of roses [gool]. In April, after local festival to Maunica royasawmy, a large cattle fair. Poonganore samstaunam or Poonganore government has given rise to a proverb in native usage for nominal government but real anarchy.

POONJAH (ಬೆಟ್ಟ - betta, *Can.*; మెట్ట - metta, *Tel.*; புன்செய் - punsey, *Tam.*). From (pul, tam. inferior + shey, tam. cultivation). Otherwise Poonjey. Land which cannot be irrigated and is therefore unfit for the growth of rice [q.v.], but fit for dry grain [q.v.] cultivation [nunjah]. Poonjah baughayet is dry land rated as garden cultivation. Poonjah mail nunjah are wet crops on fields classed as dry. Poonjah varavoo nunjah, meaning dry land coming under wet, is poonjah converted into nunjah [q.v.]. Tidal poonjah, from (tidal, tam. high ground), are high lands dependant entirely on rainfall [maunavaury, mazhay, vellaumay]. See vol. I, 112.——*Poonyicara* (പുഞ്ഞിക്കര - púññikkara, Mal.). From (puñcha, mal. wet land + kara, mal. village). Island; Cochin state, Cochin tal.; lat. 9° 59′; long. 76° 18′; from Ernacolum N.W. 2 miles; from Cochin N. 1½ miles. In the Cochin backwater. Bungalow [q.v.] used by the Resident. The residency is known as Balgotty. Population mostly Christians, but Jews [jonaca] and Concanies [q.v.] are also found. Two Roman catholic churches.

POONJAM (పుంజము - punjamu, *Tel.*; புஞ்சம் - puñjam, *Tam.*). Literally a collection. In Teloogoo a collection of 60 threads and in Tamul of 120 threads skeined [nesavoo], ready for the formation of a warp [pauv] for weaving. A cloth is denominated 10, 12, 14, up to 40 poonjam, according to the number of times 60, or else 120, is contained in the total number of threads [nool] in the warp. Poonjam thus also came to mean a cloth of the length of one poonjam as usually skeined; this usual length is 36 cubits, or 18 yards, and the width from 38 to 44 inches, 14 lbs. being the common weight; pieces of half length were formerly exported as Salampores [q.v.].

POONOOGOO (गन्धमार्जारबीज - gandhamárjárabíja, *San.*; جند بيدستر - jundibedastar, *Ar.*; آش‌بچگان - áshibachagán, *Pers.*; جند - jund, *Hind.*; جن - jun, *Dec.*; ಪುನುಗು - punugu, *Can.*; పునుగు - punugu, *Tel*; പുഴുക - puzhuku, *Mal.*; புனுகு - punugu, *Tam.*). Title from tamul. San. from (gandha, san. fragrance + márjára, san. cat + víja, san. seed). Ar. from (jund, ar. medicine + bedastar, ar. beaver). Pers. from (ásh, pers. gruel + bachagán, pers. children). Hind. from arabic. Ar. also (kusiyatikalbulbahr), meaning testicles of sea dog. Pers. also (kháyahisagiábí), meaning testicle of water dog. Tel. also (nírukukkabíjam), meaning water + dog + seed. Tam. also (shunnu), from deccany; (nírnáyvirai), meaning water + dog + seed; (punuguççattam), meaning cives + ventricle of the civet cat. Title otherwise Civet, Zibet perfume. Product of Viverra civettina [poonoogoo poonay]. Chiefly used, diluted, as perfume; also considered anodyne and antispasmodic, resembling castor;

when good, is clear yellowish white, soft, unctuous, of about consistence of honey [shahad]; like musk [custoory], its smell is unpleasant till diluted; sometimes adulterated with ox-gall [gorochanay], storax [q.v.], or honey [shahad]; antispasmodic to a certain degree, used as perfume to augment smell of odoriferous substances, chiefly waters and spirits, such as the lily of the valley, roses [gool], rhodium, orange [q.v.] flowers, yellow saunders, &c. Cf. castor, concrete substance obtained from two small bags in the preputial follicles of the beaver, castor fiber; not found here.

POONYET (پونیت - punyat, *Burm.*). A honey-comb black resin [raul], met with in burmah, formed by a hymenopterous insect, which obtains the resinous matter from hopea odorata, roxb. [caung], dipterocarpus turbinatus [gurjan], and canarium strictum, roxb. [black dammer]; it constructs its hive in the hollows or bifurcations of trees, the crevices of rocks and on ground; a trumpet-shaped entrance is constructed of the resinous matter, protruding for about a foot in length, and widening to about the same extent; to obtain the hive, the trees have in majority of cases to be hewn down, each yielding about 20 lbs. The principal use of Poonyet is for caulking boats, for which purpose it is mixed with earth-oil or petroleum [naphtha, munn teilam].

POOR (पूर् - púr, *San.*). To fill.——*Poonnama* (పున్నమ - punnama, Tel.). From (paurnamí, san. full moon). Full-moon day [powrnimay].——*Poorah* (پورا - púrá, Hind.). Complete. ——*Poorum* (पुर - pura, San.; پور - púr, Hind.; ಪುರ - pura, Can.; పురము - puramu, Tel.; പുരം - puram, Mal.; புரம் - puram, Tam.). From (pri, san. to fill). A populous centre [coody]. A place containing large buildings surrounded by a ditch and extending not less than one coss [q.v.] in length. If it extends for half that distance it is called a khaitam. If less than that, a carvatam or small market town. Any smaller cluster of houses is called a graumam [poory, pore, poro].——*Poorauntacan* (पुरान्तक - purántaka, San.). From (pura, san. town + antaka, san. destroyer). A contracted form of Tripoorauntacan, a name of Shiva [q.v.].——*Poorna chundran* (పూర్ణచంద్రుడు - púrnachandrudu, Tel.). Full moon [poonnama, powrnimay]. Ardha chundran is literally half moon, but applied to crescent moon also. Baula chundran is young or waxing moon or moon of the first quarter.——*Poornam* (पूर्ण - púrna, San.). Full.——*Poornaubhishaicam* (पूर्णाभिषेक - púrnábhishéka, San.). From (púrna, san. full + abhishéka, san. ablution). An ablution [snaunam] ceremony in Shacty [q.v.] worship. See vol. I (83).——*Poornaudy* (పూర్ణాది - púrnádi, Tel.). From (púrna, san. full). Intoxicating electuary composed of all kinds of narcotics [mookhadiraut].——*Poornay* (पूर्णा - púrná, San.; பூரணை - púranai, Tam.). Means full. Name of the fifth, tenth, and fifteenth days [tity] in a lunar fortnight [pacsham]. As a proper name means like the full moon [poonnama, powrnimay]; the wife of Ayenaur [ayen, poodcalay]. Poornaykizhavan, from (kélvan, tam. husband), is conversely the husband of Poornay, Ayenaur.——*Poornayya* (ಪೂರ್ಣಯ್ಯ - púrnayya, Can.). From (púrna, san. short for púrnapraña, san. having perfect knowledge, epithet of madhwa, the reformer + ayya, can. father, titular affix). Hindoo 2nd or pers. name [peyar].——*Poornimay* (पूर्णिमा - púrnimá, San.). Same as Powrnimay.——*Poory* (पुरि - puri, San.; پوری - púrí, Hind.; ಪುರಿ - puri, Can.; పురి - puri, Tel.). From (pri, san. to fill). Populous centre [coody]. A small city [pooram, pore, poro].——*Pore* (पुर - pura, San.; پور - púr, Hind.; ಪುರ - pura, Can.; పురము - puramu, Tel.; പുരം - puram, Mal.; புரம் - puram, Tam.). Town. Suffix in place names [pooram, poory, poro]. ——*Poro* (పోరొ - poro, Tel.). Ooriya corruption of (pura, san. town). Town. Suffix in place names [pooram, poory, pore].——*Powrnamausy* (पौर्णमासी - paurnamásí, San.). Day of full moon. ——*Powrnimay* (पौर्णिमा - paurnimá, San.; పౌర్ణమి - paurnami, Tel.). From (púrna, san. full). Day of full moon. Lunar [chaundramaunam] festival [pundigay, 3e]. The fifteenth day [tity] of the waxing moon [shoocla pacsham] of any lunar month [chaundra mausam]. The following are the full-moon days for the year which are especially observed:—Caurtigay, Chittray, Hootaushanam, Maula, Shrauvanam, and Vyausan.

POORA (പുര - pura, *Mal.*). A house, chiefly thatched house of a Teeyan [mana, teeyan]. For Ootpera or feeding houses see sep. title.

POORAH (पुरा - purá, *San.*). Of old.——*Pooram* (പൂരം - púram, Mal.). From (púrva, san. former). Short for Audy pooram. Also the eleventh constellation [nacshatram] in the moon's path. Same as Poobbam.——*Pooraunam* (पुराण - purána, San.). See sep title.——*Pooraunican* (పౌరాణికుడు - pauránikudu, Tel.). From (purána, san. legend so called). Hindoo third name. Generally applied to bramins versed in pooraunams [q.v.] and able to expound them to others [peyar].——*Poorohit* (पुरोहित - puróhita, San.). From (puras, san. before + hita, san. placed). Family or village priest [acharry]. The office of a poorohit is to prognosticate what are good and what are evil days for beginning any affair, or for putting it off; to avert by muntrams [q.v.] or prayers the pernicious effects of maledictions or the influence of malign constellations [nacshatram, raushy]; to assign names to new born children and calculate nativity [jautacam]; to bless new houses, wells, or tanks; to purify temples and consecrate them; and to imbue idols [shilay, vigraham] with the divine essence [matam].——*Poorvam* (पूर्व - púrva, San.). From (puras, san. before). Prior [poorva mimaumsam].

POORAM (പുറം - puram, *Mal.*; புறம் - puram, *Tam.*). Side, outside, back. Distinguish from Pooram, a town [poor]. Suffix in place names; as Malapooram, meaning hill side. Prefix in place names; as Pooramala, meaning outer mountain [poram]. ——*Paracoody* (பறக்குடி - parakkudi, Tam.). From (puram, tam. outside + kudi, tam. inhabitant). An outsider, a cultivator without hereditary rights. Pykasht of N. india [oolcoody]. See vol. I, 112.——*Pooranaud* (പുറനാട് - puranátu, Mal.). From (above + nátu, mal. country). Foreign land; title of the Cotiote rajahs.——*Poorangcadom* (പുറങ്കടം - purankatam, Mal.). From (above + katan, mal. debt). An additional loan taken from a caunacaur; same as Caunom poorangcadom. See vol. II, 104. ——*Poorapaud* (പുറപ്പാട് - purappátu, Mal.). From (above + potu, mal. to fall). Going forth. The net produce or net rent payable to a Jenmy [q.v.] after deducting interest [palisha] or advances made by the tenant and the Government tax or Nigoody [caunom, otty].——*Poorattavan* (புறத்தவன் - purattavan, Tam.). From (above + avan, tam. suffix of third person sing.). Ayenaur [ayen] who is always by the side as watchman. ——*Pooravoo* (புறவு - puravu, Tam.). From (puram, tam. outside). Hilly forest tract.——*Poracoody* (புறக்குடி - purakkudi, Tam.). Same as Paracoody.——*Poram* (പുറം - puram, Mal.). Outside. Prefix in place names, as Poracaud, meaning outer forest.——*Poramboke* (புறம்போக்கு - purambókku, Tam.). From (puram, tam. excluded + pókku, tam. a way). Lands reserved as being required for purposes other than those of cultivation; such as the sites of villages, beds of tanks, banks of channels, &c. [cadaypoke].——*Poravaday* (புறவடை - puravadai, Tam.). From (puram, tam. foreign + adai, tam. resort). A field given to other people to till.——*Porca* (പുറക്കാട് - purakkátu, Mal.). From (pura, mal. outside + kátu, mal. jungle). Title otherwise Piracada. Village; Travancore state, Quilon division, Ambalapoya tal.; pop. 6,036; lat. 9° 21′; long. 76° 25′; from Ambalapoya S. 2 miles; from Alleppey S. 10 miles; from Bombay S.S.E. 690 miles; from Cochin S. 42 miles; from Trivandrum N.W. 71 miles. Large Concany town on the coast. Formerly a separate principality, known as Champakacherry, and the principal port of the country. It passed to Cochin in 1678, and to Travancore in 1746. Both the Dutch and Portuguese had a settlement here, and the remains of the Portuguese fort still stand. Extensive mud bank here. When Alleppey is closed in the monsoon [q.v.] weather steamers call at Porca. Ships may anchor 2 miles from the shore in 6 fathoms water. Of late the mud bank [mud bay] has been shifting south towards Tottapully. A portion of the village was formerly submerged in the sea, and the eastern gate of a pagoda [q.v.] which then escaped the ruin can be still seen standing. Considerable fishing industry. Exports timber [maram], coir [q.v.], and pepper [q.v.].

POORAUNAM (पुराण - purána, *San.*; புராணம் - puránam, *Tam.*). From (purá, san. ancient) [poorah]. Literally an ancient matter. In usage it is applied to large treatises on theogony, cosmogony, history, genealogy, and connected matters. These treatises formed a comparatively modern and very important modification of vedic pantheism and oopanishad [q.v.] monotheism. The popular credence is based mainly on the Pooraunams, and the Itihausams [q.v.] or bhauratam [q.v.] and ramayanam [q.v.]. The pooranic period of hindooism is the period of its decline. In these the legends of the epic poems relating to the gods became distorted according to sectarian tendencies. Of the ideas implied by the vedic rites, scarcely a trace is visible in the pooraunams. Each pooraunam is supposed to treat of the following five [punchalutchanam] subjects:—the creation of the universe, its destruction and recreation, the genealogy of gods and heroes, the reigns of the menoos [q.v.], and the history of the solar and lunar races of kings [vamsham]. The pooraunams claim to be the inspired revealers of scientific as well as theological truth. They treat of physical science, geography [bhoogola shastram], the form of the earth [bhoomy], astronomy [jyotisham], chronology; and even in the case of one or two pooraunams, anatomy, medicine, grammar, and the use of military weapons. All this is conveyed in the form of leading dialogues, connecting numerous subordinate dialogues, in some of which a sage like Parausharan is the principal speaker and answers the inquiries put to him by his disciples. The recounting of royal genealogies consists of a dry chronicle of names. Similar chronicles were those of the early λογογράφοι, but those developed into real histories which the Indian never did. The main object of most of the pooraunams is a sectarian one. They aim at exalting one of the three members of the Trimoorty [q.v.], Bramha [q.v.], Vishnoo [q.v.], or Shiva [q.v.]. Pooraunams are composed chiefly in the simple shlocam [q.v.] metre, with occasional passages in prose. Those recognized in the south of India are the eighteen:—Agneyam, Bhaugavatam,

Bowddhicam, Bramham, Bramhaundam, Bramha veivartam, Coormam, Cundam, Gauroodam, Lingam, Marcandeyam, Matsyam, Nauradeeyam, Pudmam, Sheivam, Vaurauham, Vaumanam, Veinavam. The Veinavam means the Vishnoo pooraunam. The most comprehensive and complete is the Vishnoo pooraunam, and the most popular the Bhagavat pooraunam. The rest are very little known except to Bramins. They are usually distinguished as either Veishnava or Sheiva. The Matsyam, Coormam, Lingam, Shivam, Cundam are considered to be Sheiva, the Agny medium, and the remainder Veishnava or leaning in that direction [matam, oopapooraunam, stalapooraunam]. See vol. I (75), (87).——*Agny pooraunam* (अग्निपुराण - agnipurána, San.). Called also Agneyam. The fire pooraunam. The contents are miscellaneous and unconnected, and include chapters on law, grammar, prosody, &c. An ancient pooraunam called Vayoo, which is probably one of the oldest of the eighteen, is often substituted for Agny.——*Audy pooraunam* (आदिपुराण - ádipurána, San.). From (ádi, san. first). Another name of Bramha pooraunam.——*Basava pooraunam* (ಬಸವಪುರಾಣ - basavapurána, Can.). From (basava, san. bull, proper name). Lingayet [q.v.] work on first founder of that religion. Five different versions; two Canarese, two Sanscrit, one Teloogoo. The Canarese are by Bheema cavy and Yellendra shadaucsharappa. The former best. The two Sanscrit are by Shuncara aradhya and Basalingappa. The Teloogoo is by Somaradhya.——*Bhagavatpooraunam* (भागवतपुराण - bhágavatapurána, San.). From (bhagaván, san. the fortunate vishnu). Title otherwise Bhŕugavatam. One of the latest. Teaches Veishnava doctrines. So named from its being dedicated to the glorification of Bhagavat [q.v.] or Vishnoo [q.v.]. It consists of 18,000 shlocams [q.v.], distributed amongst 332 chapters, divided into twelve scandhams [q.v.] or books. It exercises a more direct and powerful influence upon the opinions and feelings of the people of India than perhaps any other pooraunam. Its tenth book narrates in detail the history of Krishnan [q.v.], and has been translated into all the languages of India. It is understood to have been written by the grammarian Vopadeva who lived about the twelfth or thirteenth century at the court of Hemaudry, Rajah of Devagiry, i.e., Deogarh or Dowlatabad. The Teloogoo version of the Bhaugavatam was written by Potrauz and is in the highest esteem with all the Teloogoos. It is not very faithful; much is omitted and much is inserted. The Roocminy calyaunam, the Gajendra mocsham, and other episodes selected from it, are excessively popular.——*Bhavishya pooraunam* (भविष्यपुराण - bhavishyapurána, San.). From (bhú, san. to be). Literally future. One of the six Raujasa pooraunams or those which relate to Bramha [q.v.].——*Bramha pooraunam* (ब्रह्मपुराण - brahmapurána, San.). From (brahma, san. creator). Revealed by Bramha [q.v.] to Dacshan [q.v.]. Also called Audy pooraunam.——*Bramhaunda pooraunam* (ब्रह्माण्डपुराण - brahmándapurána, San.). From (brahma, san. creator + anda, san. egg); bramha's universe. Sets out in 12,000 verses the magnificence of the egg of Bramha [q.v.], and an account of the future calpams [q.v.]. No longer procurable in a collective body. Adhyautma ramayanam [q.v.] a popular work considered a part.——*Linga pooraunam* (लिङ्गपुराण - lingapurána, San.). From (linga, san. phallic emblem of shiva). The pooraunam in which Shiva has explained the objects of life [aram, poorshaurtam], viz., virtue, wealth, pleasure, and final liberation at the end of the agny calpam [q.v.]. It is mystical and spiritual.——*Madura pooraunam* (மதுரைப்புராணம் - mathuraippuránam, Tam.). From (mathurai, tam. the town, so called). Same as Tirvilaiyaudal.——*Marcandeya pooraunam* (मार्कण्डेयपुराण - márkandéyapurána, San.). From (mrikandu, san. proper name). Is qûite unsectarian in character.——*Matsya pooraunam* (मत्स्यपुराण - matsyapurána, San.). Communicated by Vishnoo [q.v.] as a fish to the seventh Menoo [avatar, satyavratan].——*Pudma pooraunam* (पद्मपुराण - padmapurána, San.). From (padma, san. lotus). The latest.——*Raujasa pooraunam* (राजसपुराण - rájasapurána, San.). From (rajas, san. passion). Any pooraunam which relates to Bramha [q.v.]; from his own peculiar goonam [q.v.] Rajas [q.v.].——*Sheiva pooraunam* (शैवपुराण - shaivapurána, San.). From (shiva, san. the deity). Contains the genealogies of the patriarchs [rishy], a description of the universe, and the incidents of the first six Manwantarams [q.v.], intermixed with legends and praises of Shiva [q.v.]. A long account of the Pitries [q.v.] or progenitors is peculiar to this pooraunam; as are stories of some of the most celebrated rishies [q.v.], who were engaged in the distribution of the vedams [q.v.].——*Stala pooraunam* (स्थलपुराण - st'halapurána, San.). From (st'hala, san. place). Otherwise called Mahautmyam [q.v.]. Histories of temples [coil, pagoda], enumerated in connection with the local gods. They generally begin with the creation of the universe, and relate the appearances of Shiva or Vishnoo at the particular spot which led to the erection of the temple. Though consisting of legendary notices, examination elicits historical facts. They usually purport to be taken from some of the larger Pooraunams; but such is not the case. They always contain much self-assertion. For example in that of Madura there is the statement that the Vedams are old and obsolete books, and that the substance of the Vedam [q.v.] and of true wisdom consists in worshipping the lingam [q.v.] in the great pagoda [q.v.] at that place. The Shreerunga mahautmyam states that the goddess manifested in the Cauvery river obtained the boon of being equal to the Ganges. There is a Sheiva legend at Conjeeveram, that Soobramanyan [q.v.] took Bramha [q.v.] to task, and confined him in prison, himself undertaking the work of creation. At Tripatty there is a legend that the hill is a peak of Mahameroo [q.v.]. In a variety of instances it is asserted that the stain of the most malignant of sins or the murder of a Bramin can be washed away by bathing in the local pool. All these documents are intended to show that celebrated events in Hindoo mythology took place at particular localities, the names of which have been transferred from Northern india or transnorthern india to Southern india. The following is abstract of a specimen stalapooraunam from Conjeeveram. After the customary invocations, the eulogy of the Tondainaud [tonday] is begun. This is introduced by the poetical description of a mass of clouds, raised from the sea, appearing like the body of Vishnoo, between which clouds personified and Badavaugny or great heat personified, a dispute arises; the clouds threaten to make use of the rainbow in combat, and they teach a muntram [q.v.] to the vajrangam or lightning. A profusion of rain [mazhay] falls from a body of clouds, like the assemblage of the four clouds, which once according to the Tirvilaiyaudal [q.v.] rained on Madura. The hills were refreshed and honey streamed down from them; the channel of the Palaur river was filled; and a great number of other rivers or streams, like good and evil in their results centering in one deity, mingled at length altogether in the sea. The course of the Palaur especially gives occasion to poetical description of the country through which it flows. With these subjects, inclusive of the descriptive matters, one hundred and forty-five stanzas are occupied. The varalaur or fountain head of the pooraunam is then entered on by a reference to a great assemblage of rishies [q.v.] in the Neimishauranyam [q.v.] wilderness. These, all of fame in Hindoo books, are represented as discoursing together concerning the chief good. One declares in favor of penance; another in favor of equity; another in praise of alms; another is for truth or integrity; another prefers sacrifice; another domestic virtue; another utter renunciation of family cares and all worldly concerns [aram, poorshaurtam, yanyam]. As they are thus occupied without agreeing, Soota rishy, expert in the Sheiva system and learned in the eighteen pooraunams which were delivered through him, comes among them; is saluted by them; and with general consent is appointed to decide their difference of opinion. He refers to a section of the Scaunda pooraunam, delivered by Sanatcomauran to Vyausan, by Vyausan to Shoocan, and by the latter to himself. Sootan then proceeds to explain his meaning. The Sanatcomaura patalam or chapter follows. Sanatcomauran, the son of Bramha [q.v.], was occupied in meditation when Oomay [q.v.], wife of Shiva [q.v.], passed, so that he did not rise to pay her homage, on which account Nundikeshwaran [q.v.], the vehicle [vauhan] of Shiva, spoke of him contemptuously as having no more sense than a camel, and denounced on him the doom of becoming a camel [ottagam]. Under this metamorphosis the sage came to Canjy or Conjeeveram and is made to declare that after comparing the Neimishauranyam, the Cooroo cshetram, and other places famous in Hindoo story, upon the whole, Conjeeveram wilderness deserved preference. Bramha interceded with Shiva in order to get the metamorphosis of his son removed; but Shiva declared that what had been done by one of his servants he did not choose to reverse, referring the case to Nundikeshwaran. Application being accordingly made, one favorable look from Nundy [q.v.] immediately removed the evil, and restored the sage to his proper form. He then received instructions respecting the different modes of life [aushramam], domestic, ascetic, and the like, with the respect due to each. Sanatcomauran says that there are many Sheiva fanes and asks which of them is chief. Nundy after reflection tells him that he recollects what Shiva told to Oomay, which it will be proper for Sanatcomauran to hear. Chapter on the speciality of the fane. After introductory matter, an enumeration is given of several distinguished Sheiva fanes, beginning from the extreme south and ending at the extreme north. Beyond Himalaya one is mentioned, and then Keilausam the last. Among these Shiva declares the chief to be Conjeeveram. Immediately afterwards an exception is made in favor of Caushy, or Benares; and then Shiva informs Oomay that he always reigns, together with herself, rejoicing at Conjeeveram, and so great is the merit of that place that if any one reside there only for a cshanam or moment, his beatification [mocsham] is certain. At the close of the chapter, Sootan says that Shiva told this to Oomay, and Nundy to Sanatcomauran, who told it to Vyausan, and the latter to himself, who repeated it to the sages assembled in the Neimishauranyam, as aforesaid. Whosoever hears or reads this chapter will be healed of all sickness, will receive prosperity, and long dwell with children on earth, and afterwards receive beatification in a future world. The animus of this pooraunam is throughout ultra Sheiva, and pours contempt on Bramha and Vishnoo, the latter especially, his being the rival fane at the present day in highest estimation, owing to the number of Veishnavas at and near Madras [charitram].——*Tirtondar pooraunam* (திருத்தொண்டர்ப்புராணம் - tiruttondarppuránam, Tam.). From (tiru, tam. holy + tondan, tam. servant of god). Pooraunam of sixty-three

devotees of Shiva. Also Periya pooraunam. This contains special memoirs of Sambandhan, Soondran and Appar, the three most celebrated of the sixty-three devotees [aroopatt moover].—*Vishnoo pooraunam* (विष्णुपुराण - vishnupurána, San.). From (vishnu, san. the deity). The most celebrated of the eighteen pooraunams. It is in six books, and is dedicated to the exaltation of Vishnoo, whom it identifies with the supreme being. Book I treats of the creation of the universe; the peopling of the world and the descent of mankind from seven or nine patriarchs [rishy], sons of Bramha [q.v.]; the destruction of the universe at the end of a Calpam [q.v.] and its recreation or pratisargam; and the reigns of kings during the first Manwantaram [q.v.]. Book II describes the various worlds [locam], heavens [swargam], hells [naracam], and planetary spheres [graham]; and gives the formation of the seven circular continents [dweepam] and concentric oceans [samoodram]. Book III describes the arrangement of the Vedams [q.v.], Itihausams [q.v.], and Pooraunams [q.v.] by Vyausan [q.v.], and the institution and rules of caste, in which it follows and resembles Menoo [q.v.]. Book IV gives list of kings and dynasties. Book V corresponds to Book X of the Bhagavat pooraunam and is devoted to the life of Krishnan [q.v.]. Book VI describes the deterioration of mankind during the four ages [yoog], the destruction of the world by fire and water [pralayam], and its dissolution at the end of a Calpam [q.v.]. The above is a bare outline of the contents of this pooraunam It is encyclopædical, like the others, and is rich in philosophical speculations and curious legends. The Teloogoo version in eight books is by Vennelacunty soorayya. This contains only the Poorva caundam, first half of the Sanscrit original. For secondary pooraunams see Oopapooraunam.

POORSHAM (पुरुष - purusha, *San.*). From (pur, san. body + shi, san. to rest). A man, a male, the soul [matam]. Supreme spirit or soul of the universe, unaffected by works, affliction, &c., and having the appellation Pranavam [q.v.] or Om [q.v.]. Also measure of a man's height [niloovoo]; strictly measure of a man with his hands raised over his head; approximate actual value is 8 english feet; applied to measure depth of water.—*Poorshamedham* (पुरुषमेध - purushamédha, San.). From (above + médha, san. sacrifice). A human sacrifice [yanyam].—*Poorshauntaram* (पुरुषान्तर - purushántara, San.). From (above + antara, san. different). Succession duty.—*Poorshaurtam* (पुरुषार्थ - purushárt'a, San.). From (above + art'ha, san. object). Object of human pursuit in this world. There are four chief objects of human existence [aram]:—dhermam, virtue; artam, wealth; caumam, pleasure; and mocshams, final emancipation.—*Poorsha vauhanan* (पुरुषवाहन - purushaváhana, San.). From (above + váhana, san. vehicle). Coobairan [q.v.] whose vehicle [vauhan] is a man.—*Poorshottama deo* (పురుషోత్తమదేవ - purushóttamadéva, Tel.). The greatest of Gajapaty [q.v.] rulers of Orissa. Invaded Conjeeveram because the king refused to marry his daughter to the sweeper of Juggernaut; defeated him and took prisoner his daughter whom he married [charitram]. See vol. I (151).—*Poorshottaman* (पुरुषोत्तम - purushóttama, San.). From (above + uttama, san. best). The supreme being. Hindoo 2nd or pers. name [peyar].—*Poorshottapore* (పురుషోత్తపురము - purushóttapuramu, Tel. purushottapur *). From (purushóttama, san. vishnu, the best of men + pura, san. town).—"*a*" Deputy tahsildarry; Ganjam district. Pay Rs. 100.—"*b*" Town, Deputy tahsildar's head-quarters, Sub-registrar's station; Ganjam dist., Berhampore tal.; pop. 3,541; acres 1,591; lat. 19° 31′; long. 84° 56′; from Balligooda S.E. 77 miles; from Berhampore N.N.E. 16 miles; from Chetterpore N.W. 13 miles; from Chicacole N.E. 104 miles; from Madras N.E. 530 miles; from Russellcondah S.E. 33 miles; from the sea W. 24 miles. On Rooshcoolya, but being gradually driven back by river encroachment. During last quarter century four streets have disappeared.

POORVA (పురవ - purava, *Tel.*; മനഞ്ഞു - manannu, *Mal.*; நெத்தலி - nettali, *Tam.*). Tam. from (ney, tam. ghee + tól, tam. skin). Tel. also (nattu). Tam. also (púzhalam). Anchovy. The genus Engraulis, clupeidæ, physostomi, teleostei, pisces [matsyam, 40], of naturalists [jantoo]. Mouth very wide, upper jaw projecting; body oblong or elongated, compressed, and serrated along the abdominal edge; teeth small. The species best known to the natives are:—indicus, malabaricus, purava.

POOSA (పూస - púsa, *Tel.*). Bead.—*Poosapauty* (పూసపాటి - púsapáti, Tel.). From (púsa, tel. a bead + pádu, tel. village). Family name of the Vizianagram chiefs. See vol. I, 54. Distinguish from Pashoopaty [q.v.].

POOSH (पुष् - push, *San.*). To increase, unfold.—*Poodcalay* (पुष्कला - pushkalá, San.; புட்கலை - pudgalai, Tam.). From (pushkalá, san. splendid). Wife of Ayenaur [ayen, poornay].—*Poodcalay manaulan* (புட்கலைமணாளன் - pudgalaimanálan, Tam.). From (pushkalá, san. wife of aiyyanár + manálan, tam. husband). Husband of Poodcalay; Ayenaur.—*Pookhrauj* (पुष्पराग - pushparága, San.; ياقوت اصفر - yákútiasfar, Ar.; پکھراج - pukhráj, Hind.; పుష్యరాగము - pushyarágamu, Tel.; പുഷ്പരാഗം - pushparágam, Mal.; புட்பராகம் - pudbarágam, Tam.). Title from hindostany. San. from (pushpa, san. flower + rága, san. color). Ar. from (yákút, ar. garnet + asfar, ar. saffron colored). Hind. corrupted from sanscrit. Tel., &c., from sanscrit. A topaz. χρυσόλιθος was exported from Egypt to Barbaricon in Indo Scythia and to Barugaza, Mouziris [cranganore] and Nelkunda [cullada] according to the Periplus; some take this to be the topaz. Found in Burmah and Ceylon. In the latter country a genuine, greenish yellow-colored topaz is improperly called the yellow tourmaline [q.v.]; a light-colored smoky topaz is improperly called a yellow crystal; and a dark-colored smoky topaz is called a brown crystal [palingoo, spaticam]. The occidental topaz, or that which comes from Saxony and Siberia, contains a greater proportion of silex [ratnam].—*Pooshcaram* (पुष्कर - pushkara, San.). Lotus [nelumbo]. Feast [pundigay, 6d] held once in twelve years at sacred rivers [cotipully, kistna].—*Pooshcarny* (पुष्करिणी - pushkariní, San.). Tank with lotus growing. Any sacred pool.—*Pooshpacam* (पुष्पक - pushpaka, San.). From (pushpa, san. flower). The self-moving aerial chariot of Coobairan [q.v.] carried off by the demon Ravanan [q.v.] and used by him till he was slain by Rama [q.v.], who then employed the car [rath] to transport himself and Seetay [q.v.] along with Lutchmanan [q.v.] to Ayodhyay.—*Pooshpagherry* (ಪುಷ್ಪಗಿರಿ - pushpagiri, Can.). From (pushpa, san. flowers + giri, san. hill). Sanscrit name (subrahmanyagiri), meaning soobramanyan's hill. Hill; South canara dist., Ooppinangady tal.; lat. 12° 40′ N.; long. 75° 44′ E.; height 5,626 feet; from Mangalore E.S.E. 60 miles; from Poottore E.S.E. 33 miles. Prominent bullock-hump-shaped peak of the Soobramanya range of mountains, a spur of the Western ghauts [q.v.] at the north-western boundary of Coorg, and on the border of Hassan district of Mysore. The ascent is difficult. On the lower slopes there is dense jungle, haunted by wild elephants [q.v.]; on the summit are many ancient stone cairns [paundicoozhy].—*Pooshpam* (पुष्प - pushpa, San.). Flower [phool, poo]. Plant second term. Ex., where transl. is of first term:—Bassia latifolia (lódhrapushpa), symplocos racemosa; Bombax malabaricum (raktapushpa), red; Cordia obliqua (gandhapushpa), fragrant; Evolvulus emarginatus (añjanapushpa), black; Guettarda speciosa (himapushpa), dew, (pannírpushpam), rose-water; Hibiscus rosa-sinensis (ódhrapushpá), orissa; Mesua ferrea (nágapushpá), serpent, (gajapushpamu), elephant; Michelia champaca (dípapushpa), lamp; Morinda umbellata (klíbapushpá), neuter; Musa paradisiaca (vrishapushpa), sprinkling; Ocimum basilicum (paççapushpam), green; Peucedanum graveolens (shatapushpá), hundred; Pimpinella anisum (shatapushpá), hundred; Rauwolfia serpentina (vasupushpá), beautiful; Rosa centifolia (pannírpushpam), rose-water; Saraca indica (gandhapushpá), fragrant; Solanum ferox (chandrapushpá), moon. See gloss. paragraphs.—*Pooshpicam* (पुष्पिका - pushpiká, San.). Having flower [phool]. Plant second term. Ex., where transl. is of first term:—Gynandropsis pentaphylla (arkapushpiká), sun; Jasminum humile (hémapushpiká), gold; Peucedanum graveolens (chámarapushpika), fan; Woodfordia floribunda (dhátripushpika), (dhátupushpiká), mineral, from red flower. See gloss. paragraphs.—*Pooshpy* (पुष्पी - pushpí, San.). Having flower. Plant second term. Ex., where transl. is of first term:—Andropogon aciculatus (chórapushpí), thief; Bauhinia variegata (támrapushpí), copper; Clitorea ternatea (shankhapushpí), conch; Crotalaria verrucosa (shanapushpí), crotalaria juncea; Evolvulus alsinoides (nílapushpí), blue, (sankpushpi), conch; Leucas linifolia (drónapushpí), cup; Pimpinella anisum (avákpushpí), turned down. See gloss. paragraphs.

POOTCOOLY (ಪುಟ್ಕುಳಿ - putkuli, *Can.*). Todah waist cloth.

POOTERAH (پوتیرا - puterá, *Hind.*). Elephant grass.

POOTHOO (പുതു - putu, *Mal.*; புது - puthu, *Tam.*). New.—*Pondicherry* (புதுச்சேரி - puthuççéri, Tam.). See sep. title.—*Poodameny* (പുതുമേനി - putuméni, Mal.). From (putu, mal. new + méni, mal. shape). New or Veeroye [q.v.] coinage; so called in contradistinction to the Palayameny or ancient coinage [naunyam].—*Poodoocottah* (புதுக்கோட்டை - puthukkóttai, Tam.). See sep. title.—*Poothiya* (പുതിയ - putiya, Mal.; புதிய - puthiya, Tam.). New.—*Poothiyacovilagam* (പുതിയകോവിലകം - putiyakóvilakam, Mal.). From (putiya, mal. new + kóvilakam, mal. palace). Residence of the junior; rajah of Calicut [covilagam]. See vol. I, 53.—*Poothooval* (പുതുവൽ - putuval, Mal.). Reclaimed or newly cultivated land.—*Poothooveppoo* (പുതുവെപ്പ് - putuveppu, Mal.). New deposit. Vypeen near Cochin, a deposit formed in 1341. The special Cochin era is also called by this name [saca].—*Poottan* (പുത്തൻ - puttan, Mal.). Means new. A silver Cochin coin, first struck during the Dutch occupation. 10 cash = 1 poottan; 5½ poottans = 1 fanam [naunyam, 2d]. Approximate actual value, 1 poottan = 10 pies. The coin is made of impure metal and weighs $\frac{1}{32}$ of a tolah [q.v.], while at present 19¼ poottans are exchanged for a rupee [q.v.]; a double poottan has shiva [q.v.] on one side wearing a crown, and a snake emerging from either side of his chair and meeting over his head; round his neck is a string of skulls [capaulam], in his left hand wheel of

fate, round each shoulder two circlets, on each wrist two bracelets; on the obverse a palankeen [q.v.]; formerly instead of shiva there was a chunk [q.v.] shell. See vol. I, 609.——*Poottancoor* (പുത്തൻകൂറ - puttankúru, Mal.). From (puttan, mal. new + kúr, mal. division). The Malabar syrian [q.v.] christians who separated from Rome [pazhayacoor].——*Poottore* (புத்தூர் - puttúr, Tam.*). From (puthu, tam. new + úr, tam. village). Village, Head-quarters of Deputy tahsildar, Narrainavaram division, Railway station; North arcot dist., Carvetnugger zemindarry, Narrainavaram division; pop. 2,686; lat. 13° 26′; long. 79° 36′; height 493 feet; from Arnee N.N.E. 56 miles; from Carvetnugger E. 7 miles; from Chittore E.N.E. 35 miles; from Madras W.N.W. 57 miles; from Narrainavaram W.N.W. 3 miles; from Ranipett N.N.E. 38 miles; from Tripatty S.E. 15 miles; from Vellore N.E. 46 miles. Railway station serves Carvetnugger and Narrainavaram. Mostly weavers. Fair Thursday.

POOTRAN (पुत्र - putra, *San.*): From (put, san. hell + trá, san. to protect). Son [comauran]. The tamulian appreciation of children is rather domestic than religious, as among the bramins. See the following from Cooral:—பெறுமவற்றுள் யாமறிவ தில்லை யறிவறிந்த மக்கட் பேறல்ல பிற—"among all the benefits that may be acquired, we know no "greater benefit than the acquisition of intelligent children."—எழுபிறப்புந் தீயவை தீண்டா பழிபிறங்காப் பண்புடை மக்கட் பெறின்—"the evils of the seven births will not "touch those who obtain children of a good disposition, free from "vice."—தம்பொருள் என்பதம் மக்க ளவர்பொருள் தந் தம் வினையான் வரும்—"men will call their sons their "wealth, because it flows to them through the deeds which the "sons perform on their behalf."—அமிழ்தினு மாற்ற வினி தேதம் மக்கள் சிறுகை யளாவிய கூழ்—"the rice in "which the little hand of their children has dabbled will be "far sweeter to the parent than ambrosia."—மக்கண்மெய் தீண்ட லுடற்கின்ப மற்றவர் சொற்கேட்ட லின்பஞ் செவிக்கு—"the touch of children gives pleasure to the body "and the hearing of their words, pleasure to the ear."—குழலினி தியாழினி தென்பதம் மக்கண் மழலைச்சொற் கேளா தவர்—"the pipe is sweet, the lute is sweet, say "those who have not heard the prattle of their own children."—தந்தை மகற்காற்று நன்றி யவையத்து முந்தி யிருப்பச் செயல்—"the benefit which a father should confer on his son "is to give him precedence in the assembly of the learned."—தம்மிற்றம் மக்க ளறிவுடைமை மாநிலத்து மன்னுயிர்க் கெல்லா மினிது—"that their children should possess "knowledge is more pleasing to all men of this great earth than "to themselves."—ஈன்ற பொழுதிற் பெரிதுவக்குந் தன் மகனைச் சான்றோ னெனக்கேட்ட தாய்—"the mother "who hears her son called a wise man will rejoice more than "she did at his birth."—மகன்றந்தைக் காற்று முதவி யிவன்றந்தை யென்னோற்றான் கொல்லெனுஞ் சொல்—"so to act that it may be said by what great penance did "his father beget him, is the benefit which a son should render "to his father."——*Pootra joovvy* (పుత్రజువ్వి - putradzuvvi, Tel.). Title from small size. Same as Small tsiela.——*Pootranjeeva* (पुत्रञ्जीव - putrañjíva, San.; जीवनपुत्र - jívanaputra, Mahr.; पुत्रजिब्बेमणि - putrajibbémani, Conc.; ಪುತ್ರಜೀವ - putrajíva, Can.; కుదురుజువ్వి - kudurudzuvvi, Tel.; പൊങ്കോലം - ponkólam, Mal.; බුත්සරණ - butsarana, Singh.; குருப்பாலை - kuruppálai, Tam.). Title from sanscrit. San. from (putra, san. son + jíva, san. life); the fruits used to make necklaces [maulay], and are reputed to be of prolific efficacy, when worn by children to keep them in good health. Mahr. means enlivening son. Can. from (putra, san. son + jíva, san. life). Tel. from (kuduru, tel. firm + dzuvvi, tel. ficus tsiela, roxb.). Mal. from (pon, mal. gold + kólam, mal. body). Singh. means booddha's foot. Tam. from (kurumai, tam. shortness + pálai, tam. milky plant). San. also (sutajíva), meaning giving life to children. Tel. also (yárála), meaning giving life to children; (máháputrajívi), meaning great + the tree. Tam. also (pongólam), meaning gold + body. Title otherwise Grey barked nageia, Pongolam, Wild olive. Botanically Putranjiva roxburghii, wall., euphorbiaceæ [vricsham, 118]. Putranjiva from sanscrit. Alias Nageia putranjiva; Putranjiva sphærocarpa. Tree; branchlets and petioles pubescent; leaves elliptic, unequal-sided at the base, serrately denticulate; glomerules of male flowers numerous; segments of male calyx densely ciliate-pubescent, sparingly puberulous at the back; ovary tawny-silky; fruit oblong-ellipsoid, clothed with thick, pale, rusty hairs; flowers small, yellowish white. A large timber tree with an erect straight trunk and a large spreading shady head composed of innumerable expanding branches; fruit always one-seeded; mountains; flowering in hot weather. Leaves and stones of the fruit given in decoction for colds and fevers. Leaves lopped for fodder. The nuts are threaded and worn as necklaces [maulay, munkah] for children, and are supposed to keep them in good health; olive brown oil from seeds used for burning. Wood grey, shining, moderately hard, close-grained; sometimes used for tools and turning. No other common species here. The same title is given to Polyalthia longifolia, benth. [ashocam].——*Pootra pradam* (पुत्रपद - putraprada, San.). Means child-giving. Same as Prickly brinjaul.——*Pootra shrainy* (पुत्रश्रेणी - putrashréní, San.). Means multitude of children, from fruits. Same as Neeroory.

POOTTA (పుట్ట - putta, *Tel.*). Ant hill. Plant first term, as growing near one. Ex., where transl. is of second term:—Agaricus campestris (puttagodugu), umbrella; Gymnema sylvestre (puttapodara), bush; Macaranga indica (puttatámara), nelumbium speciosum; Mærua arenaria, var. glabra (puttatíga), creeper; Wrightia tomentosa (puttajillédu), calotropis gigantea. See gloss. paragraphs.——*Pootla* (పుట్ల - putla, Tel.). From (putta, tel.). Ant hill. Plural locative form. Suffix in place names.——*Poottore* (ಪುತ್ತೂರು - puttúru, Can.). From (puttu, can. ant hill + úru, can. town). Town, Divisional and talook head-quarters; South canara dist., Ooppinangady tal.; pop. 3,745; lat. 12° 46′; long. 75° 15′; from Coondapore S.S.E. 70 miles; from Madras W. 344 miles; from Mangalore S.E. 25 miles; from Oodipy S.E. 50 miles; from Soobramanya W. 28 miles. Owing to the Coorg insurrection which first broke out at Bellarey, 16 miles south-east, troops were stationed here from 1837 till the introduction of the mofussil [q.v.] police in 1860.

POOTTOO (పుట్టు - puttu, *Tel.*). To be born.——*Poottooga* (పుట్టుక - puttuga, Tel.). From (puttu, tel. to be born). Birth. Suffix in place names; as Bhauvanapoottooga, meaning bhauvanan's birth place.

POOTTY (పుట్టి - putti, *Tel.*; புட்டி - putti, *Tam.*). A basket; also a wicker-boat.—"*a*" Measure of capacity. 20 tooms = 1 pootty; 30 pootties = 1 garce [alavay, 3b]. Teloogoo districts. Varies with toom. Same as candy.—"*b*" Superficial measure. 20 coonchams = 1 pootty [alavay, 2b]. Vizagapatam and Godavery. In former land which will yield a pootty of grain, equal to 1,768 square feet. In latter land requiring a pootty of seed; pootty varying from 8 to 11½ acres. Compare Vithaicottay.—"*c*" Bazaar weight. 20 maunds = 1 pootty [niray, 2b]. Approximate actual value, 1 pootty = 500 lbs. avoir. Ganjam, Vizagapatam and Kistna. Same as Candy and Bhauram. See vol. I, 609; II, 510, 511, 512, 516, 519, 520.

POOZHY (புழி - púzhi, *Tam.*). Means dust. One of the twenty-one nauds [q.v.] around Paundyam [q.v.] where corrupt Tamul was spoken. So the sandy tract to the west of the ghauts [q.v.] ruled by Cheran [q.v.].——*Poozhiyan* (புழியன் - púzhiyan, Tam.). Ruler of Poozhy country. Title of the Chera king. See vol. I (142).

POPPADAM (पर्पट - parpata, *San.*; پپڑ - pappar, *Hind.*; ಹಪ್ಪಳ - happala, *Can.*; అప్పడం - appadam, *Tel.*; പപ്പടം - pappatam, *Mal.*; அப்பளம் - appalam, *Tam.*). Mal. from (parippu, mal. dholl + ata, mal. cake). Tam. from (appu, tam. to clap on with the hand). Called also Hopper [q.v.]. A light thin cake of the flour of Phaseolus mungo, linn., var. radiatus [black gram], and other flours, and flavored with salt [ooppoo] and asafœtida [q.v.]. When required for use it is fried in ghee [q.v.] and eaten with rice [q.v.]. Used by Europeans with curry [q.v.] and rice. For Appalacauram see under Cauram.

POR (போர் - pór, *Tam.*). Corn-stack. Por cooripp is an account of stacks cut.

PORA (പൊറ - pora, *Mal.*). Mountain.——*Pooraly* (പുരളി - purali, Mal.). From (pora, mal. hill). A fort belonging to the old kings of Cottayam in the interior of Travancore state. Hence Pooraleeshan, lord of Pooraly, was one of the titles of those kings. This title is now poetically applied to the kings of Travancore. Confounded probably by the Greeks with παραλία, coast [q.v.].——*Porlattiry* (പോരളാതിരി - porálátiri, Mal.). From (above + álu, mal. own + tiri, mal. holy, title). The title of Cadatnaud rajah. See vol. I, 52.——*Potta* (പൊറ്റ - potta, Mal.). Means high ground. So rice [q.v.] grown there; paddy [q.v.] dark; Malabar.——*Pottay* (പൊറ്റ - potta, Mal.; பொற்றை - pottai, Tam.). Small hills [coonn].

PORAH (پھوڑا - phorá, *Hind.*). Canker in horses [ashwarogam].

PORNY (பொருனி - poruni, *Tam.*). Means toddy. Native name of the Tamrapurny. See vol. I (1).

POROO (பொறு - poru, *Tam.*). To bear.——*Poroopp* (பொறுப்பு - poruppu, Tam.). Duty. A quit-rent [jody] levied from lands originally granted in inam [q.v.] or rent-free.——*Porooppan* (பொருப்பன் - poruppan, Tam.). From (poruppu, tam. hill). Chief of a hilly tract [coorinjy, desham].

POROOL (பொருள் - porul, *Tam.*). From (poru, tam. to join). Subject-matter. One of the five parts of lacshanam [q.v.]. It is divided into two parts:—Agaporool, treating of rules for amatory poems, and Pooraporool, treating of public or state affairs. Porool also means wealth [sott]. The following are from the Cooral on the subject of wealth:—உறுபொருளு

முல்கு பொருளுந்தன் னொன்னார்த் தெறுபொருளும் வேந்தன் பொருள்—"unclaimed wealth, wealth acquired "by taxes, and wealth got by conquest of foes are all the wealth "of the king."—குன்றேறி யானைப்போர் கண்டற்றாற் றன்கைத்தொன் றுண்டாகச் செய்வான் வினை—"an undertaking of one who has wealth in his hands is like "viewing an elephant-fight from a hill-top."—செய்க பொருளைச் செறுநர் செருக்கறுக்கு மெஃகதனிற் கூரிய தில்—"accumulate wealth; it will destroy the arrogance of your foes; "there is no weapon sharper than it."—ஒண்பொருள் காழ்ப்ப வியற்றியார்க் கெண்பொரு ளேனை யிரண்டு மொருங்கு—"to those who have honestly acquired an abundance of "riches, the other two virtue and pleasure are things easy of "acquisition."—உள்ள முடைமை யுடைமை பொருளுடைமை நில்லாது நீங்கி விடும்—"the possession of energy "of mind is true property; the possession of wealth passes away "and abides not."—ஆக்க மிழந்தேமென் றல்லாவா ருக்க மொருவந்தங் கைத்துடை யார்—"they who are possessed "of enduring energy will not trouble themselves saying we have "lost our property."—ஆக்க மதர்வினுய்ச் செல்லு மசைவிலா வூக்க முடையா னுழை—"wealth will find its own "way to the man of unfailing energy."—அறனறிந்து வெஃகா வறிவுடையார்ச் சேருந் திறனறிந் தாங்கே திரு—"lutchmy knowing the manner in which she may approach "will immediately come to those wise men who, knowing that "it is virtue, covet not the property of others."—தாளாற்றித் தந்த பொருளெல்லாந் தக்கார்க்கு வேளாண்மை செய்தற் பொருட்டு—"all the wealth acquired with perseverance "by the worthy is for the exercise of benevolence."—பொருளற்றார் பூப்ப ரொருகா லருளற்றா ரற்றார்மற் றாத லரிது—"those who are without wealth may, at some future "time, become prosperous; those who are destitute of kindness "are utterly destitute; for them there is no change."—அருட்செல்வஞ் செல்வத்துட் செல்வம் பொருட்செல்வம் பூரியார் கண்ணு முள—"the wealth of kindness is wealth "of wealth, in as much as the wealth of property is possessed "even by the basest of men."——*Aseiya porool* (அசையாப் பொருள் - asaiyápporul, Tam.). Immovable property [stauvaram].——*Aseiyoom porool* (அசையும்பொருள் - asaiyum·borul, Tam.). Movable property [jangamam].——*Pollachy* (பொள்ளாச்சி - pollácçi, Tam.). See sep title.——*Porool shelvy* (பொருள்செல்வி - porulselvi, Tam.). The rich woman; Lutchmy [q.v.].

PORTIA (गर्दभाण्ड - gardabhánda, *San.*; भेंडी - bhéndí, *Mahr.*; پارس پیپل - páraspípal, *Hind.*; پارس پپل - páraspippal, *Dec.*; ಹೂವರಸಿ - húvarasi, *Can.*; ಜೋಗಿಮರ - jógimara, *Too.*; [illegible] - gangarávi, *Tel.*; [illegible] - púvarachu, *Mal.*; [illegible] - súrya, *Singh.*; பூவரசு - púvarasu, *Tam.*). Title from tamul. San. from (gardabha, san. ass + anda, san. testicle); from roots [stone banyan]. Mahr. from (bhánda, san. the portia tree). Hind. from (páras, hind. portia + pípal, hind. ficus religiosa, linn.). Dec. from hindostany. Can. from (húvu, can. flower + arase, can. peepul tree). Tel. from (ganga, tel. excellent + rávi, tel. ficus religiosa, linn.). Mal. from tamúl. Tam. from (pú, tam. flower + arasu, tam. peepul tree, ficus religiosa, linn.). San. also (párisha), sanscritized from tamul; (kubéráksha), meaning coobairan's eye [bonduc]; (supárshvaka), meaning having good sides; (nandivriksha), meaning happiness + tree. Mahr. also (lákhípimparí), meaning lac-colored portia tree; (párósápimpala), meaning side + ficus religiosa, linn.; (pimparí). Hind. also (paháripípal), meaning hilly ficus religiosa, linn.; (imlíkhurásání), meaning khorassan, tamarindus indica, linn. Dec. also (páraskájhár), meaning portia tree. Can. also (arasha), meaning king; (jógiyarale), meaning mendicant + ficus religiosa, linn.; (kandarola); (bangáli). Too. also (jógiattasa). Tel. also (gangarénu), meaning excellent + jujube tree, zizyphus jujuba, lamk.; (munigangarávi), meaning sage + portia tree; (gárachettu) [firework plant]. Mal. also (púpparutti), meaning flower + gossypium herbaceum, linn.; (kallál), meaning stone + banyan, ficus bengalensis, linn.; cf. stone banyan. Singh. also (gansurí), meaning fragrant portia. Tam. also (púpparutti), meaning flower + cotton tree, gossypium herbaceum, linn., from similar flowers. Title otherwise Bendy tree, Demarara mahoe, Flowering cotton, Flowering peepul, Khorassan tamarind, Pauras, Poplar-leaved hibiscus, Poplar mallow, Soorya, Tulip tree, Umbrella tree. Botanically Thespesia populnea, corr., malvaceæ [vricsham, 25]. Alias Hibiscus populneoides, populneus; Malvaviscus populneus; Thespesia populneoides. Tree; leaves roundish-cordate, acuminated, quite entire, five to seven-nerved, sprinkled beneath with small rusty scales; calyx truncated; involucel three-leaved; capsule five-celled, coriaceous; cells about four-seeded; flowers yellow, with a dark blood-colored eye. A favorite ornamental tree, thriving best near the sea; never wild; easily reared from cuttings, of quick growth, and yielding good shade; abounds in old gardens and about all european stations; flowers succeeded by turban-shaped black seed-pods, which hang on the tree a long time; capsule is filled with a yellow pigment [rangh] like liquid gamboge [q.v.]. The bark of the trunk and large branches is reddish brown, very rough and scaly externally, and of reddish-grey color internally; it is odourless and possesses no distinct taste; it contains a garnet-colored resin [raul] and a small quantity of tannin. The fresh and half-ripe capsule is green, roundish and obtusely five-angled, with a cup-shaped and persistent calyx; it abounds in yellow, viscid and somewhat acrid juice, consisting of a gum-resin [googal] forming a yellow emulsion with water. The bark is medicinally a mild astringent tonic, but neither alterative nor insecticide, as is supposed by natives; the fresh fruit or capsule is insecticide. Decoction of the bark; take of the bark, cut into small pieces, six ounces; water, three pints; boil until the liquid is reduced to one pint, and strain. Decoction of the capsules; take of the fresh and half-ripe capsules, cut into small pieces, ten ounces; water, three pints; boil until the liquid is reduced to one pint, and strain when cool. The yellow juice is best obtained by wounding or making small incisions on the fresh and half-ripe capsules, but the juice is generally so scanty that it cannot be collected in a vessel. Dose; of the decoction of the bark, from two to four fluid ounces, three or four times a day; the decoction of the fresh capsules is not intended for internal use, but is employed externally as a wash for the parts affected with scabies. Substituted; the fresh capsules, for ung. hydrarg. nitratis and ung. sulph. co.; and the bark, for calumba [q.v.]. The gamboge is a good external application in scabies and other cutaneous diseases. Frequently used for roadside avenues [shaulay], and is valuable from its easy growth and from the large amount of annual cuttings; it prefers the sea air and saline soil; the singhalese dye yellow [shauyam] with the capsules, sepals, and calyx; a good fibre [naur] from the bark. Timber is strong, straight, even-grained and durable, pale reddish fading to reddish brown, easily worked. There is another species Lampas, called by natives hill cotton; otherwise three-pointed hibiscus; largish tree with heart-shaped leaves; deep primrose flowers with a dark purple eye; young twigs yield a fibre [naur]; fit for rope and paper.——*Jungle portia* (காட்டுப்பூவரசு - káttuppúvarasu, Tam.). Same as Pehimbia.——*River portia* (ஆற்றுப்பூவரசு - áttuppúvarasu, Tam.). Same as Caunchy.

PORTO NOVO * (பரங்கிப்பேட்டை - parangippéttai, *Tam.*). Title from portuguese, meaning new harbour. Vern. from (farangí, hind. european + péttai, tam. town). Mahomedan name (mahmúdbandar), meaning excellent + port. Town, Port, Sea customs superintendent's head-quarters, Railway station; South arcot dist., Chidambaram tal.; pop. 8,869; acres 1,142; lat. 11° 30′; long. 79° 48′; from Chidambaram N.E. 8 miles; from Codiyampolliem N.N.E. 6 miles; from Cuddalore S. 15 miles; from Madras S.S.W. 115 miles; from Pondicherry S. 32 miles. On Coromandel coast situated north of the mouth of Vellaur. The river mouth is small and admits only coasting craft. Larger vessels anchor 2 miles off shore in six or seven fathoms of water with good holding-ground in mud. Formerly of considerable prosperity, but suffered much in Mysore wars. Cowle [q.v.] for making a settlement obtained by the English from Harjee rajah, soobahdar [q.v.] of Jinjee, in 1681. When English commenced trading in 1682, the Danes and Portuguese were already established. In 1748 the factory being in a ruinous condition, a good house was purchased for 500 pagodas [q.v.] and a Resident appointed. In 1749, the Madras army marching against Tanjore halted here. In 1758 captured by the French with Fort St. David and Cuddalore; French driven out in 1760 by Coote after his defeat of Lally at Wandiwash; burned by Hyder ally in July 1780. In 1781 Sir Eyre Coote marched out of Porto novo with 8,000 men to meet the whole army of Mysore, some 60,000 strong, under Hyder; in the battle which ensued at Mettapolliem, the English won the most signal victory of the war. The French landed a large force here in 1782 and marched thence with Tippoo and captured Cuddalore. Restored to England under the treaty of Versailles, on the 1st February 1785. In 1824 efforts were made to establish iron [auhan] works. The Porto novo iron company established a large factory to work ore brought from Salem, but the enterprise was abandoned. The Iron company cut a short canal of their own from the Vellaur into the backwater adjoining the embouchure of the Coleroon before the Khan sahib's canal was rendered navigable. The canal, which is only about 2 miles long, is now much silted up. The excavation of the East coast canal at Porto novo was commenced in 1853, and considerable progress was made up to 1857, when the mutiny put a stop to it. In an old Dutch cemetery here, one of the tombstones bears date 1717. The only special manufacture is a species of mat [boriyah], made from the leaves of the wild pineapple [ananas], in imitation of those imported from Acheen [q.v.]. Trade is considerable. Weekly fair. Trig. station in lat. 11° 29′ 9·14″; long. 79° 48′ 8·58″; from Ariyagoshty E. 2 miles; from Chidambaram N.E. 7 miles; from the sea W. ½ mile.

PORTUGUESE (پرتگیس - purtagís, *Hind.*). Here means community of mixed Portuguese and Indian descent.

POTAIL (پٹیل - patel, *Hind.*; ಪಟೇಲ - patéla, *Can.*). From (pata, san. a register). A Mahratta title for headman of village [balootah]. In bengal Mokaddam [q.v.]. Corresponding terms are :—Tel. peddacaup, Mal. adhicaury, Tam. monigar.

POTATO (आलु - álu, *San.* and *Mahr.*; बट्टाटो - battató, *Conc.*; بطاطه - batátah, *Ar.*; آلو - álú, *Hind.* and *Dec.*; اوبي - úbí, *Malay*; ಉರುಳೆಗಡ್ಡೆ - urulegadde, *Can.*; ಬಟಾಟೆ - batáte, *Too.*; ఉరలగడ్డ - urlagadda, *Tel.*; ഉരുളക്കിഴങ്ങ - urulakkizhannu, *Mal.*; රටඉන්නල - ratainnala, *Singh.*; உருளைக்கிழங்கு - urulaikkizhangu, *Tam.*). Title from spanish. San. from (ri, san. to go), moving and hence round. Can. from (urulu, can. round + gadde, can. root). Tel. from (urulai, tam. round + gadda, tel. root). Mal. from (urula, mal. round + kizhannu, mal. esculent root). Singh. from (rata, singh. foreign + innalé, singh. plectranthus rugosus, wall.). Tam. from (urulai, tam. round thing + kizhangu, tam. esculent root). Malay also (kantang). Tel. also (álugadda). Title otherwise Common potato plant, Round root. Botanically Solanum [cooly] tuberosum, linn., solanaceæ [vricsham, 94]. Alias Lycopersicum tuberosum; Solanum esculentum, parmenteru. Perennial herbaceous plant; stem 1-3 feet high, without thorns or prickles; leaves pinnate; leaflets two or more with an odd one, entire at the margin; flowers 1-1½ inches, diameter, the wheel-shaped corolla white or purple, more or less veined; fruit globular, purplish, of the size of an ordinary gooseberry; roots produce tubers. Herbage has a slightly narcotic smell; native of peru, introduced into spain, whence into india; in wild state bitter and acrid; for many years natives would not eat them. A pure starch, obtainable from tubercles by washing with cold water; convertible into sugar [q.v.] and alcohol by fermentation. For various potatoes so called in other genera, see below. For the yams see Auloo.——*Bitter potato* (காற்கருணை - kárgarunai, Tam.). Same as Elephant yam. ——*Caustic potato* (सूरण - súrana, San.). Title from roots. San. from (súr, san. to hurt). Same as Telinga potato.——*Giant potato* (विदारी - vidárí, San.; भुईकोहळी - bhuíkóhalí, Mahr.; भुइंकुवाले - bhuinkuválé, Conc.; لال شکرکندا - lálshakarkandá, Hind.; ನೆಲಕುಂಬಳ - nelakumbala, Can.; నేలకుంబుడు - nelakumbudu, Too.; భూచక్రగడ్డ - bhúchakragadda, Tel.; പാൽമുതക്ക - pálmutakku, Mal.; ක්ෂීරවිදාරි - kshíravidárí, Singh.; நிலப்பூசணி - nilappúsani, Tam.). Title from size of root. San. from (vidrí, san. to split) [cashmere tree, shoonday]. Mahr. from (bhuí, mahr. ground + kóhalí, mahr. benincasa cerifera, savi.). Conc. from mahratta. Hind. from (lál, hind. red + shakarkandá, hind. ipomæa batatas, lamk.). Can. from (nela, can. ground + kumbala, can. pumpkin). Tel. from (bhú, san. earth + chakra, san. wheel + gadda, tel. root). Mal. from (pál, mal. milk + mutakku, mal. the plant, modecca tuberosa, roxb.). Singh. from (kshíra, san. milk + vidárí, san. the plant). Tam. from (nilam, tam. ground + púsani, tam. cucurbita maxima, duch.). San. also (bhúmikúshmánda), meaning ground + pumpkin, benincasa cerifera, sav.; (kshírakandá), meaning milk + bulbous root; (shrésht'hakandá), meaning superior + root; (vrishyavallí), meaning aphrodisiac + creeper; (ikshugandhá), meaning sugar-cane, saccharum officinarum, linn. + smell [naunal, neermoolly, nerinjy]; (rikshagandhá), meaning bear + smell, applies to black variety; (kshírashuklá), meaning milk white; (kshíravidári), meaning milk + the plant; (maháshvétá), meaning very white. Hind. also (bhuínkumrá), meaning earth gourd. Can. also (guddagenasu), meaning hill + potato, ipomæa batatas, lam. Tel. also (dévakánchanamu), meaning god + gold; (nélagummudu), meaning ground + the plant; (mettapálatíga), meaning dry ground + milk + creeper; (chirigummudu), meaning small + the plant; (gummudu) [false zedoary, small cashmere tree]; (nallanélagummudu), meaning black + the plant. Mal. also (mutalakkanta), meaning alligator + bulbous root; (kappalkizhannu), meaning foreign root. Singh. also (kshíravalli), meaning milk + creeper. Tam. also (pálmódikká), meaning milk + the plant, modecca tuberosa, roxb.; (valli); (púççakkirakkizhangu), meaning earth + ipomæa batatas, lam. Beng. also (bhúmikumra). Title otherwise Alligator yam, Aphrodisiac creeper, Cotton-leaved bind-weed, Earth pumpkin, Milky yam, Naila goommoodoo, Panicled bind-weed, Paulmodecca, Red sweet potato, White yam. Botanically Ipomæa [calamby] digitata, linn., convolvulaceæ [vricsham, 93]. Alias Batatas paniculata; Convolvulus gossipifolius, insignis, paniculatus, roseus; Ipomæa eriosperma, gossipyfolia, insignis, mauritiana, paniculata, pentaloba, quinqueloba. Batatas from malay [sweet potato]. Stem twining, glabrous, thick; leaves large, palmate, five to seven-cleft, glabrous, petioled, lobes ovate-lanceolate, seldom acuminate; peduncles much exceeding the petioles, many-flowered, dichotomous; sepals ovate-rounded, concave, very obtuse, equal; corolla purple, narrowed at the base, showy; seeds long, hairy; flowering in the rainy season. A tuberous-rooted, extensive climber with large ornamental finger-formed leaves; flower large, rose-colored, with a dark purple eye. The root is a simple or branched tuber, sometimes as much as 40 to 50 lbs. in weight; externally it is of a brown color, and somewhat warty and scabrous; when a transverse section is made the cut surface is of a dirty white color, and marked by concentric rings, which are formed by the vascular and laticiferous vessels; from the latter a viscid milky fluid exudes; the taste is astringent and somewhat acrid, not unlike raw potato; the bulk of the tuber consists of a starchy parenchyme; the vascular system is scalariform; the laticiferous vessels are most numerous towards the cortical part; raphides abound. Root, dried in sun, reduced to powder, boiled with sugar and butter, is medicinally tonic, alterative, aphrodisiac, demulcent, and lactagogue. The young tapering roots of a small variety are known in the herbalist's shops as Asgand [q.v.]. The Hill giant potato is Ipomæa [calamby] pentaphylla, convolvulaceæ [vricsham, 93]; alias batatas pentaphylla; convolvulus hirsutus, munitus, nemorosus, pentaphyllus; ipomæa pilosa; twining, hirsute; leaves digitate, leaflets five, elliptic-lanceolate, entire; peduncles as long as the petioles, hirsute, one to three-flowered; sepals very hairy, lanceolate, acute, corolla a little longer than the calyx, white; capsule and seeds smooth; flowering in the rainy season; flower largish, white.——*Goa potato* (ഗോവക്കിഴങ്ങ - góvakkizhannu, Mal.). Same as Goa yam.——*Pondicherry potato* (புதுச்சேரிக்கிழங்கு - puthuççérikkizhangu, Tam.). Same as Pondicherry yam.——*Spanish potato* (بطاطه اسپانیه - batátahiisbániyah, Hind.). Same as Sweet potato.——*Striped potato* (చారకంద - tsárakanda, Tel.). See Kachvee.——*Sweet potato* (शर्करावल्ली - sharkarávallí, San.; रताळी - ratálí, Mahr.; चीनिकनंग - chínikananga, Conc.; شکرقند - shakarkand, Pers.; شکرکندا - shakarkandá, Hind.; نترالو - natrálú, Dec.; كاتيلا - kátela, Malay; ಗೆಣಸು - genasu, Can.; ಮರಕೆರೆಂಗು - marakerengu, Too.; గెణుసు - genusu, Tel.; କନ୍ଦମୂଳ - kondamúlo, Oor.; ചക്കരവള്ളി - chakkaravalli, Mal.; சர்க்கரைவள்ளி - sharkkaraivalli, Tam.). Title from taste of root. San. from (sharkará, san. sugar + vallí, san. creeper). Mahr. from (raktálu, san. the plant). Conc. from (chiní, mahr. china + kóna, mahr. yam + kanda, mahr. root). Pers. from hindostany. Hind. from (shakar, hind. sugar + kandá, hind. tuber). Too. from (mara, too. tree + kerengu, too. potato). Mal. from sanscrit. Tam. from sanscrit. San. also (raktálu), meaning red esculent root; (sharkarákanda), meaning sugar + esculent root; (lóhita), meaning reddish; (lóhitálu), meaning red esculent root; (raktakanda), meaning red esculent root; (raktapindálu), meaning red + ball + esculent root; (raktapindaka), meaning red ball. Pers. also (zardakiláhorí), meaning lahore carrot. Hind. also (rattálú), from sanscrit; (míthháálú), meaning sweet potato. Dec. also (pindálú), meaning sweet esculent root. Malay also (batatas). Can. also (maragenasu), meaning tree + sweet potato; (shígenasu), meaning sweet potato. Tel. also (chilagadamu); (chiragadamu) [red nerinjy]; (shilagadamu); (móhanamu), meaning pleasing. Mal. also (kappalkizhannu), meaning foreign esculent root; (marakkizhannu), meaning wood + esculent root; (chínikkizhannu), meaning china esculent root; (madhurakkizhannu), meaning sweet esculent root; (vallikkizhannu), meaning creeper + esculent root. Tam. also (valli), meaning beautiful, useful plant; (sharkkaraikkizhangu), meaning sugar + esculent root; (shínikkizhangu), meaning china + esculent root; (vellaivalli), meaning white + esculent root. Title otherwise China yam, Lahore carrot, Spanish potato, Sweet yam, Tuberous bindweed. The potato of Shakespeare and old english writers. The Kissing comfits of Falstaff were conserved Sweet potatoes and Eryngo root or sea holly. Botanically Ipomæa [calamby] batatas, lam., convolvulaceæ [vricsham, 93]; specific from malay. Alias Batatas edulis; Convolvulus batatas, edulis, esculentus; Ipomæa catesbæi. Tuberous rooted plant; stem creeping, rarely twining; glossy verdant leaves variable, usually angular, also lobed, cordate; sepals five; corolla campanulate; peduncles equal in length to the petioles, three to four-flowered; flowers white outside, purple inside; native of both indies. The root is about 4 or 5 inches long, and about 2 or more round; resembling the potato, but seldom so dry. Cultivated like potato [q.v.]; will grow on any soil; ground prepared in south in pungoony [mausam] or march, on coromandel in margashiram or december and pooshyam or january, on w. coast in vrishchicam or november; land is ploughed five times; sheep-folded; sown in south in veiyaushy or may, on coromandel in margashiram or december and pooshyam or january, on w. coast the cuttings are planted generally in the month of yedavam or may; previous year's creeper is cut and buried in furrows and watered; once in eight days it is watered, and the tendrils occasionally pruned; as the tubers ripen the leaves and stems become yellow and leaves fall off; dug up after six months; brought to market at once; average price 10 imperial seers for 1 rupee. Nutritious and palatable, though slightly laxative; in taste sweet and palatable, possessing saccharine matter; natives eat the tubers, leaves, and tender shoots; herbage is employed for feeding cattle [ghaus, maud]; roasted under hot ashes or boiled in water. Two kinds, one with red tubers, the other with white; the red better. ——*Tacca potato* (تکا - takka, Malay). Same as Otaheite salep. ——*Telinga potato* (सूरण - súrana, San. and Mahr.; زمین کندا - zamínkandá, Hind.; کندا - kandá, Dec.; ಸೂರಣಗಡ್ಡೆ - súranagadde, Can.; ಪರಿಂಕಿಗಡ್ಡೆ - parinkigadde, Too.; మంచికంద - manchikanda, Tel.; ചീനപ്പാവു - chínappávu, Mal.; கருணை - karunai, Tam.). Title from habitat where first known. San. from (súr, san. to hurt); from caustic root. Hind. from (zamín, hind. ground + kandá, hind. tuber) [malacca yam]. Can. from sanscrit. Tel. from (manchi, tel. good + kanda, tel. yam). Mal. from (chína, mal. china + pávu, mal. root). Tam. from (karakara, tam. to feel itching in the throat) [elephant yam, wild telinga potato]. San. also (ólla); (kanda), meaning root; (arshóghna), meaning piles + killing. Hind. also (ol), meaning the root; (súran), from sanscrit; (álú), meaning potato. Can.

also (gandíra). Tel. also (kanda), meaning root; (dúlakanda), meaning itching + yam; (pátikanda), meaning waste land + yam; (úrakanda), meaning village + yam; (álukamu); (genusukanda); (tiyyakanda), meaning sweet root. Mal. also (chéna) [elephant yam, otaheite salep]; (malañchéna), meaning hill + typhonium orixense, schott. Tam. also (karanaippalá), meaning the plant + jack tree, artocarpus integrifolia, willd.; (shénaikkizhangu). Title otherwise Caroonay root, Caustic potato, Itching yam, Piles-killer, Sooran. Botanically Amorphophallus campanulatus, blume, araceæ [vricsham, 152]. Alias Arum campanulatum, rumphii, zeylanicum; Candarum roxburghii. Stemless; leaves decompound; flowers small, mahogany-colored, sessile with respect to the surface of the ground, and appearing when the plant is destitute of leaves; spathe the length of the spadix, campanulate, margins curled; nectary none; club broad-ovate, lobate, anthers two-celled; flowers have a disagreeable odour; flowering in june. Roots resemble yam [auloo]; the small tuberosities in the roots are planted in the manner of potatoes. Roots are very caustic and abound in starch, and are employed medicinally as external stimulants. Roots are boiled like potatoes [q.v.] and eaten with mustard [rayaun]; cooked in curries [q.v.]; cut into slices, boiled with tamarind [q.v.] leaves, and made into pickles; also cooked in syrup and made into preserves. A jungle species is Lyratus, chiefly in circar [q.v.] mountains; this requires two or three boilings to render inoffensive. A species Sylvaticus is called jungle shaimay [kachvee] in vernaculars. Other species are dubius, giganteus. Compare Colocasia antiquorum, schott. [kachvee].——*Wild telinga potato* (काननकन्द - kánanakanda, San.; काडसूर्ण - kádasúrna, Conc.; جنگلی کندا - janglíkandá, Hind. and Dec.; ಕಾಡುಸೂರಣ - kádusúrana, Can.; ಕಾಟುಕೇನೆ - kátukéne, Too.; అడవికంద - adavikanda, Tel.; കാട്ടുചേന - káttuchéna, Mal.; காட்டுக்கருணை - káttukkarunai, Tam.). Title from habitat and resemblance. San. from (kánana, san. forest + kanda, san. esculent root). Conc. from canarese. Hind. from (janglí, hind. wild + kandá, hind. colocasia esculenta, schott.). Can. from (kádu, can. jungle + súrana, san. esculent root). Too. from (kátu, too. forest + kéne, too. amorphophallus campanulatus, blume). Tel. from (adavi, tel. forest + kanda, tel. yam, amorphophallus campanulatus, blume). Mal. from (kátu, mal. forest + chéna, mal. yam, typhonium orixense, schott.). Tam. from (kádu, tam. forest + karunai, tam. amorphophallus campanulatus, blume). Hind. also (janglíkandekágaddá), meaning wild yam root. Can. also (kandagida), the plant. Tel. also (kanda). Tam. also (karunai), meaning itching root [elephant yam, telinga potato]. Title otherwise Many-leaved dragon, Purple-stalked dragon, Wild kachvee. Botanically Dracontium polyphyllum, linn., araceæ [vricsham, 152]. Alias Arum lyratum. Stalk 1 foot, smooth, purple-colored, full of sharp variegated protuberances, with a tuft of leaves at the top; scape very short; petiole rooted; leaflets three-parted; divisions pinnatifid; root irregular, knobbed, covered with a rugged skin; flower-stalk, rising from the root, about 3 inches high; spathe oblong, opening lengthwise; flowers closely arranged on a short thick style. Roots medicinally antispasmodic and a powerful stimulant; quoted, non-officinal, in pharm. No other common species here.

POTEE (پوتی - potí, *Hind.*; పత్తి - patti, *Tel.*). Red cotton wool [cotton].

POTHAN (போதன் - póthan, *Tam.*). From (budh, san. to know). Means Bramha [q.v.], the wise. Hindoo 2nd or pers. name [peyar].

POTHY (പൊതി - pothi, *Mal.*; பொதி - pothi, *Tam.*). From (pothi, tam. to roll up, tie). A pack, bullock-load. Also close elephant [q.v.] forest.—"*a*" Grain measure. 20 yidangazhies = 1 pothy [alavay, 3d]. Approximate actual value, 1 pothy = 65 lbs. or 1 cubic foot and 547 cubic inches. Wynaud. Same as Colagam.—"*b*" Bazaar weight. 10 maunds = 1 pothy; 2 pothies = 1 candy [niray, 2a]. Approximate actual value, 1 pothy = 250 lbs. avoir. Salem, Coimbatore and Madura. In the first two pothy is 10 maunds or 250 lbs.; in Madura, is 12 toolaums or 231 lbs. Compare Tel. cuntlam, Tam. cundaga.—"*c*" Liquid measure. 8 paunays = 1 pothy [alavay, 4a]. Approximate actual value, 1 pothy = 3 cubic feet 1,536 cubic inches. Coimbatore and Trichinopoly. In Coimbatore pothy is 8 coodams of 6⅝ pucka puddies or 3 cubic feet, 1,501 cubic inches. In Trichinopoly, a pothy of ghee is 105 seers of 75 tolahs or 3 cubic feet, 1,676 cubic inches, and a pothy of oil is 120 seers of 75 tolahs, 4 cubic feet, 963 cubic inches.—"*d*" Superficial measure [alavay, 2d]. Approximate actual value, 1 pothy = 2,640 square yards. Wynaud. Same as Colagam. Compare garce or veesam of Vizagapatam. See vol. I, 609; II, 509, 515, 516, 519.——*Pothigay* (பொதிகை - pothigai, Tam.). From (pothi, tam. elephant forest + kai, tam. place).* Tam. also (pothiyam), meaning elephant [q.v.] forest place; also (pothimunai), meaning elephant forest peak; also (tenmalai), meaning southern mountain. Sanscrit name (agastyagiri), meaning agastyan's hill; also (chandanagiri), meaning sandal [q.v.] mountain. Greek Βηττιγώ. Native name of Agastya mullay [agastyan]. Also called Periya pothigay, the great pothigay, to distinguish it from a smaller mountain adjoining it called Eindootalay pothigay or pothigay with five peaks. Mountain; Tinnevelly dist., Ambasamoodram tal.; lat. 8° 36′ 54·80″; long. 77° 17′ 16·40″; height 6,125 feet; from Ambasamoodram W.S.W. 15 miles; from Tinnevelly W.S.W. 31 miles. Here the Tamrapurny takes its rise. This mountain is the highest in the Tinnevelly range of ghauts [q.v.], and is regarded by native poets as the distinguishing mountain of the Tamul paundy country, one of the titles of the Paundy [q.v.] king being Lord of Pothiyam. It stands back nearly ten miles from the rest of the range, so that the Tamrapurny drains a considerable extent of mountain country before it emerges into the plains. Agastya mullay is visible from Palamcottah and Trivandrum. In 1852 a meteorological observatory was erected near the summit. The rainfall on the top amounts to about 300 inches in the year. The rainfall at Palamcottah, half way between the mountains and the east coast, is less than 27 inches, whilst 25 inches is the general average in the Tinnevelly plains. From the summit the whole south of Indian peninsula is seen, from Cape comorin to Cochin on one side and to Adam's bridge on the other.

POTOO (పోతు - pótu, *Tel.*). Male, as of cattle [mand]. Plant first term, often joining two genera. Ex., where transl. is of second term:—Grewia abutilifolia (pótushálmali), bombax malabaricum; Zehneria umbellata (pótudonda), cephalandra indica. See gloss. paragraphs.——*Pothanore* (போத்தனூர் - póttanúr, Tam. pódanúr *). From (póttu, tam. male buffalo + úr, tam. village).* Tam. also (kallambálaiyam), meaning cullar fortified village. Village, Railway station; Coimbatore dist., Coimbatore tal. Hamlet of Cooritchy, which contains population of 5,747; lat. 10° 58′; long. 77° 02′; height 1,308 feet; from Coimbatore S.E. 3 miles. Junction of Neilgherry branch and south-west main line of Madras railway.——*Potrauz* (పోతురాజు - póturádzu, Tel.). From (pótu, tel. ox + rádzu, tel. king). Rustic god worshipped with his wife Ancaulamman [q.v.] in Teloogoo countries; goats [vellaud], pigs [soor], fowls [moorghy] and buffaloes [khoolgah] being beheaded before them.

POTTA (പൊട്ട - potta, *Mal.*). From (pottu, mal. to break). Worthless. Plant first term. Ex., where transl. is of second term:—Cyperus puncticulatus (pottappullu), grass; Sterculia fœtida (pottakkávalam), sterculia balanghas. See gloss. paragraphs.——*Pottal* (பொட்டல் - pottal, Tam.). Arid tract [desham, paulay].

POTTINGHY (పొట్టింగి - pottingi, *Tel.*). From (potti, tel. short + angu, tel. beauty) [potty].——**(1)** Division; Vizagapatam district; language Ooriya. Boundaries:—E. Saulore and Parvatipore divisions, S. Saulore and Srungavarapoocote divisions, W. Padair and Mulkangherry divisions, N. Jeypore and Coraputt divisions. A net work of steeply undulating valleys and ranges with deep nullahs [q.v.] between and occasional lofty hills. Soil red. The leading places, &c., in the division are the following.——*Nundapore* (నందాపురము - nandápuramu, Tel.). From (nanda, san. felicity + pura, san. city). Village, zemindarry; lat. 18° 33′; long. 82° 47′; from Pottinghy W. 13 miles; from Vizagapatam N.W. 68 miles. Former capital of Jeypore rajahs. Old mud fort with a simhausanam [q.v.], reached by a flight of thirty-two steps. This was the place of installation. Six old temples. Temple of Sarweshwaran with inscriptions. Head-quarters of an ameen [q.v.] of Jeypore maharajah.——*Owrada* (ఔరద - aurada, Tel.). From (auru, tel. bulrush, andropogon muricatus, retz. + eda, tel. place). Sub-Zemindarry village, formerly Sub-magistrate's station. Sub-division of Jeypore agency.——*Pottinghy* (పొట్టింగి - pottingi, Tel.). See below.——**(2)** Deputy tahsildarry; Vizagapatam district. Pay Rs. 120.——**(3)** Village, Head-quarters of Deputy tahsildar and Assistant engineer, D.P.W.; Vizagapatam dist., Pauchipenta zemindarry, Pottinghy magisterial division; lat. 18° 32′; long. 82° 59′; height 3,000 feet; from Coraputt S.S.E. 23 miles; from Madras N.N.E. 410 miles; from Narsapatam N.N.E. 63 miles; from Parvatipore S.W. 36 miles; from Vizagapatam N.N.W. 61 miles; from Vizianagram N.W. 42 miles. A hill village important only as occupying head of the fine ghauts [q.v.] from Saulore.

POTTOO (బొట్టు - bottu, *Tel.*; பொட்டு - pottu, *Tam.*). From (pódu, tam. to put on). Sandal [q.v.] spot on the forehead as a sectarial mark [naumam, tilacam]. The dot is the mark of the sun [sooryan], the supreme being, or the world. Has the lines of Vishnoo [q.v.] or Shiva [q.v.] added, as the case may be [matam]. See vol. I (85).

POTTY (పొట్టి - potti, *Tel.*). Short. Plant first term, often joining two genera. Ex., where transl. is of second term:—Cucurbita pepo (pottigummadi), cucurbita maxima; Methonica superba (pottidumpa), root; Mukia scabrella (pottibudama), solanum verbascifolium. See gloss. paragraphs.——*Pottapy* (పొట్టప్పి - pottappi, Tel.). From (potti, tel. short + appi, tam. corr. of abbi, tel. titular affix). Title of the Chola [q.v.] king. See sep. title.——*Pottinghy* (పొట్టింగి - pottingi, Tel.).——*Pottivaudoo* (పొట్టివాడు - pottivádu, Tel.). From (above + vádu, tel. person). Pariah proper name [peyar].

POY (పోయు - póyu, *Tel.*). To pour.——*Poyney* (పోయిని - póyini, Tel.; பொன்னை - ponné, Tam.). From (poy, tel. to

pour). Sanscrit name (níranadí), meaning water river; also (nílanadí), meaning black river. River; North arcot dist., Chittore, Chundragherry tals. Tributary of Palaur. Rises in the rocky hills in W. of Chundragherry. Known first as Daumalcheroo. After leaving Chundragherry talook it flows through Chittore, where called Poyney. Its course is almost due south, and after receiving the Arangonda, Chittore, Eiraula and Vencatagherry flowing from Eastern ghauts [q.v.], it joins Palaur not far from Arcot. Length 45 miles, though smaller than Palaur, more frequently in flood and more useful for irrigation.

POY (பொய் - poy, *Tam.*). False.——*Poy maun* (பொய் மான் - poymán, Tam.). From (poy, tam. false + mán, tam. deer). Rock; Salem dist., Salem tal.; from Salem S.E. 6 miles. Rock between Salem and Mullore; when viewed in a particular direction, the figure of a deer [mrigam] is seen through a crevice. ——*Poyyauthameyyoodaiyore* (பொய்யாதமெய்யுடையோர் - poyyáthaméyyudaiyór, Tam.). From (above + á, tam. neg. neuter termination + mey, tam. truth + udai, tam. possession). The possessor of truth that is not false; Vigneshwaran [q.v.].

POYA (పాయ - páya, *Tel.*). From (páyu, tel. to separate). Ford. Suffix in place names; as Saunipoya, meaning dancing girl's ford.

POYA (പുഴ - puzha, *Mal.*). River. Suffix in place names; as Ambalapoya, meaning sky river. Prefix in place names; as Poyavye meaning river mouth.——*Pycarrah* (ಪಾಯಕರೆ - páyakare, Can.). From (puzha, mal. river + kara, mal. bank).—"*a*" Village; Neilgherry dist., Todanaud div.; acres 3; lat. 11° 28′; long. 76° 39′; height 6,767 feet; from Ootacamund W.N.W. 7 miles. First stage between Ootacamund and Goodalore, a few miles north of Culcoodiyore. Public bungalow [q.v.]. Near the Tiriyairy todah mund, close to this place, is an isolated ancient stone circle [azhauram, phin].—"*b*" River; Neilgherry dist., Todanaud div. Above ghaut name for the Moyaur. Rises at Macoorty peak. It takes a winding northerly course diverging both to the east and west and passing between granitic [caroom cull] hills. On reaching the edge of the plateau it turns to the west, and passing through the Government cinchona [koinah] plantations, falls in a succession of cascades to the tableland beneath. These form the Pycarrah waterfall, but they are far from the bungalow. After reaching the plains of Wynaud, it is known as the Moyaur [q.v.]. Length about 10 miles from Macoorty to the falls [aroovy].—"*c*" Valley; Neilgherry dist., Todanaud div. Follows the line of the lower slopes of the Nedoo mullay range. Its most remarkable features are the broad reaches of the river which are found here and there in the wider openings, and are supposed to be the beds of ancient lakes. This and the Coondah valley are favorite grazing grounds of the Todahs [q.v.].—"*d*" Hill; Neilgherry dist., Todanaud div.; lat. 11° 27′; long. 76° 40′; height 7,511 feet; from Ootacamund W. 6 miles.—"*e*" Tea [q.v.] and cinchona [koinah] estates, Todanaud, Neilgherries. At the falls. From Pycarrah bungalow N.W. 3 miles. 368 acres.

POZHAL (புழல் - puzhal, *Tam.*). Means a hollow. Village; Chingleput dist., Sydapett tal.; pop. 2,823; acres 4,104; lat. 13° 10′; long. 80° 15′; from Sydapett N. 10 miles; from the sea W. 7 miles. Formerly a division of Tondaimundalam [q.v.], but now known as Red hills [q.v.]. An extensive necropolis of cistvaens [paundicoozhy] and circles [azhauram]. Old Shiva [q.v.] temple and a new temple to Booddha [q.v.]. Coorumbar [q.v.] had a fortress here before subjugation by Cholas [q.v.]. Athonday [q.v.] transported the bronze gates found in Pozhal to ornament the great temple at Tanjore. Contains the Red hills tank.

PRA (प्र - pra, *San.*). Before; intensive prefix [para, pari]. ——*Pagger* (ಪಾಗಾರ - págára, Can.). From (prákára, san. enclosure). A small fortified village.——*Pagoothy* (பகுதி - paguthi, Tam.). See sep. title.——*Pahrah* (پہرا - pahrá, Hind.). From (prahara, san. watch). One who strikes the gong [q.v.] to announce time. A guard.——*Paleetah* (پلیتا - palítá, Hind.). From (pradípta, san. kindled from pra, san. intensive prefix + díp, san. to kindle). A lamp charm. Anglo-Indian application is to a cotton [q.v.] slow match to light cigars, often furnished with a decorated silver tube; otherwise a Ramasawmy.——*Parbutty* (పారుపత్తి - párupatti, Tel.). From (pravritti, san. employment). A subordinate village officer, under the potail [q.v.], sometimes the village crier, &c. [praverticauran].——*Parlakimedy* (పర్లాకిమిడి - parlákimedi,* Tel.). From (pravála, san. coral + akshi, san. eye + munda, san. head); from pravaulakhimoondo, the coral-eyed and coral-headed man, the last of the aboriginal rulers of the tract.—"*a*" Deputy tahsildarry; Ganjam district. Pay Rs. 100.—"*b*" Zemindarry, Talook and town, Residence of the zemindar, Deputy tahsildar's office, Police assistant superintendent's office, Telegraph office; Ganjam dist., pop. of zemindarry 240,980; pop. of the town 15,365; area 972 square miles. The largest zemindarry in the district. The original of the three estates forming Kimedy [q.v.] tract; the two others are Pedda kimedy and Chinna kimedy. For history, see vol. I, 60, foot-note. Full of hills, between which are numerous extensive and fertile valleys. The highest mountain is Deodangar. The rainfall amounts to between 80 and 90 inches yearly. Teak [q.v.] plantations at Wollaudy and Kimedy and saul [q.v.] wood forests near Serangy. The mango [q.v.] and jack [q.v.] topes [q.v.] are celebrated. The principal produce is paddy [q.v.]; sugar-cane [q.v.] and dry grain [q.v.] are also grown, indigo [q.v.] also recently. Manufactures of cloth and muslin [q.v.]. Well supplied with rivers [aur], channels [q.v.] and tanks [q.v.]. Principal tanks are Rama saugaram and Seeta saugaram near Kimedy, Brindauvana saugaram near Ooppalauda, Krishna saugaram near Goppily, and Çheitanya saugaram north-west of Parlakimedy. Other sources are Raudha saugaram, Seeta saugaram and Asarla cheroo.—"*c*" Maliah tract; Ganjam dist., pop. 39,152. Attached to Parlakimedy zemindarry, and inhabited by Sowrahs [q.v.], its centre is in lat. 19° 20′, long. 84° 10′.—"*d*" Village, Head-quarters of Assistant superintendent of Police and Deputy tahsildar; Ganjam dist., Parlakimedy zemindarry; pop. 10,812; lat. 18° 47′; long. 84° 08′; height 1,093 feet; from Balligooda S.S.E. 96 miles; from Berhampore S.W. 58 miles; from Chetterpore S.W. 70 miles; from Chicacole N.N.E. 36 miles; from Madras N.E. 460 miles; from Russelcondah S.S.W. 86 miles. Residence of the zemindar [q.v.] for whom a large palace has lately been built. Baskets [tokrah], mats [boriyah] and other articles of a fine texture are woven from the bark of a species of weed. Fine tanks. Contains Chinnamallipooram, Deodangar and Poolsara trig. stations.——*Paseenah* (پسینا - pasíná, Hind.). Hind. from (prasvéda, san. perspiration). Thrush in horses [ashwarogam, ghorah].——*Paudyamy* (పాడ్యమి - pádyami, Tel.; பாட்டியமி - páttiyami, Tam.). From (prat'hama, san. first). The first day of the lunar Pacsham [q.v.], or demi-month. The day [tity] after new moon [amavausyay] or full moon [powrnimay].——*Pavalam* (பவளம் - pavalam, Tam.). Corruption of (pravála, san. coral). Coral [moongah].——*Pavalamullay* (பவளமலை - pavalamalai, Tam.). Coral mountains. The eastern ghauts [q.v.]. See vol. I (141).——*Poorataushy* (புரட்டாசி - purattási, Tam.). From (prósht'hapáda, san. twenty-fifth constellation); from full moon in or near it. The sixth tamul solar month [mausam].——*Poorataushy shanikizhamay* (புரட்டாசி சனிக்கிழமை - purattásisanikkizhamai, Tam.). From (purattási, tam. the solar month + shani, tam. saturn + kizhamai, tam. day of the week). Solar [madhyama sowra maunam] festival [pundigay, 2d]. Any Saturday in sixth solar month Poorataushy [mausam], i.e., between 15th September and 15th October is specially sacred. A fast to avert evil influences of saturn [shany]. Before eating, crows [caurvam] are fed [maryauday].——*Prabandham* (प्रबन्ध - prabandha, San.). From (above + bandh, san. to tie). A composition. General term for various kinds of poems, as juvenile poem, war poem, love poem, epic poem, &c.; and ninety-six such varieties are recognized in tamul. For naulauyira prabandham see Tirvyemozhy.——*Prabhoo* (प्रभु - prabhu, San.). From (above + bhú, san. to be). Lord. A military leader. Nayar [q.v.] chief. Hindoo third name [peyar].——*Pracaranam* (प्रकरण - prakarana, San.). From (above + karana, san. doing). Chapter.——*Pracausham* (பிரகாசம் - piragásam, Tam.). From (above + kásh, san to shine). Hindoo 2nd or pers. name; also suffix in names as Nyaunapracausham, Shivapracausham [peyar]. Pracausham wodeyar was a Mysore ruler of Paundyam [q.v.], A.D. 1372–1404. See vol. II, 250.——*Pracrit* (प्राकृत - prákrita, San.). From (prakriti, san. origin). That which is derived. Old provincial dialects of the Sanscrit [q.v.], exhibiting more or less deterioration from the original language. They occupied an intermediate position between that language and the modern vernaculars of India, very similar to that of the historical Romance languages between the Latin and the modern languages of Europe. The most completely preserved of old Pracrits is that which was used in Magadham and which has come down in the Booddhist [booddha] books of Ceylon under the name of Pali [q.v.]. In Sanscrit plays Pracrit is spoken by the female characters and the inferior personages. See vol. I (39).——*Pracrity* (प्रकृति - prakriti, San.). From (above + kri, san. to do). The original source of the material world in the Saunkhyam [q.v.] philosophy. See Pradhaunam, Poorsham and Vicrity. Pracrity means also principal. Also a in the algebraic form $ax^2 + b = y^2$.——*Pradacshinam* (प्रदक्षिण - pradakshina, San.). From (above + dakshina, san. the right). Reverential salutation [namascauram] by circumambulation, with the right side towards the person saluted. Turning to the right in conformity with the sun's shadow [chauyay]. The Swasticam [q.v.] symbolizes this idea; it is the cross + with the crampons 卐 at the end of its arms; it is the sign of good luck. The Tamulians also apply the term to the circumambulation of their temples [coil, pagoda]; to be seen daily everywhere, the worshipper keeping the right hand towards the temple. The six years' pilgrimage from the source to the mouth of the Ganges and back again is also a Pradacshinam. The term also is applied to the circumambulatory passage [praucauram] itself surrounding the inner wall of temples [matam].——*Pradesham* (प्रादेश - prádésha, San.). From (pradish, san. to point out). The span of the thumb and the forefinger or the short span. Linear measure. 10 ungoolams = 1 pradesham [alavay, 1f]. Approximate actual value, 1 pradesham = 7½ inches. Same as Tam. wettay. Compare Jaun.——*Pradhaun* (پردھان - pardhán, Hind.). From (above + dhá, san. to place). Headman of a

village; minister [muntry, peshwah, vizier]. Corresponding terms are:—Mahr. potail, Tel. peddacaup, Mal. adhicaury, Tam. monigar.——*Pradhaunam* (प्रधान - pradhána, San.). From (above + dhá, san. place). Prominent, chief. The supreme spirit, epithet of Pracrity. See Pracrity and Poorsham [matam].——*Pradhauny* (प्रधान - pradhána, San.; பிரதானி - pirathâni, Tam.). From (above + dhá, san. to place). Literally prime minister [muntry, peshwah, pragada, vizier]. But in usage the treasurer, the third officer of the king after muntry the minister, and senaupaty the commander-in-chief.——*Pradosham* (प्रदोष - pradósha, San.). From (above + dósha, san. dark). Properly speaking the evening-tide, comprising three and three-quarters of a Nauzhigay [q.v.] or Indian hour of 24 minutes, before sunset and the same after; which time is considered as auspicious for the performance of sacred rites, and in particular the Pradosham on the thirteenth day [tity] from the new [amavausyay] and full moon [powrnimay], for the following reason. When Shiva [q.v.] had swallowed the poison [neelacuntan] arising from the sea of milk when churned by the gods [deva] for nectar [amritam], he lay motionless on the ground from the eleventh day [yecaudashy] of the lunar half month [pacsham] till the Pradosham of the thirteenth day, when he sprung up, swung his trident [shoolam], and danced the divine dances [coormam].——*Praharam* (प्रहर - prahara, San.). From (prahri, san. to strike at). Measure of time. 7¼ ghaticams = 1 praharam; 8 praharams = 1 dinam [caulam, 7f]. Approximate actual value, 1 praharam = 3 hours. Same as San. yaumam, Tel. jaumoo, Tam. jaumam.——*Prahlaudan* (प्रह्लाद - prahláda, San.). From (above + hláda, san. joy). Son of Hiranyacashipoo; see Narsimhan.——*Prajaupaty* (प्रजापति - prajápati, San.). From (prajá, san. mankind + pati, san. lord). A name of Bramha [q.v.]. An epithet common to ten divine personages who were first created by Bramha [q.v.]; Angiras, Atry, Bhrigoo, Dacshan, Mareechy, Nauradan, Poolahan, Cratoo, Poolastyan, Vasishtan [maharicsham, sapta rishy].——*Prajaupatya maunam* (प्रजापतिमान - prajápatimána, San.). Reckoning by Menoos or Prajaupaties [manwantaram, maunam, menoo].——*Pralayam* (प्रलय - pralaya, San.). From (above + laya, san. dissolution). Dissolution. The end of a Calpam [q.v.] or destruction of the world. The absorption of all things into Bramha [matam].—"*a*" In the reign of the sun-born monarch Veivaswatan [q.v.], the Sanscrit writers state that the earth was submerged entire, and the human race destroyed by a flood; except the monarch himself, the seven rishies [sapta rishy], and their several wives. This general pralayam or destruction is told in one version of the eighth book of the Bhaugavatam [q.v.] thus abridged. The account is evidently an Aryan [q.v.] tradition transplanted to Southern india. "The demon Hayagreevan having purloined the Vedams [q.v.] "from the custody of Bramha [q.v.], while he was reposing at "the close of the sixth Manwantaram [q.v.], the whole race of "men became corrupt, except the seven rishies and Satyavratan "[q.v.] who then reigned in Dravira [q.v.], a maritime region "to the south of Carnautam [q.v.]. This prince was performing "his ablution in the river Kritamaulay, when Vishnoo [q.v.] "appeared to him in the shape of a small fish, and after several "augmentations of bulk in different waters, was placed by "Satyavratan in the ocean, where he thus addressed his amazed "votary. In seven days all creatures who have offended me "shall be destroyed by a deluge, but thou shalt be secured "in a capacious vessel miraculously formed; take therefore all "kinds of medicinal herbs and esculent grain for food, and "together with the seven holy men, your respective wives, and "pairs of all animals, enter the ark without fear; then shalt "thou know God face to face, and all thy questions shall be "answered. Saying this, he disappeared; and after seven days, "the ocean began to overflow the coasts, and the earth to be "flooded by constant showers, when Satyavratan, meditating "on the deity, saw a large vessel moving on the waters: he "entered it, having in all respects conformed to the instructions "of Vishnoo [q.v.]; who in the form of a vast fish [matsyam], "suffered the vessel to be tied with a great sea-serpent, as with "a cable, to his measureless horn. When the deluge had "ceased, Vishnoo slew the demon, and recovered the Vedams "[q.v.], instructed Satyavratan [q.v.] in divine knowledge, "and appointed him the seventh Menoo by the name of Veivaswatan [q.v.]."—"*b*" Here follow two statements of the same leading event from the Bhauratam [q.v.], or tamul version of the Mahabhaurat [q.v.]; one much abridged being in prose and indeed in inferior language, the other poetical and in shen tamul [q.v.] or polished language.—"*c*" The following is the prose version:—மார்க்கண்டேயன் சொல்லக்கேட்டு தர்மராசா சந்தோஷப்பட்டு பின்னையுஞ் சொல்லுகிறான் ஓ சுவாமி நீ மகானுபாவன் பிரமமாண்டங்களெல்லா மநாசமான போது மநேகம்பிரமமாக்களப்பட்டமிறந்துபோயும் பதினாறுவயசு பாலகுமாரனைப்போலயிருக்கிறீர் யிந்தப்பிறப்பு ஞசம் பிறந்தவளார்ந்தலயமாகிறது கேட்க வேண்டியிருக்குது சொல்லுமையா வென்றார் மார்க்கண்டேயன் சொல்லுகிறான் ஓ ராசாவே உங்களுக்குத்தோழனுமுறவிலே நல்லமைத்துனனாய் பிறதானியாயிருக்கிற யிந்த க்கிஷ்ணதேவன் பாதத்தைத்தலைமேலேவைச்சுக் கொண்டியிவருடைய அனுமதியினாலே நீகேட்டகதை சொல்லுகிறேன் கேளும் கிறேதாயுகம் திறேதாயுகம் துவாபரியுகம் கலியுகம் யிந்தநாலுயுகமும்பன்னீராயிரம் தேவவருஷம் யிந்த நாலுயுகமும் ஒருக்கால் திரும்பினால் அதுவொருமகா யுகமென்று சொல்லப்படும். அப்படி கொத்தமகாயுகம் ஆயிரந்திரந்திரும்பினால் பிறமாவுக்கு ஒருநாள் அந்தநாள் முடிகிறபோது பூமியிலேநூறுவருஷம் மழையில்லாமல் கருப்பாம் அப்போ சூரியனேழுசரீரந்தரித்து ஆறுகள் குளங்கள் கிணறுகள் சமுத்திரங்களையெல்லாம் வறட்டிப்பான் அந்த கிறணங்கள் அக்கினிஸ்வரூபமாய்மகாவாயுவினாலேபெருகி மலைகள் காடுகளையுமூன்று லோகங்களையும் சுட்டுப்போடும் அப்போகறுப்பும் வெளுப்பும் செகப்பும் மஞ்சளு மயிந்தவறனங்களான காலமேகங்கள் மலைபோலே வளர்ந்து ஆகாசமெல்லாம் நிறைஞ்சு யிடிகளுடனேகூட ஆனைத்துமபிக்கைகளபோலே பெரியதானமழைகள பேயும் அதினாலே லோகங்களெல்லாமயேக சமுத்திரமாயிருக்கும். யிந்தபூமிமெத்தவுமுழுகி செலறுபமாம். அப்போதிக்குகள் விதிக்குகளென்று அறியப்போகாமல்மெத்தயிருளகப்பிக்கொள்ளும். அப்போ பிறமா வினாலே அனுப்பப்பட்டகாத்து வந்து அந்தகாலமேகங்களைத்தாத்தும அந்தகாற்றை பொசிச்சுக் கொண்டுபிற மாதேவன் பொறுமையின பேரிலபள்ளிக்கொண்டுநித்திரைபோவான். தர்மராசா வைவசுவதமனுவுக்கு யெதினாலேபிறபாவமுண்டாச்சென்று கேட்டார். மார்க்கண்டேயன் சொல்லுகிறான் முன்னேசாக்ஷிராக்ஷ மனுவந்தாத்திலே வைவசுவதன் பதினாயிரம் வருஷம் விஷ்ணுவை நோக்கி தவசு பண்ணச்சே அவன்முழுகுகிற ஆற்றிலே ஒரு மீன்குட்டி வெளியேவந்து அய்யா நான் சின்ன மீனானபடியினாலே பெரியமீன்கள் முழுங்கிபோட்டப்போகுதென்கிற பயத்தினாலே வெளியே வந்தேன் யென்னைக்காத்து இரட்சிச்சு வேறேயொரு யிடத்திலே வைச்சால் உமக்கு நான் பிறிதியுபகாரம் பண்ணுகிறேனென்றுசொன்னது கேட்டு ஆச்சரியப்பட்டுஅந்த இராசாதனக்கமண்டலத்திலே விட்டான். அந்திக்குத்தானே அந்தக்கமண்டலம் நிறைஞ்சு அந்த மீன் தனக்கு இடம்போதாதென்றது பெரியபானையிலே விட்டான். அதுவும் நிறைஞ்சுது பிறகொரு கிணற்றிலே விட்டான். அதிலேயுமிடம் போதாதென்றதற்கு ஒரு யேரியிலெ விட்டான். அதுவும் நிறைஞ்ச பிறகு சமுத்திரத்திலேவிட்டான். அந்த மீன் லக்ஷம் யோசனை தூரம்வளர்ந்து ஓய்ராசாவே யின்னையிலே நாளையிலேபிரளயகாலம் வருகுது. அப்போ சமுத்திரங்களெல்லாம் ஒன்றாய்ப்போம். ஆனபடியினாலேயென்னிட மாயையினாலே ஒரு கப்பல் நிற்மிச்சு உன்னண்டைக்கு அனுப்புகிறேன். சத்தரிஷிகளுடனே அந்தக் கப்பலிலேநீ யேறிக்கொண்டு அந்தப்பிரளய காலத்து இராத்திரியிலே யென்னை நினையும் நான் வந்து கொம்பினாலே கப்பலைத்தாங்கிக்கொண்டு உன்னையும் முனியீசுபரரை யுமிரட்சிக்கிறேன் யென்றுசொல்லி காணபியாமல்போச்சுது. அதின் பிறகுபிரளயகாலமாய் சமுத்திரங்களெல்லாம் ஒன்றாச்சுது. அப்படியே கப்பல் வந்துது இராசா சத்தரிஷிகளுடனே கப்பலின் மேலேறிக்கொண்டு அந்த மீனை நினைத்தான். அது வந்துதன்கொம்புகளிலே கப்பலைத் தாங்கிக்கொண்டியிருக்கச்சே அநேகமாயிரம் வருஷம் அந்தப்பிரளய சமுத்திரத்திலே கப்பல் மேலே டயப்படாமல் யிருந்த பிறகு அந்த மீன் பிரளயராத்திரிவந்தது. இதோ யிமவத் பறுவம் இதின் சிகரத்திலேகப்பலைக்கட்டி வைச்சுக்கொண்டிருங்களென்று இராக்ஷசோலவி வேதங்களை திருடிக்கொண்டுபோன இராக்ஷனைக்கொன்றுபோட்டு வேதங்களையெடுத்துவந்துபிறமாவுக்குக்கொடுத்தது. வைவசுவதனுக்கும்சத்தரிஷிகளுக்கும் ஞான உபதேசம் பண்ணினபடியினாலேவைவச்சுதின் மகானுபாவனானான். இந்தக்கதைகேட்டவர்களுக்கு நினைத்தகாரியமெல்லாம்கைக்கூடும்.—"Dharmarajan [q.v.] "on hearing the narration of Marcandeyan [q.v.] was glad. He "again said, O my lord, most learnedly illustrious, you are in "appearance like a youth of sixteen, notwithstanding that in "your time all the worlds have perished, and many Bramhas "have died. I am desirous to hear of the birth, growth, and "destruction of this world. Be pleased to tell me. Marcan-"deyan replied, O king! placing on my head the foot of this "chief, the god Krishnan [q.v.], who is your friend, and in "relationship your brother-in-law, by his assistance I will tell "you the narrative which you desire. Be pleased to listen. "The Kritam [q.v.], Tretay [q.v.], Dwauparam [q.v.], Kaliyoogs "[q.v.] comprise twelve thousand years of the gods. The revo-"lution of these four ages [yoog] makes a Maha yoog [caulam]. "The lapse of a thousand such great ages is a day of Bramha "[calpam]; when that day is about being accomplished, the "earth will be parched by a reason of a want of rain during one

"hundred years. The sun, then increasing seven times in size, "will dry up all rivers, lakes, wells, and seas. The rays of the "sun, like flame, being acted on by a strong wind, will burn up "mountains, forests, and the three worlds. Afterwards heavy "rain, clouds of various colors, black, white, red, and yellow, "rolling together and increasing like mountains, will fill the "visible heavens; attended with thunder and torrents of rain, "with the streams comparable to the trunks of elephants. "Thus all the worlds will become one vast sea; this earth, being "submerged will present the form of water. The cardinal and "subordinate points [ashtadic] of the heavens being undiscernible, "a thick darkness will cover all things. Then a wind, sent by "Bramha, having come and driven away the clouds, the god "Bramha will swallow up that wind and reposing on the "golden lotus [nelumbo] will go to sleep. Dharmarajan in- "quired, how was it that Veivaswata menoo became renowned? "Marcandeyan answered. In the Manwantaram of Swarochi- "shan, when Veivaswatan was performing a penance of a thou- "sand years in devotion to Vishnoo, he was on one occasion "bathing in a river, when a young fish leaped out and said:— "Respectable man, because I am small, the large fishes are "seeking to devour me for which cause I am come out of the "water; if you protect and deliver me, and put me in another "safe place, I will render you an adequate return. Being "astonished at this request, the said king put the fish into a "small pitcher. At evening of the same day the pitcher was "filled by the fish, which, on its applying for more room, he put "into a large earthen water-pot. The fish having also filled "this vessel, he put it into a well. This even not affording room "enough, he put it into a lake; and on that becoming filled, he "placed it in the sea. Thereupon the fish grew to the bulk of a "hundred thousand yojanams [q.v.] or one million of miles. "It then said. Oh king! to-day and to-morrow a time of deluge "comes on; then all the seas will become one. But having "formed by my divine power a floating vessel, I will send it to "you; whereupon, in company with the seven rishies, ascend "thou the ship, and in the night of that flood time think on me, "when I will come and bear up the vessel with my horn; and "will save both you and the holy men who accompany you. "So saying, the fish disappeared. Afterwards the seas became "all one in the flood time. Accordingly the floating vessel came. "The king, together with the seven rishies, went on board the "vessel, and thought on the fish. That having come, bore up "the vessel with its horn; and after they had continued many "thousand years in that vessel on the deluge sea without fear, "the fish said:—The night of the deluge has come; see here "the mountain imaut; fasten the vessel to its peak and remain. "Saying thus, it proceeded to kill the giant that had stolen the "Vedams; and having taken the Vedams, it restored them "to Bramha. And because it gave spiritual instructions to "Veivaswatan and to the seven rishies, Veivaswatan became "learned and illustrious. Whoever hears this narrative, "the thought of his mind will be accomplished."—"d" The following is the poetical version:—என்ன முன்னர்

னுனநறகரு ணையாலறிய வோதினே ம்—"Thus spake "the descendant of the rishy [q.v.], Marcandeyan [q.v.]; and "the son of Dharmarajan [q.v.] being himself the ruler of kings, "possessing the conquest giving arrow, was rejoiced. Again "he said, what you have spoken has equal authority with the "Vedam [q.v.], and must be not otherwise regarded. But there "is a further inquiry arising in my mind, can you graciously "satisfy it? O benevolent sage; who, by worshipping the su- "preme being, didst conquer death, by his losing his power when "he came to destroy thee; thou that knowest all the circum- "stances which occurred while the world was being destroyed; "I have a desire to learn how all living things were annihilated

"when the night of Bramha's day [calpam] was advancing;
"tell me this. So freely spoke the king. The sage replied:—
"The four lesser ages [yoog] joined into one become a Maha
"yoog [q.v.]. And further, it is considered that two thousand
"of these great ages make a day of Bramha. One thousand of
"these ages were his night, during which time the first born
"Bramha dwelt in the lotus [nelumbo] flower; at which time
"fourteen Indrans [q.v.] of the celestials had died. The night
"of Bramha being come, he, having discontinued the production
"of many generations of living beings, was sleeping in the
"lotus flower. Then the three worlds upper, middle, and lower,
"were destroyed; the celestial inhabitants expired; the sea,
"roaring with a great noise, flowed over the highest peak of the
"mountain Meroo [q.v.], reaching even to the heavenly
"expanse; and all places were shrouded and veiled with its dark
"gloom. I alone survived. Water only excepted, no inanimate
"things had existence, even unto the walls of heaven; seeing
"this state of things, with deep anguish of mind my eyes
"became weary, and while sinking into half torpid insensibility,
"a handsome child, on an Aul [banyan] leaf, resembling a cloud,
"came near, and seeing it, my soul was rejoiced. Thou, of the
"penance-making form, to remove thy distress enter into my
"body. Thus spake the child, opening its rosy-colored lips;
"and I entered by its mouth, I therein saw the earth, with the
"forms of many other worlds; and, contemplating these with
"satisfaction, while reflecting also on what I saw, I remained
"thus enclosed during unnumbered days. On its again opening
"its mouth, I came forth again into the flood; and regarding
"the being who had saved me, having the red mouth like the
"lotus flower, with the countenance of a child incomparable, I
"inquired, with eagerness, Oh my father! who didst succour
"me when weary; tell me, Oh thou, possessing the dark-colored
"form; what are thy character and circumstances? The
"gracious child, smiling replied:—When the darkness had
"increased, I, Vishnoo narayanan, who preserve the world and
"have the color of the sapphire [neelam], approaching to thee,
"delivered thee from the trouble occasioned by the deluge; but
"in future, even for ever, this distress caused by the overflowing
"waters cannot occur again. Thus it gave me assurance and
"further added:—Fear not; for when a short time more has
"gone by, Bramha, the author of good, again opening his eyes,
"will reproduce the seven seas [samoodram], the eight points
"[ashtadic] of the heavens, and the earth [bhoomy]; when this
"azure-tinted deep will become dried up. Thus greatly favoring
"me spoke the being having the form of a child; and by these
"words which he had spoken my grief was removed. Regarding
"with gladness the child possessor of the blue form, exercising
"dignified favor, I said:—I have seen within your lotus-like
"form illusory types of innumerable things. I have seen the
"seven seas, the seven clouds, the seven rishies, the seven
"mountains, the seven dweepams, the seven celestial females,
"the seven rivers, the seven worlds, the seven physicians of the
"gods, the seven genera of things; all these. O divinity; within
"thy splendid form, I have seen the inferior world, the lofty
"Audy sheshan [q.v.], styled the thousand-crested crown; I
"have seen the elevated, the penance-making men, the stars
"desirable to look on, and the golden mountain Meroo [q.v.]. I
"have heard the sonorous-sounding voice of the Vedams, the echo
"of innumerable modes of prayer, the voice of the Augamams
"[q.v.], and the resonance of other sacred books innumerable..
"Attending to these without full comprehension, I am in doubt.
"O thou, having the lotus-colored mouth; supply my deficiency,
"and explain to me, I implore thee, the import of all the various
"and illusory forms of things in the universe within thee. Thus
"I besought him. He, the divine being, possessing the odour
"of the green toolsy garland, who was reposing on the aul
"leaf, said:—It is well. I will tell you these various things.
"Listen. Thus preparing me, he alone replenished with favor
"proceeded:—Understand, my name is Narayanan [q.v.],
"because I preserve the world, thus enclosed within me, and
"am surrounded everywhere by water. At the same time, I am
"always Bramha [q.v.], producing the world; and, as the three-
"eyed Shiva [q.v.] I shall destroy. The earth is the place of
"my feet; the heavens are my form; Bramha and the gods are
"my members; my countenance is the primæval light; the sun
"and moon are my two kinds of eyes; with this splendour I
"shine forth. As an immense boar possessing power, by my
"club, I divided the earth, surrounded by this large sea; and
"passing below to the inferior regions, thence returning,
"possessing beauty, I am he. I am Paraman [q.v.], whose
"ornamental garland is formed by the stars [nacshatram], the
"zodiacal mansions [rausby], and the nine planets [graham];
"the winds are as my breath; I repose on the venom-bearing
"Audy sheshan, in the midst of the sea; sleeping, yet not
"unconsciously, but knowing all things. With the brightness of
"the splendid thousand-headed snake, which is vast beyond
"expression, supporting the earth, the mountain Meroo, the
"seas, and the mountains, having strength, I shine forth. I
"alone am he who placed the mountain Mandaram [q.v.] in the
"midst of the seas; churned them like cold curdled milk;
"destroyed the Raucshasans [q.v.], adversaries of the gods
"[deva]; and helping these, gave to them the white ambrosia
"[amritam] adapted for food. And after the night of this
"great flood, now covering all things, I will replace the
"shining universe by removing the waters; and by taking
"it out of them, I will reproduce the earth and the seven
"worlds; together with my splendid fiery form. I will
"again establish four divisions of caste [jauty], the eximious
"Bramins, and the others, truly possessing glory in the face, in
"the shoulders, in the thighs, and in feet. Those ancient men
"who forsake pride, desire, and anger, adore me; worshipping
"my feet, that give health, both for the present time and for
"futurity. Without me there is no world; nor do I exist apart
"from this goodly world. Within me resides thought; and
"exterior to me are the before mentioned earth, and paradise,
"and connected things. If justice be perverted, and the moral
"force of the gods be diminished, and if their life, being with-
"out guilt, be troubled by means of austerities of evil beings,
"then I become incarnate on earth, oppose the adversaries of
"the celestials in the scene of contest, and remove the distress
"of these by destroying the former. Preserving by my nature
"the attributes of the before stated four ages [yoog] in due
"order, without failure, my form possesses the whiteness of the
"moon, with its red and its azure light, together with its beauti-
"ful color of gold. O thou of the good disposition; thus shall I
"always be holding the chuckram [q.v.], abiding in the green
"water, the god Bramha dwelling in the lotus springing out of
"my navel always during the night of his sleep. O good Moony
"[q.v.]; we have spoken these things, seeing there is benignant
"favor towards thee, for thy information concerning our inex-
"pressible immaterial form; but can even the great and wise
"rishies perceive the boundary of my immeasurable, illusive
"immensity [peroovely]?"—"*e*" The legend of Xisuthrus as ascribed to Sanconiathon is substantially one and the same with the statements in the Bhaugavatam [q.v.] and Bhauratam [q.v.] concerning Vishnoo's appearance to Veivaswatan [q.v.] or Satyavratan [q.v.], and then piloting the vessel in the shape of a fish, a rope being attached to his horn.—"*f*" With the Jeina [q.v.] people there is a period of great heat of fire, rain, previous to the deluge; then other kinds of showers, among them of sugar-cane [q.v.] juice, of poison, quintessence of poison, by which means the earth sinks down depressed; then come showers of milk [paul], nectar [amritam], water [neer]; and afterwards the earth becomes restored; grass, plants, shrubs, &c., reappear; men also again inhabit the earth, who dwell on it, and increase. After forty thousand years the Menoos and Chuckravurties are born and continue to rule. Then comes a period of twenty crores of years, at the close of which the seven kinds of showers as before introduce the yoog pralayam or periodical deluge.—*Pramaunam* (प्रमाण - pramána, San.). From (above + má, san. to measure). Dimension, quantity, standard, limit. Authority, proof by oath, an oath. On w. coast is same as Caranam [q.v.].—"*a*" The Tamulians enumerate eight kinds of testimonies, viz.:—Proof given by the senses, especially by the sight or by experiments; Proof by inference, or supposition; as where smoke is, there is fire; Proof by testimony, the assertion of great men or the vedams; Proof by conclusion, as the inference that he who eats nothing during the night, and fasts during the day, cannot be stout; Proof by comparison; as one having heard that the gayal [gowr] is like an ox [maud], afterwards sees this animal, and the recollection of that which he has heard of it makes him conclude that it is the same; Proof by non-existence, known by the non-appearance of a present object; Proof by traditional testimony, as a devil is dwelling in this tree; Proof by co-existence, as where a thousand is there is a hundred [maryauday].—"*b*" Pramaunam is also the first topic of Nyauyam [q.v.] philosophy which exhibits the means or instruments by which Pramay or the right measure of any subject is to be obtained. Under this head are enunciated four different processes by which the mind arrives at true and accurate knowledge, viz.:—Pratyacsham or perception by the senses, Anoomaunam or inference, Oopamaunam or comparison, and Shabdam or verbal testimony or authority.—"*c*" Pramaunam means in astronomy diurnal revolution [bhaganam]. Aha pramaunam, from (ahas, san. day), the sun's revolution from the horizon [cshitijam] to the same again. Dina pramaunam, from (dina, san. day), the time of any star from rising to setting. Rautry pramaunam, from (rátri, san. night), the time of any star from setting to rising [jyotisham].——*Pramauny* (പ്രമാണി - pramáni, Mal.): An umpire [madhyastan].——*Pramay* (प्रमा - pramá, San.). Measure; true and certain perception in philosophy.——*Prameyam* (प्रमेय - praméya, San.). From (above + méya, san. measurable). Measurable or ascertainable. An object of certain knowledge. A topic of the Nyauyam [q.v.] philosophy, by which is meant all the objects or subjects of pramay or right measure, those about which correct knowledge is to be obtained. These, are twelve in number, viz., soul, body, objects of sense, understanding or intellection, mind, activity, faults, transmigration, consequences, pain, and emancipation.——*Pranaumam* (प्रणाम - pranáma, San.). From (above + nam, san. to bow down). Prostration or respectful salutation before an idol or a superior. Compare Namascauram.——*Pranavam* (प्रणव - pranava, San.). From (pranu, san. to utter). The mystical syllable om [gayatry, om].——*Pranyay* (प्रज्ञा - praňá, San.). From (above + ňá, san. to know). Intelligent soul. That by which the properties of things are known. There is a Tamul saying:—பிரஞ்ஞையே ஞானம், ஞானமே பிரமம்—" intellect is wisdom [nyaunam], and wisdom is

bramh [q.v.]."——*Prapuncham* (प्रपञ्च - prapañcha, San.). From (prapach, san. spread). Extent, expanse, the world; so error, illusion [mauyay].——*Prasaud* (پرشاد - prashád, Hind.). From (above + sad, san. to sit). Favor. Hindoo third name; also suffix in proper names as Balaprasaud, Shivaprasaud [peyar].——*Prasaudam* (प्रसाद - prasáda, San.). From (above + sad, san. to settle); soothing. Propitiatory offering. Boiled rice or anything which, having been offered to an idol [poojah, shilay, vigraham], is given to the people; all castes and strangers may eat prasaudam. See vol. I (80). Hindoo 2nd or pers. name, common among non-bramins [peyar].——*Prasiddham* (प्रसिद्ध - prasiddha, San.). From (above + sidh, san. to go). Advertisement.——*Prasritam* (प्रसृत - prasrita, San.). From (prasri, san. to flow onwards). Contents of two palms [anjaly] joined. Liquid measure. 2 pollums = 1 prasritam; 2 prasritams = 1 coodavam [alavay, 4f]. Approximate actual value, 1 prasritam = 14 cubic inches. Compare Mal. oory, Tam. olluck.——*Prastam* (प्रस्थ - prast'ha, San.). From (prast'ha, san. to place before). Measure of capacity. 4 coodavams = 1 prastam; 4 prastams = 1 audhacam [alavay, 3f]. Approximate actual value, 1 prastam = 105 cubic inches. Compare Puddy, Yedanguly.——*Pratamah yecaudashy* (ప్రథమైకాదశి - pradhamaikádashi, Tel.). Means first + eleventh. Lunar [chaundramaunam] festival [pundigay, 3e], subject to intercalation [adhicam]. The eleventh day [tity] of the waxing moon [shooclapacsham] of the third lunar month Jyeshtam [mausam] between 25th May and 24th June. First Yecaudashy of Vishnoo's slumber. Otherwise Toly yecaudashy, Shayana yecaudashy. From Vishnoo's sleep on that day for four months, till he rises at Ottaunaicaudashy in Caurteecam. Strict fast [maryauday, oopavausam].——*Pratamay* (प्रथमा - prat'hamá, San.). The first. The first day [tity] in a lunar fortnight [pacsham]. Pratama chauram, from (chára, san. motion), is the ascensional difference of the first sign [raushy] of the hindoo tropical zodiac [raushy chuckram]; the same for the sun's declination [craunty] and amplitude [agram]. Pratama tity, from (tit'hi, san. lunar day), is the first tity or lunar day in the half month; that which always follows the day of last conjunction [sangamam] or opposition [amavausyay, jyotisham, powrnimay].——*Prataupam* (प्रताप - pratápa, San.). From (tap, san. to burn). Power. There were two rulers called Prataupa roodra deva in the Ganapaty [q.v.] line of Warrangal. The first extended his kingdom towards the south as far as Nellore; conquered the Rajah of Devagherry, whose daughter he married; patronized learning; built cities and pagodas [q.v.]. The second, his grandson, known to Mahomedan historians as Ludder deo, who succeeded the interregnum of Roodramma, in 1295, was virtually the last of the line. Taken prisoner and sent captive to Delhi in 1323, subsequently released and returned to Warrangal where he died. Vol. I (132), (151). Another of this name was king of Orissa, 1504 to 1532. Extended his conquests as far as Cape comorin; captured Vizianagram on the way. His reign was marked by theological discussions as to Booddhist [booddha] and Braminical religions; and he was finally converted to Veishnavite faith by the reformer Cheitanyan. Hence the fane of Srisheilam [charitram].——*Prataup sing* (پرتاپ سنگھ - partápsingh, Hind.). Name + third name. Rajah of Tanjore 1749-1765. Wrested the kingdom from his brother Sahojee with the aid of the English to whom he ceded Devicottah. By the treaty of 1762, acknowledged the sovereignty of the Nawaub of Arcot, and agreed to pay an annual tribute of four lakhs [charitram]. See vol. I, 50.——*Praucauram* (प्राकार - prákára, San.). From (above + krí, san. to disperse). Enclosure; rampart; corridor [pradacshinam] of a temple [coil].——*Prauchy* (प्राची - práchí, San.). From (pra, san. before + añch, san. to bend). Turned before. East [poorvam].——*Prauchya* (प्राच्य - práchya, San.). Eastern people. Greek πράσιοι.——*Prauk* (प्राक् - prák, San.). From (above + añch, san. to bend). Front, prior. Prauk chuckram is the epicycle on which ancient astronomers corrected the precessional variation [ayanaumsham, craunty pauta gaty, paridhy].——*Prauna calay* (प्राणकला - pránakalá, San.). From (prána, san. breath + kalá, san. part), measure of time by respiration [praunam]. A measure of solar time in which a word of two letters as 'ta' can be uttered ten times neither very quickly nor very slowly. 10 caushta calays or indian second = 1 prauna calay; 6 prauna calays = 1 vicalay or indian minute [caulam, 6]. Approximate actual value, 1 prauna calay = 4 english seconds. The 'ta' itself will then be ·4 or ⅔ths of a second; with which compare calculation of the beats of a chronometer by five beats in 2 seconds. The 'ta' is sometimes divided into eye-twinklings.

——*Prauna lingam* (प्राणलिङ्ग - pránalinga, San.). Life lingam, or lingam [q.v.] worn on the person by a lingayet [q.v.].——*Praunam* (प्राण - prána, San.). From (pra, san. prefix + an, san. to breathe). Life. Breath, inspiration, vital actions. Also vital air or principle. The Vedantists [vedauntam] allege that Praunam is Braumh [q.v.], and that it is absorbed into Bramh during profound sleep while a man sleeps without dreaming that his soul is with Bramh. For the five vital airs or principles see Puncha praunam. Praunavaty is colloquial for praunahooty an indispensable ceremony among bramins in daily life; for more information see Puncha praunahooty.——*Praunauchauram* (प्राणाचार - pránáchára, San.). From (prána, san. breath + áchára, san. observance). A mode of invoking the blessings of the deity. Women who have no offspring, go after their bath to the temple and lie on the ground with their head turned towards the idol [shilay, vigraham].——*Praundyaumam* (प्राणायाम - pránáyáma, San.). Breathing in a peculiar way through the nostrils during the mental recitation of the names or attributes of some deity.——*Praurtanay* (प्रार्थना - prárt'haná, San.). From (above + art'h, san. to request). Request, prayer, an offering, a vow.——*Prauvidayanaur* (பிராவிடையனாறு - pirávidaiyanáru, Tam. právidayanár*). From (pirávidaiyan, tam. proper name + áru, tam. river). River; Tanjore dist. Takes its source in eastern part of Nunnilam talook and passing through Caricaul territory empties itself into the sea.——*Prauyaschittam* (प्रायश्चित्त - práyashchitta, San.). From (práya, san. sitting down and fasting + chitta, san. mind). Expiation for forbidden and evil acts. A man who for any forbidden act is put out of caste can re-enter only by prauyaschittam.——*Pravachanam* (प्रवचन - pravachana, San.). From (above + vach, san. to speak). The Vedaungams [q.v.] are so called.——*Pravartacan* (प्रवर्तक - pravartaka, San.; பிரவர்த்தகன் - piravarttagan, Tam.). From (above + vrit, san. live). A trader.——*Pravauham* (प्रवाह - praváha, San.; பிரவாகம் - pirávágam, Tam.). From (above + vah, san. to carry). A flood.——*Praverty* (പ്രവൃത്തി - pravritti, Mal.). From sanscrit. Means employment. Hence village. Praverticauran is a subordinate revenue officer having charge of the collections of one or more villages [chundracaur, parbutty].——*Prayogam* (प्रयोग - prayóga, San.). From (above + yuj, san. to unite). Instructions for particular rites. Manuals of modern date.——*Prowdham* (प्रौढ - praudha, San.). From (above + vah, san. to proceed); advanced. Bold. Prowdhadeva was a Rajah of Vijianugger of the Harihar dynasty. A.D. 1476. See vol. I (58).

PRATI (प्रति -prati, *San.*). Prefix meaning again, against.——*Pratibimbam* (प्रतिबिम्ब - pratibimba, San.). From (prati, san. against + bimba, san. picture). Reflection.——*Pratiloma* (प्रतिलोम - pratilóma, San.). From (above + lóma, san. hair on the body). Against the hair. That is, read or repeated backwards [anooloma]. Irregular or unusual, as a marriage wherein the husband is inferior to the wife. Pratilomaja is born in the inverse order of the classes from men of inferior castes carrying on commerce with women of superior caste; these are:—"*a*" born of a Cshatriya father and Bramin mother and known as Sootan;—"*b*" born of a Veisya father and Bramin mother and known as Veidyan;—"*c*" born of a Shoodra father and Bramin mother and known as Chandaulan;—"*d*" born of a Veisya father and Cshatriya mother and known as Maugadhan;—"*e*" born of a Shoodra father and Cshatriya mother and known as Cshautry;—"*f*" born of a Shoodra father and Veisya woman and known as Ayogavan. See vol. I (64).——*Pratinyay* (प्रतिज्ञा - pratiñá, San.). From (prati, san. against + ñá, san. to know). Promise, resolution.——*Pratisargam* (प्रतिसर्ग - pratisarga, San.). From (above + srij, san. to create). Recreation; one of the five topics which every pooraunam [q.v.] is supposed to treat of. The other four are sargam, vamsham, manwantaram, and vamshaunoocharitam.——*Prativaudy* (प्रतिवादी - prativádí, San.). From (above + vad, san. to speak). Defendant, opponent or replicant [yethiry].——*Pratyacsham* (प्रत्यक्ष - pratyaksha, San.). From (above + akshi, san. eye). Present before the eyes; perception by the senses; one of the four processes, according to Nyauyam [q.v.] philosophy, by which the mind arrives at true and accurate knowledge. The other three are anoomaunam or inference, oopamaunam or comparison, and shabdam or verbal testimony or authority.——*Pratyauhauram* (प्रत्याहार - pratyáhára, San.). From (above + áhára, san. drawing). Drawing back or restraining. Restraint of the organs of senses [indriyam]. The fifth stage of the yogam [q.v.] practice.——*Pratyoottaram* (प्रत्युत्तर - pratyuttara, San.). From (above + uttara, san. reply). Rejoinder [oottaram].

PREMEIRA (ಮುಲ್ಕಿಬಂಡೆ - múlkibande, *Can.*). Can. means moolky rocks. Rocks; South canara dist., Mangalore tal.; lat. 13° 05'; long. 74° 50'; from Mangalore N. 16 miles [moolky]. See vol. II, 146.

PRICKLY (கூறு - kúru, *Tam.*). Prefix.——*Prickly-heat* (دھوپ پیلیاں - dhúpeliyán, Hind.; ಬೆವರುಸಾಲೆ - bevarusále, Can.; చెమటకాయ - chematakáya, Tel.; വേർക്കുരു - vérkkuru, Mal.; வேர்க்குரு - vérkkuru, Tam.). Hind. from (dhúp, hind. sunshine). Can. from (bevaru, can. perspiration + sálu, can. a line). Tel. from (chemata, tel. perspiration + káya, tel. eruption). Mal. and tam. from (vér, Tam. sweat + kuru, tam. pricking). Lichen tropicus of physicians. A cutaneous rash. Natives use a paste of sandal-wood [q.v.] to alleviate it.——*Prickly-pear* (नागफणी - nágap'haní, San. and Mahr.; कांट्यानिवलि - kántyánivali, Conc.; ناگ پھنی - nágphaná, Hind.; چپل سینڈ - chappalsend, Dec.; ಮುಳ್ಳುಕಳ್ಳಿ - mullukalli, Can.; జెముడు -

kalli, Too.; నాగజెముడు - nágajemudu, Tel.; നാഗമുള്ള - nágamullu, Mal.; කටුපතුක් - katupatuk, Singh.; நாகதாளி - nágathálí, Tam.). Title from leaves and fruit like pear [amrood]. San. from (nága, san. cobra + p'hana, san. hood); from leaves like snake hood. Conc. means prickly cactus. Hind. from sanscrit. Dec. from (chappal, hind. slipper + send, hind. euphorbia); from its appearance. Can. from (mullu, can. thorn + kalli, can. milk-hedge). Tel. from (nága, san. cobra + jemudu, tel. euphorbia tirucalli, linn.). Mal. fróm (nága, san. cobra + mullu, mal. thorn). Singh. from (katu, singh. thorny + patuk, singh. euphorbia nereifolia, linn.). Tam. from (nága, san. cobra + táli, tam. convolvulus); leaves like cobra hood. San. also (vidára), meaning tearing asunder; (vishvasáraka), meaning having all essence. Can. also (dabbagalli), meaning big + milk-hedge; (sivarámakalli); (pápásukattále), meaning shoe + aloe indica, royle. Mal. also (nágatáli), meaning cobra creeper; (palakakkalli), meaning plate + the plant, euphorbia. Singh. also (kodugaha). Tam. also (shappáttumul), meaning european shoe + thorn; (palagaikkalli), meaning plate + euphorbia tirucalli, linn.; (shappáttuççedi), meaning european shoe + plant; from shape of leaves. Title otherwise Cochineal fig, Hedge prickly pear, Indian fig, Nopul, Oblong indian fig, Plate-leaf milk hedge, Slipper milk hedge, Slipper thorn, Snake-hood fig. Called by the portuguese Palmatoria d' inferno, from the resemblance of its flat branches to a palmatoria, or flat piece of wood used in schools to beat children upon the hand. Botanically Opuntia dillenii, haw., cacteæ [vricsham, 65]. Alias Cactus dillenii, indicus; Opuntia tuna. A plant of south america naturalized; bears large, bright, yellow flowers, two inches in diameter; stems when young fleshy and nearly flat, but in age become cylindrical, hard, and branched. Fruits are pear-shaped [amrood], 2–3 inches, green, yellow, or red; stand erect on the margins of the thick fleshy leaf-like joints of the stem; contain a somewhat refrigerant and highly refreshing pulp. The plant is very apt to spread from the fact that birds which eat the fruits cannot digest the hard seeds; in its growth however it has a distinct preference for waste arid soils that will grow nothing else, and it does not flourish freely on rich well-cultivated land; owing to the immense tracts of country now covered with prickly-pear various attempts have been made to get rid of it or to utilise it for industrial purposes; under the former head tree seeds have been sown among the prickly-pear, so that in the first place the cactus may act as nursery to the seedlings, protecting them from the sun and browsing animals, and afterwards the trees growing up may shade the cactus itself so as to destroy it; in dry rainless regions this experiment has failed, elsewhere it has had some success; from the severe pain its prickles occasion, its vitality, and the rapidity of its growth it is a very troublesome plant to actually eradicate; when this is attempted, it is cut with long spuds or with knives attached to sticks; if left on the ground it very soon begins to grow again, and must therefore be destroyed by water or fire; for destroying by water put it into a rather shallow pool and sink it to the bottom with stones, in 24 hours the water will begin to get thick and muddy, in two days it smells sour, on the third day a scum rises and the whole substance of the prickly-pear is decomposed, it then makes good manure and will not grow or vegetate; for destroying by fire, cut a number of the shrubby plants that usually accompany it, spread these over the ground to the height of a foot or two, lay the prickly-pear on the top, and leave the pile to dry for some days, then set fire to the heap; if too much of the prickly-pear be piled up, it will require a second firing; potash may be prepared from the ashes. Natives esteem the fruit as a remedy in whooping cough and asthma; its action is due to the soluble malate of manganese contained. On cutting open the thick succulent rind of fruit, a jelly-like pulp is found, which, though of little flavor, is cool and refreshing; village children are adepts at extracting it; it contains a large hard flat black thorn, which has to be rejected before putting in mouth; fruit and tender shoots eaten during famines; the cochineal [kirmiz] insect of south america thrives on this. Fibre gives a paper material; as hedge plant prickly-pear is both impenetrable and uninflammable; the unrestrained growth of the plant around villages which generally arises from its employment is however very inimical to sanitation, the close growth of the flat jointed stems which branch out in every direction making it difficult to keep the ground underneath free from decaying vegetation; these hedges moreover harbour reptiles. No other common species here.

PRITIVY (पृथिवी - prit'hiví, *San.*). From (prithu, san. wide). The earth; Cybele. The earth, the first of the elementary substances [bhootam], is of two kinds; eternal and non-eternal. Eternal in the form of Paramaunoo [q.v.] roopam or atoms, non-eternal in the form of Caurya roopam or products. The non-eternal character of aggregated earth is shown by the want of permanence in a chatty [q.v.] when crushed to powder. Hindoo 2nd or pers. name [peyar].——*Partasauraty* (पार्थसारथि - párt'hasárat'hi, San.). From (párt'ha, san. arjuna, son of prit'há + sárat'hi, san. a charioteer). Krishnan [q.v.], because he acted as the charioteer of Arjoonan [q.v.] at the chief battle of the Mahabhaurat [q.v.], between the Cowrava and Pandava princes. This is the name of a deity at the Vishnoo temple in Triplicane, Madras. Hindoo 2nd or pers. name, chiefly among the Veishnavites [peyar].——*Parteshwaran* (பார்த்தேசுவரன் - párttésuvaran, Tam.). From (párt'ha, san. arjuna, son of prit'há + íshvara, san. lord); arjoonan, the lord. Hindoo 2nd or pers. name [peyar].——*Paurtan* (पार्थ - párt'ha, San.). From (prit'há, san. kuntí, the extender); born of coonty, one of the wives of pandoo [q.v.]. Arjoonan.

PRIYAM (प्रिय - priya, *San.*). From (prí, san. to please). Love.—"*a*" Plant first term. Loveable or good. Ex., where transl. is of second term:—Panicum italicum (priyangu), parts; Prosopis spicigera (priyadarshiní), looking. See gloss. paragraphs.—"*b*" Plant second term. Dear to or liked by. Ex., where transl. is of first term:—Albizzia lebbek (munipriya), sage; Andropogon muricatus (ranapriya), battle; Commelyna communis (vatsapriya), calf; Curcuma longa (yóshitpriya), woman; Mangifera indica (nripapriya), king; Melia azadirachta (ravipriya), sun; Musa paradisiaca (bálakapriya), boy; Tinospora cordifolia (bhishakpriyá), physician; Zizyphus napeca (shikhipriya), peacock. See gloss. paragraphs.——*Piyah* (پيا - piyá, Hind.). From (prí, san. to love). Lover.——*Piyal* (प्रियाल - priyála, San.; پيال - piyál, Hind.). Means desired. Same as Wild mohwah.——*Piyauree* (پياری - piyárí, Hind.). Dear. In composition makes a lacab; as Piyauree begum, dear lady [ism].——*Priyadarshy* (प्रियदर्शी - priyadarshí, San.). From (above + drish, san. to see). Means kindly looking. An epithet of Asoca [jowgada].——*Priyangoo* (प्रियंगु - priyangu, San.). From (priya, san. pleasing). Panic grass, Panic millet. Botanically the Panicum genus, graminaceæ [vricsham, 156]. Grasses found in tropical and sub-tropical regions, distinguished by having spikelets of two flowers, one perfect and the other imperfect; constitute the principal fodder-grasses. The species best known to the natives are:—antipodum [wild small shaumay], burmanni [wild hurrially], ciliare [trembling tinay], colonum [matted purple grass], crusgalli [wild darbhay], egyptiacum [red shaumay], erucæforme [small raggy], flavidum [purple grass], fluitans [paddy field grass], frumentaceum [large shaumay], glaucum [white tinay], grossarum [cumboo grass], helopus [quilled purple grass], helvolum [jackal tinay], indicum [black tinay], italicum [tinay], javanicum [surprise grass], jumentorum [guinea grass], miliaceum [varagoo], miliare [shaumay], paludosum [soda grass], prostratum [wild white shaumay], remotum [wild varagoo], repens [ginger grass], stagninum [large purple grass], uliginosum [goondra grass], verticillatum [sticky grass]. Other s. indian species indigenous or naturalized are:—acuminatissimum, æquatum, asperum, brachyglume, canaliculatum, canaræ, cimicinum, conjugatum, corymbosum, courtallense, curvatum, dilatatum, dubium, elatius, interruptum, kunthianum, lanceolatum, leptochloa, mangaloricum, megalanthum, metzii, montanum, multibrachiatum, nepalense, nilagiricum, nodibarbatum, oxyphyllum, peninsulanum, roxburghii, serrulatum, tenue, tomentosum, trigonum, wallichianum.

PRODDOOTORE (ప్రొద్దుటూరు - prodduturu, *Tel.* proddutur*). From (proddu, tel. sun + úru, tel. village), town of the sun, from a legend concerning its foundation.——**(1)** Talook, Cuddapah district. Tahsildar's pay Rs. 175. Area 478 square miles. Population 98,418. Language Teloogoo. N. of district. Bounded north by Sirwail talook of Kurnool district; east by the Nullamullays and Budwail talook; west by Jummalmadoogoo talook; south by the Pennair and Cuddapah talook. Physical aspect flat, treeless and uninteresting, on the east however the talook is bounded by the Nullamullay hills. The Nullamullays are nearly bare. The principal soil is black cotton [regar]. Cotton [q.v.] is the principal product. In the valley of the Pennair dry grains [q.v.] and rice [q.v.] are raised by means of channels [q.v.]. Indigo [q.v.] is largely grown, frequently adulterated with mud. The Kurnool-cuddapah irrigation and navigation canal runs through the talook. There are 25 tanks, 19 channels, and 900 wells, private and dasbandam [q.v.]. Camping grounds are at Chilmacore, Chintalaconda, Doovvoor and Meidcore. Places of archæological interest:—Allaudpulley, Arcativaimla, Bollavaram, Caumanore, Chilmacore, Chiyyapaud, Cootsoopaupa, Corrapaud, Cottapully, Doovvoor, Gopavaram, Jillella, Mauchenapulley, Maulepaud, Neelapooram, Nidzoovvy, Payidela, Peddashettipully, Proddootore, Pullavole, Rameshwaram, Sowdore, Taullamaurepooram, Tondaldinney, Tungatore. The leading places, &c., in the talook are the following.——*Bollavaram* (బొల్లవరం - bollavaram, Tel.). From (bollu, tel. chaff + pura, san. town). Village; pop. 1,632; acres 2,876; lat. 14° 46'; long. 78° 34'; from Cuddapah N.W. 27 miles; from Proddootore W.N.W. 1¾ miles. Inscription of Vijianugger dynasty in Vengopaulsawmy temple.——*Chilmacore* (చిలమకూరు - chilamakúru, Tel.). From (chelama, tel. a spring in a river bed + úru, tel. village). Village; acres 9,420; lat. 14° 39'; long. 78° 31'; from Cuddapah W.N.W. 26 miles; from Proddootore S.W. 9 miles. Lies in a plain bounded on each side by low ridges of hills, and surrounded by ruined walls said to have been built by Shuncary yogeysheshappa, a Bramin. Ancient temples to Eeshwaran [q.v.] and Hanooman [q.v.]. Inscription of Vijianugger. Inhabitants principally Coonbies [q.v.], pursuing agriculture. Mounds of old salt manufactures, used during the Pataun government, still to be seen on the banks of the rivulet crossing the plain.—

Coondair (కుందేరు - kundéru, Tel.). See sep. title.——*Doovvoor* (దువ్వూరు - duvvúru, Tel.). From (duvvu, tel. a leopard + úru, tel. village). Village; pop. 3,003; acres 6,779; lat. 14° 51′; long. 78° 42′; from Cuddapah N.N.W. 29 miles; from Proddootore N.E. 10 miles. Former talook head-quarters, and seat of a Moonsif's court. Deserted on account of its unhealthiness. Battle fought here in 1779 between Hyder ally and the Nawaub of Cuddapah. Old temples and a mosque [musjid]. Dismantled fort with a ditch. West is a temple of Ramasawmy, with inscription dated A.D. 1619. Here is a standard "peimash chain" marked by two stones that distance apart, one of which bears an inscription.——*Meidcore* (మైదుకూరు - maidukúru, Tel.). From (médi, tel. fig tree, ficus racemosa, linn. + úru, tel. village). Village; pop. 3,264; acres 6,710; lat. 14° 44′; long. 78° 47′; from Cuddapah N.N.W. 18 miles; from Proddootore E. 12 miles. Small temple to Shiva.——*Nidzoovvy* (నిడుజువ్వి - nidudzuvvi, Tel.). From (nidu, tel. long + dzuvvi, tel. shining leaved fig tree, ficus tsiela, roxb.). Village; pop. 1,893; acres 4,435; lat. 14° 39′; long. 78° 33′; from Cuddapah W.N.W. 24 miles; from Proddootore S.S.W. 8 miles. 2½ miles S.W. of Yerragoontla railway station. Noted for block limestone [choonam cull] quarries, largely worked for export to Madras for use and in the district. Inscriptions in the temples of Bheiraveshwarasawmy, Chandikeshwarasawmy, and Vigneshwarasawmy. The first, dated A.D. 1545, records a grant by Rama rajah chinna timmayyadeva maharajah, in the reign of Sadaushivan of Vijianugger. The second is dated A.D. 1206. The third, dated A.D. 1548, records a grant by Chinna timmayyadeva maharajah, son of Rama rajah, in the reign of Sadaushivan.——*Nullamullay* (నల్లమల - nallamala, Tel.). See sep. title.——*Nundyailampett* (నంద్యాలంపేట - nandyálampéta, Tel.). From (nandi, san. the bull god + álaya, san. temple + péta, tel. suburb). Village; pop. 3,533; acres 12,532; lat. 14° 44′; long. 78° 51′; from Cuddapah N. 17 miles; from Proddootore E. 17 miles. Former head-quarters of a District moonsif, whose office is now used as a police station. Near are some topes [q.v.]. Indigo [q.v.] formerly manufactured. High hills all round; on top of one group called Mookkondaloo is a little temple, near it is an unfinished well.——*Peddashettipully* (పెద్దశెట్టిపల్లి - peddashettipalli, Tel.). From (pedda, tel. head + shetti, tel. merchant + palli, tel. village). Village; pop. 2,952; acres 5,675; lat. 14° 46′; long. 78° 33′; from Cuddapah N.W. 29 miles; from Proddootore W.N.W. 3 miles. Noted for limestone quarries, largely worked. Two old temples of Keshava sawmy and Eeshwaran.——*Pennair* (పెన్నేరు - pennéru, Tel.). See sep. title.——*Proddootore* (ప్రొద్దుటూరు - proddutúru, Tel.). See below.——*Rameshwaram* (రామేశ్వరము - rámésh-varamu, Tel.). From (ráma, san. the god + íshvara, san. lord). Village; pop. 3,443; acres 3,420; lat. 14° 45′; long. 78° 35′; from Cuddapah N.W. 26 miles; from Proddootore W. 1 mile. Bramin suburb of Proddootore. Large Shiva temple.——*Tippareddipully* (తిప్పారెడ్డిపల్లి - tippáreddipalli, Tel.). From (tippáreddi, tel. proper name + palli, tel. village). Village; pop. 1,065; acres 24,456; lat. 14° 52′; long. 78° 50′; from Cuddapah N. 26 miles; from Proddootore E.N.E. 17 miles. Former residence of a poligar.——*Tungatore* (తంగటూరు - tanga-túru, Tel.). From (tangu, can. to halt + úru, tel. village). Village; pop. 2,539; acres 5,871; lat. 14° 53′; long. 78° 39′; from Cuddapah N.N.W. 31 miles; from Proddootore N.N.E. 11 miles. On the Coondair.——*Wonipenta* (వనిపెంట - vanipenta, Tel.). From (vaní, san. forest + penta, tel. heap). Village; pop. 4,185; acres 5,361; lat. 14° 48′; long. 78° 50′; from Cuddapah N. 22 miles; from Proddootore E.N.E. 16 miles. Trade in brass vessels manufactured locally.——*Yerramala* (ఎఱ్ఱమల - yerramala, Tel.). See sep. title.——**(2)** Town, Talook and District moonsif's head-quarters; Cuddapah dist., Proddootore tal.; pop. 6,841; acres 3,848; lat. 14° 45′; long. 78° 36′; from Cuddapah N.W. 26 miles; from Madanapully N. 83 miles; from Madras N.W. 163 miles; from Sidhout W.N.W. 34 miles. Large and wealthy town with considerable commerce in indigo and cotton, rice, cloths and precious metals. European cotton press. Old fort.

PROLE (ప్రోలు - prólu, *Tel.*). Town. Suffix in place names [pole, vole, wail].

PROW (پراؤ - práú, *Malay*; പാറു - páru, *Mal.*). Title from (prau, jav. a boat). Malay word. A term for all vessels between a canoe and a square-rigged vessel.

PUCKA (پکا - pakká, *Hind.*). Through mahr. from (pakva, san. mature). Mature, complete, contrast in all respects of Cutcha [q.v.]. For instance planting seed thickly, betel-nut [q.v.] in a raw state, permanent building, &c., &c. Pucka puddy is opposed to chinna puddy, pucka seer to cutcha seer.

PUDDY (پڑی - parí, *Hind.*; படி - padi, *Tam.*). From (padi, tam. to settle). Means a regulated measure; also allowance.—"*a*" Measure of capacity. 4 oyaks = 1 puddy; 8 puddies = 1 mercaul [alavay, 3a]. Approximate actual value, 1 puddy = 100 cubic inches and holds 120 tolah's weight or 3 lbs. $1\frac{29}{78}$ oz. of rice. Varies in different places. The ratio of imperial quart to puddy is 34,659 to 50,000. The puddy is the same for grains as for liquids. Compare Yedangaly, Seer of cuddapah.—"*b*" Superficial measure. Land requiring a puddy of seed. 8 puddies = 1 mercaul [alavay, 2a]. Approximate actual value, 1 puddy = 420¼ square feet. Tinnevelly. Same as Nauzhy. Compare Yedangaly. See vol. I, 609; II, 506, 507, 509, 514, 515, 518, 519.——*Paudam* (പാടം - pátam, Mal.). An oil vessel. Liquid measure. 16 cootties = 1 paudam [alavay, 4d]. Approximate actual value, 1 paudam = 1 cubic foot and 1,002 cubic inches. Malabar. Compare Calam of Tanjore. See vol. I, 609.

PUGGRY (پگڑی - pagrí, *Hind.*; ಪಗಡಿ - pagadi, *Can.*; పాగా - págá, *Tel.*; பாகை - págai, *Tam.*). A turban [q.v.]. A narrow scarf folded round the head to form a head-dress. Usually of a fine muslin-like [muslin] texture which, when folded, is at once light, bulky, and porous. Of materials, cotton [q.v.] occupies the first place, being a non-conductor and permitting escape of perspiration. Silk [puttoo] used to some extent by the higher classes. Wool [pushm] not often used, but sometimes in the form of small shawls [q.v.]. The caste frequently determines the size and shape of the turban [q.v.]. White is the commonest color. Red next, then yellow, and after these green, blue, purple, and occasionally even black; the darker colors being relieved by embroidery. Among turbans made of silk, there are buffs, shots, and greys. The turban unfolded consists of a strip of cloth varying in breadth from 9 to 12 inches, and in length from 15 to 25 yards. In the process of making up, the outer end is usually left free to hang down a little, or is turned up over the folds at the back when the tying is finished. In the simpler forms, colored thread is introduced into this free end as an ornament, in others gold in stripes [sarigay], varying in breadth from one-eighth of an inch to several inches. Sometimes the gold [pon], or other decorative medium, in addition to running across the end is made to extend longitudinally a little way up from the end, so as to be seen on the side of one or two of the last folds of the turban. In some instances again the embellishment is carried so far up that all the outer folds of the turban present it to view. Turban-pieces are undressed; size interfering with the lightness and openness of the article, and with the feel of the fabric. The following are Hindostany proverbs:—چراغ گل پگڑی غیب—"light put out, turban gone;" said of maladministration.—پگڑی رکھہ گھی چکھہ—"turban [q.v.] or honor keep, taste ghee [q.v.];" that is to say, honesty is the best policy. The Dravidian has really no national head costume, the head being naturally worn bare; a skull-cap with ear-flaps for children and old people is the only exception. The puggry or turban was borrowed from the mahomedans. The natives have an almost infinite variety of ways of tying the turban; thereby exhibiting some individuality as well as showing their caste. The following are different kinds of puggry distinguished by name.——*Amaumah* (عمامہ - amámah, Hind.). Means winding round the head. Worn by judges and doctors.——*Araby* (عربی - arabí, Hind.). Worn by Arabs.——*Baunky* (بانکی - bánkí, Hind.). Means curved. A turban [q.v.] adopted by the gay.——*Casauwah* (کساوا - kasává, Hind.). From (kasná, hind. to tie). Simple scarf tied round the head.——*Chuckridar* (چکریدار - chakrídár, Hind.). From (chakrí, hind. circular + dár, pers. holder). Circular, used by Hajees [q.v.].——*Coolah* (کلاہ - kuláh, Hind.; ಕುಲಾವಿ - kulávi, Can.; குல்லாய் - kulláy, Tam.). Means a crown. A cap worn by dervishes [q.v.].——*Goondidar* (گنڈی دار - gundídár, Hind.). From (gundí, hind. a stud + dár, pers. holder). Globular.——*Jodidar* (جوڑیدار - júrídár, Hind.). From (júrá, hind. top knot + dár, pers. holder). The hinder part resembles a hair knot [conday] of women tied behind.——*Khidkeedar* (کھڑکیدار - khirkídár, Hind.). From (khirkí, hind. opening + dár, pers. having). Chobdar's turban.——*Latpaty* (لٹپٹی - latpatí, Hind.). Means hanging loose. An irregular loose turban.——*Lattoodar* (لٹودار - lattúdár, Hind.). Top-shaped.——*Mandeel* (مندیل - mandíl, Hind.). From (mandá, hind. head). A silk or gold woven band applied over the turban.——*Mansabee* (منصبی - mansabí, Hind.). Worn by Mansabdars [q.v.] in Hyderabad.——*Masheikhy* (مشایخی - masháikhí, Hind.). Worn by Masheikhs [q.v.].——*Moorassa* (مرصع - murassa, Hind.). From (rasa, ar. adhere). A short turban closely tied.——*Nastalik* (نستعلیق - nastalík, Hind.). A small round turban and closely fits the head. Durbar [q.v.] turban.——*Pethah* (پیٹھا - pethá, Hind.). Means a gourd. Worn by Mowlvies [q.v.].——*Saitee* (سیٹھی - sethí, Hind.). Used by bankers.——*Shamla* (شملہ - shamlah, Hind.). Turban made up of square shawl pieces; also end of a turban left hanging behind by ecclesiastics.——*Sipar e ally* (سپر علی - sipariálí, Hind.). From (sipar, pers. shield + alí, ar. name of the companion of the prophet).——Broad like shield worn by the Shiahs [q.v.].——*Tauj* (تاج - táj, Hind.). Means a crown. A conical cap.——*Teencony* (تین کونی - tínkoní, Hind.). Three-cornered, which Tippoo sultan used to wear.——*Topee* (ٹوپی - topí, Hind.; தொப்பி - toppi, Tam.). From (topná, hind. to cover). Cap worn underneath a turban.

PULLADAM (பல்லடம் - palladam,* *Tam.*). From (palli, tam. a member of the caste + idam, tam. place) [padoo].——**(1)** *Talook, Coimbatore district. Tahsildar's pay Rs. 225

Area 741 square miles. Population 270,390. Language Tamul. Centre of district. Bounded N. by Suttimungalam talook, E. by Erode and Dharaupooram talooks, S. by Oodamalpett, Pollachy and Dharaupooram talooks, and W. by Coimbatore talook. A flat plain, having neither hills nor forests. The Noyil bisects it, and, with the exception of the Nullaur a jungle stream, is its only river. The climate is hot and rainless. The wind is furious, but fairly cool in the south-west monsoon [q.v.], as the talook lies opposite to the Palghaut gap. Soils are black cotton [regar], chiefly in the south and south-west, with conglomerated calcareous tufa in parts bordering on Dharaupooram. About Pulladam and northwards to Avanashy and Shaivore the soil is chiefly reddish gravel. Near the railway from Mungalam to Shoolore are rich tracts of red loam [sevval] and red sand [manal], with occasionally black and reddish-black tracts. A peculiar kind of sheep [aud] known as cooroombaud [q.v.] are reared. Characterized by having white bodies and black heads, and a true wool [pushm] instead of hair; these are always tended by Coorumba [q.v.] shepherds, whose females weave the wool into coarse blankets [cumbly]. The yield of wool is very small. Industries other than those of blanket [cumbly, jamkhana] weaving and cotton [q.v.] pressing are unimportant. Good spectacles of pebble are made by lapidaries at Moottampolliem; these also work the crystals [palingoo cull] into lingams [q.v.] and other vigraham [q.v.]. Products are wholly rural produce. Dry crops [dry grain] are cholum [q.v.], cotton [q.v.], horse-gram [q.v.], bullock-gram, and cumboo [bajrah], and pulses [dholl]. Garden crops [tottacaul] are cholum [q.v.], raggy [q.v.], chillies [q.v.], onions [piyauz] and tobacco [pogauk]. Wet crops [q.v.] are paddy [q.v.], sugar-cane [q.v.] and turmeric [country saffron]. Only 1·06 per cent. of the occupied area falls under the head of irrigated. There are thirteen dams across the Noyil, but the supply is generally scanty. Anicut channels [q.v.] lead directly from the river. The Nullaur, a tributary of the Noyil, rising in the uplands in the neighbourhood of Annoor in Coimbatore talook, is utilised to some extent, but is a precarious source. The petty tanks are dependent on rainfall [mazhay, monsoon] and surface drainage. Spring channels [q.v.] used to be dug in the Noyil bed. Camping grounds:—Avanashy, Caroomuttamputty, Chinnayampolliem, Covilpolliem, Pulladam, Shoolore, Tirpore. Places of archæological interest:—Aulatore, Avanashipolliem, Avanashy, Candyancovil, Caniyampoondy, Canjipully, Moottanampolliem, Mungalam, Nadoovacherry, Peroongarnaipolliem, Poodarsal, Shaivore, Shauvadipolliem, Shoolore, Tirmoorganpoondy, Vailampolliem. Principal trig. stations:—Alagoomullay, Vediyapolliem. The leading places, &c., in the talook are the following. ——*Alagoomullay* (அலகுமலை - alagumalai, Tam.). From (alagu, tam. blade of a weapon + malai, tam. mountain). Village; pop. 2,995; acres 4,576; lat. 11° 01′; long. 77° 29′; from Coimbatore E. 32 miles; from Pulladam E. 11 miles. Small temple to Soobramanyasawmy on the Alagoomullay hills and a camping ground in Covilpolliem, a hamlet of the village. Trig. station; lat. 11° 00′ 48·03″; long. 77° 28′ 48·08″; height 1,353 feet; from Alagoomullay N. ½ mile; from Pulladam E.N.E. 11 miles.——*Avanashipolliem* (அவனாசிப்பாளையம் - avanásippálaiyam, Tam.). From (avanási, tam. village of that name + pálaiyam, tam. fortified village). Village; pop. 3,151; acres 6,378; lat. 10° 58′; long. 77° 29′; from Coimbatore E.S.E. 32 miles; from Pulladam E.S.E. 10 miles. Old Shiva temple. Vishnoo temple both in the hamlet of Codoovye. In the hamlet of Poothoopolliem another old Shiva temple.——*Avanashy* (அவனாசி - avanási, Tam.). See sep. title.——*Caradibauvy* (ಕರಡಿಬಾವಿ - karadibávi, Can.; கரடிப்பாவி - karadippávi, Tam.). From (karadi, can. bear + bávi, can. well). Village; pop. 1,813; acres 3,112; lat. 10° 58′; long. 77° 14′; from Coimbatore E.S.E. 16 miles; from Pulladam W.S.W. 6 miles.——*Caravalore* (கறவலூர் - karavalúr, Tam.). From (karavai, tam. a milch cow + úr, tam. village). Village; pop. 1,845; acres 2,956; lat. 11° 13′; long. 77° 14′; from Coimbatore N.E. 22 miles; from Pulladam N.N.W. 16 miles. Famous Mauriyamman [q.v.] temple. Car festival [ratotsavam] in February or March, during which large cattle [maud] fair. Large weekly fair.——*Caroomuttamputty* (கருமத்தம்பட்டி - karumattambatti, Tam.). From (karu, tam. black + úmattai, tam. thorn apple, datura fastuosa, linn. + patti, tam. cattle-fold). Village; pop. 3,640; acres 6,619; lat. 11° 07′; long. 77° 14′; from Coimbatore E.N.E. 17 miles; from Pulladam N.W. 11 miles. On trunk road to Madras. Ancient Roman catholic settlement, with Roman catholic chapel built in 1660.——*Mondipolliem* (மொண்டிப்பாளையம் - mondippálaiyam, Tam.). From (mundi, tam. to shave the head + pálaiyam, tam. fortified village); place where people shave their heads and perform vows. Village, Place of pilgrimage; pop. 708; acres 1,097; lat. 11° 17′; long. 77° 12′; from Coimbatore N.N.E. 24 miles; from Pulladam N.N.W. 22 miles. Famous Vishnoo temple. Twenty dolmens [codaycull] in a field. Devotees frequent on Saturdays in Poorataushy [mausam] or September and October.——*Mungalam* (மங்கலம் - mangalam,* Tam.). Means prosperity. Village, Railway station; pop. 1,726; acres 1,676; lat. 11° 07′; long. 77° 19′; height 1,052 feet; from Coimbatore E.N.E. 22 miles; from Pulladam N. 9 miles. Inhabited by Lubbays [q.v.], chiefly traders. Dolmens [coday cull], &c., a mile east.——*Neelambore* (நீலம்பூர் - nílambúr, Tam.). From (níla, san. black + ambu, san. water + úr, tam. village). Village; pop. 4,481; acres 5,965; lat. 11° 04′; long. 77° 08′; from Coimbatore E.N.E. 10 miles; from Pulladam W.N.W. 14 miles. Large ruined tank.——*Noyil* (நொய்யல் - noyyal, Tam.). See sep. title.——*Pulladam* (பல்லடம் - palladam, Tam.). See below.——*Shaivore* (சேவூர் - shévúr, Tam.). From (shé, tam. redness + úr, tam. village). Village; pop. 2,101; acres 1,483; lat. 11° 15′; long. 77° 17′; from Coimbatore N.E. 26 miles; from Pulladam N. 18 miles. Two old Shiva temples.——*Shumanore* (சோமனூர் - shómanúr, Tam. sómanúr*). Means soman's village. Village, Railway station, Hamlet of Caroomuttamputty; lat. 11° 06′; long. 77° 14′; height 1,121 feet; from Coimbatore E. 16 miles; from Pulladam N.W. 9 miles. Inhabitants Roman catholics.——*Shoolore* (சூலூர் - shúlúr, Tam. súlúr*). From (súle, can. dancing girl + úr, tam. village). Village, Railway station; pop. 4,713; acres 2,708; lat. 11° 03′; long. 77° 10′; height 1,182 feet; from Coimbatore E.N.E. 12 miles; from Pulladam W. 11 miles. Large chuttram [q.v.] by Maudayya rauz of Coimbatore during reign of Krishna rajah wodeyar of Mysore. Good tanks fed by the Noyil. Weekly market.——*Tirpore* (திருப்பூர் - tiruppúr, tam. tirupúr*). From (tiru, tam. holy + úr, tam. village). Village, Railway station; pop. 5,235; acres 2,137; lat. 11° 07′; long. 77° 23′; height 989 feet; from Coimbatore N.E. 28 miles; from Pulladam N.N.E. 9 miles. Car festival and large cattle fair in June. Good market. Bridge over Noyil. Cotton press. Good private chuttram [q.v.].——*Vediyapolliem* (வெடியப்பாளையம் - vediyappálaiyam, Tam.). From (vediyal, tam. explosion of gunpowder + pálaiyam, tam. fortified village). Trig. station; lat. 10° 55′ 18·26″; long. 77° 09′ 30·38″; height 1,467 feet; from Pulladam W.S.W. 13 miles; from Shelacaratchal W.S.W. 4 miles.——**(2)** Village, Talook head-quarters; Coimbatore dist., Pulladam tal.; pop. 1,190; acres 1,372; lat. 11° 00′; long. 77° 20′; from Coimbatore E. 22 miles; from Erode S.W. 38 miles; from Madras S.W. 248 miles; from Ootacamund S.E. 50 miles; from Pollachy N.E. 31 miles; from Suttimungalam S. 35 miles. Ruined fort. Two cotton [q.v.] presses. Weekly market.

PULMANAIR (పలమనేరు - palamanéru, *Tel.*; பலமனேரி - pallamanéri, *Tam.* palmanér*). From (pallaman, tam. proper name + éri, tam. tank) [padoo].——**(1)** Talook; North arcot district. Tahsildar's pay Rs. 150. Area 439 square miles. Population 48,135. Language Teloogoo. W. of district. Bounded west by Mysore; north by Poonganore; east by Chittore and Krishnagherry talook of Salem district. Upon Mysore plateau. General level nearly 2,500 feet. Some hills 3,000 feet. Chief are Beirapullycondah, Devarcondah, and Putticondah. Sparsely populated. Large extent of jungle land, but large trees confined to eastern portions, where plateau descends to plains. Elsewhere large numbers of tamarinds [q.v.]. The commonest tree is the Caunooga or Pongamia glabra, vent. [karanj], which affords oil [yennay] from seeds, and manure [yeroo] from loppings and faded flowers. Soil more fertile than that of two zemindarries [q.v.] above ghauts [q.v.], and being heavily manured produces fine crops. Chief crops, paddy [q.v.], raggy [q.v.], sugar-cane [q.v.], and horse-gram [q.v.]. Iron found near Chintamaucoolapully, Gonamaucoolapully, Moodaramdoddy, and Nakkanapully, was made into agricultural instruments. Weaving of coarse female cloths. Cumblies [q.v.] woven by Cooroobar [q.v.], who tend flocks of long-fleeced sheep [aud]. Jaggery [q.v.] extensively manufactured. Rivers are Cowndinyanuddy and Goddaur. Tanks are Beireddipully, Culloopully, Dundapully, Jeedimaucoolapully, Keelery cadapa nuttam, and Maumadoogoo agrahauram. Places of archæological interest:—Baupanuttam, Beireddipully, Cadapanuttam, Dundapully, Nellipatta, Padigelacooppam, Peddanayeny droog, Pulmanair, Veeracull, Vencatagherrycottah, Vencatasamoodram, Vibhootiyautanagaram. Principal trig. stations:—Carvanda, Devarcondah, Krishnamacondah, Putticondah. The leading places, &c., are the following. ——*Baupanuttam* (బాపనత్తం - bápanattam, Tel.). From (bápana, tel. bramin + nattam, tam. village). Tel. also (irulabandabápanattam), meaning dark + rock + village so called. Village; pop. 91; acres 322; lat. 13° 05′; long. 78° 44′; from Chittore W.S.W. 30 miles; from Pulmanair S.S.W. 9 miles. A group of dolmens [coday cull], called Pandava's temples. Usual sepulchral relics, but iron weapons scarce.——*Beireddipully* (బైరెడ్డిపల్లె - baireddipalle,* Tel.). From (baireddi, tel. short for bhairavareddi, tel. proper name + palle, tel. village). Village; pop. 1,256; acres 2,504; lat. 13° 06′; long. 78° 39′; from Chittore W.S.W. 34 miles; from Pulmanair S.W. 11 miles. Large tank. Trade in gram [q.v.], tamarind [q.v.], jaggery [q.v.], and sugar [q.v.]. Vishnoo temple. Festival five days in Maugham [mausam] or February. Chuttram [q.v.].——*Cadapanuttam* (కడపనత్తము - kadapanattamu, Tel.). From (kadapa, tel. threshold + nattam, tam. village). Village; acres 554; lat. 13° 04′; long. 78° 40′; from Chittore W.S.W. 35 miles; from Pulmanair S.W. 13 miles. At head of Talapoolla ghaut [q.v.]. Once head-qrarters of talook. Fine tank. Two forts, several times besieged by invaders of Carnatic [q.v.]. Vishnoo temple; a festival for seven days in Veishaukham [mausam] or May. Weekly market on Wednesday.——*Carvanda*

(కారువాడ - kárváda, Tel.). From (káru, tel. forest + váda, tel. village). Trig. station; lat. 13° 07′ 20·41″; long. 78° 34′ 12·57″; height 2,592 feet; from Pulmanair W.S.W. 16 miles.——*Cowndinyanuddy* (కౌండిన్యనది - kaundinyanadi, Tel.). See sep. title.——*Devarcondah* (దేవరకొండ - dévarakonda, Tel.). From (dévaru, tel. title of marava rulers + konda, tel. hill). Hill; lat. 13° 05′; long. 78° 43′; height 2,732 feet; from Chittore W.S.W. 30 miles; from Pulmanair S.W. 2 miles. Trig. station in lat. 13° 04′ 46·19″; long. 78° 42′ 40·21″; height 2,732 feet; from Nellipatta N.N.W. 1 mile; from Pulmanair S.S.W. 10 miles.——*Goddaur* (గొడ్డారు - goddáru, Tel.). From (goddu, tel. barren + áru, tam. river). River. Also called Amboor. Rises in the west of Pulmanair, and discharges down the gorges in the neighbourhood of Naicknairy pass [ghaut].——*Krishnamacondah* (కృష్ణమ్మకొండ - krishnammakonda, Tel.). From (krishnamma, tel. proper name + konda, tel. hill). Trig. station; lat. 12° 57′ 07·10″; long. 78° 33′ 24·55″; height 2,768 feet; from Beirapulley S.S.E. 1 mile; from Pulmanair S.S.W. 24 miles.——*Krishnapooram* (కృష్ణాపురము - krishnápuramu, Tel.). From (krishna, san. the god + pura, san. town). Village; pop. 312; lat. 12° 54′; long. 78° 27′; from Chittore W.S.W. 51 miles; from Pulmanair S.W. 30 miles. Polliem [q.v.] resumed 1848. Weekly market on Sunday.——*Naicknairy* (நாயக்கனேரி - náyakkanéri, Tam.). See sep. title.——*Peddanayeny droog* (పెద్దనాయనిదుర్గము - peddanáyanidurgamu, Tel.). From (peddanáyadu, tel. proper name + durga, san. fort). Hill; lat. 12° 58′; long. 78° 40′; height 2,425 feet; from Chittore W.S.W. 37 miles; from Pulmanair S.S.W. 19 miles. Old fort, stronghold of Poligar [q.v.] of Chauragal. See Naicknairy.——*Pulmanair* (పలమనేరు - palamanéru, Tel.). See below.——*Putticondah* (పత్తికొండ - pattikonda, Tel.). From (patti, tel. cotton + konda, tel. hill). Hill; lat. 13° 11′; long. 78° 41′; height 2,908 feet; from Chittore W. 31 miles; from Pulmanair W. 7 miles. A Shiva pagoda [q.v.] on the hill. Trig. station in lat. 13° 10′ 22·82″; long. 78° 41′ 11·74″; height 2,908 feet; from Pulmanair W.S.W. 7 miles; from Putticondah S.S.E. ½ mile.——*Synigoonta* (శ్యానిగుంట - shyánigunta, Tel.). See sep. title.——*Vencatagherrycottah* (వెంకటగిరికోట - venkatagirikóta, Tel.). See sep. title.——(2) Town, Sanitarium, Head-quarters of Tahsildar; North arcot dist., Pulmanair tal.; pop. 5,040; acres 6,254; lat. 13° 12′; long. 78° 47′; height 2,247 feet; from Arnee N.W. 51 miles; from Chittore W. 24 miles; from Madras W. 104 miles; from Ranipett W.N.W. 44 miles; from Tripatty W.S.W. 54 miles; from Vellore N.W. 33 miles. At N.E. end of talook, near summit of Mogily pass [ghaut]. 10° Fahr. cooler than rest of district. Formerly frequented before use of Neilgherries. The fort, levelled thirty-five years ago, was constructed by a poligar [q.v.], Sowram vencatapaty naidoo. Family extinct. The town is clean and well-built; the houses being flat terraced. Trade in grain [dhaunyam, rice], jaggery [q.v.], tamarind [q.v.], cloths, cumblies [q.v.], &c., at weekly fair. Tannery [chamrah]. Arrack [q.v.] and rum distillery. Travellers' bungalow [q.v.], excellent chuttram [q.v.], American mission and Roman catholic chapels. Weekly market Friday. Vishnoo temple. Festival for five days in Cheitram [mausam] or April. A favorite excursion is to Gungamma chittsoo or Gungammah's valley. By Goodiyattam road, and three miles to north of town, are enormous banyan [q.v.] trees covering ground upon which a large camp [derah] may be pitched [hill-station].

PULNAUD (పల్నాడు - palnádu, *Tel.* palnád *). From (palu, tel. several + nádu, tel. country) [pala]. The Amravatty country was Cronnaud new land, and the Sundavole country was Velnaud or outer land.——(1) Talook, Kistna district. Tahsildar's pay Rs. 200; stationed at Dauchepully. Area 1,066 square miles. Population 142,011. In extreme west of district. Bounded north and west by the Kistna, which separates it from the Nizam's dominions; south and east by hills and jungles dividing it from Vinoocondah, Narsarowpett, and Suttenapully talooks. Inaccessible geographical position. The exploits of local chiefs known as the Pulnautyveerooloo [q.v.] have lived in popular story. During the last century when the empire built up by Aurungzeeb was parcelled out among his lieutenants, the Pulnaud was not portion of the Northern circars [q.v.]; but, like Ongole and Nellore, was included in the jurisdiction of the Nawaub of Arcot. The hereditary deshmookhs [q.v.] were a family named Ramrauz, and the deshpandyas [q.v.] a family named Comaura. At the close of the last century, when the Condaveed district was annexed by the Kings of Golcondah, the Pulnaud became an asylum into which defeated armies retreated. On the 24th February 1787 the Pulnaud, with other districts, was mortgaged by the Nawaub to the Company, and in July 1790 the Company assumed the direct management. On the 31st July 1801 the Pulnaud was ceded by treaty to the company. The stone circles [azhauram] and tombs of early races are very numerous. Mostly hilly. Regar [q.v.] soils predominate. Cotton [q.v.] trade. Rain-fed tanks [q.v.] generally. Camping grounds at Danchepully, Pidoogooraula, Pondoogala. Places of archæological interest:—Algoorauzpulley, Atmacore, Aukrauzpulley, Bodanapaud, Bodiliveed, Boodavauda, Boogga, Cancharcoontla, Candlagoonta, Caraulapaud, Caumepully, Caurampoody, Cauvelapulley, Chinnacodamagoolla, Chinnagarlapaud, Chintapully, Colagotla, Cottapully, Cumbampaud, Darvaimla, Dauchepully, Doorgy, Gogoolapaud, Goly, Goollapaud, Goorzaula, Gootticondah, Gottimookkala, Gottipaula, Gungavaram, Inoopraudzcottapully, Jettipollem, Madgole, Mandaudy, Maucherla, Mautsavaram, Miryaula, Mootcore, Morjampaud, Mullavaram, Munchicull, Nadicode, Narmalpaud, Naugavaram, Obaleshwarapully, Ooppalapaud, Pasharlapaud, Pashvaimla, Patlaveed, Paulvye, Peddagarlapaud, Pettahsannigalla, Pidoogooraula, Poleypully, Pondoogala, Pulleygoonta, Rauchamullapaud, Rentachintala, Rentaula, Royavaram, Shingarootla, Shreegherrypaud, Taudootla, Taullapulley, Teraula, Toommalcheroo, Toomaracote, Tungeda, Vappicherla, Veldoorty. Trig. station:—Saurangpully. The leading places, &c., in the talook are the following.——*Caurempoody* (కారెంపూడి - kárempúdi, Tel.). See sep. title.——*Chintapully* (చింతపల్లి - chintapalli, Tel.). From (chinta, tel. tamarind tree, tamarindus indica, linn. + palli, tel. village). Village; pop. 1,485; acres 4,444; lat. 16° 27′; long. 79° 47′; from Dauchepully S. 10 miles; from Masulipatam W. 91 miles. Old Vishnoo and Shiva temples. Inscription dated A.D. 1302 recording erection of a temple. Other inscriptions dated A.D. 1304 and 1752.——*Dauchepully* (దాచేపల్లె - dáchépalle, Tel.). See sep. title.——*Doorgy* (దుర్గి - durgi, Tel.). Means goddess parvaty. Village; pop. 2,877; acres 5,057; lat. 16° 26′; long. 79° 35′; from Danchepully S.W. 17 miles; from Masulipatam W. 103 miles. Block of ruined temples in the middle of the town. East is Obaleshwarapully with good tope [q.v.] and ruined temple where Chentsoos [q.v.] worship.——*Goorzaula* (గురజాల - guradzála, Tel.). From (kuraja, tel. a class of shepherds so called). Village; pop. 2,841; acres 16,721; lat. 16° 34′; long. 79° 40′; from Dauchepully W.S.W. 8 miles; from Masulipatam W. 99 miles. A capital of the Pulnautyveerooloo [goojjerla, pulnautyveerooloo]. Two Portuguese epitaphs, dated 1767 and 1769. Many old temples with inscriptions.——*Gootticondah* (గుత్తికొండ - guttikonda, Tel.). From (gutti, tel. cluster + konda, tel. hill). Village, Hill, Place of pilgrimage; pop. 1,798; acres 6,369; lat. 16° 26′; long. 79° 53′; from Dauchepully S.S.E. 13 miles; from Masulipatam W. 87 miles. Old Shiva temple. Cave with tank much frequented by pilgrims.——*Kistna* (కృష్ణ - krishna, Tel.). See sep. title.——*Maucherla* (మాచెర్ల - mácherla, Tel.). From (mávi, tel. mango tree, mangifera indica, linn. + cherla, tel. village). Village, Place of pilgrimage; pop. 2,907; acres 8,738; lat. 16° 29′; long. 79° 28′; from Dauchepully W.S.W. 22 miles; from Masulipatam W. 111 miles. A capital of the Pulnaud heroes [pulnautiveerooloo]. Vishnoo temple built by Bramha naidoo, hero of the story of the Pulnaud, with fine monolithic Dhwaja stambham [q.v.] and numerous inscriptions.——*Mootcore* (ముటకూరు - mutakúru, Tel.). From (mutamu, tel. cow-dung fuel + úru, tel. village). Village; pop. 3,178; acres 7,034; lat. 16° 23′; long. 79° 31′; from Dauchepully S.W. 23 miles; from Masulipatam W. 107 miles. Vishnoo temple 400 years old. Inscriptions dated A.D. 1268 and 1654.——*Nadicode* (నడికూడె - nadikúde, Tel.). From (nadi, tel. middle + kúdu, tel. to meet). Village; pop. 1,636; acres 4,932; lat. 16° 36′; long. 79° 46′; from Dauchepully W. 1½ miles; from Masulipatam W.N.W. 94 miles. Four ruined temples. Inscription of A.D. 1212.——*Naugilair* (నాగిలేరు - nágiléru, Tel.). See sep. title.——*Patlaveed* (పట్లవీడు - patlavídu, Tel.). From (pattu, tel. silk + vídu, tel. town). Village; pop. 1,611; acres 6,698; lat. 16° 23′; long. 79° 29′; from Dauchepully S.W. 24 miles. Inscription of Krishna deva royel, dated A.D. 1518.——*Pidoogooraula* (పిడుగురాళ్ల - pidugurálla, Tel.). From (pidugu, tel. thunderbolt + ráyi, tel. stone). Village; pop. 1,550; acres 7,781; lat. 16° 29′; long. 79° 56′; from Dauchepully S.E. 12 miles; from Masulipatam W.N.W. 82 miles. On the Hyderabad road. Many broken carvings and other remnants of old temples. Travellers' bungalow [q.v.].——*Pondoogala* (పొందుగల - pondugula, Tel.). From (bondu, tel. a flower garland). Also Pondakholl. Village; pop. 945; acres 5,827; lat. 16° 41′; long. 79° 42′; from Dauchepully N.W. 8 miles; from Masulipatam W.N.W. 99 miles. On trunk road from Madras to Hyderabad and on right bank of Kistna. Ferry to opposite bank, where in the Nizam's territory, stands the ancient town of Vaudapully and modern town of Vazeerabad. Jeina [q.v.] remains. West, deserted temple. Travellers' bungalow [q.v.].——*Pulnaud* (పల్నాడు - palnádu, Tel.). See below.——*Renta chintala* (రెంటచింతల - rentachintala, Tel.). From (rendu, tel. two + chinta, tel. tamarind tree, tamarindus indica, linn.). Village; pop. 3,244; acres 5,362; lat. 16° 33′; long. 79° 35′; from Dauchepully W. 12 miles; from Masulipatam W.N.W. 104 miles. Two old temples. Christian ryots [q.v.] have built a stone church and a house for priests.——*Saurangpully* (సారంగపల్లె - sárangapalle, Tel.). From (sáranga, san. deer + palli, tel. village). Trig. station; lat. 16° 40′ 41·92″; long. 79° 47′ 48·04″; height 522 feet; from Saurangpully W.N.W. 1½ miles.——*Shreegherrypaud* (శ్రీగిరిపాడు - shrígiripádu, Tel.). From (shrí, san. holy + giri, san. mountain + pádu, tel. village). Village; pop. 3,187; acres 7,204; lat. 16° 19′; long. 79° 22′; from Dauchepully S.W. 34 miles; from Masulipatam W. 118 miles. Group of abandoned temples. Shiva temple built by Cholas. Roman catholic station.——*Toomaracote* (తుమ్మరకోట - tummarakóta, Tel.). See sep. title.——*Tungeda* (తంగెడ - tangeda, Tel.). From (tangédu, tel. plant, cassia auriculata, linn.). Village; pop. 1,552; acres 10,082; lat. 16° 40′; long. 79° 51′; from Dauchepully N.E. 7 miles; from Masulipatam W.N.W. 91 miles. Old fort containing

sixteen deserted temples. Ancient mosque [musjid]. Inscriptions of A.D. 1372 and 1552.——*Vappicherla* (వప్పిచెర్ల - vappicherla, Tel.). Village; pop. 2,250; acres 5,078; lat. 16° 27′; long. 79° 44′; from Dauchepully S. 12 miles; from Masulipatam W. 96 miles. Inscriptions of A.D. 1299 and 1311.——*Veldoorty* (వెలుదుర్తి - veludurti, Tel.). From (velugu, tel hedge + turti, tel. village). Village; pop. 2,735; acres 7,747; lat. 16° 21′; long. 79° 25′; from Dauchepully S.W. 30 miles; from Masulipatam W. 116 miles. The police here watch the mountain passes. Inscription dated A.D. 1165. Sculpture of a battle scene on a slab near a well and inscription dated A.D. 1130 at the temple of Doorgam. Veeraculls [q.v.] and Naugaculls [q.v.] in the neighbourhood.——**(2)** *Pulnautyveerooloo* (పల్నాటివీరులు - palnátivírulu, Tel.). From (víra, san. hero). Pulnaud heroes who carried on a seven years' war against the Goojjerla [goorzaúla] and Maucherla [q.v.] towns, originating in a dispute at a cock-fight. Many popular stories about them.——*Pulnauty veera charitra dwipada* (పల్నాటివీరచరిత్రద్విపద - palnátivíracharitradvipada, Tel.). From (above + víra, san. hero + charita, san. story + dvipada, san. couplet). Wars of the Pulnautiveerooloo. The occurrences described took place about the year A.D. 1160. The poem gives a picture of the Teloogoos [q.v.] as they lived before the Mussalman [q.v.] invasion.

PULNEY (பழனி - pazhani, *Tam.* palni *). From (pazhamai, tam. antiquity + ani, tam. greatness) [pazha]. Tam. also (tiruvávinangudi), meaning holy + tank born + village or village of soobramanyan [q.v.] born of the sacred lake sharvanam, the reed tank; also (ávinangudi), meaning same; also (vaiyáppuri), meaning earth + interior + town.——**(1)** Talook, Madura district. Tahsildar's pay Rs. 150. Area 599 square miles. Population 195,050. Language Tamul. N.W. inland part of district. Bounded on the east by Dindigul talook, south by Periyacoolam talook, west by Oodamalpett and north by Caroor and Dharapooram talooks of Coimbatore district. Western portion of the talook is elevated sloping down towards the east. In the vicinity of the river and channels soil is generally fertile. It is sandy towards the north-east, loamy towards the east and red towards the west. A large number of the population are employed in agriculture. Coffee and cardamom plantation and coffee-curing are carried on in the Lower pulney hills. Cotton [q.v.], coffee [q.v.], cardamom [q.v.] are the important articles of commerce. Rivers, tanks. Shunmooganuddy river and Nangaunjy river. Veiyaupoory tank, Idoombancoolam tank, Poothoocolam tank of Cothamungalam and Shadayacolam of Cauppiliyaputty and Permaulcolam of Viroopautchy. District officers pitch their tents [derah] in the following places:—Woddar chuttram of Ayacoody, Chuttraputty, Cullimandayam, Keeranore, Ooppilyaputty, Vayalore, Viroopautchy. Places of archæological interest:—Ambilikkay, Baulasamoodram, Calyampoottore, Condaurankeeranore, Coottampoondy, Coricadavoo, Cottayam, Cullimandayam, Dausariputty, Eivarmullay, Keeranore, Mandavaudy, Maunore, Munnavanore, Naickerputty, Periyacottay, Permaul mullay, Peroor, Podoovaurputty, Pooliyore nuttam, Pombauray, Pulney, Shaittraiv, Tauvattore, Viriyappore, Viroopautchy. Principal trig. stations:—Chucklitchy mullay, Partimullay, Permaul mullay. The leading places, &c., in the talook are the following.——*Amravatty* (ஆமராவதி - ámarávathi, Tam.). See sep. title.——*Auttcaul* (ஆற்றுக்கால் - áttukkál, Tam.). See sep. title.——*Ayacoody* (ஆயக்குடி - áyakkudi, Tam. ayakudi *). From (áyan, tam. a shepherd + kudi, tam. village). Zemindarry, Village; pop. 10,617; acres 51,350; lat. 10° 27′; long. 77° 36′; from Madura N.N.W. 52 miles; from Pulney E.S.E. 4 miles. Peshcush Rs. 16,785. One of the twenty-four polliems of the late Dindigul district. Very valuable estate and the best portion of the Pulney polliem when attached thereto.——*Baulasamoodram* (பாலசமுத்திரம் - bálasamuttiram, Tam.). From (bála, san. young + samudra, san. ocean). Village; lat. 10° 25′; long. 77° 34′; from Madura N.W. 53 miles; from Pulney S.S.W. 3 miles. Former capital of the Poligar [q.v.] chiefs of the Pulney tract. The ruins of their fort remains. Old Vishnoo temple.——*Chucklitchy mullay* (சக்கிலிச்சிமலை - shakkiliççimalai, Tam.). From (shakkiliççi, tam. a female of the leather-working caste + malai, tam. mountain). Trig. station; lat. 10° 26′ 59·33″; long. 77° 22′ 37·44″; height 2,372 feet; from Andiputty W.N.W. 1 mile; from Pulney W. 12 miles.——*Codyartanaur* (கொடியார்த்தனாறு - kodiyarttanáru, Tam.). See sep. title.——*Coottampoondy* (குட்டம்பூண்டி - kuttambúndi, Tam.). From (kuttam, tam. tank + púndi, tam. village). Village; pop. 3,698; acres 9,422; lat. 10° 41′; long. 77° 43′; from Madura N.N.W. 60 miles; from Pulney N.E. 20 miles. In the Pulneys. Very old Shiva temple with inscription containing name of a Paundy sovereign.——*Eivarmullay* (ஐவர்மலை - aivarmalai, Tam.). From (aivar, tam. the five pándavas + malai, tam. mountain). Sanscrit name (panchapándavagiri), meaning five + pandava + hill. Hill; lat. 10° 29′; long. 77° 27′; height 1,402; from Madura N.W. 62 miles from Pulney W.N.W. 7 miles. Old and sacred temple with a cave and inscriptions. The cave is 160 feet long and 13 feet high and has numerous sculptured figures. A subterranean passage leads into the hill.——*Keeranore* (கீரனூர் - kíranúr, Tam.). From (kíran, tam. nakkíran, the poet + úr, tam. village). Sanscrit name (gírapurí), meaning geeran, the eloquent author + town. Village; pop. 2,965; acres 2,344; lat. 10° 36′; long. 77° 33′; from Madura N.N.W. 62 miles; from Pulney N. 9 miles. Three ancient and well-sculptured Shiva temples with numerous inscriptions, mostly Chola.——*Kodaykarnal* (கொடிக்கானல் - kodikkánal, Tam.). See sep. title.——*Maumbauray* (மாம்பாறை - mámbárai, Tam.). From (má, tam. mango tree, mangifera indica, linn. + párai, tam. rock). Zemindarry; square miles 12; lat. of village 10° 40′; long. 77° 50′; from Madura N.N.W. 56 miles; from Pulney E.N.E. 25 miles. Comprises three villages; Athappanputty, Markamputty, Yellaputty, population 2,456.——*Maunore* (மானூர் - mánúr, Tam.). From (mán, tam. deer + úr, tam. village). Village; pop. 2,553; acres 3,347; lat. 10° 31′; long. 77° 31′; from Madura N.N.W. 60 miles; from Pulney N.N.W. 4 miles. Very old and well-sculptured Shiva temple containing inscription of Soondra paundy [q.v.].——*Partimullay* (பருத்திமலை - paruttimalai, Tam.). Means cotton mountain. Trig. station; lat. 10° 39′ 57·81″; long. 77° 37′ 06·83″; height 1,254 feet; from Pulney N.N.E. 15 miles.——*Periyacottay* (பெரியகோட்டை - periyagóttai, Tam.). From (periya, tam. great + kóttai, tam. fort). Village; pop. 1,299; acres 2,413; lat. 10° 31′; long. 77° 44′; from Madura N.N.W. 49 miles; from Pulney E.N.E. 12 miles. South are two old Shiva and Vishnoo temples, the former well sculptured and covered with inscriptions of the Chola [q.v.] dynasty [raj].——*Permaul mullay* (பெருமாள்மலை - perumálmalai, Tam.). Means vishnoo's mountain. Sanscrit name (varáhagiri), meaning boar + hill. Hill; lat. 10° 18′; long. 77° 38′; from Madura N.N.W. 46 miles; from Pulney S.S.E. 11 miles. Peak of the Pulneys. The west slope is covered with dolmens [codaycull]. Trig. station in lat. 10° 17′ 55·92″; long. 77° 36′ 22·54″; height 7,326 feet; from Kodaykarnal N.N.E. 8 miles.——*Pombauray* (பூம்பாறை - púmbárai, Tam.). From (pú, tam. flower + párai, tam. rock). Sanscrit name (pushpagiri), meaning flower + mountain. Village, Hill; pop. 1,735; acres 14,979; lat. 10° 16′; long. 77° 27′; from Madura W.N.W. 54 miles; from Pulney S.S.W. 15 miles. Soobramanyan [q.v.] temple, much neglected.——*Pulney* (பழனி - pazhani, Tam.). See below.——*Pulney hills* (பன்றிமலை - panrimalai, Tam.). See vol. II, 118.——*Rettayambaudy* (இரெட்டையம்பாடி - irettaiyambádi, Tam.). From (irattaiyan, tam. proper name + pádi, tam. village). Zemindarry; acres 54,877; lat. 10° 26′; long. 77° 28′; from Madura N.W. 60 miles; from Pulney E. 8 miles. Peshcush [q.v.] Rs. 11,930.——*Taundigoody* (தாண்டிக்குடி - tándikkudi, Tam.). From (tánri, tam. a tree, terminalia belerica, roxb. + kudi, tam. village). Village, Hill; pop. 2,127; acres 5,612; lat. 10° 19′; long. 77° 41′; from Madura N.W. 41 miles; from Pulney S.E. 14 miles. Principal hill village in the Lower pulneys. Coffee [q.v.] and cardamom [q.v.] cultivation largely carried on.——*Veloor* (வேலூர் - vélúr, Tam. velúr *). From (vél, tam. acacia arabica, willd. + úr, tam. village). Zemindarry, Village; pop. 3,620; acres 21,855; lat. of village 10° 29′; long. 77° 42′; from Madura N.N.W. 48 miles; from Pulney E. 10 miles. Peshcush Rs. 10,568.——*Viroopautchy* (விருப்பாச்சி - viruppáççi, Tam.). From (virúpa, san. deformed + akshi, san. eye); an epithet of shiva. Village; pop. 2,001; acres 3,317; lat. 10° 28′; long. 77° 45′; from Madura N.N.W. 47 miles; from Pulney E. 13 miles. One of the twenty-four polliems of the former Dindigul district. Attached with Pulney to Dharaupooram district by Hyder ally. Ancient Shiva temple with inscriptions. Old Vishnoo temple.——*Yettoor* (எட்டூர் - ettúr, Tam.). From (ettu, tam. eight + úr, tam. village). Village; pop. 2,672; acres 44,730; from Pulney S.W. 20 miles. In the Pulneys. Inscription on a rock.——*Yidaiancottah* (இடையன்கோட்டை - idaiyangóttai, Tam. idaiyankóta *). From (idaiyan, tam. a shepherd + kóttai, tam. fort). Village, Zemindarry; pop. 3,157; acres 33,249; lat. of village 10° 37′; long. 77° 53′; from Madura N.N.W. 50 miles; from Pulney E.N.E. 25 miles. With Peshcush Rs. 7,000. One of the twenty-four polliems. With Maumbauray, belonged to Aravacoorchy in Coimbatore district, but was added to Dindigul province by Hyder ally.——**(2)** Town, Place of pilgrimage, Head-quarters of talook and Sub-registrar; Madura dist., Pulney tal.; pop. 16,940; acres 4,252; lat. 10° 28′; long. 77° 33′; height 1,519 feet; from Dindigul W. 31 miles; from Kodaykarnal N. 17 miles; from Madras S.W. 264 miles; from Madura N.W. 54 miles; from Rameshwaram N.W. 143 miles; from Ramnaud about N.W. 114 miles. One of the twenty-four polliems of the former Dindigul district and once annexed by Mysore, when it was attached to Dharaupooram district. Old fort. Old and well-sculptured Shiva temple on a hill, with inscriptions of the Paundy [q.v.] Vijianugger [q.v.] and Wodeya [q.v.] dynasties [raj] and Sanscrit stala poorannam [q.v.]. Large Vishnoo temple below the hills with many inscriptions round its garbhagriham [q.v.]. Old Shiva temple at the foot of the hill, and a number of bathing tanks with sculptured work. Sculptured and painted temple called Tiruvarnangoody at Adivauram, a mile and a half north. Here there is a temple dedicated to Shany [q.v.] or Saturn, within the walls of the great pagoda [q.v.], which is seldom seen anywhere in the peninsula. The image [shilay, vigraham] has on a sable garment, and the vehicle [vauhan] is a crow [caurvam].—

(3) *Pulney aundy* (பழனியாண்டி - pazhaniyándi, Tam.). From (above + ándi, tam. shaiva mendicant). Scandan. Hindoo 2nd or pers. name. Common among non-bramins and native christians [peyar].——*Pulneyvailan* (பழனிவேலன் - pazhanivélan, Tam.). From (above + vélan, tam. he who holds lance). Soobramanyan [q.v.].

PUMMELOW (मधुराम्लफल - madhurámlap'hala, *San.*; पपनस - papanasa, *Mahr.*; तोरंज - tóranja, *Conc.*; چکوتره - chakotrah, *Hind.*; چکوترا - chakotrá, *Dec.*; پمپولمس - pumpulmas, *Malay*; ಚಕೋರಮರ - chakóramara, *Can.*; ಚಕ್ಕುಲ್ಲಿಮರ - chakkullimara, *Too.*; పంపరమాస - pamparamása, *Tel.*; ബംബിലിനാരകം - bambilinárakam, *Mal.*; මහනාරං - mahanáram, *Singh.*; பம்பளிமாசு - pambalimásu, *Tam.*). Title from malay. San. from (madhura, san. sweet + ámla, san. sour + p'hala, san. fruit). Can. from (chakóra, san. greek partridge + mara, can. tree). Mal. from (bambili, mal. pumplemose + nárakam, mal. lime, citrus). Singh. from (maha, singh. large + náram, singh. citrus). Tam from malay. Hind. also (batávílímú), meaning batavian lime; (mahánímbú), meaning large lime. Malay also (járukbali), meaning baly orange; (jarukgádang); (járukmachan), meaning tiger orange; (kádangsa). Can. also (tórangi); (chakkottimara). Tel. also (pullapamparapanasa), meaning sour + the tree; (edapandu); (pamparapanasa); (pamplimása). Title otherwise Batavian lemon, Batavian orange, Forbidden fruit [plantain], Jamboa, Paradise apple, Pompoleon, Pumplemose, Pumplenose, Shaddock. Different names by size are:—Pummelow, when of the largest size; Shaddock, of intermediate size, after captain shaddock, who first introduced them into w. indies from batavia; Forbidden fruit, about size of an orange [q.v.]. Amoy pummelow is a variety; Canton pummelow is another variety. Botanically Citrus [jambeeram] decumana, linn., rutaceæ [vricsham, 32]. Alias Aurantium decumanum. Evergreen tree, 15 feet high; petioles winged; leaves blunt emarginate; large white fragrant rich waxy flowers; massive fruit attains 4 lbs. in weight and 7 inches in diameter, in form globular, skin smooth in comparison with others of its tribe, but roughened by the oil glands, pulp varying in color from that of a common orange to a deep carmine. Largest of orange [q.v.] tribe and in taste somewhat resembles sweet orange; tree introduced from java. The fruit eaten. Gives a gum [gond]. Two botanical varieties:—Maliformis, fruit globose, with the pulp of a pale pink color, approaching to a very light yellow. Pyriformis; fruit more or less pear-shaped [amrood], pulp of a crimson color more or less intense; variety most esteemed, being sweet and juicy.

PUNCHAM (पञ्चन् - pañchan, *San.*). From (pach, san. to spread); the opened hand and fingers. Greek πέντε. Five. A very sacred number. Plant first term. Ex., where transl. is of second term:—Calophyllum inophyllum (pañchakésara), filament; Ricinus communis (pañchángula), finger; Santalum album (pañchasugandha), good scent; Terminalia chebula (pañcharasa), taste. See gloss. paragraphs.——*Pacheesy* (پچیسی - pachísí, Hind.). From (pachís, pers. twenty-five); the highest throw being twenty-five. Game played with cowries [q.v.] for dice on a kind of cloth chess board, consisting of four rectangles, each divided into twenty-four small squares of three rows of eight squares each. Not played for money [chatrangam, chowsar shatranj].——*Paunch* (پانچ - pánch, Hind.). From (panj, pers. five). The number 5 [punch, punj].——*Pauncharautram* (पाञ्चरात्र - páñcharátra, San.). From (above + rátri, san. night) [puncharautram]. Sacred book of the Veishnavites promulgated by Shaundilyan. In this Vausoodevan is made the supreme being and the one omniscient first principle, which is both efficient and material cause of the universe, evolving jeevan [q.v.] or soul, manas [q.v.] or mind and ahancauram [q.v.] or consciousness. And Mocsham [q.v.] consists in deliverance from these worldly shackles by knowledge, contemplation and worship of him. The whole system rests upon the aphorism, faith in Eshwaran, here Krishnan [q.v.]. Followers of this system are styled Pauncharautries, otherwise Bhaugavatas or worshippers of Bhagavat krishnan. See vol. I (89), (90).——*Punch* (پنچ - panch, Hind.). Originally in Anglo-indian a drink of five ingredients; water, tea [q.v.], lemon-juice [lemon], sugar [q.v.], and arrack [q.v.]. Also in N. india abbreviation of punchayet [q.v.].——*Puncha bandham* (पञ्चबन्ध - panchabandha, San.). From (above + bandha, san. tie). The fifth caste [punchama]; a very early name for the Pariahs [q.v.].——*Puncha baunam* (पञ्चबाण - pañchabána, San.). From (above + bána, san. arrow). Five arrows of Manmatan [q.v.]. The following five kinds of flowers:—lotus [nelumbo], mango [q.v.], ashocam [q.v.], jasmine [q.v.], blue water-lily [blue indian water-lily, cauma baunam].——*Puncha baunauvastay* (पञ्चबाणावस्था - pañchabánávast'há, San.). From (above + bána, san. arrow + avast'há, san. state). Five effects of the five arrows [puncha baunam] of Manmatan [q.v.]. Thinking and talking of the person loved; sighing and lamenting; heat or feverishness; nausea and languishing; weeping and bewilderment of the faculties; death or suspension of the natural powers [cauma baunam].——*Puncha bhootam* (पञ्चभूत - pañchabhúta, San.). From (bhúta, san. element). The five elements [bhootam] of nature, including ether.——*Punchacam* (पञ्चक - pañchaka, San.). An aggregate of five, a pentad. Measure of capacity. 5 colagams = 1 punchacam; 4 punchacams = 1 cundaga [alavay, 3c]. Approximate actual value, 1 punchacam = 54 cubic feet 768 cubic inches. Bellary. See vol. I, 609; II, 508.——*Punchacatcham* (पञ्चकच्छ - pañchakachha, San.). From (above + kachha, san. hem of lower garment tucked into the girdle). Five folds of lower garment tucked into waistband [katchay]. See vol. I (98).——*Puncha cosham* (पञ्चकोश - pañchakósha, San.). From (above + kósha, san. sheath). Five sheaths to the soul in philosophy [vedauntam]. Anna mayam cosham, that supported by food, the gross form; Praunamayam cosham, the organs of action; Manomayam cosham, the organs of perception, with the manas or mind; Vinyaunamayam, the same with booddhy or intellect; Ananda mayam consisting of the elements of identity and wisdom. These coshams represented in terms of shareerams [q.v.] or the triple investitures of the soul are as follows:—Annamayam agrees with stoola shareeram; the three next praunamayam, manomayam and vinyaunamayam correspond to soocshmam or linga shareeram and anandamayam agrees with caurana shareeram. And moocty or mocsham [q.v.] consists in freedom from these shackles and liberation from these vestitures or material obstructions.——*Puncha dravidam* (पञ्चद्राविड - pañchadrávida, San.). From (above + drávida, san. the people). The five ancient countries south of Vindhyas:—Carnautam, Dravida, Goozerat, Maharashtram, Telinga [puncha gowdam]. Same classification applied to Bramin [q.v.] tribes.——*Puncha gandham* (पञ्चगन्ध - pañchagandha, San.). From (above + gandha, san. smell). Five perfumes:—Cinnamon [q.v.], Cardamom [q.v.], Camphor [q.v.], Nutmeg [jautikye], Takkolam, a perfume prepared from either eugenia jambolana [common jamoon], pimenta acris [china pepper], or illicium anisatum [star anise].——*Puncha gavyam* (पञ्चगव्य - pañchagavya, San.). From (above + gavya, san. cow-product). Five articles from the cow [pashoo], milk [paul], curds [tyre], ghee [q.v.], urine and dung [shauny]. These are mixed together and drunk by Bramins, as means of purification either from sin, or caste trespasses, or at death.——*Puncha gowdam* (पञ्चगौड - pañchagauda, San.). From (above + gauda, san. the people). The five ancient countries north of the Vindhyas:—Canyahcoobjam, Gowda proper, Mitilay, Ootcalam, Sauraswatam [puncha dravidam]. Same classification applied to Bramin [q.v.] tribes.——*Punchair* (పంచేరు - panchéru, Tel.). Means five + seer [punchseer]. Bazaar weight. 5 seers = 1 punchair; 8 punchairs = 1 maund [niray, 2e]. Approximate actual value, 1 punchair = 3 lbs. 3 oz. 13⅗ drs. avoir. Used in Bellary. Though it means 5 seers it really consists of 6 seers as the seer there is 21 tolahs [q.v.] and not 24 like the ordinary seer [q.v.]. Also used in Kurnool, where it is the same as Viss [q.v.].——*Punchakhandam* (पञ्चखण्ड - pañchakhanda, San.). From (above + khanda, san. division). Five Indies [india]. A division later than Nava khandam [q.v.].—"*a*" According to Vishnoo pooraunam, the centre was occupied by Cooroos and Paunchaulas; east was Caumaroopam or Assam; south were Poondras, Calingas, and Maugadham; west were Soorashtras, Sooras, Abheeras, Arboodas, Caurooshas, Maulavar, Sowveeras, and Seindhavas; north were Hoonas, Shaulwas, Shaucalas, Ramas, Ambashtas, and Pauraseecas.—"*b*" The Chinese had a Punchkhandam, thus:—First, Northern india comprised the Punjaub proper, including Cashmere and the adjoining hill states, with the whole of Eastern afghanistaun beyond the Indus and the present Cissutlej states to the west of the Saraswaty river. Secondly, Western india comprised Scinde and Western rajpootana, with Cutch and Goozerat, and a portion of the adjoining coast on the lower course of the Nerbudda river. Thirdly, Central india comprised the whole of the Gangetic provinces from Thaneswar to the head of the delta and from the Himalaya mountains to the banks of the Nerbudda. Fourthly, Eastern india comprised Assam and Bengal proper, including the whole of the delta of the Ganges, together with Sumbulpore, Orissa, and Ganjam. Fifthly, Southern india comprised the whole of the peninsula from Nassick on the west and Ganjam on the east to Cape comorin on the south, including the modern district of Berar and the Mahomedan Telingana [q.v.], Maharashtram [q.v.], and the Concanam [q.v.], with the separate states of Hyderabad, Mysore, and Travancore, or very nearly the whole of the peninsula to the south of the Nurbudda and Mahanuddy rivers.——*Puncha lingam* (पञ्चलिङ्ग - pañchalinga, San.). From (above + linga, san. emblem of shiva). He who has five lingams, a name of Shiva [q.v.], from the five places celebrated for his symbol [lingam], viz.—"*a*" Conjeeveram, where there is the Pritivy lingam, or lingam made of earth;—"*b*" Jambookeshwaram, where the Aplingam exudes water perpetually;—"*c*" Trinomallee, where the Tejolingam sparkles with light;—"*d*" Calastry, where there is the Vayoolingam, the lamp of which is in constant vibration with the wind; and—"*e*" Chidambaram, where there is the Aucaushalingam or ethereal lingam, worshipped without any material form of it being kept in the temple [coil, pagoda].——*Punchalingeshwar* (पञ्चलिङ्गेश्वर - pañchalingéshvara, San.). From (above + linga, san. phallus + íshvara, san. lord), shiva who is worshipped in the form of the five elements [bhootam], as the supporter and regenerator of the universe. An epithet of Eeshwaran.——*Puncha lutchanam*

(पञ्चलक्षण - pañchalakshana, San.). From (above + lakshana, san. characteristic). The five characteristics of a Pooraunam [q.v.]; Sargam, Pratisargam, Vamsham, Manwantaram and Vamshaunoocharitam.——*Punchama* (पञ्चम - pañchama, San.). Fifth. A Pariah [q.v.], as being fifth caste [jauty] man [puncha bandham]. A very early term.——*Puncha maha pautacam* (पञ्चमहापातक - pañchamahápátaka, San.). From (above + mahá, san. great + pátaka, san. vice). The five capital vices; viz., murder, theft, intoxicating drinks, lust, and falsehood.——*Puncha maha yanyam* (पञ्चमहायज्ञ - pañchamaháyaña, San.). From (above + mahá, san. great + yaña, san. sacrifice). The five special sacrifices or oblations:—Reciting the vedams [q.v.], Homam [q.v.], or oblation by fire, Sacrifices to cauly [q.v.] and other demons, Oblation of darbhay [q.v.] grass to ancestors, Hospitality or feeding the poor [maha yanyam, yanyam]. These are daily sacrifices of obligation. For occasional or periodical sacrifices see Yanyam. Compare on the other hand Cooral:— தென்புலத்தார் தெய்வம் விருந்தொக்க லொன்றாங் கைம்புலத்தா றோம்ப றலை—"the chief duty of the house-"holder is to preserve the five-fold rule of conduct towards the "manes, the gods, his guests, his relations, and himself."——*Punchamam* (पञ्चम - pañchama, San.). The fifth note in musical scale [sangeetam, swaragraumam].——*Punchamookha maurooty* (पञ्चमुखमारुति - pañchamukhamáruti, San.). From (above + mukha, san. face + máruti, san. son of wind). Five-headed Shiva [q.v.].——*Punchamoolam* (पञ्चमूल - pañchamúla, San.). Five medicinal roots:—Gmelina arborea, linn. [cashmere tree], Oroxylum indicum, vent. [pajanely], Premna integrifolia, linn. [moonnay], Stereospermum suaveolens, dec. [pauthiry], Ægle marmelos, corr. [bael].——*Punchamy* (పంచమి - panchami, Tel.). From (pañcha, san. five). The fifth day [tity] of the waxing [shoocla pacsham] and waning [krishnapacsham] moon of any lunar month [chaundra mausam, pacsham]. Lunar [chaundra maunam] festival [pundigay, 3e]. Held particularly sacred in the fifth and sixth lunar months of Shrauvanam [mausam] between 15th August and 14th September, and Bhaudrapadam [mausam] between 15th September and 15th October [garoodapunchamy, nauga punchamy, rishy punchamy].——*Punchanadam* (பஞ்சநதம் - pañjanatham, Tam.). From (above + nadí, san. river). Punjaub, the country of the five sacred rivers. In this presidency applied to Trivaudy near Tanjore town. Hindoo 2nd or pers. name. Familiarly shortened into Punjoo [peyar].——*Punchanimbam* (पञ्चनिम्ब - pañchanimba, San.). A medicine which contains the flowers, fruit, leaves, bark, and root of the neem [q.v.] tree, of each fifteen parts, and one part each of a number of other drugs.——*Punchanuddy* (పంచనది - panchanadi, Tam.). From (pañcha, san. five + nadí, san. river). River; Cuddapah dist., Voilpaud tal. Rises in the Poonganore zemindarry and flows in a northerly direction past Peelair in Voilpaud talook, then joins the Bauhoodah.——*Punchapacshy shastram* (पञ्चपक्षिशास्त्र - pañchapakshishástra, San.). From (above + pakshin, san. bird + shástra, san. science). A system of divination [shacoonam] by five different species of birds; hawk [shyainam], crow pheasant [q.v.], cock [moorghy], crow [caurvam], peacock [mayil].——*Punchapallavam* (पञ्चपल्लव - panchapallava, San.). Aggregate of five sprigs used in Hindoo ceremonial:—Mangifera indica [mango]; Eugenia jambolana [common jaumoon]; Feronia elephantum [wood apple]; Citrus medica [lime]; Ægle marmelos [bael].——*Puncha pandava mullay* (பஞ்சபாண்டவமலை - pañjappándavamalai, Tam.). From (pañcha, san. five + pándava, san. the brothers of that name + malai, tam. mountain). A Braminical name. Village, Hill; North arcot dist., Arcot tal.; lat. 12° 52′; long. 79° 19′; from Arcot W.S.W. 5 miles; from Chittore S.S.E. 27 miles. Hamlet of Velapaukam. Hill remarkable for rock-cut sculptures and caves, connected by Braminical legend with the five Pandavas of N. india. The principal cave is the Yelvausapady, or seven thresholds; where six rough pillars stand at entrance and form seven doorways. Inner line of similar pillars supports the roof and corresponds with the outer line. A short distance above, upon face of rock, a figure two feet square, representing a Jeina [q.v.] teertancaran [q.v.]. On southern side of hill is a cave with figures cut in relief [jalee]. One group of five here represents the five Pandavas, said to have wandered here. Place taken possession of by Mussalmans [q.v.].——*Puncha parvam* (पञ्चपर्व - pañchaparva, San.). From (above + parvan, san. feast). Five religious ceremonial days in each fortnight, viz.:—pratamay, ashtamy, navamy, pradosham, and amavausyay or powrnimay; which see under separate titles.——*Puncha praunam* (पञ्चप्राण - pañchapràna, San.). Five vital airs constituting animal life in man. They are:—Praunam, the air in the lungs, pre-eminently identified with life; Apaunam, the air in the lower intestine; Samaunam, the air essential to digestion; Oodaunam, the air supposed to move upwards from the throat to the head; and Vyaunam, the air pervading the whole body. Puncha praunahooty is the offering or addressing the first five mouthfuls of every meal to the five vital airs respectively; an act of obligation among bramins every day before meals. There are also five other oopapraunams or minor vital airs recognised among hindoos [praunam, vayoo].——*Puncharautram* (పంచరాత్రము - pancharátramu, Tel.). Means five nights [pundigay, 6d]. The Sheivas were the first to develop the popular festivals of several days' continuance. Subsequently the Veishnavas devised the Puncharautram on the same method. The legend is that during Menoo's flood [pralayam], Vishnoo [q.v.], as Narayanan [q.v.], floated on the waters; and then during five nights of that dark period he delivered to Satyavratan [q.v.] and the seven rishies [q.v.] the dogmas of the Puncharautram. Many Veishnavas separated from the rest on this account. On the other hand there is a modern book published at Conjeeveram, entitled, 'a hook to take out the thorn from such as deny the Puncharautram.' The modern dispute at Conjeeveram between the Vadagalays [q.v.] and Tengalays [q.v.] has to a great extent obliterated the remains of this controversy [matam]. Compare Pauncharautram.——*Puncha shooddhy* (पञ्चशुद्धि - pañchashuddhi, San.). From (above + shuddhi, san. purification). The five kinds of purification practised among the sheivas; viz., purification of the body by washing [snaunam], purification of the soul by prayer [muntram], ceremonial purification of sacred vessels, purification [abhishaicam] and adorning of the lingam [q.v.], final purification by mentally repeating [japam] the mystic om [q.v.] and the five-lettered [punchaucsharam] salutation to shiva [q.v.].——*Puncha siddhaunticay* (पञ्चसिद्धान्तिका - pañchasiddhántiká, San.). From (above + siddhánta, san. dogma). Summary of the five original astronomical Siddhauntams [q.v.]; by Varauha mihiran [q.v.].——*Punchatantram* (पञ्चतन्त्र - pañchatantra, San.; பஞ்சதந்திரம் - pañjathandiram, Tam.). From (above + tantra, san. device). The five devices. Originally a collection of Sanscrit tales and fables in five books, compiled by a bramin, Vishnoo sharman, at early part of Christian era or before. Original of the better-known and smaller Hitopadesh [q.v.], or salutary instruction; also of Brihat katay [q.v.], or original of Arabian nights' entertainments. A Pehlvi or old Persian version of Punchatantram was the first real translation of the work; it was made in the time of Nowsheerwan about A.D. 570, and perished with much of the Pehlvi literature when the Arabs invaded Persia; before its destruction it had been translated into Arabic about A.D. 760, and was called Kaleela damna [q.v.], equivalent of sanscrit Caratacan and Damanacan, the name of two jackals [q.v.], or fables of the bramin Pilpay [q.v.]. The well-known persian Anwar oos sooheily, or lights of Canopus [nacshatram, sooheil], of Hoossain vaeez written about the beginning of the fifteenth century, was an amplification of the Punchatantram; Abool fazl, Acbar's celebrated minister, translated it into simpler persian and called it Iyaur e daunish [q.v.], or criterion of knowledge; a turkish version is Hoomayoon nauma [q.v.]; an oordoo version, called Khirad afroz or illuminator of the understanding, was made in 1803 by Hafeez ood deen ahmed. The hebrew version of the punchatantram is attributed to one Rabbi joel; this was translated into Latin by John of Capua at the end of the fifteenth century; and from this various Italian, Spanish, and German translations were made. The english Pilpay's fables were taken from a french translation. The tamul version of the punchatantram was translated in 1862 by Taundava roya moodelly, a teacher in the College of Fort St. George, from the Mahratta version. With the exception of the Bible and the Pilgrim's progress, there is no work that has been translated into so many languages as the Punchatantram. These stories are not aggregated promiscuously and without method, but are strung together upon some one connected thread, and arranged in the framework of a continuous narrative, out of which they successively spring. The complicated scheme of story-telling, tale within tale, like the Arabian nights, seems to be of Hindoo invention. Compare the twenty-five stories of a demon [vetaulapuncha vimshaty], thirty-two tales of the animated images supporting the throne of Vicramadityan [vicramarca charitram], twenty tales of a swan [hamsavimshaty], &c. The scheme of the punchatantram is that a king in Mahilauropyam, treated as Mylapore in S. indian versions, had three sons who were deficient in ability and application. He made this known to his counsellors and sought their advice. A learned bramin composed in their benefit these five chapters:—Mitra bhedam, dissension of friends; Mitra praupty, acquisition of friends; Caucolookeeyam, inveterate enmity; Labdha nausham, loss of advantage; Asampraicshya cauritwam, inconsiderateness. Through reading these the princes became in six months highly accomplished. Sanscrit versions make the site Pautalipootram on the Ganges. The following is a specimen from Tamul version:—தண்டகாரணியத்திற் சஞ்சரிப்போனாகிய சண்டகருமனென்னும் ஓர் இராக்கதத்தலைவன் அவன் நேரிட்ட ஓர்அந்தணன் தோண்மேலேறி நடத்திக்கொண்டு போவழி, அவ் வேதியன் அவ்வரக்க னடிகள் மிக மெல்லியவாயிருப் பனவற்றைப் பார்த்த, ஐய! அரக்கத்தலைவ! உன்கா லடிகள்எப்படிமெல்லியவாயினவென, அரக்கன்நான் நீராடி யீரம்புலராளவும் நிலன்மீத செல்லேனெனக் கேட்டுச் சிறிதாறு முன்னே தாங்கிப்போய் பிறகு இரா க்கதன் ஓர் குளனில் மூழ்கப்புக்குழிப் பார்ப்பானைப்பார் த்த, யான் நிந்த கருமஞ் செய்தவருகாறும் நீ அடிபெயாற்க, இங்குத்தானே நிற்றியெனச்சொல்லி, பின்னர் ஸ்நானஞ்செய்தனன். அந்தணன் இதைப்பார்த்த இவன் மூழ்கிப்புறம்போந்தானாயல் நாம் இவன் வயிற் றழலின் மூழ்காகிறோம். ஆதலான் ஓடி உய்ய இத்வே

நல்ல சமயம், நீராடிக் கால் புலருமுன் இவன் நடவா னல்லோ என்று தனக்குள் தெரிந்துகொண்டு விரைந்தோடினன் அதுகண்ட அவுணன் யான் வாய்பதறிக் கைக்கெட்டினது வாய்க்கெட்டாமலிழிப்புற்றேன், கடிதில் பின்சென்று கவர்வேன் எனினும் கொண்ட நோன்பு குறையுறுகின்றதென்று மறுக்கமுற்று ஆங்கே நெட்டுயிர்த்து வாளாநின்றனன். ஆதலான் யாதும் உய்த்துணராது இயற்றலாகாதெனச் சொல்லி—"In the forest "of Dandaçauranyam [dandacam], a chief Raucshasan [q.v.] "named Chundacarman met one day a Bramin, upon whose "shoulders he climbed and directed him. The Bramin observing "that the feet of the goblin were slender, asked him, O chief of "the goblins, how is it your feet are slender? The goblin "replied, I do not walk on the ground after bathing till the "water is dried. After going a short distance, the goblin went "to bathe in a tank, and ordered the Bramin to remain there "without stirring till his return. In the meantime, the Bramin "reflected, if the goblin return after bathing, he will not fail "to devour me. Therefore, this is the only chance of escaping "with life. Moreover, he will not walk after bathing before "the water is dried. Having thus considered, he ran away as "quickly as possible. On seeing this, the goblin said to himself; "by speaking rashly I have let go what was within my "power; I cannot even follow him, because of a vow which I "have made. So saying, he stood there on the spot, heaving a "deep sigh. Therefore no work should be done without due "consideration." The following is a specimen from Canarese version:—ಒಂದು ಊರಿನಲ್ಲಿ ಒಬ್ಬ ಮನುಷ್ಯನೂ ಒಂದು ಹುಲಿಯೂ ಸ್ನೇಹಿತರಾಗಿದ್ದು ಒಂದು ಮತೀತಿಗೆ ಹೋದರು - ಆ ಮತೀತಿಯಲ್ಲಿ ಒಂದು ಹುಲಿಯನ್ನು ಒಬ್ಬ ಮನುಷ್ಯನು ಏರಿಕೊಂಡು ಕಠಾರಿಯಿಂದ ತಿವಿಯುತ್ತಾ ಇರುವದಾಗಿ ಚಿತ್ರದಲ್ಲಿ ಬರೆದಿತ್ತು - ಅದನ್ನು ಈ ಮನುಷ್ಯನು ನೋಡಿ ಐಯ್ಯಾ ಹುಲಿ ರಾಯನೇ ನೋಡು ಈ ಮನುಷ್ಯನು ಎಷ್ಟು ಘಟ್ಟಿಗನು ಇಂಥಾ ಕ್ರೂರವಾದ ಹುಲಿಯನು ತಾನು ಹತ್ತಿಕೊಂಡು ಕಠಾರಿಯಿಂದ ಇರಿಯುತ್ತಾನೆ ಎಂದು ಹೇಳಲು ಅದಕ್ಕೆ ಆ ಹುಲಿಯು—ಈ ಚಿತ್ರವನ್ನು ಮನುಷ್ಯಬರೆದು ಇದ್ದಾನೆ ಹುಲಿಯು ಎಂದಿಗೂ ಹೀಗೆ ಬರೆಯಲಾರದು ಎಂದು ಹೇಳಿದ್ದರಿಂದ ಮನುಷ್ಯನು ನಾಚಿ ಕೊಂಡು ಸುಮ್ಮನಾದನು—"In a certain village, a tiger and a man were "friends. They went to a temple. In that temple there was "a drawing, representing a man as mounted on a tiger and "stabbing him with a spear. The man seeing it exclaimed:— "O Sir, O king of tigers? See what a clever man that "is? He has mounted on this fierce tiger and is stabbing "him with a spear. On his saying this the tiger observed:— "The picture was painted by a man and would not have been "thus painted by a tiger [pooly]. Hearing this the man "was ashamed and kept silent." See vol. I (57), (58).——*Punchatiktam* (पञ्चतिक्त - panchatikta, San.). Five bitters. Justicia gendarussa [common gendarussa]; Melia azadirachta [neem]; Solanum xanthocarpum [prickly brinjaul]; Tinospora cordifolia [goolancha]; Trichosanthes cucumerina [wild snake gourd].——*Punchaucsharam* (पञ्चाक्षर - pañchákshara, San.). The five mysterious letters, a Sheiva formula, viz., namashivauya ந, ம, சி, வா, ய [moolamuntram]. See Om. Punchaucsharan is a Hindoo 2nd or pers. name [peyar]; meaning he who has it for his chief muntram [q.v.].——*Punchaula* (पाञ्चाल - páñchála, San.). From (pañchan, san. five); association of five guilds. Sanscrit for Cummaular [q.v.]. Five castes of artizans:—goldsmith, carpenter, blacksmith, brazier, and mason. See vol. I (61) to (70), and the following foot-notes:—history of caste I (61), abbé dubois opinion I (64), punchaular I (67); groups of castes II, 225, hindoo proper names II, 239. The punchaular wear the Janivaura [q.v.] and consider themselves as equal to Bramins [q.v.]. The goldsmiths are admitted to be the head of the confederation and have a caste jurisdiction over the rest. The Punchaular bury their dead [shavacaud] and strictly abstain from meat and intoxicating liquors. They regard themselves as descendants of the divine artificer Vishwacarman and call themselves Vishwa bramins. They assume the title of Acharry [q.v.], wear the holy thread [poonool], and claim the right to perform religious ceremonies among themselves, especially at marriages. They declare that there were originally five Vedams [q.v.], but that Veda vyausan, in order to curtail their privileges, suppressed the fifth [jauty]. See Acharry for the possible origin of this assumption.——*Punchaulamcoorchy* (பாஞ்சாலக்குறிச்சி - páñjálakkuriççi, Tam.). From (páñchála, san. the five artisan caste + kuriççi, tam. village). Site of old village; Tinnevelly dist., Ottapidauram tal.; from Ottapidauram N.E. 1½ miles. Former residence of a poligar [q.v.], a naick [q.v.] of the Cumblattaur caste of the Cataboma naick family. An expedition led against the place in 1755 was recalled. It was besieged in 1767. The next poligars succeeded in 1760, 1791 and 1799. On the place being attacked in 1799, the poligar escaped and fled first to Shivagunga and then to the Tondiman rajah. He was however captured and hanged. The two brothers of this poligar were confined in the Palamcottah jail, whence they made their escape to Punchaulamcoorchy in 1801. After several assaults, the fort was taken by the English and the poligar force routed. The events of the last siege form the subject of a native poem, called the Paunchaulacoorchy sindoo by Namashivauyam.——*Punchaumritam* (पञ्चामृत - panchámrita, San.). From (above + amrita, san. nectar). The mixture of five kinds of food; the divine offering. Generally milk [paul], curds [tyre], ghee [q.v.], sugar [q.v.], and honey [shahad]. In a mixture of these, idols are bathed on special days, and then it is distributed to worshippers.——*Punchaungam* (पञ्चाङ्ग - pañchánga, San.; பஞ்சாங்கம் - pañjángam, Tam.). From (above + anga, san. limb). Means five members; calendar as containing five principal heads. These are not always the same, but the following may be taken as specimen, and note that this is the same whether for Ravy punchaungam or Chaundra punchaungam:—Nacshatram [q.v.] in which the moon happens to be on any particular day; with the time of her passing to the next. Yogam [q.v.], or the space of time during which the sum of the sun and moon's motion amounts to one nacshatram, or 13° 20′, with the time when that is completed. Caranam [q.v.], or space of time during which the moon's motion from the sun amounts to 6°, there being two caranams in a tity [q.v.], and the calendar registering the time of its ending. Tyaujyam [q.v.] of the varjyam [q.v.], being the unlucky period of the day, the mean duration of which is about 4 ghadiyas or 1 hour 36 minutes european time, and pending which all voluntary business of importance ought to be suspended, marking the time of its beginning; when the varjyam occurs at day time, it is called divah, and when at night rautry. Chauram [q.v.]; being an account of the position of the planets [graham], including rahoo [q.v.] ☊ and kait [q.v.] ☋, on any day in the year; and the time when either of them enters any of the four quarters, or paudams [q.v.], of a nacshatram; marking thus the time of their position at every 3° 20′ of the lunar zodiac [raushy chuckram]. Such a punchaungam exhibits also the solar and lunar eclipses [grahanam]; the time when the sun is in the equinoxes [maishauyanam, toolauyanam, vishoo] or the solstices [oottarauyanam, dacshinauyanam], and the time of his entering [sancramanam] a new sign [raushy]. Also birthdays, accessions, and anniversaries of memorable event and feasts of certain gods, goddesses, spirits, patriarchs and other worthies; including the anniversaries of the beginning of the Calpam [q.v.], Manwantarams [q.v.], Mahayoogs [q.v.], and of the four lesser Yoogs [q.v.] of the present Manwantaram. Also local holy days [pundigay], and the feasts of the most considerable pagodas [q.v.], situated about hundred miles around the place for which the calendar is computed. Lastly will be found in the margin certain articles of a civil description, such as the length of the artificial solar days [dinam], and nights, indicated at least once in the course of the month; the sun's entrance [sancramanam] into the different signs [raushy] of the tropical zodiac [raushy chuckram], and predictions of abundance or Vriddhyaurgham, of middle state of prosperity or Samaurgham, and of scarcity or Shoonyaurgham, &c. The punchaungam is sold and read in every village. The system on which it rests rules all the astronomical computations [maunam] of the natives, governs their religious festivals [pundigay] and sacrifices [yanyam], the expiatory ceremonies for the dead, the agricultural dispositions [vellaumay] depend on the contingencies of the seasons [ritoo], and lastly the endless train of observances the epochs of which are determined by the science of astrology. The doctrines on which these humble calendars are calculated have from time immemorial ruled the chronology of many civilized and wealthy nations. The calculation of the measures of time [caulam] is made by a class of astronomers who have received the knowledge from tradition, called Joshies [joshy, jyotisham]. See vol. I, 611.——*Punchaungy* (पञ्चांगी - pañchángí, San.). Village astronomer or astrologer; usually a Bramin and holds his office by descent [inam]. He informs the farmer of the day and hour most favorable for commencing ploughing, and for performing the ceremonies in honor of his deceased relations; so the day and hour most propitious for the celebration of marriage, at which he always attends. He consults his calendar and gives notice of the approach of the principal feasts. He calculates and foretells eclipses, dearths, plenty, the approach of rain, &c. The benediction of the Punchaugy is required by the cultivator on commencing and finishing a dwelling [jauty].——*Punchaupakeshan* (பஞ்சாபகேசன் - pañjábagésan, San.). From (above + ápagá, san. river + ísha, san. lord); epithet of shiva as lord of the country of five rivers, as at Trivaudy near Tanjore. Trivaudy is near five rivers; Coleroon, Cauvery proper, Coodamoorty, Vellaur and Vennaur. Hindoo 2nd or pers. name. Compare Punchanadam [peyar].——*Punchauyoodham* (पञ्चायुध - pañcháyudha, San.). The five weapons or insignia of Vishnoo:—Chuckram [q.v.], a round missile; Dhanoos [q.v.], a bow; Vaul [q.v.], a sword; Dandoo [q.v.], a club; and Chunk [q.v.], a conch.——*Punchayet* (पंचायित - pancháyita, San.). San. from (above + aya, san. to go). A native court of arbitration consisting generally of five persons, but may be more or less. पञ्चमेपरमेश्वर—"in the punchayet is god," is a common saying. A punchayet may be chosen by parties themselves, or appointed by officers of government. Generally for determination of petty disputes, and especially in matters affecting the usages of castes or occupation. The punchayet is identical with the Hebrew and Roman custom of elders sitting at the gate, the γερουσία of the Greeks. Punchayetdar is a member of the arbitration committee. Punchayet nauma is the written decision or verdict of the committee. See vol. I, 112.——*Punchbaub* (پنچ باب - panchbáb, Hind.). From (above + báb, ar. door). Five items

of excise; toddy [q.v.], liquor [sharaub], tobacco [pogauk], ganjah [q.v.] and betel [q.v.].——*Puncheecaranam* (पञ्चीकरण - pañchíkarana, San.). From (above + kri, san. to do). The operation of the five elements [bhootam] in the human body [shareeram]; by the varied union of which, according to the Tatwam [q.v.] system, different operations or acts, of mental faculties or corporeal powers, are considered to be effected. In cosmogony the reduction into union and order of chaos or the discordant principles of matter, by harmoniously blending together of the five elementary substances.——*Punchendriyam* (पञ्चेन्द्रिय - pañchéndriya, San.). From (above + indriya, san. sense). The five senses. According to the Saunkhyam [q.v.] philosophy the five senses [indriyam] are at one stage of creation the causes of all that exists. He therefore who possesses a knowledge of all that relates to the five senses is supposed to know all that is in the world. The Tamul Cooral has the following:—சுவையொளியூறோசைநாற்ற மென்றைந்தின் வகைதெரிவான் கட்டேயுலகு—"the "world is within him who knows the properties of taste, sight, "touch, hearing and smell." Pavanandy [q.v.] in his nunnool [q.v.] classifies all living existences or organized life into five classes according as they are efficiently endowed with one or more of the five senses as follows:—one sense being, having body or sense of touch or feeling, as the vegetable kingdom [vricsham]; two sense being, having body and tongue or sense of touch and taste, as molluscs [chippy], &c.; three sense being, having body, tongue and nose or touch, taste and smell, as white-ants [q.v.], ants [choomtee], &c.; four sense being, having body, tongue, nose and eyes or touch, taste, smell and sight, as beetles [zeerangy], &c.; five sense being, having all the five sense-organs and sense-perceptions, as celestials, men, infernals, beasts, birds, &c.——*Punchseer* (పంచేరు - panchéru, Tel.). Same as Punchair.——*Punj* (پنج - panj, Hind.). Persian five [paunch, puncham]. Punjshamba is Thursday.——*Punja* (پنجه : panjah, Hind.). From (panj, pers. five). The hand with the fingers extended. A representation of the same mounted on a staff and carried in procession at the Moharram [q.v.], supposed to represent the hand of Ally [q.v.], Hoossain's [q.v.] father. Also emblematic of the creator.——*Punjam* (پنجم - panjum, Hind.). Fifth. Punjam hissa, from (hissah, ar. share) is the fifth portion of the revenue collection.

PUNDAURAM (பண்டாரம் - pandáram, *Tam.*). From (pándu, san. white + ranga, san. color) [pandoo]. A Sheiva devotee; officiating priest at temples [coil, pagoda] of Shiva [q.v.]. The name comes from their smearing themselves with ashes [tirneer, vibhooty]. Many are professed mendicants, but some are learned men. The Lingayets [q.v.] have no Pundaurams. Hindoo third name. See vol. I (68).——*Hill pundauram* (മലമ്പണ്ടാരം - malampantáram, Mal.). A tribe without clothing, implements, or huts of any kind, living in holes, rocks, or trees in Travancore. They bring wax [mom], ivory [dant], and other produce to the Arayans, and get salt [ooppoo] from them. They dig roots [gadda], snare the ibex [saddleback] of the hills and jungle-fowls [q.v.], and eat rats [ely] and snakes [sarpam] and even crocodiles [mugger]. They speak Malayalam [q.v.] in a curious accent.

PUNDIGAY (उत्सव - utsava, *San.*; عيد - íd, *Hind.*; ಹಬ್ಬ - habba, *Can.*; పండుగ - panduga, *Tel.*; അടിയന്തരം - atiyantaram, *Mal.*; பண்டிகை - pandigai, *Tam.*). San. from (ud, san. up + su, san. to possess power), meaning a moment of elevation. Hind. from (aud, ar. returning). Can. from (habbu, can. to spread). Tel. from (pandu, tel. ripen). Mal. from (ati, mal. fixed + antara, san. interval). Festival. See vol. I (92). Hindoo festivals may be classified, in respect of mode in which the dates are regulated, into:—"*a*" local and regulated by both calendars [punchaungam];—"*b*" general and regulated by solar-sidereal calendar [madhyamasowramaunam, ravy punchaungam] only;—"*c*" general and regulated by lunar [chaundramaunam] considerations only;—"*d*" common to both the above systems;—"*e*" general and regulated by the composite luni-solar calendar [chaundramaunam, chundrapunchaungam] only. The nomenclature of the festivals is extremely various and complicated. It is based for the most part on astronomical facts, as for instance on the mutual position of the sun [sooryan] and moon [chundran], the occurrence of which situation marks the time for the festival; but it also introduces the names of the hindoo pantheon. The following details give further information.——**(1)** The local festivals are:—Cottye ootsavam, Garoodotsavam, Gungah yautray, Lacshadeepam, Magizhady saivay, Maha magham, Magham, Oonjal tirnaul. Their nomenclature is generally descriptive.——**(2)** The general festivals regulated wholly by the solar-sidereal calendar [madhyamasowra maunam] are:—Audy pathinett, Audy pundigay, Bhadradeepam, Bhogy pundigay, Cheitrotsavam, Dacshinauyana poonyacaulam, Lacshadeepam, Macarasancramanam, Mahasancraunty, Nyauyit kizhamay vratam, Oottarauyana poonyacaulam, Pandasairvay, Pathinettaum perook, Pongal, Pooratanshy shani kizhamay, Sancraunty, Tamul new year, Vishoo, Vishoo poonya caulam. The nomenclature here may be analysed as falling under four heads; the plus sign showing compound words:—"*a*" sign [raushy] of solar zodiac [raushy chuckram] + term showing sun's entry [sancramanam] therein [macara sancramanam];—"*b*" other astronomical solar facts [dacshinauyana poonyacaulam, maha sancraunty, oottarauyana poonyacaulam, sancraunty, vishoo, vishoo poonyacaulam];—"*c*" solar month + number of the day in that month, as in European system, this being rare [audy pathinett];—"*d*" solar month + name of ceremony belonging thereto [audy pundigay, cheitrotsavam, poorataushy shani kizhamay].——**(3)** The general festivals regulated wholly by lunar [chaundramaunam] considerations are:—Acsha tadiya, Amavausyay, Anantachatoordashy, Aparapacsham, Ashtamy, Aushwinashooddham, Ayoodha poojay, Balarama jayanty, Bhaunoovidiya, Bhascara saptamy, Bheeshma yecaudashy, Bhootachatoordashy, Cauman pundigay, Chatoorty, Chatoordashy, Dashamy, Deepauvaly, Doorganavamy, Dusserah, Dwaupar yoogaudy, Garooda punchamy, Gocoolaushtamy, Gowry, Haritaulica, Hootaushana powrnamy, Jayanty, Kaliyoogaudy, Kedaura gowryvratam, Krishna ashtamy, Krishna jananam, Krishna jayanty, Krishna pacsham, Krita yoogaudy, Madhyaushtamy, Maha navamy, Maha shivarautry, Mahaulyam, Mahaulya amavausyay, Mahaulya pacsham, Mahaulyaurambham, Mooccoty yecaudashy, Naraca chatoordashy, Narsimhajayanty, Navamy, Nauga punchamy, Naugoolachavity, Navarautry, Oopaucarmam, Oottaunaicaudashy, Pillayaurchatoorty, Poornimay, Powrnimay, Pratamah yecaudashy, Punchamy, Ratasaptamy, Rig oopaucarmam, Rishypunchamy, Samvatsaraudy, Saptamy, Saraswaty poojaurambham, Saraswatypoojay, Scandashasty, Shashty, Shivarautry, Shooclapacsham, Shrauvana powrnimay, Shreerama navamy, Soobbaroya shashty, Teloogoo new year, Trayodashy, Triteeyay, Varalutchmy vratam, Veicoonta yecaudashy, Vijayadashamy, Vinauyacachatoorty, Vyausapoonnama, Yamatarpanam, Yecaudashy, Yoogaudy. The terms of the nomenclature may be thus analysed:—"*a*" name or epithet of a deity + tity [q.v.] sacred to him or her; very common; it is understood that this happens on a certain one of the lunar months [chaundra mausam] which is not mentioned as being supposed to be understood [ananta chatoordashy, bhaunoovidiya, bheeshma yecaudashy, bhoota chatoordashy, bhascara saptamy, doorganavamy, garooda punchamy, hootaushana powrnamy, krishna ashtamy, madana trayodashy, naugapunchamy, naugoolachavity, pillayaurchatoorty, rishypunchamy, scandashashty, shreeramanavamy, soobbaroyashashty, veicoonta yecaudashy, vinauyaca chatoorty, vyausa poonnama];—"*b*" lunar month + tity; means the same thing, but the name of the month is here given, and that of the deity omitted [aushwina shooddham, shrauvana powrnimay];—"*c*" lunar month by itself [shrauvanam];—"*d*" nacshatram by itself [moolam];—"*e*" tity by itself [acsha tadiya, amavausyay, aparapacsham, ashtamy, chatoordashy, chatoorty, dashamy, gocoolaushtamy, madhyaushtamy, mahaulya amavausyay, mahanavamy, maulapoonnama, mooccoty yecaudashy, naraca chatoordashy, navamy, oottaunaicaudashy, poornimay, powrnimay, pratamah yecaudashy, punchamy, ratasaptamy, saptamy, shashty, trayodashy, triteeyay, vijayadashamy, yecaudashy].——**(4)** The general festivals regulated by both calendars [punchaungam], that is to say occurring on one date for the Tamuls and under the same or an analogous term on another date for the Teloogoos, are Tamul new year, and Teloogoo new year.——**(5)** The general festivals regulated by the composite luni-solar calendar [chaundramaunam] are very numerous:—Ardrah darshanam, Ashtamy, Audy amavausyay, Audy pooram, Auny amavausyay, Auny tirmanjanam, Auvany avittam, Auvany moolam, Bharany, Bharany deepam, Caurtigay, Chittraypowrnimay, Garoodotsavam, Hastodayam, Magham, Maghatirnaul, Mahamagham, Maurgalytirmanjanam, Maushimagham, Oottaram, Pooram, Poosham, Pungoonyoottaram, Shany trayodashy, Tengayair, Tircaurtigay, Tirvauthiray, Tye amavausyay, Tyepoosham, Vanabhojanam, Vishnoodeepam, Wonam. The terms of the nomenclature may be thus analysed:—"*a*" solar month + tity, meaning the point of time when the moon is in such a stage of growth in that solar month [audy amavausyay, anny amavausyay, chittraypowrnimay, tye amavausyay];—"*b*" solar month + nacshatram, meaning the point of time when the moon stands in that nacshatram in that solar month [audypooram, auvanyavittam, auvany moolam, maushimagham, pungoonyoottaram, tye poosham];—"*c*" nacshatram alone, being short for the latter [bharany, caurtigay, magham, mahamagham, oottaram, pooram, poosham, tircaurtigay, tirvauthiray, wonam];—"*d*" week day + tity, meaning whenever these two coincide [shany trayodashy];—"*e*" some astronomical luni-solar fact [ardrah darshanam, hastodayam].——**(6)** There are various nomenclature terms for festivals which are indeterminate as regards the astronomical facts. These may be analysed thus:—"*a*" deity + festival name [bheemarautry, bhogy pundigay, bramhasauvitry, bramhotsavam, doorga poojay, garoodotsavam, gowry, gungahyautray, mahashivarautry, shivarautry, vishnoodeepam, yamatarpanam];—"*b*" deity + vow [kedaura gowryvratam, saraswaty poojaurambham, saraswaty poojay, varalutchmy vratam];—"*c*" deity + birthday [ayenaurtirnaul, balaramajayanty, krishna jananam, krishna jayanty, narsimha jayanty, permaultirnaul, shreejayanty];—"*d*" a ceremony, general descriptive term [annytirmanjanam, ayoodhapoojay, bhadradeepam, bharanydeepam, calyaunam, cauman pundigay, cottye ootsavam, darshanam, deepam, deepauvaly, dwauparyoogaudy, dusserah, graumadevatay, haritaulica, holy, jautrey, jayanty, kaliyoogaudy, kritayoogaudy, lacshadeepam, lingapoojay, magizhadysaivay, mahaulyaurambham,

mahaulyam, mahaulya pacsham, maurgaly tirmanjanam, navaraatry, navaunicam, nyauyitkizhamay vratam, oonjaltirnaul, oopaucarmam, oopavausam, ootsavam, pandasairvay, pathinettaumperook, pongal, poonyacaulam, pooshcaram, pradosham, puncharautram, ratotsavam, rig oopaucarmam, sairvay, samvatsaraudy, saumavaidy oopaucarmam, sevay, swarga dwauram, tairottam, tarpanam, tengayair, tircalyaunam, tirnacshatram, tirnaul, vanabhojanam, varshaurambham, vratam, yajoor oopaucarmam, yoogaudy].——**(4)** For Mahom. festivals see Eed.

PUNDIT (पण्डित - pandita, *San.*). From (pandá, san. wisdom). A Bramin [q.v.] who makes some branch of Sanscrit [q.v.] learning his special study, and teaches it. There is a Tamul proverb :—சொல்லாமல் இருக்கிறவனே பண்டிதன்—"he who is of few words is a pundit." Also the law officer formerly appointed in the Company's courts for the interpretation of braminical law. Hindoo third name [peyar, punt].——*Pandah* (پنڈا - pandá, Hind.). Head priest [mahant, maryauday].——*Punt* (पण्डित - pandita, San.; पंत - panta, Mahr.). Abbreviation of Pundit. Mahratta term. In the Circars [q.v.] a Bramin [q.v.] employed as a writer by the Government. Also used as third name [peyar].——*Puntooloo* (పంతులు - pantulu, Tel.). Plural of Punt. In the north of presidency a caste title among Niyogy [q.v.] bramins [q.v.]; is also an official title among other bramins [peyar]; is also the title of the village schoolmaster.

PUNDRY (பன்றி - panri, *Tam.*). From (pari, tam. to dig). Hog [soor]. For common pundry or domestic hog and cautt pundry or wild hog see Soor. For moollampundry or hedge hog see Moollely. For cadal pundry see below. Pundry is a not uncommon plant first term indicating coarse, large or wild. Ex., where transl. is of second term :—Andropogon contortus (panrippul), grass; Dioscorea pentaphylla (pandimukkudumpa), snout + esculent root; Momordica charantia (panrippudal), trichosanthes anguina; Trapa bispinosa (panrimondángizhangu), to smell + root; (panrimottai), lump. See gloss. paragraphs.——**(1)** *Pundry meen* (शंकु - shanku, San.; دلفين - dulfín, Ar.; خوک ماهی - khokmáhí, Pers.; سوس مار - súsmár, Hind.; ಹಂದಿಮೀನು - handimínu, Can.; ಪಂಜಿಮೀನು - panjimínu, Too.; గండుమీను - gandumínu, Tel.; പന്നിമീൻ - pannimín, Mal.; பன்றிமீன் - panrimín, Tam.). San. from (shank, san. to fear). Pers. from (khok, pers. hog + máhí, pers. fish). Hind. from (shishu, san. child + mára, san. killer). Can. from (handi, can. hog + mínu, can. fish). Tel. from (gandu, tel. large + mínu, tel. fish). Tam. from (panri, tam. hog + mín, tam. fish). Ar. also (bintulbahr), meaning daughter of the sea. Title otherwise Goose beak, Sea goose. Equivalent of the family delphinidæ, cetacea, mammalia [sastanam, 29], of naturalists [jantoo]. Popularly the word dolphin is, for a reason not yet ascertained, applied to the fish Coryphæna [dolphin fish], celebrated for its changeable tints when dying. By naturalists however the term is a family as above, including in these seas the Porpoise and the Caaing whale [cadalpundry].——**(2)** *Cadalpundry* (जलशूकर - jalashúkara, San.; دلفين - dulfín, Ar.; خنزيرالبحر - khinzírulbahr, Pers.; سوسمار - súsmár, Hind.; لالومبا - lálomba, Malay; ನೀರುಹಂದಿ - nírubandi, Can.; ಕಡಲ್‌ಪಂಜಿ - kadalpanji, Too.; నీరుపంది - nírupandi, Tel.; കടല്പന്നി - katalpanni, Mal.; கடற்பன்றி - kadarbanri, Tam.). San. from (jala, san. water + shúkara, san. hog); from roundness of back as it appears in water. Pers. from (khinzír, ar. hog + bahr, ar. sea). Hind. from (shishu, san. child + mára, san. killer). Can. from (níru, can. water + handi, can. hog). Too. from (kadal, too. sea + panji, too. pig). Tel. from (níru, tel. water + pandi, tel. pig). Tam. from (kadal, tam. sea + panri, tam. hog). Title otherwise Black dolphin, Hog fish, Porpoise, Sea hog. Delphinus perniger, delphinidæ cetacea, mammalia [sastanam, 29], of naturalists [jantoo]. Twenty-six teeth on each side, above and below, obtuse, slightly curved inwards. Of an uniform shining black above; beneath blackish. Porpoises or Marine dolphins generally are characterised by a convex forehead, with a protruding muzzle which forms a sort of beak; they have teeth in both jaws, numerous and conical, broad and high cranium, nasal passage vertical, no cæcum. They are gregarious in habit, carnivorous and extremely swift. They must not be confounded with the dolphin of sailors, which is a true fish, Coryphæna hippurus [dolphin fish], of a great velocity and brilliant colors, changing like rainbow tints when the fish is dying. The modern porpoise is the dolphin of the ancients, the ἱερὸς ἰχθὺς represented in all the old pictures and sculptures. The porpoises are distinguished from all their allies by their great strength and ferocity, being the only cetaceans which habitually prey on warm-blooded animals, for, though fish form part of their food, they also attack and devour seals and various species of their own order.—"*a*" Allied to the species mentioned at head is the Plumbeous dolphin. Delphinus plumbeus of naturalists. Thirty-six teeth on each side in the upper jaw and thirty-two in the lower jaw. Of an uniform leaden color, with the lower jaw white. Has been taken on the Malabar coast.—"*b*" There are several others on the Madras coast generally; as Delphinus gadamu; Delphinus lentiginosus; Delphinus maculiventer or Spot-bellied dolphin; Delphinus fusiformis or Spindle-shaped dolphin; Delphinus pomeegra.—"*c*" Allied is the Caaing whale, an Orkney name, Globicephalus indicus, delphinidæ, cetacea, mammalia [sastanam, 29], of naturalists. Called also Black whale, Grindval, Pilot fish, &c. Of an uniform leaden black color, slightly paler beneath; similar in form and size to Globicephalus deductor of European seas, but the teeth fewer and larger than in that species, being six or seven above, seven or eight beneath. Head globular in front; the dorsal fin is high, situated nearer to the head than to the tail; the flippers very long and narrow; the fingers possessing an unusually large number of bones. This is much more a porpoise than a whale [timingilam].——*Punniyan* (പന്നിയൂർക്കാർ - panniyúrkkár, obl.; പന്നിയൂർക്കാരൻ - panniyúrkkáran, pers. sing.; പന്നിയൂർക്കാരർ - panniyúrkkárar, pers. pl., Mal.). Punniyore numboory bramins as opposed to Chovoor. To be distinguished from Paniyan.——*Punniyore* (പന്നിയൂർ - panniyúr, Mal.). Means boar village. Sanscrit name (varáhagráma), meaning same. Vishnoo [q.v.] in his boar [varauham] incarnation [avatar] is worshipped here. Village or villages; Malabar dist., Chiracal tal.; not exactly identified. Here Numboory [q.v.] bramins [q.v.] first settled, being Veishnavite by religion. Compare Chovoor.

PURDAH (پردہ - pardah, *Hind.*). From persian. A curtain, especially one which hides the women of a family.——*Purda nisheen* (پردہ نشین - pardahnishín, Hind.). From (above + nishín, pers. seated). One who lives within the curtain [gosha nisheen].

PURPLE GRASS (برتی - birtí, *Hind.*; ఊదగడ్డి - údagaddi, *Tel.*). Title from color throughout. Tel. from (úda, tel. purple + gaddi, tel. grass). Botanically Panicum [priyangoo] flavidum, retz., graminaceæ [vricsham, 156]. Alias Panicum brizoides, colonum, flaccidum. Culm slender, erect, simple; leaves linear, glabrous; racemes six to twelve, alternate, much shorter than the interstices, by degrees shorter; spikelets solitary, in two rows, somewhat roundish-oblong, acutish, glabrous; lower glume rounded, upper ones a little shorter than the florets, hermaphrodite ones hooked at the apex, a little wrinkled; both in wet and dry situations; parts of the plant are often tinged with purple.——*Large purple grass* (పెద్దఊద - peddaúda, Tel.; மருக்குறுப்புல் - marukkuráppul, Tam.). Title from size and color. Tel. from (pedda, tel. large + úda, tel. panicum flavidum, retz.). Tam. from (maru, tam. fragrance + kurá, tam. webera corymbosa, willd. + pul, tam. grass). Title otherwise Hedge-hog grass, Twisted grass. Botanically Panicum [priyangoo] stagninum, retz., graminaceæ [vricsham, 156]. Culms 1-4 feet, ascending; leaves soft and smooth; mouth of the sheaths ciliated; spike compound, erect; partial ones alternate; spikelets ovate-oblong, tubercled, bristly and ciliated; lower glume ovate-elliptic, acute, a half shorter than the flower, upper one awned; in wet cultivated ground, flowering in the rainy season.——*Matted purple grass* (श्यामक - shyámaka, San.; ಜಡೆಶಂಕರಹುಲ್ಲು - jadeshankarahullu, Can.; ఊదగడ్డి - údagaddi, Tel.). Title from appearance. San. from (shyáma, san. dark-brown). Can. from (jade, can. matted + shankara, san. happy making + hullu, can. grass). Tel. means purple grass. Botanically Panicum [priyangoo], colonum, linn., graminaceæ [vricsham, 156]. Alias Echinochloa colonna; Oplismenus colonus. Culms below resting on the ground and rooting, above sub-erect, branched, a little compressed, smooth; leaves short, smooth, tapering from the base to a sharp point; spikes compound, secund, seven to nine, alternate, distant, spikelets in four series; glumes scabrous, mucronate, unequal, three-nerved; common in cultivated fields; one of the best grasses for forage [ghaus].——*Quilled purple grass* (శల్లఊద - shallaúda, Tel.). Title from appearance. Tel. from (shalamu, tel. porcupine quill + úda, tel. panicum flavidum, retz.). Botanically Panicum [priyangoo] helopus, trin., graminaceæ [vricsham, 156]. Alias Panicum hirsutum. Culm 1-2 feet, decumbent, rooting, ascending, knots bearded; sheaths hairy; racemes alternate, much longer than the interstices; spikelets somewhat solitary, loosely imbricated, ovate, acute, densely pubescent hairy; lower glume four times shorter than the florets, hermaphrodite one acuminate, wrinkled; pastures and borders of cultivated ground.

PURTY (పర్తి - parti, *Tel.*). Uncultivated land; village. Suffix in place names, as Peddapurty, meaning large waste.

PURWANNA (پروانہ - parwánah, *Hind.*). From the persian. A license or pass [rawauna].

PUSHM (ऊर्णा - úrna, *San.*; پشم - pashm, *Pers.*; ಹಣ್ಣೆ - hanne, *Can.*; బొచ్చు - bottsu, *Tel.*; ആട്ടുരോമം - átturómam, *Mal.*; ஆட்டுரோமம் - átturómam, *Tam.*). San. from (vri, san. to cover). Mal. and Tam. means sheep + hair [lomam, romam]. Wool. The different kinds generally employed in trade are of two sorts, black, and mixed grey. Real wool-bearing sheep [and] are met with only in Mysore and Coimbatore. In other parts of the country, the sheep are covered with a shaggy hair, resembling that of goats [velland]. An imported article is shawl [q.v.] wool, a downy substance, found next the skin and below the thick hair of the Thibetan goat. Pushmee is woollen. Pushmeenah is a woollen cloth especially from Cashmere. For wool of plants see Cotton.

PUTTAN (പട്ട - patta, *Mal.*; பட்டன் - pattan, *Tam.*). Generally appears as Puttar, honorific plural. From (bhatta, san. lord).—"*a*" Title among Tamul bramins of Malabar; also borne by Shoodras who are astrologers [joshy] and serve as carriers. The chief puttar settlements in malabar lie in the palghaut talook; the puttar are mostly worshippers of shiva; their occupation is trading and the conveyance of commodities into the interior [jauty]; see vol. II, 100.—"*b*" In tamul country title applied to a goldsmith [tattaun]; also applied to members of the Punchaula [q.v.] caste in districts about Madras [peyar].——*Pattairy* (പട്ടേരി - pattéri, Mal.). Corruption of Bhattatiry.

PUTTICONDAH (పత్తికొండ - pattikonda,* *Tel.*). From (patti, tel. cotton + konda, tel. hill); from a shepherd who first cleared the jungle and cultivated cotton [q.v.].——**(1)** Talook, Kurnool district. Tahsildar's pay Rs. 175. Area 1,134 square miles. Population 138,703. Language mainly Teloogoo and Canarese to a small extent. On W. of district. Bounded N. by Toongabudra, S. by Gooty and Tadpatry talooks of Anantapore, E. by Ramalcottah and Coilcoontla talook, and W. by Aulore and Adony talooks of Bellary district. Till 1858 it belonged to Bellary district, when it was called Punchapollem being under the sway of five poligars. Their capitals were at Chennampully, Cuppatraula, Devanacondah, Maddikera, and Pyaupaly. At all these places are the remains of fine hill forts but those at the first two are greatly demolished. The first and last families are extinct, the others being pensioners. Being on high road between Hyderabad and Southern provinces, it suffered very much in latter part of eighteenth century from invasion by Hyder and Tippoo, as well as the Mahrattas, and from internal disturbances between Poligars [q.v.] and Jagheerdar [q.v.] of Adony, so that when the country came under British rule in 1800, a very large portion of the land had been left uncultivated. In 1802, the survey and assessment of the lands was commenced by Lieutenant-Colonel Munro and brought to close about the end of 1806. The triennial and decennial leases of villages were then given. But this having failed, the ryotwarry [q.v.] system was introduced in 1822, modified by Chowtye [q.v.] and Trijye [q.v.] reductions. These schemes lasted till A.D. 1858 when Mr. Pelly's scheme was introduced. In the centre and towards the east and south the country is hilly, gradually rising till it terminates in the flat-topped Yerramala. Lying between the Carnautacam [q.v.] country and Telingana [q.v.], the Lingayets [q.v.] or Canarese-speaking people are to be found in larger number than in any other talook. In the northern and western portions which form the valley of the Hindry, the soil is generally regady [regar] or black. Formerly noted for rich diamond [vajram] fields. Weaving of cotton [q.v.] clothes and cumblies [q.v.] is the chief industry in the talook and cotton and castor [aumanac] oil seeds and grams [q.v.] the principal exports. The talook is chiefly dependent on S.W. monsoon [q.v.]. The Hindry is the chief river. In the hilly parts the spring level is high and shallow wells are dug for irrigation purposes at little cost. There are seventy-seven tanks [q.v.] and sixty-three spring channels [q.v.] under which wet cultivation is carried on, but the tanks are not large except at Kereybelagull. Pyaupalay and Yainoogamurry are military camping grounds. Places of archæological interest:—Candanauty, Chennampully, Cotacondah, Cuppatraula, Devanacondah, Goondaula, Keirpully, Maddikera, Moonimadoogoo, Peravaly, Putticondah, Pyaupaly, Yerragoody. Principal Trig. stations:—Kereybelagull, Poolicondah, Shiddannaghatt. The leading places, &c., in the talook are the following.——*Caurlacondah* (కారుకొండ - kárlakonda, Tel.). From (káru, tel. black + konda, tel. hill). Hill; lat. 15° 19′; long. 77° 39′; from Kurnool S.W. 46 miles; from Putticondah S.E. 9 miles. Near Coilcoontla.——*Codoomoor* (కొడుమూరు - kódumúru, Tel.). From (kodumu, tel. pot + úru, tel. village). Village; pop. 5,525; acres 7,245; lat. 15° 41′; long. 76° 49′; from Kurnool W.S.W. 22 miles; from Putticondah N.E. 27 miles. Important weaving place noted for cotton [q.v.] and silk [puttoo] cloths, chiefly exported to Mysore. Weekly market on Saturday.——*Cotacondah* (కోటకొండ - kótakonda, Tel.). From (kóta, san. fort + konda, tel. hill). Village; pop. 1,990; acres 8,766; lat. 15° 35′; long. 77° 45′; from Kurnool S.W. 28 miles; from Putticondah N.E. 20 miles. Former seat of a poligar [q.v.]. Permappa naidoo, the ancestor, was taliyaur [q.v.] of the village of Gonegandla in Kurnool. On the fall of Vijianugger he obtained the cauvaly [q.v.] of the districts of Adony, Gadwal, Kurnool, Moodgull, and Ryechore and served with 500 men. One of his descendants, Madappa naidoo, served under Aurungzeeb and procured from him a confirmation of the cauvaly [q.v.] and the districts of Cotacondah and Cuppatraula. Asaf jah continued the districts on the same terms. A partition then took place between two branches of the family, one getting Cotacondah and the other Cuppatraula. In 1770 Basaulut jung, being unable to enforce payment of peshcush [q.v.], called in Hyder, who reduced the forts. The poligars [q.v.] had various fortunes. Munro resumed this place and granted the family a pension. Old hill-fort and ancient temple.——*Cumbagherry* (కంబగిరి - kambagiri, Tel.). From (kambamu, tel. pillar + giri, tel. hill). Hill, Place of pilgrimage. Rock and temple. Fine brick [shengal] built gopooram [q.v.] 4 miles from Rancherla rock.——*Cuppatraula* (కప్పట్రాళ్ల - kappatrálla, Tel.). See sep. title.——*Devanacondah* (దేవనకొండ - dévanakonda, Tel.). From (dévanna, tel. proper name + konda, tel. hill). Village; pop. 2,347; acres 4,341; lat. 15° 32′; long. 77° 36′; from Kurnool S.W. 39 miles; from Putticondah N. 10 miles. Former residence of a Poligar [q.v.]. The ancestor served under the Beejapore government with 100 peons [q.v.] and held Devanacondah for a peshcush [q.v.] of Canteroy pagodas [q.v.] 812·5. His son having been engaged in some disturbances under Nausir jung was taken and circumcised. Family now extinct. Fort. Copper and silver idols and dolls and curtain cloths made here. Weekly market on Wednesday.——*Doodcondah* (దూదేకొండ - dúdékonda, Tel.). From (dúdi, tel. cotton + konda, tel. hill). Village; pop. 1,028; acres 9,657; lat. 15° 27′; long. 77° 34′; from Kurnool S.W. 44 miles; from Putticondah N. 4 miles. Former seat of a Poligar. Family now receive small pension.——*Goondaula* (గుండాల - gundála, Tel.). From (gundu, tel. rock + ila, tel. ground). A place of pilgrimage; pop. 60; acres 1,593; lat. 15° 21′; long. 77° 46′; from Kurnool S.S.W. 40 miles; from Putticondah E.S.E. 14 miles. Ancient Vishnoo temple. By shutting the doors and letting light through a hole in the door made for the purpose, the gopooram [q.v.] is seen reflected on the floor in a position which is the reverse of a reflected object. Annual festival from fourteen to twenty-five Cheitram [mausam] or in march or april.——*Hindry* (హింద్రి - hindri,* Tel.). See sep. title.——*Keirpully* (ఖైరుపల్లి - khairupalli, Tel.). From (khair, hind. alms + palli, tel. village). Village; pop. 1,656; acres 7,396; lat. 15° 33′; long. 77° 31′; from Kurnool W.S.W. 42 miles; from Putticondah N. 11 miles. Vishnoo temple. Annual festival, Teloogoo new year's day [pundigay, 4]. On the second day of the festival, right [valangay] and left hand [yidangay] castes [jauty] carry on mimic warfare with cow-dung cakes [bratty].——*Kereybelagull* (ಕೆರೇಬೆಳಗಲ್ಲು - kerébelagallu, Can.). From (keré, can. tank + bella, can. white + kallu, can. rock). Village; pop. 2,025; acres 10,380; lat. 15° 49′; long. 77° 43′; height of hill 1,422 feet; from Kurnool W. 25 miles; from Putticondah N.N.E. 31 miles. Trig. station in lat. 15° 48′ 45·61″; long. 77° 43′ 26·83″; height 1,423 feet; from Kereybelagull S.E. 1 mile; from Putticondah N.N.E. 31 miles.——*Maddikera* (మద్దికెర - maddikera, Tel.). See sep. title.——*Peravaly* (పెరవలి - peravali, Tel.). From (pera, tel. awe-inspiring + vali, tel. god of the winds). After Hanooman. Village; pop. 2,664; acres 7,441; lat. 15° 17′; long. 77° 33′; from Kurnool S.W. 52 miles; from Putticondah S. 7 miles. Former site of a settlement of Goozeratties [q.v.]. Old temple of Rungasawmy. Annual festival in February from 17th to 25th Phaulgoonam [mausam] or march.——*Poolicondah* (పులికొండ - pulikonda, Tel.). From (puli, tel. tiger + konda, tel. hill). Hill; lat. 15° 28′; long. 77° 37′; height 1,802 feet; from Kurnool S.W. 39 miles; from Putticondah N.E. 7 miles. Trig. station in lat. 15° 28′ 11·30″; long. 77° 38′ 24·13″; height 1,802 feet; from Pundicona N.E. 3 miles; from Putticondah N.E. 8 miles.——*Pundicona* (పందికోన - pandikóna, Tel.). From (pandi, tel. hog + kóná, tel. ravine). Village; pop. 2 108; acres 12,917; lat. 15° 27′; long. 77° 37′; from Kurnool S.W. 42 miles; from Putticondah N.E. 5 miles. Poligar same family as Doodcondah. Now small pension.——*Putticondah* (పత్తికొండ - pattikonda, Tel.). See below.——*Pyaupaly* (ప్యాపలి - pyápali, Tel.). See sep. title.——*Rampore* (రామపురం - rámapuram, Tel.). See sep. title.——*Shiddannaghatt* (సిద్దన్నఘట్టు - siddannaghattu, Tel.). From (siddana, tel. proper name + gattu, tel. border). Trig. station; lat. 15° 14′ 02·94″; long. 77° 54′ 44·61″; height 2,121 feet; from Caloogotla S.S.W. 29 miles; from Kurnool S.S.W. 43 miles; from Putticondah S E. 26 miles; from Pyaupaly E. 9 miles.——*Tooggaly* (ತುಗ್ಗಲಿ - tuggali, Can.). Village, Railway station; pop. 1,867; acres 11,398; lat. 15° 19′ 06″; long. 77° 36′; from Kurnool S.W. 49 miles; from Putticondah S.S.E. 6 miles.——*Varacoor* (వరకూరు - varakúru, Tel.). From (varakamu, tel. grain, panicum miliaceum, linn. + úru, tel. village). Village; pop. 1,012; acres 3,817; lat. 15° 42′; long. 77° 47′; from Kurnool W.S.W. 23 miles; from Putticondah N.N.E. 26 miles. Former residence of a Poligar. The family now reside in Cuddapah district.——*Yerramala* (ఎర్రమల - erramala, Tel.). See sep. title.——**(2)** Village, Talook head-quarters; Kurnool dist., Putticondah tal.; pop. 4,383; acres 11,319; lat. 15° 24′; long. 77° 33′; from Cumbum W.S.W. 106 miles; from Kurnool S.W. 46 miles; from Madras W.N.W. 244 miles; from Nundiaul W. 65 miles; from Pyaupaly W.N.W. 19 miles. On the road between Gooty and Adony, about 12 miles from Aspry railway station. Three miles west runs the Hindry. Built in the time of Harihara roya in fourteenth century. A shepherd first cleared the jungle and cultivated cotton [q.v.]. Vencata rajah, the descendant of Conairy royan, a Vijianugger prince to whom the village was given in jagheer [q.v.], removed the village to near the hill. After Vencata rajah's family became extinct, Bojjappa naidoo, Poligar of Devanacondah, an ancestor of the present Poligar of Maddikera, took possession of the town, but was soon ousted by the Mahomedans, who annexed it to the Adony district. A Mahomedan named Shere ally babe sahib obtained the village in jagheer [q.v.] and held it for twenty years residing in the hill fort. In A.D. 1756 Basaulut jung obtained

the jagheer of Adony, and in 1761 he gave Putticondah in jagheer to Oottaman. Meer buksh subjar jung, Tahsildar [q.v.] of Sanoogondla, with the assistance of Lally soon afterwards seized and plundered the place. The town passed to the British with the Ceded districts [q.v.] in 1800. Sir Thomas Munro, Governor of Madras, died here on the 6th June 1827 of cholera. Government constructed a fine cut-stone well with a mantapam [q.v.], and grove of tamarind [q.v.] trees around it to his memory. Munro-pettah was also built on this occasion. Weaving industry. Weekly market on Monday. Annual festival in Keshava sawmy temple from 22nd to 30th Cheitram [mausam] or in March-April.

PUTTOOCOTTAH (பட்டுக்கோட்டை - pattukkóttai, *Tam.* patukóta *). From (patti, tam. robbery + kóttai, tam. fort) [padoo]. Vuttamullay narrain, a robber chieftain, built the town.——(1) Talook, Tanjore district. Tahsildar's pay Rs. 175. Area 904 square miles. Population 271,374. Language Tamul. South coast of district. Boundaries :—N. Tanjore and Munnargoody talooks, S. sea, E. Tritrapoondy talook and sea, W. Poodoocottah state and Madura district. An open flat, sloping towards the east. Soil, generally sandy and in some parts red. Agricultural and export of rice [q.v.] and cocoanuts [q.v.]. Import of betel-nuts [q.v.] from Ceylon. Irrigation by rain-fed tanks [q.v.]. Zemindarries :—Ativetty, Mathoocore, Nedoovausal, Palayavanam, Paupanaud, Pautharancottah, Shendangoody, Shillattore, Shingavanam. Places of archæological interest :—Adiramputnam, Arantaungy, Arasarcoolam, Aundacottay, Auvidayaurcoil, Carsaivayal, Chinnaauvidayaurcoil, Colloocaud, Maraimadaky, Mungalam, Nedoovausal, Neyvaily, Neyvuttaly, Okkadar, Parcullcottah, Parmandore, Periyauloodaiyarcoil, Pillaivayal, Puttoocottah, Saitbauvachuttram, Shauttacoody, Shevalavayal, Shillattore, Tirvainam, Vadacherry, Vellanla vidoothy, Vigneshwarapooram, Vishwanautapooram, Yetyattaly. Principal trig. stations :—Caunaud, Coolamungalam, Culloornicaud, Mailpanacaud, Maunore, Pautharancottah, Pullattivayal, Puttoocottah, Rajahmadam beacon, Rettavayal, Wokkoor. The leading places, &c., in the talook are the following.——*Adiramputnam* (அதிராம்பட்டணம் - athirámbattanam, Tam.). See sep. title.——*Agnyaur* (அக்கினியாறு - akkiniyáru, Tam.). See sep. title.——*Ammaputnam* (அம்மாப்பட்டணம் - ammáppattanam, Tam.). From (ammá, tam. title of a woman + pattana, san. town). Village, Port ; pop. 3,559 ; lat. 10° 1′ ; long. 79° 17′ ; from Cottapatam N.E. 4 miles ; from Krishnaujiputnam S. 5 miles ; from Madras S.S.W. 220 miles ; from Puttoocottah S.S.W. 29 miles ; from Tanjore S. 53 miles. The sea trade consists in the export of rice [q.v.] to Ceylon and import of timber from Ceylon. This village forms part of Manamailcoody.——*Arantaungy* (அறந்தாங்கி - arandángi, Tam.). See sep. title.——*Ativetty* (அத்திவெட்டி - attivetti, Tam.). From (atti, tam. a tree, ficus racemosa, linn. + vetti, tam. way). Zemindarry, Village ; pop. 1,719 ; lat. of village 10° 26′ ; long. 79° 29′ ; from Puttoocottah E. 8 miles ; from Tanjore S.E. 31 miles ; from the sea N. 7 miles and W. 30 miles. Peshcush Rs. 913. ——*Auvidayaurcoil* (ஆவுடையார்கோவில் - ávudaiyárgóvil, Tam.). From (ávudaiyár, tam. phallic emblem of shiva + kóvil, tam. temple). Village, Place of pilgrimage ; pop. 2,480 ; acres 11,526 ; lat. 10° 05′ ; long. 79° 05′ ; from Puttoocottah S.S.W. 30 miles ; from Tanjore S.S.W. 49 miles ; from the sea W. 14 miles. Old Shiva temple with elaborate sculptures and covered with inscriptions of the Chola [q.v.] dynasty [raj]. Its erection by the minister of a Paundyan [q.v.] king is related in the Madura stala pooraunam [q.v.]. In the hamlet of Tirpoonnavausal is another well-sculptured Shiva [q.v.] temple [coil, pagoda] with inscriptions. There are two important festivals at Auvidayaurcoil in the months of Auny [mausam] or June and Maurgaly [mausam] or December.——*Caunaud* (கானாடு - kánádu, Tam.). From (ká, tam. grove + nádu, tam. country). Trig. station ; lat. 9° 58′ 40·64″ ; long. 79° 09′ 44·22″ ; height 30 feet ; from Puttoocottah S.S.W. 34 miles ; from Tanzhanore E. 1 mile ; from the sea W. 6 miles.——*Cautmauvady* (காட்டுமாவடி - káttumávadi, Tam.). From (káttumá, tam. wild mango tree, spondias mangifera, willd. + adi, tam. foot). Village, Port ; pop. 756 ; lat. 10° 08′ ; long. 79° 17′ ; from Krishnaujiputnam N. 3 miles ; from Puttoocottah S.S.W. 22 miles ; from Shalwanaickenputnam S.S.W. 11 miles ; from Tanjore S. 45 miles. On Palk's bay. A salt manufactory. Fairs on Mondays.——*Coolamungalam* (குலமங்கலம் - kulamangalam, Tam.). From (kulam, tam. tank + mangala, san. prosperity). Trig. station ; lat. 10° 16′ 46·78″ ; long. 79° 04′ 36·26″ ; height 158 feet ; from Puttoocottah W.S.W. 23 miles ; from Yercalacottah N.N.W. 4 miles ; from the sea W. 19 miles.——*Culloornicaud* (கல்லூறணிக்காடு - kallúranikkádu, Tam.). From (kal, tam. stone + úrani, tam. fountain + kádu, tam. forest). Trig. station ; lat. 10° 20′ 27·03″ ; long. 79° 15′ 28·03″ ; height 81 feet ; from Puttoocottah S.W. 9 miles ; from Tennangoody N. 2 miles ; from the sea W. 12 miles.——*Gopaulputnam* (கோப்பாலப்பட்டணம் - kóppálappattanam, Tam.). From (gópála, san. krishna, the cowherd + pattana, san. town). Village, Port ; pop. 1,318 ; lat. 10° 18′ ; long. 79° 24′ ; from Adiramputnam S.W. 3 miles ; from Madras S.S.W. 199 miles ; from Shalwanaickenputnam E. 5 miles ; from Puttoocottah S.S.E. 9 miles ; from Tanjore S.S.E. 37 miles. On Palk's bay.——*Mailpanacaud* (மேற்பனைக்காடு - mérbanaikkádu, Tam.). From (mél, tam. west + panai, tam. palmyra tree, borassus flabelliformis, linn. + kádu, tam. forest). Trig. station ; lat. 10° 15′ 06·66″ ; long. 79° 09′ 00·57″ ; height 89 feet ; from Maroondangoody N. 4 miles ; from Puttoocottah S.W. 19 miles ; from the sea W. 13 miles.——*Manamailcoody* (மணமேல்குடி - manamérgudi, Tam.). From (manal, tam. sand + mél, tam. over + kudi, tam. village). Sanscrit name (draupadámbápura), meaning drowpady + goddess + town. Village, Port ; pop. 3,559 ; lat. 10° 02′ ; long. 79° 17′ ; from Puttoocottah S.S.W. 27 miles ; from Tanjore S. 51 miles. Chuttrám [q.v.] built by the Rajah for travellers to Rameshwaram.——*Mathoocore* (மதுக்கூர் - mathukkúr, Tam.). From (mathagu, tam. sluice + úr, tam. village). Zemindarry, Village ; pop. 4,093 ; lat. of village 10° 30′ ; long. 79° 26′ ; from Puttoocottah N.E. 7 miles ; from Tanjore S.E. 27 miles ; from the sea N. 10 miles. Peshcush Rs. 2,491. Fairs on Tuesdays. A commercial town.——*Maunore* (மானூர் - mánúr, Tam.). From (mán, tam. deer + úr, tam. village). Trig. station ; lat. 10° 07′ 13·70″ ; long. 79° 09′ 19·61″ ; height 70 feet ; from Amaunjy S. 1 mile ; from Puttoocottah S.W. 26 miles ; from the sea W. 8 miles. ——*Mimisal* * (மீம்பெசல் - mímbesal, Tam.). From (mín, tam. fish + pisal, tam. storm). Tam. also (kóvirbattanam), meaning temple + town. Sanscrit name (rájakumárámbápura), meaning king + son + woman + town. Village, Port ; pop. 187 ; acres 284 ; lat. 9° 55′ ; long. 79° 11′ ; from Cottapatam S.W. 5 miles ; from Madras S.S.W. 229 miles ; from Puttoocottah S.S.W. 37 miles ; from Soondrapaundyaputnam N.N.E. 7 miles ; from Tanjore S. 59 miles. On Palk's bay, between Point calimere and Paumben. A few country vessels resort in N.E. monsoon [q.v.]. Choultry [q.v.] established by rajah for pilgrims to Rameshwaram. Fairs on Wednesdays. A Vishnoo [q.v.] temple [coil, pagoda].——*Nedoovausal* (நெடுவாசல் - neduvásal, Tam.). From (nedu, tam. long + vásal tam. entrance). Zemindarry, Village ; pop. 2,412 ; square miles 2 ; lat. of village 10° 22′ ; long. 79° 10′ ; from Puttoocottah W. 13 miles ; from Tanjore S. 30 miles ; from the sea W. 16 miles. Peshcush Rs. 2,037. Old Shiva temple in ruins with inscriptions. This is now a Government village. But the Zemindarry passes by that name. The village is divided into Mailpauthy and Keelpauthy.——*Paumbaur* (பாம்பாறு - pámbáru, Tam.). See sep. title.——*Pautharancottah* (பாதரங்கோட்டை - pátharangóttai, Tam.). From (páthu, tam. protection + aran, tam. beauty + kóttai, tam. fort). Zemindarry, Village ; pop. 868 ; lat. of village 10° 28′ ; long. 79° 16′ ; from Puttoocottah W. 7 miles ; from Tanjore S.S E. 24 miles ; from the sea N.W. 15 miles. Peshcush Rs. 1,369. Trig. station in lat. 10° 28′ 05·08″ ; long. 79° 15′ 11·60″ ; height 106 feet ; from Puttoocottah W.N.W. 8 miles ; from Vettoovacottah E.S.E. 1½ miles ; from the sea N.N.W. 16 miles.——*Pullattivayal* (பள்ளத்திவயல் - pallattivayal, Tam.). From (pallatti, tam. female of the palla caste + vayal, tam. field). Trig. station ; lat. 10° 09′ 13·99″ ; long. 79° 03′ 29·16″ ; height 133 feet ; from Puttoocottah S.W. 28 miles ; from the sea W. 14 miles.——*Puttoocottah* (பட்டுக்கோட்டை - pattukkóttai, Tam.). See below.——*Rajahmadam* (இராசாமடம் - irásámadam, Tam.). From (rájá, san. king + madam, tam. choultry). Sanscrit name (móhanámbápura), meaning mohanaumba, the fascinating wife of the tanjore king + town. Head-quarters of the Chuttram superintendent ; pop. 1,252 ; lat. 10° 18′ ; long. 79° 24′ ; from Puttoocottah S.S.E. 9 miles ; from Tanjore S.S.E. 36 miles ; from the sea W. 1½ miles. Travellers are fed gratuitously. Trig. station in lat. 10° 17′ 26·54″ ; long. 79° 24′ 6·03″ ; from Puttoocottah S.S.E. 10 miles. On the seashore.——*Rettavayal* (இரெட்டவயல் - irettavayal, Tam.). From (irattai, tam. two + vayal, tam field). Trig. station ; lat. 10° 12′ 46·10″ ; long. 79° 14′ 36·61″ ; height 34 feet ; from Permagalore vadapauthy N. 1½ miles ; from Puttoocottah S.S.W. 18 miles ; from the sea W. 5 miles.——*Saitbauva chuttram* (சேதுபாவாச்சத்திரம் - shéthubávaçattiram, Tam.). From (sétubáva, can. proper name + satra, san. choultry), from sait bauva sawmy who endowed the choultry. Village, Sanitarium ; pop. 500 ; lat. 10° 15′ ; long. 79° 19′ ; from Puttoocottah S.S.W. 13 miles ; from Tanjore S.S.E. 37 miles ; from the sea W. ¼ mile. Bungalow [q.v.] built by a Tanjore rajah. A column here like that at Puttoocottah.——*Shalwanaickenputnam* (சாளுவநாயக்கன்பட்டணம் - shálnvanáyakkanbattanam, Tam.), means shaulwanaicken's town. Village, Sanitarium, Port ; pop. 486 ; lat. 10° 16′ ; long. 79° 21′ ; from Cautmauvady N. 10 miles ; from Gopaulputnam S.W. 5 miles ; from Madras S.S.W. 202 miles ; from Puttoocottah S. 11 miles ; from Tanjore S. 37 miles. On Palk's bay, west of Point calimere. Sarbhojee of Tanjore in 1814 erected a miniature fort with a column at this place to commemorate the downfall of Bonaparte, like that at Puttoocottah. The town is in ruins.——*Shillattore* (சிலத்தூர் - shilattúr, Tam.). From (shilam, tam. a creeper, tinospora cordifolia, miers + úr, tam. village). Sanscrit name (shíladháripura), meaning shiva, the virtue-holder + town. Zemindarry, Village ; pop. 1,364 ; square miles 7 ; lat. of village 10° 33′ ; long. 79° 15′ ; from Puttoocottah N.W. 11 miles ; from Tanjore S. 17 miles ; from the sea N.W. 20 miles. Peshcush Rs. 2,165. Old Shiva temple with inscriptions.——*Tumbikky nullavancottah* (தம்பிக்குநல்லவன்கோட்டை - tambikkunallavangóttai, Tam.). From (tambi, tam

younger brother + nallavan, tam. friend + kóttai, tam. fort). Salt factory; pop. 5,756; lat. 10° 22′; long. 79° 28′; from Puttoocottah E.S.E. 9 miles; from Tanjore S.S.E. 35 miles; from the sea N. 1¾ miles.——*Velluur* (வெள்ளாறு - vellárú, Tam.). See sep. title.——*Wokkoor* (ஒக்கூர் - okkúr, Tam.). From (okka, tam. plentiful + úr, tam. village). Trig. station; lat. 10° 01′ 20·63″; long. 79° 03′ 02·06″; height 78 feet; from Puttoocottah S.W. 35 miles; from Toonjanore N.W. 1½ miles; from the sea W. 17 miles.——(2) Town, Talook head-quarters; Tanjore dist., Puttoocottah tal.; pop. 5,028; acres 7,121; lat. 10° 26′; long. 79° 22′; height 88 feet; from Combaconam S. 36 miles; from Madras S.S.W. 191 miles; from Mayavaram S.S.W. 51 miles; from Munnargoody S.S.W. 19 miles; from Negapatam W.S.W. 42 miles; from Tanjore S.S.E. 27 miles; from the sea N. 11 miles. In 1815 the Mahratta rajah of Tanjore erected a miniature fort and column here in honor of the English victories over the French. In the western portion is an old and large Shiva temple elaborately sculptured and containing inscriptions of the Chola [q.v.] dynasty [raj]. Old fort in ruins with inscription dated A.D. 1684. In Maharaja samoodram, a suburb, is another Vishnoo temple. S.P.G. mission station. Trig. station in lat. 10° 26′ 17·09″; long. 79° 20′ 31·03″; height 88 feet; from the sea N.W. 10 miles.

PYALL (திண்ணை - tinnai, *Tam.*). From portuguese poyal. A bench, made of brick [shengal] and mortar [cauray], extending along the whole front of the house against the main wall. Almost every house in S. india possesses such a pyall. It is usually about 2½ feet high and three feet broad. A stranger must halt here until his business and caste [jauty] are known. In the hot weather the male members of the family sleep on the pyall. The pyall is often used as a school-room [pullicootam]; in these the schoolmaster is taught from father to son, and imparts the rudiments in turn to the village children.

PYE (పై - pai, *Tel.*). Up, high.——*Pyaupaly* (పైపల్లి - pyápali,* Tel.). From (pai, tel. high + palli, tel. village).—"*a*" Deputy tahsildarry, Kurnool district. Pay Rs. 70.—"*b*" Village, Head-quarters of Deputy collector and Deputy tahsildar; Kurnool dist., Putticondah tal.; pop. 3,719; acres 9,202; lat. 15° 14′; long. 77° 47′; from Cumbum W.S.W. 94 miles; from Kurnool S.S.W. 46 miles; from Madras N.W. 224 miles; from Nundiaul W.S.W. 52 miles; from Putticondah S.E. 19 miles. One of coolest places in district. One of the polliems [q.v.] resumed by Munro in 1800. An early poligar [q.v.] obtained the favor of the Vijiaunugger rajahs by reducing the chieftain of Chingleput who had rebelled. In later times another poligar [q.v.] assisted the Cuddapah nawaubs [q.v.] in capturing Gundicote. Traveller's bungalow [q.v.]. Weekly market on Saturday. ——*Pyekeely* (పైకీలి - paikíli, Tel.; கல்கொறுக்கை - kalgorukkai, Tam.). Tel. from (pai, tel. above + gira, tel. line); from stripes. Tam. from (kal, tam. stone + korukkai, tam. pristipoma hasta). Pristipoma [caripey] furcatum, percidæ [panayairy], acanthopterygii, teleostei [matsyam,1], of naturalists [jantoo]. Alias Grammistes furcatus; Perca paikeeli; Pristipoma paikeeli; Paikeeli from teloogoo. Colors silvery with six horizontal brownish-black bands, darkest externally, three above lateral-line; spinous portion of dorsal fin with three rows of brown spots and dark edge; upper half of soft dorsal dark; dark band along the anal. Sea; Madras.

PYE (பை - pai, *Tam.*). Green, tender, fresh. Beauty.——*Pajanely* (अरलु - aralu, San.; टेंटू - témtú, Mahr.; चाम्मुयि - chámmuyi, Conc.; ಆನೆಮುಂಗು - ánemungu, Can. and Too.; పంపెన - pampena, Tel.; ପମ୍ପୋନିୟା - pomponiya, Oor.; പയ്യാഞ്ഞലി - payyáññali, Mal.; තොටිල - totila, Singh.; பாலையுடைச்சி - pálaiyudaiççi, Tam.). Title means soft anjely [wild jack]; from malayalam. San. means spreading. Can. from (áne, san. elephant + mungu, can. to sprout). Mal. from (pai, mal. soft + áññali, mal. artocarpus hirsuta, lamk.). Tam. from (pálai, tam. spathe + udai, tam. burst), opening out like spathe; from efflorescence; cf. spathodea. San. also (shónáka), meaning spreading; (mandúkaparna), meaning frog + leaf [indian pennywort, munjeet]; (patrórna), meaning hairy leaved; (shukanása), meaning parrot + beak, alluding to flower-bud; (dírghavrinta), meaning having long leaves; (bhallakapriya), meaning dear to bears; (prit'hushimbí), meaning having broad pod. Can. also (dundukara); (bági); (mokkada); (alangi). Tel. also (dundilamu). Oor. also (p'hunp'hunia). Mal. also (veluttapátiri), meaning white + the tree, stereospermum; (árantal); (palakappayyána), meaning plank + the tree. Tam. also (vangamaram), meaning trumpet tree; (púthabudbam), meaning demon + flower; (açci); (pana). Title otherwise Indian calosanthes, Indian oroxylum, Indian trumpet flower. Botanically Oroxylum indicum, vent., bignoniaceæ [vricsham, 99]. Alias Bignonia indica; Calosanthes indica; Spathodea indica, pentandra. Tree; leaves opposite, pinnate, leaflets on the branches of the petioles two to three pair, petioletted, subcordate, ovate-acuminated; panicle terminal, erect; flowers fleshy, of a dark, lurid appearance, fœtid; pod 2 feet long, 3 inches broad, straight and flat; flowering in rainy season; smaller on w. coast. Bark and capsule used medicinally [dashamoolam]. Also astringent, used in tanning [chamrah]; fruit gives a dye [shauyam]. Timber soft and useless. The Tender wild jack, botanically Pajanelia rheedii, dec., bignoniaceæ [vricsham, 99], has the same vernaculars, and derives its generic name from the malayalam; arboreous; leaves unequally pinnate, leaflets unequal sided, acuminate; calyx campanulate, five-lobed, lobes emarginate at the points; corolla campanulate, sub-bilabiate, five-lobed, lobes dilated and crisp on the outer margin, furnished on the edges with a line of dense woolly tomentum externally, tube glabrous, limb pubescent; longer stamens connivent; capsule 12–15 inches long, winged, cuspidate; seed orbicular, compressed, winged; flowering in july and august. ——*Patchonty* (कृकलास - krikalása, San.; بوقلمون - búkalamún, Hind.; ಊಸರವಳ್ಳಿ - úsaravalli, Can.; తొండ్రబల్లి - tsáraballi Tel.; പച്ചോന്ത - paççóntu, Mal.; කටුස්සා - katussá, Singh.; பச்சோந்தி - paççóndi, Tam.). Title from malayalam. San. from (krika, san. throat + lás, san. to cause to shine). Hind. means changing color. Tel. from (tsára, tel. stripe + balli, tel. lizard). Mal. from tamul. Singh. from (katu, san. fierce); from its furious habit. Tam. from (paççai, tam. greenness + óndi, tam. a lizard). Tam. also (kómbi), the angry lizard; from its furious habit. The terms may be taken as co-extensive with the family Chamæleonidæ, sauria [godhicay], reptilia [sarpy, 11], of naturalists [jantoo]; and to be distinguished from Bloodsucker [q.v.]. The Chameleons have a head large, angular, covered with numerous very small, flattish or convex shields; body compressed, covered with granular scales above and below; tail long and prehensile; tongue exceedingly long, worm-like, club-shaped and viscous in front, very extensile; eye globular, very mobile, covered with a circular lid which is pierced with a small central hole; tympanum hidden; legs thin, each with five toes, formed into two grasping opposable groups; live on trees; strong prehensile tail, on the ground and in water they are nearly helpless; although extremely slow in locomotion, they feed on insects [poochy]. Inflexibility of the neck, wonderful structure of the eyes, faculty of changing color much developed; oviparous, depositing, under leaves, from ten to twelve oval eggs with calcareous shells. The representative species of S. india is Chamæleo vulgaris, the common Chameleon, alias Chamæleo ceylanicus; Lacerta chamæleo. Most specimens are of a green color, uniform or irregularly spotted and banded with dark green or brown. The faculty of changing color possessed by the chameleons, although common to numerous other lizards, has became proverbial in this species, and is here so much developed that one side may assume a color different from that of the other. The inflexibility of the neck is compensated by the structure of the eyes, which are so prominent that more than one-half of the ball stands out of the head; and not only can they be moved in any direction, but each has an action independent of the other.——*Patchouli* (پچولی - pacholí, Hind.; ಪಚ್ಚೆತೆನೆಗಿಡ paççetenegida, Can.; కొట్టము - kottamu, Tel.; കൊട്ടം - kottam, Mal.; பச்சிலை - paççilai, Tam.). Title from tamul. Can. from (paççe, can. green + tene, can. panicum italicum, linn. + gida, can. plant); similar flower stalk. Mal. from (kósht'ha, san. costus speciosa, smith), from similarity. Tam. from (paççai, tam. green + ilai, tam. leaf). Tam. also (kottam). Title otherwise Acheen leaf, Atchy patchy, Indian marjoram, Patch leaf. Botanically Pogostemon patchouli, pellet, labiatæ [vricsham, 103]. Specific from tamul. Alias Origanum indicum; Pogostemon heyneanus. Suffruticose, 2–3 feet, pubescent; stems ascending; leaves petioled, rhombo-ovate, slightly obtuse, crenato-dentate; spikes terminal and axillary, densely crowded with flowers interrupted at the base; calyx hirsute; segments lanceolate; filaments bearded; flowers white, with red stamens and yellow anthers; flowering from june to november. The dried tops imported into england are a foot or more in length; they have a peculiar perfume and are used for many purposes; scent of patchouli at one time was considered the test of real indian shawls [q.v.], but now it cannot be depended on as home-spun shawls scented with it are sold as real indian; leaves an ingredient in tobacco [pogauk], used by arabs for stuffing pillows; by distillation yield an oil [attar] which is used as a toilet perfume and in india for imparting fragrance to clothes. Other species are:—atropurpureus, hirsutus, mollis, paludosus, paniculatus, parviflorus, plectranthoides, rotundatus, speciosus, vestitus, wightii.——*Pausy* (பசிப் - pási, Tam.). See sep. title.——*Payar* (பயறு - payaru, Tam.). From (pasumai, tam. greenness); from color of the common kind. Pulse [dholl] generally and especially green gram [q.v.], phaseolus mungo. Plant second term. Ex., where transl. is of first term:—Dolichos lablab (tattaippayaru), flat; Indigofera pentaphylla (náyppayaru), dog; Phaseolus aconitifolius (tulukkappayaru), turk; Phaseolus adenanthus (káttuppayaru), forest; Phaseolus mungo, var. radiatus (narippayaru), fox; Phaseolus trilobus (elippayaru), rat, (kollaippayaru), field, (narippayaru), fox, (panippayaru), dew, (vayappayaru), field; Phaseolus trinervius (shadaippayaru), matted hair; Rothia trifoliata (narippayaru), fox; Vigna catiang (kantampayar), field, (kóttappayar), stick for creepers to climb, (kárámanippayaru), vigna catiang, (karkatakappayaru), carcatacam, the month, (mampayaru), earth, (tattaippayaru), flat. See gloss. paragraphs. Distinguish from Payir, though same root.——*Payarammavaur* (పైరమ్మవారు - pairammávárú, Tel.). From (payarammai, tam. pox with pustules of the size of green gram + váru, tel. suffix of respect). Village goddess.—

Payir (ಪೈರು - pairu, Can.; పైరు - pairu, Tel.; பயிர் - payir, Tam.). From (pasumai, tam. greenness). Growing corn. Applies to cultivation in general [vellaumay]. Payir coody is a cultivator. Payir tozhil is husbandry. Payir vazhy are cultivated fields. Cathir payir is corn just earing. Moothoo payir is ripe grain. Nadavoo payir is corn transplanted. For Nunjah payir and Poonjah payir see Nunjah and Poonjah. Distinguish from Payar, though same root.——*Payyan* (பையன் - paiyan, Tam.). From (pai, tam. tender). Boy.——*Payyanore* (പയ്യന്നൂർ - payyannúr, Mal.). From (payyan, mal. child, epithet of skanda + úr, mal. village). Village, Amshom; Malabar dist., Chiracal tal.; pop. 6,488; lat. 12° 06′; long. 75° 15′; from Calicut N.N.W. 68 miles; from Cannanore N.N.W. 19 miles; from Cavvye E. 2 miles; from sea E. 4 miles. The northernmost amshom [q.v.] of talook [q.v.] contains the deshoms of Cavvye and Payyannore; the former on an island contains the bungalow [q.v.] of that name at frontier of district. Large mosque [musjid], and old redoubt built by the French. Ancient temple to Soobramanyan [q.v.]. Mantapam [q.v.] elaborately sculptured. Seat of Payyannore graumacaur bramins, whose descendants follow Maroomakkatoyem [q.v.] law of inheritance, unlike other Bramins of district. They were Malayaulies converted to Braminism. A poem, the Payyannore puttolay, is oldest specimen of Malayalam composition existing.——*Pesaloo* (పెసలు - pesalu, Tel.). From (pasumai, tam. greenness). Same as Green gram.——*Putchaippan* (பச்சையப்பன் - paççaiyappan, Tam.). From (paççai, tam. green + appan, tam. father). Vishnoo, the green lord. Hindoo 2nd or pers. name. Common among non-bramins [peyar] ——*Putchamullay* (பச்சமலை - paççamalai, Tam. pachaimalai *). From (paççai, tam. green + malai, tam. hill). Hills; Salem and Trichinopoly dists., Ahtoor tal.; pop. 2,202; lat. 11° 19′ to 11° 29′; long. 78° 30′ to 78° 45′ E.; from Ahtoor S.E. 14 miles; from Salem S.E. 34 miles. Greatest length from north to south, about 20 miles. Average height, 2,000 feet. In shape the range resembles an hour-glass, being nearly cut in two by two large ravines opening to the north-east and south-west. Of the two parts thus formed, the north-western is the larger and has generally a higher level than the south-eastern. The western slopes are very steep compared with those on the east, which are rarely precipitous, and are broken by sundry long buttress-like spurs projecting far into the low country. The hills are unhealthy. The forests are poor, having been injured by wasteful nomad cultivation [ponacaud]. The western slopes are covered chiefly with oosilay [biswool]. Towards the summits the jungle is dense and intermixed with bamboo [q.v.] and thorny bushes. On the summits are large forests of vengay [q.v.], teak [q.v.], black-wood [q.v.], and sandal-wood [sandal]. The eastern slopes are covered with dense bamboo jungle, vengay and small teak trees. Principal products are gall-nuts [mauchicoy], vembaudamputtay bark [pappily], hill-gooseberries, and honey [shahad]. There are three villages Combay, Tembaranaud, and Vunnaud. To be distinguished from the Green hills of the shevaroys.——*Putchay* (പച്ച - paçça, Mal.; பச்சை - paççai, Tam.). From (pasu, tam. green). Green.—"*a*" Epithet of Vishnoo [q.v.] the green god. Proper name; applied to males and females among the lower orders [peyar].—"*b*" Plant first term. Ex., where transl. is of second term:—Allium tuberosum (paççanírulli), allium cepa; Cucumis trigonus (paççekáyigida), meaning fruit + plant; Dalbergia paniculata (paççelaimaram), leaf + tree; (paççárimara), meaning bauhinia racemosa, linn.; Ocimum basilicum (paççapushpam), flower; Parkinsonia aculeata (paççaivél), acacia; Phaseolus mungo (paççaippayaru), pulse; Phaseolus mungo, var. radiatus (paççaippayaru), pulse; Pogostemon patchouli (paççilai), leaf; Thevetia nereifolia (paççaiyalari), and (paççayarali), nerium odorum. See gloss. paragraphs.—"*c*" Plant second term. Ex., where transl. is of first term:—Argyreia speciosa (samudrappaçça), ocean; Artemisia vulgaris (tiruníttippaçça), holy + ashes; Garcinia xanthochymus (samudrappaçça), ocean, (malaippaççai), hill; Guazuma tomentosa (ténbaççai), honey; Heliotropium indicum (vénappaçça), summer; Hoya pendula (naññarappaçça), poison + cutting. See gloss. paragraphs.——*Pytore mullay* (பைத்தூர்மலை - paittúrmalai, Tam.). From (paittu, tam. green + úr, tam. village + malai, tam. mountain). Range of hills; Salem dist., Ahtoor tal.; pop. 1,522; lat. 12° 32′; long. 78° 34′; from Ahtoor S. 6 miles; from Salem S.E. 26 miles. Running across Ahtoor talook and dividing the Vasishtanuddy and Shwetanuddy watersheds [nadee].

Q

Q (ق - káf, *Hind.*). Symbol for 100.

QUAIL EYE (காடைக்கண்ணி - kádaikkanni, *Tam.*). Title from color. Same as Varagoo. Cf. Quail-necked paddy.

QUAMOCLIT (कामलता - kámalatá, *San.*; كو مقليط - komklit, *Hind.*). Title from sanscrit, through greek. San. from (káma, san. love + latá, san. creeper), beautiful creeper. Same as Indian pink.

QUIHYE (كوئى هے - koíhaí, *Hind.*). From (koí, hind. any + haí, hind. is). Is anyone there? Word used in Bengal for calling a servant [nowcar].

QUILON (കൊല്ലം - kollam, *Mal.*). From (kóvilakam, mal. palace) [co]. Greek ἐλάγκων ἐμπόριον [collam].—"*a*" Revenue division; Travancore state; population about 900,000. Divided into eleven talooks. Was formerly ruled by rajahs of Cottaura cara, Cauyancollam and Pundalam. These were subdued by the Bramin warrior, Ramayyan dalavoy [q.v.], and annexed to Travancore.—"*b*" Talook, Travancore state, Quilon division. Hundred and sixty caras [q.v.] or parishes. Population 108,469. Extreme length, N. to S., 20 miles; extreme breadth, E. to W., 10 miles. Sub-divided into seven praverties [q.v.]. Bounded N. by Caroonaugapully and Coonnatore talooks, E. by Cottaura cara talook, S. by Cherankeel talook and W. by the Indian ocean. Traversed by lakes, ground undulating. Soil productive. Fishing industry on coast and much trade in coppray [q.v.], timber [maram], &c. Watered by the Cullada river.—"*c*" Town, Port, Divisional and Zillah judges head-quarters, Tahsildar's station, Cantonment, Travancore dist., Quilon division, Quilon tal.; pop. 23,380; lat. 8° 54′; long. 76° 38′; from Alleppey S.S.E. 44 miles; from Cottayam S. 47 miles; from Madras S.W. 380 miles; from Nagarcoil N.W. 76 miles; from Paravore S.S.E. 88 miles; from Bombay S.S.E. 730 miles; from Poovaur N.W. 52 miles; from Shertala S.S.E. 56 miles; from Trivandrum N.W. 37 miles; from Tungacherry E. 1½ miles. Port next in importance to Alleppey. There is shelter for shipping from winds under Tungacherry point and reef about 3 miles from the fort, and navigable communication through the canals and lagoons [cauyal] and the shore, both to north and south. Ships, puttimars [q.v.] and steamers call. With Trivandrum communication is carried on almost entirely by canals. There is also a military road, northwards, towards Alleppey and Cochin. A road leads over the Aryancauv pass [ghaut] to Tinnevelly. It was formerly the head-quarters of the state; is still military head-quarters. During the early centuries of the Christian era Quilon was the great port of trade in Malabar with China and Arabia. It is the Coilum of Marco Polo, and Columbum of ecclesiastical writers of that age; one of whom, Friar Jordanus, was consecrated Bishop of Columbum, circ. 1330. The best kind of ginger [q.v.] was known till the middle ages as Columbine ginger. Throughout the middle ages it was one of the chief seats of the Saint Thomas christians; and it formed with Cauyal one of the seven churches [cranganore] ascribed by Indo-Syrian tradition to Saint Thomas himself. In 1503 the Portuguese established a factory [aurang] and fort, captured by the Dutch 150 years later. The town was at different times subject to Cochin and Travancore. In 1741 Travancore unsuccessfully besieged it, but in 1745 the Quilon rajah submitted. From 1803 to 1830 a British garrison was stationed here. Till 1829 principal town of the province where the Diwaun [q.v.] and the British resident held their head-quarters. There are two palaces [covilagam], a Residency, and other public buildings. The subsidiary force is now reduced to one native regiment, whose cantonments lie to the east of the town. Has still considerable inland and foreign trade. Of late a cotton-spinning mill has been set up. Chief entrepôt of pepper and ginger on the Malabar coast. Vegetable productions are timber [maram], cocoanuts [q.v.], coir [q.v.] or cocoanut fibre, pepper [q.v.], cardamoms [q.v.], ginger [q.v.], betel-nuts [q.v.] and coffee [q.v.]. For the Collam era see Collam and Saca. For Cully quilon see Cauyancollam. The following are the travelling distances by road from Quilon to different places:—

——*Quilandy* (കൊയിലാണ്ടി - koyilánti, Mal. quilandi *). From (kóyil, mal. palace + kanti, mal. a gap) [co].—"*a*" Deputy tahsildarry, Malabar district. Pay Rs. 70.—"*b*" Town, Port, Deputy tahsildar's station, District moonsif's station, Sub-registrar's station, Customs house; Malabar dist., Cooroombranaud tal.; lat. 11° 26′; long. 75° 44′; from Badagara S.S.E. 13 miles; from Bombay S S.E. 540 miles; from Calicut N.N.W. 14 miles; from Cannanore S.S.E. 36 miles; from Caupautt N.W. 5 miles; from Collam S.E. 1½ miles; from Madras W.S.W. 329 miles; from Malapooram N.W. 36 miles; from Manantoddy S.W. 32 miles; from Palghaut W.N.W. 79 miles; from Ponnany N.N.W. 47 miles; from Tellicherry S.S.E. 25 miles. Moplah [q.v.] seaport between Calicut and Mahé, with considerable trade. Gives name to a backwater [cauyal]. The roadstead, which is protected by a mud bank [mud bay], is more secure than most anchorages on the coast; and it was here in 1498 that Vasco da Gama's fleet rode out the south-west monsoon [q.v.]. One of the E.I. company's ships was lost here in 1793. Towards close of the last century the port was suddenly destroyed by a cyclone. Close to seaport on north is one of the nine original Mahomedan mosques [musjid] established on the Malabar coast by Malik ibn e deenaur. It was built in imitation of one at Mecca, and is saluted from the sea by all Mahomedan craft. Government in 1846 made over to the Quilandy mosque as Sarwa maunyam [q.v.] certain escheated farms producing a net revenue of Rs. 1,800 per annum. These lands lie in the amshoms [q.v.] of Cauracoonn, Munjery and Tricalangode in Yernaud talook.

QUINDAH (کندہ - kuindah, *Hind.*). Same as Wild mohwah.

QUIRPELE (கீரிப்பிள்ளை - kírippillai, *Tam.*). Old Anglo-Indian for the Mongoose, which see.

R (र - ra, रा - rá, *San.*; ر - re, *Hind.*; ர - ra, ரா - rá, *Tam.*). Hind. for the numeral 200; in almanacs [punchaungam] stands for moon [chundran] and the third mahomedan month [maheena]. Tamul contraction for Rajah [q.v.] or Rupee [q.v.]. Sanscrit means Agny [q.v.], fire; hence deemed an unpropitious letter. No Tamul poem of good import should begin with the letter. The letter ற and its corresponding nasal ன are additional letters peculiar to Tamul. Nunnool [q.v.] says:—"ற and "ன will come forth if the tip of the tongue is brought into close "contact with the roof of the mouth." ற is really a cerebrodental 't' [moordhanyam]. Thus:—பொன் தீது becomes பொன்றீது; or still further பொன் தீமை becomes பொற்றீமை. The letters த, ட, and ற, with their corresponding nasals, are the usual sign-letters of the past tense of verbs. In the numeral words from one up to ten there is for termination in almost every instance, some modification of the syllable 'tu;' as பத்து, ஐந்து, ஒன்பது, எட்டு, இரண்டு, மூன்று, ஆறு. Uneducated persons pronounce போதும் as போரும் and விதை as விரை. See vol. II, 186, 206.

RA (ரா - rá, *Tam.*). Colloquial corruption of (adá, tam. from ódá, tam. voc. of yédan, tam. companion). Appellative termination added to verb roots, expressing familiarity, contempt, anger, reproof, surprise. Of universal usage among lower classes. One of the numerous grammatical forms found neither in the native grammars [lacshanam] of the classical style, nor in the missionary grammars of the assumed modern style. Examples are:—(párrá), look; (padirá), read; (sholrá), speak.

RABAUB (رباب - rabáb, *Hind.*). From arabic. A rebeck, kind of violin [sangeetam].

RABEE (ربیع - rabí, *Hind.*). From arabic. Spring. Also spring crop. First rabee is the third mahomedan month, and second rabee is the fourth [fusly, maheena].

RACSH (रक्ष् - raksh, *San.*). To injure.——*Racshas* (रक्षस् - rakshas, San.). A malignant being or evil divinity [bhootam, pey, raucshasan].——*Raucshasagoondloo* (రాక్షసగుండ్లు - rákshasagundlu, Tel.). From (rákshasa, san. giant + gundu, tel. rock). General term for natural megalithic objects, especially what would be called in English tors and loggan stones [aursham, paundoocull].——*Raucshasam* (राक्षस - rákshasa, San.). From (raksh, san. to hurt). A giant marriage [calyaunam], that is to say carrying off the woman by violence. See vol. I (62). Also one of the three ganams [q.v.] or classes into which asterisms in the moon's [chundran] path are divided for astrological purposes; they are maunoosham [q.v.] or human, raucshasam or infernal, and devam [q.v.] or divine; indicating the character of influence on persons born under them. See detail in the table of hindoo lunar mansions under Nacshatram.——*Raucshasan* (राक्षस - rákshasa, San.). From (raksh, san. to injure). A giant, an evil spirit hostile to man [racshas]. Compare the hebrew Khelabim. In their earliest conception, the Raucshasans were unknown creatures of darkness, to which were attributed the evils that attend life. In the Aryan [q.v.] epic period they were personifications of the aborigines of India. In this character they play a prominent part in the Ramayanam [q.v.]. In the Pooraunic [pooraunam] period they are infernal giants, the children of the rishy [q.v.] Poolastyan [q.v.], and enemies of the gods [deva]. They are then divided into three classes:—the slaves of coobairan [q.v.] the god of wealth, and guardians of his treasures [navanidhy, nidhy]; malevolent imps [bhootam, pey] whose chief delight is to disturb the pious in their devotions; giants of enormous proportions, inhabiting naracam [q.v.] or hell, and hostile to the gods. Ravanan [q.v.], the demon king of Lunka [q.v.], is the most celebrated Raucshasan in S. india, and belongs to the class last named. See vol. I (78). Distinguish from the Asoorans [q.v.] and Deityans [q.v.], who are enemies of the gods only.

RAEES (رئيس - raís, *Ar.*). From (rása, ar. to rule). Chief. Part of lacab; as Raees ool islam, the head of islam [ism].

RAFEE (رفيع - rafí, *Ar.*). From (rafa, ar. to raise). Exalted. Part of lacab; as Rafee ood deen, exalted of the faith [ism].

RAFT (رفت - raft, *Hind.*). From (raftan, pers. to go) [rah]. Export.——*Rafzee* (رافضی - ráfzí, Hind.). From (rafazu, ar. to abandon). Heretic. Also called Zaidiyahs from holding that imaumat descended to Zaid upon the death of fourth imaum and not to Imaum baukir as held by all others. They hold that the people have the right of choosing their imaum [q.v.] but restricting the choice to the family of Mahomed [q.v.]; and that among the other qualities required for the pontifical office, the imaum should possess the capacity to assert his right by force of arms [ismailiyah]. Used in S. india for shiahs [q.v.] in general.——*Rawauna* (روانہ - rawánah, Hind.). From (raftan, pers. to go). A permit [raudaury].

RAGGY (रागी - rágí, *San.*; नाचणी - náchaní, *Mahr.*; नांचनो - nánchanó, *Conc.*; راگی - rágí, *Hind.* and *Dec.*; ರಾಗಿ - rági, *Can.* and *Too.*; రాగి - rági, *Tel.*; ମାଣ୍ଡିଆ - mandiya, *Oor.*; മുത്താറി - muttári, *Mal.*; කුරක්කන් - kurakkan, *Singh.*; கேழ்வரகு - kézhvaragu, *Tam.*). Title from hindostany [ranj]. San. from (rága, san. red); from color. Mahr. from (náchana, mahr. gay woman, from nácha, mahr. nautch), from shining grain. Conc. from mahratta. Hind., &c., from sanscrit. Mal. from (muttu, mal. pearl + ari, mal. rice) [bajrah]. Tam. from (kézh, tam. color + varagu, tam. panicum miliaceum, linn.). San. also (krishná), meaning black [black pepper, long pepper]; (chikkana), meaning smooth and glossy, from seeds; (rájiká), meaning shining; (lala), meaning desirous; (guchhakanisha), thick-spiked grass; (kshutábhijanana), hunger creator, and (rájiká), which are applicable to black mustard, brassica nigra, koch. [cauly rayaun]. Hind. also (marua); (manraví). Dec. also (nágla). Can. also (kurukkan), from singhalese; (sodehullu), meaning raggy grass. Tel. also (tsódi); (udatatótagaddi), meaning squirrel + garden + grass; (tumide); (tavide). Mal. also (kóra) [coray]; (chettippullu), meaning chetty + grass. Tam. also (kévuru), by corruption; (kúvaragu), meaning gruel + plant, panicum miliaceum, linn.; (áriyam), meaning bright grain; (muttári), meaning pearl + rice; (képpai), meaning bright grain. Title; otherwise Chetty grass, Corakkan, Dog-tail grass, Great millet, Marua millet, Natcheny, Pearl rice, Pudding paspalum, Red paspalum, Tocussa. Botanically Eleusine coracana, gærtn., graminaceæ [vricsham, 156]. Specific name from singhalese. Alias Cynosurus coracanus, tristachyos. Cereal; culms erect, 2–4 feet, a little compressed, smooth; leaves bifarious, large, smooth; mouths of sheaths bearded; calyx three to six-flowered, glumes keeled, obtuse, with membranaceous margins; spikes four to six digitate, incurved, secund, 1–3 inches long, composed of two rows of sessile three to four-flowered spikelets; rachis slightly waved; valves of corolla nearly equal; seeds globular, size of mustard [rayaun] seed, brown, a little wrinkled, covered with a thin aril. The most prolific of cultivated grasses; the staple grain of the mysore country, where it is stored in pits keeping sound for many years; is grown under both wet [coodapa, maugauny] and dry cultivation [gaddavary, veligada]; in black or red loam [pasalay munn], sandy [manal] soils not being favorable; ground prepared in south in chittray [mausam] or april, on coromandel in caurteecam or november and margashiram or december, on w. coast in vrishchicam or november; ground is ploughed four or five times and manured [yeroo]; seed sown in south in auny or june, on coromandel in

margashiram or december and pooshyam or january, on w. coast in yedavam or may; generally first sown in nursery [nauttangaul]; when 6 inches in height transplanted; while under growth weeds are removed thrice or four times; watered once in ten days; full-grown crop attains 2½ feet; leaves then become yellow, seeds become black; cut in four months by sickles at 6 inches from ground and tied in sheaves; on fifth day taken out and exposed to the sun and beaten with sticks; straw separated; residue winnowed; produce brought to market a month after cutting; average price 20 imperial seers for 1 rupee; cotton [q.v.] is very often drilled with this crop, it then outtops the raggy and grows up vigorously after the latter crop is harvested. Raggy is a wholesome and nutritious grain, with which ordinary poor people make choopatties [q.v.], puddings, &c.; excellent for doing out-door work upon; straw is good fodder [ghaus] for cattle [maud]; a kind of paste made of the grain is used in preparing and tanning leather [chamrah]. Cf. Bojah. The only other species here is Indica [wild raggy].——*Dry raggy* (వెలిరాగి - velirági, Tel.). From (veli, contraction for veligada, tel. dry cultivation). Any raggy raised on dry land [mett, metta], not wells.——*Small raggy* (ಅಂಟುಗರಿಕೆಹುಲ್ಲು - antugarikéhullu, Can.; சின்னரியம் - shinnáriyam, Tam.). Can. from (antu, can. gum + garikéhullu, can. cynodon dactylon, pers.). Tam. from (shinna, tam. small + áriyam, tam. raggy, eleusine coracana, gærtn.). Botanically Panicum [priyangoo] erucæforme, sibth., graminaceæ [vricsham, 156].——*Wild raggy* (కారుసోడి - kárutsódi, Tel.; වල්කුරක්කන් - valkurakkan, Singh.; குஞ்சப்புல் - kunjappul, Tam.). Tel. from (káru, tel. forest + tsódi, tel. eleusine coracana, gærtn.). Singh. from (val, singh. jungle + kurakkan, singh. eleusine coracana, gærtn.). Tam. from (kuñjam, tam. cluster + pul, tam. grass); from dense inflorescence. Singh. also (belatana), meaning dog grass; from being eaten by dogs [nye] to induce vomiting. Tam. also (kévuru), corruption from (kézhvaragu), meaning color + varagoo. Title otherwise Cluster grass, Crab grass, Dog grass, Winding grass, Wire grass [hoonrauj]. Botanically Eleusine indica, gærtn., graminaceæ [vricsham, 156]. Root fibrous, cæspitiferous; culm compressed, leafy, ½–2 feet; sheaths hairy at the mouth; leaves flat, linear, somewhat obtuse, here and there scattered with hairs, or altogether glabrous; ligula short, hairy; spikes straight, linear, somewhat in whorls of four, one usually remote from the rest, rachis narrow; spikelets about six-flowered, valves oblong, entire at the apex. Grain not usually eaten.

RAGHOO (रघु - raghu, *San.*). From (rangh, san. to go) [rath]; fleet. Ancestor of Rama [q.v.]. Hindoo 2nd or pers. name [peyar].——*Raghavan* (రాఘవుడు - rághavudu, Tel.). From (raghu, san. the myth. king). Rama of raghoo family [raghooraman]. Hindoo 2nd or pers. name [peyar].——*Raghavendran* (ರಾಘವೇಂದ್ರ - rághavéndra, Can.). From (rághava, san. rama + indra, san. the chief of gods); the best of the raghoo race [raghottaman]; epithet specially of rama. Hindoo 2nd or pers. name [peyar].——*Raghojee bhonslay* (रघुजीभोंसला - raghujíbhónsalá, Mahr.). From (above + jí, hind. title). Mahratta [q.v.] chief who invaded Carnatic [q.v.] in 1740, attacked Dost ally near Daumalcheroo pass [ghaut], and defeated and killed him, taking his diwaun [q.v.] Meer asad prisoner. Bought off by Sufder ally the son and heir of the late Nawaub [q.v.] with whom he entered into a secret compact against Chundah sahib [q.v.]; the latter was then besieged at Trichinopoly and carried off prisoner to Sattaura [charitram]. See vol. I (176).——*Raghoodevapooram* (రఘుదేవపురము - raghudévapuramu, Tel.). From (raghudéva, san. proper name + pura, san. town). Sanscrit name (rahitapura), meaning solitary + town.—"*a*" Deputy tahsildarry, Godavery district. Pay Rs. 100. Otherwise called Cottapully.—"*b*" Village; Godavery dist., Rajahmundry tal.; pop. 2,717; acres 4,197; lat. 17° 10′; long. 81° 45′; from Cocanada W.N.W. 38 miles; from Rajahmundry N.N.W. 12½ miles. Former head-quarters of Deputy tahsildar. Old ruined fort.——*Raghoonautan* (இரகுநாதன் - iragunáthan, Tam.). From (above + nát'ha, san. lord). Rama, lord of the raghoo race [raghoopaty]. Hindoo 2nd or pers. name [peyar].——*Raghoonauttevar* (இரகுநாதத்தேவர் - iragunáthattévar, Tam.). Name + title. See Kizhavan saitoopaty.——*Raghoopaty* (இரகுபதி - iraguppathi, Tam.). From (above + pati, san. lord). Rama, lord of the raghoo race [raghoonautan]. Hindoo 2nd or pers. name [peyar].——*Raghooraman* (இரகுராமன் - iragurâman, Tam.). From (above + ráma, san. rama); rama of the raghoo family as distinguished from parshooraman [q.v.] of the bhaurgavam family [raghavan]. Hindoo 2nd or pers. name [peyar].——*Raghooveeran* (இரகுவீரன் - iraguvíran, Tam.). From (above + víra, san. hero). Rama, hero of the raghoo family. Hindoo 2nd or pers. name [peyar].——*Raghottaman* (இரகோத்தமன் - iragóttaman, Tam.). From (above + uttama, san. the best). Rama, best of raghoos [raghavendran]. Hindoo 2nd or pers. name [peyar].

RAH (راہ - ráh, *Hind.*). Way [raft].——*Rahbardaur* (راہبردار - ráhbardár, Hind.). From (above + bardár, pers. carrier). Guide.——*Raudaury* (راہداری - ráhdárí, Hind.). From (above + dárí, pers. keeping). A pass [rawauna]. Raudaury boat is a boat for passengers.——*Rustah* (رستہ - rástah, Hind.). From persian. Road [pauthay].

RAHASYAM (रहस्य - rahasya, *San.*). From (rah, san. to abandon), lonely, solitary, hidden. Literally mystery. Oopanishad [q.v.] or mystical doctrine which forms the third division of the vedam [q.v.], the other two being samhitay [q.v.] and bramhanam [q.v.].

RAHM (رحم - rahm, *Hind.*). Pity.——*Raheem* (رحیم - rahím, Hind.). From (rahima, ar. to pity). Merciful. Attribute of God [allah]. Common alam; as Raheem khan, alam + pataun alaumat. Also part of lacab; as Raheem ood deen, merciful in religion [ism].——*Rahman* (رحمان - rahmán, Hind.). From (rahima, ar. to pity). The benevolent. Attribute of God [allah]. Common alam, as Rahman khan, alam + pataun alaumat [ism].——*Rahman ghur* (رحمان گڑھ - rahmángarh, Hind.; ರಹಿಮಾಂಗಢ - rahimánghadi, Can.). Means rahman, proper name + fort. Hill, Colaur district, Mysore, to the south of Ambaujidroog, 4,227 feet above the level of the sea. To be distinguished from Ramandroog in Bellary district.——*Rahmat* (رحمت - rahmat, Ar.). From (rahima, ar. to pity). Divine mercy, grace. Prefixed to an alam forms a lacab; as Rahmat ool lah, grace of god [ism].——*Raoof* (رؤف - raúf, Hind.). From (ráfa, ar. to pity). Very merciful. Epithet of God [allah]. Common alam, as:—Raoof ahmed, double alam [ism].

RAHOO (राहु - ráhu, *San.*). From (rabh, san. to seize). The moon's ascending node [pautam], or point when in her northward course she cuts the ecliptic [craunty mundalam]; ☊ In Hindoo astronomy [jyotisham] one of the two obscure planets [graham] which occasion eclipses [grahanam], these being in fact the personifications of the umbra. According to mythology, Rahoo is the head of a monster, of which Kait [q.v.] is the trunk. Cf. the Typhæus of Hesiod. A deityan [q.v.], disguising himself, obtained some of the amritam [q.v.] when the gods churned the ocean [coormam]; but the sun [sooryan] and moon [chundran] detected him, and told Vishnoo [q.v.], who cut him in two, his head and arms forming Rahoo and the rest of him Kait; in revenge he sometimes seizes the sun [sooryan] or moon [chundran] and so causes eclipses. Varauha mihiran [q.v.] however in the sixth century A.D. states as follows:—" Now, if " he has a body or be simply a head with a regular motion in the " ecliptic [craunty mundalam], how comes it that he eclipses " [grahanam] the sun and moon when they are 180° from him? " The truth is that in his own eclipse, the moon [chundran] " enters the shadow of the earth, and in that of the sun [sooryan], " the solar disc; hence the lunar eclipse does not commence at " the western limb nor the solar at the eastern limb; when the " moon, whose course is always from west to east, is due opposite " to the sun swerving neither much to the north nor to the south, " he enters the shadow of the earth; the moon, moving from " the west, hides the solar disc from below just like a cloud; " and the solar eclipse varies differently in different countries " according to the different degrees of visibility of the eclipsed " disc; what eclipses the moon is bigger than the moon; what " eclipses the sun is smaller than the sun; hence in semi-lunar " and semi-solar eclipses the luminous horns are respectively " blunt and sharp." The current ideas on this subject evidently date from far behind that period. Rahoo is variously represented on a lion [simham], a flying dragon, an owl [ooloocam], and a tortoise [aumay], with a spear in his hand. He is worshipped in misfortune and to avert the approach of evil spirits, malignant diseases, earthquakes [mahy campam], comets [dhoomkait, nacshatram], &c., and especially during an eclipse [grahanam]. The astrological works rule thus:—if a person be born when Rahoo is rising above the horizon [cshitijam], his wisdom, riches, and children will be destroyed, he will be exposed to many afflictions, and he will be subject to his enemies.——*Rahoo caulam* (राहुकाल - ráhukála, San.). The time when the planet Rahoo is above the horizon [cshitijam]. This time varies according as the planet is moving in this or that direction during each particular day of the week; and such a time is unfortunate for any enterprise [goolica caulam, jyotisham, vauram]. Found in all calendars [punchaungam]. Cf. Rijaul ool gheib.——*Rahoo seed* (ರಾಹುಬೀಜ - ráhubíja, Can.). Means paralysis + seed, from shrunken appearance. Same as Roodrauck.

RAHTY (رہٹی - rahtí, *Hind.*). From (rahta, hind. wheel). Water wheel [chuckram].——*Rautnam* (چرخہ - charkhah, Hind.; రాట్నము - rátnamu, Tel.; റാട്ടു - ráttu, Mal.; இராட்டினம் - iráttinam, Tam.). From (rahta, hind. a spinning wheel). A machine to remove seed from cotton [q.v.] consisting of two rollers revolving in grooves against each other. Cotton is inserted between the rollers; the seeds fall on one side and cotton comes out on the other [punj]. Compare the Doodey coolar who clean cotton with a large bow suspended to the roof and having a gut string. Also a spinning wheel [nool].

RAIKHAY (रेखा - rékhá, *San.*). From (likh, san. to scratch). Means a line. Meridian. Also the first or prime hindoo meridian, considered to be a line drawn from Lunka [q.v.] to Meroo [q.v.], that is to say from ceylon supposed to lie on the equator [niracsham] to the north pole [oottaradhroovam, soomeroo]. Raikhauntaram is terrestrial longitude [deshauntaram, jyotisham]. For the two kinds of hindoo celestial longitude see Sauyanam and Dhroovacam. For the Rishy raikhay or

line of the rishies in hindoo shastrams, that is to say for the great circle drawn from the pole of the ecliptic to the equinoctial colure, see Rishy, Maunam, and Mausam.

RAIN TREE (زمنك - zamang, *Jav.*). From the dew falling from its extensive foliage. Same as Zamang.

RAIV (ریو - reu, *Hind.*; రేవు - révu, *Tel.*; இரேவு - irévu, *Tam.*). Ford [toray]. Also applied to the Custom house.——*Raila* (రేల - réla, Tel.). From (révu, tel. ford). Locative plural. Suffix in place names; as Saukiraila, meaning washermens' ford.

RAIWAND (ریوند - revand, *Pers.*). Rhubarb.

RAJ (राज् - ráj, *San.*). To shine, rule.——*Rai* (رأی - rái, Hind.). A hindee title equivalent to rajah [q.v.] or roya [q.v.] of the south, and in bengal usually corrupted into Roy [rao, row, roya]. Does not belong to this presidency.——*Raj* (राज्य - rájya, San.; راج - ráj, Hind.). From (ráj, san. to rule). A kingdom [rashtram].—"*a*" The following is an alphabetical list of the ancient native dynasties of southern india. Each can be seen under its own heading:—Andhras of calingam; Cadambas of banavausy; Calachooryas of calyaun; Caucateeyas of hanoomacondah or warangal; Chalookyas of coontalam; Chalookyas of rajahmundry and vengy; Cheras of dravida desham; Chola-chalookyas; Cholas of dravida desham; Congoo or gunga cheran; Pullavas of badaumy, vengy and canjy; Paundya-cholas; Paundyas of dravida desham; Rattas of maunyakhetam; Vaimareddies of condaveed; Yaudava hoysala ballaulas of dwaura samoodram or halabeed; Yaudavas of devagiry or dowlatabad; Yaudavas of vijianugger or anagoondy.—"*b*" The following is an alphabetical list of the Mahomedan dynasties of Southern india. Each can be seen under its own heading:—Adil shahies of beejapore, 1489-1672; Ahmed shahies of Berar, 1489-1574; Bahmanies of goolburga, 1347-1525; Bareed shahies of beedar, 1492-1609; Cootb shahies of golcondah, 1512-1671; Nizam shahies of ahmednugger, 1490-1607 [charitram]. Compare also the Carnatic nawaub family, 1692-1801.—"*c*" The following is the idea of a kingdom in Cooral:—தள்ளா விளையுளுந் தக்காருந் தாழ்விலாச் செல்வருஞ் சேர்வது நாடு—"a kingdom is that in which "those who carry on a complete cultivation, virtuous persons, "and merchants with inexhaustible wealth, dwell together."—பெரும்பொருளாற் பெட்டக்க தாகி யருங்கேட்டா லாற்ற விளைவது நாடு—"a kingdom is that which is desired "for its immense wealth, and which grows greatly in prosperity, "being free from destructive causes."—பொறையொருங்கு மேல்வருங்காற் றாங்கி யிறைவற் கிறையொருங்கு நேர்வது நாடு—"a kingdom is that which can bear any burden "that may be pressed on it from adjoining kingdoms and yet pay "the full tribute to its sovereign."—உறுபசியு மோவாப் பிணியுஞ் செறுபகையுஞ் சேரா தியல்வது நாடு—"a kingdom is that which continues to be free from excessive "starvation, irremediable epidemics, and destructive foes."—பல்குழுவும் பாழ்செய்யு முட்பகையும் வேந்தலைக்குங் கொல்குறும்பு மில்லது நாடு—"a kingdom is that which is "without various irregular associations, destructive internal "enemies, and murderous savages who sometimes harass "the sovereign."—இருபுனலும் வாய்ந்த மலையும் வருபுனலும் வல்லரணு நாட்டிற் குறுப்பு—"the constituents of a kingdom are the two waters from above and "below, well situated hills and an indestructible fort."——*Rajacoonjaran* (राजकुञ्जर - rájakuñjara, San.). From (rájá, san. king + kuñjara, san. elephant); best of kings. Name of a Paundyan [q.v.] king.——*Rajadhauny* (राजधानी - rájadhání, San.; راجدهانی - rájdhání, Hind.). From (rájá, san. king + dhána, san. seat). A capital city.——*Rajagopaul* (இராசகோப்பாலன் - irásagóppálan, Tam.). From (rájá, san. king + gópála, san. cowherd). Krishnan [q.v.], the cowherd king. Familiarly raujiga, rajoo. Hindoo 2nd or pers. name [peyar].——*Rajah* (राजा - rájá, San.; راجه - rájah, Hind.; இராசா - irásá, Tam.). King.—"*a*" A common title for any Hindoo ruler, and bestowed sometimes on private persons of high rank. Hindoo second or third name, common to both sexes; familiarly Rajoo, Rajy, Rajam.—"*b*" Plant first term either from shining leaves, fruits or flowers; or from the fruits and flowers being used by kings; sometimes also large. Ex., where transl. is of second term:—Cassia fistula (rájavriksha), tree; Datura fastuosa (rájadhúrta), cheat; Eugenia jambos (rájajambú), eugenia jambolana; Mimusops hexandra (rájádana), to eat; Momordica charantia (rájavallí), creeper; Musa paradisiaca (rájéshta), beloved; Pæderia fœtida (rájabalá), tonic; Vigna catiang (rájamásha), phaseolus mungo, var. radiatus; Webera corymbosa (rájataru), tree; Zizyphus jujuba (rájavallabhá), beloved. See gloss. paragraphs.—"*c*" Plant second term. Ex., where transl. is of first term:—Bauhinia racemosa (vanarája), forest; Cocos nucifera (trinarája), grass; Ficus religiosa (vriksharája), tree; Gardenia florida (gandharája), fragrance. See gloss. paragraphs.—"*d*" The Dravidian literature teems with reflections on regality. Compare the following from Cooral:—படைகுடி கூழமைச்சு நட்பரணா றுமுடையா னரசரு ளேறு—"he who possesses these six things, an army, a people, wealth, "ministers, friends, and a fortress, is a lion among kings."—அஞ்சாமை யீகை யறிவூக்க மிந்நான்கு மெஞ்சாமை வேந்தற் கியல்பு—"never to fail in these four things, fearless"ness, liberality, wisdom, and energy, is the kingly character.—அறனிழுக்கா தல்லவை நீக்கி மறனிழுக்கா மான முடைய தரசு—"he is a king who, with manly modesty, "swerves not from virtue, and refrains from vice."—இவறலு மாண்பிறந்த மானமு மாணா வுவகையு மேத மிறைக்கு—"avarice, undignified pride, and low pleasures, are faults in a "king."—இயற்றலு மீட்டலுங் காத்தலுங் காத்த வகுத்தலும் வல்ல தரசு—"he is a king who is able to acquire "wealth, to lay it up, to guard it, and to distribute it."—காட்சிக் கெளியன் கடுஞ்சொல்ல னல்லனேன் மீக்கூறு மன்ன னிலம்—"the whole world will exalt the country of "the king who is easy of access, and who is free from harsh "language."—இன்சொலா லீத்தளிக்க வல்லார்க்குத் தன்சொலாற் றான்கண் டனைத்திவ் வுலகு—"the world will "praise and submit itself to the mind of the king who is able "to give with affability, and to protect all who come to him."—முறைசெய்து காப்பாற்று மன்னவன் மக்கட் கிறையென்று வைக்கப் படும்—"that king will be esteemed a god "among men, who performs his own duties and protects his "subjects."—செவிகைப்பச் சொற்பொறுக்கும் பண்புடைவேந்தன் கவிகைக்கீழ்த் தங்கு முலகு—"the whole "world will dwell under the umbrella of the king, who can "bear words that embitter the ear."—உற்றநோய் நீக்கி யுறாஅமை முற்காக்கும் பெற்றியார்ப் பேணிக் கொளல்—"let a king procure and kindly care for men who can overcome "difficulties when they occur and guard against them before they "happen."—அரியவற்று ளெல்லா மரிதே பெரியாரைப் பேணித் தமராக் கொளல்—"to cherish great men and make "them his own, is the most difficult of all difficult things."—தம்மிற் பெரியார் தமரா வொழுகுதல் வன்மையு ளெல்லாந் தலை—"so to act as to make those men his own, who "are greater than himself, is of all powers the highest."—சூழ்வார் கண்ணாக வொழுகலான் மன்னவன் சூழ்வாரைச் சூழ்ந்து கொளல்—"as a king must use his ministers as eyes, "let him well examine their character and qualifications before "he engages them."—தக்கா ரினத்தனாய்த் தானொழுக வல்லானைச் செற்றார் செயக்கிடந்த தில்—"there will be "nothing left for enemies to do, against him who has the power "of acting so as to secure the fellowship of worthy men."—இடிக்குந் துணையாரை யாள்வாரை யாரே கெடுக்குந் தகைமை யவர்—"who are great enough to destroy him who "has servants that have power to rebuke him?"—இடிப்பாரை யில்லாத வேமரா மன்னன் கெடுப்பா ரிலானுங் கெடும்—"the king, who is without the guard of men who can rebuke "him, will perish, even though there be no one to destroy him."—முதலிலார்க் கூதிய மில்லை மதலையாஞ் சார்பிலார்க் கில்லை நிலை—"there can be no gain to those who have no "capital; and in like manner there can be no permanence to "those who are without the support of adherents."—ஒற்று முறைசான்ற நூலு மிவையிரண்டுந் தெற்றென்க மன்னவன் கண்—"let a king consider as his eyes these two "things, a spy and a book of laws universally esteemed."—வானோக்கி வாழு முலகெல்லா மன்னவன் கோனோக்கி வாழுங் குடி—"when there is rain, the living creation thrives; "and so when the king rules justly, his subjects thrive."—அந்தணர் நூற்கு மறத்திற்கு மாதியாய் நின்றது மன்னவன் கோல்—"the sceptre of the king is the firm support of the "vedams of the Bramin, and of all virtues therein described."—குடிதழீஇக் கோலோச்சு மாநில மன்ன னடிதழீஇ நிற்கு முலகு—"the world will constantly embrace the feet of "the great king who rules over his subjects with love."—இயல்புளிக் கோலோச்சு மன்னவ னாட்ட பெயலும் விளையுளுந் தொக்கு—"rain and plentiful crops will ever dwell "together in the country of the king who sways his sceptre with "justice."—வேலன்று வென்றி தருவது மன்னவன் கோலதூஉங் கோடா தெனின்—"it is not the javelin that "gives victory, but the king's sceptre, if it do no injustice."—இறைகாக்கும் வையக மெல்லா மவனை முறைகாக்கு முட்டாச் செயின்—"the king defends the whole world; and "justice, when administered without defect, defends the king."—எண்பதத்தா னோரா முறைசெய்யா மன்னவன் றண்பதத்தாற் றானே கெடும்—"the king who gives not facile "audience, and who does not examine and pass judgment, will perish in disgrace."—நாடொறு நாடி முறைசெய்யா மன்னவ னாடொறு நாடு கெடும்—"the country of the king "who does not daily examine into the wrongs done and distri"bute justice, will daily fall to ruin."—கடிதோச்சி மெல்ல வெறிக நெடிதாக்க நீங்காமை வேண்டு பவர்—"let the "king, who desires that his prosperity may long remain, "commence his preliminary enquiries with strictness, and then "punish with mildness."—கொலையிற் கொடியாரை வேந்

தொறுத்தல் பைங்கூழ் களைகட் டதனொடு நேர்—"for a king to punish criminals with death, is like pulling up "the weeds in the green corn."—அளியின்மை ஞாலத்திற் கெற்றற்றே வேந்த னளியின்மை வாழு முயிர்க்கு—"as is the world without rain, so live a people whose king is "without kindness."—இனத்தாற்றி யெண்ணாத வேந்தன் சினத்தாற்றிச் சீறிற் சிறுகுந் திரு—"the prosperity of "that king will waste away, who without reflecting on his affairs "himself, commits them to his ministers, and when a failure "occurs gives way to anger, and rages against them."—கண்ணோட்ட மென்னுங் கழிபெருங் காரிகை யுண்மையா னுண்டிவ் வுலகு—"the world exists through that greatest "ornament of princes, a gracious demeanour."——*Rajahamsam* (राजहंस - rájahamsa, San.; اوز - iwaz, Ar.; قاز - káz, Pers.; راج هنس - rájhans, Hind.; قاز - káz, Dec.; ರಾಜಹಂಸ - rájahamsa, Can.; పూగొంగ - púgonga, Tel.; ରାଜହଂସ - rájohomso, Oor.; രാജഹംസം - rájahamsam, Mal.; பூநாரை - púnárai, Tam.). Title from sanscrit. San. from (rájá, san. king + hamsa, san. swan). Dec. from persian. Tel. from (puvvu, tel. flower + konga, tel. crane). Tam. from (pú, tam. flower + nárai, tam. crane); from red color. Ar. also (nuhámah). Pers. also (murghábí), meaning water fowl Hind. also (bághans), meaning heron goose. Tel. also (samudrapuchiluka), meaning sea + parrot. Beng. also (kanthunti). Title otherwise Flamingo. Phænicopteridæ family, lamellirostres, natatores, aves [pacshy, 48], of naturalists [jantoo]. Neck and legs of enormous length; bill suddenly bent down. There is only one genus, Phœnicopterus roseus. Alias Phœnicopterus antiquus, minor. Throughout rosy white, rose color more marked on head, back and tail; wing-coverts, except primary coverts, which are white, and tertiaries fine rosy red; quills black, last of secondaries white; lower wing-coverts black; bill rosy, black at tip; irides pale golden-yellow; legs and feet pale rosy red; length 4 feet 4 inches; female smaller; very abundant in the poolicat lake; sleep on one leg, with the neck bent back, and the head under the wing; swim well with the port of swans [hamsam].——*Rajah boil* (راج پھوڑا - rájphorá, Hind.; రాచపుండు - rátsapundu, Tel.; பக்கப்பிளவை - pakkappilavai, Tam.). A carbuncle. Natives are very subject to these [veidyan].——*Rajahmundry* (రాజమహేంద్రవరము - rájamahéndravaramu, Tel.). See sep. title.——*Rajah's drug* (خسرودارو‌ئی کلان - khusravidárúikalán, Pers.). Same as Greater galangal.——*Rajah's tree* (राजवृक्ष - rájavriksha, San.). Same as Common condray.——*Rajah vycaul* (இராசவாய்க்கால் - irásaváykkál, Tam.). Means king's canal. Any main channel [q.v.]. So Rajah rustah is a high-road.——*Rajalingam* (இராசலிங்கம் - irásalingam, Tam.). From (rájá, san. king + linga, san. phallic emblem of shiva), having royal ensigns or tokens. Hindoo 2nd or pers. name [peyar].——*Rajaparny* (राजपर्णी - rájaparní, San.). Means shining leaved. Same as Gandhaulee.——*Rajarajan* (राजराज - rájarája, San.). From (above + rájá, san. king), king of kings. Chola king 1023-1064. So called from having defeated the Paundyan [q.v.] king. United the Vengy [q.v.] and Calingam [q.v.] kings, by intermarriage, to Chola [q.v.] territories [charitram]. See vol. I (126).——*Rajaram* (ರಾಜಾರಾಮ - rájaráma, Can.). From (rájá, san. king + ráma, can. the god), rama, the king. Hindoo 2nd or pers. name [peyar].——*Rajaratnam* (இராசரத்தினம் - irásarattinam, Tam.). From (rájá, san. king + ratna, san. gem). The best king. Familiarly Rajam. Hindoo 2nd or pers. name [peyar].——*Rajaratnaucary* (राजरत्नाकर - rájaratnákara, San.). From (rájá, san. king + ratna, san. gem + ákara, san. mine). Ceylon work. Written by a priest, Abejaraja pirivanan. Extracts from ancient books. Contains history of Booddha [q.v.] abridged from Mahavanso [q.v.]. It records the history of the N. indian ceylon rulers from the date of Vijaya rajah, who was the first king in 540 B.C. to the settlement of the Portuguese in the island.——*Rajashekharan* (இராசசேகரன் - irásaségaran, Tam.). From (rájá, san. king + shékhara, san. head). The chief of kings. Hindoo 2nd or pers. name [peyar]. Name of a Paundyan [q.v.] king. See vol. I (124).——*Rajashree* (राजश्री - rájashrí, San.). From (rájá, san. king + shrí, san. prosperity). The fortune of a king, majesty; a term of address used in writing [peyar]. For the full form Maharajah raja shree, see M.R.Ry.——*Rajasooyam* (राजसूय - rájasúya, San.). From (rájá, san. king + su, san. to perform sacrifice). A religious sacrifice [yanyam] performed at the coronation of a great king.——*Rajatty* (இராசாத்தி - irásátti, Tam.). Queen [ranee].——*Rajauvaly* (राजावली - rájávalí, San.). From (rájá, san. king + ávali, san. row). Ceylon work. Compiled from local histories. A corollary to Mahavanso [q.v.] and Rajaratnaucary [q.v.], continuing the narration through the struggles between the Portuguese and their rivals, the Dutch; until the latter power, having succeeded expelling their opponents, gained possession of Colombo, and ultimately subjugated the whole of the maritime districts of the island. See vol. I (4), (82).——*Rajaveety* (राजवीथी - rájavít'hí, San.). From (rájá, san. king + vít'hí, san. street). Principal street [maunasauram, oor, veety]. So Rajah rustah, a high road.——*Rajcoomar* (राजकुमार - rájakumára, San.). From (rájá, san. king + kumára, san. son). A prince [shahzauda].——*Rajendra* (राजेन्द्र - rájéndra, San.). From (rájá, san. king + indra, can. lord), best king. See vol. I (126), (130). Also called Bookka [q.v.]. Rajah of Vijianugger of Harihar [q.v.] dynasty A.D. 1350—1379. See vol. II, 251. Rajendra is another name of the Cholan [q.v.] Coolotoongan [charitram, coolotoongan].——*Rajpindey* (ರಾಜಪಿಂಡೆ - rájapinde, Can.). From (rájá, san. king + pinda, san. ball offering of rice); means sapinda [q v.] or relation of the king. Title of ruling family in Mysore [janty, urs].——*Rajpoot* (راجپوت - rájpút, Hind.). From (rájá, san. king + putra, san. son). A son. A prince. The general designation of the races in the north and west of India, said to be sprung from the ancient dynasties of the sun and moon [vamsham] forming the Soorya vamsham [q.v.] and Chundra vamsham [q.v.] tribes, or else from a sacred fire kindled on Mount aboo by the saint Agastyan [q.v.] and who are thence termed Agnicoolam [q.v.] or of the family of fire. From these sources thirty-six primary royal races have originated. The solar dynasties are the Grahilote, Rahtore, Kachwaha. There is but one race sprung from the moon, through Krishnan [q.v.], that of Yadoo [q.v.]. The Agnicoolam races are originally four, the Pramaura, Pariharah, Chalookya, and Chauhan [janty]. Modern rajpoots speak hindostany [q.v.]; take the title of singh [q.v.]; keep their wives gosha [q.v.]; very jealous in caste rules; many of them sepoys [q.v.] and police men. Probably recent immigrants from the north. Numbers in Presidency about 15,000; mostly in Bellary and Salem, see vol. I (66); II, 227.——*Rajya lutchmy* (राज्यलक्ष्मी - rájyalakshmí, San.). From (rájya, san. kingdom + lakshmí, san. the goddess). The goddess of royalty [ashtalutchmy].——*Ranee* (రాణి - ráni, Tel.). The wife of a rajah, a queen or princes [peyar, rajatty].——*Ranipett* (رانی پیٹھ - ránípeth, Hind.; இராணிப்பேட்டை - iránippéttai, Tam.). From (iráni, tam. queen + péttai, tam. suburb); after the wife of deshinga rajah. Village, Head assistant collector's head-quarters; North arcot dist., Wallajahpett tal.; pop. 3,697; acres 2,697; lat. 12° 56′; long. 79° 23′; from Arnee N. 18 miles; from Chittore S.E. 25 miles; from Madras W. 65 miles; from Tripatty S. 49 miles; from Vellore E. 13 miles; from Wallajahpett W. 2 miles. On left bank of Palaur opposite Arcot. The country round is flat. Built, about 1771, by Saudat oollah khan in honor of youthful widow of Deshinga rajah of Jinjee, who committed suttee [q.v.]. The Rajah revolted and was killed. Until 1850 belonged to Arcot talook. Till 1855 military station. In 1861 41st Regiment stationed here for a time. Most buildings dismantled. Owing to cheapness of house-rent European pensioners used to live here. Large native christian community. Cattle fair Friday on parade ground. A mile east is tope [q.v.] known as Nowlakbaugh extending along Palaur for three miles; means nine-lakh garden from many fruit trees especially mangoes of sorts. Contain mango [q.v.], orange [q.v.], cocoanut [q.v.] and other fruit trees. The following are the travelling distances by road from Ranipett to different places :—

——*Rao* (راو - ráu, Hind.). Oordoo form of Row [q.v.]. Does not belong to this presidency. Cf. Rai, Roya.——*Rashtracootam* (राष्ट्रकूट - ráshtrakúta, San.). From (ráshtra, san. kingdom +

kúta, san. eminence). Ancient tribe. Flourished between about the fifth and eighth centuries. Subverted the Chalookyas [q.v.] of Bombay. Did not come much in contact with dynasties [raj] of the south [charitram]. Vol. I (138).——*Rashtram* (राष्ट्र - ráshtra, San.). From (ráj, san. to rule). Kingdom [rajyam].——*Raucha* (రాచ - rátsa, obl.; రాచవాడు - rátsavádu, pers. sing.; రాచవారు - rátsaváru, pers. pl., Tel.). From (rájá, san. king). Tel. oblique form for Rauz [q.v.]. The plural Rauchavaur often appears.——*Raupore* (రాపూరు - rápúru, Tel.). See sep. title.——*Rauz* (రాజు - rádzu, Tel.). See sep. title.——*Rayaun* (رايان - ráyán, Dec.). See sep. title.——*Reddy* (రెడ్డి - reddi, Tel.). From (rédu, tel. king). The corresponding terms are:—Tam. vellaula, Can. okkaliga, Mal. nayar.—"*a*" The general caste-title of the agricultural class in the Teloogoo country. Also called Caupoo [q.v.] or cultivator and Naidoo [q.v.] or master. They are the cultivators of Nellore and the Ceded districts [q.v.], and throughout a large portion of the Teloogoo country, in some places in which they form a preponderating element among the Hindoo population. Most are engaged in agriculture [vellaumay] either as farmers or cultivators [ryots], but some of them are traders. They have a character for energy and thrift. In physique these agriculturists are a finer race than Tamul cultivators. They appear to have spread out from Rajahmundry. They have penetrated as far as the Mahratta country, being met with up to Poona where they are considered the most thriving cultivators. They are often found also in the Tamul country. In their customs they resemble other ordinary Shoodra [q.v.] castes [jauty]. There are several divisions among them, the chief being the Pauknauty, Pocanauty, Dessore, Panta, Peddacunty, Pullam, Morasoo, Pully, Tota, and Yerlam caupoos. The caste-title of all these is Reddy, and the names of their sub-divisions are derived from their original country or their particular occupations. Thus the Pauknauty caupoos are those who came from the east country. The Pocanauties are from the areca [q.v.] palm-growing land. The Dessore reddies were residents originally of some place called Dessore. The Pantas are so called from panta, a crop. The Peddacunties from some place called Peddagull. The Pullams are low-country people. The Morasoos were so called because they used to weave mats [boriyah] and baskets [tokrah], though now they only cultivate. Yerlam caupoos are partly of braminical descent. These northern agriculturists think themselves superior to the Tamul cultivating castes. In the Madura district, soon after the establishment of the Naick [q.v.] dynasty [raj], the Telinga immigrants became so numerous and so influential that the Jesuit priests of Madura regarded them with the Bramins [q.v.] as constituting the chief part of the people. The reddies are divided into clans, who marry in their own clans. They eat all flesh but cow's flesh. Property descends through the issue of a son and grand-daughter, uncle and niece. They refuse to eat with any other caste whatever, or even to take choonam [q.v.] from any but their own people. Numbers about 500,000 throughout telinga country; but found also considerably in S. arcot, Madura, Salem, Tinnevelly and Trichinopoly. See vol. I (67); II, 237.—"*b*" Reddy is the title of the head of the village authorities in the Telinga country; but more properly designated as pedda reddy, senior reddy or villager [jauty].—"*c*" Sometimes this is a mere Hindoo third name [peyar].——*Renigoonta* (రేణిగుంట - rénigunta,* Tel.). From (rédu, tel. king + gunta, tel. tank). Village, Railway station; North arcot dist., Chundragherry tal.; pop. 781; lat. 13° 38′; long. 79° 33′; height 368 feet; from Chittore N.E. 41 miles; from Chundragherry E.N.E. 13 miles. Junction of N.W. line of Madras railway and Nellore-tripatty section of the S. indian railway.——*Row* (राव ráva - Mahr.; راو - ráu, Hind.; రావు - rávu, Tel.). From (rájá, san. king). Title originally taken by Cshatriyas [q.v.]; but extended by Mahomedan rulers to Hindoo civil officers of high rank. Now common among madhwas [q.v.] who are not priests, the priests being styled Acharries [q.v.], answering to Shastries [q.v.] among the smartas [q.v.]. Hindoo third name [peyar]; as Balajee row. The title is now being taken even by naidoos [q.v.] and others [peyar].——*Row bahaudur* (راو بهادر - ráubahádur, Hind.). A high title of honor bestowed on very distinguished Hindoos [khitaub, peyar].——*Row sahib* (راو صاحب - ráusáhib, Hind.). A title of a honor bestowed on distinguished Hindoos. The equivalent among Mahomedans is Khan sahib [khitaub, peyar].——*Rowtan* (राउत - ráúta, Mahr.; இராவுத்தன் - irávuttan, Tam.). From (ráva, mahr. king + dúta, san. messenger). A cavalier. Title of Lubbays [q.v.].——*Roya* (راى - rái, Hind.; ರಾಯ - ráya, Can.; రాయడు - ráyadu, Tel.) [rai, rajah, rao, row, rye]. Provincialism for Rajah; under Mahomedan governments title given to Hindoo civil officers of high rank [khitaub, peyar]. Also a usual name amongst the Teloogoo races. Suffix in Tamul and Teloogoo proper names as Soobbaroya. The plural Royel [q.v.] is a title taken by the Velamas [q.v.] of the Northern circars [q.v.], who claim to be Rajpoots [peyar].——*Royachoty* (రాయచోటి - ráyatsóti, Tel.). See sep. title.——*Royacottah* (ರಾಯಕೋಟೆ - ráyakóte, Can.). Means king's fort.—"*a*" Zemindarry; Salem dist., Krishnagherry tal.; pop. 1,347; square miles 14. Peshcush Rs. 1,266.—"*b*" Village, Hill; Salem dist., Krishnagherry tal.; pop. 1,347; acres 9,117; lat. 12° 31′; long. 78° 05′; height 2,364; from Krishnagherry W. 12 miles; from Salem N.N.W. 60 miles. One of the Baramahaul [q.v.] fortresses, British frontier garrison on the Mysore borders and until recently occupied by troops. Commanded one of the most important passes [ghaut]. Captured in 1791 by Lord Cornwallis. Ceded to the English by the treaty of 1792. Under its walls the British army encamped in 1799 on the way to Seringapatam. A place of residence for military pensioners, who abandoned it after the famine of 1876–78. Near the town is a large square well hewn from the solid rock. Public bungalow [q.v.]. Between this place and Krishnagherry is a winding ghaut [q.v.] remarkable for its beautiful scenery. North stands the Droog. It is ascended by an easy gradient passable to a considerable distance on horseback. From the summit there is a view of the Dharmapoory, Krishnagherry and Oossoor talooks, while to the east the Jawaudies and Yelagherry are visible. There is a European cemetery at the base. The fortifications are in comparatively good order, and one almost entirely of European construction.——*Royadoo* (రాయడు - ráyadu, Tel.). From (rádzu, tel. king). A title adopted as a surname by the Velama [q.v.] caste in the Northern circars [q.v.]. Plural is Royel [q.v.]. Hindoo second or third name [peyar].——*Royadroog* (ರಾಯದುರ್ಗ - ráyadurga, Can.). See sep. title.——*Royagada* (రాయఘడ - ráyaghada, Tel.). See sep. title.——*Royalcheroo* (రాయలచెరువు - ráyalcheruvu, Tel. ráyalcheru*). From (ráyalu, tel. king + cheruvu, tel. tank). Called after Krishna deva royel of Vijianugger. Village, Railway station; Anantapore dist., Tadpatry tal.; pop. 1,855; acres 3,502; lat. 15° 03′; long. 77° 52′; height 942; from Anantapore N.N.E. 29 miles; from Tadpatry N.W. 16 miles. On trunk road midway between Gooty and Tadpatry. Travellers' bungalow [q.v.]. From a hill in the neighbourhood Tippoo obtained flints [teettatty cull] for matchlocks. A soft limestone [choonam cull] is found close by, from which cups and vases are made.——*Royanandam* (రాయానందము - ráyánandamu, Tel.). From (rádzu, tel. king + ánanda, san. pleasure), means king pleaser. Hindoo 2nd or pers. name [peyar].——*Royappan* (இராயப்பன் - iráyappan, Tam.). From (iráyan, tam. king + appan, tam. father, titular affix). Means king, the father. Hindoo 2nd or pers. name [peyar]. Applied to St. Peter by native Christians; gives name to Royapettah, the suburb of madras [q.v.].——*Royavalsa* (రాయవలస - ráyavalasa, Tel.). From (ráyadu, tel. king + valasa, tel. colony). Ghaut; Vizagapatam dist., Srungavarapoocote division; lat. 18° 14′; long. 83° 04′; from Srungavarapoocote N.W. 11 miles. On route from Caushiputnam to Jeypore by Gaulicondah. The crest is 2,850 feet above sea. Maharajah of Vizianagram has a coffee [q.v.] estate.——*Royel* (రాయలు - ráyalu, Tel.). Plural of Roya [q.v.]. Hindoo third name. Title taken by the Velamas [q.v.] of the Northern circars [q.v.]. The title of the Hindoo sovereigns of Vijianugger [q.v.], the last Hindoo principality of importance in the South of India [peyar].——*Royer* (ರಾಯರು - ráyaru, Can.). Plural of Roya. Same as Royel.——*Rye* (రాయ - ráya, Tel.). King [roya]. Distinguish from Rye, meaning stone.——*Rye ellore* (రాయవేలూరు - ráyavélúru, Tel.). From (ráya, tel. king + vélúr, tam. vellore). Another name for Vellore to distinguish it from Ooppellore or Ellore [q.v.].——*Ryroo* (രൈരു - rairu, Mal.). From (ráyan, mal. king). Hindoo 2nd or pers. name [peyar].

RAJAB (رجب - rajjab, *Hind.*). From (rajiba, ar. to honor). Honored, as it was in the time of ignorance prior to Mahomet held unlawful to make war during this month. Name of the seventh month [maheena] of the Mahomedans. In this Mahomet's nocturnal journey [leilat ool mirauj] to heaven took place.

RAJAHMUNDRY * (రాజమహేంద్రవరము - rájamahéndravaramu, *Tel.*) [raj]. From mahendradeva of the orissa dynasty. Sanscrit name (rájanaréndrapura), meaning rajanarendran's town.——**(1)** Former district named from its principal town. One of the five Northern circars [q.v.]. It lay between lat. 16° 18′ to 17° 38′; long. 81° 7′ to 82° 40′. Area 6,050 square miles. Bounded north by Nagpore territory; north-east by the district of Vizagapatam; south-east by the Bay of Bengal; west by the district of Masulipatam; and north-west by the territory of the Nizam. Coringa, Rajahmundry, and Samulcottah are the towns of importance. For history see under head of the town.——**(2)** Talook, Godavery district. Tahsildar's pay Rs. 175. Area 2,058 square miles. Centre of district. Bounded:—North by Bustar country; south by Ramchendrapooram talook; east by Peddapore talook; and west by the Godavery. Partly hilly and partly flat. In some places very rocky. Special industry is the manufacture of cotton [q.v.] carpets [jamkhana]. Considerable trade is also carried on in tobacco [pogauk] and dry grains [q.v.]. Many large tanks [q.v.] in the talook, of which the Cottapully, Gokavaram and Goommulladoddy are the principal. Booradacaulwa channel [q.v.] rises in the hills and falls into the river Godavery. Zemindarries:—Bommoor, Bootchampett, Cantavaram, Dandangy, Hookumpett, Hoondeshwarapooram, Moormunda, Pettah, Vangalpoody, Zaulimoody. Places of archæological interest:—Coroocondah, Dowlaishweram, Gandaranda, Koty, Mirtipaud, Raghoodevapooram, Rajahmundry. Principal trig. stations:—Calimaumidy, Nullacondah, Potoo-

condah. The leading places, &c., in the talook are the following. —*Bommoor* (బొమ్మూరు - bommúru, Tel.). From (bomma, tel. doll + úru, tel. village). Zemindarry, Village; square miles 4; lat. of village 16° 58′; long. 81° 51′; from Cocanada W. 28 miles; from Rajahmundry S.E. 4 miles. Peshcush Rs. 833.——*Booradacaulwa* (బురదకాలువ - buradakálava, Tel.). From (burada, tel. mud + kálava, tel. channel). Channel. Rises in the Rumpa country and irrigates a large number of villages above Rajahmundry. Is not navigable.——*Bootchampett* (బుచ్చంపేట - buççampéta, Tel.). From (buççamma, tel. proper name, meaning little mother + péta, tel. suburb). Zemindarry, Village; lat. of village 17° 07′; long. 81° 50′; from Cocanada W.N.W. 31 miles; from Rajahmundry N.N.E. 8 miles. Peshcush Rs. 738.——*Calimaumidy* (కలిమామిడి - kalimámidi, Tel.). From (kali, tel. gruel + mámidi, tel. mango, mangifera indica, linn.). Trig. station; lat. 17° 34′ 43·59″; long. 82° 09′ 23·25″; height 2,822 feet.——*Cautavaram* (కాటవరము - kátavaramu, Tel.). From (kádu, tel. forest + pura, san. town). Zemindarry, Village; square miles 26; lat. of village 17° 06′; long. 81° 47′; from Cocanada W.N.W. 34 miles; from Rajahmundry N.N.W. 8 miles. Peshcush Rs. 2,121.——*Coroocondah* (కోరుకొండ - kórukonda, Tel.). From (kóru, tel. steep + konda, tel. hill). Village, Place of pilgrimage; pop. 2,329; acres 1,611; lat. 17° 10′; long. 81° 51′; from Cocanada W.N.W. 30 miles; from Rajahmundry N.N.E. 12 miles. Temple of Narsimhasawmy built about A.D. 1443. West of the village is an old fort. On the same side is the Panndavoola condah, which contains five rock-cut caves, one with sculptured figures. A weekly fair every Sunday.——*Dandangy* (దండంగి - dandangi, Tel.). From (dandu, tel. army + angu, tel. beauty). Zemindarry, Village; lat. of village 17° 19′; long. 81° 45′; from Cocanada W.N.W. 42 miles; from Rajahmundry N.N.W. 22 miles. Peshcush Rs. 564. —*Dootsarty* (దూసర్తి - dútsarti, Tel.). From (dúchi, tel. a game + parti, tel. a village). Zemindarry, Village; lat. of village 17° 35′; long. 82° 06′; from Cocanada N.N.W. 45 miles; from Rajahmundry N.N.E. 44 miles. Belonged to the Vizagapatam district up to time of late Rumpa fitoory [fitoor] when it was transferred to this district.——*Dowlaishweram* (ధవళేశ్వరము - dhavaléshvaramu, Tel.). See sep. title.——*Godavery* (గోదావరి - gódávari, Tel.). See sep. title.——*Gokavaram* (గోకవరము - gókavaramu, Tel.). See sep. title.——*Goommulladoddy* (గుమ్మళ్లదొడ్డి - gummalladoddi, Tel.). From (gummadi, tel. pumpkin, cucurbita maxima, duch. + doddi, tel. enclosure). Village; lat. 17° 12′; long. 81° 53′; from Cocanada N.W. 31 miles; from Rajahmundry N.N.E. 4 miles. Tank.——*Hookumpett* (హుకుంపేట - hukampéta, Tel.). From (hukm, hind. order + péta, tel. suburb). Hind. name (zuhúrulláhbád), meaning zoohooroollah, proper name, meaning manifestation of god + city. Zemindarry, Village; lat. of village 16° 59′; long. 81° 50′; from Cocanada W. 28 miles; from Rajahmundry S.E. 2 miles. Peshcush Rs. 1,401.——*Hoondeshwarapooram* (హుండేశ్వరపురము - hundéshvarapuramu, Tel.). From (hundéshvarudu, tel. shiva, the tiger-lord + pura, san. town). Zemindarry, Village; lat. of village 17° 06′; long. 81° 48′; from Cocanada W.N.W. 32 miles; from Rajahmundry N. 7 miles. Peshcush Rs. 630.——*Moormunda* (మురుమండ - murumanda, Tel.). From (muruvu, tel. beautiful + manda, tel. a cattle herd). Zemindarry, Village; lat. of village 16° 53′; long. 81° 54′; from Cocanada W.S.W. 25 miles; from Rajahmundry S.S.E. 10 miles. Peshcush Rs. 1,850.——*Nullacondah* (నల్లకొండ - nallakonda, Tel.). From (nalla, tel. black + konda, tel. hill). Trig. station; lat. 17° 18′ 15·85″; long. 81° 59′ 35·44″; height 1,267 feet; from Lodaipollem N. ¾ mile.——*Paumoolair* (పాములేరు - pámuléru, Tel.). From (pámu, tel. snake + éru, tel. river). A hill stream; Perennial tributary of Godavery; flows through Paumoolair valley.——*Potoocondah* (పోతుకొండ - pótukonda, Tel.). From (pótu, tel. ox + konda, tel. hill). Trig. station; lat. 17° 15′ 45·60″; long. 81° 46′ 58·23″; height 1,520 feet; from Ramannapollem N.W. 2 miles.——*Raghoodevapooram* (రఘుదేవపురము - raghudévapuramu, Tel.). See sep. title.——*Rajahmundry* (రాజమహేంద్రవరము - rájamahéndravaramu, Tel.). See below.——*Soodicondah* (సూదికొండ - súdikonda, Tel.). From (súdi, tel. needle + konda, tel. hill). Village; lat. 17° 17′; long. 81° 58′; from Cocanada N.W. 30 miles; from Rajahmundry N.E. 22 miles.——*Vangalpoody* (వంగలపూడి - vangalapúdi, Tel.). From (vanga, tel. brinjal, solanum melongena, linn. + púdi, tel. village). Zemindarry, Village; lat. of village 17° 12′; long. 81° 43′; from Cocanada W.N.W. 41 miles; from Rajahmundry N.N.W. 16 miles. Peshcush Rs. 3,788.——*Zaulimoody* (జాలిమూడి - dzálimúdi, Tel.). From (dzále, tel. a hawk + múdi, tel. collection). Zemindarry, Village; lat. of village 17° 06′; long. 81° 47′; from Cocanada W.N.W. 33 miles; from Rajahmundry N.N.W. 7 miles. Peshcush Rs. 254.——

(3) Town, Port, Head-quarters of Judge, Sub-collector and Superintendent of police; Godavery dist., Rajahmundry tal.; pop. 28,397; acres 8,842; lat. 17° 00′; long. 81° 48′; from Cocanada W.N.W. 30 miles; from Coonavaram S.E. 51 miles; from Ellore N.E. 48 miles; from Madras N.N.E. 287 miles; from Narsapore N. 39 miles. On elevated ground on left bank of Godavery, here a mile broad. Connected by canal with Cocanada, Coringa and Kistna district. Origin attributed by some to Mahendradeva of the Orissa dynasty [gajapaty], and by others to a Chalookya [q.v.] ruler. In the preface to a Teloogoo translation of the Mahabhaurat [q.v.] it is called the central gem of the Vengy [q.v.] desham and the capital of Rajanarendran. Rajahmundry was comprised in the ancient kingdom of Golcondah. In 1471 taken by the Mahomedans and given to Nizam ool moolk as a jagheer [q.v.]. In 1512 retaken by Krishna deva roya and restored to Orissa. For over sixty years Hindoo rule continued, and Rajahmundry withstood two protracted sieges till in 1571-72 it yielded to the Mussalmans of the Deccan [q.v.] under Rifat khan. For the next century and a half it was the scene of perpetual fighting, and at last fell to Golcondah and became one of the four nawaubships of that Government. Granted to the French in 1753, and Bussy's head-quarters from 1754 to 1757. Hither, retreating before Forde, came the remains of Conflan's army after the battle of Condore in 1758 only to be driven out by the Company's sepoys [q.v.]. Shortly afterwards Forde proceeded against Masulipatam, and during his absence the French recaptured Rajahmundry; but finding nothing of value, the treasure having been sent to a Dutch settlement, evacuated it almost immediately. Transferred to the British in 1759 and ceded to them by treaty in 1765. There was a slight disturbance in 1765. The country in the neighbourhood is low and chiefly composed of black-cotton soil [regar]. The town consists of one principal street. Innespett is the southern suburb. The houses of the European residents are to the north and north-east of the town. A Protestant mission of the American evangelical lutheran church carries on work in Rajahmundry, Moormunda, and outlying villages. Old fort north of the town with walls originally of great size and height, made of earth faced with stone. Ancient temple. Mosque [musjid] of Mahomed toghlak of Delhi with inscription of A.D. 1325, probably the earliest royal Mahomedan inscription in S. india. Mussalmans [q.v.] form now a small and indigent class. The following are the travelling distances by road from Rajahmundry to different places :—

To	Viâ	Miles and Furlongs.

RAM (रम् - ram, *San.*). To please.——*Rama* (राम - ráma, San.; இராமன் - iráman, Tam.). From (ram, san. to please). Proper name common to both sexes, used in composition with distinctive feminine suffixes [peyar]. In composition it sometimes intimates excellence. This name belongs to the Aryan [q.v.] epic period, and is given to three persons of historical importance, all incarnations [avatar] of Vishnoo [q.v.]—"*a*" The first is Parshooraman [q.v.] or rama of the axe. He is considered sixth avatar [q.v.] of Vishnoo, and belongs to the period of the first struggle between the Bramins [q.v.] and the Cshatriyas [q.v.], the hierarchy and the government.—"*b*" The second is Rama with the affix of Chundran [q.v.] in the North and prefix of Codandam [q.v.] in South india. The seventh special manifestation of Vishnoo as a warrior king and conqueror. He was held to be the son of Dasharatan, king of Ayodhyay [cosalam], of the solar race. As a previous progenitor was named Raghoo [q.v.], he is often named Raghavan [q.v.]; and is worshipped under that name at Trivellore. His birth, adventures, and exploits form the subject of the Ramayanam [q.v.], the most popular of books in the south. In his pupilage he was placed under the care of Vishwamitran [q.v.] and received supernatural arms. At a swayamvaram by Janacan [q.v.], king of Mitilay, he succeeded in bending the prescribed bow and hitting the mark, carrying off as his prize Jaunaky [q.v.], better known as Seetay [q.v.], his future consort. Owing to the intrigues of Keikeyee, youngest wife of Dasharatan, who favored her son Bharatan's accession to the throne, Rama and Seetay were banished to a wilderness; Lutchmanan [q.v.], Rama's brother, going with them. By the device of Mareechan, Rama was led away in pursuit of a deceptive deer [mrigam]; and Ravanan [q.v.], a raucshasa [q.v.] king, passing by, took up Seetay and carried her off through the air. Two fabulous birds fought with Ravanan, but were killed, and their bodies falling to the ground gave intimation to Rama of what had occurred. Rama had made acquaintance in the wilderness [dandacam]

with two forester princes, Vauly [q.v.] and Soogreevan [q.v.], and also with Hanooman [q.v.], whom he now employed, and sent on an embassy to discover where Seetay was concealed. After inquiries, he discovered that she was captive at Lunka [q.v.], the capital of Ravanan. Hanooman was then sent to Lunka as an ambassador to demand the release of Seetay, and met with refusal. The two brothers Vauly and Soogreevan quarrelling, Rama had taken part with the younger; and killing Vauly, had placed Soogreevan on the vacant throne. Soogreevan placed an army of Vaunarams or monkeys [bandar] at the disposal of Rama under Hanooman as general. By their aid he constructed an isthmus or bridge [saitoo]; and passing over it, slew Ravanan, took Lunka, rescued Seetay, and placing Vibheeshanan on the throne of Lunka, returned with his wife to Ayodhyay, and was there crowned. In jealousy, he repudiated Seetay, and sent her to a wilderness, attended by Lutchmanan. She took refuge in the hermitage of Valmeeky [q.v.], and was there delivered of twins, Lavan and Cooshan. Bhavabooty [q.v.], in a play, makes Rama and Seetay meet in their old age and be reconciled. In one interpretation Codandaraman [q.v.] belongs to the age when the Aryan [q.v.] race, already settled in the north, pushed their conquests towards the southern part of the peninsula, and introduced into those wild districts civilization and agriculture, which are typified as Seetay, who is represented in the Vishnoo pooraunam [q.v.] as having been found in the earth. He gives his name to Ramasait, 'rama's bridge,' the line of rocks between India and Ceylon; and to Rameshwaram, where he set up one of the twelve great lingams [q.v.] to Shiva [q.v.]. The zemindar [q.v.] of Ramnaud still bears the title of Saitoopaty [q.v.], or 'keeper of the bridge,' that is to say of Rama's bridge. See vol. I (79). Ramachendran and all the personages of the Sanscrit poem which takes its name from him, are nearly as familiar to the Malays, and more especially to the Javanese, as they are to the inhabitants of this country. The Javanese have poems, both in the ancient and modern tongue, narrating the adventures of Rama, and from these have been formed romances in prose by the Malays. Rama rajyam has become proverbial for a government of equity and goodness.— "*c*" The third Rama is Balaraman, the strong rama, born at the end of the Dwauparam [q.v.], or third age [yoog], as the seventh son of Vasoodevan and Devaky, but mystically transferred from the womb of the latter to that of Vasoo devan's other wife Rohiny, and thus saved from the hands of Cumsan. He was the brother and play-fellow of Krishnan [q.v.]. He is sometimes regarded as an incarnation [avatar] of the serpent Anantan [q.v.] or Sheshan [q.v.]; sometimes called the eighth incarnation of Vishnoo. He is the Hercules of this mythology. See vol. I (79) [matam].—"*d*" Plant first term meaning tall, straight, graceful; of large size; of shining dark; wild. Ex., where translation is of second term:—Guizotia abyssinica (rámtil), sesamum indicum; Hibiscus esculentus (rámturaí), luffa acutangula; Melissa officinalis (rámtulsí), ocimum sanctum; Solanum xanthocarpum (rámagulla), solanum ferox; Typha elephantina (rámabána), arrow. See gloss. paragraphs.——*Ramabramhan* (இராமப்பிரமன் - irámappiramman, Tam.). From (ráma, san. the hero + brahma, san. the supreme spirit); one who meditates on rama as on the supreme spirit [bramh]. Hindoo 2nd or pers. name [peyar].——*Rama charitram* (രാമചരിതം - rámacharitam, Mal.). From (ráma, san. the hero + charita, san. story). The history of the second Rama. Oldest malayalam work.——*Ramadevan* (रामदेव - rámadéva, San.). From (ráma, san. the hero + déva, san. lord), rama, the lord. Also called Ramachendran. Yaudava king of Devagiry. A.D. 1271–1309. Attacked by Malik caufoor [q.v.] for irregular payment of tribute, and sent captive to Delhi. Restored subsequently [charitram]. See vol. I (140). Ramadevan is common Hindoo 2nd or pers. name [peyar].——*Ramah* (రామ - ráma, Tel.). See sep. title.——*Ramakka* (రామక్క - rámakka, Tel.). From (ráma, san. the hero + akka, tel. sister, titular affix of affection). Woman's name [peyar].——*Ramakrishnan* (இராமக்கிருட்டிணன் - irámakkiruttinan, Tam.). From (ráma, san. balaráma + krishna, san. krishna), balaraman and krishnan who were together as play-fellows; see Rama above. Two titles to form one name. Hindoo 2nd or pers. name [peyar].——*Ramalingam* (இராமலிங்கம் - irámalingam, Tam.). From (ráma, san. the hero + linga, san. phallic emblem of shiva). Rama's lingam or shiva as worshipped by rama at rameshwaram [ramanaickar]. Hindoo 2nd or pers. name [peyar].——*Ramalingasawmy* (இராமலிங்கசாமி - irámalingasámi, Tam.). From (ráma, san. the hero + linga, san. phallic emblem of shiva + svámí, san. lord), lord shiva as worshipped by rama. Hindoo 2nd or pers. name [peyar].——*Ramamoorty* (இராமமூர்த்தி - irámamúrtti, Tam.). From (ráma, san. the hero + múrti, san. form), rama, the incarnate vishnoo. Hindoo 2nd or pers. name [peyar].——*Ramamritam* (இராமாமிர்தம் - irámámirutham, Tam.). From (ráma, san. the hero + amrita, san. ambrosia), rama the pleasing god. Hindoo 2nd or pers. name [peyar].——*Raman* (இராமன் - iráman, Tam.). Tam. form of Rama. Feminine Ramy. Hindoo 2nd or pers. name [peyar].——*Ramanaickar* (இராமநாயக்கர் - irámanáyakkar, Tam.). From (ráma, san. the hero + náyaka, san. lord), shiva, the lord of rama. Otherwise Ramalingam [q.v.], the god at Rameshwaram.——*Ramanautan* (இராமநாதன் - irámanáthan, Tam.). From (ráma, san. the hero + nát'ha, san. lord). Epithet of Shiva, as worshipped by Rama. Hindoo 2nd or pers. name [peyar].——*Ramandroog* (ರಾಮನದುರ್ಗ - rámanadurga, Can.; rámandrug *). From (ráma, san. the god + durga, san. fort). Village, Hill, Sanitarium; Bellary district, Sundoor territory; pop. 256; lat. 15° 08′; long. 76° 31′; from Bellary W. 30 miles; from Sundoor W.N.W. 6 miles. Trig. station; lat 15° 07′ 34·57″; long. 76° 30′ 26·65″; height 3,256 feet; from Sundoor W. 7 miles. See vol. II, appendix XII.——*Ramannan* (ರಾಮಣ್ಣ - rámanna, Can.). From (ráma, san. the hero + anna, can. elder brother, titular affix of affection). Hindoo 2nd or pers. name [peyar].——*Ramapatam* ([illegible] - rámayyapatnam, Tel.). From (ráma, san. the god + pattana, san. town). Village; Nellore dist., Cundoocore tal.; pop. 1,151; acres 1,784; lat. 15° 03′; long. 80° 05′; from Chennayapollem N. 4 miles; from Cundoocore S.E. 15 miles; from Madras N. 133 miles; from Nellore N. 41 miles; from Paucala S. 16 miles. Formerly head-quarters of the Sub-collector. Small fishing village. In former years a coasting trade in grain and firewood, since diverted to Buckingham canal [q.v.] which runs through village. Ruined granaries on beach. Only frequented by native craft. Old temple of Ramalingeshwaran. American baptist mission station with a hospital supported by the mission. Beiraugy [q.v.] mutt [q.v.] supported by a russoom [q.v.]. Small tank. Noted for dyeing [shauyam] cloths. Ramapatam beacon trig. station in lat. 15° 3′ 51·21″; long. 80° 5′ 25·49″; from Cundoocore S.E. 14 miles; from Mocherla E.N.E. 3 miles; on the sea coast.——*Rama rajah* (రామరాజ - rámarája, Tel.). From (ráma, san. the hero + rájá, san. king). Vijianugger ruler. Son of Timmarajah, the Bramin minister of the previous ruler Krishna deva roya [q.v.]. Became guardian to the son of the latter. In a rebellion which followed he contrived to assume supreme power and became one of the most powerful of the line. In 1564 engaged the united army of Mahomedans at Talicote [q.v.] and was defeated and killed. With him the power of Vijianugger fell [charitram]. See vol. I (148); II, 251.——*Ramasait* (रामसेतु - rámasétu, San.). Means rama's bund. Adam's bridge [saitoo]. Distinct from Rameshwaram which is only one end of it.——*Rama's areca* (ರಾಮನಡಿಕೆ - rámanadike, Can.). Same as Travancore nutmeg.——*Ramasawmy* (இராமசாமி - irámasámi, Tam.). From (ráma, san. the hero + svámí, san. lord), rama, the lord. The second name or Codandaraman [q.v.]. The commonest proper name among hindooized dravidians, even extending down to pariahs.——*Ramasheshan* (இராமசேசன் - irámasésan, Tam.). From (ráma, san. balaráma + shésha, san. the serpent). Balaraman, the third rama [q.v.] who is said to be Audisheshan [q.v.] incarnate. Compound name. Familiarly Ramasheshoo. Hindoo 2nd or pers. name [peyar].——*Ramasimham* (இராமசிம்மம் - irámasimmam, Tam.). From (ráma, san. the hero + simha, san. lion). The heroic rama. Hindoo 2nd or pers. name [peyar].——*Ramasomayauj* ([illegible] - rámasómayáji, Tel.). From (ráma, san. the hero + sómayáji, san. soma sacrificer, personal title). Hindoo 2nd or pers. name [peyar].——*Ramasoobbee* (இராமசுப்பு - irámasuppu, Tam.). From (ráma, san. the hero + shuppu, tam. familiar contraction of subba, can. serpent). Compound name. Balaraman, the third rama [q.v.] who is said to be incarnation of Audisheshan [q.v.]. Hindoo 2nd or pers. name [peyar].——*Ramasoobramanyan* (இராமசுப்பிரமணியன் - irámasuppiramaniyan, Tam.). From (ráma, san. the hero + subrahmanya, san. skanda the very pious god). Composite name. Hindoo 2nd or pers. name [peyar].——*Ramaunoojacharry* (रामानुजाचार्य - rámánujáchárya, San.). From (ráma, san. the hero + anuja, san. younger brother + áchárya, san. teacher). Otherwise Ramaunoojan. Veishnavite reformer near the end of the eleventh century. Ramaunoojan was born in Shreepermatore near Madras, and studied at Conjeeveram, where he taught his system of the Veishnava faith. His Tamul name was Yembramaunaur [q.v.]. He followed out the vishishtaudweitam development of philosophy, propounded and partially promulgated by the twelve alwars [q.v.] before his time, and engaging in public disputations in different places established and popularized this form of vedauntam [q.v.] more than any of his predecessors in the same school. Besides some original works on religion he wrote commentaries on Vyausa sootram or oottara mimaumsam [q.v.] and Bhagavat geeta [q.v.]; hence he is called Bhaushyacaur or commentary-maker, which in its short form of Bhaushyam, makes a common hindoo proper name [peyar]. As an ascetic he is known as Yatirauz or king of Yaties [q.v.]. He is supposed to be an avatar [q.v.] of Sheshan or audisheshan [q.v.] and it is to be noted that Lutchmanan, rama's brother is also supposed to be sheshan [q.v.] incarnate. Cf. the title Ramaunoojan. The reformer's life is sketched in the foot-note on the History of Hindoo Religion at vol. I (76). His followers are called either Ramaunoojeeyans or Shreeveishnavas. For Ramanoojan's philosophy see Vishishtaudweitam; for the sect see Shreeveishnava [matam].——*Ramaunoojan* ([illegible] - rámánujudu, Tel.; இராமானுசன் - irámánusan, Tam.). From (ráma, san. the hero + anuja, san. younger brother). Lutchmanan, Rama's younger brother. Hindoo 2nd or pers. name [peyar].——*Ramaunoojeeyan* ([illegible]
